General Education Courses

Mathematics general education courses are suitable for all students regardless of mathematical background. The emphasis in these courses is on ideas and their cultural implications. The exception is AK/MATH 1710 6.0 where a preliminary knowledge of elementary algebra is necessary. The focus of AK/MATH 1710 6.0 is on mastering the skills and knowledge essential for in-depth work in any of the mathematically related disciplines; administrative studies, computer science, economics or natural science.

Note: Mathematics courses listed in the Major/Elective section of the Calendar do not fulfill the MATH/MODR general education requirements.

AK/MATH 1700 6.0 The Nature and Growth of Ideas in Mathematics. Students are shown the central position of mathematics in our culture: great discoveries in mathematics and their effect on general culture and society; history of mathematics; mathematics of art and architecture, sound, games and gambling, and computing.

AK/MATH 1710 6.0 Fundamentals of Mathematics. A course of consolidation, review and enrichment of basic mathematical principles and techniques. Topics to be covered include: algebraic equations and inequalities, analytic geometry, trigonometry, elements of finite mathematics and an introduction to calculus.

Note 1: To register in this course students must have first either passed a prerequisite test in Ontario Grade 12 advanced-level mathematics, or have successfully completed, with at least a grade of B, the Continuing Education course CEP3910, Mathematics. An information sheet describing both the continuing education course and the prerequisite test is available from Student and Academic Services, 123 Atkinson and the department office.
