The Department of History offers courses covering thousands of years of history in Africa, Asia, Europe and the Americas. At the 1000 level, students are introduced to the discipline of history through courses that emphasize theory, method and historiography, and that concentrate on fundamental reading, writing, research and analytic skills. At the 2000 level, students are introduced to major chronological and geographic fields of history. More specialized courses are offered at the 3000 level, while 4000-level seminars and colloquia enable small groups of Honours students to focus on specific historical topics.

Courses at the 1000 level have either a lecture/tutorial or seminar format. Courses at the 2000 level normally have two lecture hours and one tutorial hour. Courses at the 3000 level are taught as colloquia, lecture/tutorial or lecture courses. 4000-level courses will be offered as two- or three-hour seminars or colloquia. All courses are open to students studying in other units, unless otherwise indicated. Admission to 4000-level courses is by permission of the instructor or the instructor's representative. The department urges all students whose concentration is in history to contact the appropriate faculty adviser before choosing courses.

All history courses are numbered and grouped according to field. The thousands digit indicates the level at which the course is offered, the hundreds digit indicates the field (general 000, ancient 100, medieval and early modern Europe 200, modern Europe 300, Great Britain 400, Canada 500, United States 600, Africa, Asia, Latin America and Caribbean 700, comparative and interdisciplinary 800), and the remaining two digits indicate the number of the course within the field.

For specific program requirements, please consult the Faculty of Arts Programs of Study section of this calendar.

Subject to program requirements and degree credit equivalent/exclusion and in-Faculty regulations, students may complete courses offered outside of the Faculty of Arts for credit in history.

Traditionally, the humanities include such fields as literature, philosophy, history, art, architecture, music and religion, and it is characteristic of courses offered in the Division of Humanities that they embrace more than one of these fields or disciplines. In short, the Division of Humanities provides a space for interdisciplinary studies in the area of humanities.

Further, it is characteristic of courses in the Division of Humanities that they pay special attention to what is unique, particular and unpredictable in human experience. They are concerned with all aspects of human creativity and thus with cultural expressions of a wide range. Finally, while questions of value are deliberately (and appropriately) set aside in most scientific investigations, questions of value — aesthetic, moral, religious or social — are focal in a humanities course. In other words, it is part of the concern of courses in the humanities to identify the values implicit in a particular society, a piece of literature, a social theory or a work of art.

For specific program requirements, please consult the Faculty of Arts Programs of Study section of this calendar.

The Division of Humanities also houses a number of interdisciplinary programs, including classical studies, classics, creative writing, East Asian studies, European studies, Hellenic studies, Latin American and Caribbean studies, religious studies, and science and society. For details, please consult the Faculty of Arts Programs of Study section of this calendar.

Selected 1000- and 2000-level courses offered through the Division of Humanities are a part of the Faculty of Arts foundations program. These courses have a nine-credit value and as a part of the Faculty of Arts general education requirement introduce students to interdisciplinary study and emphasize critical thinking, reading and writing skills at the university level. (For purposes of meeting program requirements, all foundations courses will count as six credits towards the major or minor.)

Subject to program requirements and degree credit equivalent/exclusion and in-Faculty regulations, students may complete courses offered outside of the Faculty of Arts for credit in humanities.

Individualized Studies – Arts

Program Office:

262 Vanier College, 416-736-5158

Web Address:

<http://www.yorku.ca/human/undergrad/Programs/IndividualizedStudies/>

Program Coordinator:

TBA

The Specialized Honours BA Program in Individualized Studies is designed for students who wish to pursue a topic or line of enquiry that requires drawing together courses from several of the University's disciplines or fields of study.

Students interested in pursuing an individualized studies degree will be asked by the coordinator to prepare a statement describing the particular subject they wish to pursue. They will also be asked to identify a set of courses, from the Faculty of Arts and elsewhere, which are relevant to this theme. If the coordinator is satisfied that the proposed subject cannot be adequately pursued under an established program or departmental major and that sufficient courses and faculty expertise exist to support individualized study in the area in question, the student will be permitted to enter the Individualized Studies Program. Normally, students are eligible to join the program if they have completed at least 24 credits and no more than 66 credits by the start of the academic year.

Students in individualized studies must follow all the rules for a Specialized Honours BA. In addition, they must take, as six of the 54 credits relevant to their theme, the individualized studies thesis course, AS/INDV 4000 6.00. This course is to be taken during the student's final year of study.

Courses in Individualized Studies

AS/INDV 4000 6.00 Individualized Studies Thesis. The purpose of this course is to offer individualized studies students a change to draw together the parts of their topic by carrying out a sustained piece of research and writing. An adviser, arranged for by the student, directs the thesis and acts as one of its reader. Normally the finished thesis is around 60 pages in length. Note: All who intend to register in AS/INDV 4000 6.00 must submit a thesis proposal to the coordinator by September 30.

The Information Technology Program is a multidisciplinary program combining applied computer science with the social and economic issues arising from the use of information technology. To this end, a pattern of courses are offered which will enhance the students' reading, writing and critical skills while providing them with skills in applying information technology in a variety of different circumstances. The program offers Combined and Specialized Honours, in addition to the standard BA. Not all courses listed below are offered every year; all students proposing to register in information technology should discuss their course choices with the program coordinator.

Please refer to the current departmental/divisional mini-calendar for updated program/major requirements.

Le programme de Technologie de l'information est un programme pluridisciplinaire qui combine l'étude de l'informatique à l'étude des questions d'ordre philosophique, politique, social et économique que soulève la technologie de l'information. Les cours de ce programme permettent aux étudiants d'améliorer

leurs compétences en lecture et en rédaction, de développer leur esprit critique, tout en acquérant dans ce domaine des connaissances pratiques qui leur seront utiles dans toutes sortes de circonstances.

Il est recommandé aux étudiants qui veulent se spécialiser en Technologie de l'information de consulter un membre du corps professoral dès le début de leur première année. En attendant, ils peuvent toujours choisir des cours dans la liste qui suit.

Consulter le mini-annuaire du Programme pour connaître les exigences à jour du programme ou de la spécialisation.

3000-Level Courses

General Prerequisites for Arts and Atkinson

All 3000-level and 4000-level information technology courses require the following general prerequisites. Please refer to specific course descriptions for information regarding additional prerequisites.

- AK/AS/ITEC 2010 3.00;
- AK/AS/ITEC 2620 3.00, with at least a grade of C;
- AK/AS/SC/MATH 1190 3.00;
- AK/AS/SC/MATH 2560 3.00;
- AK/AS/SC/MATH 2570 3.00;
- AK/AS/SC/MATH 2320 3.00.

Note: For satisfaction of the general prerequisites, AK/AS/ITEC 1030 3.00, with at least a grade of C, or AK/AS/SC/COSC 1030 3.00, with at least a grade of C, or AK/AS/ITEC 2011 3.00, or AK/AS/SC/COSC 2011 3.00 may be substituted for AK/AS/ITEC 2620 3.00.

Note: The general prerequisites for upper-level information technology courses will be deemed to be met for information technology and applied mathematics, information technology and mathematics, and information technology and statistics majors who have successfully completed AK/AS/ITEC 2010 3.00; AK/AS/ITEC 2620 3.00, with at least a grade of C, and; at least 12 credits of mathematics.

AK/AS/ITEC 3210 3.00 Applied Data Communications and Networks.

Communications systems, environments and components; choices for data, voice and imagery; network control, design and management; distributed and local networks; client/server and intranet technologies; Web-based technologies. Prerequisites: General prerequisites. Degree credit exclusions: AS/AK/SC/COSC 3211 3.00, AS/AK/SC/COSC 3212 3.00, AK/COSC 3409A 3.00, AK/COSC 3409B 3.00, AS/AK/SC/CSE 3211 3.00. GL/ITEC 4635 3.00 Computer Algorithms and Techniques for Imaging Cognition. This course offers an introduction to techniques and computer algorithms for functional brain imaging as well as recent developments in cognitive neuropsychology. It examines how theories of normal cognitive functioning can be informed by evidence from brain-damaged patients and how converging evidence may be obtained from functional neuro-imaging techniques. Programming exercises will use data sets from current experiments. Cross-listed to GL/ITEC 4635 3.00. Prerequisites: GL/CSLA/ITEC 2620 3.00 for students specializing in Computer Science or Information Technology; 6 credits at the 3rd or 4th year level in Psychology for students not specializing in CSLA or ITEC or permission of the instructor.

Cross-listed to: GL/CSLA 4635 3.00, GL/ITEC 4635 3.00

GL/ITEC 4635 3.00 Algorithmes et techniques informatiques pour l'imagerie cognitive. Ce cours offre une introduction aux techniques et algorithmes de l'imagerie fonctionnelle du cerveau aussi bien qu'une présentation des dernières réalisations en neuropsychologie cognitive. Il analyse les théories du fonctionnement cognitif normal et des mesures prélevées sur des patients atteints de lésions cérébrales, et la convergence avec les résultats obtenus à partir des techniques de l'imagerie fonctionnelle du cerveau. Les exercices de programmation prévus utiliseront les données d'expérimentations en cours. Identique à GL/ITEC 4635 3.00 (FR). Conditions préalables : GL/CSLA/ITEC 2620 3.00 pour les étudiants en Informatique et en Technologie de l'information ; six crédits au niveau de 3ème ou de 4ème année en Psychologie pour les étudiants qui suivent d'autres programmes que l'Informatique ou la Technologie de l'information, ou la permission du professeur.

GL/ITEC 4640 3.00 Computer Networks. This course studies ISDN (Integrated Service Digital Network); the ATM (Asynchronous Transfer Mode) Protocol Reference Model; Internet and its networking protocol TCP/IP (Transmission Control Protocol/ Internet Protocol); transfer of multimedia content; packet and data switching; gateways and network interconnections. Prerequisite: GL/CSLA 3625 3.00. Degree credit exclusion: GL/COSC 4520 3.00.

Cross-listed to: GL/CSLA 4640 3.00, GL/ITEC 4640 3.00

GL/ITEC 4645 3.00 Introduction to Bioinformatics A. The course introduces students to elements of computational molecular biology such as nucleotides, amino acids, DNA, proteins, transcription and translation. We will present DNA alignment algorithms such as pair wise alignment, local and global, as well as multiple alignments. The students will use the Internet to access biological databases and learn how these can be used for the molecular structure prediction. Prerequisite: GL/CSLA/ITEC 2620 3.00. Degree credit exclusions: GL/COSC/ITEC 4010 3.00 (Fall/Winter 2001-2002 and Fall/Winter 2002-2003).

Interdisciplinary Fine Arts – Fine Arts

Division Office:

283 Winters College, 416-736-5822

Courses in Interdisciplinary Fine Arts

FA/INFA 1940 6.00 Creative Writing: The Process of the New. This course is an innovative combination of creative writing studios and general lecture. This format is to both promote and inspire creativity, and to encourage and develop an imaginative and intellectual perception of the fine arts, literature and the media in the 20th century.

FA/INFA 2920C 6.00 Photography, Film and the Rise of Popular Culture. Making extensive use of photographs, films and critical texts, the course presents students with a history of the way photography and film have worked individually and in tandem to shape popular imagery, and, by extension, popular culture. Prerequisite: FA/INFA1900 6.0 or permission of the instructor.

FA/INFA 2930 6.00 Interactive Multimedia I. A practicum-oriented course that introduces students to the creative and artistic possibilities of interactive multimedia. Through individual and group projects using Macintosh computers, CD ROM, the Internet, HyperCard and other multimedia software, students gain experience in the creation of multimedia works and develop the necessary skills to critically assess their work and other electronic art. Facility with computers and the web using Netscape is highly recommended.

FA/INFA 3900 3.00 Arts and Cultures. A thematic course on non-European arts that examines the arts in relation to the cultures in which they were produced. The religious, aesthetic and philosophical ideas of a culture and how these relate to and influence the arts are studied through the examination of one or more of: aboriginal arts of the Americas and Australia/New Zealand; Asian arts of China, Japan, India, Korea or Indonesia; African and Afro-Caribbean arts. Emphasis is placed on developing students' ethnographic research skills. Open to all third and fourth year students. Prerequisite: FA/INFA 1900 6.0 or permission of the course director. Prerequisite: FA/INFA1900 6.0 or permission of the course director.

FA/INFA 3900 6.00 Arts and Cultures. A thematic course on non-European arts that examines the arts in relation to the cultures in which they were produced. The religious, aesthetic and philosophical ideas of a culture and how these relate to and influence the arts are studied through the examination of one or more of: aboriginal arts of the Americas and Australia/New Zealand; Asian arts of China, Japan, India, Korea or Indonesia; African and Afro-Caribbean arts. Emphasis is placed on developing students' ethnographic research skills. Open to all third and fourth year students. Prerequisite: FA/INFA 1900 6.0 or permission of the course director.

FA/INFA 3920D 3.00 Contemporary Theory Through Photography and Film. Making reference to a very small number of carefully selected photographic and cinematic texts, the course uses the mechanically reproduced image as a tool to focus theoretical discourse on either textuality or intertextuality. Prerequisite: Second year Fine Arts Cultural Studies course.

FA/INFA 3920E 3.00 Canadian Arts and Culture. Prime Minister Wilfrid Laurier said that "the twentieth century shall be the century of Canada." As the twentieth century comes to a close, scholars, artists, critics, and cultural practitioners continue to explore the nature of Canadian cultural identity. In this seminar, we examine Canadian arts and culture from the perspective of Canadian identity, myths, image, symbols, imagination, experience, and values. We also explore the significance to the Canadian cultural and artistic experience of colonialism, nationalism, regionalism, imperialism, and heroism. Prerequisite: Third year standing.

FA/INFA 3920F 6.00 Arts and Cultural Policy.

FA/INFA 3920G 3.00 The Wunderkammer/Cabinet of Curiosities: A Site for Critical Issues in Cultural Studies. This course takes as its point of departure the concept and construction of the encyclopaedic

Wunderkammer or Cabinet of Curiosities, as well as its forerunner, the Kunstammer (literally, Art Chamber). A later Renaissance invention in which all manner of "precious" objects from the realms of art and science might potentially be classified and preserved, the Wunderkammer and its derivatives through the twentieth century serve as metaphors for, and gateways to, a wide range of issues with particular resonance for Cultural Studies. Prerequisite: Third or fourth year standing in the Faculty of Fine Arts, or permission of the course director.

FA/INFA 3930 6.00 Interactive Multimedia II. An advanced level, individually directed, practicum oriented course that builds on Interactive Multimedia I. Students are involved in the creation of major individual and performance pieces and further exploration of the state of this art. Prerequisite: FA/INFA 2930 6.0 or permission of the course director.

FA/INFA 3931 6.00 Multimedia Installation and Performance. This course gives students an opportunity to explore interactivity in public physical settings. Students create works where the performer and/or audience interact with media on the computer through means other than the keyboard and mouse. Prerequisite: FA/INFA 2930 6.0 or permission of the instructor.

FA/INFA 3950 6.00 Arts Administration. The management of the arts in Canada is illustrated and analyzed through a survey of the history and development of arts management, and an examination of current practices, relating to both the performing and the visual arts. Extensive readings, lectures, active class discussion, case analysis, simulations, field work, guest lectures and audio visual presentations are featured. Note: Open to third and fourth year Fine Arts students.

FA/INFA 4900A 3.00 Contemporary Issues in the Arts: TBA.

FA/INFA 4900B 3.00 Contemporary Issues in the Arts: TBA.

FA/INFA 4920C 6.00 Colonialism and Arts in Cross-Cultural Perspective. This course provides students with the analytical tools necessary to address the current debates in contemporary cultural theory by drawing on ethnographic case studies in Asia, Africa, Latin America and the Caribbean, and Native North America. Student projects explore issues in gender and art; museums and representation; cultural appropriation; authenticity and tradition; Western views of the "primitive;" and consumption. Prerequisite: FA/INFA3900 6.0, or a non-western art history course or an introductory course in anthropology or ethnomusicology, or permission of the instructor.

FA/INFA 4920D 6.00 The Arts and the Law: Policies and Perspectives. An exploration of the interaction between the arts and contemporary legal and social issues, such as property rights in art, copyright and the moral rights of artists, freelance employment and labour relations in the arts, freedom of expression and censorship. Prerequisite: Any of the following: FA/INFA3950 6.0, FA/INFA4951 6.0, FA/THEA2150 3.0, FA/VISA3921 1.5, FA/VISA4921 1.5, or permission of the instructor.

FA/INFA 4920E 3.00 Art, Music, and Some Languages of Interdisciplinarity. This seminar course explores a variety of relationships which have been established between the visual arts and music during the twentieth century. Students have the opportunity to (re)evaluate from an interdisciplinary perspective the production and cultural positioning of each discipline in light of the other, as well as to consider the transformative character of artistic productions which result from their marriage. In conjunction, students are able to address the politics and pleasures of interdisciplinary collaboration. Finally, they work toward refining a critical language which can both explicate, and mediate between, the visual and the aural. Prerequisite: FA/INFA 1900 6.0 and fourth year standing in the Faculty of Fine Arts, or permission of the course director.

FA/INFA 4920F 3.00 Special Studies III: Culture and Memory.

FA/INFA 4920G 3.00 Special Studies III: TBA.

FA/INFA 4920H 3.00 Special Studies III: TBA.

FA/INFA 4930 6.00 Cultural Theory and Interactive Multimedia Art.

This upper level course in both multi-media art and contemporary cultural theory is designed for students who have already achieved a significant level of accomplishment in both these areas. Students will undertake extensive theoretical research using both traditional and on-line resources. The result of that research will be integrated into advanced multi-media projects. Prerequisite: FA/INFA 3930 6.0 and/or permission of the instructors. Note: It is highly recommended that students have taken or will concurrently be taking courses in critical theory.

FA/INFA 4951 6.00 Arts Administration II. This course includes classroom work, field research and independent study. As part of the independent study component, students will either: (a) develop a proposal to independently secure and complete an internship of a minimum of 60 hours in the cultural sector; or (b) undertake research and document a detailed business plan to launch their own cultural enterprise. This course will be of interest to students intending to become cultural entrepreneurs or to be self-employed in the performing arts, visual arts, film, publishing, broadcasting, media, advertising, or other components of the cultural sector. Students must have basic computer literacy skills (e.g. wordprocessing and spreadsheets) and must have e-mail and Internet research skills. The primary objective of this course is to provide highly motivated students with an opportunity to acquire and practise job search, self-employment skills and entrepreneurial skills in the cultural sector. The course is open to Fine Arts Cultural Studies and other Faculty of Fine Arts students. Prerequisite: Any of the following: FA/INFA 3950 6.0, FA/THFA 2150 3.0, FA/VISA 3921 1.5, FA/VISA 4921 1.5.

FA/INFA 4970 3.00 Interdisciplinary Seminar. A seminar on a topic relating fine arts studies to concerns in aesthetics and criticism, to cognate disciplines such as anthropology, psychology and sociology, or to particular methodologies for analysis such as semiotics, structuralism, and performance theory. Prerequisite: One upper-level theoretical or historical course in any Fine Arts department or in Fine Arts Cultural Studies.

FA/INFA 4970 6.00 Interdisciplinary Seminar. A seminar on a topic relating fine arts studies to concerns in aesthetics and criticism, to cognate disciplines such as anthropology, psychology and sociology, or to particular methodologies for analysis such as semiotics, structuralism, and performance theory. Prerequisite: One upper-level theoretical or historical course in any Fine Arts department or in Fine Arts Cultural Studies.

The Interdisciplinary Program in International Development Studies offers a variety of courses in the field of development studies. Students in the program are required to complete a coherent set of core courses, as well as a selection of courses from a number of departments and disciplines which focus on the histories, political economies and cultures of various regions and their diasporic communities. The core courses identify central issues in the field from a critical liberal arts and comparative perspective, and introduce students to specific analytical methods and techniques in the field of development studies. While highlighting common themes in the field of development, the core courses also emphasize the diversity of experiences in the developing world and the regional and subregional specificities. In addition to the core courses, the program consists of introductory area studies courses, intended to familiarize students with the

social, political, economic and cultural dynamics of regions in the developing world, and additional courses grouped into the following areas of concentration: culture; diasporas and migration; environment; gender; political economy; politics, governance and policy.

The International Development Studies Program is intended to provide students with a thorough grounding in the history, debates, dimensions, institutional approaches and critiques of the field. As well, students in the program will develop the skills and knowledge required to read the documents of international development/financial institutions such as the CIDA and the World Bank, understand the institutional language of development professionals, and create and implement development research or delivery proposals.

For specific program requirements and the list of program courses, please consult the Faculty of Arts Programs of Study section of this calendar.

The School of Kinesiology and Health Science has a curriculum which presents wide and flexible offerings to the student. All students take a core of required subject matter encompassing the major areas of emphasis in kinesiology and health science. Students may choose from a variety of elective courses to develop a highly specialized area of interest or to obtain a more general and broad program. The School attaches laboratories, field work and seminars to many of its courses, thereby coupling theory and technical knowledge with applied experiences and providing students with a greater opportunity for exchange and discussion with each other, with teachers and with experts in the area. The School also has grouped courses, enabling students to obtain certification in the areas of athletic therapy, sport administration, coaching and fitness assessment and exercise counselling.

A physical activity skills "practicum" program is an integral part of the Undergraduate Program in Kinesiology and Health Science. Students take at least two practicum credits in each of gymnastics/dance, aquatics, team sports, individual sports, track and field, and emergency care, and complete their requirements from the large variety of practicum courses offered.

For specific Honours BA program requirements please consult the Faculty of Arts Programs of Study section of this calendar. For specific Honours BSc program requirements please consult the Faculty of Science and Engineering Programs of Study section of this calendar.

Courses in Kinesiology and Health Science

Academic courses in kinesiology and health science offered by the School of Kinesiology and Health Science have the prefix "KINE". Practicum courses have the prefix "PKIN".

AS/SC/KINE 1000 4.00 Sociocultural Perspectives in Kinesiology.

This course examines the historical, philosophical and socio-cultural factors critical in the development of kinesiology and health science. Body concepts and human movement issues are explored. Critical skills (analysis, research, writing), academic and career planning are included. One and one-half lecture hours per week, plus one hour tutorial in alternate weeks. Two terms. Degree credit exclusions: AS/SC/KINE 1000 3.00, AS/SC/KINE 2010 3.00, AS/SC/PHED 1000 3.00, AS/SC/PHED 1010 3.00, AS/SC/PHED 2010 3.00.

Cross-listed to: AS/KINE 1000 4.00, SC/KINE 1000 4.00

AS/SC/KINE 1020 5.00 Fitness Assessment and Training.

An analysis of the basic elements of fitness including their assessment and training. Topics such as athlete assessment, employee fitness programs, home fitness programs, private clubs, fitness assessment certification and government fitness programs are also covered. One and one-half lecture hours per week plus one lecture hour on applied techniques of calculation

in alternate weeks, plus two laboratory hours in alternate weeks. Two terms. Degree credit exclusions: AS/SC/KINE 1020 3.00, AS/SC/KINE 1020 4.00, AS/SC/PHED 1020 3.00.

Cross-listed to: AS/KINE 1020 5.00, SC/KINE 1020 5.00

AS/SC/KINE 2000 3.00 Psychology of Physical Activity. An overview of the theoretical frameworks and psychological principles related to physical activity, exercise and sport. Practical applications to individual and group performance enhancement are emphasized. Three lecture hours per week. One term. Prerequisite: AS/SC/PSYC 1010 6.00. Degree credit exclusions: AS/SC/KINE 3090 3.00, AS/SC/PHED 3090 3.00.

Cross-listed to: AS/KINE 2000 3.00, SC/KINE 2000 3.00

AS/SC/KINE 2020 3.00 Introduction to Health. This course provides an introduction to factors that influence health status. Included are health definitions, health promotion, chronic diseases, disease prevention and basic epidemiological principles. Three lecture hours per week. One term. Degree credit exclusions: AS/SC/KINE 3080 3.00, AS/SC/PHED 3080 3.00.

Cross-listed to: AS/KINE 2020 3.00, SC/KINE 2020 3.00

AS/SC/KINE 2031 3.00 Human Anatomy. An overview of the organization and structure of the human body. Each of the following systems is examined with respect to cell morphology, cell and tissue arrangement and inter-systems organization: skeletal, muscular, nervous, circulatory, lymphatic, respiratory, urinary, reproductive and endocrine. Three lecture hours per week, two laboratory hours in alternate weeks. One term. Degree credit exclusions: AS/SC/KINE 3070 3.00, AS/SC/PHED 2070 3.00, SC/PHED 2070 4.00, AS/PHED 3070 3.00, SC/PHED 3070 4.00, SC/NATS 1650 6.00.

Cross-listed to: AS/KINE 2031 3.00, SC/KINE 2031 3.00

AS/SC/KINE 2049 3.00 Research Methods in Kinesiology. This course introduces students to the procedures utilized to design and conduct research in the discipline of kinesiology. Two lecture hours, two laboratory hours, and one hour review/problem solving per week. One term. Degree credit exclusions: AS/SC/KINE 2049 4.00, AK/AS/SC/PSYC 2030 3.00, AK/PSYC 2530 3.00.

Cross-listed to: AS/KINE 2049 3.00, SC/KINE 2049 3.00

AS/SC/KINE 2050 3.00 Analysis of Data in Kinesiology I. An introduction to scientific method and the statistical analysis of experimental data. The conduct of simple experiments, techniques of naturalistic observation and the analysis of resulting data using fundamental concepts of descriptive and inferential statistics. Two lecture hours and two laboratory hours per week. One term. Prerequisite: AS/SC/KINE 2049 4.00. Degree credit exclusions: SC/BIOL 2060 3.00, SC/BIOL 3090 3.00, AS/ECON 2500 3.00, ES/ENVS 2010 6.00, ES/ENVS 2010 3.00, AS/SC/GEOG 2420 3.00, AK/AS/SC/MATH 1131 3.00, AS/SC/MATH 1132 3.00, AK/AS/SC/MATH 2500 3.00, AK/AS/SC/MATH 2560 3.00, AS/SC/PHED 2050 3.00, AS/POLS 3300 6.00, AK/AS/SC/PSYC 2020 6.00, AK/AS/SC/PSYC 2021 3.00, AK/PSYC 2510 3.00, AS/SOCI 2030 6.00, AS/SOCI 3030 6.00.

Cross-listed to: AS/KINE 2050 3.00, SC/KINE 2050 3.00

AS/KINE 2380 3.00 Introduction to Sport Administration. This course is designed to introduce students to the knowledge and skills needed to be successful in sport management. Topics include leadership styles, communication and change management skills, creative problem-solving and an introduction to event management and marketing. Three lecture hours per week. One term.

AS/SC/KINE 2475 3.00 Coaching: The Art and Science. This course introduces the fundamental principles involved in the coaching process. Background and philosophic issues related to the coach and the athlete are explored. Three lecture hours per week. One term. Note: Upon successful completion of this course, students receive Level I Theory certification of the National Coaching Certificate Program.

Cross-listed to: AS/KINE 2475 3.00, SC/KINE 2475 3.00

AS/SC/KINE 2490 3.00 Athletic Therapy I. The purpose of the course is to provide students with a broad spectrum of knowledge relating to the

physiological, psychosocial and pathological aspects of participation in sport with an emphasis on the management factors in injury prevention and remediation. Three lecture hours per week. One term. Prerequisite or corequisite: AS/SC/KINE 2031 3.00. Degree credit exclusion: AS/SC/PHED 2490 3.00.

Cross-listed to: AS/KINE 2490 3.00, SC/KINE 2490 3.00

AS/SC/KINE 3011 3.00 Human Physiology I. The focus of this course is the cellular basis of human physiology. Basic principles of physiology are presented from the viewpoint of the simplest structural unit - the cell, in order to provide a sound basis for understanding complex multi-cellular organisms in subsequent courses. Three lecture hours per week. One term. Prerequisite: AS/SC/KINE 2031 3.00. Degree credit exclusions: AS/SC/KINE 3070 3.00, AS/SC/PHED 2070 3.00, SC/PHED 2070 4.00, AS/SC/PHED 3010 3.00, SC/PHED 3010 4.00, AS/PHED 3070 3.00, SC/PHED 3070 4.00.

Cross-listed to: AS/KINE 3011 3.00, SC/KINE 3011 3.00

AS/SC/KINE 3012 3.00 Human Physiology II. The principles of homeostasis and physiological regulation are studied in relation to the cardiorespiratory, renal, locomotor, reproductive and digestive systems. Laboratory work is an essential part of the course. Three lecture hours per week, two laboratory hours in alternate weeks. One term. Prerequisite: AS/SC/KINE 3011 3.00. Introductory biology or life science is highly recommended. Degree credit exclusions: AS/SC/KINE 3070 3.00, AS/SC/PHED 2070 3.00, SC/PHED 2070 4.00, AS/SC/PHED 3010 3.00, SC/PHED 3010 4.00, AS/PHED 3070 3.00, SC/PHED 3070 4.00.

Cross-listed to: AS/KINE 3012 3.00, SC/KINE 3012 3.00

AS/SC/KINE 3020 3.00 Skilled Performance and Motor Learning. An introduction to the analysis and development of skilled performance. Two lecture hours and two laboratory hours per week. One term. Prerequisites: AS/SC/KINE 2050 3.00; AS/SC/PSYC 1010 6.00. Degree credit exclusion: AS/SC/PHED 3020 3.00.

Cross-listed to: AS/KINE 3020 3.00, SC/KINE 3020 3.00

AS/SC/KINE 3030 3.00 Introduction to Biomechanical Analysis of Human Movement. Human movement is investigated with particular reference to the laws of physics (mechanics) and anatomical concepts as applied to joint motion and muscular action. Application of biomechanics to sports skills execution and laboratory exposure to contemporary analysis are included. Three lecture hours and one laboratory hour per week. One term. Prerequisite: AS/SC/KINE 2031 3.00. Degree credit exclusion: AS/SC/PHED 3030 3.00.

Cross-listed to: AS/KINE 3030 3.00, SC/KINE 3030 3.00

AS/SC/KINE 3090 3.00 Psychology of Sport and Physical Activity. The theories and research of major topics in sport psychology are presented. Three lecture hours per week. One term. Prerequisites: AS/SC/KINE 2050 3.00; AS/SC/PSYC 1010 6.00. Degree credit exclusions: AS/SC/KINE 2000 3.00, AS/SC/PHED 3090 3.00.

Cross-listed to: AS/KINE 3090 3.00, SC/KINE 3090 3.00

AS/SC/KINE 3150 3.00 Analysis of Data in Kinesiology II. This intermediate course in inferential statistics includes t-tests, multiple regression, ANOVA and selected non-parametric statistics. Practical applications to research in kinesiology and health science are emphasized. Three lecture hours per week. One term. Prerequisite: AS/SC/KINE 2050 3.00. Degree credit exclusions: SC/BIOL 2060 3.00, SC/BIOL 3090 3.00, AS/ECON 3500 3.00, ES/ENVS 2010 6.00, AS/SC/GEOG 2420 3.00, AS/SC/MATH 1132 3.00, AK/AS/SC/MATH 2500 3.00, AK/AS/SC/MATH 2570 3.00, AS/POLS 3300 6.00, AK/AS/SC/PSYC 2020 6.00, AK/AS/SC/PSYC 2022 3.00, AK/PSYC 3110 3.00, AS/SOCI 3030 6.00.

Cross-listed to: AS/KINE 3150 3.00, SC/KINE 3150 3.00

AS/KINE 3240 3.00 Behavioural Approach to Administration of Fitness and Sport. The focus of this course is on working with people. Students learn the theory and practice of team building, communication and counselling skills. Three lecture hours per week. One term. Degree credit exclusion: AS/PHED 2420 3.00.

AS/KINE 3250 3.00 Business Management in Sport, Fitness and Allied Health. An overview of the key business management practices in the sport, fitness and allied health fields. The main emphasis is the development of an understanding of the theory, practices and skills which are essential to effective management. Three lecture hours per week. One term. Prerequisites: AS/SC/KINE 1000 4.00; AS/SC/KINE 1020 4.00. Degree credit exclusions: AS/KINE 4430 3.00. Not open to students enrolled in the Fitness Assessment and Exercise Counselling Certificate or the Sport Administration Certificate.

AS/SC/KINE 3340 3.00 Growth, Maturation and Physical Activity. The major purpose of this course is to examine and discuss the literature and research studies in those aspects of physical growth and development that directly concern educators. Individual differences in growth and development are stressed throughout. Three lecture hours per week. One term. Degree credit exclusion: AS/SC/PHED 3340 3.00.

Cross-listed to: AS/KINE 3340 3.00, SC/KINE 3340 3.00

AS/SC/KINE 3350 3.00 Physical Activity, Health and Aging. The course examines the aging process, lifestyle changes and the effect of physical activity on the health of aging adults. Three lecture hours per week. One term. Prerequisites: AS/SC/KINE 1020 4.00; AS/SC/KINE 2020 3.00. Note: Internet use is required for this course.

Cross-listed to: AS/KINE 3350 3.00, SC/KINE 3350 3.00

AS/SC/KINE 3400 3.00 Fitness Consulting and Personal Fitness Training. This course provides detailed theoretical and practical instruction on physical activity/exercise prescription, management, supervision and intervention strategies with a focus on health-related fitness outcomes. Three lecture hours per week. One term. Prerequisites: AS/SC/KINE 1020 5.00; AS/SC/KINE 2031 3.00; AS/SC/KINE 3011 3.00. Corequisite: AS/SC/KINE 3012 3.00; AS/SC/KINE 3030 3.00.

Cross-listed to: AS/KINE 3400 3.00, SC/KINE 3400 3.00

AS/SC/KINE 3400 3.00 Fitness Consulting and Personal Fitness Training. This course provides detailed theoretical and practical instruction on physical activity/exercise prescription, management, supervision and intervention strategies with a focus on health-related fitness outcomes. Two lecture hours and two laboratory hours per week. One term. Prerequisites: AS/SC/KINE 1020 4.00; AS/SC/KINE 2031 3.00; AS/SC/PKIN 7500 2.00; permission of the course director. Corequisite: AS/SC/KINE 3011 3.00.

Cross-listed to: AS/KINE 3400 3.00, SC/KINE 3400 3.00

AS/KINE 3420 3.00 Cultural Studies of Sport, Leisure and Health. An introductory course offering students an opportunity to examine key concepts in cultural studies, such as representation, media, identity and hegemony as they relate to sport, leisure and health. Prerequisite: AS/SC/KINE 1000 4.00.

AS/KINE 3430 3.00 Sports in Canadian Life. An historical examination of sports in Canadian society, including their origin, introduction to North America and development in Canada up to the present. The influence of Canadian culture as a whole on the development of the selected sports is considered. Three lecture hours per week. One term. Degree credit exclusion: AS/PHED 3430 3.00.

AS/KINE 3440 3.00 Politics of the Olympic Games. A comparative analysis of recent developments and characteristics of physical education and sports in representative nations and world regions. The course covers objectives, methods, personnel and facilities in physical education and evaluation of selected national sports programs. Three lecture hours per week. One term. Degree credit exclusion: AS/PHED 3440 3.00.

AS/SC/KINE 3450 3.00 Athletic Injuries. An introductory examination of prevention, recognition and treatment of common athletic injuries. Follow-up remedial procedures and therapeutic modalities to enhance healing are also studied. Two lecture hours and two laboratory hours per week. One term. Prerequisite: AS/SC/KINE 2031 3.00. Degree credit exclusion: AS/SC/PHED 3450 3.00.

Cross-listed to: AS/KINE 3450 3.00, SC/KINE 3450 3.00

AS/SC/KINE 3460 3.00 Regional Human Anatomy I. A comprehensive study of the structures of the human body. This course includes an examination of the upper limb, lower limb and back. Two lecture hours and two laboratory hours per week. One term. Prerequisite: AS/SC/KINE 2031 3.00. Degree credit exclusion: AS/SC/PHED 3460 3.00.

Cross-listed to: AS/KINE 3460 3.00, SC/KINE 3460 3.00

AS/SC/KINE 3465 3.00 Regional Human Anatomy II. This course examines, in detail, the anatomical regions of the head, neck, back and thorax. Three lecture hours per week. One term. Prerequisite: AS/SC/KINE 2031 3.00. Degree credit exclusion: AS/SC/KINE 3050C 3.00.

Cross-listed to: AS/KINE 3465 3.00, SC/KINE 3465 3.00

AS/SC/KINE 3480 3.00 Outdoor and Experiential Education. This course introduces fundamental principles and practices of outdoor and experiential education. Current theories, issues, trends and practices are discussed and the objectives of a range of outdoor programs are considered. Three lecture hours per week. One term. Degree credit exclusion: AS/SC/PHED 3480 3.00.

Cross-listed to: AS/KINE 3480 3.00, SC/KINE 3480 3.00

AS/KINE 3490 3.00 Politics and Policy in the Sport Industry. Discussions about power, politics and ethics as they relate to current sport policy issues are explored. Policy development and policy analysis skills are learned and applied to issues in professional sport, amateur sport and university athletics. Three lecture hours per week. One term. Degree credit exclusion: AS/PHED 3490 3.00.

AS/KINE 3510 3.00 Sport Marketing and Event Management. The purpose of this course is to provide students with both the theory and practical skills required to organize and manage events. Additionally, students have the opportunity to learn from professionals working in this field. Three lecture hours per week. One term. Degree credit exclusion: AS/PHED 3510 3.00.

AS/SC/KINE 3570 3.00 Theory and Methodology of Training. The course provides an examination of the scientific and methodological theories, techniques and planning methods utilized in the training of the skilled athlete, with practical application to selected sports. Three lecture hours per week. One term. Prerequisites: AS/SC/KINE 1000 4.00; AS/SC/KINE 1020 4.00. Degree credit exclusion: AS/PHED 3570 3.00.

Cross-listed to: AS/KINE 3570 3.00, SC/KINE 3570 3.00

AS/KINE 3580 3.00 Coaching: The Strategy and Tactics of Sport. This course investigates the conceptual basis of strategic and tactical planning for sports performance. An emphasis is placed on analyzing the variety of sources that contribute to the conceptual framework a coach may use in formulating strategic and tactical plans. Three lecture hours per week. One term. Prerequisites or corequisites: AS/SC/KINE 2475 3.00.

AS/SC/KINE 3585 3.00 Clinical Placement in Athletic Therapy. This course provides students with the opportunity to gain practical experience in clinical situations within the profession of athletic therapy. Students integrate theory and practice in actual workplace situations by working directly with sports medicine specialists. Ten hours clinical placement per week, five one-and-a-half hour seminars. One term. Prerequisites: Open only to athletic therapy certificate students, with permission of the athletic therapy program coordinator.

Cross-listed to: AS/KINE 3585 3.00, SC/KINE 3585 3.00

AS/SC/KINE 3600 3.00 Athletic Therapy II. This course provides students with a broad spectrum of knowledge relating to the physiological and pathological aspects of participation in sport with an emphasis on detection and human factors in injury prevention and remediation. Three lecture hours per week. One term. Prerequisite: AS/SC/KINE 2490 3.00. Degree credit exclusion: AS/SC/PHED 3600 3.00.

Cross-listed to: AS/KINE 3600 3.00, SC/KINE 3600 3.00

AS/SC/KINE 3610 3.00 Coaching: Psychological and Sociological Aspects. The course focuses upon the application of principles of psychology to coaching. An examination of philosophy of coaching, legal liability, socialization and team dynamics is also undertaken with a view to

establishing effective coaching methodology. Three lecture hours per week. One term. Prerequisites: AS/SC/KINE 2475 3.00; AS/SC/PSYC 1010 6.00. Degree credit exclusions: AS/SC/PHED 2470 6.00, AS/SC/PHED 3610 3.00.

Cross-listed to: AS/KINE 3610 3.00, SC/KINE 3610 3.00

AS/KINE 3620 3.00 Sociology of Sport I. Sociological analysis of sport in contemporary society with particular emphasis on issues relating to children, gender and the Canadian scene. Three lecture hours per week. One term. Degree credit exclusions: AS/SC/PHED 3620 3.00, AS/SOCI 3670 3.00.

AS/KINE 3630 3.00 Race and Sport. The purpose of the course is to explore the concepts of race and its ideologies applied to sport, the unique conditions of minority athletes and historical transformations. Three lecture hours per week. One term. Prerequisite: AS/SC/KINE 1000 4.00 or AS/SC/KINE 2010 3.00. Degree credit exclusion: AS KINE 4340 3.00

AS/SC/KINE 3640 3.00 Epidemiology of Physical Activity, Fitness and Health. This course provides an in-depth assessment of the epidemiology of physical activity, fitness and health. General concepts of epidemiology are covered, as well as associations among activity, exercise, fitness and disease/risk factors. Three lecture hours per week. One term. Prerequisite: AS/SC/KINE 2020 3.00. Degree credit exclusion: AS/SC/KINE 3050B 3.00.

Cross-listed to: AS/KINE 3640 3.00, SC/KINE 3640 3.00

AS/SC/KINE 3645 3.00 Physical Activity and Health Promotion. This course explores the Canadian context of health promotion and physical activity with a specific emphasis on health communication, "best practices" in programming for communities, workplaces, schools and health care settings, and the development of public policy

Cross-listed to: AS/KINE 3645 3.00, SC/KINE 3645 3.00

4000-Level Courses

Note: Only students with Honours standing may register in 4000-level kinesiology and health science courses.

AS/SC/KINE 4010 3.00 Exercise Physiology. The study of the physiological mechanisms involved during physical activity. The course covers the physiological effects of exercise and training upon the neuromuscular, cardiovascular, respiratory and metabolic systems. Three lecture hours per week, two laboratory/tutorial hours in alternate weeks. One term. Prerequisites: AS/SC/KINE 3011 3.00; AS/SC/KINE 3012 3.00.

Cross-listed to: AS/KINE 4010 3.00, SC/KINE 4010 3.00

AS/SC/KINE 4020 3.00 Human Nutrition I. Basic energy and regulatory nutrients are examined, followed by an applied nutrition section in weight control, eating disorders, sport nutrition, food as drugs and food safety. Metabolic interrelationships and health associations are applied throughout. Three lecture hours per week. One term. Prerequisite or corequisite: AS/SC/KINE 4010 3.00. Degree credit exclusion: AS/SC/KINE 4470 3.00 (if completed prior to Fall/Winter 2003-2004).

Cross-listed to: AS/KINE 4020 3.00, SC/KINE 4020 3.00

AS/SC/KINE 4060 3.00 Independent Studies in Kinesiology and Health Science. Students undertake a research project under the supervision of a faculty member. This should include a library investigation, and may include laboratory and/or field investigations. A substantial paper, a poster presentation and an oral presentation are part of the course requirements. Prerequisite: Normally only available to students after completion of 84 credits. Note: See the Faculty of Arts section of the Undergraduate Programs Calendar for Faculty of Arts regulations on "Independent Reading Courses."

Cross-listed to: AS/KINE 4060 3.00, SC/KINE 4060 3.00

AS/SC/KINE 4060 6.00 Independent Studies in Kinesiology and Health Science. Students undertake a research project under the supervision of a faculty member. This should include a library investigation, and may include laboratory and/or field investigations. A substantial paper, a poster presentation and an oral presentation are part

of the course requirements. Prerequisite: Normally only available to students after completion of 84 credits. Note: See the Faculty of Arts section of the Undergraduate Programs Calendar for Faculty of Arts regulations on "Independent Reading Courses."

Cross-listed to: AS/KINE 4060 6.00, SC/KINE 4060 6.00

AS/SC/KINE 4060N 3.00 Independent Studies in Kinesiology and Health Science. Students undertake a research project under the supervision of a faculty member. This should include a library investigation, and may include laboratory and/or field investigations. A substantial paper, a poster presentation and an oral presentation are part of the course requirements. Prerequisite: Normally only available to students after completion of 84 credits. Note: See the Faculty of Arts section of the Undergraduate Programs Calendar for Faculty of Arts regulations on "Independent Reading Courses."

Cross-listed to: AS/KINE 4060N 3.00, SC/KINE 4060N 3.00

AS/KINE 4340 3.00 Sport, "Race" and Popular Culture in Canada. The course gives students a historical and contemporary understanding of 'race' and racism in Canadian popular culture as it pertains to the world of sport. Prerequisite: AS/SC/KINE 1000 4.00. Degree credit exclusion: AS KINE 3630 3.00.

AS/KINE 4350 3.00 Women and Sport. This course examines the accelerating emergence of women and girls in sport traditionally organized as exclusive male domain. The dynamics between women's aspirations in competitive sport, and cultural/systemic barriers to equality, are studied. Three lecture/discussion hours per week. One term. Prerequisites: AS/SC/KINE 1000 4.00 or AS/SC/KINE 2010 3.00; AS/KINE 3650 3.00. Degree credit exclusion: AS/KINE 4350 6.00. Note: Internet use is required for this course.

AS/KINE 4360 3.00 Gender and Sport. This course examines sociohistorical links between gender and social power expressed in sporting contexts, normally considered a male domain. The resistance to such notions by women and girls challenges received values, practices and scholarship. Does any sport have a gender? Three lecture hours per week. One term. Prerequisite: AS/SC/KINE 1000 4.00 or AS/SC/KINE 2010 3.00. Degree credit exclusions: AS/KINE 3650 3.00, AS/KINE 4350 6.00, AS/PHED 4350 6.00.

AS/SC/KINE 4400 6.00 Advanced Fitness/Lifestyle Assessment and Counselling. Students receive supervised, practical experience in designing, administering and interpreting fitness assessments along with the follow-up exercise counselling for athletes and the general public. Two lecture hours and three laboratory hours per week. Two terms. Prerequisites: AS/SC/KINE 3400 3.00; permission of the course director. Open only to students in the Certificate in Fitness Assessment and Exercise Counselling. Prerequisite or corequisite: AS/SC/KINE 4010 3.00.

Cross-listed to: AS/KINE 4400 6.00, SC/KINE 4400 6.00

SC/KINE 4410 3.00 Cellular and Molecular Physiology for the Health Science. An overview of mammalian gene expression, membrane biochemistry, molecular neuroscience and techniques in molecular biology, with an emphasis on health, disease, exercise and adaptation. Three lecture hours per week. One term. Prerequisite: AS/SC/KINE 3012 3.0. Degree credit exclusion: AS/SC/KINE 4448 3.0.

AS/KINE 4420 3.00 Relaxation: Theory and Practice. This course focuses on an understanding of the physiological and psychological basis of relaxation as a self-management procedure and in the utilization of relaxation strategies in sport, health and physical activity. Three lecture hours per week. One term. Prerequisites: AS/SC/KINE 2031 3.00; AS/SC/KINE 3011 3.00; AS/SC/KINE 3012 3.00 or permission of the course director.

AS/SC/KINE 4421 3.00 Relaxation II: Research and Application. This course reviews the research and application of self-regulation strategies (relaxation, biofeedback, imagery, cognitive restructuring and attention control) for performance and health enhancement. Three lecture hours per week. One term. Prerequisite: AS/KINE 4420 3.00.

Cross-listed to: AS/KINE 4421 3.00, SC/KINE 4421 3.00

AS/KINE 4430 3.00 Business Skills for Sport and Fitness Professionals. This course includes theory and detailed practical instruction about key management/organizational processes and their successful application to sport and fitness-related business initiatives. Three lecture hours per week. One term. Prerequisite: Students must be in the Sport Administration Certificate or the Fitness Assessment and Exercise Counselling Certificate. Degree credit exclusions: AS/KINE 3250 3.00, AS/PHED 4430 3.00.

AS/SC/KINE 4440 3.00 Advanced Exercise Physiology: Muscle. Advanced topics in exercise physiology and biochemistry, including energy metabolism, fatigue, skeletal muscle physiology, adaptations to exercise and training. Applications of exercise to disease states, animal laboratories, and discussions of original research articles in exercise physiology. Three class hours (lectures/laboratories/tutorials) per week. One term. Prerequisite: AS/SC/KINE 4010 3.00.

Cross-listed to: AS/KINE 4440 3.00, SC/KINE 4440 3.00

AS/SC/KINE 4445 3.00 Physiological Basis of Fatigue. An in-depth examination of the physiological processes that limit muscular exercise. Topics include cellular and metabolic failure in sustained muscular contractions, central nervous system limitations, substrate depletion and product accumulation, body fluid shifts and adaptations that forestall fatigue. Three lecture hours per week. One term. Prerequisites: AS/SC/KINE 3011 3.00; AS/SC/KINE 3012 3.00; AS/SC/KINE 4010 3.00.

Cross-listed to: AS/KINE 4445 3.00, SC/KINE 4445 3.00

AS/SC/KINE 4448 3.00 Advanced Human Physiology: Endocrinology. An overview of human endocrinology at the physiological, biochemical and molecular levels, with an emphasis on health, disease, exercise and adaptation. Three hours per week. One term. Prerequisite: AS/SC KINE 4010 3.00. Degree credit exclusions: SC/BIOL 4320 3.00, SC/KINE 4410 3.00.

Cross-listed to: AS/KINE 4448 3.00, SC/KINE 4448 3.00

AS/SC/KINE 4450 3.00 Advanced Exercise Physiology: Cardiovascular. An overview of the cardiovascular physiology of exercise at both the central (heart) and peripheral (blood vessels, capillaries) levels, with an emphasis on health, disease, exercise and adaptation. Physiology adaptations at the molecular level are emphasized. Two lecture hours and two lab hours per week. One term. Prerequisite: AS/SC/KINE 4010 3.00.

Cross-listed to: AS/KINE 4450 3.00, SC/KINE 4450 3.00

AS/SC/KINE 4451 3.00 Advanced Biomechanical Analysis of Human Movement (Part I - Kinematics). An examination of human motion, including the fundamentals of motion description, mechanics, and investigative techniques in biomechanics with an emphasis on the kinematics of movement. Special topics and problems relevant to students' interests are covered in seminars and small group laboratory sessions. Two lecture hours per week, plus laboratory hours. One term. Prerequisite: AS/SC/KINE 3030 3.00.

Cross-listed to: AS/KINE 4451 3.00, SC/KINE 4451 3.00

AS/SC/KINE 4452 3.00 Advanced Biomechanical Analysis of Human Movement (Part II - Kinetics). An examination of human motion, including the fundamentals of motion description, mechanics, and investigative techniques in biomechanics with an emphasis on the kinetics of movement. Special topics and problems relevant to students' interests are covered in seminars and small group laboratory sessions. Two lecture hours per week, plus laboratory hours. One term. Prerequisite: AS/SC/KINE 4451 3.0.

Cross-listed to: AS/KINE 4452 3.00, SC/KINE 4452 3.00

AS/SC/KINE 4455 3.00 Biomechanics and Motor Control Laboratory. This course focuses on the theory and practice of methods for analyzing the mechanics and control of movement. Methods include collection and analysis of biological signals such as electromyography and evoked potentials, as well as techniques for both kinematic and kinetic analysis of movement. Two lecture hours and two lab hours per week. One term. Prerequisites: AS/SC/KINE 3020 3.00, AS/SC/KINE 3030 3.00.

Cross-listed to: AS/KINE 4455 3.00, SC/KINE 4455 3.00

AS/SC/KINE 4460 3.00 Occupational Biomechanics. (formerly AS/SC/KINE 4050A 3.00 - before 1999-2000) Use of biomechanics in the occupational setting is introduced. Topics include workplace assessment techniques, injury mechanisms, tissue mechanics and the (re)design of tools and workplace. Specific disorders and issues involving the upper extremity and lower back are addressed. Three lecture hours per week. One term. Prerequisite: AS/SC/KINE 3030 3.00. Degree credit exclusion: AS/SC/KINE 4050A 3.00.

Cross-listed to: AS/KINE 4460 3.00, SC/KINE 4460 3.00

AS/SC/KINE 4470 3.00 Muscle and Joint Biomechanics. Quantitative biomechanical principles are used to evaluate the production of human motion at the joint and muscle level. Factors affecting total joint moment of force are studied including muscle mechanics, muscle architecture, moment arm and electrophysiology. Two lecture hours and two laboratory hours per week. One term. Prerequisite: AS/SC/KINE 3030 3.00. Degree credit exclusions: AS/SC/KINE 3050E 3.00 (Fall/Winter 2000-2001), AS/SC/KINE 3470 3.00.

Cross-listed to: AS/KINE 4470 3.00, SC/KINE 4470 3.00

AS/SC/KINE 4475 3.00 Clinical Biomechanics. Quantitative biomechanical techniques are used to evaluate musculoskeletal injuries and pathological movement. Standard biomechanics techniques and modeling methods are combined with an understanding of tissue mechanics to quantitatively evaluate injury mechanisms and rehabilitation of tissues (bone, ligament, tendon, muscle). Three lecture hours per week. One term. Prerequisite: AS/SC/KINE 3030 3.00. Recommended: AS/SC/KINE 3470 3.00.

Cross-listed to: AS/KINE 4475 3.00, SC/KINE 4475 3.00

AS/KINE 4480 3.00 Sociology of Sport II. This course focuses on social problems in sport. Topics include inequality, sport as work, sport as a spectacle, and sport and the state. Three lecture hours per week. One term. Prerequisite: AS/KINE 3620 3.00 or permission of the course director. Degree credit exclusion: AS/PHED 4480 3.00.

AS/KINE 4490 3.00 Philosophy and Issues in Physical Education and Sport. Examination of the philosophical foundations of physical education; their manifestation and other influences on development of physical education programs; identification and critical analysis of current issues in physical education and sport. Three lecture hours per week. One term. Prerequisites: 90 academic credits completed; permission of the course director.

AS/KINE 4490 3.00 Philosophical Issues in Kinesiology and Health Science. This course examines the philosophical foundations of kinesiology and health science; their manifestation and influences on the development of physical activity, physical education and sport programs; identification and critical analysis of current issues in these programs in modern society. Prerequisite: AS/SC KINE 1000 4.00.

AS/SC/KINE 4500 3.00 Neural Control of Movement. This course reviews fundamental concepts and current issues in motor control, with an emphasis on the brain mechanisms underlying motor behaviour. Topics include walking, looking, reaching, posture and complex skill coordination. Three lecture hours per week. One term. Prerequisite: AS/SC/KINE 3020 3.00 or permission of the course director.

Cross-listed to: AS/KINE 4500 3.00, SC/KINE 4500 3.00

AS/SC/KINE 4505 3.00 Neurophysiology of Movement in Health and Disease. This course provides an overview of current neurophysiological concepts in motor control, with an emphasis on the neurophysiological principles underlying human movement disorders. Three hours per week, no labs. One term. Prerequisite: AS/SC/KINE 3011 3.00 or AS/SC/KINE 3020 3.00. Degree credit exclusions: AS/SC/KINE 4050M 3.00 (Fall/Winter 2001-2002), AS/SC/KINE 4050A 3.00.

Cross-listed to: AS/KINE 4505 3.00, SC/KINE 4505 3.00

AS/SC/KINE 4510 3.00 Cellular and Molecular Basis of Muscle Physiology. Topics include muscle development, muscle-specific gene expression, molecular basis of muscle contraction, biochemical plasticity of muscle, sarcolemmal and nuclear signal transduction in muscle. Three

lecture hours per week. One term. Prerequisite(s): AS/SC/KINE 3011 3.00, or both SC/BIOL 2020 4.00 and SC/BIOL 2021 4.00.

Cross-listed to: AS/KINE 4510 3.00, SC/BIOL 4510 3.00, SC/KINE 4510 3.00

AS/SC/KINE 4515 3.00 Stem Cells: Physiology and Therapeutic Applications. This course examines the physiology of tissue-specific stem cell populations in the context of potential therapeutic strategies used for the treatment of chronic disease states. Prerequisite: AS/SC/KINE 4010 3.00.

Cross-listed to: AS/KINE 4515 3.00, SC/KINE 4515 3.00

AS/SC/KINE 4520 3.00 Sport Psychology Seminar. The course provides an in-depth examination of selected topics in sport psychology: motivation, imagery, self-regulation and attention. The emphasis is on the application of mental training skills in sport settings. Three lecture hours per week. One term. Prerequisite: AS/SC/KINE 2000 3.00.

Cross-listed to: AS/KINE 4520 3.00, SC/KINE 4520 3.00

AS/KINE 4530 3.00 Sport Administration Fieldwork Placement. Students spend a minimum of 40 hours working in an administrative setting related directly to the area of sport administration. The practical experience is supported by lectures, seminars, reports and readings. Three hours per week. One term. Prerequisites: AS/KINE 3490 3.00; students must be in the Sport Administration Certificate.

AS/SC/KINE 4545 6.00 Sport Administration Applied Research Perspectives. This course provides students with an overview of selected current issues facing organizations in the sport industry as well as a grounding in social research methods. Students conduct applied research addressing problems faced by sport organizations. Three lecture hours per week. Two terms. Prerequisites: AS/SC/KINE 2050 3.00 or equivalent; AS/KINE 2380 3.00; AS/KINE 3240 3.00; AS/KINE 3490 3.00; AS/KINE 3510 3.00.

Cross-listed to: AS/KINE 4545 6.00, SC/KINE 4545 6.00

AS/SC/KINE 4550 6.00 Coaching Field Experience. The student works with a mentor coach for a complete sport season and submits a comprehensive log book. The field experience includes physiological testing, videotape analysis and three other coaching tasks. Three hours per week. Two terms. Prerequisites or corequisites: AS/SC/KINE 4610 3.00. Open only to students in the Coaching Certificate. Note: Students may take this course concurrently with AS/SC/KINE 4610 3.00.

Cross-listed to: AS/KINE 4550 6.00, SC/KINE 4550 6.00

AS/KINE 4560 3.00 Physical Activity and Children: Pedagogy. This course examines teaching methods available for people working in a physical activity setting with children. Emphasis is placed on the core program components of dance, games and gymnastics. Curriculum and lesson planning for school based physical education is included. Two lecture hours and two laboratory hours per week. One term. Prerequisite: AS/SC/KINE 3340 3.00. Degree credit exclusion: AS/KINE 3520 6.00.

AS/SC/KINE 4565 3.00 Epidemiology of Injury Prevention. This course introduces students to the recognition of situations or practices that contribute to injuries, strategies for injury prevention, with an emphasis on an epidemiological/public health approach. Prerequisites: AS/SC/KINE 1000 4.00, AS/SC/KINE 2050 3.00.

Cross-listed to: AS/KINE 4565 3.00, SC/KINE 4565 3.00

AS/SC/KINE 4570 3.00 Sports Injury Assessment. An advanced course in the recognition and assessment of common athletic injuries. The course emphasizes a detailed understanding of surface anatomy and landmarking, injury mechanics and assessment techniques, and the implications of injury to a body part. Two lecture hours and one laboratory session per week. One term. Prerequisites: AS/SC/KINE 3450 3.00; AS/SC/KINE 3600 3.00; current CPR and First Aid; clinical and field experience. Open only to students in the Athletic Therapy Certificate. Prerequisite or corequisite: AS/SC/KINE 3460 3.00.

Cross-listed to: AS/KINE 4570 3.00, SC/KINE 4570 3.00

AS/SC/KINE 4580 3.00 Treatment and Rehabilitation of Sports Injuries. An advanced course in the treatment and rehabilitation of common athletic injuries including generalized body reactions to injury, specific tissue responses to trauma, the immediate treatment of injuries, the long-term rehabilitation of injuries and the use of modalities. Two lecture hours and two laboratory hours per week. One term. Prerequisites: AS/SC/KINE 4570 3.00; current CPR and First Aid; clinical and field experience. Open only to students in the Athletic Therapy Certificate.

Cross-listed to: AS/KINE 4580 3.00, SC/KINE 4580 3.00

AS/SC/KINE 4590 6.00 Athletic Therapy Seminar. An advanced-level course in athletic therapy applying theoretical background to sport-related injuries and rehabilitation. Two seminar hours per week plus extra out-of-class hours. Two terms. Prerequisites: AS/SC/KINE 3450 3.00; AS/SC/KINE 3460 3.00; AS/SC/KINE 3600 3.00; AS/SC/KINE 4570 3.00; AS/SC/KINE 4580 3.00. Open only to students in the Athletic Therapy Certificate or with permission of the course director. Prerequisite or corequisite: AS/SC/KINE 3585 3.00.

Cross-listed to: AS/KINE 4590 6.00, SC/KINE 4590 6.00

AS/SC/KINE 4595 3.00 Ethics for Kinesiology and Health. This course provides grounding in ethical theories and approaches, and applies ethical paradigms to issues in kinesiology and health science. Two lecture hours and one seminar hour per week. One term. Prerequisite: AS/SC/KINE 1000 4.00.

Cross-listed to: AS/KINE 4595 3.00, SC/KINE 4595 3.00

AS/SC/KINE 4600 3.00 Coaching: Science and Methodology. The course focuses on coaching methodology and scientific principles applied to coaching. Methodology includes planning, conducting and evaluating training sessions, and time, stress and team management. Systems of training, scientific conditioning methods and other influences on conditioning and performance are included. Three lecture hours per week. One term. Prerequisites: AS/SC/KINE 2475 3.00, AS/SC/KINE 3610 3.00. Note: Levels I, II and III Theory of the National Coaching Certification are granted with the successful completion of AS/SC/KINE 3610 3.00 and AS/SC/KINE 4600 3.00.

Cross-listed to: AS/KINE 4600 3.00, SC/KINE 4600 3.00

AS/SC/KINE 4610 3.00 Advanced Coaching Seminar. The course consists of selected topics in coaching. A review of the literature with an application to coaching is presented from the areas of psychology, physiology, sociology, sports management etc. Guest lecturers and symposiums are featured. Three hours per week. One term. Prerequisite: AS/SC/KINE 2475 3.00.

Cross-listed to: AS/KINE 4610 3.00, SC/KINE 4610 3.00

AS/KINE 4620 3.00 Counselling Skills for Kinesiology and Health Science. This course provides a theoretical basis of behaviour, attitude change and motivation as it pertains to fields related to kinesiology and health science. Practice of the counselling skills with supervised auditory feedback is provided. Two lecture hours and one tutorial hour per week. One term. Prerequisite: AK/AS/SC/PSYC 1010 6.00. Degree credit exclusion: AS/PHED 4620 3.00.

AS/KINE 4630 3.00 Olympic Movement and Its Influence On Canadian Sport. This course analyzes the historical origin and evolution of the world's largest sport spectacle. The Olympics have blended political games and secularized ideals with athletics. Students assess the consequences of its domination over Canadian high-performance sport. Three lecture hours per week. One term. Prerequisites: AS/KINE 3430 3.0; AS/KINE 3440 3.0.

AS/SC/KINE 4640 3.00 Lifestyle and Current Health Issues. This course explores the relationship between health knowledge, health attitudes and health actions of individuals in modern society. Decision-making processes are investigated relative to levels of growth and development and the quality of interactions in a variety of environments. Three lecture hours per week. One term. Prerequisite: AS/SC/KINE 2020 3.00.

Cross-listed to: AS/KINE 4640 3.00, SC/KINE 4640 3.00

AS/SC/KINE 4660 3.00 Exercise and Addictive Behaviours. This course examines a variety of topics in the area of exercise and health psychology with a particular emphasis on the adaptive and maladaptive aspects of exercise, as well as on issues concerning body image, food intake and eating disorders. Three lecture hours per week. One term. Prerequisites: AK/AS/SC/PSYC 1010 6.00; AS/SC/KINE 2020 3.00.

Cross-listed to: AS/KINE 4660 3.00, SC/KINE 4660 3.00

AS/SC/KINE 4710 3.00 Psychology of Health and Chronic Disease. This course explores the role of psychological variables in the development, progression and treatment of chronic diseases such as coronary heart disease, cancer and AIDS. Other critically reviewed topics include stress, substance abuse (smoking and alcohol), and injury and violence. Three lecture hours per week. One term. Prerequisite: AK/AS/SC/PSYC 1010 6.00. Degree credit exclusions: AS/SC/KINE 4050D 3.00, AK/ADMS 3750 3.00, AK/AS/SC/PSYC 3170 3.00, AS/SC/PSYC 3440 3.00.

Cross-listed to: AS/KINE 4710 3.00, SC/KINE 4710 3.00

AS/SC/KINE 4720 3.00 Heart Disease: Behavioural, Psychosocial and Health Services Issues. This course examines the primary and secondary prevention of cardiovascular diseases from a behavioural, psychosocial and health services lens. Major emphasis is placed on cardiac rehabilitation, and individual, physician and health system determinants of referral and participation. Prerequisites: AS/SC/KINE 1020 5.00, AS/SC/KINE 2020 3.00.

Cross-listed to: AS/KINE 4720 3.00, SC/KINE 4720 3.00

AS/SC/KINE 4800 3.00 Human Cadaver Dissection. Human cadaver dissection is a laboratory course in which students dissect an anatomical region on a human cadaver. Twenty hours of supervised instruction; 40 hours of self-directed dissection. One term. Prerequisites: AS/SC/KINE 2031 3.00; AS/SC/KINE 3460 3.00; AS/SC/KINE 3465 3.00. Degree credit exclusion: AS/SC/KINE 4050B 3.00. Note: This course is held off-campus. Consult the Kinesiology and Health Science Program for further details.

Cross-listed to: AS/KINE 4800 3.00, SC/KINE 4800 3.00

AS/SC/KINE 4900 3.00 Exercise Therapy for Chronic Diseases. (formerly AS/SC/KINE 4050E 3.00 - before 2001-2002) An overview of the use of exercise and physical activity in the evaluation and treatment of a variety of chronic diseases and disabilities. Three lecture hours per week. One term. Prerequisite: AS/SC/KINE 4010 3.00. Degree credit exclusions: AS/SC/KINE 4050E 3.00 (Fall/Winter 2000-2001).

Cross-listed to: AS/KINE 4900 3.00, SC/KINE 4900 3.00

Kinesiology and Health Science Practicum Program

All students enrolled in Kinesiology and Health Science programs must complete the practicum core, which consists of two practicum credits in each of the following six areas: dance/gymnastics, aquatics, team sports, individual and dual sports, track and field and emergency care, for a total of 12 practicum credits. Students in the Health and Kinesiology Stream must complete an additional six credits for a total of 18 practicum credits. Students in the Applied Certificate Stream must complete an additional four credits for a total of 16 practicum credits. A detailed description of the course offerings and requirements is available from the School of Kinesiology and Health Science.

Practicum Course List

While practicum courses are required of all kinesiology and health science students in order to graduate, they are not applied towards the academic degree requirements in kinesiology and health science.

In the case of practicum courses, the first digit of the course number indicates the practicum area, not the level of the course. The number which follows the four-digit course number in this calendar indicates the number of practicum credits in the course. One practicum credit represents a total of 12 contact hours of sports activity or equivalent.

Practicum courses provide professional preparation for kinesiology and health science students and as such may require vigorous physical activity. It is strongly recommended that every student in the practicum

program have a medical examination prior to participating. Students with disabilities are considered on a case-by-case basis.

Practicum courses are open to both men and women unless otherwise specified. For practicum course descriptions, please consult the School of Kinesiology and Health Science supplemental calendar.

Courses in Language, Literature and Culture**General Regulations****1. Entry to Language Courses**

Any student may enrol in a language course at any level, subject to the conditions enumerated below.

- a) Admission to a student's first course in a language at York is by placement questionnaire and/or interview, or departmental authorization slip.
- b) In most cases, students who have completed a 1000-level language course with a grade of at least C are automatically admissible to a course at the next level in the same language, but may be pre-tested for purposes of course or section placement.
- c) Registration in any language course may be limited at the discretion of the department.
- d) Students intending to major or minor in German Studies, Italian, Russian, Russian Studies or Spanish are encouraged to begin study of the relevant language in their first year.

2. Credit for Language Courses

A language course may be taken for credit in any year of any undergraduate program. Credit is given for a course if a grade of D or better is achieved. However, to advance from one level to another level, a student must achieve at least a grade of C.

3. Entry to departmental literature and culture courses, and to courses in classical Greek or Latin literature

- a) In literature and culture courses of the department, instruction is normally given in the relevant language, and entry to courses and programs depends upon the student's ability to function in that language. The department may require a student to demonstrate language competence before granting admission to a course. For details, please consult the department's supplemental calendar.

For regulations concerning entry to courses in classical Greek or Latin literature, please consult a member of the Program in Classical Studies.

Not all of the courses will necessarily be offered in any given year. For details of courses to be offered, please consult the Department of Languages, Literatures and Linguistics supplemental calendar.

Subject to program requirements and degree credit equivalent/exclusion and in-Faculty regulations, students may complete courses offered outside of the Faculty of Arts for credit in one of the programs offered by the Department of Languages, Literatures and Linguistics.

The Interdisciplinary Program in Latin American and Caribbean Studies (LACS) allows students to pursue their interest in Latin America and the Caribbean by taking courses taught in a number of departments and divisions in the Faculty of Arts. Students can double major or minor in Latin American and Caribbean studies and an Honours BA program in the Faculty of Arts. The LACS Program offers introductory core courses in Latin American and Caribbean studies as well as other introductory and upper-level courses in the area. The purpose of the core courses is to introduce and develop interdisciplinary ways of looking at the regions while at the same time integrating knowledge obtained in other courses. The program courses provide shared intellectual meeting grounds for LACS majors and other students. The interdisciplinary nature of the LACS Program ensures a broad and deep understanding of the Latin American and Caribbean regions.

The LACS Program works together with Founders College and the Centre for Research on Latin America and the Caribbean (CERLAC) to offer students a wide variety of events related to the Latin American and Caribbean regions. These include guest lectures by internationally renowned academics, workshops and conferences, and cultural and social events. LACS majors and minors may also use the Documentation Centre of the Centre for Research on Latin America and the Caribbean (CERLAC, 240 York Lanes).

LACS majors are also encouraged to join the LACS Students Association (LACSA), which provides students with an opportunity to meet together and set their own agenda.

Study Abroad Programs: York University has a formal student exchange agreement with the University of the West Indies (UWI) which allows York students to study at UWI and get credit from York. LACS majors may also get academic credit for other courses taken at other universities in the Latin American and Caribbean area. For further information contact International@York or the LACS coordinator.

For specific program requirements and the list of program courses, please consult the Faculty of Arts Programs of Study section of this calendar.

Law is one of the most significant expressions of a society's social and political development. In recent years social scientists from many disciplines have begun to analyze the interplay between law and society. We live in a period of widespread public interest in law that arises from a concern with problems of social justice, social control and social deviance. Academic disciplines such as anthropology, economics, history, philosophy, political science, psychology and sociology have increasingly focused on such issues as the nature and origin of law; law-making and law-breaking; rights and obligations; freedom and responsibility and law as social policy. These are matters of increasing concern to teachers, social workers, businessmen, doctors and public servants whose professional responsibilities demand a knowledge of the relationship of law to their own fields.

The goals of the program may be stated briefly: to affirm the intellectual importance of the study of law and society and law in society; to provide a framework within which faculty and students may explore, within disciplines and between them, descriptive and analytic approaches to the subject; and to sharpen the appreciation of law as part of the active daily life of the student.

The program must be seen within the context of a liberal education. It is not a pre-law school program or a prerequisite for law school admission. It is designed for interested undergraduate students, whatever their future career orientation.

For specific program requirements and the list of program courses, please consult the Faculty of Arts Programs of Study section of this calendar.

Linguistics is concerned with discovering the principles in terms of which natural languages are organized and applying these principles to the description of individual languages. Using systematic descriptions of language and language usage, linguists also investigate how language interacts with our intellectual life.

Because language mediates virtually all forms of human endeavour, the study of linguistics can provide new perspectives on almost every aspect of the humanities and social sciences. In addition, it has applications to primary and secondary education, speech-language pathology and the applied sciences of communication engineering and computer science.

For specific program requirements, please consult the Faculty of Arts Programs of Study section of this calendar.

Courses in Linguistics

Subject to program requirements and degree credit equivalent/exclusion and in-Faculty regulations, students may complete courses offered outside of the Faculty of Arts for credit in linguistics.

AS/LING 1000 6.00 Introduction to Linguistics. Examination of fundamental principles of language organization in phonology, morphology and syntax from both practical and theoretical points of view with illustrations from English and a variety of other languages. Brief survey of the areas of child language acquisition, historical linguistics and psycholinguistics.

AS/LING 2060 6.00 The Grammatical Structure of English. An investigation of the grammatical structure of modern English, including phonology, morphology, syntax and semantics, within the framework of descriptive linguistics.

Cross-listed to: AS/EN 2060 6.00, AS/LING 2060 6.00

AS/LING 2110 3.00 Phonetics. This course examines various aspects of phonetics, including the articulatory and acoustic properties of speech sounds. There will also be intensive practice in the recognition of speech sounds as well as limited amount of work on sound production. Prerequisite or corequisite: AS/LING 1000 6.00, or permission of the department.

AS/LING 2120 3.00 Fundamentals of Phonological Analysis. Practical techniques of phonological analysis exemplified by data taken from a variety of languages. Practice in the use of distinctive features and rule formalisms. Prerequisite: AS/LING 1000 6.00 or equivalent, with a grade of C.

AS/LING 2130 3.00 Fundamentals of Morphological Analysis. This course provides an introduction to the nature and organization of morphological patterns in human languages. Students are exposed to a range of cross-linguistic data, with emphasis being placed on how morphological theory accounts for these data. Prerequisite: AS/LING 1000 6.00 or equivalent, with a grade of C.

AS/LING 2140 3.00 Fundamentals of Grammatical Analysis. Practical techniques of grammatical analysis exemplified by data taken from a variety of languages. Prerequisite: AS/LING 1000 6.00 or equivalent, with a grade of C.

AS/LING 2400 3.00 Language in Its Social Context. An introduction to the study of language as a social phenomenon. Topics covered include language varieties; stereotypes and social identity; language, culture and thought; communicative competence; bilingualism and diglossia; languages in contact; language and social deprivation; and language planning and language policy.

AS/LING 2410 3.00 Language and Gender. This course explores the relationship between language and sex/gender systems from a feminist perspective. The main areas investigated are language and gender stereotypes; language, power and women's status; and male versus female communicative style in different socio-cultural contexts.

Cross-listed to: AK/WMST 2501 3.00, AS/LING 2410 3.00, AS/WMST 2501 3.00, GL/SOSC 2900 3.00, GL/WMST 2501 3.00

AS/LING 2430 3.00 Language, Power and Persuasion. This course investigates the language of power and persuasion. The language used by powerful and powerless groups is analyzed to determine how it reinforces positions of dominance and subordination. The role of language in public persuasion is also considered.

AS/LING 2450 3.00 Language and the Law. This course explores ways in which the discipline of linguistics can shed light on the use of language in the legal system. Topics include the special characteristics of written legal language, spoken language in the courtroom and linguists as expert witnesses.

AS/LING 2460 3.00 South Asian Language and Society. A survey of the diversity and unity of language in the South Asian cultural area and in South Asian diasporic communities focusing on the role of language in defining identity and in mediating social and cultural change.

AS/LING 3040 3.00 Historical Linguistics. An introduction to the study of the development of language systems through time, including the principles of genetic classification of languages, comparative grammar and internal reconstruction. Prerequisite: AS/LING 2120 3.00, or permission of the department.

AS/LING 3060 3.00 Linguistic History Of English. A study of the principal changes in the English language from Anglo-Saxon times to the present day. Prerequisites: AS/LING 2120 3.00 and AS/LING 2140 3.00, or permission of the department. Degree credit exclusion: AS/LING 4060 3.00.

AS/LING 3120 3.00 Phonology. Theoretical principles and practical techniques of phonological analysis exemplified by data taken from a variety of languages. Prerequisites: AS/LING 2110 3.00 and AS/LING 2120 3.00 or equivalent.

AS/LING 3140 3.00 Syntax. This course provides a basic introduction to generative syntax, in particular to the recent work of Noam Chomsky and his followers. Although most of the data analyzed will be English, syntactic patterns of some other languages will be discussed. Prerequisite: AS/LING 2140 3.00 or equivalent.

AS/LING 3150 3.00 Semantics. This course provides an introduction to sentence-level semantics. Some topics in word-level semantics are also considered. Issues are examined primarily from the perspective of a version of truth-conditional semantics. Prerequisite: AS/LING 2140 3.00, or permission of the department. Degree credit exclusions: AS/LING 4150 3.00, AS/LING 4800C 3.00.

AS/LING 3160 3.00 Discourse Analysis. This course provides an analysis of spoken and written texts in context. Specific topics include spoken versus written discourse; the role of context in the interpretation of utterances; cohesion and coherence; and the relationship between information structuring and grammatical forms. Prerequisite: AS/LING 1000 6.00 or AS/LING 2060 6.00.

AS/LING 3210 3.00 First Language Acquisition. This course surveys first language acquisition from a variety of approaches, including social interactionist, innatist and information processing. Prerequisite: AS/LING 1000 6.00 or AS/LING 3220 3.00.

AS/LING 3220 3.00 Psycholinguistics. A survey of psycholinguistic research and theory. Topics chosen from the following: introduction to language structure, biological basis for language, speech perception, sentence processing, speech production, relation of language and thought, language acquisition and atypical language. Prerequisite: AK/AS/SC/PSYC 1010 6.00 or AK/PSYC 2410 6.00, with a minimum grade of C, or AS/LING 1000 6.00. Degree credit exclusions: AK/AS/SC/PSYC 3190 3.00, AK/PSYC 3250 3.00 (before Summer 2002).

Cross-listed to: AK/PSYC 3290 3.00, AS/LING 3220 3.00, AS/PSYC 3290 3.00, SC/PSYC 3290 3.00

AS/LING 3240 3.00 Second Language Acquisition. This course deals with the main issues of second language acquisition. Topics treated include similarities and differences between first and second language acquisition, bilingualism, and various theories such as interlanguage, the contrastive analysis hypothesis and the monitor model. Prerequisite: AS/LING 1000 6.00 or AS/LING 3220 3.00 or AK/AS/SC/PSYC 3290 3.00. Degree credit exclusion: AS/LING 3230 3.00.

AS/LING 3410 3.00 Writing Systems. Writing Systems. This course deals with the interaction of spoken language and writing structure; functioning and cultural spread of writing systems; historical relationships; and orthographic change, reform and design. Systems studied include Roman, Greek, Cyrillic, Arabic and Hebrew alphabets, and systems of the Indian sub-continent, Korea, China and Japan. Prerequisite: AS/LING 1000 6.00, or AS/LING 2060 6.00 or permission of the department.

AS/LING 3440 3.00 Bilingualism: A Sociolinguistic Approach. This course takes a sociolinguistic approach to the study of language contact. Topics include societal bilingualism, linguistic minorities, language maintenance and shift and language mixture. Special emphasis is placed on borrowing and codeswitching and the factors influencing their use. Prerequisites: AS/LING 1000 6.00, AS/LING 2120 3.00 and AS/LING 2140 3.00. Degree credit exclusion: AS/LING 3800M 3.00.

AS/LING 3600 3.00 Socio-Political Issues in Second Language Teaching. Teaching English to speakers of other languages (TESOL) takes place within a complex socio-political context. Selected issues are used to consider how this context influences the teaching/learning process. Note: This course does not count towards linguistics major credit.

AS/LING 3800 3.00 Language and Mind. This course explores how the structures of human language reflect the architecture of the human mind. The techniques and results from a number of disciplines and perspectives (e.g. artificial intelligence, linguistics, neuroscience, philosophy, psychology) are considered. Prerequisite: AS/LING 1000 6.00 or AS/PSYC 1010 6.00, or permission of the department.

AS/LING 3900 3.00 Independent Reading and Research. A student may take an independent, individually supervised reading/research course, provided that the student and the course meet the requirements as set out by the Faculty of Arts and those established by the department. Note: Independent reading/research courses require a signed agreement between the student and faculty member, as well as the approval of the section coordinator and undergraduate director. Note: Please consult the Faculty of Arts "Academic Advising and Student Responsibility" section of the Calendar for detailed regulations regarding independent reading courses.

AS/LING 4120 3.00 Phonological Theories. This course concentrates on recent developments in phonological theory within a generative framework. Specific topics include the representation of segments, autosegmental phonology, syllable structure, metrical phonology and lexical phonology. Prerequisite: AS/LING 3120 3.00 with a grade of C+ or better, or permission of the department.

AS/LING 4140 3.00 Grammatical Theories. This course will examine the metatheoretical issues and assumptions underlying the development of different linguistic theories. The foundations and formal framework of Government-Binding theory, the most recent version of Chomsky's Extended Standard theory, will be introduced and later compared with a competing linguistic theory. Prerequisite: AS/LING 3140 3.00 with a grade of C+ or better, or permission of the department.

AS/LING 4150 3.00 Topics in the Syntax-Semantics Interface. This course examines the interface of the syntactic and semantic modules. The first part introduces students to the fundamentals of formal semantic theory. The second part covers quantificational structures, event semantics and discourse related properties of sentence structure (topic-comment/focus-presuppositions structures). Prerequisite: AS/LING 3140 3.00 with a grade of at least C+. Degree credit exclusions: AS/LING 3150 3.00, AS/LING 4800C 3.00.

AS/LING 4210 3.00 Theoretical Issues in First Language Acquisition. This course treats the acquisition of linguistic structures as seen from the perspectives of principles and parameters theory, the competition model and current theories of phonological development. Prerequisite: AS/LING 3120 3.00, AS/LING 3140 3.00 and AS/LING 3210 3.00 with grades of C+ or better, or permission of the department.

GL/LING 4210 3.00 Gender and Discourse. This course analyses theoretical differences between male and female speech. Students will examine the principal theoretical positions concerning male and female speech. There will be examination of female-female dyads, male-female dyads, sociolinguistic factors, politeness as well as the construction of gender in language. Prerequisite: Intro in LIN Degree credit exclusion: GL/EN 4010 3.0 (F02)

AS/LING 4220 3.00 Acoustic Phonetics. An investigation of acoustic-phonetic aspects of speech and their relation to speech perception and recognition. Practical experience in techniques of acoustic-phonetic research. Prerequisite: AS/LING 2110 3.00 and AS/LING 2120 3.00 with grades of C+ or better, and at least six credits in linguistics (LING) at the 3000-level with grades of C+ or better, or permission of the department. AS/LING 3120 3.00 is recommended.

AS/LING 4230 3.00 Language Disorders. This course surveys a variety of language disorders, among them aphasia, delayed language development, dyslexia and language dissolution in old age. Specific disorders are discussed within a psycholinguistic framework. There is some discussion of basic strategies for therapy. Prerequisites: Completion of AS/LING 3120 3.00, AS/LING 3140 3.00 and AS/LING 3220 3.00/AS/PSYC 3290 3.00 with grades of C+ or better, or permission of the department.

AS/LING 4240 3.00 Theoretical Issues in Second Language Acquisition. An examination of the relationship between linguistic theory and second language acquisition including the nature of second language learners' linguistic representations from both linguistic and neurolinguistic perspectives, the role of universal grammar, and elicitation and interpretation of second language data. Prerequisite: Completion of AS/LING 3240 3.00 (formerly 3230 3.00) with a grade of B+ and AS/LING 3120 3.00 and AS/LING 3140 3.00 with grades of B, or permission of the department.

AS/LING 4250 3.00 The Evolution of Language. Drawing on comparisons of various non-human communication systems with human language, this course examines the evolution of human language. Different theoretical approaches to the structure of human language and the interrelation of various components of the linguistic system are considered. Prerequisites: AS/LING 2120 3.00 and AS/LING 2140 3.00 with grades of C+ or better, and at least six credits in linguistics (LING) at the 3000-level with grades of C+ or better, or permission of the department. AS/LING 3220 3.00 is recommended.

AS/LING 4320 6.00 Field Methods. This course provides students with the skills and techniques necessary to conduct independent linguistic field work. Prerequisites: AS/LING 2110 3.00, AS/LING 2120 3.00, AS/LING 2130 3.00 and AS/LING 2140 3.00 with grades of C+ or better, and at least six credits in linguistics (LING) at the 3000-level with grades of C+ or better, or permission of the department. AS/LING 3120 3.00 and AS/LING 3140 3.00 are recommended.

AS/LING 4350 3.00 Pidgin and Creole Linguistics. Pidgins and Creoles are languages that develop from contact between groups of people who have no common means of communication. This course examines the historical and social circumstances in which these languages, their linguistic characteristics and their relevance to linguistic theory. Integrated with: GS/LING 5350 3.00. Prerequisites: AS/LING 2120 3.00 and AS/LING 2140 3.00 with grades of C+ or better, and at least six credits in linguistics (LING) at the 3000-level with grades of C+ or better, or permission of the department. Degree credit exclusion: AS/LING 4800M 3.00.

AS/LING 4400 3.00 Sociolinguistic Variation and Change. This course examines language variation and change. Sociolinguistic variation is not random, but systematically reflects both social organization and features of the sociolinguistic context. Students will gain experience in all stages of sociolinguistic research and do an original research paper. Prerequisites: AS/LING 2120 3.00 and AS/LING 2140 3.00 with grades of C+ or better, and at least six credits in linguistics (LING) at the 3000-level with grades of C+ or better, or permission of the department. AS/LING 2400 3.00 is recommended. Degree credit exclusion: AS/LING 3400 3.00.

AS/LING 4440 3.00 Topics in Grammatical Change. This course deals with morphosyntactic change from a broadly generative perspective. It focuses on large-scale changes, changes resulting in dialectal variation, and changes in progress. Both language-internal and language-external mechanisms by which change takes place are considered. Integrated with: GS/LING 5440 3.00. Prerequisites: AS/LING 2140 3.00 and at least six credits in linguistics (LING) at the 3000-level including AS/LING 3140 3.00, all with grades of C+ or better, or permission of the department. AS/LING 2400 3.00 and AS/LING 3040 3.00 are recommended. Degree credit exclusion: AS/LING 4800B 3.00.

AS/LING 4900 3.00 Independent Reading and Research. A student may take an independent, individually supervised reading/research course, provided that the student and the course meet the requirements as set out by the Faculty of Arts and those established by the department. Note: Independent reading/research courses require a signed agreement between the student and faculty member, as well as the approval of the section coordinator and undergraduate director. Note: Please consult the Faculty of Arts "Academic Advising and Student Responsibility" section of the Calendar for detailed regulations regarding independent reading courses.

Linguistics Minor

The faculty offers a minor in linguistics, to be taken as part of a Combined Honours program with any other department of the college. It consists of 24 credits, to be chosen from the list of courses below. Students must arrange their program in consultation with one of the coordinators of the Linguistics Program.

Mineure en Linguistique

Le Collège offre en outre une mineure en Linguistique, dans le cadre d'un programme bidisciplinaire suivi dans l'un des départements du Collège. Cette mineure exige l'équivalent de 24 crédits, qui devront être choisis dans la liste ci-dessous. Les étudiants prendront conseil auprès d'un coordonnateur de Linguistique pour établir leur programme.

Courses in Linguistics and Language Studies/ Cours de linguistique et sciences du langage

GL/LIN 1200 3.00 Introduction to Descriptive Grammar. This course introduces students to neo-traditional or descriptive grammar. Students are introduced to form classes (noun, verb, adjective and adverb), structure classes (pronouns, determiners, auxiliaries, propositions and conjunctions), phrases, clauses and sentence types. Grammatical function is also examined.

GL/LIN 1200 3.00 Introduction à la grammaire descriptive. Ce cours servira d'introduction à la grammaire descriptive (ou non-traditionnelle). Les étudiants se familiariseront avec les catégories grammaticales (noms, verbes, adjectifs, etc.) syntagmes, propositions et types de phrases. On examinera également la fonction grammaticale.

Language of Instruction: French

GL/LIN 1716 6.00 Logique formelle et informelle. Le cours a pour but de faire connaître à l'étudiant les moyens de distinguer les bons raisonnements des mauvais. Un texte élémentaire de logique sera utilisé comme livre de référence. Le cours poursuivra aussi une étude détaillée de textes choisis.

GL/LIN 2605 6.00 Introduction to Linguistics. This course introduces the theory and technique of linguistics with illustrations mainly from English. Core areas of study will include phonetics, phonology, morphology, syntax and semantics. Other areas including pragmatics, discourse analysis historical linguistics, etc. may also be introduced. Degree credit exclusions: GL/EN 2570 6.00, GL/EN 2570 3.00(EN).

Cross-listed to: GL/EN 2605 6.00, GL/LIN 2605 6.00

GL/LIN 2608 6.00 Approaches to English Grammar. This course is an introduction to linguistic description of contemporary English, including as principal topics: sound system, vocabulary, syntax, style and usage. The course will also examine, within a linguistic framework, written and oral varieties of English in the world today. Degree credit exclusions: GL/EN 2520 3.00 and GL/EN 2540 3.00.

Cross-listed to: GL/EN 2608 6.00, GL/LIN 2608 6.00

GL/LIN 2610 0.00 Advanced Level Studies in Spanish Language and Stylistics. See GL/SP 2610 for the description.

Language of Instruction: Spanish

GL/LIN 2610 6.00 Étude avancée de la langue et de la stylistique espagnoles. Ce cours est une révision générale des aspects les plus difficiles de la grammaire espagnole à travers des exercices avancés portant sur la lecture, l'écriture et la conversation. L'accent sera mis sur le perfectionnement de l'expression orale et écrite chez les étudiants, ainsi que sur les aspects stylistiques de la langue. Conditions préalables : une note de C dans le cours GL/SP 1520 6.00 et GL/SP 1530 6.00 ou encore la permission du département. Cours incompatible : GL/SP 2240 6.00.

GL/LIN 3200 6.00 Case Studies in Language Endangerment. This course will present a case study of a selected Canadian aboriginal language in its ecological context, including world-view and community perceptions of language endangerment and responses. Linguistic material for analysis and introductory language-learning will be presented.

GL/LIN 3205 3.00 Language Endangerment. This course examines the circumstances of language endangerment: the situation around the world, the importance of linguistic diversity, the causes of endangerment, the linguist's response, the need for efficient documentation of endangered languages and documentation techniques. Prerequisite: a course in Sociolinguistics or permission of the instructor.

GL/LIN 3206 3.00 Morphology. Morphology is the study of word structure and the nature of morphemes which are the constituents of words. In this course we will investigate the typology of morphemes; the structural and semantic composition of words. Prerequisite: Introductory Course in Linguistics.

GL/LIN 3215 3.00 African Languages and Linguistics. This course provides an introduction to the languages of Africa: their history and classification, the range of linguistic phenomena found in these languages, and their importance in understanding the history and cultural diversity of Africa. Prerequisite: An introductory linguistics course or permission of the instructor.

GL/LIN 3601 3.00 Phonology. This course studies theoretical principles and practical techniques of phonological analysis of data taken principally, but not exclusively, from English. Prerequisite: GL/EN 3603 3.0 or equivalent. Cross-listed to GL/LIN 3601 3.0 (EN).

Cross-listed to: GL/EN 3601 3.00, GL/LIN 3601 3.00

GL/LIN 3603 3.00 Phonetics. This course offers an introduction to various aspects of phonetics (articulatory and acoustic) with practice in discrimination and transcriptions of speech sounds, with particular attention to, but not limited to, English. Cross-listed with GL/LIN 3603 3.00. Prerequisite: GL/EN 2605 6.00 or GL/EN 2608 6.00 or an equivalent introductory linguistics course or permission of the instructor. Degree credit exclusion: GL/EN 2350 3.00.

Cross-listed to: GL/EN 3603 3.00, GL/LIN 3603 3.00

GL/LIN 3604 3.00 Varieties of English. Within a linguistic framework, the course analyzes written and oral varieties of English differences in language and language use based on social, temporal, geographical, institutional and individual circumstances. Cross-listed with GL/LIN 3604 3.00. Prerequisite: GL/EN 2605 6.00 or GL/EN 2608 6.00 or an equivalent introductory linguistics course or permission of the instructor. Degree credit exclusion: GL/EN 2520 3.00(EN).

Cross-listed to: GL/EN 3604 3.00, GL/LIN 3604 3.00

GL/LIN 3605 6.00 Old English. This course introduces students to the description of English in the period before the Norman conquest and studies a variety of prose and verse texts. Some attention is given to the cultural history of Anglo-Saxon England. Degree credit exclusion: GL/EN 3250 6.00(EN).

Cross-listed to: GL/EN 3605 6.00, GL/LIN 3605 6.00

GL/LIN 3606 3.00 Learning English as a Second Language. The study of the process of acquisition of a second language, considered in the light of relevant theory and research, and the analysis of linguistic, psychological, sociocultural and other factors in second language learning. Degree credit exclusion: GL/EN 3500 3.00(EN).

Cross-listed to: GL/EN 3606 3.00, GL/LIN 3606 3.00

GL/LIN 3607 6.00 Literary Stylistics. Differing concepts and theories of style and models for analysis are discussed and illustrated by a linguistic and interpretive examination of a range of literary texts, prose and verse. Degree credit exclusion: GL/EN 3510 6.00(EN).

Cross-listed to: GL/EN 3607 6.00, GL/LIN 3607 6.00

GL/LIN 3608 6.00 Modern English. A study of the phonology, grammar and lexis of present-day English using major treatments of English grammar from scholarly traditional to transformational-generative. Cross-listed with GL/LIN 3608 6.00. Prerequisites: GL/EN 2605 3.00, GL/EN 2608 3.00 or an equivalent introductory linguistics course or permission of the instructor. Degree credit exclusion: GL/EN 3540 6.00.

Cross-listed to: GL/EN 3608 6.00, GL/LIN 3608 6.00

GL/LIN 3609 3.00 Pragmatics. Pragmatics locates meaning within and between speakers as well as the contexts of situation in which they speak. This course investigates speech act theory, politeness theory, relevance theory and cross-linguistic pragmatics. The problem of intentionality as well as non-literal uses of language is explored. Prerequisite: One introductory six-credits course in linguistics, one three-credits course in semantics. Degree credit exclusion: GL/EN 3550 3.00.

Cross-listed to: GL/EN 3609 3.00, GL/LIN 3609 3.00

GL/LIN 3610 3.00 Advanced English Syntax. This course offers an advanced study of English syntax using approaches to investigation and description provided by such theoretical models as transformational-generative, systemic and stratificational. Cross-listed with GL/LIN 3610 3.00. Prerequisites: GL/EN 2605 6.00 or GL/EN 2608 3.00 or an equivalent introductory linguistics course or permission of the instructor. Degree credit exclusion: GL/EN 3570 3.00.

Cross-listed to: GL/EN 3610 3.00, GL/LIN 3610 3.00

GL/LIN 3611 3.00 Semantics. This course offers an examination of modern linguistic approaches to semantics. Cross-listed with GL/LIN 3611 3.00. Prerequisite: GL/EN 2605 6.00 or GL/EN 2608 6.00 or an equivalent introductory linguistics course or permission of the instructor.

Cross-listed to: GL/EN 3611 3.00, GL/LIN 3611 3.00

GL/LIN 3616 6.00 Case Studies in Language Endangerment. This course will present a case study of a selected Canadian aboriginal language in its ecological context, including world-view and community perceptions of language endangerment and responses. Linguistic material for analysis and introductory language-learning will be presented. Cross-listed to GL/SOSC 3616 6.00 (EN).

GL/LIN 4656 3.00 Processus d'acquisition des langues secondes : perspectives psycholinguistiques. Après avoir comparé l'acquisition de L1 et L2, nous discuterons des facteurs individuels (personnalité, attitude, motivation, aptitude...) qui influencent l'acquisition des L2. Nous examinerons si l'hypothèse d'une période critique (Lenneberg) dans l'acquisition de L1 peut s'appliquer à l'acquisition de L2; nous aborderons la question de l'influence de l'âge sur l'acquisition de L2 et comparerons la qualité de l'apprentissage des L2 par les enfants et par les adultes. Nous analyserons ensuite les différentes théories (Chomsky, Piaget...) qui ont aidé à passer du béhaviorisme au cognitivisme qui étudie la multiplicité des processus d'acquisition ainsi que les styles et les stratégies d'apprentissage. Nous verrons enfin comment les théories psycholinguistiques actuelles jettent une lumière nouvelle sur l'analyse des erreurs, leur traitement et la notion d'interlangue. The Department of Mathematics and Statistics offers a wide range of courses in both pure and applied mathematics and statistics. These meet the needs of students who wish to major in mathematics or statistics as well as those who require some knowledge of mathematics or statistics in other disciplines. In addition, there are courses for those who have a general interest in these subjects.

Actuarial Profession. Students interested in the actuarial profession should consult the Department of Mathematics and Statistics for guidance. The department will be glad to suggest a program of courses which will be helpful in preparing for examinations of the Society of Actuaries.

Operations Research. The Canadian Operational Research Society (CORS) has recognized that graduation from a Program in Applied Mathematics, Mathematics or Statistics with a prescribed set of courses will qualify a student for the Diploma in Operations Research awarded by CORS. Interested students should consult the Department of Mathematics and Statistics for guidance.

For specific requirements of programs offered by this department, see the Faculty of Arts Programs of Study section of this calendar for BA and BA Honours programs and see the Faculty of Science and Engineering Programs of Study section of this calendar for BSc and BSc Honours programs.

Courses in Mathematics and Statistics

When selecting courses, please note the following:

1. A student taking lower-level mathematics courses may wish to make use of the services provided by the department's mathematics and statistics laboratory.
2. AS/SC/MATH 1510 6.00 is intended for students who, despite having one or more 12U (or equivalent) courses in mathematics, have a weak mathematical background. AS/SC/MATH 1510 6.00 can serve as preparation for AS/SC/MATH 1515 3.00 and from there entrance to further calculus courses.
3. Note on calculus courses for first-year students.
 - a) BBA Honours students who wish to take only a minimum amount of mathematics should take both AS/MATH 1530 3.00 and AS/MATH 1540

3.00, or AK/AS/MATH 1550 6.00. The prerequisite for these courses is AS/SC/MATH 1515 3.00 or 12U advanced functions and introductory calculus or OAC calculus or equivalent.

b) Science and Engineering students (particularly those majoring in biology, geography, kinesiology and health science or psychology) who do not require other specific calculus courses to satisfy degree requirements or as prerequisites for higher-level courses, may take SC/MATH 1505 6.00 to satisfy the Faculty of Science and Engineering 1000-level mathematics requirement.

Other students should be guided by paragraphs (c) and (d) below.

c) A student with at least one 12U (or equivalent) course in mathematics, but without 12U advanced functions and introductory calculus (or equivalent), must begin the study of calculus with AS/SC/MATH 1515 3.00.

d) A student with 12U advanced functions and introductory calculus (or equivalent) can begin with AS/SC/MATH 1000 3.00 or AS/SC/MATH 1013 3.00 or AK/AS/SC/MATH 1300 3.00 and then take AS/SC/MATH 1010 3.00 or AS/SC/MATH 1014 3.00 or AK/AS/SC/MATH 1310 3.00.

4. Course numbering. Courses with second digit 5 cannot be used to satisfy departmental degree requirements except (i) by students in the bachelor Program in Mathematics for Commerce; and (ii) by students in other programs in a few cases as noted in program descriptions.

With the exception of AS/MATH 1530 3.00, mathematics courses with third digit 3 involve statistics.

Unless otherwise specified, courses whose numbers end in "6.00" (i.e. six-credit courses) have three lecture hours per week for two terms, while those whose numbers end in "3.00" (i.e. three-credit courses) have three lecture hours per week for one term. In addition, problem sessions or tutorials are scheduled for many courses.

5. Arts students should note that some Atkinson Faculty of Liberal and Professional Studies courses are out-of-Faculty and there are restrictions on the number of out-of-Faculty courses that may be taken. Science and Engineering students should note that some Atkinson Faculty of Liberal and Professional Studies courses are out-of-department — see the restrictions in note 2 under Mathematics and Statistics in the Faculty of Science and Engineering Programs of Study section of this calendar.

Atkinson Faculty of Liberal and Professional Studies mathematics courses which are cross-listed with mathematics courses offered by the Faculties of Arts and Science and Engineering are identified in the course outlines below. For a list of other Atkinson Faculty of Liberal and Professional Studies courses which are equivalent to and/or degree credit exclusions for mathematics courses in this calendar, Faculty of Arts students should consult the Faculty of Arts degree credit exclusion/equivalent tables in the lecture schedules. Science and Engineering students should consult the Faculty of Science and Engineering degree credit exclusion/equivalent tables in the lecture schedules and in the Office of Science Academic Services beginning in March each year.

General Education Courses

Note: AK/MATH 1000-level courses are part of Atkinson's general education requirement. General education courses do not fulfill elective requirements.

Mathematics general education courses are suitable for all students regardless of mathematical background. The emphasis in these courses is on ideas and their cultural implications. The exception is AK/MATH 1710 6.00 where a preliminary knowledge of elementary algebra is necessary. The focus of AK/MATH 1710 6.00 is on mastering the skills and knowledge essential for in-depth work in any of the mathematically related disciplines; administrative studies, computer science, economics or natural science.

Note: Mathematics courses listed in the major/elective section of the calendar do not fulfill the mathematics/modes of reasoning general education requirements.

Courses in Mathematics and Statistics/Cours de mathématiques**AS/SC/MATH 1000 3.00 Differential Calculus (Honours Version).**

Axioms for real numbers, limits, continuity and differentiability. This course covers slightly fewer topics than AK/AS/SC/MATH 1300 3.00, but covers them in greater depth. It should be taken by all those planning an Honours degree in mathematics or a Specialized Honours degree in statistics. Prerequisite: AS/SC/MATH 1515 3.00, 12U advanced functions and introductory calculus, OAC calculus or equivalent. Degree credit exclusions: AS/SC/MATH 1013 3.00, AK/AS/SC/MATH 1300 3.00, AS/SC/MATH 1505 6.00, AS/MATH 1530 3.00, AK/AS/MATH 1550 6.00, AS/ECON 1530 3.00.

Cross-listed to: AS/MATH 1000 3.00, SC/MATH 1000 3.00

AS/SC/MATH 1010 3.00 Integral Calculus (Honours Version).

Riemann integral, fundamental theorems of calculus, transcendental functions, integration techniques, sequences, series. This course covers fewer topics than AK/AS/SC/MATH 1310 3.00, but covers them in greater depth. It should be taken by all those planning an Honours degree in mathematics or a Specialized Honours degree in statistics. Prerequisite: AS/SC/MATH 1000 3.00 or permission of the department. Degree credit exclusions: AS/SC/MATH 1014 3.00, AK/AS/SC/MATH 1310 3.00, AS/SC/MATH 1505 6.00, AK/AS/SC/MATH 3110 3.00.

Cross-listed to: AS/MATH 1010 3.00, SC/MATH 1010 3.00

AS/SC/MATH 1013 3.00 Applied Calculus I. The first half of this course deals with differentiation and the second half with integration. Topics include derivatives of algebraic and transcendental functions, indefinite integrals, techniques of integration, the definite integral and its interpretation as an area. Prerequisite: AS/SC/MATH 1515 3.00, 12U advanced functions and introductory calculus or OAC calculus. Degree credit exclusions: AS/SC/MATH 1000 3.00, AK/AS/SC/MATH 1300 3.00, AS/SC/MATH 1505 6.00, AS/MATH 1530 3.00, AK/AS/MATH 1550 6.00, AS/ECON 1530 3.00.

Cross-listed to: AS/MATH 1013 3.00, SC/MATH 1013 3.00

AS/SC/MATH 1014 3.00 Applied Calculus II. Applications of differential and integral calculus (e.g. maxima and minima, areas, volumes of revolution, moments and centroids etc.), indeterminate forms, improper integrals, Taylor series, simple ordinary differential equations and an introduction to multivariate calculus. Prerequisite(s): One of AS/SC/MATH 1000 3.00, AS/SC/MATH 1013 3.00, AK/AS/SC/MATH 1300 3.00, or, for non-science students only, six credits from AS/MATH 1530 3.00 and AS/MATH 1540 3.00, AK/AS/MATH 1550 6.00, AS/ECON 1530 3.00 and AS/ECON 1540 3.00. Degree credit exclusions: AS/SC/MATH 1010 3.00, AK/AS/SC/MATH 1310 3.00, AS/SC/MATH 1505 6.00.

Cross-listed to: AS/MATH 1014 3.00, SC/MATH 1014 3.00

AS/SC/MATH 1016 1.00 Applied Mathematics Module I. Designed for students in applied mathematics to complement and enrich the material in AS/SC/MATH 1013 3.00. The module treats the theory in greater depth, and explores extended applications and modelling. One lecture hour per week. One term. One credit. Prerequisite: 12U advanced functions and introductory calculus, OAC calculus or AS/SC/MATH 1515 3.00. Prerequisite or corequisite: AS/SC/MATH 1013 3.00. Note: AS/SC/MATH 1016 1.00 must be taken within the first 60 credits of a student's program.

Cross-listed to: AS/MATH 1016 1.00, SC/MATH 1016 1.00

AS/SC/MATH 1017 1.00 Applied Mathematics Module II. Designed for students in applied mathematics to complement and enrich the material in AS/SC/MATH 1014 3.00. The module treats the theory in greater depth, and explores extended applications and modelling. One lecture hour per week. One term. One credit. Prerequisites: AS/SC/MATH 1013 3.00; AS/SC/MATH 1016 1.00. Prerequisite or corequisite: AS/SC/MATH 1014 3.00. Note: AS/SC/MATH 1017 1.00 must be taken within the first 60 credits of a student's program.

Cross-listed to: AS/MATH 1017 1.00, SC/MATH 1017 1.00

AK/AS/SC/MATH 1019 3.00 Discrete Mathematics for Computer Science. Introduction to abstraction. Use and development of precise formulations of mathematical ideas. Informal introduction to logic; introduction to naive set theory; induction; relations and functions; big O-notation; recursive definitions, recurrence relations and their solutions; graphs and trees. Three lecture hours per week. Plus drop-in optional problem sessions as well as instructor office hours, as these are announced in each term. Prerequisites: AK/AS/SC/MATH 1190 3.00, or both of 12U advanced functions and introductory calculus and 12U geometry and discrete mathematics. Degree credit exclusions: AK/AS/SC/COSC 1019 3.00, AK/AS/SC/MATH 2320 3.00.

Cross-listed to: AK/CSE 1019 3.00, AK/MATH 1019 3.00, AS/CSE 1019 3.00, AS/MATH 1019 3.00, SC/CSE 1019 3.00, SC/MATH 1019 3.00

AK/AS/SC/MATH 1021 3.00 Linear Algebra I. (formerly AS/SC/MATH 2021 3.00 - before 2001-2002) Linear equations, matrices, Gaussian elimination, determinants and vector spaces. This course covers material similar to that in AK/AS/SC/MATH 2221 3.00 but at a more advanced level. Required in Specialized Honours statistics and in all applied mathematics, mathematics and mathematics for commerce programs except the BA Program in Mathematics for Commerce. Prerequisite: A 12U mathematics course or one OAC mathematics course or equivalent. Degree credit exclusions: AS/SC/MATH 1025 3.00, AS/SC/MATH 2021 3.00, AK/AS/SC/MATH 2221 3.00.

Cross-listed to: AK/MATH 1021 3.00, AS/MATH 1021 3.00, SC/MATH 1021 3.00

AS/SC/MATH 1025 3.00 Applied Linear Algebra. Topics include spherical and cylindrical coordinates in Euclidean 3-space, general matrix

algebra, determinants, vector space concepts for Euclidean n -space (e.g. linear dependence and independence, basis, dimension, linear transformations etc.), an introduction to eigenvalues and eigenvectors. Prerequisites: 12U Geometry & Discrete Math or OAC algebra and geometry. Degree credit exclusions: AK/AS/SC/MATH 1021 3.00, AS/SC/MATH 2021 3.00, AK/AS/SC/MATH 2221 3.00.

Cross-listed to: AS/MATH 1025 3.00, SC/MATH 1025 3.00

AK/AS/SC/MATH 1090 3.00 Introduction to Logic for Computer Science. The syntax and semantics of propositional and predicate logic. Applications to program specification and verification. Optional topics include set theory and induction using the formal logical language of the first part of the course. Prerequisite: A 12U mathematics course, or one OAC in mathematics or equivalent, or AK/MATH 1710 6.00. Degree credit exclusion: This course may not be taken for degree credit by any student who has passed AK/AS/SC/MATH 4290 3.00.

Cross-listed to: AK/MATH 1090 3.00, AS/MATH 1090 3.00, SC/MATH 1090 3.00

AK/AS/SC/MATH 1131 3.00 Introduction to Statistics I. Displaying and describing distributions; relations in categorical data; Simpson's paradox and the need for design; experimental design and sampling design; randomization; probability laws and models; central limit theorem; statistical inference including confidence intervals and tests of significance; matched pairs; simulation. Prerequisite: At least one 12U mathematics course or OAC in mathematics is recommended. Degree credit exclusions: AK/AS/SC/MATH 2560 3.00, SC/BIOL 2060 3.00, SC/BIOL 3090 3.00, AS/ECON 2500 3.00, AS/SC/GEOG 2420 3.00, AS/SC/KINE 2050 3.00, AS/POLS 3300 6.00, AK/AS/SC/PSYC 2020 6.00, AK/AS/SC/PSYC 2021 3.00, AK/PSYC 2510 3.00, AS/SOCI 3030 6.00.

Cross-listed to: AK/MATH 1131 3.00, AS/MATH 1131 3.00, SC/MATH 1131 3.00

AK/AS/SC/MATH 1190 3.00 Introduction to Sets and Logic. Sets, functions, relations, induction, proof techniques, logic and logic circuits, basic combinatorics and some basic graph theory. Prerequisite: A 12U mathematics course, or one OAC in mathematics or equivalent, or AK/MATH 1710 6.00. Note: This course may not be taken for degree credit by any student who has passed AK/AS/SC/MATH 1090 3.00 or any 3000- or higher-level mathematics course.

Cross-listed to: AK/MATH 1190 3.00, AS/MATH 1190 3.00, SC/MATH 1190 3.00

AK/AS/SC/MATH 1300 3.00 Differential Calculus with Applications. Limits, derivatives with applications, antiderivatives, fundamental theorem of calculus, beginnings of integral calculus. Prerequisite: AS/SC/MATH 1515 3.00 or AK/MATH 1710 6.00 or 12U advanced functions and introductory calculus or OAC calculus or equivalent. Degree credit exclusions: AS/SC/MATH 1000 3.00, AS/SC/MATH 1013 3.00, AS/SC/MATH 1505 6.00, AS/MATH 1530 3.00, AK/AS/MATH 1550 6.00, AS/ECON 1530 3.00.

Cross-listed to: AK/MATH 1300 3.00, AS/MATH 1300 3.00, SC/MATH 1300 3.00

AK/AS/SC/MATH 1310 3.00 Integral Calculus with Applications. Transcendental functions, differential equations, techniques of integration, improper integrals, infinite series. Prerequisite(s): One of AS/SC/MATH 1000 3.00, AS/SC/MATH 1013 3.00, AK/AS/SC/MATH 1300 3.00, or, for non-science students only, six credits from AS/MATH 1530 3.00 and AS/MATH 1540 3.00, AK/AS/MATH 1550 6.00, AS/ECON 1530 3.00 and AS/ECON 1540 3.00. Degree credit exclusions: AS/SC/MATH 1010 3.00, AS/SC/MATH 1014 3.00, AS/SC/MATH 1505 6.00.

Cross-listed to: AK/MATH 1310 3.00, AS/MATH 1310 3.00, SC/MATH 1310 3.00

AS/SC/MATH 1505 6.00 Mathematics for the Life and Social Sciences. A presentation of the elements of single-variable differential and integral calculus, elementary linear algebra and introductory probability and statistics. This course is designed to provide a comprehensive mathematical background for students of the biological and social sciences. Emphasis is placed on basic mathematical skills and their applications. Prerequisite: A 12U mathematics course or at least one

OAC in mathematics or AS/SC/MATH 1510 6.00. Degree credit exclusions: AS/SC/MATH 1000 3.00, AS/SC/MATH 1010 3.00, AS/SC/MATH 1013 3.00, AS/SC/MATH 1014 3.00, AK/AS/SC/MATH 1300 3.00, AK/AS/SC/MATH 1310 3.00, AS/MATH 1530 3.00, AS/MATH 1540 3.00, AK/AS/MATH 1550 6.00, AS/ECON 1530 3.00, AS/ECON 1540 3.00.

Cross-listed to: AS/MATH 1505 6.00, SC/MATH 1505 6.00

AS/SC/MATH 1510 6.00 Fundamentals of Mathematics. Designed for the student whose mathematical background is weak and who wishes to take further courses in mathematics. Topics include algebraic equations and inequalities; simple sequences and series; analytic geometry; trigonometry; functions, including algebraic, exponential, logarithmic and trigonometric functions. Note: May not be taken by any student who has taken or is currently taking another university course in mathematics or statistics except for AS/SC/MATH 1500 3.00 or AS/SC/MATH 1515 3.00.

Cross-listed to: AS/MATH 1510 6.00, SC/MATH 1510 6.00

AS/SC/MATH 1515 3.00 Introduction to Calculus. Elements of differential calculus, antiderivatives and integrals, with applications. Designed for students who have not taken (or have performed inadequately in) OAC calculus. Prerequisite: A 12U mathematics course or one OAC in mathematics or AS/SC/MATH 1510 6.00 or equivalent, or permission of the department. This course may be taken at the same time as the second half of AS/SC/MATH 1510 6.00. Degree credit exclusions: AS/SC/MATH 1500 3.00. May not be taken by any student who has taken or is currently taking another university course in calculus.

Cross-listed to: AS/MATH 1515 3.00, SC/MATH 1515 3.00

AS/MATH 1530 3.00 Introductory Mathematics for Economists I. This course will introduce and develop topics in differential calculus, integral calculus, and their applications in economics. This course is required for all economics majors and minors; it will also satisfy the mathematics requirement for the Schulich School of Business. Prerequisite: AS/SC/MATH 1515 3.00 or OAC calculus or equivalent. Corequisite or prerequisite: AS/ECON 1000 3.00 or AS/ECON 1010 3.00. Degree credit exclusions: AK/ECON 1530 3.00, AS/SC/MATH 1000 3.00, AK/AS/SC/MATH 1300 3.00, AK/AS/MATH 1550 6.00, AS/SC/MATH 1013 3.00, AS/SC/MATH 1505 6.00, GL/MATH/MODR 1930 3.00, or equivalent.

Cross-listed to: AS/ECON 1530 3.00, AS/MATH 1530 3.00

AS/MATH 1540 3.00 Introductory Mathematics for Economists II. This course will introduce and develop topics including matrix algebra, optimization, comparative statics of general function models and their applications in economics. This course is required for all economics majors and minors; it will also satisfy the mathematics requirements for the Schulich School of Business. Prerequisite: One of AS/ECON 1530 3.00, AS/MATH 1530 3.00, or AK/AS/SC/MATH 1300 3.00. Prerequisite or corequisite: AS/ECON 1000 3.00 or AS/ECON 1010 3.00. Degree credit exclusions: AK/ECON 1540 3.00, AS/SC/MATH 1505 6.00, AK/AS/MATH 1550 6.00. May not be taken by any student who has taken or are taking AK/AS/SC/MATH 1021 3.00 or AS/SC/MATH 1025 3.00 or AS/SC/MATH 2021 3.00 or AK/AS/SC/MATH 2221 3.00 or equivalent.

Cross-listed to: AS/ECON 1540 3.00, AS/MATH 1540 3.00

AK/AS/MATH 1550 6.00 Mathematics with Management Applications. This course is designed to provide a mathematical background for students in the BBA Honours program. It is also suitable for the bachelor program in mathematics for commerce, but should not be taken by those who intend to major in any other program in mathematics or statistics or in computer science. It includes calculus, matrix algebra and elements of optimization with applications to management. Prerequisite: AS/SC/MATH 1515 3.00 (may also be taken as a first-term corequisite) or 12U advanced functions and introductory calculus or OAC calculus or equivalent. Degree credit exclusions: AS/SC/MATH 1000 3.00, AS/SC/MATH 1013 3.00, AK/AS/SC/MATH 1300 3.00, AS/SC/MATH 1505 6.00, AS/MATH 1530 3.00, AS/MATH 1540 3.00, AS/ECON 1530 3.00, AS/ECON 1540 3.00. This course may not be taken by any student who has taken or is taking AK/AS/SC/MATH 1021 3.00 or AS/SC/MATH 1025 3.00 or AS/SC/MATH 2021 3.00 or AK/AS/SC/MATH 2221 3.00 or equivalent.

Cross-listed to: AK/MATH 1550 6.00, AS/MATH 1550 6.00

AS/SC/MATH 1580 3.00 The Nature of Mathematics I. Designed to create a positive attitude towards mathematics through an examination of topics relevant to the study of mathematics at the elementary school level. Topics include numeral systems, number theory, nature of algebra and geometry. Intended primarily, but not exclusively, for Faculty of Education students in the primary/junior stream. Note: Not open to any student who has taken or is taking another university mathematics course unless permission of the course coordinator is obtained.

Cross-listed to: AS/MATH 1580 3.00, SC/MATH 1580 3.00

AS/MATH 1581 3.00 Business Mathematics I. This course is an introduction to interest rates (simple, compound), annuities (ordinary, due, deferred), amortization (mortgages, other debts), sinking funds, bonds (face value, bond rate, price, yield rate) and depreciation (straight line, constant percentage). Prerequisite: Ontario Grade 12 mathematics or equivalent. Degree credit exclusion: AK/AS/MATH 2580 6.00.

AS/SC/MATH 1590 3.00 The Nature of Mathematics II. A continuation of some of the themes explored in AS/SC/MATH 1580 3.00. Further topics include elements of probability and statistics, the nature of computers, elementary set theory and logic. Prerequisite: AS/SC/MATH 1580 3.00 or permission of the course coordinator. Note: Not open to any student who has taken or is taking another university mathematics course (except AS/SC/MATH 1580 3.00) unless permission of the course coordinator is obtained.

Cross-listed to: AS/MATH 1590 3.00, SC/MATH 1590 3.00

GL/MATH 1610 3.00 Introduction to Statistical Methods I. This course covers the elements of probability theory and standard probability distributions, the measures and techniques used in descriptive statistics, principles of sampling and tests of significance. Prerequisite: OAC or Grade 12 mathematics.

Cross-listed to: GL/MATH 1610 3.00, GL/MODR 1610 3.00, GL/POLS 2610 3.00, GL/SOCI 2610 3.00

GL/MATH 1610 3.00 Introduction aux méthodes statistiques I. Éléments de la théorie des probabilités, les distributions classiques, les mesures et techniques utilisées en statistique descriptive, principes de théorie des sondages et tests statistiques. Condition préalable: Mathématiques de fin d'école secondaire (12e ou CPO).

Language of Instruction: French

Cross-listed to: GL/MATH 1610 3.00, GL/MODR 1610 3.00, GL/POLS 2610 3.00, GL/SOCI 2610 3.00

GL/MATH 1620 3.00 Introduction aux méthodes statistiques II. Dans ce cours, il est question de corrélation et régression, d'analyse de la variance et les tests paramétriques, d'applications pratiques des statistiques aux sciences sociales. Condition préalable: GL/MATH 1610 3.0 ou permission du professeur.

Language of Instruction: French

Cross-listed to: GL/MATH 1620 3.00, GL/MODR 1620 3.00, GL/POLS 2620 3.00, GL/SOCI 2620 3.00

GL/MATH 1620 3.00 Introductory Statistics II. This course covers the correlation and regression analysis, analysis of variance and parametric tests, and problem work emphasizing applications of statistics in the social sciences. Prerequisite: GL/MATH 1610 3.00 or permission of the instructor.

Cross-listed to: GL/MATH 1620 3.00, GL/MODR 1620 3.00, GL/POLS 2620 3.00, GL/SOCI 2620 3.00

GL/MATH 1650 3.00 Elements of Discrete Mathematics. The logic of propositions; truth tables; valid arguments; logic circuits. Set operations; relations on sets; Boolean functions. Counting principles; permutations; combinations; inclusion-exclusion principle; binomial and multinomial coefficients. Recurrence relations of order one and two; mathematical induction. Prerequisite: At least one OAC mathematics credit or its equivalent, or permission of the instructor. Degree credit exclusions: GL/MATH 1630 3.00 and GL/MATH 1640 3.00.

Cross-listed to: GL/CSLA 1650 3.00, GL/MATH 1650 3.00, GL/MODR 1650 3.00

GL/MATH 1670 6.00 Fundamentals of Mathematics. Intended for the student whose (high school) mathematical background is either weak or incomplete, and designed to train and improve the logical and technical skills in the use of basic mathematics. Topics are chosen from basic algebra, linear, quadratic, polynomial, exponential, logarithmic and trigonometric functions, systems of equations, inequalities, probability, series and derivatives. Course equivalent: AK/MATH 1710 6.00. Degree credit exclusion: GL/MATH 1880 6.00(EN).

Cross-listed to: GL/ITEC 1670 6.00, GL/MATH 1670 6.00, GL/MODR 1670 6.00

AK/MATH 1700 6.00 The Nature and Growth of Ideas in Mathematics. Students are shown the central position of mathematics in our culture: great discoveries in mathematics and their effect on general culture and society; history of mathematics; mathematics of art and architecture, sound, games and gambling and computing.

AK/MATH 1710 6.00 Fundamentals of Mathematics. A course of consolidation, review and enrichment of basic mathematical principles and techniques. Topics to be covered include: algebraic equations and inequalities, analytic geometry, trigonometry, elements of finite mathematics and an introduction to calculus. Note 1: To register in MATH 1710 6.0 students must either pass the prerequisite test or have successfully completed the Continuing Education course Elementary Mathematics (CEPM 3910) with a grade of B or higher. (An information sheet describing the prerequisite test and the Continuing Education course and is available from the School of Analytic Studies and Information Technology, TEL Building, Room 2005). Note 2: Students who, prior to admission and within the last two years, have completed the following highschool mathematics courses with a grade of 70% or higher will be excused from taking, and are not permitted to take, MATH 1710 6.0 (see Note 4): 1) (new high school curriculum) grade 12U advanced functions and introduction to calculus and one other grade 12U mathematics course, or 2) (old curriculum) two OAC mathematics courses, one calculus and one other OAC mathematics course. Note 3: If you have completed and passed any equivalent of a University level calculus course you cannot take MATH 1710 6.0 (see note 4). Note 4: If you have been excused from taking MATH 1710 6.0 you must replace it with another General Education Mathematics or Modes of Reasoning course to fulfill the General Education requirement.

AK/MATH 1720 6.00 Statistics and Reasoning. This course will attempt to provide some insight into the nature, scope and limitations of statistical analysis in modern society. The questions to be studied are: What types of observation or measurement exist and what approaches are used to summarize and analyze the data thus generated? Are statistics value-free? How do inductive and deductive reasoning enter into the statistical process? Examples such as the consumer price index, opinion polls, lotteries etc., may be discussed. Note: Not open to students who have taken or are taking AK/MATH 2560 3.00, or who have received advanced standing for the equivalent.

GL/MATH 1925 3.00 Éléments de logique pour l'informatique. Ce cours se veut une étude des éléments fondamentaux de la logique formelle et ses applications en informatique. Les sujets abordés comportent: la logique des propositions, raisonnements, déduction automatique, résolution, circuits logiques, la logique des prédicats, applications dans la programmation logique. Cours incompatible: GL/COSC/MODR 2900 6.00.

Language of Instruction: French

Cross-listed to: GL/CSLA 1925 3.00, GL/ITEC 1925 3.00, GL/MATH 1925 3.00, GL/MODR 1925 3.00

GL/MATH 1925 3.00 The Elements of Logic for Computer Science. This course introduces the fundamental elements of formal logic and its applications in computer science. The subjects covered include: propositional logic, reasoning, automatic deduction, resolution, logic circuits, predicate logic, applications in programming logic. Degree credit exclusion: GL/COSC/MODR 2900 6.00.

Cross-listed to: GL/CSLA 1925 3.00, GL/ITEC 1925 3.00, GL/MATH 1925 3.00, GL/MODR 1925 3.00

GL/MATH 1930 3.00 Calcul différentiel et intégral I. Ce cours est le premier cours de base de mathématiques de niveau universitaire. Les notions traitées sont : les fonctions, les limites, la continuité, la différentiation, le graphe des fonctions, les problèmes de maximisation et de minimisation de fonctions d'une variable, l'intégrale de Riemann et les primitives. Condition préalable : au moins un crédit en mathématiques CPO ou permission du département.

Language of Instruction: French

Cross-listed to: GL/MATH 1930 3.00, GL/MODR 1930 3.00

GL/MATH 1930 3.00 Calculus I. This is a basic course in university calculus. Topics covered are functions, limits, continuity, differentiation, curve sketching, maximization and minimization problems for functions of one variable, the Riemann integral and antiderivatives. Prerequisite: At least one OAC mathematics credit or permission of the department.

Cross-listed to: GL/MATH 1930 3.00, GL/MODR 1930 3.00

GL/MATH 1940 3.00 Calculus II. A continuation of Calculus I. Topics covered are logarithms and exponentials, trigonometry including inverse trigonometric functions, hyperbolic trigonometry, the techniques of integration, indeterminate forms and l'Hôpital Rule, an introduction to sequences and series. Applications of the integral to the calculation of areas, volumes, work. Prerequisite: GL/MATH 1930 3.00.

GL/MATH 3200 3.00 Calcul différentiel et intégral III. Ce cours complète le cycle des cours de calcul différentiel en appliquant l'algèbre linéaire à l'analyse des fonctions de \mathbb{R}^n et \mathbb{R}^m . Les matrices jacobiniennes; les matrices hessiennes; les opérateurs différentiels; les théorèmes de Gauss, Green et Stokes.

Language of Instruction: French

GL/MATH 3200 3.00 Differential and Integral Calculus III. This course completes the calculus sequence, bringing together linear algebra and analysis to study functions from \mathbb{R}^n and \mathbb{R}^m . Derivatives and Jacobian matrices; extrema and Hessian matrices; vector differential operators; theorems of Gauss, Green and Stokes. Prerequisite: GL/MATH 2660 3.00 and GL/MATH 2670 6.00.

AK/AS/SC/MATH 3210 3.00 Principles of Mathematical Analysis. Rigorous presentation, with proofs, of fundamental concepts of analysis: limits, continuity, differentiation, integration, fundamental theorem, power series, uniform convergence. Prerequisite: At least one of the following four courses or course combinations: 1) AS/SC/MATH 2010 3.00, 2) AK/AS/SC/MATH 3110 3.00, 3) AK/AS/SC/MATH 2310 3.00 and AS/SC/MATH 1010 3.00, 4) AS/SC/MATH 2015 3.00 and AS/SC/MATH 1010 3.00.

AK/AS/SC/MATH 3260 3.00 Introduction to Graph Theory. Introductory graph theory with applications. Graphs, digraphs. Eulerian and Hamiltonian graphs. The travelling salesman. Path algorithms; connectivity; trees; planarity; colourings; scheduling; minimal cost networks. Tree searches and sortings, minimal connectors and applications from physical and biological sciences. Prerequisite: At least six credits from 2000-level mathematics courses without second digit 5.

Cross-listed to: AK/MATH 3260 3.00, AS/MATH 3260 3.00, SC/MATH 3260 3.00

AS/SC/MATH 3271 3.00 Partial Differential Equations. Partial differential equations of mathematical physics and their solutions in various coordinates, separation of variables in Cartesian coordinates, application of boundary conditions; Fourier series and eigenfunction expansions; generalized curvilinear coordinates; separation of variables in spherical and polar coordinates. Prerequisites: AK/AS/SC/MATH 2270 3.00; AS/SC/MATH 2010 3.00 or AS/SC/MATH 2015 3.00 or AK/AS/SC/MATH 2310 3.00; AK/AS/SC/MATH 3010 3.00 is also desirable, though not essential, as prerequisite for students presenting AS/SC/MATH 2010 3.00 or AK/AS/SC/MATH 2310 3.00.

Cross-listed to: AS/MATH 3271 3.00, SC/MATH 3271 3.00

AS/SC/MATH 3272 3.00 Special Functions. The special functions of mathematical physics: Bessel functions, Legendre functions, Gamma function, Hermite functions, Laguerre functions, Chebyshev polynomials, hypergeometric and confluent hypergeometric functions; boundary value problems, heat flow, wave motion in Cartesian and polar coordinates; Laplace and Fourier transforms. Prerequisite: AS/SC/MATH 3271 3.00 or permission of the course coordinator.

Cross-listed to: AS/MATH 3272 3.00, SC/MATH 3272 3.00

AS/SC/MATH 3280 6.00 Actuarial Mathematics. Deterministic and stochastic models for contingent payments. Topics include survival distributions, life tables, premiums and reserves for life insurance and annuities, multiple life contracts, multiple decrement theory. Prerequisite: AS/SC/MATH 2280 3.00. Prerequisite or corequisite: AK/AS/SC/MATH 2131 3.00.

Cross-listed to: AS/MATH 3280 6.00, SC/MATH 3280 6.00

GL/MATH 3320 3.00 Principles of Mathematical Analysis. The fundamental ideas of analysis that are employed in the calculus sequence are presented rigorously and with proofs. Topics include the axiom for \mathbb{R} , the topology of \mathbb{R} , uniform continuity sequences and series. Prerequisite: GL/MATH2670 6.0 Course equivalency: Faculty: Arts, Atkinson; Course number: MATH3210 3.0

AK/AS/SC/MATH 3330 3.00 Regression Analysis. Simple regression analysis, multiple regression analysis, matrix form of the multiple regression model, estimation, tests (t- and F-tests), multicollinearity and other problems encountered in regression, diagnostics, model building and variable selection, remedies for violations of regression assumptions. Prerequisites: One of AK/AS/SC/MATH 2131 3.00, AK/AS/SC/MATH 2570 3.00, AS/SC/PSYC 2020 6.00, or equivalent; some acquaintance with matrix algebra (such as is provided in AK/AS/SC/MATH 1021 3.00, AS/SC/MATH 1025 3.00, AS/SC/MATH 1505 6.00, AK/AS/MATH 1550 6.00, or AK/AS/SC/MATH 2221 3.00). AS/SC/MATH 4100A 3.00 Topics in Mathematical Education: Theory and Practice. The theory and practice of mathematics education are explored through a supervised teaching practicum and seminars which explore the roots of some of the areas of mathematics included in the senior secondary and undergraduate curriculum as well as important current issues in mathematics education research. A two-hour seminar every two weeks, practical hours. Two terms. Three credits. Prerequisites: All 1000- and 2000-level core requirements for an Honours degree program in Applied Mathematics, Mathematics, Mathematics for Commerce, or Statistics; permission of the course coordinator. Note: This course is open to students enrolled in the Intermediate/Senior concurrent Education program, but may not be used to satisfy any of the requirements for a first or second teaching subject.

Cross-listed to: AS/MATH 4100A 3.00, SC/MATH 4100A 3.00

AS/SC/MATH 4110N 3.00 Topics in Analysis: Ordinary Differential Equations. This course is an advanced introduction to a number of topics in ordinary differential equations. The topics are chosen from the following: existence and uniqueness theorems, qualitative theory, oscillation and comparison theory, stability theory, bifurcation, dynamical systems, boundary value problems, asymptotic methods. Note: Permission of the course coordinator required.

Cross-listed to: AS/MATH 4110N 3.00, SC/MATH 4110N 3.00

AS/SC/MATH 4120A 3.00 Topics in Algebra: Advanced Linear Algebra. A selection of advanced theoretical and applied topics is proposed for study, from which choices are made at the beginning of the semester; there is sufficient flexibility to accommodate the common interests of the professor and the students. Prerequisite: AS/SC/AK/MATH 2022 3.00 or AS/SC/AK/MATH 2222 3.00.

AK/AS/SC/MATH 4130K 3.00 Topics in Probability and Statistics: Survival Analysis. This course provides students with an introduction to the statistical methods for analyzing censored data which are common in medical research, industrial life-testing and related fields. Topics include accelerated life models, proportional hazards model, time dependent covariates. Prerequisites: AK/AS/SC/MATH 3131 3.00; either AS/SC/MATH 3033 3.00 or AK/AS/SC/MATH 3330 3.00. Note: Computer/Internet use is essential for course work.

Cross-listed to: AK/MATH 4130K 3.00, AS/MATH 4130K 3.00, SC/MATH 4130K 3.00

AK/AS/SC/MATH 4130M 3.00 Topics in Probability and Statistics.

Cross-listed to: AK/MATH 4130M 3.00, AS/MATH 4130M 3.00, SC/MATH 4130M 3.00

AK/AS/SC/MATH 4130N 3.00 Topics in Probability and Statistics: Multivariate Statistics. Topics in Probability and Statistics: Multivariate Statistics.

Cross-listed to: AK/MATH 4130N 3.00, AS/MATH 4130N 3.00, SC/MATH 4130N 3.00

AK/AS/SC/MATH 4134 3.00 Biostatistics. This course provides students with an introduction to the statistical methods which are commonly used in medical research and epidemiology. Prerequisites: AK/AS/SC/MATH 3034 3.00 and AK/AS/SC/MATH 3131 3.00 or permission of the course director. Note: SAS and Splus computing environments will be used to facilitate course work.

Cross-listed to: AK/MATH 4134 3.00, AS/MATH 4134 3.00, SC/MATH 4134 3.00

AS/SC/MATH 4141 3.00 Advanced Numerical Methods. Numerical methods for solving ordinary differential equations; optimization problems: steepest descents, conjugate gradient methods; approximation theory: least squares, orthogonal polynomials, Chebyshev and Fourier approximation, Padé approximation. Prerequisite: AK/AS/SC/MATH 2270 3.00; AS/SC/MATH 3242 3.00 or AK/AS/SC/COSC 3122 3.00.

Cross-listed to: AS/MATH 4141 3.00, SC/MATH 4141 3.00

AK/AS/SC/MATH 4143 3.00 Scientific Computation for Finance Applications. This course covers the basics numerical analysis/computational methods related to portfolio optimization, risk management and option pricing. It provides background material for computations in finance for two streams in the Computational Mathematics program and other interested students. Prerequisites: One of AK/AS/SC/MATH 2015 3.00 or AK/AS/SC/MATH 2310 3.00; AK/AS/SC/MATH 1131 3.00; AK/AS/SC/MATH 2030 3.00; One of AK/AS/SC/COSC 1530 3.00, AK/AS/SC/CSE 1530 3.00, AK/AS/SC/COSC 1540 3.00, AK/AS/SC/CSE 1540 3.00. or AK/AS/SC/MATH 2041 3.00.

Cross-listed to: AK/MATH 4143 3.00, AS/MATH 4143 3.00, SC/MATH 4143 3.00

AK/AS/SC/MATH 4150X 3.00 Topics in Geometry: Algebraic Curves. A self-contained introduction to algebraic geometry. Prerequisites: AS/SC/AK/MATH 2022 3.00 or AS/SC/AK/MATH 2222 3.00; 6 credits from 3000-level MATH courses without second digit 5; or permission of the course coordinator.

Cross-listed to: AK/MATH 4150X 3.00, AS/MATH 4150X 3.00, SC/MATH 4150X 3.00

AK/AS/SC/MATH 4160 3.00 Combinatorial Mathematics. Topics from algebra of sets, permutations, combinations, occupancy problems, partitions of integers, generating functions, combinatorial identities, recurrence relations, inclusion-exclusion principle, Polya's theory of counting, permanents, systems of distinct representatives, Latin rectangles, block designs, finite projective planes, Steiner triple systems. Prerequisites: AK/AS/SC/MATH 2022 3.00 or AK/AS/SC/MATH 2222 3.00; six credits from 3000-level mathematics courses without second digit 5; or permission of the course coordinator.

Cross-listed to: AK/MATH 4160 3.00, AS/MATH 4160 3.00, SC/MATH 4160 3.00

AK/AS/SC/MATH 4161 3.00 Introduction to Cryptography. Probability, information theory and number theory and applications to cryptography. Classical codes such as Caesar shift, Vigenere, ADFGVX, rectangular substitution, and others. Other topics: comma free codes, perfect secrecy, index of coincidence, public key systems, primality testing and factorization algorithms. Prerequisites: At least 12 credits from 2000-level (or higher) MATH courses (without second digit 5, or second digit 7 in the case of Atkinson); or AS/AK/SC/CSE 3101 3.00 or AS/AK/SC/COSC 3101 3.00; or permission of the instructor.

Cross-listed to: AK/CSE 4161 3.00, AK/MATH 4161 3.00, AS/CSE 4161 3.00, AS/MATH 4161 3.00, SC/CSE 4161 3.00, SC/MATH 4161 3.00

AS/SC/MATH 4170 6.00 Operations Research II. Selected topics from game theory, decision theory, simulation, reliability theory, queuing theory, non-linear programming, classification, pattern-recognition and prediction. Each chapter contains an optimization problem and methods and algorithms for solving it. The course is rich in examples. Prerequisites: AS/SC/MATH 2010 3.00 or AS/SC/MATH 2015 3.00 or AK/AS/SC/MATH 2310 3.00; AK/AS/SC/MATH 2030 3.00; AK/AS/SC/MATH 3170 6.00; or permission of the course coordinator. Degree credit exclusion: AS/MATH 4570 6.00.

Cross-listed to: AS/MATH 4170 6.00, SC/MATH 4170 6.00

AK/AS/SC/MATH 4210 3.00 Complex Analysis. Rigorous development of the basic results, including the complex derivative, contour integrals, Cauchy integral formulas, Taylor and Laurent series representations of analytic functions, calculus of residues, maximum modulus theorem, Rouché's theorem, open mapping theorem. More advanced topics if time permits. Prerequisite: AS/AK/SC/MATH 3210 3.00

Cross-listed to: AK/MATH 4210 3.00, AS/MATH 4210 3.00, SC/MATH 4210 3.00

AK/AS/SC/MATH 4230 3.00 Non-Parametric Methods in Statistics. Order statistics; general rank statistics; one-sample, two-sample and k-sample problems; Kolmogorov-Smirnov statistics; tests of independence and relative efficiencies. Prerequisite: AK/AS/SC/MATH 3131 3.00; AK/AS/SC/MATH 3132 3.00 is recommended but not required.

Cross-listed to: AK/MATH 4230 3.00, AS/MATH 4230 3.00, SC/MATH 4230 3.00

GL/MATH 4230 6.00 Analyse Complexe. La topologie du plan complexe. Introduction aux fonctions holomorphes; applications conformes et applications linéaires fractionnelles. L'intégration complexe, la formule intégrale de Cauchy. La théorie des résidus. Les propriétés locales des fonctions holomorphes; les fonctions harmoniques. Prolongement analytique; le théorème de Riemann. Condition préalable : GL/MATH 1930 3.00 et GL/MATH 1940 3.00; GL/MATH 2670 6.00 ou la permission du département.

Language of Instruction: French

AS/SC/MATH 4231 3.00 Robust Statistics. This course provides students with an introduction to robust statistics. Basic robustness concepts and robust estimators will be covered. Prerequisites: AS/SC/AK/MATH 3131 3.00, either AS/SC/AK/MATH 3033 3.00 or AS/SC/AK/MATH 3303 3.00 or permission of the course director. Note: SAS and Splus computing environments will be used to facilitate course work.

Cross-listed to: AS/MATH 4231 3.00, SC/MATH 4231 3.00

GL/MATH 4240 6.00 Analyse réelle. Ce cours est une étude rigoureuse de l'analyse réelle. Parmi les sujets traités figureront: les notions de base de topologie; limite et continuité, fonctions à variations bornées, l'intégrale de Riemann-Stieltjes, les suites et séries de fonctions, l'intégrale de Lebesgue; et éventuellement des séries de Fourier. Condition préalable : GL/MATH 2670 6.00 ou la permission du département.

Language of Instruction: French

AS/SC/MATH 4241 3.00 Applied Group Theory. Introduction to group theory and its applications in the physical sciences. Finite groups. Compact Lie groups. Representation theory, tensor representations of classical Lie groups, classification of semi-simple Lie groups. Prerequisites: AS/SC/MATH 2015 3.00; AK/AS/SC/MATH 2022 3.00 or AK/AS/SC/MATH 2222 3.00; AK/AS/SC/MATH 2270 3.00. Degree credit exclusion: AK/AS/SC/MATH 4020 6.00.

Cross-listed to: AS/MATH 4241 3.00, SC/MATH 4241 3.00

AK/AS/SC/MATH 4250 6.00 Differential Geometry. Curves and surfaces in 3-space, tangent vectors, normal vectors, curvature, introduction to topology, manifolds, tangent spaces, multilinear algebra and tensors. Prerequisites: AS/SC/AK/MATH 3010 3.00; AS/SC/AK/MATH 2022 3.00 or AS/SC/AK/MATH 2222 3.00; or permission of the course coordinator. Degree credit exclusion: AS/SC/MATH 3450 3.00.

Cross-listed to: AK/MATH 4250 6.00, AS/MATH 4250 6.00, SC/MATH 4250 6.00

AK/MATH 4260 3.00 Directed Reading. This course involves reading a standard book or recently published papers under supervision of a faculty member. May require preparation of a paper on the chosen topic. Students should contact the program Chair by April for the following fall/winter term. Prerequisite: 48 mathematics credits with an average grade of B, or, for students with equivalent preparation, permission of the Chair of mathematics. Note 1: Students must be accepted by a faculty supervisor before they can register in 4000-level directed reading courses. The course transaction form for such courses must be submitted with a note from the supervisor stating his/her willingness to perform this task. Permission of the program Chair is also required. Note 2: For either the bachelor or the Honours degree, no student may include more than one full reading course or equivalent in the program of study.

AS/SC/MATH 4270 3.00 Integral Transforms and Equations. This course studies the Laplace, Fourier, Hankel and Mellin transforms; the solution of integral equations; and the treatment of asymptotic expansions. The applications are to problems in circuit theory, heat flow, elasticity, transport theory and scattering theory. Prerequisites: AK/AS/SC/MATH 2270 3.00; AK/AS/SC/MATH 3410 3.00. Prerequisite or corequisite: AS/SC/MATH 3271 3.00.

Cross-listed to: AS/MATH 4270 3.00, SC/MATH 4270 3.00

AK/AS/SC/MATH 4271 3.00 Dynamical Systems. Iterations of maps and differential equations; phase portraits, flows; fixed points, periodic solutions and homoclinic orbits; stability, attraction, repulsion; Poincaré maps, transition to chaos. Applications: logistic maps, interacting populations, reaction kinetics, forced Van der Pol, damped Duffing and Lorenz equations. Prerequisites: AK/AS/SC/MATH 2270 3.00; AK/AS/SC/MATH 1021 3.00 or AK/AS/SC/MATH 2221 3.00 or AS/SC/MATH 1025 3.00.

Cross-listed to: AK/MATH 4271 3.00, AS/MATH 4271 3.00, SC/MATH 4271 3.00

AS/SC/MATH 4280 3.00 Risk Theory. Frequency and severity models in insurance, compound distributions, compound Poisson processes, ruin theory, non-proportional reinsurance, related topics in loss models and stochastic processes. Prerequisite: AK/AS/SC/MATH 2131 3.00.

Cross-listed to: AS/MATH 4280 3.00, SC/MATH 4280 3.00

AK/AS/SC/MATH 4290 3.00 Mathematical Logic. Predicate logic, rules of inference, elimination of quantifiers, Tarski semantics, Gödel's completeness, compactness and incompleteness theorems. Ultrapowers. Non-standard analysis. Prerequisite: AS/SC/AK/MATH 3020 6.00 or AS/SC/AK/MATH 3190 3.00 or AS/SC/AK/MATH 3210 3.00 or permission of the instructor; AS/SC/AK/MATH 1090 3.00 or AS/SC/AK/MATH 1190 3.00 is recommended.

Cross-listed to: AK/MATH 4290 3.00, AS/MATH 4290 3.00, SC/MATH 4290 3.00

AS/SC/MATH 4300 3.00 Directed Readings. A student may arrange to do independent study with a member of the Mathematics and Statistics Department. Such an arrangement must have prior approval of the department Chair. One term. Three credits. Note: Faculty of Arts students should see the Faculty of Arts section of the Undergraduate Programs Calendar for regulations governing "Independent Reading Courses."

Cross-listed to: AS/MATH 4300 3.00, SC/MATH 4300 3.00

AS/SC/MATH 4300 6.00 Directed Readings. A student may arrange to do independent study with a member of the Mathematics and Statistics Department. Such an arrangement must have prior approval of the department Chair. Two terms. Six credits. Note: Faculty of Arts students should see the Faculty of Arts section of the Undergraduate Programs Calendar for regulations governing "Independent Reading Courses."

Cross-listed to: AS/MATH 4300 6.00, SC/MATH 4300 6.00

AS/SC/MATH 4400 6.00 The History of Mathematics. Selected topics in the history of mathematics, discussed in full technical detail but with stress on the underlying ideas, their evolution and their context. Prerequisites: 36 credits from mathematics courses without second digit 5, including at least 12 credits at or above the 3000 level. (12 of the 36 credits may be taken as corequisites.)

Cross-listed to: AS/MATH 4400 6.00, SC/MATH 4400 6.00

AK/AS/SC/MATH 4430 3.00 Stochastic Processes. Basic Markov processes, including Markov chains, Poisson processes, birth-and-death processes, Brownian motion. Prerequisite: AK/AS/SC/MATH 2030 3.00. Corequisite: A mathematics course at the 3000 level or higher, without second digit 5.

Cross-listed to: AK/MATH 4430 3.00, AS/MATH 4430 3.00, SC/MATH 4430 3.00

AK/AS/SC/MATH 4431 3.00 Probability Models. This course introduces the theory and applications of several kinds of probabilistic models, including renewal theory, branching processes and martingales. Additional topics may include stationary processes, large deviations or models from the sciences. Prerequisite: AK/AS/SC/MATH 2030 3.00. Corequisite: A mathematics course at the 3000 level or higher, without second digit 5.

Cross-listed to: AK/MATH 4431 3.00, AS/MATH 4431 3.00, SC/MATH 4431 3.00

AS/SC/MATH 4470 3.00 Gas and Fluid Dynamics. Fundamental laws; conservation of mass, momentum and energy; vortex motion; incompressible, compressible and viscous flows; turbulent flow; surface waves. Prerequisites: SC/PHYS 2010 3.00 or SC/EATS 2470 3.00; AS/SC/MATH 2015 3.00; AS/SC/AK/MATH 2270 3.00.

Cross-listed to: AS/MATH 4470 3.00, SC/MATH 4470 3.00, SC/PHYS 4120 3.00

AS/MATH 4570 6.00 Applied Optimization. Topics chosen from decision theory, game theory, inventory control, Markov chains, dynamic programming, queuing theory, reliability theory, simulation, non-linear programming. Prerequisites: AK/AS/MATH 1550 6.00 and AK/AS/SC/MATH 2560 3.00 and AK/AS/SC/MATH 3170 6.00. Degree credit exclusion: AS/SC/MATH 4170 6.00.

AK/AS/SC/MATH 4630 3.00 Applied Multivariate Statistical Analysis. The course covers the basic theory of the multivariate normal distribution and its application to multivariate inference about a single mean, comparison of several means and multivariate linear regression. As time and interest permit, further related topics may also be covered. Prerequisites: AK/AS/SC/MATH 3131 3.00; AS/SC MATH 3033 3.00 or AK/AS/SC/MATH 3330 3.00; AK/AS/SC/MATH 2022 3.00 or AK/AS/SC/MATH 2222 3.00.

Cross-listed to: AK/MATH 4630 3.00, AS/MATH 4630 3.00, SC/MATH 4630 3.00

AK/AS/SC/MATH 4730 3.00 Experimental Design. An examination of the statistical issues involved in ensuring that an experiment yields relevant information. Topics include randomized block, factorial, fractional factorial, nested, Latin square and related designs. Further topics as time permits. The emphasis is on applications. Prerequisite: AS/SC MATH 3033 3.00, or AK/AS/SC/MATH 3330 3.00, or permission of the course coordinator.

Cross-listed to: AK/MATH 4730 3.00, AS/MATH 4730 3.00, SC/MATH 4730 3.00

AK/AS/SC/MATH 4731 3.00 Design and Analysis. Topics include: sampling weights and design effects in complex surveys; imputation and weighting methods for nonresponse; variance estimation in complex surveys; effects of complex sampling design on categorical data analysis and on regression analysis. Prerequisites: AS/SC/AK/MATH 3430 3.00 or permission of the course director. Note: SAS and Splus computing environments will be used to facilitate course work.

Cross-listed to: AK/MATH 4731 3.00, AS/MATH 4731 3.00, SC/MATH 4731 3.00

AS/SC/MATH 4830 3.00 Time Series and Spectral Analysis. Treatment of discrete sampled data by linear optimum Wiener filtering, minimum error energy deconvolution, autocorrelation and spectral density estimation, discrete Fourier transforms and frequency domain filtering and the Fast Fourier Transform algorithm. Three lecture hours. One term. Three credits. Prerequisites: AK/AS/SC/COSC 1540 3.00 or equivalent FORTRAN programming experience; AS/SC/MATH 2015 3.00; AK/AS/SC/MATH 2270 3.00. Degree credit exclusions: AK/AS/SC/COSC 4242

3.00, AK/AS/SC/COSC 4451 3.00, AS/SC/MATH 4130B 3.00, AS/SC/MATH 4930C 3.00.

AK/AS/SC/MATH 4930A 3.00 Topics in Applied Statistics: Statistical Quality Control. This course provides a comprehensive coverage of the modern practice of statistical quality control from basic principles to state-of-the-art concepts and applications. Prerequisite: AK/AS/SC/MATH 3330 3.00 or AK/AS/SC/MATH 3033 3.00. Corequisite: AS/SC/MATH 4730 3.00.

Cross-listed to: AK/MATH 4930A 3.00, AS/MATH 4930A 3.00, SC/MATH 4930A 3.00

AK/AS/SC/MATH 4930B 3.00 Topics in Applied Statistics: Simulation and the Monte Carlo Method. Introduction to systems, models, simulation and Monte Carlo methods. Random number generation. Random variate generation. Monte Carlo integration and variance reduction techniques. Applications to queuing systems and networks. Prerequisite: AK/AS/SC/MATH 3330 3.00 or AS/SC MATH 3033 3.00. Degree credit exclusion: AK/AS/SC/COSC 3408 3.00.

Cross-listed to: AK/MATH 4930B 3.00, AS/MATH 4930B 3.00, SC/MATH 4930B 3.00

AK/AS/SC/MATH 4930C 3.00 Topics in Applied Statistics: Forecasting and Time Series. Introduction to the needs and uses of forecasting. The components of a time series. Forecasting time series using smoothing methods; using trend projection; using classical decomposition; using regression models. Autoregressive/moving average (ARMA) time series methods. Box-Jenkins methodology. Prerequisites: AS/SC/MATH 3033 3.00 or AK/AS/SC MATH 3330 3.00; Degree credit exclusions: SC/EATS 4020 3.00, AS/SC/MATH 4130B 3.00, AS/SC/MATH 4830 3.00, SC/PHYS 4060 3.00.

Listed below are the 1000-level and 2000-level nine-credit foundations courses which are part of the Faculty of Arts general education requirement. These courses introduce students to interdisciplinary study and emphasize critical thinking, reading and writing skills at the university level, and reflect the academic mandate of the college.

AS/HUMA 1825 9.00 Law and Morality. This course examines aspects of the relationships between law and morality. Questions include: What is law? What is morality? How do they overlap, and how are they different? Should the law enforce morality? How do these issues affect our daily lives? (This course is affiliated with McLaughlin College.)

AS/HUMA 1950 9.00 Concepts of Male and Female in the West. An examination of the origins of, and the interrelationships among, gender, male and female concepts and roles through myth, literature, art and artifacts from various Western cultures, past and present. (This course is affiliated with McLaughlin College.) Degree credit exclusion: AS/HUMA 1950 6.00.

AS/HUMA 2960 9.00 The Body in Western Culture. From an interdisciplinary perspective this course explores the attitudes of Western culture to the body and to entities such as soul, spirit and mind which have been contrasted with it. (This course is affiliated with McLaughlin College.)

AS/SOSC 1130 9.00 International Migration. This course examines why people leave their native lands and what becomes of them in countries

to which they migrate, with particular reference to the impact of the immigration of the host country, using Canadian examples. (This course is affiliated with McLaughlin College.) Degree credit exclusions: AS/GEOG 2310 6.00, AS/SOSC 1130 6.00, AS/SOSC 1139 9.00, AK/SOSC 2000 6.00.

AS/SOSC 1140 9.00 Self, Culture and Society. The course concerns the development of concepts of culture by which individuals seek to understand themselves and the world about them, using materials from anthropology, sociology and philosophy, and with the aim of developing a critique of our own situation. (This course is affiliated with McLaughlin College.) Degree credit exclusion: AS/SOSC 1140 6.00.

AS/SOSC 1188 9.00 Women's Roles. The intersection of gender and culture is considered, with emphasis on women's issues. We explore the role of women in Canada and elsewhere, assessing how nation and culture shape gender discourse, and we examine aboriginal issues at home and abroad. (This course is affiliated with McLaughlin College.)

AS/SOSC 1200 9.00 Canadian Problems. The conceptual framework that has been developed out of this experience is used to examine a number of contemporary problems, selected each year on the basis of their topicality and relevance to a comprehensive understanding of current Canadian public policy. (This course is affiliated with McLaughlin College.) Degree credit exclusion: AS/SOSC 1200 6.00.

AS/SOSC 1350 9.00 Women and the Law. This course explores the role of gender within the context of the legal system. Current issues that highlight the relationship between gender and law are examined by analyzing both legislation and case law. Topics include: divorce, rape and equal pay. (This course is affiliated with McLaughlin College.) Degree credit exclusion: AS/SOSC 1350 6.00.

AS/SOSC 1520 9.00 Markets and Democracy: The Development of Industrial Society. The development of industrial capitalism has entailed profound changes in ways of living. The course will consider the spread of the market economy, the industrialization of production and the associated transformation of social and political institutions and ideas. (This course is affiliated with McLaughlin College.) Degree credit exclusions: AS/SOSC 1520 6.00, AS/SOSC 2510 6.00.

AS/SOSC 1535 9.00 Societies and Economic Systems. This course examines the 20th century's two dominant economic systems: Western capitalism and eastern European socialism. It provides a comprehensive understanding of the theory and practice of both systems, and discusses movement between them. (This course is affiliated with McLaughlin College.)

AS/SOSC 1650 9.00 Introduction to Criminology. This course is an introduction to criminology through a critical investigation of the processes and structures that designate criminality and delinquency; the relationship between control and consent; the administration of "justice", and; the contexts (cultural, political and economic) for legal contests. (This course is affiliated with McLaughlin College.) Degree credit exclusion: AS/SOCI 1011 6.00. Note: Students must achieve a grade of at least B (6.0) in this course (or equivalent) in order to be permitted to continue as a Major in Criminology, or to pursue additional Criminology courses at the 2000, 3000 and 4000 levels. Under exceptional circumstances, non-majors who have not obtained a grade of at least B (6.0) may apply for special consideration to enrol in a Criminology course for which AS/CRIM/SOSC 1650 9.00 (or equivalent) is a prerequisite. This application should be made to the Criminology program coordinator.

Cross-listed to: AS/CRIM 1650 9.00, AS/SOSC 1650 9.00

AS/SOSC 2150 9.00 Families in Crisis: Issues of Health Environments and Poverty. This course examines the crisis of the contemporary family. We use the family therapy literature to examine the crisis within the family system; and we also use the critical perspectives of Marxism, psychoanalysis and feminism to understand the position of the family in the surrounding social world. (This course is affiliated with McLaughlin College.) Degree credit exclusions: AS/SOSC 2150 6.00, AS/SOCI 3660 6.00, AS/SOSC 3150 6.00.

AS/SOSC 2200 9.00 Sovereignty and Democracy: Canada in the New Global Economy. A critical assessment of the body of knowledge on Canada as it has developed in selected disciplines. Works of various scholars are examined to illustrate approaches used. (This course is affiliated with McLaughlin College.) Degree credit exclusion: AS/SOSC 2200 6.00.

Sessional Assistant Professors:

S. Jaeger, J. Keeping, J. Saindon

Note: AK/MODR 1000-level courses are part of Atkinson's general education requirement. General education courses do not fulfill elective requirements.

The overall purpose of all modes of reasoning courses is to enable students to develop critical skills applicable to the analysis of texts, to arguments encountered in every day situations, and to concrete problems. The first half of every course will be devoted to learning analytical techniques. Use and misuse of language will be examined. Conceptual, factual and evaluative issues will be distinguished. The basic forms of reasoning, their uses and limits will be analyzed. Fallacies which are frequently found in ordinary discussion, academic texts, mass media, advertising etc. will be carefully studied. The avoidance of these fallacies and learning techniques of conceptual analysis will be a major concern of this half. The aim is to help students to reason correctly and to express themselves clearly and precisely in verbal and written form. The second half of each course will be concerned with putting into practice the techniques learned from the first half. Students will be given ample opportunity to apply their critical skills on concrete materials and practical issues. For this purpose different modes courses use examples drawn from different areas. The following courses reflect the difference in focus in the second half.

Note: Students are advised before registering in a course to consult the detailed course outlines on the Internet (<http://www.atkinson.yorku.ca/course/>). This is particularly important whenever two or more sections of a course are being offered in any particular session as important differences of emphasis may exist relating both to content and methodology.

Students should consult the Glendon philosophy departmental mini-calendar (C221 York Hall, telephone 416-487-6733 for a complete list of modes of reasoning courses offered by the Philosophy Department. All modes of reasoning courses offered by the Philosophy Department have 17 as the first two numbers, e.g. GL/MODR 1710 6.00.

Les étudiant(e)s doivent consulter le mini-annuaire du Département de philosophie (Pavillon York, C221, tél. : 416-487-6733) pour une liste complète des cours de logique offerts par le Département de philosophie. Tous les cours de logique offerts par le Département de philosophie commencent par les chiffres 17, par ex : GL/MODR 1710 6.00.

Note: Courses whose numbers have 1 or 2 as the first digit are open to first-year students.

N.B. : Les cours dont le numéro commence par le chiffre 1 ou 2 sont ouverts aux étudiants de première année.

Note: Only one in the GL/MODR 17XX 6.00 series may be taken for credit.

Courses in Modes of Reasoning/Cours de logique

GL/MODR 1610 3.00 Introduction to Statistical Methods I. This course covers the elements of probability theory and standard probability distributions, the measures and techniques used in descriptive statistics, principles of sampling and tests of significance. Prerequisite: OAC or Grade 12 mathematics.

Cross-listed to: GL/MATH 1610 3.00, GL/MODR 1610 3.00, GL/POLS 2610 3.00, GL/SOCI 2610 3.00

GL/MODR 1610 3.00 Introduction aux méthodes statistiques I. Éléments de la théorie des probabilités, les distributions classiques, les mesures et techniques utilisées en statistique descriptive, principes de théorie des sondages et tests statistiques. Condition préalable: Mathématiques de fin d'école secondaire (12e ou CPO).

Language of Instruction: French

Cross-listed to: GL/MATH 1610 3.00, GL/MODR 1610 3.00, GL/POLS 2610 3.00, GL/SOCI 2610 3.00

GL/MODR 1620 3.00 Introductory Statistics II. This course covers the correlation and regression analysis, analysis of variance and parametric tests, and problem work emphasizing applications of statistics in the social sciences. Prerequisite: GL/MATH 1610 3.00 or permission of the instructor.

Cross-listed to: GL/MATH 1620 3.00, GL/MODR 1620 3.00, GL/POLS 2620 3.00, GL/SOCI 2620 3.00

GL/MODR 1620 3.00 Introduction aux méthodes statistiques II. Dans ce cours, il est question de corrélation et régression, d'analyse de la variance et les tests paramétriques, d'applications pratiques des statistiques aux sciences sociales. Condition préalable: GL/MATH 1610 3.0 ou permission du professeur.

Language of Instruction: French

Cross-listed to: GL/MATH 1620 3.00, GL/MODR 1620 3.00, GL/POLS 2620 3.00, GL/SOCI 2620 3.00

GL/MODR 1650 3.00 Elements of Discrete Mathematics. The logic of propositions; truth tables; valid arguments; logic circuits. Set operations; relations on sets; Boolean functions. Counting principles; permutations; combinations; inclusion-exclusion principle; binomial and multinomial coefficients. Recurrence relations of order one and two; mathematical induction. Prerequisite: At least one OAC mathematics credit or its equivalent, or permission of the instructor. Degree credit exclusions: GL/MATH 1630 3.00 and GL/MATH 1640 3.00.

Cross-listed to: GL/CSLA 1650 3.00, GL/MATH 1650 3.00, GL/MODR 1650 3.00

GL/MODR 1670 6.00 Fundamentals of Mathematics. Intended for the student whose (high school) mathematical background is either weak or incomplete, and designed to train and improve the logical and technical skills in the use of basic mathematics. Topics are chosen from basic algebra, linear, quadratic, polynomial, exponential, logarithmic and

trigonometric functions, systems of equations, inequalities, probability, series and derivatives. Course equivalent: AK/MATH 1710 6.00. Degree credit exclusion: GL/MATH 1880 6.00(EN).

Cross-listed to: GL/ITEC 1670 6.00, GL/MATH 1670 6.00, GL/MODR 1670 6.00

AK/MODR 1700A 6.00 Reasoning About Women And Sexism.

AK/MODR 1710 6.00 Reasoning About Women and Sexism. Note: Not open to students who have taken AK/MODR 1700A 6.0.

GL/MODR 1711 6.00 Critical Thinking. An introduction to reasoning in the humanities. The focus is the presentation of issues and arguments in major texts and articles. The aim of the course is to develop the student's ability to read, write and think critically.

GL/MODR 1714 6.00 Thinking and Writing Critically. This course focuses on the presentation and evaluation of arguments in natural language. Formal techniques are used where appropriate.

GL/MODR 1715 6.00 Reasoning and Philosophy. Philosophic debate with respect to the major philosophical questions to achieve answers to these questions. In the first part of this course, students will be introduced to different argument forms and formal systems of logic; in the second part, the positions taken by philosophers (from the 17th, 18th and 20th centuries) in answering the above questions will be critically assessed from the standpoint of the validity and soundness of their arguments.

GL/MODR 1716 6.00 Logique formelle et informelle. Le cours a pour but de faire connaître à l'étudiant les moyens de distinguer les bons raisonnements des mauvais. Un texte élémentaire de logique sera utilisé comme livre de référence. Le cours poursuivra aussi une étude détaillée de textes choisis.

Cross-listed to: GL/LIN 1716 6.00, GL/MODR 1716 6.00

GL/MODR 1717 6.00 Critical Thinking in Medical Ethics: The Problem of Cloning. The aim of this course is to develop skills in critical thinking through the study of elementary logic and argument analysis, and to use these skills to explore some of the most significant and pressing issues in medical ethics. Of the topics in medical ethics covered, the main focus will be on the ethical and scientific aspects of human cloning. Degree credit exclusion: GL/MODR 1701 6.00(EN) Fall/Winter 2002-2003.

AK/MODR 1730 6.00 Reasoning About Social Issues. The particular focus of this course is on the mass media concerning social issues, different positions taken on issues such as abortion, euthanasia, pornography, immigration etc. Typical examples are to be analyzed.

AK/MODR 1760 6.00 Reasoning About Morality and Values. This course uses examples drawn from areas of thought where value judgments are made. Different sections will stress different topics in ethics, aesthetics, religion or law.

AK/MODR 1770 6.00 Techniques of Persuasion. This course takes examples from the various modes of persuasion including advertising, propaganda and political argument.

GL/MODR 1925 3.00 The Elements of Logic for Computer Science. This course introduces the fundamental elements of formal logic and its applications in computer science. The subjects covered include: propositional logic, reasoning, automatic deduction, resolution, logic circuits, predicate logic, applications in programming logic. Degree credit exclusion: GL/COSC/MODR 2900 6.00.

Cross-listed to: GL/CSLA 1925 3.00, GL/ITEC 1925 3.00, GL/MATH 1925 3.00, GL/MODR 1925 3.00

GL/MODR 1925 3.00 Éléments de logique pour l'informatique. Ce cours se veut une étude des éléments fondamentaux de la logique formelle et ses applications en informatique. Les sujets abordés comportent: la logique des propositions, raisonnements, déduction automatique, résolution, circuits logiques, la logique des prédicats,

applications dans la programmation logique. Cours incompatible: GL/COSC/MODR 2900 6.00.

GL/MODR 1927 3.00 Mathematical Structures for Computer Science.

This course is designed to introduce and analyze some of the main mathematical topics related to Computer Science. The subjects covered include sets, relations, mathematical induction, congruences, groups, graphs and trees, Boolean algebra and computer circuits. Prerequisite: GL/MATH 1650 3.00. Degree credit exclusion: GL/COSC/MODR 2900 6.00.

Cross-listed to: GL/CSLA 1927 3.00, GL/ITEC 1927 3.00, GL/MODR 1927 3.00

GL/MODR 1927 3.00 Structures mathématiques pour l'informatique.

Ce cours a pour but de présenter et d'analyser les principaux éléments de mathématiques nécessaires en informatique. Les sujets abordés incluent les ensembles, les relations, l'induction mathématique, les congruences, les groupes, les graphes et les arborescences, l'algèbre de Boole et les circuits logiques. Condition préalable: GL/MATH 1650 3.0. Cours incompatible: GL/COSC/MOR 2900 6.0.

Cross-listed to: GL/MATH 1930 3.00, GL/MODR 1930 3.00

GL/MODR 1930 3.00 Calculus I. This is a basic course in university calculus. Topics covered are functions, limits, continuity, differentiation, curve sketching, maximization and minimization problems for functions of one variable, the Riemann integral and antiderivatives. Prerequisite: At least one OAC mathematics credit or permission of the department.

Cross-listed to: GL/MATH 1930 3.00, GL/MODR 1930 3.00

GL/MODR 1940 3.00 Calculus II. A continuation of Calculus I. Topics covered are logarithms and exponentials, trigonometry including inverse trigonometric functions, hyperbolic trigonometry, the techniques of integration, indeterminate forms and l'Hôpital Rule, an introduction to sequences and series. Applications of the integral to the calculation of areas, volumes, work. Prerequisite: GL/MATH 1930 3.00.

Cross-listed to: GL/MATH 1940 3.00, GL/MODR 1940 3.00

GL/MODR 1940 3.00 Calcul différentiel et intégral II. La suite de Calcul différentiel et intégral I. Les notions traitées sont : les logarithmes et exponentielles, la trigonométrie y compris les fonctions trigonométriques inverses, la trigonométrie hyperbolique, les techniques d'intégration, les formes indéterminées et la règle de l'Hôpital, une introduction aux suites et séries. Applications de l'intégrale aux calculs des aires, des volumes et du travail. Condition préalable : GL/MATH 1930 3.00.

GL/MODR 1960 3.00 Introduction to Computer Usage I.

An introduction to computers and their applications for students with no previous background in the subject. Concepts of both hardware and software are discussed, and students are introduced to standard microcomputer-based applications packages. Degree credit exclusion: GL/COSC/MODR/SOSC 1960 6.00.

Cross-listed to: GL/CSLA 1960 3.00, GL/MODR 1960 3.00, GL/SOSC 1960 3.00

GL/MODR 1970 3.00 Introduction to Computer Usage II.

Topics studied include information systems development and database processing, and a survey of common programming languages, including fourth generation languages and object oriented languages. Students will be introduced to programming in a high level language. The course will conclude with a discussion of some of the economic and social issues surrounding computerization. Prerequisite: GL/COSC 1960 3.00. Degree credit exclusion: GL/COSC/MODR/SOSC 1960 6.00.

AK/MODR 2410 3.00 Fallacy. A systematic study of practical argument, the analysis of techniques, formal and informal fallacies, the relationship between arguing well and winning an argument. When is argument propaganda? Methods of identifying and undermining specious arguments will be explored and tried.

GL/MODR 2630 6.00 Probability and Mathematical Statistics I.

Topics include probability spaces, conditional probability, independence, random variables and vectors, expectation and moments, moment-generating functions, classical discrete and continuous distributions, laws of large numbers, central limit theorem, introduction to sampling, sufficiency, point estimation, confidence intervals, hypothesis testing, regression and correlation. Prerequisite or corequisites: GL/MATH 1930 3.00 and GL/MATH 1940 3.00.

Cross-listed to: GL/MATH 2630 6.00, GL/MODR 2630 6.00

GL/MODR 2640 6.00 Logic. This course is an introduction to the basic concepts and techniques of modern logic. No previous course in logic or philosophy is required.

Cross-listed to: GL/LIN 2640 6.00, GL/MODR 2640 6.00, GL/PHIL 2640 6.00

GL/MODR 2650 3.00 Algèbre linéaire I. L'algèbre linéaire est un cours de base des mathématiques qui sert également aux étudiants en sciences sociales. Les sujets traités comprendront les vecteurs, les équations linéaires, le rang et le déterminant, avec des applications. Condition préalable : GL/MATH 1940 3.00

Language of Instruction: French

Cross-listed to: GL/MATH 2650 3.00, GL/MODR 2650 3.00

GL/MODR 2650 3.00 Linear Algebra I. This is a basic mathematics course as well as a very useful course for someone who wishes to do applied research in the social sciences. Among the topics considered are vectors, bases, matrices, systems of linear equations, rank and determinants. Some applications of linear algebra to various other disciplines, such as economics, are also included. Prerequisite: GL/MATH 1940 3.00 or equivalent or permission of the department.

Cross-listed to: GL/MATH 2650 3.00, GL/MODR 2650 3.00

GL/MODR 2660 3.00 Algèbre linéaire II. Ce cours est la suite du cours GL/MATH 2650 3.00. Les sujets traités comprendront les espaces vectoriels, les sous espaces, les applications linéaires, les vecteurs propres, les changements de base, la diagonalisation ainsi que les formes quadratiques positives. Condition préalable : GL/MATH 2650 3.00.

Cross-listed to: GL/MATH 2660 3.00, GL/MODR 2660 3.00

GL/MODR 2660 3.00 Linear Algebra II. This is a continuation of Linear Algebra I. More about vectors spaces, subspaces, linear transformations. Eigenvalues, eigenvectors, similarity, diagonalization. Positive definite quadratic forms. Inner product spaces and Gram-Schmidt orthogonalization. Prerequisite: GL/MATH 2650 3.00.

Cross-listed to: GL/MATH 2660 3.00, GL/MODR 2660 3.00

GL/MODR 2670 6.00 Second Year Calculus. Numerical series and power series, vector algebra and calculus (with applications to curves, and motions along curves in two and three dimensions). Functions of several variables, including partial differentiation, properties of surfaces, tangent lines and planes, and the problem of finding maximum and minimum values for such functions (with or without constraining side conditions). The rest of the course is devoted to double and triple integrals, line integrals and surface integrals, and some elementary differential equations. Prerequisite: GL/MATH 1940 3.00.

Cross-listed to: GL/MATH 2670 6.00, GL/MODR 2670 6.00

GL/MODR 2680 6.00 Mathematics of Investment and Actuarial Science. This course is part of the Mathematics for Commerce Program. Simple and compound interest with applications to calculations of mortgage payments, yields on bonds, interest paid on instalment loans. Depreciation, capitalization, annuities and continuous interest. Mathematical theory of interest with applications to life annuities and life insurance. Prerequisite or corequisite: GL/MATH 1930 3.00 and GL/MATH 1940 3.00.

Cross-listed to: GL/MATH 2680 6.00, GL/MODR 2680 6.00

GL/MODR 2680 6.00 Les mathématiques de l'investissement et de l'actuariat. Théorie de l'intérêt (simple, composé et continu). Calculs d'hypothèques, de rendements d'obligations, d'amortissement et de remboursement de prêts. Théorie de la dépréciation et de la capitalisation des biens. L'assurance-vie et les rentes viagères. Les primes et les tables de mortalité. Condition préalable ou concomitante : GL/MATH 1930 3.00 et GL/MATH 1940 3.00.

GL/MODR 2690 3.00 Cours de logique intermédiaire. Ce cours fait suite au cours de Logique formelle et informelle. Après une brève revue des règles de déduction naturelle, nous aborderons, entre autres sujets, les règles de quantification, l'étude des systèmes axiomatiques, les preuves de complétude et de consistance etc. Nous amorcerons, si l'emploi du temps le permet, une introduction à la logique inductive.

Language of Instruction: French

Cross-listed to: GL/LIN 2690 3.00, GL/MODR 2690 3.00, GL/PHIL 2690 3.00

GL/MODR 3650 6.00 Algèbre moderne. Introduction aux structures algébriques. La théorie des groupes; éléments de la théorie des anneaux et des corps. L'anneau des polynômes et le corps des fonctions rationnelles. Les nombres complexes. Les extensions d'un corps et les éléments de la théorie de Galois. Factorisation dans un anneau; les idéaux; applications à la théorie des nombres. Condition préalable : GL/MATH 2660 3.00 ou la permission du département.

Language of Instruction: French

Cross-listed to: GL/MATH 3650 6.00, GL/MODR 3650 6.00

GL/MODR 3650 6.00 Modern Algebra. Introduction to the basic algebraic structures, including groups, rings and fields, Polynomial rings

and the field of rational functions. Complex numbers. Field extensions and the elements of Galois Theory. Factorization theory and ideals in rings, with applications to topics in number theory. Prerequisite: GL/MATH 2660 3.00 or permission of the department.

Cross-listed to: GL/MATH 3650 6.00, GL/MODR 3650 6.00

GL/MODR 3660 6.00 Operations Research. Linear Programming, duality theory with applications. The transportation algorithm with applications to the assignment and shortest route problems. Dynamic Programming and Non-Linear Programming including quadratic and convex programming. Prerequisite: GL/MATH 2650 3.00

Cross-listed to: GL/MATH 3660 6.00, GL/MODR 3660 6.00

GL/MODR 3660 6.00 Recherche opérationnelle. Le cours explore la programmation linéaire. On y étudie la méthode du simplexe et la théorie de la dualité ainsi que l'algorithme de la transportation avec applications aux problèmes des réseaux, du partage et de l'itinéraire le plus court. On se penche, enfin, sur les problèmes de l'arbre engendrant minimal et du flux maximal. Condition préalable : GL/MATH 2650 3.00.

GL/MODR 3670 3.00 Mathematical Statistics. Elements of probability, random variables, probability distribution, sampling theory, theory of estimation and tests of hypotheses and regression analysis. Prerequisites: GL/MODR 1930 3.00 and GL/MODR 1940 3.00.

Cross-listed to: GL/ECON 3670 3.00, GL/MODR 3670 3.00

GL/MODR 3910 3.00 Philosophy of Language. The course will introduce students to such topics as the nature of reference, the role of intention and convention in determining meaning, the distinctions between syntax, semantics and pragmatics, the theory of speech acts and the nature of metaphor and other figurative language.

Cross-listed to: GL/LIN 3910 3.00, GL/MODR 3910 3.00, GL/PHIL 3910 3.00

GL/MODR 3931 3.00 Philosophy of Religion. A course designed with the purpose of studying certain specific areas in the philosophy of religion, namely, the nature of religious language, the possibility of a natural theology and the connection (if any) between theology and morality.

Cross-listed to: GL/HUMA 3931 3.00, GL/MODR 3931 3.00, GL/PHIL 3931 3.00

GL/MODR 4625 3.00 Philosophical Paradoxes. A study of rationality in belief and action approached through the paradoxes which each presents. We are also interested in the sort of reasoning which generates paradoxes, and what is required to resolve them. Topics include: The Prediction Paradox, Newcomb's Problem and the Prisoner's Dilemma. Degree credit exclusions: GL/PHIL 3015 3.00 (Fall/Winter 1990-1991, Fall/Winter 1991-1992), GL/PHIL 3013 3.00 (Fall/Winter 1992-1993).

Cross-listed to: GL/MODR 4625 3.00, GL/PHIL 4625 3.00

GL/MODR 4630 3.00 Gender, Responsibility and Dilemmas in the Law. This course examines family identity in the law, the obligations of judges and issues connected with free speech, looking more closely at negative and positive freedom, as they bear on the Charter of Rights and Freedoms. Degree credit exclusions: GL/PHIL/SOSC 4011 3.00 (Fall/Winter 2001-2002); GL/PHIL/SOSC 4011 3.00 (Fall/Winter 2002-2003).

Faculty of Fine Arts

The mandate of our students and faculty is to make and share music and to acquire, develop and disseminate musical knowledge. We understand musical study as interacting with nearly all studies pursued in the University — those of the humanities and the other fine arts, the social and natural sciences and the professions. From its inception, the Music Department has emphasized the study and performance of contemporary music in all its diversity, while bringing to bear a wide range of historical and social perspectives on the music of other times and places.

Students who major in music may pursue the BA, the BA Honours or BFA Honours degree. These degree options address both academic and practical concerns, combining the knowledge and skills needed for professional work in music with experience that will stimulate lifelong musical and personal growth. Undergraduate studies include courses in performance, composition, music history and ethnology, theory and pedagogy, with the emphasis largely depending on the student's own interests and abilities. Many of these courses are open to non-majors, with opportunities for participation in various performances and musical events on and off campus organized by members of the department.

Both the BA Honours and BFA Honours degree programs comprise a total of 120 credits and may be completed in four years of full-time study or over a longer period of part-time study. The major Program in Music may be combined with a second major in the Faculty of Arts, or with a minor in the Faculties of Arts, Environmental Studies, Fine Arts or Science and Engineering. A five-year program leading to two degrees (the BA Honours or BFA Honours in music and the bachelor of education degree) is also available. A minor in music may be pursued by qualified honours degree students in the Faculties of Arts, Environmental Studies, Fine Arts or Science and Engineering. Students may apply to the BA (90-credit) degree in music at the end of their first year of study. Completion of this degree forms a strong basis for further studies in fields such as music therapy, arts administration and management, music journalism, music marketing, cultural tourism, community arts and cultural management. For students interested in teaching at the primary, junior and intermediate levels, a BA and a BEd can be completed in four years, rather than five, as currently with the BA or BFA Honours.

Admission to the department is by audition. Further information on audition evaluations, admissions, degree requirements and Faculty of Fine Arts regulations may be found in the Faculty of Fine Arts section of this calendar.

In the area of performance, a qualified student may select one or more of a number of courses including chamber ensembles in Western art music (piano, percussion, winds, strings, voice, guitar), jazz, world music ensembles and contemporary music both notated and improvised. Each course entails ensemble workshops, study of the history and literature of the instruments, and attention to individual problems of performance. Performance experience in large ensembles is provided by the choir, jazz orchestra, jazz choir, wind symphony and world music chorus.

In the area of composition, instruction is given in the skills of writing in score, arranging and orchestration. In addition, fully equipped digital and MIDI studios provide facilities for learning all phases of the composition and production of music.

In the area of musical research (music history, area studies and ethnomusicology), the aim is to integrate musicianship with the history, theory and anthropology of music. Intensive study may be pursued in the musics of Asia and the Americas as well as of Europe, past and present.

All music majors complete a sequence of foundational courses which equips them with essential concepts and practical skills in ear-training, sight-singing, rhythm, theory and awareness of the social, cultural and historical contexts of music. These requirements include FA/MUSI 1000 6.00, FA/MUSI 1200 9.00, FA/MUSI 2200 6.00, FA/MUSI 2201 3.00 and FA/MUSI 2202 3.00. A student may be exempted from one or more of those courses by passing proficiency exams; otherwise, students who do not maintain enrolment in the foundation courses scheduled for their first and second years may not be enrolled in performance and/or composition courses. These foundation courses are prerequisite for all the department's upper-level offerings for majors, and both full and part-time students must complete them within their first 60 credits. All Honours music majors must complete 30 upper-level music credits (at or above the 3000 level), including at least 18 credits in studies courses for the BA Honours degree, and at least 12 credits in studies courses and at least 12 credits in studio courses for the BFA Honours degree. (See the lists of courses below.)

In addition to courses in music, the Bachelor's, BA Honours and BFA Honours degrees require 18 general education credits, and 12 credits from other departments in fine arts.

For degree credit, music courses are classified as follows:**Non-Major Courses (not open to music majors or minors)**

FA/MUSI 4099K 6.00 World Music: Individual Instruction - Kora. Private study of the kora focusing on articulation, "groove" (kumbengo), ornamentation and improvised passagework (birimintingo) and standard repertoire from the Mande bardic tradition (jaliya). Open to non-majors. Prerequisite: Appropriate lower level or permission of the instructor.

FA/MUSI 4099L 3.00 World Music: Individual Instruction - Baglama. Private instruction in Turkish baglama (long-necked, plucked, folk lute with moveable frets) with an emphasis on regional playing styles and repertoire through knowledge of various tunings, modes, meters and mastery of left-hand (hit-ons, pull-offs etc.) and right-hand (plectrum strokes) techniques. Open to non-majors. Prerequisite: Appropriate lower level or permission of the instructor.

FA/MUSI 4099L 6.00 World Music: Individual Instruction - Baglama. Private instruction in Turkish baglama (long-necked, plucked, folk lute with moveable frets) with an emphasis on regional playing styles and repertoire through knowledge of various tunings, modes, meters and mastery of left-hand (hit-ons, pull-offs etc.) and right-hand (plectrum strokes) techniques.

Open to non-majors. Prerequisite: Appropriate lower level or permission of the instructor.

FA/MUSI 4099M 3.00 World Music: Individual Instruction - Medieval and Renaissance Bowed Strings. Private instruction in medieval bowed strings (rebec, vielle, viol da gamba). This course seeks to develop a flexible technique and extensive knowledge of repertoire. Open to non-majors. Prerequisite: Appropriate lower level or permission of the instructor.

FA/MUSI 4099M 6.00 World Music: Individual Instruction - Medieval and Renaissance Bowed Strings. Private instruction in medieval bowed strings (rebec, vielle, viol da gamba). This course seeks to develop a flexible technique and extensive knowledge of repertoire. Open to non-majors. Prerequisite: Appropriate lower level or permission of the instructor.

FA/MUSI 4099O 3.00 World Music: Individual Instruction - 'Oud. Private study of the oud concentrating on performance techniques, developing sensibilities for microtonal tuning and idiomatic ornamentation, modal repertoire (maqam), improvisation (taqsim) and the standard compositional repertoire of various West Asian and North African traditions. Open to non-majors. Prerequisite: Appropriate lower level or permission of the instructor.

FA/MUSI 4099O 6.00 World Music: Individual Instruction: 'Oud. Private study of the oud concentrating on performance techniques, developing sensibilities for microtonal tuning and idiomatic ornamentation, modal repertoire (maqam), improvisation (taqsim) and the standard compositional repertoire of various West Asian and North African traditions. Open to non-majors. Prerequisite: Appropriate lower level or permission of the instructor.

FA/MUSI 4099P 3.00 World Music: Individual Instruction - Pipa. Private instruction in pipa (pear-shaped plucked lute). This course will introduce the student to alternative left hand fingering positions, the five finger tremolo, the two finger pi-pa technique, the bending of strings and regional genre studies. Standard Chinese jianpu notation will be used. Open to non-majors. Prerequisite: Appropriate lower level or permission of the instructor.

FA/MUSI 4099P 6.00 World Music: Individual Instruction - Pipa. Private instruction in pipa (pear-shaped plucked lute). This course will introduce the student to alternative left hand fingering positions, the five finger tremolo, the two finger pi-pa technique, the bending of strings and regional genre studies. Standard Chinese jianpu notation will be used. Open to non-majors. Prerequisite: Appropriate lower level or permission of the instructor.

FA/MUSI 4099Q 3.00 World Music: Individual Instruction - Koto. Private instruction in Japanese koto. This course will introduce the student to traditional repertoire and performance practice, hand positions, playing techniques and regional and historical variants. Open to non-majors. Prerequisite: Appropriate lower level or permission of the instructor.

FA/MUSI 4099Q 6.00 World Music: Individual Instruction - Koto. Private instruction in Japanese koto. This course will introduce the student to traditional repertoire and performance practice, hand positions, playing techniques and regional and historical variants. Open to non-majors. Prerequisite: Appropriate lower level or permission of the instructor.

FA/MUSI 4099R 3.00 World Music: Individual Instruction - Recorder. Private study in recorder with an emphasis on performance technique, transposition, ornamentation and repertoire. Use of the recorder as a important pedagogical instrument will be considered and appropriate repertoire studied. Open to non-majors. Prerequisite: Appropriate lower level or permission of the instructor.

FA/MUSI 4099R 6.00 World Music: Individual Instruction - Recorder. Private study in recorder with an emphasis on performance technique, transposition, ornamentation and repertoire. Use of the recorder as a important pedagogical instrument will be considered and appropriate repertoire studied. Open to non-majors. Prerequisite: Appropriate lower level or permission of the instructor.

FA/MUSI 4099S 3.00 World Music: Individual Instruction - Setar. Private study of the Persian setar (long necked lute) including technique, traditional repertoire (radif) and performance practice. Open to non-majors. Prerequisite: Appropriate lower level or permission of the instructor.

FA/MUSI 4099S 6.00 World Music: Individual Instruction - Setar. Private study of the Persian setar (long necked lute) including technique, traditional repertoire (radif) and performance practice. Open to non-majors. Prerequisite: Appropriate lower level or permission of the instructor.

FA/MUSI 4099T 3.00 World Music: Individual Instruction - Tabla. Private study of North Indian tabla drums including digital technique, tala (rhythmic structure) theory, accompaniment styles, solo repertoire and improvisatory practice. Open to non-majors. Prerequisite: Appropriate lower level or permission of the instructor.

FA/MUSI 4099T 6.00 World Music: Individual Instruction - Tabla. Private study of North Indian tabla drums including digital technique, tala (rhythmic structure) theory, accompaniment styles, solo repertoire and improvisatory practice. Open to non-majors. Prerequisite: Appropriate lower level or permission of the instructor.

FA/MUSI 4099U 3.00 World Music: Individual Instruction - Plucked Strings: Medieval and Renaissance. Private study of early music plucked strings: lute, harp, psaltery. Study will include playing techniques, acquisition of repertoire, improvisation, ornamentation and style awareness. Open to non-majors. Prerequisite: Appropriate lower level or permission of the instructor.

FA/MUSI 4099U 6.00 World Music: Individual Instruction - Plucked Strings: Medieval and Renaissance. Private study of early music plucked strings: lute, harp, psaltery. Study will include playing techniques, acquisition of repertoire, improvisation, ornamentation and style awareness. Open to non-majors. Prerequisite: Appropriate lower level or permission of the instructor.

FA/MUSI 4099V 3.00 World Music: Individual Instruction - Village Folk Vocal Styles. Private instruction in the vocal techniques and repertoires of various folk vocal traditions with an emphasis on repertoire development, vocal production and ornamentation. Repertoire will be chosen from various world music sources with an emphasis on the Canadian, American and British traditions. Open to non-majors. Prerequisite: Appropriate lower level or permission of the instructor.

FA/MUSI 4099V 6.00 World Music: Individual Instruction - Village Folk Vocal Styles. Private instruction in the vocal techniques and repertoires of various folk vocal traditions with an emphasis on repertoire development, vocal production and ornamentation. Repertoire will be chosen from various world music sources with an emphasis on the Canadian, American and British traditions. Open to non-majors. Prerequisite: Appropriate lower level or permission of the instructor.

FA/MUSI 4099W 3.00 World Music: Individual Instruction - World Rhythms for Drumkit. Private instruction on the drumset with an emphasis on developing fluency in the unique rhythmic patterns and grooves drawn from various world music traditions. Work will include odd meters, polyrhythmic forms, national dance styles (samba, reggae etc.) and alternative performance techniques. Open to non-majors. Prerequisite: Appropriate lower level or permission of the instructor.

FA/MUSI 4099W 6.00 World Music: Individual Instruction - World Rhythms for Drumkit. Private instruction on the drumset with an emphasis on developing fluency in the unique rhythmic patterns and grooves drawn from various world music traditions. Work will include odd meters, polyrhythmic forms, national dance styles (samba, reggae etc.) and alternative performance techniques. Open to non-majors. Prerequisite: Appropriate lower level or permission of the instructor.

FA/MUSI 4099X 3.00 World Music: Individual Instruction - Xiao. Private instruction in xiao (notched vertical flute). This course will introduce the student to basic and alternative fingerings, embouchure development, tuning techniques, melodic figuration and regional genre studies. Standard

Chinese jianpu notation will be used. Open to non-majors. Prerequisite: Appropriate lower level or permission of the instructor.

FA/MUSI 4099X 6.00 World Music: Individual Instruction - Xiao. Private instruction in xiao (notched vertical flute). This course will introduce the student to basic and alternative fingerings, embouchure development, tuning techniques, melodic figuration and regional genre studies. Standard Chinese jianpu notation will be used. Open to non-majors. Prerequisite: Appropriate lower level or permission of the instructor.

FA/MUSI 4099Y 3.00 World Music: Individual Instruction - Yangqin. Private instruction in yangqin (trapezoidal hammered dulcimer) including beater techniques, rhythmic figuration, ornamentation and regional genre studies. Standard Chinese notation will be used. Open to non-majors. Prerequisite: Appropriate lower level or permission of the instructor.

FA/MUSI 4099Y 6.00 World Music: Individual Instruction - Yangqin. Private instruction in yangqin (trapezoidal hammered dulcimer) including beater techniques, rhythmic figuration, ornamentation and regional genre studies. Standard Chinese notation will be used. Open to non-majors. Prerequisite: Appropriate lower level or permission of the instructor.

FA/MUSI 4099Z 3.00 World Music: Individual Instruction - Zhonghu and Erhu. Private instruction in Chinese erhu and zhonghu (two-stringed bowed lute) introducing left-hand fingerings, position shifts, various bowing techniques and regional genre studies. Standard Chinese jianpu notation will be used. Open to non-majors. Prerequisite: Appropriate lower level or permission of the instructor.

FA/MUSI 4099Z 6.00 World Music: Individual Instruction - Zhonghu and Erhu. Private instruction in Chinese erhu and zhonghu (two-stringed bowed lute) introducing left-hand fingerings, position shifts, various bowing techniques and regional genre studies. Standard Chinese jianpu notation will be used. Open to non-majors. Prerequisite: Appropriate lower level or permission of the instructor.

FA/MUSI 4110 6.00 Composition Studio IV. A continuation of FA/MUSI 3110 6.00. Advanced work in composition, analysis and current music-theoretic ideas of relevance to the composer. Prerequisites: FA/MUSI 3110 6.00 and permission of the course director. Prior or concurrent courses in the theory and literature of 20th-century music, such as FA/MUSI 3310 6.00 or FA/MUSI 4300 3.00 are strongly recommended.

AK/MUSI 4135 3.00 Listening: Issues in Auditory Cognition. Focuses on perception of sound, including memory for music and speech, auditory illusions, linguistic theory, psychoacoustics and timbre. Musical knowledge not required. Classes involve lectures, demonstrations and discussions. Prerequisites: General psychology prerequisites. Degree credit exclusion: AK/PSYC 4135 3.00.

Cross-listed to: AK/MUSI 4135 3.00, AK/PSYC 4160 3.00, AS/PSYC 4160 3.00, SC/PSYC 4160 3.00

FA/MUSI 4140 6.00 Composing for Film. Advanced composition studies involving the creation of recorded soundtracks for motion picture (formats will vary depending on project - i.e. film, video, DV, Internet, Multimedia Applications, Mini-DV, Firewire Port, Random Access, Final Cut Pro, Quicktime etc.). During the course, students will complete several composition projects and sync them to picture. Prerequisite: Permission of the course director.

FA/MUSI 4150 6.00 Digital Recording, Editing and Composition. This course deals with digital composition techniques. Included are topics such as: hard disk recording, destructive and non-destructive editing, non-linear editing, digital signal processing, digital audio sampling, multipass processing, processor smoothing, effects portamento, sample looping, crossfading and other additional rubrics. Prerequisites: Foundation courses and permission of the course director.

FA/MUSI 4200 3.00 Topics in Advanced Theory and Analysis. A seminar in contemporary musical analysis emphasizing the comprehensive investigation of complete musical works. Drawing on such perspectives as set theory or Schenkerian reduction, the course introduces the student to research problems in theory and analysis from

various perspectives. Prerequisite: A minimum grade of B in a 3000-level theory course.

FA/MUSI 4300A 3.00 Studies in Contemporary Music. Analytical and historical studies of the theory and development of contemporary music, with emphasis on the latter half of the twentieth century. Prerequisites: FA/MUSI 3310 6.0, or permission of the course director.

AK/MUSI 4310 3.00 Seminar In Musicology. An intensive treatment of selected topics in the history, literature and the theory of music. Prerequisite: Permission of the Music Coordinator. Note: Not open to students who have taken AK/MUSI 4310 3.0 OR 4310 6.0

FA/MUSI 4320 3.00 Honours Seminar. Researchers are motivated by problems which reflect basic issues in intellectual history, humanities, science and social science. In this course, pilot projects introduce the broad range of research tools which several centuries of theory and academic scholarship have made available to musical study. Prerequisite: A minimum grade of B in an upper-level studies course.

FA/MUSI 4370 3.00 Music of Canada. Canadians tend to be sharply aware of the derivative aspects of their culture; yet the physiognomy of Canadian music taken as a whole is unique. This course studies selected aspects of Canadian musical achievements which offer perspectives on our national situation. Prerequisite: FA/MUSI 3350 6.00, or FA/MUSI 3310 6.00, or permission of the course director.

AK/MUSI 4390 3.00 Independent Study in Music. Open to advanced students only, this course will give the highly motivated music student an opportunity to pursue intensive study on his/her own under the guidance of a departmental instructor. Prerequisites: 78 credits or equivalent preparation, and permission of the music coordinator and Chair of fine arts. Note: Not open to students who have taken AK/MUSI 4390 3.00 or AK/MUSI 4390 6.00 in the same subject area.

AK/MUSI 4390 6.00 Independent Study in Music. Open to advanced students only, this course will give the highly motivated music student an opportunity to pursue intensive study on his/her own under the guidance of a departmental instructor. Prerequisites: 78 credits or equivalent preparation, and permission of the music coordinator and Chair of fine arts. Note: Not open to students who have taken AK/MUSI 4390 3.00 or AK/MUSI 4390 6.00 in the same subject area.

FA/MUSI 4399 3.00 Special Topics in the Graduate Program. Fourth-year undergraduates who have the necessary background may apply to take certain courses offered in the graduate program. Prerequisites: Permission of both the graduate program director and the course director; a minimum grade of B+ in an upper-level studies course.

FA/MUSI 4590 3.00 Honours Project in Music. A special project option open to fourth-year students who have shown an exceptional ability to study independently and who have designed a course that cannot be accommodated elsewhere in the department's offerings. At the end of the year, the student's work is evaluated on the basis of one or more of the following: a recital, composition, research paper, or lecture-recital. Note: See departmental calendar for specific requirements. Prerequisite: Permission of the curriculum committee.

FA/MUSI 4590 6.00 Honours Project in Music. A special project option open to fourth-year students who have shown an exceptional ability to study independently and who have designed a course that cannot be accommodated elsewhere in the department's offerings. At the end of the year, the student's work is evaluated on the basis of one or more of the following: a recital, composition, research paper, or lecture-recital. Note: See departmental calendar for specific requirements. Prerequisite: Permission of the curriculum committee.

FA/MUSI 4600 6.00 Sonic Enhancement of Healing and Learning. A seminar exploring the use of sound, in conjunction with colour and other subtle energies, as tools for the enhancement of healing, learning and creative activity in the context of recent literature from the disciplines of metaphysics, physics, biology, psychology, phonology, thanatology,

colour theory and music composition. Prerequisite: An upper-level studies course, or permission of the course director.

Note: Natural science courses are part of the general education requirements of the Atkinson Faculty and York University. The Atkinson natural science courses are administered by the Science and Technology Studies Program. These courses aim to introduce students who are not majoring in the sciences to some of the most important aspects of scientific thinking, to the character of scientific judgements and to the place of science in society. Atkinson's natural science courses emphasize that a proper appreciation of the content of science requires a consideration of the larger historical, philosophical, social and political contexts of science. Unless otherwise stated the following courses do not require a specific prior knowledge of mathematics and science.

Note: Students who have successfully completed humanities, social science and mathematics/modes of reasoning may take a science and technology studies course to fulfill the natural science general education requirement. Exclusion: Science and technology studies and general science majors may not take AK/STS 1010 6.00 or AK/STS 2010 6.00 to satisfy their natural science general education requirement.

Faculty of Science and Engineering Courses in Natural Science

The natural science courses are designed, as part of the general education program, to acquaint those students not intending to be professionally concerned with science with the outlook, methods and some of the achievements of science. The individual courses offered approach this objective by selecting a particular area, problem or aspect of science in which the operations of the scientific enterprise can be studied in some detail.

The courses may be broadly classified into four areas, within which some overlap occurs, resulting in degree credit exclusions as noted. However, in certain circumstances, such exclusions are petitionable. The four categories are as follows:

a) History and philosophy of science and technology (with science laboratories and/or tutorials): SC/NATS 1710 6.00, SC/NATS 1730 6.00, SC/NATS 1760 6.00;

b) Biological science: SC/NATS 1610 6.00, SC/NATS 1620 6.00, SC/NATS 1650 6.00, SC/NATS 1660 6.00, SC/NATS 1680 6.00, SC/NATS 1690 6.00, SC/NATS 1695 6.00, SC/NATS 1850 6.00;

c) Environmental science: SC/NATS 1640 6.00, SC/NATS 1770 6.00, SC/NATS 1840 6.00;

d) Physical science: SC/NATS 1720 6.00 (also has a psychological component), SC/NATS 1740 6.00, SC/NATS 1750 6.00, SC/NATS 1780 6.00 (has an environmental aspect), SC/NATS 1790 6.00, SC/NATS 1810 6.00, SC/NATS 1820 6.00, SC/NATS 1830 6.00.

The natural science courses are intended primarily for non-science majors. Courses in biology, chemistry, earth and atmospheric science, physics and astronomy and other science disciplines are described elsewhere in this section of the calendar. Those courses are available, subject to prerequisites, as electives to students in the Faculties of Arts and Fine Arts. Six credits from 1000-level courses offered by the departments of Biology, Chemistry, Earth and Atmospheric Science, Physics and Astronomy, will satisfy the Faculty of Arts natural science general education requirement.

Grading Procedure. Grades will be assigned in the manner described by the Faculty of Science and Engineering in the Faculty of Science and Engineering Regulations Governing Examinations and Academic Standards section of this calendar.

Not all natural science courses will be offered in any given year. The contact hour information in the course outlines below specifies the number of hours per week when the course is taught in the daytime in a fall/winter session. If the course is offered in a summer session, the format and scheduling may be different, though equivalent in credit value. For all such scheduling details, students should consult the lecture schedules or the natural science mini-calendar which is published in March of each year.

The natural science courses all follow the Faculty of Arts sessional dates.

For a list of Atkinson Faculty of Liberal and Professional Studies courses which are degree credit exclusions for natural science courses in this calendar, Faculty of Arts students should consult the Faculty of Arts degree credit exclusion/equivalent tables in the lecture schedules on the Web. Science and Engineering students should consult the Faculty of Science and Engineering degree credit exclusion/equivalent tables in the lecture schedules on the Web and in the Office of Science Academic Services beginning in March each year.

Courses in Natural Science/Cours de sciences naturelles

GL/NATS 1400 6.00 Science, Faith and Science Fiction. This course explores selected topics in the history of modern science and its complex dialogue with Western religion. Changes in our conceptions of human nature and God are examined through our critical reading of science-fiction (sf), a literature that has served both to celebrate and to criticize modern science. Degree credit exclusions: GL/NATS 1830 3.00 and GL/NATS 1011 6.00 (Fall/Winter 1997-1998, Fall/Winter 1998-1999).

GL/NATS 1500 6.00 Nutrition, santé et société. Une étude de la façon dont notre corps absorbe et utilise nos aliments. Une perspective scientifique permet de comprendre le rôle des éléments nutritifs et leur interaction dans la croissance, la régénération et le règlement des fonctions vitales.

Language of Instruction: French

GL/NATS 1520 6.00 Environnement : Quel avenir? Le cours a pour objet les interactions et les équilibres délicats qui sont à l'oeuvre dans la biosphère. Une attention toute particulière sera accordée aux substances polluantes – à leur production et à leur dispersion dans l'environnement ainsi qu'aux techniques permettant de les contrôler. Cours incompatible: GL/NATS 1760E 3.00.

Language of Instruction: French

GL/NATS 1540 6.00 Principes de biologie. Ce cours se veut une introduction à la diversité du monde vivant. Il est conçu pour les étudiants en arts libéraux. Pour bien comprendre les multiples relations entre les organismes vivants, la génétique, la biologie cellulaire, la biologie évolutive et l'écologie seront utilisées.

Language of Instruction: French

GL/NATS 1540 6.00 Introductory Biology. This course is an introduction to the diversity of life. It is designed for non-science majors. To develop an understanding of the many ways living organisms are related, disciplines such as genetics, cell biology, evolutionary biology and ecology will be used.

GL/NATS 1600 6.00 Science of Flight. This course presents basic physical principles by studying various aspects of aircraft and flying. Topics include properties of air as a fluid, aero-engines, basic theory of flight, principles of aircraft instruments and navigation, and processes which influence the weather. Cross-listed to: GL/CDNS 1600 6.0 (EN) Prerequisite: GL/CDNS 1600 3.0 (EN), GL/NATS 1600 3.0 (EN), and GL/NATS 1740 3.0 (EN).

Cross-listed to: GL/CDNS 1600 6.00, GL/NATS 1600 6.00

GL/NATS 1605 6.00 Communication, Health and Environment. This multidisciplinary course connects the three areas of communication, health and environment. This allows students to get a taste of different disciplines and approaches before deciding what to specialize in.

Cross-listed to: GL/NATS 1605 6.00, GL/SOSC 1605 6.00

SC/NATS 1610 6.00 The Living Body. Some aspects of human biology, including structure and function, reproduction, physiology, genetics and a study of some human diseases. Laboratories are self-paced, scheduled audio-tutorials involving demonstrations, experiments and observations. Three lecture hours, one laboratory hour. Two terms. Six credits. Degree credit exclusions: SC/NATS 1620 6.00 (taken before 2001-2002), SC/NATS 1660 6.00, SC/NATS 1690 6.00. Not open to students enrolled in Biology programs.

SC/NATS 1620 6.00 Human Biology: Brain and Behaviour. The first term examines nerve cells, drug action, visual and auditory systems, and neural bases of learning and memory. Brain imaging is discussed. The second term focuses on muscle control, brain development, human genetics and brain evolution. Three lecture hours for two terms, two laboratory hours for one term. Six credits. Degree credit exclusion: Not open to students enrolled in Biology programs.

SC/NATS 1640 6.00 Biology and the Environment. This course provides an understanding of the fundamental biological and ecological principles influencing the environment. The impact of the human species on the biosphere and inter-relationships with all living organisms are discussed in the context of environmental concerns. Three lecture hours, one tutorial hour. Two terms. Six credits. Degree credit exclusions: SC/NATS 1690 6.00, SC/NATS 1770 6.00, SC/NATS 1840 6.00, ES/ENVS 1500 6.00. Not open to students enrolled in Biology programs.

SC/NATS 1650 6.00 Human Anatomy for the Fine Arts. An introductory course on the structure and function of the human body specifically oriented towards the needs of students in Fine Arts. Body systems are studied from anatomical, physiological and biomechanical perspectives. Included as well are on-going references to nutrition, athletic injuries, and health and wellness. Two lecture hours, two laboratory hours. Two terms. Six credits. Degree credit exclusions: AS/SC/KINE 2031 3.00, AS/SC/KINE 3070 3.00, AS/SC/PHED 2070 3.00, SC/PHED 2070 4.00, AS/PHED 3070 3.00, SC/PHED 3070 4.00.

SC/NATS 1660 6.00 The Biology of Sex. This course investigates the role of sexual reproduction in the living world. The cellular, physiological and genetic bases of sex are discussed. Other topics include sexual behaviour and the influence of sexual reproduction on evolution. Three lecture hours for two terms, two laboratory hours for one term. Six credits. Degree credit exclusions: SC/NATS 1610 6.00, SC/NATS 1690 6.00. Not open to students enrolled in Biology programs.

SC/NATS 1670 6.00 Concepts in Human Health and Disease. This course examines health threats from a biological perspective, with focus on issues that are relevant to the 20-30 age group, approaching immunological, bacterial, viral and genetic diseases from a multi-disciplinary perspective. Three lecture hours, one laboratory hour. Two terms. Six credits.

SC/NATS 1680 6.00 The Genetic Revolution. This course examines the impact of recent genetic discoveries on medicine, agriculture and industry. New technologies employ enzymes to cut and splice DNA from different organisms. This has the potential to benefit human society but gene manipulations raise important ethical questions. Three lecture hours, one tutorial hour. Two terms. Six credits. Degree credit exclusions: SC/NATS 1800J 6.0A, SC/NATS 1800J 6.0B, SC/NATS 1850 6.00, SC/BC 1850 6.00. Not open to students enrolled in Biology programs.

SC/NATS 1690 6.00 Evolution. This course concerns the origin and diversification of life forms on Earth. Students are introduced to the historical development of evolutionary theory, classification of living things and to scientific explanations of how biological diversity has arisen. Three lecture hours for two terms, two laboratory hours for one term. Six credits. Degree credit exclusions: SC/NATS 1610 6.00, SC/NATS 1640 6.00, SC/NATS 1660 6.00, SC/NATS 1695 6.00. Not open to students enrolled in Biology programs.

AK/NATS 1700 6.00 Computers, Information and Society. Selected survey of the history of computing, information technology and communication and critical discussion of their social impact.

AK/NATS 1710 6.00 The Nature and Growth of Science. A course designed to introduce students to the scientific attitude through an exploration of the development and present character of certain major ideas in science. The emphasis will be on the social, religious and philosophical significance of these ideas. There will be extensive discussion of the lives of major scientists and of the place of science in history. The central themes are the ways in which scientific ideas arise and how they gain acceptance.

SC/NATS 1710 6.00 The Nature and Growth of Scientific Thought. Science is examined as an intellectual activity. Emphasis is placed on the evolution of some key concepts to show the nature and methodology of natural science, the development of scientific ideas and their grounding in experience. Three lecture hours plus scheduled laboratory sessions. Two terms. Six credits. Degree credit exclusion: SC/NATS 1730 6.00.

AK/NATS 1720 6.00 Exploration of the Universe. A study of the universe and the science of astronomy. The course will include such topics

as: modern astronomical tools and techniques, the solar system, the sun, stellar astrophysics, galaxies, relativity and the expanding universe, cosmology and the question of life in the universe. The course may include observations and laboratory sessions.

SC/NATS 1720 6.00 Light and Sound. An introduction to the physics, physiology and psychology of light and sound, together with some of the historical background and philosophical implications of these studies. Three lecture hours plus scheduled laboratory sessions. Two terms. Six credits.

AK/NATS 1730 6.00 Extraterrestrial Life. Science's search for life in the solar system and beyond. What is terrestrial life? How did it arise and evolve? What chances are there that something similar may have developed elsewhere in the universe? How can we find out?

SC/NATS 1730 6.00 Science as Discovery. A study of the nature of scientific discovery based on several case histories, including the Ptolemaic and Copernican planetary theories, the Newtonian mechanist system, Darwin's theory of evolution, Einstein's relativity and Watson and Crick's discovery of the structure of DNA. Three lecture hours, one tutorial hour. Two terms. Six credits. Degree credit exclusion: SC/NATS 1710 6.00.

SC/NATS 1740 6.00 Astronomy. A discussion of our present understanding of the universe and its constituents. Topics include the structure and evolution of the planets, stars, galaxies and the universe as a whole. Three lecture hours per week, two-hour laboratory sessions every second week. Two terms. Six credits. Degree credit exclusion: Not open to any student who has passed or is taking SC/PHYS 1070 3.00.

AK/NATS 1750 6.00 History of Astronomy. Astronomy from a historical perspective. A selective survey of astronomical knowledge, techniques, applications and uses from the earliest civilizations to the present.

SC/NATS 1750 6.00 The Earth and Its Atmosphere. Topics addressed concerning the Earth include geochronology, seismology, geomagnetism and plate tectonics. Topics addressed concerning the atmosphere include the general circulation, climate change, ozone depletion, weather and violent storms. Three lecture hours, one tutorial hour. Two terms. Six credits. Degree credit exclusions: SC/NATS 1780 6.00. Not open to any student who has passed or is taking a course in earth and atmospheric science.

AK/NATS 1760 6.00 Science, Technology and Society. A study of the intellectual and social nature of science and technology, their similarities and differences. The course may deal with the impact of scientific and technological advancements on societies, both past and present. Among the topics discussed are the problems of industrial growth, energy, pollution, governmental policy on science and the humanities, and the future of technological societies.

AK/NATS 1770 6.00 The Origin, Nature and Diversity of Life. This course will introduce life's major biological processes and diversity, and consider implications of modern biology for people. Emphasis may vary among sections but will include: philosophy and practice of science, structure and function of living organisms, genetics and evolution, animal behaviour and ecology.

GL/NATS 1770 6.00 Heredity and Society. A study of genetic variation in individuals and populations and the genetic basis of evolution. Specific attention is focused on human genetic knowledge and technology.

SC/NATS 1770 6.00 Technology and the Environment. Basic scientific principles and reasoning need to be applied to environmental pollution. Underlying causes of the present difficulties and current technological solutions are examined. Some ecological and societal aspects of pollution are discussed. Three lecture hours per week, one tutorial hour every second week. Two terms. Six credits. Degree credit exclusions: SC/NATS 1640 6.00, SC/NATS 1840 6.00.

AK/NATS 1780 6.00 Technology and Civilization. A study of the most important technological advances and their impact upon civilization, this course will focus upon selected important innovations (e.g. mechanized

agriculture, wind, water, steam and nuclear power generation, aviation and railways and communications).

SC/NATS 1780 6.00 Weather and Climate. The weather and health of our atmosphere affect us all. This course provides an overview of the Earth's atmosphere; its chemistry, physics and dynamics; an introduction to meteorology and weather forecasting; and a discussion of climate. Canada's weather and climate are emphasized. Three lecture hours, one tutorial hour. Two terms. Six credits. Degree credit exclusion: SC/NATS 1750 6.00.

AK/NATS 1790 6.00 Science and the Environment. An examination of our dual role as a biological component of the ecosystem of which we are a part, as well as managers of that same ecosystem. Emphasis may vary among sections. The course is divided into four inter-related areas: 1) examination of environmental problems; 2) physical, chemical and biological principles pertinent to ecological problems; 3) evolutionary and ecological principles; 4) ecological management and problem solving.

SC/NATS 1790 6.00 The Science of Flight. This course presents basic physical principles by studying various aspects of aircraft and flying. Topics include properties of air as a fluid, aero-engines, basic theory of flight, principles of aircraft instruments and navigation and processes which influence the weather. Three lecture hours, one tutorial hour. Two terms. Six credits.

GL/NATS 1800 3.00 Evolution and Ecology of Humans. This course contrasts the ecological conditions attendant upon early human evolution with the complex environmental situations now faced by modern technological societies. Essential themes are Darwinism, the effect of earlier cultures upon the environment and selected modern examples in human ecology.

AK/NATS 1800 6.00 Science and Everyday Phenomena. How do scientists approach familiar things and everyday phenomena? What kinds of assumptions do they make about them? Why do they turn the obvious into problems?

AK/NATS 1810 6.00 Science and Creativity. A course designed to investigate the creative part of scientific investigation, how creativity of the individual scientist reflects upon theory and practice. Specific examples will be studied in their historical, philosophical, sociological and psychological aspects.

SC/NATS 1810 6.00 Energy. Conversion technology of current and possible future energy sources is described. The extent of the resource base of each and the environmental consequences of utilization are discussed, with emphasis on nuclear power and energy policies of Ontario and Canada. Three lecture hours, one tutorial hour. Two terms. Six credits. Degree credit exclusions: SC/NATS 1800C 6.00, SC/BC 1810 6.00.

AK/NATS 1820 6.00 Human Development. A study of biological development of the human being including the formation of germ cells, the process of fertilization, early embryological development, transmission of genetical and chromosomal characteristics and the histology of growing tissues. Where necessary, observations and experiments are employed. Emphasis may be placed on child development, learning, or on human evolution.

SC/NATS 1820 6.00 Molecules and the Mind. A study of the role of chemistry in contemporary society. Relevant topics are selected each year to show how chemistry impinges upon daily life. Important historical perspectives and basic concepts, such as energy and atomic/molecular structure, are introduced as background. Three lecture hours, one tutorial hour. Two terms. Six credits. Degree credit exclusions: Not open to any student who has passed or is taking any one of SC/CHEM 1000 6.00, SC/CHEM 1000 3.00, SC/CHEM 1001 3.00, SC/CHEM 1010 6.00.

AK/NATS 1830 6.00 Frontiers of Modern Science. A non-technical survey of current progress in selected areas of the natural sciences. Topics may include: the origin of the earth and planets, the age of the earth, continental drift, relativity, theories of the nature of the universe, new objects in space, the origin of life, modern evolution, science and society,

ethical problems raised in science, ecological questions in science, pseudo-science and philosophical issues in science.

SC/NATS 1830 6.00 Matter and Structure. From atomic structure comes molecular structure, and, in turn, come the physical properties of matter composed of atoms and molecules. The relationship between physical properties and usefulness of materials is developed. The role of science in developing new materials is discussed. Three lecture hours per week, two tutorial/laboratory hours in alternate weeks. Two terms. Six credits.

AK/NATS 1840 6.00 Biology, Medicine and the Human Body. The scientific bases of modern medicine will be discussed in relation to important issues of human physiology and health. Emphasis may vary among sections and topics may include human nutrition, pharmacology, public health, medical education and the history of medicine and physiology.

SC/NATS 1840 6.00 Science and the Environment. This course provides a simplified description of the complex interactions and balances controlling the biosphere. The ways in which pollutants are produced and dispersed in the environment are discussed, together with their effects and how they are monitored and controlled. Three lecture hours, one tutorial hour. Two terms. Six credits. Degree credit exclusions: SC/NATS 1640 6.00, SC/NATS 1770 6.00.

AK/NATS 1850 6.00 Science and Pseudoscience. An examination of such topics as astrology, extrasensory perception, the ideas of Velikovsky, as examples of widely held beliefs which meet with little approval in the scientific community. The course will attempt to clarify the methodological and social criteria by which science functions in contrast with the attitudes prevalent among those operating along its fringes. It will also seek to describe how heretical hypotheses and theories may become part of accepted scientific understanding as well as the varied bases on which they may remain excluded.

AK/NATS 1860 6.00 Genes, People and Populations. The central idea of genetics, evolution and population biology: their significance for people now and in the future. Topics will include the population explosion, genetic engineering and ecosystems.

SC/NATS 1860 6.00 Science: Past, Present and Future. Modern science has drastically changed our lives and how we perceive the world and will do so in future. This course explores, through case studies of revolutions in biological and physical sciences, how scientists work, experiment, theorize, communicate and debate. Three lectures and one hour online tutorial per week. Two terms. Six credits.

AK/NATS 1870 6.00 Understanding Colour. A cross-disciplinary approach in examining colour, with the aim of understanding colour from the multiple viewpoints of art, physics, chemistry, physiology and history. Topics include: perception, wave nature of light, spectroscopy, colour harmony and contrast, natural phenomena, dyes and pigments.

GL/NATS 1870 6.00 Introduction à l'histoire des sciences et des techniques. Les grands moments de l'histoire des sciences et des techniques envisagés dans leur contexte social et politique. On s'attarde surtout sur la période moderne, et on prête une attention particulière à l'influence que peuvent exercer sur l'ensemble de la culture contemporaine les progrès scientifiques et techniques (nucléaires, manipulations génétiques, par exemple).

Language of Instruction: French

GL/NATS 1880 6.00 Human Reproduction and Development. A biological examination of human reproduction and development. Emphasis is on: conditions of fertility and infertility; stages of embryonic/fetal development; genetic and environmental factors relating to birth defects.

SC/NATS 1880 6.00 Life Beyond Earth. This course considers the various factors required for life to exist beyond Earth, both life that may have evolved elsewhere and what would be necessary for humans moving out into space. Three lecture hours per week plus alternate week tutorial/

laboratory sessions of two hours. Two terms. Six credits. Degree credit exclusion: AK/NATS 1730 6.00.

GL/NATS 1890 6.00 Introduction to the Science, Technology and Society. Introduction to the intellectual and sociocultural context of science and technology. The course will deal with the impact of scientific and technological developments on societies, both past and present. Topics include: historical origins of modern science; science and the humanities; and ethical and philosophical controversies endangered by scientific/technological advances (e.g. biotechnology, computers).

GL/NATS 2200 3.00 Ecology of Northern Environments. Plants and animals of the temperate and arctic climates of the northern hemisphere exhibit adaptations critical for survival. The factors that determine the distribution and abundance of various species are examined at the individual, population and community level. The communities selected are representative of terrestrial, fresh-water and marine ecosystems. The effects of climate change and human activities on northern ecosystems will be examined; these include impacts such as aquatic contaminants and eutrophication, or in the case of terrestrial ecosystems, airborne contaminants and surface disturbance.

GL/NATS 2300 3.00 Écologie générale. Ce cours offre une introduction aux étudiant(e)s en arts libéraux à l'étude scientifique des relations entre les organismes et leur environnement physique et biologique. Les principes généraux serviront à interpréter la distribution, l'abondance et les caractéristiques des organismes dans l'espace et le temps.

Language of Instruction: French

GL/NATS 2300 3.00 General Ecology. This course is an introduction for non-science majors to the scientific study of relationships between organisms and their physical and biological environments. General principles will be used to interpret patterns in the distribution, abundance, and characteristics of organisms in space and time. Degree credit exclusion: GL/NATS 1760 3.00(EN).

GL/NATS 2310 3.00 Conservation Biology. Conservation biology has merged as a major new subject area addressing the alarming loss of biological diversity throughout the world. The number of species that are becoming endangered or vulnerable is unprecedented and continues to accelerate. This course explores means of prevention of loss, the causes of species declines and the effect of human intervention. The goals of this course are to understand concepts and theories underlying conservation biology, to develop critical thinking in matters related to biodiversity (both scientifically and politically) and to learn tools used by conservation biologists to protect diversity.

GL/NATS 2400 6.00 Introduction aux sciences de la terre et de l'univers. Ce cours offre aux étudiants les connaissances de base des Sciences de la terre et de l'Univers. Son contenu couvre les disciplines suivantes des sciences de la terre : géologie générale, sédimentologie, tectonique et Géostatistique ainsi que la cosmologie.

Language of Instruction: French

SC/NATS 2700 9.00 Science: Fundamental Ideas and Social Dimensions. A study of key ideas in the physical, life, earth, space and environmental sciences necessary to teach the Ontario elementary science curriculum. The social dimensions of science and technology, especially relating to Canada, are integrated with the scientific material. Four lecture hours per week, 12 two-hour laboratory sessions. Two terms. Nine credits. Prerequisite: Normally open only to those coregistered in the Faculty of Education primary/junior or junior/intermediate programs or planning to apply for those programs. Note: This course fulfills the Faculty of Arts general education requirement.

GL/NATS 2910 6.00 Medieval Technology, Practice and Theory. A history of technology in the Middle Ages and the economic, social and political ramifications of its use.

Cross-listed to: GL/HIST 2910 6.00, GL/NATS 2910 6.00

GL/NATS 2910 6.00 Technologie du moyen âge : pratique et théorie. Histoire de la technologie employée au cours du moyen âge, les ramifications économiques, sociales, et politiques de son emploi.

Language of Instruction: French

Cross-listed to: GL/HIST 2910 6.00, GL/NATS 2910 6.00

GL/NATS 2920 6.00 Medieval Science: Thought and Practice. A history of scientific thought in the Middle Ages, its divisions, its scope and its place in medieval society.

Cross-listed to: GL/HIST 2920 6.00, GL/NATS 2920 6.00

GL/NATS 2920 6.00 Science médiévale, pensée et pratique. Histoire de la pensée scientifique au moyen âge, ses divisions, sa portée, et sa place sociale.

Language of Instruction: French

Cross-listed to: GL/HIST 2920 6.00, GL/NATS 2920 6.00

GL/NATS 3100 6.00 Travail individuel. Tout étudiant choisit un programme d'étude individuel qu'il mènera à bien sous la direction d'un professeur du collège. Attention : Tous les Travaux individuels offerts dans le cadre d'Études pluridisciplinaires à Glendon sont régis par des règlements précis, que le secrétariat d'Études pluridisciplinaires tient à la disposition des étudiants. (Étant donné qu'il n'existe aucune garantie que ce projet soit accepté, on conseille vivement à l'étudiant de s'inscrire dans un autre cours jusqu'à ce qu'une décision soit prise.)

Language of Instruction: French

GL/NATS 3100 6.00 Individual Studies. Students do independent reading and research together with written assignments under the guidance of a member of the college. All individual studies in multidisciplinary studies at Glendon are subject to specific regulations which the department will supply on request. (Since there is no assurance that a proposed project will be accepted, the student is encouraged to enrol in another course until a decision is made concerning the proposal.)

GL/NATS 3200 6.00 Historical Trends in Human-Environmental Interrelationships. This course examines the profound impact of ancient environments upon living organisms, with reference to specific biological problems such as extinction. Early Paleolithic humans interacted with various natural ecosystems, which became modified as a result. The subsequent historical impact of human activities on the environment resulted in a trend of increasing pressures upon animal populations, world vegetation and soils. Current urban-rural land use conflicts and conservation problems exemplify the modern impact. Prerequisite: GL/NATS 1540 6.00 or GL/NATS 2300 3.00 or permission of the department.

GL/NATS 3205 3.00 Human-Insect Interactions. This course offers an overview of the multifaceted relationships between the human species and insects. It will include an introduction to entomology. The following aspects will be discussed: economic, health and environmental impact of insects, insects in arts, culture, mythology, phobia etc.

GL/NATS 3230 6.00 Génétique et santé humaine. Le cours présente les bases cellulaires et moléculaires de la génétique. Il adopte une approche historique de la génétique moderne mendélienne et classique. Il vise à initier les étudiants à l'analyse génétique à la thérapie génique, il aborde les problèmes actuels de la bioéthique, où l'être humain passe l'objet à soigner à l'objet à améliorer et à transformer. Condition(s) préalables : cours de biologie niveau secondaire/CEGEP ou GL/NATS 1540 6.00 Cours incompatibles : GL/NATS 2010 6.00 (2001-2002), GL/NATS 3010 6.00 (2002-2003).

Language of Instruction: French

GL/NATS 3310 3.00 Environmental Impact Assessment. This course offers a review of the methodology involved in environmental impact and risk assessments, with an emphasis on the Canadian process and legislation. Biological methodologies as well as management, planning and other assessment tools will be examined. Prerequisite: GL/NATS 1540 6.00 or GL/NATS 2300 3.00 or permission of the department.

GL/NATS 3500 6.00 Chimie de l'environnement. Ce cours fournit aux étudiants les bases scientifiques nécessaires pour comprendre l'impact de la chimie industrielle sur l'environnement. Les thèmes abordés couvrent, entre autres, les sources de la pollution de l'air, de l'eau, et du sol, la

dissémination de la pollution dans la biosphère, ses effets, et le contrôle que l'on doit exercer.

Language of Instruction: French

GL/NATS 3635 3.00 Psychologie de la santé. La psychologie de la santé constitue un secteur d'activité en pleine effervescence. Le cours mettra l'emphase sur le rôle scientifique de la psychologie appliqué aux problèmes de santé, le stress psychologique ainsi que plusieurs variables modératrices. Condition préalable : GL/PSYC 2510 6.00. Cours incompatibles : GL/PSYC 3010 3.00(EN) Automne/hiver 1988-1989, Automne/hiver 1989-1990 and Automne/hiver 1991-1992 and GL/PSYC 3700 3.00.

Cross-listed to: GL/NATS 3635 3.00, GL/PSYC 3635 3.00

GL/NATS 3635 3.00 Health Psychology. This course examines psychological contributions to health maintenance, prevention and treatment of illness, and to the identification of correlates of specific conditions in health and illness. Prerequisite: GL/PSYC 2510 6.00. Degree credit exclusions: GL/PSYC 3010 3.00 (Fall/Winter 1988-1989, Fall/Winter 1989-1990, Fall/Winter 1991-1992) and GL/PSYC 3700 3.00.

Cross-listed to: GL/NATS 3635 3.00, GL/PSYC 3635 3.00

GL/NATS 3640 3.00 La Psycholinguistique. Ce cours examinera les concepts, les théories, et les recherches empiriques les plus importants dans l'étude du langage en tant que système symbolique et en tant qu'activité motrice biologique. On traitera de l'acquisition du langage, du bilinguisme, et de la relation entre le langage et la pensée. Condition préalable : GL/PSYC 2510 6.00 ou l'équivalent.

Language of Instruction: French

Cross-listed to: GL/LIN 3640 3.00, GL/NATS 3640 3.00, GL/PSYC 3640 3.00

GL/NATS 3640 3.00 Psychological Studies of Language. Human language is unique among communication systems in its richness, complexity of structure, and function. This course examines language both as a symbolic system and as a motor activity produced by a biological organism. Topics include language acquisition, bilingualism and the interrelationship between language and thinking. Prerequisite: GL/PSYC 2510 6.00 or equivalent.

Cross-listed to: GL/LIN 3640 3.00, GL/NATS 3640 3.00, GL/PSYC 3640 3.00

GL/NATS 3650 3.00 History of Experimental Psychology. This course introduces the student to the main lines of development of scientific psychology, as well as to the major theoretical systems which have emerged within psychology. Prerequisite: GL/PSYC 2510 6.00 or equivalent.

Cross-listed to: GL/NATS 3650 3.00, GL/PSYC 3650 3.00

GL/NATS 3655 6.00 Social Issues in Reproduction. This course examines various issues raised by new reproductive technologies which are currently being developed. Discussions include the biology of these technologies and ethical, moral, legal, political and economic aspects related to their use by human society. Degree credit exclusions: GL/NATS/SOSC/CDNS/WMST 3657 3.00, GL/NATS 3010 3.00(EN) (Fall 1996).

Cross-listed to: GL/NATS 3655 6.00, GL/SOSC 3655 6.00, GL/WMST 3655 6.00

GL/NATS 3658 3.00 Genetic Technology: Its Applications to Industry, Medicine and Agriculture. This course will focus on DNA technology and its use in areas of health, medicine, pharmaceuticals, forensic science and animal and plant breeding. Ethical, legal, medical and environmental safety issues arising from the application of DNA technology will be discussed, using Canadian examples where possible. Degree credit exclusion: GL/NATS 3010C 3.00 (Fall 1996).

Cross-listed to: GL/CDNS 3658 3.00, GL/NATS 3658 3.00

GL/NATS 3670 3.00 Psychobiology. This course reviews the physiological basis of behaviour including elements of neuroanatomy,

psycho-physiology, neuropsychology and psycho-pharmacology. Prerequisite: GL/PSYC 2510 6.00 or equivalent.

Cross-listed to: GL/NATS 3670 3.00, GL/PSYC 3670 3.00

GL/NATS 3675 3.00 Humans as Primates: Comparative Evolutionary Views. This course discusses non-human primate research from comparative, developmental and evolutionary perspectives, focusing on its implications for human psychology. Topics may include primate evolution (brain/behaviour) and ecology, parenting, mating, social dominance/affiliation, language, deception, self-awareness, cognition and imitation. Prerequisite: GL/PSYC 2510 6.00. Degree credit exclusion(s): GL/PSYC/NATS 3010 3.00 (Winter 1994, Winter 1995, Winter 1997).

Cross-listed to: GL/NATS 3675 3.00, GL/PSYC 3675 3.00

GL/NATS 3675 3.00 L'humain comme espèce primate. Ce cours veut examiner la psychologie humaine de la perspective de notre histoire comme espèce dans l'ordre biologique Primata. Le cours discutera les connaissances actuelles sur les primates nonhumains de différentes perspectives - comparative, développementale, évolutionnaire - afin d'explorer leurs implications pour les humains.

Language of Instruction: French

Cross-listed to: GL/NATS 3675 3.00, GL/PSYC 3675 3.00

GL/NATS 3680 3.00 L'évolution du comportement chez les animaux. Ce cours examinera les concepts et les recherches empiriques les plus importantes dans l'étude de l'évolution du comportement, et portera principalement sur les animaux, mais aussi, sur l'homme. Le cours traitera de l'évolution de la perception, de l'apprentissage, de la physiologie, de la reproduction, de l'alimentation, du comportement social etc. La théorie de l'évolution par sélection naturelle sera discutée. Condition préalable : GL/PSYC 2510 6.00 ou l'équivalent.

Cross-listed to: GL/NATS 3680 3.00, GL/PSYC 3680 3.00

GL/NATS 3680 3.00 Evolution of Behaviour in Animals. Research and theory with animals are considered. Perspectives in evolution, ethology, sociobiology and psychology are dealt with. Topics covered include facial, vocal and spatial communications; perception, learning and reproduction. Prerequisite: GL/PSYC 2510 6.00 or equivalent.

Cross-listed to: GL/NATS 3680 3.00, GL/PSYC 3680 3.00

GL/NATS 3690 3.00 Perception. This course focuses on the nature of light, the eye and the visual nervous system. Early vision (encoding light and pattern) and higher order vision (encoding surfaces and objects) are covered. Neurobiological mechanisms are underlined. The auditory system is also covered. Prerequisite: GL/PSYC 2510 6.00. Degree credit exclusion: GL/PSYC 3290 3.00.

Cross-listed to: GL/NATS 3690 3.00, GL/PSYC 3690 3.00

GL/NATS 3720 6.00 Environmental Problems. This course examines selected topics are selected from recent literature in biology and relevant economic, political, geographical and ethical studies. These interpretations emphasize the holistic approach to modern ecological problems, including Canadian examples. Contrasting viewpoints are examined. Prerequisite: GL/NATS 1540 6.00 or GL/NATS 2300 3.00 or permission of the department.

GL/NATS 3720 6.00 Problèmes environnementaux. Ce cours aborde des sujets choisis à partir de la littérature récente en biologie de même qu'en économie, science politique, géographie etc., dans le but d'accentuer l'approche holistique des problèmes environnementaux (en incluant des exemples canadiens). Des points de vue conflictuels seront examinés. Condition préalable : GL/NATS 1540 6.00 ou GL/NATS 2300 3.00 ou permission du département.

Language of Instruction: French

GL/NATS 3970 6.00 Socio-Politics of Science. An examination of the interaction between science and socio-political institutions, with particular focus on the biological sciences. Topics include: government science policy, politicalization of the scientific community, science and public policy

(e.g. genetic counselling, food and drug legislation); legal and ethical problems of biomedical research.

Cross-listed to: GL/NATS 3970 6.00, GL/POLS 3970 6.00

GL/NATS 3995 6.00 Les femmes et la santé. Sous une perspective historique et sociologique, ce cours aborde ces sujets: la santé physique et mentale des femmes, les traitements qu'elles reçoivent au sein de la profession médicale, leurs rôles en tant que guérisseuses au sein de cette profession. Cours incompatibles : GL/WMST 3995 3.00, AK/AS/GL/WMST 3507 3.00, GL/NATS 3995 3.00, GL/SOSC 3995 3.00.

GL/NATS 4630 6.00 Revolutions in Science and Politics: From Galileo to the Greens. This course explores the connection between assumptions about physical reality underlying Newtonian physics and how we have organized social and political institutions. We stress that the breakdown of these assumptions in this century implies the need for a new conception of politics.

Cross-listed to: GL/NATS 4630 6.00, GL/POLS 4630 6.00

GL/NATS 4645 3.00 Topics in the Philosophy of Descartes. A variety of topics in Descartes' philosophy will be examined in this course. Students may only take one course under this rubric. Descartes' philosophy will be studied in historical context. Emphasis will be placed on Descartes' participation in the scientific revolution and his assessment of its philosophical implications, particularly those concerning human nature and the possibility of knowledge (including self-knowledge) and human freedom. Topics may change from year to year. Integrated with GS/PHIL 5150 3.00. Prerequisite: GL/PHIL 2520 6.00(EN) or permission of the instructor. Degree credit exclusion: GL/PHIL 4640 3.00(EN) and GL/NATS 4640 3.00(EN).

Non-profit Management – Arts

Certificate Office:

Department of Political Science, S672 Ross Building, 416-736-5265

York University students may earn a Certificate in Non-profit Management concurrent with fulfillment of the requirements for a bachelor's degree. This certificate is open to students in all undergraduate faculties except for students enrolled in the Schulich School of Business bachelor of business administration program or the Atkinson bachelor of administrative studies program. Students may not earn both a Certificate in Business Fundamentals and a Certificate in Non-profit Management.

To qualify for the Certificate in Non-profit Management, students must complete 33 credits from a list of approved courses, with a cumulative grade point average in these 33 credits of at least 5.0 (C+).

Application to the Certificate in Non-profit Management may be made only after successfully completing at least 54 credits and the successful completion of the following course requirements with a minimum overall grade point average of 5.0 (C+).

For specific certificate requirements and the list of certificate courses, please consult the Faculty of Arts Programs of Study section of this calendar.

Listed below are required courses for the Certificate in Non-profit Management offered by the Schulich School of Business.

SB/NPMG 3100 3.00 Introduction to the Non-profit Organization. This course serves as a general introduction to the non-profit sector and to the external environment of organizations that operate in this sector. The course explores the historical roots and the social, political and economic function of the non-profit sector in Canada, as well as in other countries and traditions throughout the world. It examines the legal and policy environments in which non-profit organizations operate and issues with respect to governance and accountability.

SB/NPMG 3200 3.00 Accounting and Finance for Non-profit Organizations. Managers in non-profit organizations need to interpret and use financial information. This course will provide students with the fundamental conventions, standards and basic techniques used in collecting and using financial information in organizations. Degree credit exclusions: AS/ECON 3580 3.00 Financial Accounting and AS/ECON 3590 3.00 Managerial Accounting. Students who have successfully completed AS/ECON 3580 3.00 and AS/ECON 3590 3.00 may not enroll in SB/BFND 3200 3.00, and are therefore exempt from this requirement.

SB/NPMG 4100 3.00 Non-profit Marketing. This course examines the relationship between non-profit organizations and their external constituencies. The course includes an introduction to marketing theory and practice, and the application of these concepts in a non-profit setting. The scope of the course includes specialized topics in social marketing, volunteer marketing, fundraising and philanthropy and advocacy. Degree credit exclusion: SB/BFND 4100 3.00.

SB/NPMG 4200 3.00 Organizational Behaviour and the Non-profit Organization. This course is designed to develop students' organizational competence. It examines the relationships between organizational performance and the behaviour of individuals, groups and overall organizations. The course introduces human resources management, with a particular focus on the culture and structure of non-profit organizations. Emphasis is given to the importance of interpersonal issues and to issues arising from workforce diversity, ethical challenges, funding pressures and technological change.

"Philosophy is to be studied, not for the sake of any definite answers to its questions, since no definite answers can, as a rule, be known to be true, but rather for the sake of the questions themselves; because these questions enlarge our conception of what is possible, enrich our intellectual imagination and diminish the dogmatic assurance which closes the mind against speculation; but above all because, through the greatness of the universe which philosophy contemplates, the mind also is rendered great, and becomes capable of that union with the universe which constitutes its highest good." (Bertrand Russell)

For specific program requirements, please consult the Faculty of Arts Programs of Study section of this calendar.

Subject to program requirements and degree credit equivalent/exclusion and in-Faculty regulations, students may complete courses offered outside of the Faculty of Arts for credit in philosophy.

Faculty of Arts 1000-level philosophy courses provide a general introduction to philosophy, but are not required for philosophy majors or minors.

Physics and astronomy are quantitative sciences which employ the scientific method of observation, experiment and systemization of the results of experiment. Their objectives are to seek to understand the ways in which the most fundamental or elementary systems in nature really operate.

Courses in the Department of Physics and Astronomy cover basic elements of the major topics delineated during the last 200 years in these rapidly developing fields of knowledge. There are certain required courses (see the program of study requirements in the Faculty of Science and Engineering Programs of Study section of this calendar) which expose each student to the broad spectrum of physical phenomena and in an elementary way to the techniques of the theoretical physicist or astronomer in numerical analysis and modelling and of the experimental physicist or observational astronomer in measurement, observation and the apparatus of experiment. In developing programs of 3000- and 4000-level courses, students may concentrate their interests around experimental physics, theoretical physics, or astronomy and astrophysics. There are opportunities to develop Honours Double Major and Honours Major/Minor programs with other disciplines in the Faculty of Science and Engineering or in other Faculties.

The department offers Specialized Honours Applied Science Streams in Applied Physics and in Space and Communication Sciences, developed to meet the needs of rapidly expanding technologies in these fields. The requirements for these streams are found in the Faculty of Science and Engineering Programs of Study section of this calendar.

A brochure giving detailed course descriptions and typical program prescriptions for all programs involving physics and astronomy is available on request from the department office.

Courses in Physics and Astronomy

Admission to any course beyond the 1000 level requires consultation with a member of the departmental admissions committee. Normally, entry to courses at the 3000 and 4000 levels requires successful completion of all lower-level courses that are required for degree programs in Physics and Astronomy. The prerequisites and corequisites stated for certain courses indicate the standard of background preparation deemed necessary for those not taking bachelor or Honours Physics and Astronomy programs. The course director should be consulted by potential entrants who have not completed the normal entry requirements of the department.

Unless otherwise specified, courses whose numbers end in "6.00" (i.e. six-credit courses) have three lecture hours per week for two terms when taught in a fall/winter session; those whose numbers end in "3.00" (i.e. three-credit courses) have three lecture hours per week for one term. Courses offered in the evening and/or in a summer session may have different formats and scheduling, though they will be equivalent in credit value.

SC/PHYS 1010 6.00 Physics. Topics include linear, rotational and oscillatory motion; Newtonian mechanics; electrostatics; magnetostatics; electric current and induction; heat; geometrical and physical optics and sound. Differential and integral calculus and vector algebra are used. This course covers fewer topics than SC/PHYS 1410 6.00, but covers them in greater depth. It should be taken by all those likely to enrol in 2000-level physics courses. Three lecture hours per week in the first term, two lecture hours per week in the second term; three laboratory hours in alternate weeks in both terms; one tutorial hour each week in both terms. Prerequisite: OAC Physics or 12U Physics or SC/PHYS 1510 4.00. Corequisite(s): AS/SC/MATH 1013 3.00 and AS/SC/MATH 1014 3.00 and AS/SC/MATH 1025 3.00, or AS/SC/MATH 1505 6.00, or equivalents. Degree credit exclusion: SC/PHYS 1410 6.00.

SC/PHYS 1019 0.00 Tutorial for SC/PHYS1010 6.0. Students enrolled in SC/PHYS 1010 6.00 must also enrol in this mandatory tutorial.

SC/PHYS 1070 3.00 Astronomy. An introduction to astronomy for science majors. The course gives an overview of basic astronomical knowledge from the solar system to the edge of the Milky Way and basic astronomical concepts from white dwarfs to black holes. Prerequisite: OAC Physics or 12U Physics or SC/PHYS 1510 4.00. Prerequisite or corequisite: AS/SC/MATH 1013 3.00 or AS/SC/MATH 1505 6.00 or equivalent.

SC/PHYS 1410 6.00 Physical Science. Topics include kinematics, dynamics, momentum and energy for linear and rotational motion; elementary kinetic theory and thermodynamics; static and current electricity; waves and physical and geometrical optics, elements of modern physics. Recommended for students unlikely to enrol in 2000-level physics courses. Three lecture hours per week in the first term, two lecture hours per week in the second term; three laboratory hours in alternate weeks in both terms; one tutorial hour each week in both terms. Prerequisite: OAC Physics or 12U Physics or SC/PHYS 1510 4.00. This is a calculus-based course making use of elementary differential and integral calculus. While not mandatory, a first-year mathematics course involving calculus, such as AS/SC/MATH 1013 3.00/1014 3.00 or AS/SC/MATH 1505 6.00, is normally taken concurrently. Coregistration in AS/SC/MATH 1515 3.00 or AS/SC/MATH 1505 6.00 is strongly recommended for students lacking OAC calculus or 12U Advanced Functions & Intro Calc. Degree credit exclusion: SC/PHYS 1010 6.00.

SC/PHYS 1419 0.00 Tutorial for SC/PHYS1410 6.0. Students enrolled in SC/PHYS 1410 6.00 must also enrol in this mandatory tutorial.

SC/PHYS 1510 4.00 Introduction to Physics. An introductory course for students lacking adequate preparation for SC/PHYS 1010 6.00 or SC/PHYS 1410 6.00. Topics involve Newton's laws applied to linear and angular motion, force, inertia, torque, impulse, momentum, centre of mass, work, energy, oscillatory motion, geometric optics (including lenses and mirrors). No calculus is used, but vectors are used extensively. Three lecture hours per week, a laboratory session alternating weekly with a tutorial session. One term. Prerequisite: Ontario Grade 11 Functions and Relations (new curriculum) or Ontario Grade 12 Advanced Mathematics (old curriculum). Note: May not be taken by any student who has taken or is currently taking another University course in physics.

SC/PHYS 2010 3.00 Classical Mechanics. Newtonian mechanics of mass points and rigid bodies. Accelerated reference frames and rotational motion, centrifugal and Coriolis forces. Central force motion in celestial mechanics. Euler's equations: precession and nutation in the gyroscope. Prerequisites: SC/PHYS 1010 6.00, or a minimum grade of C in SC/PHYS 1410 6.00; AS/SC/MATH 1014 3.00 or equivalent; AS/SC/MATH 1025 3.00 or equivalent. Corequisite: AS/SC/MATH 2015 3.00.

SC/PHYS 2020 3.00 Electricity and Magnetism. The elements of electric and magnetic fields are developed together with DC and AC circuit theory and an introduction to electromagnetic waves. Prerequisites: SC/PHYS 1010 6.00, or a minimum grade of C in SC/PHYS 1410 6.00; AS/SC/MATH 1025 3.00 or equivalent. Corequisite: AS/SC/MATH 2015 3.00.

SC/PHYS 2030 3.00 Computational Methods for Physicists and Engineers. The symbolic and numeric computing environments provided by Maple and Matlab are used to solve problems in mechanics and

electromagnetism. Prerequisites: SC/PHYS 1010 6.00 or SC/PHYS 1410 6.00; AK/AS/SC/COSC 1020 3.00 or AK/AS/SC/COSC 1540 3.00; AS/SC/MATH 2015 3.00. Corequisite: AK/AS/SC/MATH 2270 3.00.

SC/PHYS 2040 3.00 Special Relativity and Modern Physics. This course introduces the two pillars of modern physics - the special theory of relativity and quantum mechanics. The relativistic concepts of space, time and energy are derived from first principles. The quantum nature of radiation and matter is introduced. Prerequisites: SC/PHYS 1010 6.00, or a minimum grade of C in SC/PHYS 1410 6.00; AS/SC/MATH 1025 3.00 or equivalent. Prerequisites or corequisites: It is strongly recommended that SC/PHYS 2010 3.00 and SC/PHYS 2020 3.00 be taken in the same year as this course.

SC/PHYS 2060 3.00 Optics and Spectra. An introductory course in optics covering the following topics: wave nature of light, reflection, refraction, spherical mirrors and lenses, interference, diffraction, polarization, introduction to lasers. Prerequisites: SC/PHYS 1010 6.00, or a minimum grade of C in SC/PHYS 1410 6.00; AS/SC/MATH 1014 3.00 or equivalent; AS/SC/MATH 1025 3.00 or equivalent.

SC/PHYS 2070 3.00 Galaxies and the Universe. An introduction to the structure, evolution and origin of galaxies, aggregates of galaxies and the universe as a whole. Frontier topics such as quasars, the great attractor, the cosmic web, gravitational lensing, primeval galaxies and black holes are included. Prerequisite: SC/PHYS 1070 3.00, or SC/NATS 1740 6.00 and permission of the instructor.

SC/PHYS 2211 1.00 Experimental Electromagnetism. An introductory laboratory course for second-year students. The course consists of 10 experiments covering basic concepts of electromagnetism. Normally three laboratory hours per week. One term. One credit. Prerequisite: SC/PHYS 1010 6.00 or a minimum grade of C in SC/PHYS 1410 6.00. Corequisite(s): SC/PHYS 2020 3.00.

SC/PHYS 2212 1.00 Experimental Physics. An introductory laboratory course based on lasers and modern optics. Includes different experiments than those completed in SC/PHYS 2211 1.00. Normally three laboratory hours per week. One term. One credit. Prerequisite: SC/PHYS 1010 6.00 or SC/PHYS 1410 6.00, SC/PHYS 2211 1.00. Corequisite: SC/PHYS 2060 3.00 recommended.

SC/PHYS 2213 3.00 Experimental Physics with Data Analysis. Experiments in Electricity and Magnetism and in Modern Optics. Basic methods for analyzing experimental data and understanding statistical and systematic errors. Three laboratory hours per week, one lecture hour every two weeks. Two terms. Three credits. Prerequisites: SC/PHYS 1010 6.00, or a minimum grade of C in SC/PHYS 1410 6.00. Corequisites: SC/PHYS 2020 3.00, SC/PHYS 2060 3.00 recommended.

SC/PHYS 3001 1.00 Organization and Management Seminar in Space and Communication Sciences. A seminar course taught by guest speakers from industry, government and the University. Content changes from year to year, but includes such topics as professional ethics, communications regulations, space law, space science policy, project management, privacy and security issues in computing. One lecture hour in alternate weeks. Two terms. Prerequisite: Eligibility to proceed in the Specialized Honours stream in Space and Communication Sciences beyond the 2000-level requirements, or permission of the course director. Degree credit exclusion: SC/COSC 3001 1.00, AS/SC/CSE 3002 1.00, AS/SC/COSC 3002 1.00, SC/EATS 3001 1.00, SC/PHYS 3001 1.00.

Cross-listed to: SC/CSE 3001 1.00, SC/EATS 3001 1.00, SC/PHYS 3001 1.00

SC/PHYS 3010 3.00 Classical Mechanics. Intermediate classical mechanics, including dynamics of particles and systems of particles. Lagrange's equations and Hamilton's equations. Prerequisites: SC/PHYS 2010 3.00; AS/SC/MATH 2015 3.00; AK/AS/SC/MATH 2270 3.00.

SC/PHYS 3020 3.00 Electromagnetics I. "Vector calculus; electrostatic and magnetostatic fields, derived from charge and current distributions studied in vacuum and in material media. Prerequisites: SC/PHYS 2020 3.00; AS/SC/MATH 2015 3.00; AK/AS/SC/MATH 2270 3.00. Prerequisite or corequisite: AS/SC/MATH 3271 3.00.

SC/PHYS 3030 3.00 Statistical and Thermal Physics. Statistical mechanics of systems of large numbers of elements. Probability, ensembles, fluctuations. Applications: spin magnetism, electrons in metals, radiation, specific heats of solids. Transport theory. Prerequisites: SC/PHYS 2010 3.00; SC/PHYS 2020 3.00.

SC/PHYS 3040 6.00 Modern Physics. Survey of the basis of contemporary physics: introduction to quantum theory of light, atoms, molecules, solids, nuclei, elementary wave mechanics and elementary particles. Prerequisites: SC/PHYS 2010 3.00; SC/PHYS 2020 3.00; SC/PHYS 2040 3.00; SC/PHYS 2211 1.00; AK/AS/SC/MATH 2270 3.00.

SC/PHYS 3050 3.00 Electronics I. Introduction to physical electronics including DC and AC circuit theory and network analysis; bandpass filter; introduction to the p-n junction and semiconductor devices: diodes, DC power supplies, transistors, analysis and design of basic amplifiers, operational amplifiers. With laboratory exercises. Two lecture hours, three laboratory hours. One term. Prerequisites: SC/PHYS 1010 6.00; SC/PHYS 2020 3.00 and SC/PHYS 2211 1.00 recommended.

SC/PHYS 3070 3.00 Planets and Planetary Systems. Survey of planetary astrophysics. Specific emphases vary, but an overview of planetary observations and current knowledge concerning the atmospheres and interiors of planets and the formation and evolution of planets and planetary systems is presented. Normally offered in alternate years. Prerequisite: At least one of SC/PHYS 1070 3.00, SC/EATS 1010 6.00 (or both SC/EATS 1010 3.00 and SC/EATS 1011 3.00), SC/EATS 2030 3.00; or permission of the instructor. Prerequisite(s) or corequisite: AS/SC/MATH 2015 3.00; AK/AS/SC/MATH 2270 3.00; or permission of the instructor.

SC/PHYS 3080 3.00 Atmospheric Radiation and Thermodynamics. Applications of basic thermodynamic principles to dry and moist atmospheric situations. Solar (short wave) and terrestrial (long wave) radiation with respect to absorption and scattering processes involving atmospheric atoms, molecules, aerosol particles and clouds. Three lecture hours. One term. Three credits. Prerequisites: AS/SC/MATH 2015 3.00; AK/AS/SC/MATH 2270 3.00; SC/PHYS 1010 6.00, or a minimum grade of C in SC/PHYS 1410 6.00.

Cross-listed to: SC/EATS 3030 3.00, SC/PHYS 3080 3.00

SC/PHYS 3150 3.00 Electronics II. The concept of feedback and its use in circuits employing operational amplifiers; analysis/design of such circuits, including amplifiers, filters, oscillators, pulse generators; digital concepts and logic circuits with applications to data manipulation (computers) and storage. Laboratory exercises and project. Two lecture hours, three laboratory hours. One term. Prerequisite: SC/PHYS 1010 6.00; and SC/PHYS 3050 3.00 recommended.

SC/PHYS 3210 6.00 Experimental Physics. Experiments are performed in fluid mechanics, electromagnetism, optics, atomic and nuclear physics. Error analysis of the data and detailed write-ups of at least nine experiments are required. Students are required to present a seminar on a research topic to the class. One lecture/seminar hour per week, open laboratory hours. Two terms. Prerequisites: SC/PHYS 2020 3.00; SC/PHYS 2040 3.00; SC/PHYS 2211 1.00; SC/PHYS 2212 1.00. Corequisite: SC/PHYS 3040 6.00. Degree credit exclusion: SC/PHYS 3220 3.00.

SC/PHYS 3220 3.00 Experimental Physics. A three-credit version of SC/PHYS 3210 6.00 comprising a selection of the experiments in the latter course. These are chosen in consultation with the course director to reflect the student's particular program and background. One lecture/seminar hour per week, open laboratory hours. One term or equivalent. Prerequisites: SC/PHYS 2020 3.00; SC/PHYS 2040 3.00; SC/PHYS 2211 1.00; SC/PHYS 2212 1.00 is recommended. Corequisite: SC/PHYS 3040 6.00. Degree credit exclusion: SC/PHYS 3210 6.00.

SC/PHYS 3250 3.00 Introduction to Space Communications. The course covers all aspects of communications between spacecraft and ground stations. Topics include orbits, perturbations and launching methods, the essential characteristics and components of satellites, interplanetary spacecraft and ground stations, transmission, reception and link equations and access to a satellite. Prerequisite: SC/PHYS 2020 3.00. Prerequisite or corequisite: SC/PHYS 3050 3.00.

SC/PHYS 3280 3.00 Physics of the Space Environment. An introduction to the physical processes of the upper atmosphere, the ionosphere, the magnetosphere and the heliosphere and the interactions that occur with space vehicles that traverse these regions of space. Prerequisites: SC/PHYS 2020 3.00; SC/PHYS 2040 3.00.

Cross-listed to: SC/EATS 3280 3.00, SC/PHYS 3280 3.00

SC/PHYS 3310 3.00 Space Mission Design. This course covers the basic aspects of space mission design including: mission types, objectives, technical readiness, risk mitigation, subsystems and public outreach. Three lecture hours. Prerequisites: SC/ENG 2000 6.00 or permission of the instructor.

Cross-listed to: SC/ENG 3310 3.00, SC/PHYS 3310 3.00

SC/PHYS 3320 3.00 Microsystems Technology. The course covers the principles and implementations of miniaturised sensors and actuators in a range of physical domains, such as optical, magnetic, thermal and mechanical systems. Examples include electronic cameras, micro-electro-mechanical systems, thermal microsystems and display technologies. Three lecture hours. Prerequisite: SC/PHYS 2020 3.00; SC/PHYS 2211 1.00; SC/PHYS 2060 3.00 recommended; SC/PHYS 2212 1.00 recommended. Corequisite: SC/PHYS 3050 3.00 recommended.

Cross-listed to: SC/ENG 3320 3.00, SC/PHYS 3320 3.00

SC/PHYS 3330 3.00 Space Engineering Materials. This course covers the basic behaviour and processing of engineering materials. The emphasis is on metals and alloys plus discussion of ceramics, plastics and composites. Three lecture hours. Prerequisite: SC/ENG 2000 6.00 or permission of the instructor.

Cross-listed to: SC/ENG 3330 3.00, SC/PHYS 3330 3.00

SC/PHYS 4001 6.00 Space and Communication Sciences Workshop. This course is intended to allow the student to carry out the development of a specific space project, under the supervision of a faculty member, a government scientist or an industrial associate. The equivalent of nine laboratory hours per week for two terms. Prerequisite: Satisfactory completion of the 3000-level courses in the space and communication sciences core. Degree credit exclusions: SC/COSC 4001 6.00, AK/AS/SC/COSC 4080 3.00 or AK/AS/SC/CSE 4080 3.00.

Cross-listed to: SC/CSE 4001 6.00, SC/EATS 4001 6.00, SC/PHYS 4001 6.00

SC/PHYS 4010 3.00 Quantum Mechanics. (formerly half of SC/PHYS 4010 6.00 - before 2000-2001) Physical concepts and mathematical foundations of quantum mechanics. Emphasis on approximation methods, treatment of angular momentum, spin and their couplings. Introduction to relativistic quantum mechanics and scattering theory. Prerequisite: SC/PHYS 3040 6.00. Prerequisite(s) or corequisite(s): SC/PHYS 3020 3.00; AS/SC/MATH 3271 3.00.

SC/PHYS 4011 3.00 Atomic and Molecular Physics. (formerly half of SC/PHYS 4010 6.00 - before 2000-2001) Application of quantum mechanics to atomic and molecular structure. One-electron systems, many electron atoms, Hartree-Fock approximation, fine structure, hyperfine structure, atom-laser interactions. Prerequisite: SC/PHYS 4010 3.00.

SC/PHYS 4020 3.00 Electromagnetism II. "Time-dependent electric and magnetic fields, Maxwell's differential equations in linear, isotropic, homogeneous conductors and dielectrics; the radiation and transmission of electromagnetic energy; relativistic transformation; scalar diffraction theory. Prerequisites: SC/PHYS 3020 3.00; AS/SC/MATH 3271 3.00.

SC/PHYS 4040 3.00 Nuclear and Fundamental Particle Physics. The properties of the fundamental particles (quarks and leptons), and the forces between them are studied. Topics include the interactions of particles with matter, symmetry principles and experimental techniques. Properties of nuclear matter (e.g. radioactive decays, fission, fusion) are also investigated. Prerequisites: SC/PHYS 3010 3.00, SC/PHYS 3020 3.00, SC/PHYS 4010 3.00.

SC/PHYS 4050 3.00 Solid State Physics. The structural, mechanical, thermal, electrical and magnetic properties of crystalline solids are studied. Prerequisites: SC/PHYS 3030 3.00; SC/PHYS 4010 3.00.

SC/PHYS 4060 3.00 Time Series and Spectral Analysis. Treatment of discrete sampled data by linear optimum Wiener filtering, minimum error energy deconvolution, autocorrelation and spectral density estimation, discrete Fourier transforms and frequency domain filtering and the Fast Fourier Transform algorithm. Three lecture hours. One term. Three credits. Prerequisites: AK/AS/SC/COSC 1540 3.00 or equivalent FORTRAN programming experience; AS/SC/MATH 2015 3.00; AK/AS/SC/MATH 2270 3.00. Degree credit exclusions: AK/AS/SC/COSC 4242 3.00, AK/AS/SC/COSC 4451 3.00, AS/SC/MATH 4130B 3.00, AS/SC/MATH 4930C 3.00.

Cross-listed to: AS/MATH 4830 3.00, SC/EATS 4020 3.00, SC/MATH 4830 3.00, SC/PHYS 4060 3.00

SC/PHYS 4070 3.00 Stars and Nebulae. The astrophysics of radiating matter in the universe. The course covers radiation processes, radiative transfer, interstellar matter, stellar atmospheres and stellar interiors. Prerequisites: SC/PHYS 1070 3.00; SC/PHYS 3030 3.00; SC/PHYS 3040 6.00; AS/SC/MATH 3271 3.00.

SC/PHYS 4110 3.00 Dynamics of Space Vehicles. The dynamics of spacecraft in the near Earth and deep space environments, including the classical theory of orbits, the effects of perturbations on satellite orbits, rocket propulsion, orbital manoeuvres and satellite attitude control. Prerequisites: SC/PHYS 2010 3.00 or SC/EATS 2470 3.00; AS/SC/MATH 2015 3.00; AK/AS/SC/MATH 2270 3.00; AS/SC/MATH 3271 3.00 is strongly recommended.

SC/PHYS 4120 3.00 Gas and Fluid Dynamics. Fundamental laws; conservation of mass, momentum and energy; vortex motion; incompressible, compressible and viscous flows; turbulent flow; surface waves. Prerequisites: SC/PHYS 2010 3.00 or SC/EATS 2470 3.00; AS/SC/MATH 2015 3.00; AS/SC/AK/MATH 2270 3.00.

Cross-listed to: AS/MATH 4470 3.00, SC/MATH 4470 3.00, SC/PHYS 4120 3.00

SC/PHYS 4210 3.00 Experimental Physics. Advanced experiments in physics related to topics in solid state physics, optical and microwave spectroscopy, and nuclear physics. Six open laboratory hours. One term. Prerequisites: SC/PHYS 3210 6.00; registration in an Honours Program in Physics and Astronomy. Note: Students whose programs require six credits of 4000-level experimental physics take both SC/PHYS 4210 3.00 and SC/PHYS 4211 3.00, including different experiments as determined by the course coordinator.

SC/PHYS 4211 3.00 Experimental Physics. Advanced experiments in physics related to topics in solid state physics, optical and microwave spectroscopy, and nuclear physics. Six open laboratory hours. One term. Prerequisites: SC/PHYS 3210 6.00; registration in an Honours Program in Physics and Astronomy. Note: Students whose programs require six credits of 4000-level experimental physics take both SC/PHYS 4210 3.00 and SC/PHYS 4211 3.00, including different experiments as determined by the course coordinator.

SC/PHYS 4250 3.00 Signal and Communications Theory. Signal representation using orthogonal functions; Fourier series and transforms as applied to signals; ideal and physically realizable filters; the sampling theorem; definitions and characterizations of energy, power and their spectral densities; the modulation theorem; various kinds of modulation and bandwidth requirements. Prerequisites: SC/PHYS 3250 3.00; AS/SC/MATH 2015 3.00; AK/AS/SC/MATH 2270 3.00. Degree credit exclusion: AS/SC/MATH 4130B 3.00.

SC/PHYS 4270 4.00 Astronomical Techniques. An introduction to modern astronomical instrumentation, observational methods, data analysis and numerical methods. In addition to weekly lectures, the course provides students with hands-on experience with both observational and theoretical techniques of modern astronomy. Normally offered in alternate years. One and one half lecture hours per week, several laboratory

exercises. Two terms. Prerequisites: SC/PHYS 1070 3.00; AS/SC/MATH 2015 3.00; AK/AS/SC/MATH 2270 3.00.

SC/PHYS 4310 3.00 Physics or Astronomy Project. A supervised research endeavour, either theoretical or experimental, in physics or astronomy. The project follows consultation with a faculty member who agrees to supervise. Note: Open to students in the final year of the Physics, Applied Physics, or Astronomy stream of an Honours Physics and Astronomy Program.

SC/PHYS 4330 3.00 Radio Techniques for Space Exploration. The theory and application of modern radio astronomy and radar techniques as they are currently used in deep space exploration and space exploration and space navigation. Three lecture hours per week. One term. Three credits. Prerequisites: SC/PHYS 3250 3.00.

Cross-listed to: SC/ENG 4330 3.00, SC/PHYS 4330 3.00

SC/PHYS 4350 2.00 Space Hardware Laboratory. A laboratory course with modules supporting various fourth-year space engineering courses. Three laboratory hours per week. Two terms. Two credits. Corequisites: SC/COSC 4421 3.00; SC/PHYS 4360 3.00 or SC/ENG 4360 3.00; and three of SC/EATS 4220 3.00, SC/EATS 4230 3.00, SC/ENG 4110 3.00 or SC/EATS 4610 3.0, SC/PHYS 3070 3.00, SC/ENG 4330 3.0 or SC/PHYS 4330 3.00.

Cross-listed to: SC/ENG 4350 2.00, SC/PHYS 4350 2.00

SC/PHYS 4360 3.00 Payload Design. A survey of typical applications of spacecraft technology including communications systems, location systems, terrestrial applications and exploration missions. Prerequisites: SC/PHYS 3050 3.00; SC/PHYS 3280 3.00 or SC/ENG 3310 3.00 or SC/PHYS 3310 3.0.

Cross-listed to: SC/ENG 4360 3.00, SC/PHYS 4360 3.00

SC/PHYS 4410 3.00 Space Geodynamics. The dynamical behaviour of the Earth from space measurements. Included are the external gravity field of the Earth, orbital dynamics of artificial satellites, satellite geoid, internal figure of the Earth, rotation of the Earth and its measurement by space techniques. Normally offered in alternate years. Three lecture hours. One term. Three credits. Prerequisites or corequisites: SC/EATS 3020 3.00, AS/SC/MATH 3241 3.00 or AK/AS/SC/COSC 3121 3.00; AS/SC/MATH 3271 3.00.

Cross-listed to: SC/EATS 4250 3.00, SC/PHYS 4410 3.00

SC/PHYS 4550 3.00 Introduction to Control Systems. An introduction to the analysis and design of automatic control systems for linear time-invariant systems. Prerequisites: AS/SC/MATH 2015 3.00; AK/AS/SC/MATH 2270 3.00; AK/AS/SC/MATH 3410 3.00 strongly recommended.

The political science curriculum offers students a program of study that highlights the department's particular strengths. The program is designed to develop a student's ability in three areas: 1) Political analysis: Students will learn to think critically about political life, especially in relation to the use and abuse of power, rights and responsibilities, different forms of diversity, and communities and nations in a global context. 2) Critical skills: The program emphasizes the development critical skills that will be an asset for future employment, including effective written and oral communication skills, analytical and numerical skills, and collaborative skills. 3) Democratic awareness: Students will learn how power and authority are exercised, and the possibilities of acting politically to bring about change.

The department offers a broad range of courses that focus on different themes. Students who major or minor in political science may choose to focus on one theme, or may take courses from several of the following themes:

- Canadian Democracy in the North American Context;
- Development, Inequality and the Global South;
- Gender, Diversity and Inclusion;
- Global Politics;
- Law, Social Justice and Ethics;
- Political Economy and Political Power;
- Political Organizing and Communication;
- Political Thought;
- Public Policy and Administration;
- Violence and Security.

In their final year of study, all political science majors and minors will take a capstone course that allows for reflection on their program of study and application of this knowledge to career and life goals. For further information regarding the capstone courses, please consult the departmental supplemental calendar or Web site.

A number of 1000- and 2000-level courses are also available to those students who wish to deepen their knowledge of political issues. As well, many of the upper-level courses are also open to non-majors who wish to further explore various political issues. For more detailed information, please consult the departmental supplemental calendar or Web site.

The Political Science Program equips students with a broad set of analytical skills, critical skills and democratic awareness that gives our graduates the opportunity to pursue employment in a range of areas, including: the public service, international agencies, advocacy organizations, the media, and political organizations. Graduates of the program will be especially qualified to pursue graduate work in political science, or further studies in law, education or journalism.

For specific program requirements, please consult the Faculty of Arts Programs of Study section of this calendar.

The department also offers Specialized Honours BA degree programs in Public Policy and Administration and Global Political Studies. For details, please consult the Faculty of Arts Programs of Study section of this calendar.

Subject to program requirements and degree credit equivalent/exclusion and in-Faculty regulations, students may complete courses offered outside of the Faculty of Arts for credit in political science.

The joint Honours BA Program in Professional Writing is housed in the Department of English in the Faculty of Arts, and offered in collaboration with Seneca College (at its Seneca@York campus). The program curriculum consists of courses offered by the Department of English, the Division of Humanities and the Centre for Academic Writing in the Faculty of Arts, and by Seneca College through its School of General Education and English, its School for Communication Arts and its Centre for Professional Communication. Graduates of the program will receive an Honours BA degree in professional writing from York University.

Combining historical and theoretical analysis of written expression with the development of practical expertise in creating, managing, coordinating and presenting written information in a constructive and dynamic fashion, the Professional Writing Program includes courses in the history and process

of the book, in magazine writing, and in communications within institutions alongside courses in editing, copyediting, document design and multimedia technologies. As well, students in the Professional Writing Program will have the opportunity to select a second field of study to complement the background and skills developed in the writing program. Graduates of the program will possess the knowledge and abilities to pursue many future possibilities in the writing field including positions in publishing, the media, business, journalism, government, community service and the arts.

For specific program requirements and the list of program courses, please consult the Faculty of Arts Programs of Study section of this calendar.

Subject to program requirements and degree credit equivalent/exclusion and in-Faculty regulations, students may complete courses offered outside of the Faculty of Arts for credit in professional writing.

Note: For purposes of meeting program requirements, all foundations courses will count as six credits towards the major.

Courses in Professional Writing

AS/PRWR 3600 3.00 Advanced Research Methods. A problem-based course designed to refine students' skills in searching, sifting, organizing, evaluating and reporting/presenting information. Students are asked to acquaint themselves with and become expert in managing both online and print sources.

AS/PRWR 3710 3.00 Research Methods for Reporting. The course provides an introduction to the primary modes of research involved in reporting. Particular attention is paid to digesting print and net-based texts and to the techniques of the interview.

AS/PRWR 3720 3.00 Fundamentals of Editing. The course addresses the problems of sorting and arranging information and of writing it up in a manner that is clear and comprehensible in limited spaces. Students edit their own work and the work of others, learning both to administer and accept criticism.

AS/PRWR 3810 3.00 Digesting Technical Information. The course addresses the task of translating the languages of specialists for the use and comprehension of non-specialists. Students confront the problem of jargons and develop strategies to understand them themselves and then to translate them for others.

AS/PRWR 3820 3.00 Workshop in Presentation Strategies. A workshop course following from AS/PRWR 3810 3.00. Students are assigned lumps of information and develop these for presentation to different audiences. Consideration is given also judging the appropriate technological aids and developing the skills to employ them effectively.

AS/PRWR 3910 3.00 The Mechanics of Style. Introduces students to print protocols, explores fundamental problems in book and other print formats and considers the adaptations of these protocols to and in the age of the computer. Also at issue are the basic problems of book design.

AS/PRWR 4700 3.00 Advanced Workshop 1: Periodical Genres. A project-based workshop course devoted to refining skills already developed. Students adapt a series of stories to different audiences. Particular attention is paid to issues of length and appropriate language. Peer editing skills are also featured.

AS/PRWR 4701 3.00 Advanced Workshop 2: The Feature. A project-based workshop course in which students develop, pitch, research, write, have edited and rewrite an extended article. Each step of the process is examined in detail. Students examine also representative works in the genre.

AS/PRWR 4800 3.00 Advanced Workshop 1: Visual Information and Document Design. The course considers various strategies for the visual representation of information. What sorts of figures and illustrations aid communication and what sorts obscure? What visual relations ought there to be between illustration and text? What effects do these relations have on the document as a whole?

AS/PRWR 4801 3.00 Advanced Workshop 2: Multimedia Authoring and Practices. The course addresses the challenges and opportunities offered by the hardware and software involved in net-based communications. It considers the advantages and drawbacks of recent applications and develops strategies to avoid becoming the servant of the technology.

AS/PRWR 4901 3.00 Copy Editing. A hands-on course that develops verbal editing skills at the level of the sentence and design skills at the level of the page or spread. Students diversify and practice their fluency with mark-up conventions. Conflicts between general mandates and local circumstances are investigated for both the verbal and the visual.

AS/PRWR 4902 3.00 Figures and Illustrations. The course considers the function of graphic information in the printed book. It considers how graphs and charts to be selected and treated. It considers the role, selection and placement of photographs, drawings and maps. Illustrated texts both for children and adults are also considered.

The Department of Psychology offers a curriculum which begins with a broad introductory survey of the various areas of enquiry within the discipline of psychology and the various applications of psychological knowledge.

The intermediate level of the curriculum then provides choice from a wide range of courses which pursue selected areas of psychology in greater depth. Insofar as possible, courses are offered in multiple sections with alternative formats so that students may select the format which most nearly meets their needs.

At the advanced level, courses are typically offered in relatively small seminars. Students are encouraged to select a wide range of courses and a high degree of flexibility is possible within the programs offered. It is the intention of the Department of Psychology to serve the needs of students whose interests in the discipline range from curiosity to commitment.

For specific Honours BA and BA program requirements please consult the Faculty of Arts Programs of Study section of this calendar. For specific Honours BSc and BSc program requirements please consult the Faculty of Science and Engineering Programs of Study section of this calendar.

Admission to all 2000-, 3000- and 4000-level courses in psychology (with the exception of AK/AS/SC/PSYC 2020 6.00, AK/AS/SC/PSYC 2021 3.00 and AK/AS/SC/PSYC 2022 3.00) is conditional upon satisfactory completion of Introduction to Psychology, AK/AS/SC/PSYC 1010 6.00. Further, students must obtain a minimum grade of C (4.0) in AK/AS/SC/PSYC 1010 6.00 to be permitted to continue as a major or minor in psychology as well as to take psychology courses for which AK/AS/SC/PSYC 1010 6.00 is a prerequisite. Under exceptional circumstances, non-majors and non-minors who have not obtained a minimum of C (4.0) in AK/AS/SC/PSYC 1010 6.00 may apply for special consideration to enrol in an upper-level psychology course for which AK/AS/SC/PSYC 1010 6.00 is a prerequisite. This application should be made to the psychology undergraduate program director of the Faculty offering the course.

Courses in psychology normally meet for at least three hours a week, for one term (three credits – course numbers end in “3.00”) or for two terms (six credits – course numbers end in “6.00”). Most of the courses listed below are offered in more than one section. Students cannot obtain credit for two sections of the same course, except for independent study courses.

Some 3000- and 4000-level courses may require AK/AS/SC/PSYC 2020 6.00 (or equivalent) as a prerequisite. Students should note that the material taught in this course may be important for them in their chosen career or in graduate work. Students might also consider taking AK/AS/SC/PSYC 3010 3.00 as preparation for work in the final academic session.

Students in all psychology courses are encouraged to learn about psychological research by participating as subjects in research projects conducted under the supervision of the Department of Psychology.

Not all of the courses listed below will necessarily be offered in any given year or term. For details of courses to be offered, please consult the psychology supplemental calendar.

Subject to program requirements and degree credit equivalent/exclusion and in-Faculty regulations, students may complete courses offered outside of the Faculty of Arts for credit in psychology.

The Specialized Honours BA Program in Public Policy and Administration provides students with a broad and liberal education while focusing on the skills required for public sector employment. In addition, many graduates of the program have gone on to graduate school or law school, or have found private sector employment in areas dealing with government. The program consists of courses such as public law, economics, public administration and quantitative methods in policy analysis (statistics and research design). As the Public Policy and Administration Program has

many specific course requirements, students are strongly advised to plan their course of study in advance.

Religious studies invites students to join in current scholarly efforts to describe and to understand forms of religious experience. One of the master keys to the understanding of human behaviour and thought, religious experience is open to examination from a variety of disciplinary perspectives.

In the core course, students will be introduced to various disciplinary perspectives. Afterwards they may choose to specialize in one tradition – e.g. Judaism, Christianity, Islam, or Eastern religions – or they may continue to take a comparative approach. Students will, however, be expected to acquire breadth both in disciplinary approach and in subject matter.

The Science and Society Program provides students with the opportunity to study the place of modern science and technology in human culture and society from an integrated, critical and interdisciplinary perspective. The program includes courses dealing with the history, philosophy and sociology of the mathematical, physical, biological and social sciences, as well as the social, cultural and intellectual contexts which both shaped and were shaped by thinking in those fields. Themes and areas of concentration include: 1) science, technology and social change; 2) history and philosophy of science, technology and the social sciences; 3) science, technology and humanistic thought; and 4) science, technology and the arts.

The Science and Society Program equips students with a broad interdisciplinary education which prepares them for all types of careers. Graduating students will have the same postgraduate opportunities as those possessing an Honours BA in arts fields – i.e. an opportunity to enter professional schools or graduate programs. Students who graduate from the Science and Society Program will be especially qualified to pursue graduate work in graduate programs in history and philosophy of science, as well as their congruent disciplines. Graduates of this program are well equipped for further studies in law, medicine, education, journalism and environmental policy.

For specific program requirements and the list of program courses, please consult the Faculty of Arts Programs of Study section of this calendar.

Sexuality Studies is a field that examines sexual identities and subjectivities, communities and cultures, movements and organizing, sexual desires and pleasures, acts and behaviours. The field explores artistic, cultural, economic, geographic, historical, literary, political, sociological and psychological dimensions of sexuality, while also investigating sexual dimensions of arts, economies, geographies, histories, literatures, politics, psychologies and societies. A central mission of Sexuality Studies at York is to examine existent and emergent intersections of ability, age, class, gender, gender identity, ethnicity, health, nationality, race, religion, sex, and sexuality. The field is concerned in part with the dynamics of sexual hierarchy, resistance, and diversity in a variety of Canadian contexts (past and present). It simultaneously works to understand the operations of sexual dynamics in African, Asian and Pacific, Caribbean, North and South American, European and Oceanic contexts (past and present). And it also focuses on sexual migrations and diasporas in transcontinental contexts. Committed to examining lesbian, gay, bisexual, transgendered, transsexual, intersexed, heterosexual and heteronormative identities and cultures, the field also studies alternative ways of organizing sexualities and, indeed, alternatives to sexuality, in the past, present, and future.

Students may pursue an Honours Minor BA or Cross-Disciplinary Certificate in Sexuality Studies in the faculties of Arts, Atkinson or Glendon. For specific program and certificate requirements, as well as the

list of program courses, please consult the relevant Programs of Study section of this calendar.

The Interdisciplinary Program in Social and Political Thought is concerned with the interdisciplinary study of human community — its nature, history and foreseeable futures. Students can double major or minor in social and political thought and an Honours BA program in the Faculty of Arts. The program is intended for those students whose breadth of focus is such that they would like to view the social and political situation of contemporary societies, both substantively and theoretically, from a plurality of humanistic and social scientific perspectives.

For specific program requirements and the list of program courses, please consult the Faculty of Arts Programs of Study section of this calendar.

GL/SOSC 3672 3.00 Human Capital and Economic Growth. The sharp disparity between growth rates across OECD countries is one of the most striking economic phenomena. While human capital has been traditionally understood as being one important growth factor, economists are increasingly looking at the linkages between human capital and social capital to explain growth. Without sufficient social capital, human and physical capital are less effective. Recently, international organizations (OECD, the World Bank) provided a forum in which these questions have been analyzed and debated. Prerequisites: GL/ECON 2500 3.00 and GL/ECON 2510 3.00.

As one of the liberal arts and social sciences, the discipline of sociology contributes to self-comprehension and the understanding of society by developing a body of knowledge concerning its structure, dynamics and symbolic orders. An undergraduate specialization in sociology provides a basis for graduate study and professional careers in fields such as university research and teaching in sociology, law, secondary school teaching, social research, administration and various social services. Though the members of the Department of Sociology teach a wide range of materials and perspectives on society in general and on Canadian society in particular, we take social criticism through theory development, research and teaching to be an essential element of our work.

For specific program requirements, please consult the Faculty of Arts Programs of Study section of this calendar.

Not all of the courses listed below will necessarily be offered in any given year. For details of courses to be offered, please consult the sociology supplemental calendar.

Subject to program requirements and degree credit equivalent/exclusion and in-Faculty regulations, students may complete courses offered outside of the Faculty of Arts for credit in sociology.

General Notes:

1. Certain courses listed in this calendar may not be offered in any given year. A mini-calendar will be available in the department office (Room C221) in May.

2. The department reserves the right to limit the number of individual reading and/or research courses that a student can take in both the Honours and the bachelor of arts programs. Departmental regulations concerning the individual reading course and the honours thesis are outlined in the mini-calendar.

Remarques générales :

1. Certains des cours suivants pourraient être annulés d'une année à l'autre. Un mini-annuaire sera disponible dans le bureau du département (C221) en mai.

2. Le département se réserve le droit de limiter le nombre de cours de travail individuel et/ou de recherche auxquels un étudiant peut s'inscrire, soit dans le programme spécialisé, soit dans le programme non-spécialisé. Les règlements gouvernant les cours de travail individuel et la thèse de spécialisation sont décrits dans le mini-annuaire.

Note/N.B. : All courses which have 2 as the first digit of their course number are open to first-year students./Les cours dont le numéro commence par le chiffre 2 sont ouverts aux étudiants de première année.

Courses in Sociology/Cours de sociologie

AK/SOCI 1010 6.00 Sociological Perspectives. An introduction to basic sociological concepts and theoretical frameworks used to understand the social structures and cultures that transcend and shape personal experience. Focusing on Canadian society in historical and comparative context, topics include power, differentiation, social control and socialization. (Formerly AK/SOCI 2410 6.0)

AS/SOCI 1010 6.00 Sociological Perspectives. An introduction to basic sociological concepts and theoretical frameworks used to understand the social structures and cultures that transcend and shape personal experience. Focusing on Canadian society in historical and comparative context, topics include power, differentiation, social control and socialization. Note: Sociology majors must take this course within their first 48 credits.

AS/SOCI 2030 6.00 Sociological Methods. This foundation course, presented in two related parts, deals with questions of how sociological knowledge is attainable both in principle and in practice, and provides the student with a general introduction to both qualitative and quantitative methods in social research. Degree credit exclusion: AK/SOCI 3310 6.00.

AS/SOCI 2040 6.00 Sociological Theory. This foundation course deals with the construction, forms and uses of sociological theory, a brief history of theory and the classical texts of some of the great social theorists, and modern developments and current trends in sociological theory.

AS/SOCI 2050 6.00 Social Structure and Social Change. This foundation course deals with comparative and historical aspects of social life, political organization and the state, and modern industrial society. Special attention is given to the analysis of class, inequality and social change.

AS/SOCI 2060 6.00 Social Interaction and Community. This foundation course deals with processes of social interaction, socialization and self, and the relationship of the individual to society as exemplified in several substantive areas. Emphasis is given to understanding personal action and free will in a social context.

AS/SOCI 2070 6.00 Social Order and Social Organization. This foundation course deals with the problem of social order, how social organization is possible, and its various forms. Special attention is given to formal organizations and institutions, as well as to the role of ideology, media and education.

GL/SOCI 2200 3.00 Critical Reading and Writing in Sociology. This course deals with a review of academic tools in sociology: reading and evaluating various kinds of information sources, finding and organizing materials for research projects, organizing materials and writing research papers. This course must be taken in conjunction with another course in sociology. Corequisite: Another three- or six-credit course in sociology, other than GL/SOCI 2510 6.00(EN) or GL/SOCI 2510 6.00(FR). Degree credit exclusions: GL/SOCI 2010 3.00(EN), GL/SOCI 2011 3.00(FR) (Fall/Winter 2003-2004).

GL/SOCI 2200 3.00 Lire et écrire de façon critique en sociologie. Ce cours présente une révision des outils académiques en usage dans la sociologie: lecture et évaluation des différentes sources d'information, prospection et organisation de la documentation en vue d'un projet de recherche, organisation et écriture d'un travail de recherche. Ce cours doit être suivi de concert avec un autre cours en sociologie. Condition concomitante : un autre cours de trois ou six crédits en sociologie, autre que GL/SOCI 2510 6.00(EN) ou GL/SOCI 2510 6.00(FR). Cours incompatible : GL/SOCI 2010 3.00(EN), GL/SOCI 2011 3.00(FR), (Automne/hiver 2003-2004).

AS/SOCI 3060 6.00 Classic and Contemporary Issues in Social Psychology. This course explores classic and current approaches to social psychology. Topics include self, social process, social interaction, interpersonal influences and group processes. Student participation in experimentation, participant observation, group discussion, research and discourse analysis is expected.

AS/SOCI 3110 3.00 Collective Behaviour. This course will analyze forms of collective behaviour (crowd, mob, panic, fashion, cult) with a view to understanding their function in society. Factors conducive to the formation of such behaviour, characteristics of members, leadership and processes of social action will be considered.

GL/SOCI 3110 6.00 Reading Course. Supervised field research and/or in library research supplementing and intensifying a student's work in connection with another course in sociology. In either case, a full work load is expected, with no reduction in the requirements for related courses. May be taken as full-year or half-year courses. Note: No student may register for this course without prior approval of the department.

AS/SOCI 3160 6.00 Understanding Psychotherapy. This course provides an introduction to the theory and practice of intensive psychotherapy. An overall balance is sought between the classical approach of Freud and his followers, post-Freudian developments in psychoanalytic technique and the more recent perspective of self psychology.

GL/SOCI 3210 3.00 Sociology of Childhood, Adolescence and Youth. The course focuses on the social world of children and youth in modern society. Historical and anthropological readings will be introduced to sharpen awareness of the distinct character of the contemporary passage to adulthood. Against this comparative background we will, then, analyze how modern developments in family life, economy, education, mass media and cultural beliefs have affected the growing-up process. We shall explore the ramifications of these changes and trace the varied responses to them. Prerequisite: GL/SOCI 2510 6.00. Degree credit exclusions: GL/SOCI 2011 3.00 (Winter 1992), GL/SOCI 3012 6.00 (Fall/Winter 1992-1993) and GL/SOCI 3210 6.00.

GL/SOCI 3215 3.00 Corps et société. Le corps est biologique. Il est aussi, universellement, le produit d'un long travail d'élaboration sociale. Ce processus de construction et d'interprétation du corps, son utilisation économique, culturelle, sportive, sexuelle, religieuse et politique dans diverses sociétés et à divers moments de leur histoire seront l'objet de notre analyse sociologique. Condition préalable : GL/SOCI 2510 6.00 ou la permission du professeur. Cours incompatible : GL/SOCI 3010 3.00 (Hiver 1992), GL/SOCI 3012 3.00 (Hiver 1994), GL/SOCI 3010 3.00 (Automne 1999).

An examination of recent developments in the study of culture as they affect sociological thinking about contemporary society, drawing on sociological as well as other theories and approaches. Includes case studies on gender, popular culture, multiculturalism, aesthetics, nationalism, political economy of culture, ideology.

GL/SOCI 3230 6.00 Sociology of Health and Illness. The focus of this course is upon the contemporary social organization for treatment of conditions of illness. The first section of the course concentrates on those occupational groups whose professional mandate entitles them to define both what constitutes illness and how treatment shall be implemented. The second section emphasizes both the social processes by which clients come to perceive themselves as sick or abnormal and the terms in which these clients articulate or fail to articulate their goals with those of the healing professions. Prerequisite: GL/SOCI 2510 6.00 or permission of the instructor.

GL/SOCI 3235 6.00 Mythes et sociétés. Dans une approche multidisciplinaire, ce cours porte sur l'étude des mythes anciens et contemporains afin d'en dégager le rôle qu'ils jouent dans diverses sociétés. Comment affectent-ils les individus dans la construction de la réalité sociale ainsi que dans leur comportement? Cours interdépartementaux: GLWMST/SOSC Cours incompatibles: SOCI/SOSC/WMST 3012 6.0 (FW 1999, FW 2000)

South Asian studies is offered as an Honours Double Major Interdisciplinary BA program and Honours Minor BA program that can be pursued jointly with another Honours BA program in the Faculty of Arts.

South Asian studies enables students interested in South Asia to pursue their interests through a series of course offerings drawn from a number of different disciplines. The main focus of the program are the countries that comprise the South Asian region. However, in light of the large South Asian diaspora in Canada, the program also considers issues related to diasporic life. The program aims to foster a deeper understanding of the South Asian region as an entirety, as well as those issues that concern the South Asian diaspora. In addition to an introductory core course and a 4000-level capstone course, students in the program are required to complete a specified number of credits in the following areas of concentration: history and state formations; and, gender, society and culture (including diasporic issues).

For specific program requirements and the list of program courses, please consult the Faculty of Arts Programs of Study section of this calendar.

General Information for Fine Arts Students

York's Department of Theatre, with 19 full-time faculty members teaching more than 60 half- or full-year courses for majors, is the largest theatre department in Eastern Canada. Because of the department's location in Metropolitan Toronto, students have access to Canada's biggest concentration of English-language professional theatre companies and artists.

The Department of Theatre offers BA, BA Honours and BFA Honours degree programs, providing students with different approaches to achieving their own theatrical goals. (For information on the MFA in acting, directing and playwriting see the Faculty of Graduate Studies calendar.)

All students must be evaluated by the department before being admitted. Students with credits from other postsecondary institutions may be placed in first- or second-year courses, depending on their background and ability. Admission to courses above the first-year level is usually by audition, portfolio and/or interview, with the student's work in first year both within the department and the University given particular emphasis. Advancement within the department is based upon demonstrated proficiency in one or more aspects of theatre and a satisfactory academic standing as defined in this calendar. It should be noted, however, that a satisfactory academic standing in itself does not guarantee admission to any course. Be aware that the study of theatre requires a special commitment and demands enormous amounts of time and energy.

The first undergraduate year is a foundation year for theatre majors to learn about all aspects of theatre, to get involved in both acting and backstage work, and to understand theatre as it existed in other times and places. In this year, students must also complete several courses in other areas of the University. In their remaining years, students may choose a broad program of study or follow a more specialized option in acting, creative ensemble, production, design, playwriting and dramaturgy, criticism, dramatic literature, educational theatre or theatre history.

Most majors take far more than the minimum number of courses in theatre and, for that reason, the department recommends completing the general education requirements as soon as possible. The BA Honours degree, which is usually chosen by those considering graduate study and careers in teaching or writing, requires at least 48 credits in theatre with a majority of these in theatre studies. The BFA Honours degree for professionally-oriented students in acting, directing, playwriting and dramaturgy, production and design allows students to take up to 81 credits in theatre, the majority in studio. Detailed regulations and programs of study are available in the Faculty of Fine Arts section of this calendar and in the department's handbook.

Students pursuing an Honours degree in the Faculty of Arts may combine a 42 credit or 48 credit Honours major in an arts discipline with a second major in theatre (theatre studies or production streams only). Honours degree students in the Faculties of Arts, Environmental Studies, Science and Engineering or Fine Arts may also qualify for a 30 credit theatre minor in theatre studies or theatre production. For details contact the department.

Department classes and productions are only part of the excitement of studying at York University. The Centre for Film and Theatre provides a focus for most departmental activities. Winters College is a designated fine arts college and home for many students. Professionals from across Canada, the US, England, France, Eastern Europe, China and other countries have come to York University to share their vision and expertise.

Three-credit courses usually meet three to four hours a week for one term. Six-credit non-studio courses meet either three or four hours a week for the whole academic year. Six-credit studio courses meet either six or eight hours a week for the whole year. Additional rehearsal and/or crew hours are often required. Not every course listed here is offered every year.

The interdisciplinary Program in Urban Studies is designed to provide a liberal undergraduate education about the nature and functioning of cities and urban society. While it is comprehensive in its approach and range, it also aims to achieve depth in the examination of fundamental urban issues. Members of the Urban Studies Program share a fascination with cities, among the most fundamental human institutions, and a commitment to their exploration. Across history, cities have been sites of innovation in economic, political and cultural life; centres of trade; seats of empire; and loci of scientific, social and artistic creativity. Today, they are the home of a growing majority of the world's population who increasingly live in metropolitan regions of several million people, regions often characterized by vigorous social diversity, striking contrasts of wealth and poverty, and a complex array of political, planning and environmental dilemmas. All of these themes are concerns of the Urban Studies Program. The program's core courses and senior-level work/study course stress direct experience of the urban field and of the process of doing urban fieldwork and research.

Students in urban studies have varied backgrounds and join the program for a range of reasons. Some are curious about the social life of the city, its people, its pleasures and its discontents, and often focus their course work on Toronto's inner city or suburbs. Others orient their coursework to an interest in cities in a world perspective or in the context of a global economy. Some are concerned with social issues or environmental dilemmas that confront the contemporary metropolis. Others enrol in the program as a foundation for professional studies in urban planning and design, or in environmental studies, law, business, education or public administration. Some pursue graduate work in an academic area related to the urban field.

For specific program requirements and the list of program courses, please consult the Faculty of Arts Programs of Study section of this calendar.

Programs of Study

The programs of study in the Department of Visual Arts are based on a creative interaction among the historical, practical and critical/theoretical

approaches to the visual arts that is possible only within a modern university. The department educates students within a broad humanist context and provides a strong foundation for those who wish to pursue further study and professional involvement in the visual arts. It offers programs leading to a BA, BA Honours or BFA Honours degree. In addition to courses in visual arts, students are also required to take courses within the humanities, social sciences and natural sciences to complement and reinforce their studies. As a result, the Department of Visual Arts reserves the right to restrict students to 18 credits in visual arts in any given year. Of these 18 credits, only 12 credits will be allowed in the studio area of the department in any given year.

Honours minors in visual arts (art history) and visual arts (studio) are also available.

Visual Arts (Studio)

Practicum courses have been designed to develop creative thinking and also to accommodate diverse backgrounds, abilities and interests. Students concentrating in studio may work in drawing, painting, sculpture, printmaking, photography or new media.

Studio students are recommended to:

- take FA/VISA 2620 6.00 Modern Art: 1750 to the Present during the course of their studies;
- successfully complete no fewer than 12 credits in two-dimensional and six credits in three-dimensional studio art.

Note: Course numbers whose second digit is 0 normally represent studio work.

Art History

Courses in art history are designed primarily for students whose major interest is the history of art or whose Honours program includes the history of art as one of its elements, and for other students majoring in the fine arts. Enrolment for students in other disciplines who wish to take any of these courses as electives may be accepted either with the stated prerequisites or with the approval of the instructor.

Students intending to continue their studies beyond the undergraduate level in art history are advised that most graduate schools require reading facility in modern languages. Students concentrating in this area are urged to include in their course of study at least one foreign language at the earliest possible time.

Some courses may use a title variance to indicate different course content within the same area of study. Courses may be organized in a geographical, chronological or thematic basis. Students should check with the department for more detailed course descriptions in any given year.

Note: Not all courses listed are necessarily offered every year.

Visual Arts Courses

FA/VISA 1000 3.00 Critical Issues in the Studio. Introduces students to visual, conceptual and theoretical language as it relates to studio practice. Ideas are examined through various disciplines from different points of view. Core course for first-year foundation studies in visual arts. Open to non-majors. Course credit exclusion: FA/VISA 1040 3.00.

FA/VISA 1005 6.00 Understanding Digital Art. This course is a basic introduction for non-Visual Arts majors to digital practices in contemporary art. It does not constitute a prerequisite for further New Media courses. It is offered on-line, combining exhibition and event visits with Web-based materials and assignments, and monitored chat discussions. An area of contemporary visual art that has its own history, social context, and technical strategies is open to students with no background, but who are interested in investigating some of the significance of the digital revolution. Students become familiar with digital photography, digital video/audio, installation, interactive art works, and art on the Web. On-line lectures and readings investigate a broad spectrum of computing issues applicable to visual culture, as well as the unique characteristics of digital art. Specific hours in the week are designated for on-line discussion time. Not open to Visual Arts Majors.

FA/VISA 1006 6.00 The Photographic Experience. An introduction to photography practices for non-majors. Basic skills are developed through lectures, tutorials, discussions and group critiques. Aspects of history and theory are explored. Camera required. Students are responsible for all costs associated with image creation and production. Course credit exclusions: Not open to students who have previously completed FA/VISA 2060 6.0 (formerly FA/VISA 1060 6.0) or AK/VISA 2360 3.0 (as of SU 2003). Not open to Visual Arts Majors.

FA/VISA 1110 6.00 Introduction to Western Art. Fundamentals of Western art history, visual analysis and selected cultural and philosophical themes in the development of human expression in the arts. The emphasis is on the chronological and thematic development of Western European and some North American art with a view to assessing and understanding the history of artistic creativity and its many manifestations. Prerequisite: none.

FA/VISA 1120 6.00 Introduction to Visual Culture: Images, Media, Meanings. What do images mean? Why do they matter? This course explores the ways that visual images work. Visual culture is a complex cultural phenomenon affecting how meaning is visually produced, coded and consumed in public art, media, museums, advertising, etc. The course provides an overview of recent and historical approaches to visual culture. It considers various media, contexts and periods. The course introduces students to the study of visual culture in such arenas as film and video, photography, painting and sculpture, the built environment, advertising and fashion, or contemporary arenas such as video games and the Internet. Visual Culture involves the development of a critical framework for the understanding and discussion of those aspects of culture and society which involve any type of visual media. The student will learn how to analyze visual media, interpret meanings, and gain experience in applying critical concepts to these understandings. Open to non-majors.

FA/VISA 2006 3.00 Photography Studio 1. Introductory studio in photographic theory and practice fundamentals. Tools, techniques and ideas related to seeing and camera art are explored with emphasis on the photographer as informed image-maker. Open only to visual arts majors, this course is a prerequisite for 3000-level photography courses. Course credit exclusions: AK/VISA 2360 3.00 (as of Summer 2003).

FA/VISA 2021 3.00 Painting. Aesthetics and techniques are examined through the study of various traditions and approaches in painting. Visual vocabulary and formal composition are developed through practical application and critical appraisal. Contemporary art concerns are discussed in slide presentations. Open to non-majors.

FA/VISA 2022 3.00 Painting. Subject matter and its attendant meaning are addressed through the application of direct and indirect methods of painting. This is achieved through diverse sources of imagery, including photography. The development of 20th-century painting is examined in slide presentations. Open to non-majors.

FA/VISA 2031 3.00 Sculpture. Formal principles are developed in conjunction with personal concepts employing both additive and subtractive processes to make the finished sculpture. Techniques include modelling in clay and plaster, and carving in wood and stone. The history of sculpture is examined in slide talks. Compulsory and optional materials fee and damage deposit apply. Mandatory safety equipment required. Open to non-majors.

FA/VISA 2032 3.00 3-Dimensional Construction. Projects focus on the three-dimensional construction process using materials such as plaster/clay, wood, steel and found objects. Note: Materials may vary depending on the instructor. The theory and practice of 20th-century constructed sculpture is also examined through discussions and slide presentations. Compulsory and optional materials fees and damage deposit apply. Mandatory safety equipment required.

FA/VISA 2033 3.00 Clay Modelling and Plaster Casting. Through a combination of slide lectures and studio practice, students are introduced to the historical tradition and the contemporary theory and practice of clay modelling over an armature and the transformation of the modelled object into a plaster casting through the waste mould process. Compulsory and

optional materials fees and damage deposit apply. Mandatory safety equipment required. Open to non-majors.

FA/VISA 2034 3.00 Stone Carving. Understanding of form is developed by combining primary sculptural method and traditional material. Investigations using stone identify principles of glyptic method and idea through dialogue, slide discussions and readings, resulting in visible signs of process and materialization of completed work. Compulsory supplementary fees. Mandatory safety equipment is required. Degree credit exclusion: FA/VISA 2000A 3.00. Open to non-majors.

FA/VISA 2035 3.00 Fundamentals of Sculpture. Familiarity with three dimensional form and methods of production are required for sculptural expression. This course acquaints students with the fundamentals of sculpture, including constructive methods in wood and metal, clay modeling and replication using gypsum products. Compulsory supplementary fees. Mandatory safety equipment is required. Degree credit exclusion: FA/VISA 2000B 3.00. Open to non-majors.

FA/VISA 2036 3.00 Introductory Foundry. Explores a range of foundry techniques used in casting sculpture. Students are introduced to all aspects of casting and are required to take a work from the beginning to the final finishing stage. Supplementary fees apply.

FA/VISA 2053 3.00 Time-Based Art: Crossing Boundaries. Introduces students to interdisciplinary studio practice, emphasizing critical thinking and creative exploration. Projects may be developed through combinations of different practices, such as photo and text, bookworks, audio/video, and site-specific works. Technical workshops include introductions to Photoshop and Quicktime movies. Compulsory supplementary fees.

FA/VISA 2054 3.00 Time-Based Art: Introduction to Electronic Media. Introduces students to video, audio and the computer as media for artmaking. Conceptual approaches to working with electronic media are explored by students through hands-on technical workshops, individual and group projects, and theoretical and technical readings. Compulsory supplementary fees.

FA/VISA 2055 3.00 Time-Based Art: Performance Art and Everyday Life. Individual and group projects plus readings are focused on time-based media, especially contemporary performance art. Students participate in exercises that promote original responses to the everyday environment, and are encouraged to use a variety of media in making works. Compulsory supplementary fees.

FA/VISA 2056 3.00 Time-Based Art: Introduction to Video Art - Production. Introduces students to the creative practice of video art in a production studio environment, including both concepts and techniques. Classes include workshops on camera, lighting, video effects and sound recording techniques. Students create individual creative video projects. Compulsory supplementary fees. Open to non-majors.

FA/VISA 2057 3.00 Time-Based Art: Interactive Video and Audio. Provides basics of digital video and audio production, and introduction to programming for artists using MAX/MSP. This program lets you use input from the mouse, keyboard or a camera to manipulate how you see video and hear sound. Open to Non-Majors. Supplementary fees apply.

FA/VISA 2060 3.00 Introductory Photography: Black and White. The creation and production of black and white photographs are the focus of this hands-on studio course. Camera, film and print skills are developed in conjunction with critical and aesthetic awareness. A 35 mm manually operable camera is required. Corequisite/Prerequisite for Visual Arts majors: FA/VISA 2006 3.0. Prerequisite for Non-Majors: FA/VISA 1006 6.0. Compulsory supplementary fees apply. FA/VISA 3620A 3.00 19th Century Art: Realism and Impressionism. A study of Realism and Impressionism in Europe between the 1830s and the 1880s. Realism is examined as a series of linked but differing concepts of art involving artists throughout Europe including Scandinavia and the Russian Empire. Emphasis is placed on the importance of prints and illustrated magazines in the formation of Realism. The study of Impressionism focuses on the French movement. There is also a concluding analysis of the contribution of Impressionism to Post-Impressionism.

FA/VISA 3620B 3.00 Romantic Art. Explores the relationship between Romantic art and the modern condition of revolution, industrialization, urbanization, and colonial expansion in Europe from the late eighteenth through the mid nineteenth centuries. Students develop an understanding of the place of Romanticism in Western art history. Prerequisite: FA/VISA 2620 6.0 or permission of the Course Director.

FA/VISA 3620D 3.00 The Artist and the City: 19th Century. In the 19th century the rapidly expanding cities of Western Europe came to dominate literature, and they demanded thick series of novels to encompass them. We think of Balzac's "Paris" and Dickens' "London," but these cities have also been seen as the crucible of modernity in art.

FA/VISA 3620E 3.00 Fin-de-siecle: Post-Impressionism, Symbolism, Art Nouveau. An examination of the radical changes in art during the last 20 years of the 19th century includes: the questioning of the Renaissance principles of representation; the simultaneous creation of many different styles (Cloisonnisme and Pointillism etc.); the rejection by some painters of easel painting in favour of the decorative arts; the striking changes in the decorative arts that makes that term inadequate; the ideal of synaesthesia or the Gesamtkunstwerk which led to collaborations between artists and writers, musicians and choreographers; the numerous changes in the exhibition systems; the enormous importance of prints and so on. In addition, parallels, if any, between the Post-Impressionism of the 19th century and our own Post-Modern fin-de-siecle will be examined. Prerequisite: FA/VISA 2620 6.00 or permission of the course director.

FA/VISA 3680C 3.00 Abstract Expressionists and European Contemporaries. The first half, or more, of the course covers the so called Abstract Expressionist painters and sculptors who brought the New York School to world prominence in the 1940s and 1950s. It considers not only their work, but also their spiritual ambitions, the artistic theories they developed, the schools they operated, their relationship with their dealers and the art audience, and their political concerns during the Second World War. The latter portion deals with European artists contemporaneous with the New York School, especially the "Cobra" group, artists using new materials in Italy and Spain, and a new generation in Paris. Throughout there will be considerable emphasis on the studio practices of the various artists: how they chose their subjects, their painting techniques, their efforts to redefine artistic traditions etc.

FA/VISA 3680D 3.00 Canadian Art Outside Quebec: 1940-1980. A consideration of such major movements in Canada as Painters Eleven (Jack Bush, Jock Macdonald), the Artists' Jazz Band (Michael Snow, Graham Coughtry), first-generation feminism (Joyce Wieland), London nationalism (Jack Chambers, John Boyle), Atlantic regionalism (Alex Colville, Christopher Pratt), the Regina Five and the revival of Native Peoples' art.

FA/VISA 3680E 3.00 1960s Art in the USA and Europe. Examines the work, processes and context of artists who emerged in Europe and the United States immediately after the Abstract Expressionists and their European counterparts. These may include: Post-painterly Abstraction, proto-Pop, Pop Art, Cubist-Constructivist sculpture, Minimalism, photo-realism, earth art, kinetic art, the El Paso group in Madrid, Joseph Beuys, the beginning of post-modern architecture, and early performance art. Course requirements: individually chosen mix of essays and tests. Prerequisite: FA/VISA 2620 6.0 or permission of the course director.

FA/VISA 3680H 3.00 The Artist and the City: 20th Century.

FA/VISA 3680M 3.00 Representations of the Gendered Self. This course addresses the complex visual representations of the gendered self in Western society since the 18th century. The relationship between visual culture, text, art and social discourse is explored. The course examines social categories such as mother, father, man, citizen and how these are imaged and imagined. Prerequisite: Any six credit course in 19th- and/or 20th-century Western history, such as AS/EN 2660 6.00, AS/HUMA 2170 6.00, AS/HIST 2300 6.00, or FA/VISA 2620 6.00, or permission of the course director.

FA/VISA 3690 3.00 Theoretical Issues in Contemporary Art. An introduction to major theoretical issues surrounding the practice and criticism of contemporary art include feminism, psychoanalysis, simulation theory, institutional critique, post-colonial theories of ethnicity, elite and popular cultures, and issues of site-specific, public, political and digital art. Prerequisite: FA/VISA 2680 3.00 or permission of instructor. Course credit exclusion: FA/VISA 3800C 3.00.

FA/VISA 3710 6.00 Memory and Place. How do places contribute to shaping memory? What is it about objects, art and architecture, for example, that seem to "capture" memory? Why are certain places meaningful and others less so? This course explores objects and ideas all the while embedded in history to better formulate a notion of the power of place and its relationship to memory. Cross-listed to: FA/FACS 3920J 6.0. Course credit exclusions: AK/FA 3010D 6.0.

Cross-listed to: FA/FACS 3920J 6.00, FA/VISA 3710 6.00

FA/VISA 3740 3.00 20th Century Canadian Art. This course investigates 20th century Canadian arts in the social and political contexts of race and ethnicity, gender, national identity. The course considers the social position of the artist, genres (fine art/craft/folk art), art markets and patrons and the development of arts institutions. Prerequisite: FA/VISA 1110 6.00 or FA/VISA 2620 6.00 or FA/VISA 2740 3.00. Course credit exclusion: FA/VISA 3720 6.00.

FA/VISA 3750 3.00 Art of Colonial America. This is a one semester lecture course dealing with the histories of visual arts in Canada, the United States and Mexico from European conquest to the 19th century. It explores a wide range of arts from these countries in the context of conquest, colonization, revolution, expansion, race and ethnicity, gender, and the search for national identity. Prerequisite: Third-year standing. Open to non-majors. Course credit exclusion: FA/VISA 3720 6.00.

FA/VISA 3820A 6.00 19th and 20th Century Architecture. An examination of the theory, structure, form, function and iconography of architecture and urban development from the early 19th century to the present. Chronological and thematic approaches are used. Walking tours of Toronto are an integral part of the course.

FA/VISA 3820B 6.00 Visual Culture and the Representation of Self and Society. In any given year, one or more courses directly related to the study of art history or theory may be offered. Selected topics vary from year to year. Prerequisite: Permission of the course director. Course credit exclusion: VISA 3680M 3.00.

FA/VISA 3830 3.00 Aspects of Portraiture. The artistic theory, psychology and development of portraiture in the West from Roman times to the portrait photograph, with emphasis on portraits after 1400. Lectures, discussions and student presentations. Prerequisite: FA/VISA 1110 6.00 or permission of the course director.

FA/VISA 3840 3.00 Aspects of Modern Portraiture: 1700 to the Present. A lecture survey course with frequent periodic discussions on the topic of portraiture, group-portraiture and self-portraiture from the beginning of the 18th century to the present in Western art (Europe and North America). Emphasis is on individual artists as well as the formulae and contexts of portrait-representation with a view to outlining how modern and contemporary portraiture draws on the traditions. Prerequisite: FA/VISA 1110 6.00, FA/VISA 2560 6.00, FA/VISA 2620 6.00, or permission of the course director.

FA/VISA 3950 3.00 Aspects of Architecture in the West. Examines the history of public and private architecture from Greek times to the present with emphasis on design principles and social and/or political meaning. Special emphasis on the iconography of major monuments in Western architecture. Prerequisite: One visual arts 1000- or 2000-level course or one 1000-level humanities course, or a Faculty of Arts foundation course. Open to all students in the Faculties of Fine Arts, Arts, Atkinson or Environmental Studies.

FA/VISA 4020 6.00 Painting. An advanced studio seminar, with emphasis on a self-directed program in which students begin to formulate their own objectives. Individual work space is assigned to each student; therefore enrolment is limited. Note: Students are expected to work on their own outside scheduled class time. Prerequisite: FA/VISA 3020 6.00 with a grade of B or better, or permission of the instructor.

FA/VISA 4060 6.00 Photography. Further development of advanced photography, dealing with the fine print, or historical processes. Compulsory materials fees apply. Mandatory safety equipment required. Prerequisite: FA/VISA 3060 6.00 or FA/VISA 3061 6.00 with a grade of C+ or better, or permission of the instructor.

FA/VISA 4070 6.00 Print Media. Students will further refine skills and develop a greater understanding of contemporary print media practices. In consultation with the instructor, students will develop studio projects toward a portfolio of work. The incorporation of digital imaging and other media is encouraged. Compulsory materials fees apply. Mandatory safety

equipment required. Prerequisite: FA/VISA 3070 6.00 or FA/VISA 3073 6.00 with a grade of B or better, or permission of the instructor.

FA/VISA 4080 6.00 Drawing. The focus of this course is intention. Emphasis is given to notation and its subsequent understanding. The aesthetic experience is examined as it relates to the creative process. The bias of the course is the intelligent development of intention as it imparts information and provides the transcendental experience. Prerequisite: FA/VISA 3080 6.00 with a grade of C+ or better, or permission of the instructor.

FA/VISA 4090A 6.00 Installation Art. A focused practicum for senior students that addresses the origins and history of installation art including site-specificity, the context of the gallery/museum, alternate environments and artist collectives. Compulsory supplementary fees. Prerequisites: Third- or fourth-year standing and at least six credits in studio at the 3000-level with a grade of B or better.

FA/VISA 4090D 6.00 Image: Methods and Applications. A focused practicum for senior students that examines contemporary practices in painting and drawing. Through a coupling of materiality and subject matter, the course encompasses representational and abstract art, popular culture and mass media in the Canadian context. Prerequisites: Third- or fourth-year standing and at least six credits from the 302x or 308x series of courses with a grade of B or better.

FA/VISA 4090G 6.00 Structure and Contingency. A focused practicum for senior students that investigates contemporary sculptural practices within a historical context. Through seminars, discussions and studio projects, students extend their own creative processes and media expertise. Compulsory supplementary fees. Prerequisites: Third- or fourth-year standing and at least six credits from the 303x series of courses with a grade of B or better.

FA/VISA 4090H 6.00 Advanced Explorations. A focused practicum for senior students that explores and refines aesthetics and visual language as they pertain to 2-D or 3-D mixed method applications. Incorporates aspects of photo-based practices, printmaking and digital technologies. Compulsory supplementary fees. Prerequisites: Third- or fourth-year standing and at least six credits from the 305x or 306x series of courses with a grade of B or better.

FA/VISA 4090J 6.00 Media Integration. A focused practicum for senior students that combines material and digital techniques, including video and audio. Students develop personal themes and skills through familiarization with concepts explored by contemporary media artists. Compulsory supplementary fees. Prerequisite: Third- or fourth-year standing in visual arts and at least six credits from the 305x series of courses with a grade of B or better.

FA/VISA 4090K 6.00 The Plural Hand. A focused practicum for senior students that explores the title as it is drawn from the observation that formal unity is often replaced with a plural hand - several ways of drawing within one drawing. Prerequisites: Third- or fourth-year standing and at least six credits from the 302x or 308x series of courses with a grade of B or better.

FA/VISA 4091 3.00 Independent Studies: Practicum. An individualized study program for highly motivated visual arts students in their final year of study who wish to pursue specific and intensive independent projects under the supervision of a faculty member on topics not available in other courses in visual arts. Supplementary fees are charged in studio areas where such fees are applicable. Prerequisite: Applications are restricted to students who fulfill all of the following criteria: BFA Honours major in visual arts with a minimum overall average of 7.0 (B+); successful completion of 90 credits towards the BFA, including a minimum of six credits in FA/VISA 4090 6.00 in the proposed discipline. Note: The annual submission deadline for an independent studies application is April 30th for the next summer and fall/winter academic sessions. Applications are subject to department approval. Applications are not available after the deadline.

FA/VISA 4091 6.00 Independent Studies: Practicum. An individualized study program for highly motivated visual arts students in

their final year of study who wish to pursue specific and intensive independent projects under the supervision of a faculty member on topics not available in other courses in visual arts. Supplementary fees are charged in studio areas where such fees are applicable. Prerequisite: Applications are restricted to students who fulfill all of the following criteria: BFA Honours major in visual arts with a minimum overall average of 7.0 (B+); successful completion of 90 credits towards the BFA, including a minimum of six credits in FA/VISA 4090 6.00 in the proposed discipline. Note: The annual submission deadline for an independent studies application is April 30th for the next summer and fall/winter academic sessions. Applications are subject to department approval. Applications are not available after the deadline.

FA/VISA 4100 6.00 Independent Studies: Art History. A study program for highly motivated students in an art history discipline. This course gives an individual the opportunity to pursue a specific and intensive personal study which must be arranged in consultation with the instructor. Prerequisite: Limited to students who have completed a 4000-level course in art history; must have permission of the directing faculty member. Applications may be obtained from, and must be submitted to, the Department of Visual Arts in the spring for the following academic session.

FA/VISA 4310 6.00 Art Criticism: History, Theory, Practice. The historical development of art criticism with an emphasis upon the practice of art criticism and critical writing on art today. Prerequisite: Fourth-year standing or equivalent, or permission of the course director. Note: FA/VISA 2620 6.00 provides useful background material.

FA/VISA 4340A 6.00 Asian Art: Zen Painting and Poetry. This course offers a chronological survey of paintings inspired by Ch'an and Zen Buddhism. The course also involves a close reading of poetry written by monks and laymen associated with this enigmatic and challenging Buddhist sect. Students are expected to engage fully in class discussion. Prerequisite: A 3000-level course in Chinese or Japanese religion and culture, or permission of the course director.

Cross-listed to: AS/HUMA 4405 6.00, FA/VISA 4340A 6.00

FA/VISA 4350 3.00 The Islamic City. Examines the characteristics of Islamic cities in the pre-industrial period. Cities are explored through documentary evidence, archaeological data and secondary sources. A general conclusion on the genesis of the Islamic city is sought. Prerequisite: FA/VISA 2350 6.0 or permission of the course director.

FA/VISA 4370 6.00 Signs and Symbols in Western Art. An introduction to the pictorial language of attributes, emblems and other identifiers, as developed in classical, Christian and secular art and architecture. Lectures, discussions and student presentations. Prerequisites: One of FA/VISA 1110 6.00 or FA/VISA 1340 6.00 or FA/VISA 2620 6.00; third- or fourth-year standing in any department, or permission of the course director.

FA/VISA 4410 3.00 Celluloid City: Media Images of Architecture. Modernist space, as represented by architecture and the city in photographs, postcards, film and eventually video and digital media, mediates our vision of the city and architecture space. Detailed investigation demonstrates how architecture and the city are intrinsic to visual culture. Prerequisite: third or fourth year standing. Open to non-majors.

FA/VISA 4540A 6.00 Gothic and Gothic Revival Architecture. We examine the form, structure, function and iconography of Gothic architecture from its inception at the abbey church of Saint-Denis in 1140, under the patronage of Abbot Suger, to the 20th century. For the medieval buildings, emphasis is placed on the respective roles of patron and master mason in the design process, and on understanding the structure and iconography of the building. For the Gothic Revival buildings (19th to 20th century), the focus will be on buildings in Toronto and vicinity. Prerequisite: FA/VISA 2110 6.00 or FA/VISA 2540 6.00 or permission of the course director.

FA/VISA 4540E 3.00 Romanesque Sculpture in Britain 1066-1200. Investigates the form and function of ecclesiastical and secular sculpture in Britain from 1066-1200, with emphasis on the meaning and significance

of the sculpture for contemporaries and the roles of patron and sculptor in the creative process. Prerequisite 4th year standing or permission of the course director.

FA/VISA 4620A 3.00 European Art Between Two World Wars. A number of themes which dominate this period are examined: the political – Nazi and Soviet dictatorships with their government-imposed art programs and their destruction of modern art; the social – attempts to build a better world through a better environment (Constructivists, Bauhaus, de Stijl etc.) as well as attempts to create a better society by changing the people; Surrealism Sculpture – the flowering of modern sculpture. There are other themes as well, also photography, and photographs and films by artists. Prerequisite: FA/VISA 2620 6.00 or permission of the course director.

FA/VISA 4620D 3.00 Major Movements in Modern Art: The Decade 1905-1914. Key issues that still play their part in art today are examined in this advanced seminar. The extraordinary decade in Europe that saw the founding of modern art, with the equally extraordinary variety of innovations made by movements like Fauvism, Cubism, Futurism, Die Brücke, Der Blaue Reiter, Vorticism, Rayonnism, Suprematism and Orphism are studied. Included are the contributions of individual artists like De Chirico and Chagall, as well as the creation of abstract art by Kupka, Kandinsky, Delaunay and Mondrian etc. Prerequisite: Permission of the course director.

FA/VISA 4620F 3.00 The Artist and the Modern Museum. Recent artistic responses to the modern art museum as providing the context for the consumption of art suggest that the museum may be a dying institutional form. The work of Buren or Broodthaers, for instance, questions the autonomy of art by exposing its reliance or involvement with the museum as its institutional ground. The construction of the category of "artist" in the 19th and 20th centuries is addressed as well as the relations between the "high art" product and the museum as the site of its consumption, display and authorization. Prerequisite: FA/VISA 2620 6.00 (or period study equivalent) and permission of the course director.

FA/VISA 4620H 3.00 Nationalism and Modern Art. A seminar on a single major movement in art in the early 20th century. Teaching is based upon discussion reports and presentation of papers. Topics vary from year to year. Prerequisites: One of FA/VISA 1110 6.00 or FA/VISA 1340 6.00 or FA/VISA 2620 6.00; third- or fourth-year standing in any department, or permission of the course director.

FA/VISA 4620J 3.00 Painters Eleven, the Isaacs Group and the Regina Five. A seminar on a single major movement in the early 20th century. Teaching is based upon discussion, reports and presentation of papers. Prerequisite: FA/VISA 1110 6.00 or FA/VISA 1340 6.00 or FA/VISA 2620 6.00; third- or fourth-year standing in any department or permission of the course director.

FA/VISA 4620K 3.00 Stained Glass as a Modern Art. Explores Architectural stained glass and its imagery in the context of its architectural setting and related developments in painting and sculpture from ca. 1800 to current practice. Representative monuments are discussed from technical, stylistic, and iconographical viewpoints. Prerequisite: FA/VISA 1110 6.0 or equivalent.

FA/VISA 4640B 3.00 Contemporary Sculpture.

FA/VISA 4640C 3.00 Contemporary Art and Surrealism. Focuses on the art of the 1990s. In exploring this period, major emphasis is placed on the resurgence of Surrealist strategies in recent practice. A central theme involves the complex interplay between theory and practice within contemporary art of the last 10 years. In this vein, theories such as Kristeva's concept of the abject, Bataille's notion of the formless, Freud's categories of the uncanny and the death drive, and Lacan's problematic of the real receive close attention. Revisionist interpretations of Surrealism itself by contemporary critics such as Yve-Alain Bois, Whitney Chadwick, Hal Foster, Rosalind Krauss and others are extensively discussed. Rachel Whiteread, Jimmie Durham, Mona Hatoum, Gary Hill and Sarah Luca are among the contemporary artists whose work is considered. Prerequisites: FA/VISA 2620 6.00 and preferably a second course in 19th- or 20th-century art, or permission of the course director.

FA/VISA 4720B 3.00 Problems in Canadian Art: Quebec Art: 1935 - 1975. A seminar focusing on art in Quebec from the time of the Automatistes through the next generation, that of the Plasticiens. Students can choose and define topics from a suggested selection in accord with their own interests. Prerequisite: FA/VISA 2620 6.00 or permission of the course director.

FA/VISA 4720C 3.00 Problems in Canadian Art: Focus on Canadian Painting.

FA/VISA 4720D 3.00 Bawdy Images/Body Theory in Canadian Visual Culture. Ribald, indecent, improper, dirty... definitions of 'bawdy' suggest how some body images have been viewed in Canadian visual culture. Focusing on 20th century case studies, the course provides a forum for formulating theoretical approaches to body imaging in the 21st century. Prerequisite: Third or fourth year standing.

FA/VISA 4720F 3.00 Canadian Architecture 1800-1870. An examination of the theory, structure, form, function, iconography and development of architecture in Canada circa 1800-1870. Chronological and thematic approaches are used. Emphasis is placed on architectural-historical research into specific buildings and/or architects. Student projects are designed to hone these research skills. Walking tours of Toronto and a visit to Niagara-on-the-Lake are an integral part of the course. Prerequisite: FA/VISA 1110 6.00 or FA/VISA 2110 6.00 or FA/VISA 2620 6.00, or permission of the course director. Course credit exclusion: FA/VISA 4720E 3.00.

FA/VISA 4720G 3.00 Toronto Architecture. An examination of the theory, structure, form, function and iconography of architecture and urban development in Toronto from the early 19th century to the present. Chronological and thematic approaches are used. Emphasis is placed on architectural historical methodologies and on skills necessary for original research into specific buildings, developments and/or architects. Student projects are designed to hone these research skills. Walking tours of Toronto are an integral part of the course. Prerequisite: FA/VISA 1110 6.00 or FA/VISA 2110 6.00 or FA/VISA 2620 6.00 or permission of the course director.

FA/VISA 4720H 3.00 Canadian Architecture 1870-1900. An examination of the theory, structure, form, function, iconography and development of architecture in Canada circa 1870-1900. Chronological and thematic approaches are used. Emphasis is placed on architectural-historical methodologies and on skills necessary for original research into specific buildings and/or architects. Student projects are designed to hone these research skills. Walking tours of Toronto and a visit to Guelph, Galt and Paris are an integral part of the course. Prerequisite: FA/VISA 1110 6.00 or FA/VISA 2110 6.00 or FA/VISA 2620 6.00, or permission of the course director. Degree credit exclusion: FA/VISA 4720E 3.00.

FA/VISA 4800B 3.00 Early and High Gothic Architecture.

FA/VISA 4800D 3.00 Arts and Crafts Movement. This lecture/seminar course overviews the Arts and Crafts Movement which revolutionized attitudes towards both art and design in the latter part of the 19th century and the first half of the 20th century. The material covered includes the British Isles (England, Ireland), Europe (Germany, Austria, Scandinavia), the United States and Canada. The interconnection with nationalism, women's movements, museum development and industrialization is discussed, as are aesthetic goals and premises. Architecture and stained glass are studied along with smaller-scale objects. William Morris, Charles Rennie Mackintosh, Frank Lloyd Wright and Harry Clarke are a few of the important innovators whose works and writings are addressed. Prerequisite: FA/VISA 1110 6.00 or FA/VISA 2620 6.00 or FA/VISA 3910 6.00, or permission of the course director.

FA/VISA 4800E 3.00 The Body in Western Art: Identity and Construction. A seminar course with lectures on the representation of the human body in the Western visual traditions, from antiquity through the early 20th century. Primary literary and medical sources supplement an investigation of the visual record. Works of art are powerful cultural tools in the construction of social and sexual identity. This course is about what the body looks like in Western art and how clothing extends, confirms and/or modifies it. The systems of social signs and meanings as shown in works

of art can be normative as well as challenging in their expression. The body and clothing are studied in the perspective of social iconography, medical culture and artistic representation. Prerequisites: FA/VISA 1110 6.00, third- or fourth-year standing, and permission of the course director.

FA/VISA 4800F 3.00 The Body and Identity in Modern Art, 1700 to the Present. The goal of this course is to introduce the varieties of phenomena and approach, in history and interpretation, which are possible in the Western representation of the body. Among the premises of this course are: that the representation of the body and its extensions with clothes and props is a major determinant in establishing human identity qualified by sex, social class, social type, and ultimately the kind of individuality associated with our own culture; that the notion of the human body is not natural or innate to human beings but is itself a socially conditioned construction, subject to ideolical manipulation and to current notions of nature; and that clothes and other props can be understood as both extensions of ideology and of ideas of nature as well as the supporting matrix of fashion. Prerequisites: One of FA/VISA 1110 6.00, or FA/VISA 1340 6.00, or FA/VISA 2620 6.00; third- or fourth-year standing in any department, or permission of the course director.

FA/VISA 4800I 3.00 Inuit Art.

FA/VISA 4800J 3.00 Photography in Contemporary Art. In any given year, one or more courses directly related to the study of art history or theory may be offered. Prerequisite: FA/VISA 3690 3.00 (formerly FA/VISA 3800C 3.00) or permission of the course director.

FA/VISA 4800K 3.00 Image Wars: Iconoclasm and Idolatry. In any given year, one or more courses directly related to the study of art history or theory may be offered. Prerequisite: permission of the course director.

FA/VISA 4800L 3.00 Special Options: Asian Art. Provides advanced studies in traditional and/or contemporary art of Asia. Topic to be determined by the instructor in relation to their scholarly expertise. This course will likely require weekly readings and discussion, and the writing of a research seminar paper. Prerequisite: FA/VISA 1340 6.0, FA/VISA 2340 6.0 or permission of the course director. This course will be integrated with the graduate program in Art History.

FA/VISA 4950 3.00 History of Houses, Decoration and Landscaping in Western Architecture. Examines the history of houses from Greek times to the present at all social levels and domestic arrangements, including principles of interior decoration and domestic landscaping. Special emphasis is placed on class, gender and environment in the evolution and standardization of domestic design. Prerequisite: 1000- or 2000-level course in FA/VISA, FA/FACS or AS/HUMA.

Women's Studies

Women's studies is both a complement and a corrective to established fields at York and a new academic discipline of its own. Until recently, both the humanities and the social sciences reflected predominantly male perspectives. Women have been largely invisible in literature, art, history, philosophy, politics, social sciences and law. Through cross-cultural and disciplinary assessment, women's studies exposes misconceptions about women expressed through myth, ideologies, teachings and writings. It replaces negative cultural images of women with visions that reaffirm women's strength, capability and intelligence.

The School of Women's Studies unites academic resources at York University in Women's Studies, bringing together the undergraduate and graduate programs, the non-credit Bridging Program, and the Centre for Feminist Research/le centre de recherches féministes à York.

A feature which distinguishes the Women's Studies Program offered at Glendon from the programs offered at the faculties of Arts and Atkinson is its bilingual focus. Non-parallel courses are offered in both English and French. As a result, a genuine dialogue develops between the approaches of anglophones and francophones to theory, philosophy, literature, legal structures and language.

Students may pursue a degree in Women's Studies in the faculties of Arts, Atkinson or Glendon. For specific program requirements, please consult the relevant Programs of Study section of this calendar.

School of Women's Studies Courses of Instruction/ École des études des femmes Description des cours

Not all courses will necessarily be offered in any given year. Courses may be offered at Glendon or on the Keele campus, during the day or in the evening. For information about specific offerings, or for a listing of other courses that count towards program credit, please consult the School of Women's Studies supplemental calendar.

Note: For purposes of meeting program requirements, all foundations courses will count as six credits towards the major.

Work and Study/Travail et études – Glendon

Program Office/Bureau du programme :

125 York Hall/pavillon York

Coordinator/Coordonnateur du programme :

Y. Frenette

The Work and Study Program provides students with the opportunity to obtain a General Certificate in Work and Study and a bachelor's degree simultaneously. It gives them the opportunity to gain workplace experience, allowing them to choose a work placement according to their individual aspirations and aptitudes.

Working with a traditionally bilingual liberal arts institution, the General Certificate in Work and Study is unique, both in its objectives and in its structure. Work and study does not aim to introduce students to a specific discipline. Focusing on changes in the working world and providing students with the opportunity for unique professional experience, the program is designed to complement or even provide a new dimension to the student's undergraduate study program.

The General Certificate in Work and Study requires 24 credits, 15 of which are offered within the program and nine of which are offered by other programs and departments of Glendon and recognized by the program.

Students enrolled in the Work and Study Program may only receive their certificate on the condition that they complete the requirements for their bachelor's degree.

Le programme Travail et études offre à des étudiants, engagés dans des études de baccalauréat, la possibilité de mener, simultanément, des études pour l'obtention du Certificat général en travail et études. Il les invite à vivre une expérience de travail, tenant compte de leurs aspirations et aptitudes, dans une activité de leur choix.

Issu d'un milieu universitaire de tradition bilingue voué à l'enseignement des lettres et des sciences humaines, le Certificat général en travail et études est unique de par sa nature et ses intentions. Il n'a pas à initier des étudiants à une discipline précise mais, en mettant l'accent sur les mutations du monde du travail et en leur permettant de vivre une expérience professionnelle unique, il entend ainsi leur offrir un complément, voire une nouvelle dimension d'une formation déjà en cours.

Le Certificat général en travail et études comprend 24 crédits dont 15 sont pris à l'intérieur du programme et neuf parmi des cours retenus par le programme et offerts au sein de différents départements et programmes du Collège universitaire Glendon.

Les étudiants inscrits au programme Travail et études ne pourront recevoir leur Certificat que s'ils ont rempli toutes les conditions nécessaires à l'obtention de leur Baccalauréat.

Courses in Work and Study/Cours de travail et études

GL/WKST 2500 3.00 Cours d'orientation au Certificat travail et études. Les aspirations socio-professionnelles des étudiants inscrits à ce cours en constituent le point de départ. Les étudiants ont à se pencher sur ce qui motive leur choix de carrière, ils ont à en tracer son profil socio-économique et ses exigences. Ils sont aussi appelés à réfléchir sur les transformations profondes des sociétés de la modernité avancée, sur les mutations du monde du travail et la place grandissante du monde du savoir dans les activités de production. Condition préalable : admis au programme.

Language of Instruction: French

GL/WKST 2500 3.00 Orientation to Work and Study Certificate. The socio-professional aspirations of the students enrolled in the class form the basis of this course. Students will be asked to investigate the motivation for their career choice, and describe the professional requirements and provide a socio-economic profile of such a profession. They will also be asked to reflect upon the profound transformation in advanced modern societies, changes in the working world and the increasing role of knowledge in production activities.

GL/WKST 2510 3.00 Récits de vie et enquêtes en milieu de travail. L'accent est mis sur des récits de vie d'hommes et de femmes de différentes générations et professions qui ont, en quelque sorte, déjà réalisé des aspirations professionnelles formulées par les étudiants inscrits à ce cours. Ces personnalités, qui d'ailleurs peuvent être retraitées, témoignent de leur propre itinéraire professionnel face aux étudiants. Elles sont invitées à les conseiller dans leur cheminement. Enfin, les étudiants ont également à se rendre dans différents milieux de travail, choisis en fonction de leur future carrière, afin de mener une petite enquête de terrain et d'y effectuer les rencontres préparatoires à leur stage de formation.

Language of Instruction: French

GL/WKST 2510 3.00 Life Stories and Research in the Work Place. This course will be based on real-life stories of men and women from different generations and professions who have, one way or another, achieved the professional aspirations of students in the course. These men and women, who may already be retired, will relate to the students the story of their professional career. They will also be encouraged to advise students on their chosen career path. Subsequently, students will visit various work places, according to their professional aspiration, to carry out preparatory meetings for their work placement.

GL/WKST 3200 6.00 Work Placement. The placement, which lasts for 30 days or 240 hours, is scheduled for one day a week during the fall and winter terms. (Other arrangements are possible). It provides students with a direct experience of professional practices. The work placement is supervised by a professor responsible for the academic evaluation, in collaboration with the supervisor in the work setting. Prerequisite: GL/WKST 2510 3.00. Corequisite: GL/WKST 3205 3.00(EN). Degree credit exclusion: GL/WKST 3200 12.00.

GL/WKST 3200 6.00 Stage pratique. D'une durée de 30 jours, soit de 240 heures, le stage s'effectue normalement à raison d'une journée par semaine durant les semestres d'automne et d'hiver (avec possibilité d'autres arrangements). Il permet aux étudiants de s'initier à une pratique professionnelle dans le prolongement de leur formation théorique. Le stage se fait sous la responsabilité du professeur responsable de l'évaluation universitaire des stages, en collaboration avec le superviseur sur le lieu de travail. Conditions préalable : GL/WKST 2510 3.00. Condition concomitante : GL/WKST 3205 3.00(FR). Cours incompatible : GL/WKST 3200 12.00.

Language of Instruction: French

GL/WKST 3205 3.00 Work Placement Seminar. In the work placement seminar the professor invites students to reflect on their work experience. They have to describe their work and responsibilities and the challenges they meet. When working within a large company they will analyze the structure and the organization of the work in the company. They will have to make a final report in which they will present a theoretical analysis of their own experience. One hour in class per week during the full year and regular meetings with the professor to discuss, comment and seek guidance. Prerequisite: GL/WKST 2510 3.00. Corequisite: GL/WKST 3200 6.00. Degree credit exclusion: GL/WKST 3200 12.00.

GL/WKST 3205 3.00 Séminaire de stage. Dans le cadre du séminaire, le professeur invite d'abord les étudiants à poser un premier regard sur leur stage. Ils ont à décrire leurs activités et responsabilités, les défis qu'ils ont à relever. S'ils sont au cœur d'une entreprise, les stagiaires doivent également analyser la division, l'organisation et la finalité du travail de ce milieu. En recourant à l'ensemble de la démarche théorique du séminaire, les étudiants devront présenter un rapport final dans lequel ils dresseront un bilan de leur expérience. Une heure de classe obligatoire par semaine sur toute l'année, et rencontres individuelles avec le professeur dans son

bureau au cours desquelles l'enseignant écoute, guide et conseille les étudiants. Condition préalable : GL/WKST 2510 3.00. Condition concomitante : GL/WKST 3200 6.00. Cours incompatible : GL/WKST 3200 12.00.

Language of Instruction: French

GL/WKST 3610 6.00 Women and Work: Production and Reproduction. This course explores the conditions of women's work, paid and unpaid. The historical development of a sexual division of labour and the roles played by the family, employers, trade unions and government policy in the gendering of jobs is examined.

Cross-listed to: AK/SOSC 3380 6.00, AK/WMST 3510 6.00, AS/SOSC 3130 6.00, AS/WMST 3510 6.00, GL/WKST 3610 6.00, GL/WMST 3510 6.00

Courses in Writing Programs

AK/WRIT 1400 6.00 Critical Thinking, Reading and Writing. By means of a study of texts and themes drawn from the humanities and social sciences, as well as from English literature, the course aims to develop critical comprehension and the discipline of effective expression in written English. (formerly AK/EN 1400 6.00) Note 1: This course is considered an elective outside the major for students majoring in English. Note 2: AK/WRIT 1400 6.00 is particularly intended for students taking one of their first few University courses, and will require completion of frequent written assignments. Special sections of the course are offered for students for whom English is a second language. The number of places available is limited. For further information about this course, please contact Writing Programs.

AK/WRIT 2000 3.00 Writing and Research about Business. Develops writing and research skills, with a focus on contemporary issues relevant to Canadian business concerns.

AK/WRIT 3900 3.00 Professional Writing for Nurses. Develops writing skills appropriate to the professional needs of nurses. Focus on university research papers and health educational materials using Nursing curriculum-appropriate materials. Open to: Student enrolled in the collaborative BScN, Post-RN Honours BScN, or the Qualifying Pre-Session for internationally educated nurses only.

AK/WRIT 3988 3.00 Effective Writing and Research. Develops research and writing skills appropriate to university-level work in both liberal arts and professional studies through the study of a particular issue from a variety of perspectives. Areas covered include formulating research questions, using research tools such as libraries and the Internet, primary and secondary sources and proper citation (formerly AK/EN 3988 3.00).

AK/WRIT 3989 3.00 Writing in the Workplace. Examines various types of workplace related writing and oral communication; for example, report writing, executive summary, business plan, presentation. Focus on helping students develop clear writing, both individual and in collaboration with others and skills in editing and presentation. (formerly AK/EN 3989 3.00) Prerequisites: 12 credits in social science or humanities. Not open to students who have taken GL/TRAN 3310 3.00 and GL/TRAN 4310 3.00.

Contract Appointments/ Enseignants Sous Contrat

York University is fortunate to be able to draw from the community of Metropolitan Toronto and district many qualified people willing to serve the University as contract faculty. Many have long-standing connections with the University, and play important roles in the academic programs of the various departments and Faculties. Contract faculty who have taught at York for five or more years were invited to have their names included in this publication.

L'Université York est heureuse de pouvoir bénéficier des services d'un grand nombre de personnes engagées sous contrat vivant dans la communauté de

Toronto et qui apportent à l'Université leurs qualifications et leurs connaissances. Nombreux sont les enseignants qui jouent ainsi un rôle important depuis des années au sein de leur département et faculté. Les personnes qui ont ainsi enseigné à York pendant cinq ans ou plus sont invitées à inscrire leur nom ci-dessous.
