Course Descriptions

ED/AUCO 3550 3.00 Educational Audiology I. This course addresses practical and theoretical issues that relate to teachers as facilitators in developing communicative competence mainly through audition. Medical and educational models of assessment and intervention strategies used with deaf and hard-of-hearing students are examined with respect to legal and teaching implications. Particular attention is given to the contributions of the field of audiology to education.

ED/AUCO 3555 6.00 Educational Audiology. This course focuses on maximizing hearing and auditory learning in the classroom for Deaf and Hard-of-Hearing children. It offers an introduction to sound and speech acoustics, the anatomy and physiology of the auditory system, the measurement and effects of dysfunction of various portions of the auditory system, and the role of audition in communication. The focus in the first term will be on clinical audiological practices, hearing aids, FM systems and interpretation of clinical audiological test results. The objective is to gain sufficient familiarity with clinical audiological procedures to allow teachers to work skillfully and collaboratively with parents, audiologists and other professionals. A key part of this course will be the use of amplification by Deaf and Hard-of-Hearing children, in the form of hearing aids, cochlear implants, non-conventional amplification devices and FM systems. The second term of this course focuses on the use of hearing technology in the classroom and the development of listening skills. Students will learn the theoretical and practical aspects of recommending, fitting, monitoring and troubleshooting hearing technology in the classroom and will also develop an understanding of assessment and development of listening skills for Deaf and Hard-of-Hearing students.

ED/AUCO 3565 3.00 Classroom Amplification for Deaf/Hard of Hearing Learners. This course prepares teachers in the oral/aural stream of the Deaf/Hard of Hearing Program to evaluate the need for classroom amplification, to fit this technology to students' personal amplification, to install the technology in classrooms, and to verify its effectiveness. Prerequisites to this course are Listening and Speaking for Learners with Hearing Loss (course code to be determined). Corequisites to this course are Auditory Verbal Learning (AUDV3590), and Teaching in the Mainstream (INDS3541).

ED/AUDV 3590 3.00 Foundations of Auditory Verbal Learning. This course will present an introduction to the guiding principles of the Auditory-Verbal approach for children who are Deaf and Hard-of-Hearing and their families. Course content will include: " basic principles of the Auditory-Verbal approach " team approach to auditory-management " hierarchy of listening skills " auditory-verbal techniques and strategies " integration of listening, speech, language, cognition and communication " parent professional partnership and parent guidance " habilitation for children with cochlear implants " sensory-integration and hearing loss " the auditory-verbal approach for children in regular schools " assessment, planning and reporting

ED/BBED 3570 3.00 Bilingual - Bicultural Education. This course will focus on developing proficiency in American Sign Language (ASL). The purpose of this course is to develop skills in receptive and expressive ASL. Attention will be given to the grammar of ASL, the importance of proper non manual grammatical signals, non manual signals and cultural aspects of ASL and will lead participants to an understanding of how to use ASL in a bilingual classroom. Assessment of ASL abilities will take place during the first class of each course and grading rubrics will be presented to all participants.

ED/BIOL 3051 6.00 Teaching Biology In the Intermediate Senior Division. A theoretical and practical introduction to instruction in Intermediate Senior Division biology including a consideration of methods and materials in a laboratory or field setting.

This course is intended to develop an understanding of how children in the Primary and Junior divisions gain facility in reading, writing, speaking and listening. The focus is on exploring current thinking about the language processes and the implications of these insights for instructional practice.

ED/PRJM 3030 3.00 Teaching Mathematics in the Primary-Junior Divisions. A study of methods for teaching mathematics in the elementary school. Emphasis is placed on the use of materials, relating mathematics to the rest of the curriculum and developmental stages of students.

ED/PRJM 3031 3.00 Teaching Mathematics in the P/J Division. A study of methods for teaching mathematics in the elementary school. Emphasis is placed on the use of materials, relating mathematics to the rest of the curriculum and developmental stages of students.

ED/RELS 3041 3.00 Teaching Religion in the Intermediate Division. An examination of the Religious Study curriculum in the Intermediate Division and of the methods and materials available to support Religious Studies. Course design and evaluation are considered.

ED/RELS 3051 6.00 Teaching Religion in the Intermediate Senior Division. An examination of the Religious Study curriculum in the Intermediate Senior Division and of the methods and materials available to support Religious Studies. Course design and evaluation are considered.

ED/SCIE 3041 3.00 Teaching Science in the Intermediate Division. An introduction to the philosophy, methods and materials of science instruction, with attention to the science curriculum, laboratory instruction and safe laboratory practices.

ED/SCIE 3051 6.00 Teaching Science in the Intermediate Senior Division. An introduction to the philosophy, methods and materials of science instruction, with attention to the science curriculum, laboratory instruction and safe laboratory practices.

ED/SLGS 3510 3.00 Educational Use of Signs. The purpose of this course is two fold: (i) to provide an introduction and overview of the major issues with respect to the use of signed language in the education of Deaf and Hard-of-Hearing students, and (ii) to develop abilities in the use of sign language, particularly as it applies to its use in school settings across a range of programs and communication philosophies. The emphasis will be on consideration of how we think about the use of sign language and other forms of manual communication in school setting, and the implications for classroom practice. Topics to be taken up include: (i) characteristics and features of various forms of manual communication, (ii) terminology with

respect to language, communication and modality, (iii) educational options for Deaf and Hard-of-Hearing students as they relate to the use of manual communication, (iv) community and culture, (v) educational interpreting, and (vii) resources and information for classroom teachers.

ED/SLGS 3520 3.00 American Sign Language. This course builds on a well established base of knowledge of American Sign Language (ASL). The purpose of this course is to focus on how to improve sign language (ASL) for the purpose of using it as a language of instruction in an educational setting. This course will apply principles of American Sign Language to an educational context. Therefore, candidates will learn how to assess sign language skills of Deaf and Hard-of-Hearing students, how to tell a story in ASL, and how to deal with subject specific vocabulary and content using ASL.

ED/SLGS 3525 3.00 American Sign Language 2. This course will focus on developing proficiency in American Sign Language (ASL). The purpose of this course is to develop skills in receptive and expressive ASL. Attention will be given to the grammar of ASL, the importance of proper non manual grammatical signals, non manual signals and cultural aspects of ASL and will lead participants to an understanding of how to use ASL in a bilingual classroom. Assessment of ASL abilities will take place during the first class of each course and grading rubrics will be presented to all participants.

ED/SPAN 3051 6.00 Teaching and Learning Spanish in the Intermediate/Senior Division. This course examines theories, philosophies, research, policies and practices specific to teaching and learning Spanish in the Intermediate/Senior grades. Candidates broaden and deepen their conceptualizations of teaching and learning through critical analysis of effective, inclusive learning environments for adolescent education. Candidates critically analyze these concepts in order to develop understandings of the complexities of effective, inclusive teaching and learning. This course is required for all teacher candidates in the Intermediate/Senior program with Spanish as one teaching subject. It is corequisite with the Intermediate/Senior Practicum Seminar Part I or Part II.

ED/TESL 3200 6.00 Methodology of Teaching English to Speakers of Other Languages. This course introduces students to key issues of curriculum design and implementation in the language learning classroom. Students will explore the interaction of teacher, student, subject matter and milieu in the generation, implementation, assessment and modification of the language curriculum.

ED/TESL 3300 6.00 Practicum in Teaching English to Speakers of Other Languages. The course provides an opportunity for students to understand the standards of practice in ESOL by observing and analyzing a variety of practicum placements, and exploring the experiences in an ongoing seminar series. Students are supported in the analysis of and preparation for language teaching experiences. *This courses may be taken concurrently with, but not before ED/TESL 3200 6.00 Methodology of Teaching English to Speakers of Other Languages.

ED/TLSE 3715 0.00 Practicum. Teacher candidates participate in two practicum experiences in two different educational settings over the course of the academic year.

ED/TLSE 3715 3.00 Teaching and Learning Seminar. The purpose of this course is to develop an understanding of the current pedagogy, practices and policy relating to the teaching of Deaf and Hard-of-Hearing students. The course content provides a framework for understanding the instructional techniques encountered in practicum placements. The practicum component of this course exposes teachers candidates to the range of educational environments as well as the communication philosophies and modalities used in the education of Deaf and Hard-of-Hearing students.

ED/TLSE 3715 6.00 Teaching and Learning Seminar. The purpose of this course is to develop an understanding of the current pedagogy, practices and policy relating to the teaching of deaf and hard of hearing students. The emphasis of this course is on the integration of theory and practice. The course content provides a framework for appreciating the diversity of teaching/learning situations encountered in practicum

placements, and for understanding the nature and structure of the variety of programs for Deaf/HH students in both school boards and provincial schools. All Teacher Candidates will participate in a practicum experience.

ED/URED 3300 6.00 Urban Education. This course focuses on issues related to schooling in settings characterized by diversity particularly related to socio-economic status, ethnicity, race, culture and citizenship (i.e., immigrant or refugee). It is intended for teacher candidates doing their practicum within the Westview Family of Schools.

ED/VISA 3041 3.00 Teaching the Visual Arts in the Intermediate Division. This course examines the philosophy and methods of art education in relation to students in the Intermediate Division. Curriculum development, the organization and evaluation of lessons, learning resources and materials, problems in art education, and strategies of art teaching are among the pertinent areas studied. Other areas of concern are determined by the interaction of the instructors, adjunct professors, and candidates. Faculty lectures, candidate presentation, assigned readings, class discussions, and visiting artists and educators contribute to the exchange of knowledge.

ED/VISA 3051 6.00 Teaching Visual Arts in the Intermediate Senior Division. This course examines the philosophy and methods of art education in relation to students in the Intermediate Senior Division. Curriculum development, the organization and evaluation of lessons, learning resources and materials, problems in art education, and strategies of art teaching are among the pertinent areas studied. Other areas of concern are determined by the interaction of the instructors, adjunct professors, and candidates. Faculty lectures, candidate presentations, assigned readings, class discussions and visiting artists and educators contribute to the exchange of knowledge.

The School of Engineering within the Faculty of Science and Engineering offers an Honours bachelor of applied science (BASC Honours) degree in engineering. After completion of a common first-year program, students will choose one of three available programs: computer engineering, geomatics engineering or space engineering.

Courses in Engineering

SC/ENG 1000 6.00 Introduction to Engineering Design. Engineering design and professional practice within economic, health, safety, environmental, social and other constraints, including case studies, teamwork, 3D modeling, and a team design project. Communication skills are emphasized, including a mandatory writing workshop. Three lecture hours per week. Two terms. Six credits. Note: Open only to students in the Engineering program.

SC/ENG 2000 6.00 Engineering Design II. Design using engineering materials (mechanical, electronic, magnetic, thermal and optical properties of materials, structural mechanics) and management and economics of engineering projects (workspace safety, work breakdown structures, Gantt charts, logic diagram, time value of money, comparison methods). Group design projects. Three lecture hours per week. Two terms. Six credits. Prerequisites: Completion of first year engineering common core.

SC/ENG 2110 2.00 Geomatics and Space Engineering. Introduction to geodesy and geomatics engineering: surveying, geodesy, hydrography, space geodesy and geodynamics, photogrammetry and digital mapping. A survey of communications, remote sensing and geodetic satellites, their engineering characteristics, payloads and use; features of Low Earth Orbiter (LEO) missions. One and one-half lecture hours per week, one and one-half laboratory hours per week. One term. Two credits. Prerequisites: SC/EATS 1010 3.00; SC/PHYS 1010 6.00; or permission of the course instructor.

Cross-listed to: SC/EATS 2610 2.00, SC/ENG 2110 2.00

SC/ENG 2120 4.00 Fundamentals of Surveying. Coordinate systems, conventions and transformations. First and second geodetic problem: trig sections, traverses, eccentricities, areas. Distance measurements, angular measurements, heights. Topographic mapping and property surveys. Route surveying. Introduction to other surveys: alignment, deformation surveys for buildings, bridges, dams, tunnels, pipelines. Three lecture hours per week and three laboratory hours per week. One term. Four credits. Prerequisites: SC/EATS 1010 3.00; SC/MATH 1014 3.00; SC/MATH 1025 3.00; SC/EATS 2610 2.00 or SC/ENG 2110 2.00; or permission of the course instructor.

Cross-listed to: SC/EATS 2620 4.00, SC/ENG 2120 4.00

SC/ENG 2130 3.00 Field Surveys. A two-week field camp comprising field and office work that simulate professional practice. Students participate in organizational, planning, scheduling and logistical aspects of field operations, instrument familiarization and testing, establishment of geodetic control, and land boundary, highway and construction surveys. Two-week field surveys. No lecture. Three credits. Prerequisite: SC/EATS 2620 4.00 or SC/ENG 2120 4.00.

Cross-listed to: SC/EATS 2630 3.00, SC/ENG 2130 3.00

SC/ENG 3000 3.00 Professional Engineering Practice. An introduction to the legal and ethical frameworks of the engineering profession, preparing students for the Professional Practice Examination required for certification as a professional engineer. Also covered are associated professional issues such as entrepreneurship, intellectual property and patents. Three lecture hours per week. One term. Three credits. Prerequisites: Second-year engineering courses (stream specific), including SC/ENG 2000 6.00 plus SC/ENG 1000 6.00.

SC/ENG 3000 3.00 Professional Engineering Practice. An introduction to the legal and ethical frameworks of the engineering profession, preparing students for the Professional Practice Examination required for certification as a professional engineer. Also covered are associated professional issues such as entrepreneurship, intellectual property and patents. Three lecture hours per week. One term. Three credits. Prerequisites: Second-year engineering courses (stream specific), including SC/ENG 2001 3.00 plus SC/ENG 1000 6.00.

SC/ENG 3110 4.00 Geodetic Concepts. Geodesy. Reference systems, frames and datums; time systems; the natural system of coordinates; terrestrial, celestial and orbital coordinate systems. Coordinate system transformations. Relative three dimensional positioning; the inertial frame of reference. Positions on the ellipsoid and mapping plane. Height systems. Three lecture hours and three hours of laboratory exercises per week. One term. Four credits. Prerequisites: SC/EATS 2610 2.00 or SC/ENG 2110 2.00; SC/EATS 2620 4.00 or SC/ENG 2120 4.00; AK/AS/SC/MATH 2015 3.00; AK/AS/SC/CSE 2501 1.00 (formerly COSC). Corequisite: SC/EATS 3620 4.00 or SC/ENG 3120 4.00.

Cross-listed to: SC/EATS 3610 4.00, SC/ENG 3110 4.00

SC/ENG 3120 4.00 Adjustment Calculus. Minima and maxima of functions, Weierstrass theorem, Lagrange multipliers. Quadratic forms.

Observables, observations, parameters and mathematical models. The least squares principle; weight matrix and variance factor; parametric, condition and combined adjustments. Three lecture hours and three hours of laboratory exercises per week. One term. Four credits. Prerequisites: AK/AS/SC/MATH 1025 3.00; AK/AS/SC/MATH 2015 3.00; SC/EATS 2620 4.00 or SC/ENG 2120 4.00; AK/AS/SC/CSE 2501 1.00 (formerly COSC). Corequisite: SC/EATS 3610 4.00 or SC/ENG 3110 4.00.

Cross-listed to: SC/EATS 3620 4.00, SC/ENG 3120 4.00

SC/ENG 3130 4.00 Analysis of Overdetermined Systems. Hilbert space and statistics. Statistical testing and assessment of observations, parameters and mathematical models. Optimal design. Generalized adjustment, problems with constraints and singularities, step-by-step procedures, Kalman filtering, least-squares collocation. Three lecture hours and three hours of laboratory exercises per week. One term. Four credits. Prerequisites: AS/SC/GEOS 2420 3.00, SC/EATS 3610 4.00 or SC/ENG 3110 4.00, SC/EATS 3620 4.00 or SC/ENG 3120 4.00.

Cross-listed to: SC/EATS 3630 4.00, SC/ENG 3130 4.00

SC/ENG 3140 4.00 Geodetic Surveys. Instrument systems and procedures for high-precision geodetic surveys. High-precision surveys in engineering physics; geodetic network densification, adjustment and analysis; procedures for deformation surveys and strain analysis. Establishment and observation of control networks for construction and monitoring of large engineering structures. Three lecture hours and three hours of laboratory exercises per week. One term. Four credits. Prerequisites: SC/EATS 2620 4.00 or SC/ENG 2120 4.00, SC/EATS 2630 3.00 or SC/ENG 2130 3.00, SC/EATS 3610 4.00 or SC/ENG 3110 4.00; SC/EATS 3620 4.00 or SC/ENG 3120 4.00 Corequisite: SC/EATS 3630 4.00 or SC/ENG 3130 4.00.

Cross-listed to: SC/EATS 3640 4.00, SC/ENG 3140 4.00

SC/ENG 3150 4.00 Photogrammetry. Image and object space. Direct and inverse problems of projective and similarity coordinate transformations. Collinearity and coplanarity. Orientation procedures. Measurement and correction of image coordinates. Stereomodel formation and error analysis. Analog, analytical, independent model, strip and block adjustments. Image rectification. DEM generation. Digital Mapping Applications. Project planning. Three lecture hours and three hours of laboratory exercises per week. One term. Four credits. Prerequisites: SC/EATS 2620 4.00 or SC/ENG 2120 4.00; SC/EATS 3620 4.00 or SC/ENG 3120 4.00. Corequisite: SC/EATS 3630 4.00 or SC/ENG 3130 4.00.

Cross-listed to: SC/EATS 3650 4.00, SC/ENG 3150 4.00

SC/ENG 3160 3.00 Advanced Field Surveys. A two-week camp comprising field and laboratory work. It involves organizational, planning, scheduling and logistical aspects of high precision field operations related to engineering physics, establishment and observation of control networks for construction and monitoring large engineering structures. Two week field surveys. No lectures. Prerequisites: SC/EATS 3640 4.00 or SC/ENG 3140 4.00.

Cross-listed to: SC/EATS 3660 3.00, SC/ENG 3160 3.00

SC/ENG 3310 3.00 Space Mission Design. This course covers the basic aspects of space mission design including: mission types, objectives, technical readiness, risk mitigation, subsystems, and public outreach. Three lecture hours. Prerequisites: SC/ENG 2000 6.00 or permission of the instructor.

Cross-listed to: SC/ENG 3310 3.00, SC/PHYS 3310 3.00

SC/ENG 3320 3.00 Microsystems Technology. The course covers the principles and implementations of miniaturised sensors and actuators in a range of physical domains, such as optical, magnetic, thermal, and mechanical systems. Examples include electronic cameras, micro-electro-mechanical systems, thermal microsystems and display technologies. Three lecture hours. Prerequisite: SC/PHYS 2020 3.00; SC/PHYS 2211 1.00; SC/PHYS 2060 3.00 recommended; SC/PHYS 2212 1.00 recommended. Corequisite: SC/PHYS 3050 3.00 recommended.

Cross-listed to: SC/ENG 3320 3.00, SC/PHYS 3320 3.00

SC/ENG 3330 3.00 Space Engineering Materials. This course covers the basic behaviour and processing of engineering materials. The emphasis is on metals and alloys plus discussion of ceramics, plastics and composites. Three lecture hours. Prerequisite: SC/ENG 2000 6.00 or permission of the instructor.

Cross-listed to: SC/ENG 3330 3.00, SC/PHYS 3330 3.00

SC/ENG 3900 0.00 Engineering Internship Term. The industrial internship provides students with the opportunity to work in the engineering field as part of their honours degree program as part their honours degree program as part of the Technology Internship Program. The Internship Office will coordinate placement of students with a specific internship position. Prerequisites: Students must have successfully completed at least nine core engineering credits at the 3000 level within the previous two terms, including SC/ENG 3000 3.00 (Professional Engineering Practice), with an overall grade point average (G.P.A.) of at least 5.00 over all courses completed. To qualify, the student must attend all mandatory preparatory sessions as outlined by the Technology Internship Program. Note: This course does not count for degree credit in any program. Registration in sections of SC/ENG 3900 0.00 while on an internship placement provides a transcript notation of the student's participation in the internship program. Students are required to register in this course in every term of their work term (internship). Every student registered in the course will be assigned a Faculty Supervisor who will assess the student's performance during the internship.

SC/ENG 3900 0.00 Engineering Internship Term. The industrial internship provides students with the opportunity to work in the engineering field as part of their honours degree program as part their honours degree program as part of the Technology Internship Program. The Internship Office will coordinate placement of students with a specific internship position. Prerequisites: Students must have successfully completed at least nine core engineering credits at the 3000 level within the previous two terms, including SC/ENG 3000 3.00 (Professional Engineering Practice), with an overall grade point average (G.P.A.) of at least 5.00 over all courses completed. To qualify, the student must attend all mandatory preparatory sessions as outlined by the Technology Internship Program. Note: This course does not count for degree credit in any program. Students are required to register in this course in every term of their work term (internship). Every student registered in the course will be assigned a Faculty Supervisor who will assess the student's performance during the internship.

SC/ENG 4000 6.00 Engineering Project. The project will include significant elements of design and implementation. The format is intended to resemble engineering projects in practice, including specifications, background research, innovative solutions, analysis, testing and communication. Two terms. Six credits. Prerequisites: 21 3000-level science or engineering (SC) credits in the Engineering Program, exclusive of SC/ENG 3000 3.00. Prerequisite or corequisite: SC/ENG 3000 3.00.

SC/ENG 4110 3.00 Global Positioning Systems. Positioning by space vehicles. Coordinate systems and transformations. GPS, GLONASS, GALILEO, Satellite Laser Ranging, Very Long Baseline Interferometry. Positioning of moving vehicles and platforms: marine, land, airborne and space vehicles. GPS/INS integration. Real time kinematic applications. Three lecture hours weekly and three hours of laboratory exercises every other week. One term. Three credits. Prerequisites: SC/EATS 3020 3.00; SC/EATS 3610 4.00 or SC/ENG 3110 4.00; SC/EATS 3620 4.00 or SC/ENG 3120 4.00; or permission of the course director.

Cross-listed to: SC/EATS 4610 3.00, SC/ENG 4110 3.00

SC/ENG 4120 3.00 Physical and Space Geodesy. Local treatment of the Earth's gravity field. Boundary value problems. Normal and disturbing potential, the normal gravity formula. Geoid, geoidal undulations, deflections of the vertical. Stokes and Vening Meinesz formulae. Gravimetry and gravity reductions. Height systems. Tides. Gravity space missions. Three lecture hours weekly and three hours of laboratory exercises every other week. One term. Three credits. Prerequisites: SC/EATS 3020 3.00; SC/EATS 3610 4.00 or SC/ENG 3110 4.00; SC/EATS

3620 4.00 or SC/ENG 3120 4.00; SC/EATS 4610 3.00 or SC/ENG 4110 3.00.

Cross-listed to: SC/EATS 4620 3.00, SC/ENG 4120 3.00

SC/ENG 4130 3.00 Digital Imaging and Applications. Digital imaging from remote platforms. Image processing and analysis, including radiometric and geometric corrections and geometric enhancements, multispectral classification, digital photogrammetry fundamentals, workstations, photogrammetric processing. Two lecture hours and three hours of laboratory exercises per week. One term. Three credits. Prerequisites: SC/EATS 3650 4.00 or SC/ENG 3150 4.00; SC/EATS 4220 3.00.

Cross-listed to: SC/EATS 4630 3.00, SC/ENG 4130 3.00

SC/ENG 4140 3.00 Digital Terrain Models and Lidar Applications. Digital Terrain Modelling concepts. Mathematical techniques in data acquisition, processing, storage, manipulation and applications. DTM. Surface representation using moving averages, linear projection and Kriging techniques. Grid resampling methods and search algorithms. DTM derivatives and applications. LIDAR systems and applications. Two lecture hours and three hours of laboratory exercises per week. One term. Three credits. Prerequisites: SC/EATS 2620 4.00 or SC/ENG 2110 2.00; SC/EATS 3620 4.00 or SC/ENG 3110 4.00.

Cross-listed to: SC/EATS 4640 3.00, SC/ENG 4140 3.00

SC/ENG 4150 3.00 Hydrography. Hydrography and its role in offshore management. Elements of oceanography, tides and water levels, seabed and sea water properties. Underwater acoustics. Bathymetric and imaging methods. Marine positioning and navigation. Three lecture hours and three hours of laboratory exercises per week. One term. Three credits. Prerequisite: SC/EATS 4610 3.00 or SC/ENG 4110 3.00.

Cross-listed to: SC/EATS 4650 3.00, SC/ENG 4150 3.00

SC/ENG 4160 3.00 Cadastral Surveys and Land Registration Systems. Cadastral systems, survey law and the role of the professional land surveyor. The Dominion Lands Survey System and Land Surveys Acts and Regulations. Cadastral surveys, including surveys of Canada lands for aboriginal land claims and coastal boundaries. Land registration systems in Canada. Three lecture hours and three hours of laboratory exercises per week. One term. Three credits. Prerequisite: SC/EATS 2620 4.00 or SC/ENG 2120 4.00.

Cross-listed to: SC/EATS 4660 3.00, SC/ENG 4160 3.00

SC/ENG 4170 3.00 Survey Law. Property boundaries, survey monuments, party walls, fences, future issues. Natural boundaries formed by waters and the right of access. Property title issues, legislation, and standards of practice. Prerequisites: SC/EATS 4660 3.00 or SC/ENG 4160 3.00.

Cross-listed to: SC/EATS 4670 3.00, SC/ENG 4170 3.00

SC/ENG 4330 3.00 Radio Science and Techniques for Space Exploration. The theory and application of modern radio science and radio techniques in space exploration and space navigation. Topics include signal processing, radio astronomy fundamentals, Deep Space Network instrumentation, antenna theory, arrays, Very Long Baseline Interferometry, spacecraft navigation, radar systems, range, range rate and the radar equation. Integrated with: GS/PHYS 6190 3.00. Prerequisite: SC/PHYS 3250 3.00.

Cross-listed to: SC/ENG 4330 3.00, SC/PHYS 4330 3.00

SC/ENG 4350 2.00 Space Hardware. Primarily a laboratory course with modules focusing on communications and data transfer technologies typically used in spacecraft operations or integration and testing. Three laboratory hours per week with some lecture hours, added to refresh theoretical concepts. Prerequisites: AK/AS/SC/CSE 1540 3.00 or AK/AS/SC/CSE 2031 3.00 or equivalent programming experience; SC/PHYS 3150 3.00; SC/PHYS 3250 3.00. Corequisite: SC/ENG/PHYS 4330 3.00

Cross-listed to: SC/ENG 4350 2.00, SC/PHYS 4350 2.00

SC/ENG 4360 3.00 Payload Design. A survey of typical applications of spacecraft technology including communications systems, location

systems, terrestrial applications and exploration missions. Prerequisites: SC/PHYS 3050 3.00; SC/PHYS 3280 3.00 or SC/ENG 3310 3.00 or SC/PHYS 3310 3.00.

Cross-listed to: SC/ENG 4360 3.00, SC/PHYS 4360 3.00

SC/ENG 4550 3.00 Control Systems. An introduction to the analysis and design of control systems. Topics include: modeling of continuous systems; stability theory; analysis and design of feedback control systems in time and frequency domains. Prerequisites: AS/SC/MATH 2015 3.00; AS/SC/MATH 2271 3.00 or AK/AS/SC/CSE 3451 3.00.

Cross-listed to: SC/ENG 4550 3.00, SC/PHYS 4550 3.00

The English Department offers a variety of courses in the literature of the English language. There are courses in historical periods from medieval to contemporary, in the literature of several nations (Canadian and post-colonial as well as English and American), in the various literary genres such as poetry, fiction, drama, non-fictional prose and criticism and in literary theory. In addition, during their final 36 credits, Honours English majors may propose their own thesis (AS/EN 4160 6.00).

For specific program requirements, please consult the Faculty of Arts Programs of Study section of this calendar.

The department also offers an Honours BA in Professional Writing and a Specialized Honours BA in English and Professional Writing. For details, please consult the Faculty of Arts Programs of Study section of this calendar.

4000-Level Courses

Arts students:

Note: Honours students who have passed at least 54 but fewer than 84 credits may enrol in 4000-level courses only if they have written permission from the course director and the director of undergraduate studies in English.

Atkinson students:

Prerequisite for all English courses at this level is registration in an Honours program and 78 credits. For students with equivalent preparation, permission of the coordinator of English must be obtained.

Most of the following courses fall quite clearly into one or another of the required periods, as designated. Students taking courses not so designated may sometimes fulfill a period requirement by concentrating their work in a specific area, in consultation with the course director.

Note: Honours students may need a 4000-level course in a particular area to complete their degree. If such a course is not being offered in any given session, students should contact the coordinator of English.

GL/EN 4000 6.00 Honours Thesis. Students may prepare a thesis on a particular subject. They must have the agreement of a member of the department to direct the thesis and of a second reader to aid in evaluation. The names of the faculty members and the title of the thesis should be registered with the Office of Student Programs. For further information, please consult the Chair of the department.

The fictions of three or four storytellers who have produced a considerable body of significant works, such as Faulkner, Fitzgerald, Hemingway, Oates, Beattie, Callaghan père, Laurence and Munro. Prerequisite for all English courses at this level is registration in an Honours program and 78 credits. For students with equivalent preparation, permission of the coordinator of English must be obtained. In addition, students must have taken a 3000-level English course in fiction or Canadian or American literature. Course credit exclusion: AK/EN 4060 6.00 (prior to Summer 2001).

AK/EN 4879 6.00 Seminar in Literary Theory. Selected 20th century methods of literary analysis in relation to their theoretical and philosophical foundations. Topics may include aesthetics, design, linguistics, stylistics, structuralism, discourse analysis, hermeneutics, deconstructionism, psychoanalysis, Marxism, feminism, phenomenology and reader-response. Prerequisite for all English courses at this level is registration in an Honours program and 78 credits. For students with equivalent preparation, permission of the coordinator of English must be obtained. Course credit exclusions: AK/EN 4130 6.00 (prior to Fall/Winter 2002-2003), AS/EN 4106 6.00.

AS/EN 4900 3.00 Substantive Editing. The course addresses the problems of developing a text to the point at which it is deemed publishable. It trains student to diagnose problems with voice, continuity and accuracy. It addresses cutting the too-long manuscript and the issues involved in rewrites. Course credit exclusions: None.

AS/EN 4910 3.00 Two Problem Texts. The course examines two recently published books from the ground up, examining design, editing, marketing, reviews and other forms of audience response. The point is to examine what was done and what might, or should, have been done differently. Course credit exclusions: None.

AK/EN 4945 6.00 Alice Munro and Grace Paley: Masters of the Short Story. Canadian Alice Munro and American Grace Paley, acclaimed masters of the short story and near contemporaries, will be examined in relation to their subject matter, literary techniques, and the cultural context of their writing, to illuminate each writer's unique achievement. Prerequisite for all English courses at this level is registration in an Honours program and 78 credits. For students with equivalent preparation, permission of the coordinator of English must be obtained. Course credit exclusion: None.

AK/EN 4950 6.00 Contemporary Canadian Women Writers. Poetry, drama and fiction by Canadian women writers of recent decades including works by French Canadian authors in translation. Prerequisite for all English courses at this level is registration in an Honours program and 78 credits. For students with equivalent preparation, permission of the coordinator of English must be obtained. Course credit exclusion: AK/EN 4070 6.00 (prior to Summer 2001).

AS/EN 4951 3.00 Practical Poetics: A Workshop Seminar. This course is designed to explore in practical workshop conditions and in the

forms of creative writing and theoretical debate, material covered in the second term of Introduction to Poetics, AS/EN 2130 6.00. Prerequisite or corequisite: AS/EN 2130 6.00, or permission of the course director. Course credit exclusions: AS/EN 2140 3.00 (prior to Fall/Winter 2003-2004).

C. Fraser, C212 York Hall, 416-487-6713

Students wishing or required to take English as a second language (ESL) courses must meet with an adviser in ESL before enrolling. Native users of English are not eligible to enrol in ESL courses except under special circumstances (e.g. English as a second dialect) and with the permission of the director of the ESL program. Advanced students at the 3000 level normally take a minimum of three ESL credits and a maximum of 12 ESL credits.

ESL in the English major: No more than six ESL credits, to be taken at the 3000 level, may be counted towards a major in English. These ESL credits may be counted as part of the 3000-4000 level requirement in the bachelor of arts degree program but not in the Honours BA.

Courses in English as a Second Language

AK/ENSL 1450 6.00 Thinking about Contemporary Canada. Examines how writers, filmmakers, singers and philosophers understand Canada at the end of the 20th century. Emphasizes a range of voices, both rooted in Canada and immigrant, and on issues critical to arrival, belonging and the idea of nation. Note: This course comprises the English as a second language requirement for incoming English as a second language students. It may be counted as fulfilling the general education humanities requirement or as an elective credit. Course credit exclusion: None.

Cross-listed to: AK/ENSL 1450 6.00, AK/HUMA 1745 6.00

GL/ENSL 1800 6.00 Foundations in English Grammar. This course provides opportunities for English as a second language students at a beginning level of proficiency, to learn the fundamentals of English grammar. Individual and group written and oral practice is provided. Course credit exclusion: AK/ENSL 1450 6.00.

GL/ENSL 2310 3.00 English Non-Literary Texts. A course for students of English as a second language, based on the study of contemporary non-literary texts. Attention will be given to vocabulary, grammar skills in reading and writing.

GL/ENSL 2400 3.00 English in Performance: Dramatic Arts. A study of English as exemplified through plays, improvisation and role-play, for students of English as a second language. Particular attention will be given to stress, rhythm, intonation and speech styles.

GL/ENSL 2410 3.00 English in Performance: Media. A study of contemporary spoken English through selected exposure to various non-print media, for students of English as a second language.

GL/ENSL 2700 6.00 ESL: Academic Foundations. The goal of this course is to improve English language and academic skill proficiency to enable students on completion of the course to function adequately in academic courses given in English at the University.

GL/ENSL 3501 3.00 Varieties of English Writing. The course is designed for advanced English as a second language students, to develop their writing skills in English by juxtaposing creative writing assignments with other varieties of writing.

GL/ENSL 3502 3.00 Functional Writing. This course examines the main functions of written English outside literature-description, exposition, criticism, persuasion-in various modes (essay, opinion-piece, pamphlet, letter) and leads to the production by students of such texts.

GL/ENSL 3510 3.00 Modes of Communication. Study of processes in human communication (verbal/non verbal) to develop a framework for analyzing the language and social conventions underlying communication in such areas as interpersonal relations, business, the arts, academia, mass media. Focus on interpretative and productive expertise. Prerequisites: Advanced level placement on Glendon English Language Placement Test or equivalent.

GL/ENSL 3700 3.00 Studies in English Literature. The course gives advanced English as a second language students the opportunity to develop their experience of English language and culture through the study of literary texts.

GL/ENSL 3800 3.00 Dealing With Viewpoint. A course on the nature, construction and interpretation of argument, focusing on a broad variety of texts from different sources including academic and public documents and several kinds of media. Development of appropriate language resources for academic tasks.

AS/ESL 1000 9.00 Canadian Language and Culture. This course develops the linguistic/academic skills of students from English as a second language backgrounds, using themes such as language and communication, culture and identity, the immigrant/refugee experience, multiculturalism, Canada's aboriginal peoples and Quebec. A variety of course activities develop course themes and language proficiency. Course credit exclusions: None.

Cross-listed to: AS/ESL 1000 9.00, AS/HUMA 1220 9.00

AS/ESL 2000 6.00 English in Use. This course provides opportunities for students to develop their English language skills while learning more about the varieties of written and spoken English. Students learn to analyze both spoken and written texts as connected discourse and become familiar with some of the ways in which literary and non-literary texts can be examined. Prerequisite: AS/ESL 1000 9.00 or permission of the department.

Assistant Professors:

T. Drezner, C.J. Lortie, R. Quinlan, T. Rimmel

Environmental science encompasses the study of the major natural interacting systems of climate, water, biota and landforms and the effects

of human activities on these systems. The program provides students with a broad interdisciplinary education which is organized around the field of environmental science rather than being focused on a single academic discipline. It equips students with scientific knowledge and understanding of several environmental systems so that they can effectively analyze and deal with complex environmental problems.

Students are required to focus their studies on one of two streams (physical sciences and life sciences) and complete a set of core courses which provide a minimum breadth in both the physical and life sciences.

For specific requirements of the BSc Specialized Honours program in Environmental Science and for the list of courses, see the Faculty of Science and Engineering Programs of Study section of this calendar.

The Faculty of Environmental Studies offers both the BES Specialized Honours program (120 credits) and the BES program (90 credits). Both of these programs introduce students to the links between the exploitation of the natural world and justice issues related to class exploitation, racism and gender inequity. Fully aware of the growing interdependencies of human and natural life-worlds in a globalized environment, the Faculty of Environmental Studies believes that an inclusion of non-Western perspectives is essential to a fruitful discussion of all environmental issues. To that end, the Faculty strives to include a broad range of perspectives in its course offerings. The York University BES program is designed to equip students with the knowledge and understanding to deal effectively yet sensitively with complex environmental and social problems arising at the local, national or global scale. In this light, the BES program offers:

- interdisciplinary expertise to understand and solve environmental problems;
- opportunities to develop specific skills and for in-depth learning;
- a wide range of courses covering the humanities, social sciences and environmental science;
- an outlook that includes local and global, philosophical and applied questions;
- an emphasis on bringing theoretical and practical matters together in the classroom;
- the knowledge and skills need for environmental careers and graduate studies;
- an atmosphere in which students know that learning matters.

Note: A BES program handbook is available each spring in the FES Undergraduate Office of Student and Academic Services (137 HNES Building) or on the Faculty of Environmental Studies Web site at: <http://www.yorku.ca/fes/>.

Courses in Environmental Studies

ES/ENVS 1000 6.00 Perspectives in Environmental Studies. This course is designed to provide students with a perspective or framework of understanding for Environmental Studies at the broadest level. The course introduces students to environmental issues, using the urgent, emerging prospect of the fate of the "Earth in our hands" as the organizing ethical, scientific, and practical theme. Lecture and tutorial topics will range over a number of environmental approaches, drawing on a diversity of arts and sciences, including environmental history, environmental ethics, ecology, economics, and planning, emphasizing the fact that Environmental Studies is fundamentally an attempt to integrate the study of the natural world with the study of the human dimensions of that world. Course credit exclusions: ES/ENVS 1000 6.00 (prior to 2003).

ES/ENVS 1010B 3.00 Seeing Green: Popular Culture, Global Media and the Representation of Nature. Our world is saturated with communications experiences often described collectively as "popular culture". This course examines how a variety of media texts within this popular culture helps to shape, redefine, and reconstruct our understanding of nature, the environment, and environmentalism.

ES/ENVS 1010C 3.00 Scaly, Brown, Furry and Green: The Natural History of the GTA and Southern Ontario. Curious about your critter neighbours? With a focus on discovery through outdoor experience and hands-on activities, this course will provide students with the opportunity to learn about the habitats and wildlife in our common backyard—the Greater Toronto Area.

ES/ENVS 1010D 3.00 Eating Local: Food and Agriculture in the GTA. This course examines the Greater Toronto food system and its interrelationships with regional, national and global food systems. Food policy and planning issues are explored by following food production, distribution and consumption paths within and beyond the city.

ES/ENVS 1200 6.00 Taking Action: Engaging People and the Environment. Students learn to identify, research, and act on local/global issues of environmental and social justice. Working in small groups, they develop basic skills in collaborative research, social analysis, action planning and creative communications. The workshop introduces them to the praxis pedagogy of the program, connects them to organizations addressing the issues, and culminates in actions and presentations.

ES/ENVS 1500 6.00 Introduction to Environmental Science: The Web of Life. The course provides an introduction to the elements of physics, chemistry, biology and ecology that are necessary for the study of environmental problems. It also acquaints students with techniques (including computer techniques) for the description, organization and display of quantitative data. Note: This course is not intended for students who have both Grade 12 Biology and Chemistry. Students are encouraged to speak to their academic adviser about an alternative course.

ES/ENVS 1800 6.00 Environmental Writing / Writing the Environment. Introduces students to a range of modes of writing in environmental studies. In the process of reading, discussing, and practicing different kinds of environmental writing, students will develop a variety of writing skills in addition to an appreciation of writing as an important form of environmental action. The course also considers writing in relation to oral traditions and newer technologies. Prerequisite: First-year specialty or permission of the instructor. Note: This course is not intended for ESL students.

ES/ENVS 2009 3.00 Quantitative Methods in Environmental Studies. An introduction to the skills necessary to pursue and understand statistical data analysis. Topics include: graphing, frequency distributions, measures of central tendency, an introduction to probability, statistical inference, hypothesis testing and bivariate regression. Statistical software will be utilized to perform data analysis on the computer. Course credit exclusion: ENVS 3009 3.00.

ES/ENVS 2100 6.00 Foundations in Environment and Culture: Philosophy, Arts, Technology, and Education. This foundational course enables students to develop a rigorous engagement with some of the complex dimensions of environmental culture, and to develop their abilities as engaged cultural actors in varied environmental milieu - as artists, critics, scholars and educators. In addition to learning how to read texts and situations critically and carefully, students will develop a cross-cultural, cross-disciplinary, environmentally-grounded array of creative skills. The course prepares students to address such issues as: the historical, conceptual and philosophical dimensions of environmental problems; the co-development of social, technological and ecological histories in particular places and globally; the cultural production of environmental issues in literature, the arts and popular culture; relations among nature science and technology in such areas as biotechnology or animal rights; the transformation of environments through literary, visual and performing arts; critical analysis of representations of nature and media literacy; and the contemporary range of environmental and social discourses in diverse cultural and disciplinary traditions and practices. Course Credit Exclusion: ES/ENVS 2100 3.00.

ES/ENVS 2122 3.00 Community Arts for Social Change. An introduction to community-based creative practices integral to social change in different historical and cultural contexts. These practices are examined in terms of their form, content, production, and reception from interdisciplinary perspectives.

Cross-listed to: ES/ENVS 2122 3.00, FA/FACS 2122 3.00

ES/ENVS 2150 3.00 Environment, Technology and Sustainable Society. The course introduces the various technical, socio-political and philosophical issues associated with the concept of sustainable society. Emphasis is placed on the analysis of the complex relationship between humans, technology, nature, ideology and the social infrastructure. Prerequisite: Second-year standing or by permission of the instructor. Note: ES/ENVS 2150 3.00 is not open to ES/ENVS students.

ES/ENVS 2200 6.00 Foundations of Urban and Regional Environments: Analysis, Planning, and Design. Focuses on the interrelationships of the ecological, social, built and organizational environments within the urban and regional setting. It provides a critical understanding of urban and regional environments along with a solutions-based approach to addressing urban and regional issues with an explicitly environmental perspective. With the Greater Toronto Area as a field laboratory, there will be an emphasis on application and involvement. Prerequisite: Second year standing or permission of the instructor. Course credit exclusion: ES/ENVS 2200 3.00.

ES/ENVS 2300 6.00 Foundations of Environmental Politics: Development, Globalization, and Justice. Examines how communities and environments are being dramatically transformed by the globalization of economies and cultures. It analyzes the reasons for this transformation as well as responses to them at local, regional, national and international levels. It explores competing approaches to environmental politics, development and justice that are being formulated and put into practice by a variety of governmental, non-governmental and international actors. Prerequisite: Second year standing or permission of the instructor. Course credit exclusion: ES/ENVS 2300 3.00.

ES/ENVS 2400 6.00 Foundations of Environmental Management: Policy, Resources and Conservation. Drawing on the natural and social sciences, this course examines the role of policy and management strategies in addressing environmental, nature resource and conservation challenges, in ways supportive of sustainable development. It provides an overview of the concepts, knowledge and skills that are needed to be effective in environmental policy and management in government, business and not-for-profit sectors. Prerequisite: Second-year standing or by permission of the instructor. Course credit exclusion: ES/ENVS 2400 3.00.

ES/ENVS 2410 3.00 The Science of Pollution: Impacts on the Environment and Human Health. Introduces students to the major scientific concepts and principles that govern the origin, fate and effect of pollutants in the environment. Topics include fossil fuel and alternative energy sources, atmospheric pollution, heavy metal and pesticide

toxicology, organic sewage, and endocrine disrupters. Further objectives of this course are to develop students' ability to analyze, manipulate, present and interpret scientific data and to develop the students' ability to review and critique scientific reports on scientific problems. Prerequisite: Second year standing and permission of the instructor. Course credit exclusion: ES/ENVS 2500 6.00.

ES/ENVS 2420 3.00 Ecology and Conservation Science. Presents the main scientific concepts and principles of ecology and conservation science that are applicable to environmental problems frequently encountered in Environmental Studies. Topics include diagnosing species declines, conservation genetics, ecology of invasive species, habitat fragmentation, national parks, and ecotourism. Prerequisite: Second year standing and permission of the instructor. Course credit exclusion: ES/ENVS 2500 6.00.

ES/ENVS 3000 3.00 Environmental Ethics and Epistemology. This course identifies, examines, and compares ethical perspectives from diverse traditions with a particular focus on the interplay of ethics and epistemology, and metaphysical issues and their relationship to underlying cultural, environmental, and spiritual values. Individual ethics and practical applications in "living a good life" will be explored. Prerequisite: Third or fourth year standing and completion of six credits in ES/ENVS, or permission of the instructor.

ES/ENVS 3010 3.00 Qualitative Methods in Environmental Studies. After a discussion of the logic of qualitative research, selected qualitative methods will be examined in detail. Topics include: field research, participant and non-participant observation, interviews, oral history, field experiments, participatory action research, non-obtrusive research, grounded theory and the analysis of qualitative data. Prerequisite: Third or fourth year standing and completion of six credits in ES/ENVS, or permission of the instructor.

ES/ENVS 3011 3.00 Introduction to Senior Honours Work. Prepares students for their fourth year Senior Honours Work around selected interdisciplinary themes proposed by faculty members around their research interests. Sections organized by faculty members will explore appropriate methods and will help students develop proposal for major papers or major projects that relate to the theme. This course lays the groundwork for ES/ENVS 4000 6.00, Senior Honours Work Seminar. Prerequisite: Third-year standing with ES/ENVS as Major 1. Note: Third year standing means that the student has completed 54 or more credits that are eligible towards a BES degree. This course is a prerequisite to ES/ENVS 4000 6.00 Senior Honours Work Seminar.

ES/ENVS 3110 3.00 Scientific Knowledge and Environmental Issues. Explores links between environmental science and its application to identifying and resolving environmental issues. It starts with an examination of the nature of scientific knowledge. Case studies then critically examine scientific knowledge, in particular how environmental scientific knowledge, has or has not affected environmental policies, environmental programs and the state of the environment and how they, in turn, affect the production of scientific knowledge. Prerequisite: Third or fourth year standing and completion of six credits in ES/ENVS, or permission of the instructor.

ES/ENVS 3120 3.00 Environmental History. Examines the culture-environment relationship in historical perspective. The focus is on ways in which social change is triggered by environmental change and vice-versa. Case studies illustrate general patterns of change, such as those associated with the introduction of alien species, new modes of agricultural production. Prerequisite: ES/ENVS 2100 3.00, or ES/ENVS 2100 6.00, or permission of the instructor.

ES/ENVS 3122 3.00 Community Arts Practice Preparatory Workshop. Lays the groundwork for the fourth-year Community Arts Practice Practicum (ENVS 4122/FACS 4122 6.00). Students identify socially-based projects with cultural organizations or community groups and negotiate an agreement to develop a collaborative cultural production over the subsequent year. Prerequisite: FA/FACS 2122 3.00. Community Arts for Social Change.

Cross-listed to: ES/ENVS 3122 3.00, FA/FACS 3122 3.00

ES/ENVS 3125 3.00 Popular Education for Environmental and Social Justice. Students explore the key notions of popular education related to knowledge and power, and various forms of anti-oppression practice addressing racism, sexism, classism, homophobia, ableism, and human/non-human domination in the context of organizations and movements for social and environmental justice in a globalizing and diasporic context.

ES/ENVS 3130 3.00 Energy & The Environment. The course focuses on relationships between socio-economic development, energy use, and the environment in Canada. Energy sources, energy end use, energy technology, and energy institutions as well as the social and ecological impacts of energy use are examined. Energy systems supportive of sustainable development are explored. Prerequisite: Third or fourth year standing, or permission of the instructor.

ES/ENVS 3140 3.00 Environmental and Sustainability Education. Explores concepts and practices in environmental education in the widest sense, comprising formal, informal and aboriginal education ideas. The course takes a critical and historical and cultural approach to environmental education with an emphasis on developing and practising sustainable perspectives on how people learn about, think about and remember the natural environment. Prerequisite: Third or fourth year standing, or permission of the instructor.

ES/ENVS 3150 3.00 Human/Non-Human Animal Relations. Dwelling within the emergent field of animal studies, this course will consider a diverse range of human relationships to other animals. The foundation of the course is a contemporary, post-Cartesian vision of animals, with an emphasis on the relational knowledge that is made about, and between humans and other animals from a cultural and environmental studies perspective. The course enables students to develop a creative and rigorous engagement with some of the complex dimensions of such issues as: the historical and philosophical scope of animals studies; animal agency, sociality and consciousness; animal representations in literature, the arts and popular culture; animal advocacy, social movements and humane education; and animal questions in science and technology. Prerequisite: Third or fourth year standing, or permission of the instructor.

ES/ENVS 3151 3.00 Environmental Politics & Advocacy I. Introduces students to a range of approaches and issues in environmental politics and advocacy. Themes include: political dimensions of contemporary environmental problems; main currents in environmental political thought; and relations between governmental and non-governmental organizations in environmental advocacy. Prerequisite: Third or fourth year standing and completion of any environmental studies course, or permission of the instructor.

ES/ENVS 3160 3.00 Race/Racism and Environmental Justice. Examines the intersection of "race"/racism and environmentalism. It begins from the premise that environmental issues are always already racialized. Issues as diverse as toxic facility siting, environmental assessment practices, ecological philosophies, and popular nature representations (re)produce powerful assumptions that turn on racist/racialized constructs. Discussion may include: the history and current practices of environmental justice movements; questions of race and representation in green politics; the significance of environmentalism's silence about race; cross-cultural and anti-racist environmental politics; and postcolonial perspectives on global environmental issues. Prerequisite: Third or fourth year standing.

ES/ENVS 3170 3.00 Indigenous Environmental Thought. This course will explore various Traditional Aboriginal processes of "coming to know" the environment. Students will be guided through an examination of these Aboriginal relationships, as they existed traditionally, through times of critical change, and into the present. The underlying theme of this course will focus on individual, regional, and national ways of "being and becoming" environmentally responsible moving outwards towards a Global responsibility. Prerequisite: Third or fourth year standing, or permission of the instructor. Pre-requisite: 3rd/4th year standing or permission of the instructor.

ES/ENVS 3225 3.00 Regional Governance. Regional governance includes the government and civic organization of all aspects of life in an (urban) region. This course introduces concepts of the region, regionalism,

regional government, and regional economic development. While the course has an international perspective, there will be a strong focus on historical and current regional governance in the Toronto urban region. Particular attention will be paid to issues related to environmental governance, bioregional issues and watershed planning and management. Prerequisite: Third or fourth year standing, or permission of the instructor. This course builds on ENVS 2200 6.00 which is recommended.

ES/ENVS 3226 3.00 Planning Environmentally. This course considers the potential for planning environmentally both within and outside the formal planning processes, and by and planners and non-planners alike. The relationships between planning and environmental issues are explored at different scales ranging from the neighbourhood to the urban region. Prerequisite: Third or fourth year standing, or permission of the instructor. This course builds on ENVS 2200 6.00 which is recommended.

ES/ENVS 3230 3.00 Restoration Ecology. This course explores the theoretical, biophysical and applied dimensions of restoration ecology. The course examines the circumstances surrounding policy, design and planning, and implementation of ecological restoration. It investigates many approaches (techniques and methods) enhancing the ecological integrity of degraded sites. The regional focus of the course is the Greater Toronto bioregion though lessons and experiences will relate to broader issues of ecological restoration.

ES/ENVS 3310 3.00 Tropical Conservation and Sustainable Development. A study of the theory and practice of conservation as applied to sustainable development in tropical environments. Emphasis on the integration of ecological, cultural and institutional dimensions in conservation practice for sustainability. Prerequisite: Third or fourth year standing and completion of six credits in ES/ENVS, or permission of the instructor.

ES/ENVS 3320 3.00 Sex, Gender, Nature: Ecofeminist Perspectives. This course acquaints students with literature and advocacy that celebrates 'intersections' between women/gender and nature. Attention is given to various approaches, and biological, social, cultural and spiritual perceptions, through course activities involving experience, reflection, creative representation, reading, discussion, and writing.

ES/ENVS 3340 3.00 Global Environmental Politics. Examines the interrelationship between globalization and environment. It analyzes the historical development of the global environmental system and theoretical approaches to understanding the global environment. It considers the main actors, institutions and legal instruments related to global environmental issues. The environmental impacts of, and political responses to, such phenomena as global warming, trade, structural adjustment, transnational corporate activity, foreign aid, environmental security, and biodiversity depletion are studied. Prerequisite: Third or fourth year standing and completion of six credits in ES/ENVS, or permission of the instructor.

ES/ENVS 3410 3.00 Environmental Policy I. The formulation of environmental policy is the focus its underlying scope, concepts, legal bases, methodologies. Case studies illustrate the interaction of environmental policy with other policy areas: foreign and trade policy, economic and social policy. Critical review of how policy is created participants, effects, burdens and benefits. Prerequisite: Third or fourth year standing, or permission of the instructor.

ES/ENVS 3420 3.00 Environmental Law. Introduction to basic legal concepts: sources of law, legal remedies, common law, administrative law. Planning acts, environmental protection acts and environmental assessment acts. Litigation processes, hearing boards, and their operation. Critical review of environmental legal concepts and their social, economic and environmental effects. Prerequisite: ES/ENVS 2400 3.00, or ES/ENVS 2400 6.00, or permission of the instructor.

ES/ENVS 3430 3.00 Environmental Assessment. Provides a critical overview of the theory and practice of environmental assessment (EA). Course objectives include gaining familiarity with the fundamentals of EA; exploring substantive and process-oriented issues through case studies; and practising methods and techniques. EA is examined broadly as a

management and decision-support tool with applications at the project, planning and policy levels. Prerequisite: Third or fourth year standing and completion of six credits in ES/ENVS, or permission of the instructor.

ES/ENVS 3440 3.00 Resource Management. Current theories of resource management, methods, information and decision-making are reviewed critically. Ethical, cultural, social and economic perspectives on resource management are explored through case studies. Prerequisite: Third or fourth year standing and completion of six credits in ES/ENVS, or permission of the instructor.

ES/ENVS 3450 3.00 Environment and Health: Social and Political Dimensions. The overall purpose of this course is to develop a broader and critical framework that can be used to understand how human health is influenced by the larger cultural, ecological and political-economic forces at work in contemporary society. Topics include: socio-political aspects of toxicological risk management, environmental epidemiology, the precautionary principle, and social movements and environmental health. Prerequisite: Third- or fourth-year standing and completion of six credits in ES/ENVS, or by permission of the instructor.

ES/ENVS 3510 3.00 Environmental Economics. The application of economic principles to environmental issues is introduced and critically reviewed. Linkages between economic factors, social processes and natural environments are explored. The use of economic principles in deriving solutions to issues of pollution control, resource depletion, and environmental regulation is explored. Prerequisite: Third or fourth year standing and completion of six credits in ES/ENVS, or permission of the instructor.

ES/ENVS 3520 3.00 Applications of Geographic Information Systems in Environmental Studies. Provides students with an introduction to the application of Geographic Information Systems (GIS) as they are commonly used to address contemporary environmental issues. Various applications, techniques and theoretical frameworks are presented to provide a critical appreciation of this geo-spatial technology. Students gain hands-on experience using industry standard software products and associated technologies (ie. Global positioning systems) to increase their ability to apply these computer-based methods of geographic inquiry. A wide range of case studies, research projects and laboratory assignments are used to demonstrate the principles of the growing area of study. Prerequisite: Third or fourth year standing and completion of six credits in ES/ENVS, or permission of the instructor.

ES/ENVS 3521 3.00 Environmental Remote Sensing. This course represents an introduction to the methods in which remote sensing data are collected, processed and analyzed. An emphasis is placed on environmental applications. The synergy between the technologies of remote sensing and geographic information systems (GIS) is also stressed. Two lecture hours, two laboratory hours. One term. Prerequisite(s): AS/SC/GEOG 2420 3.00, or ES/ENVS 2010 6.00 and one 2000-level environmental studies theme foundation course; or written permission of the course director. Course credit exclusions: None.

Cross-listed to: AS/GEOG 3440 3.00, ES/ENVS 3521 3.00, SC/GEOG 3440 3.00

ES/ENVS 3710 3.00 Landscape Ecology. This course examines the interactions between ecological processes and spatial patterns. It reviews the basic principles of ecology and ecological interactions. It emphasizes applied and theoretical approaches to study landscape ecology patterns and dynamics of ecosystems, and ecological processes, and the implications for degraded environments.

ES/ENVS 3740 3.00 Urban Ecology. This course examines the challenges and potentials of incorporating ecological factors in urban systems. Lectures, field trips, readings and discussion provide the framework for the understanding of natural processes and cultural patterns and practices in the urban landscape. Functional and structural contexts are examined in relationship to the dynamics of natural urban ecosystems. Different urban environments and design projects provide a framework of systemic inquiry, criticism and interpretation.

ES/ENVS 3760 3.00 Plant Ecology. This course provides an introduction to a broad range of native plants through their particular

relationships to plant communities, physiological characteristics, environmental conditions and patterns. Basic concepts of plant ecology are reviewed prior to intensive field visits emphasizes plant identification, dynamics and distribution in various natural and/or urban ecosystems and plant communities.

ES/ENVS 3800C 3.00 Canadian Forests: History, Power and Politics. How can we make sense of contemporary forest conflicts? Are they merely struggles over a commonly understood entity called "the forest," or is the meaning of the forest itself contested? In this course, students will consider these questions. Prerequisite: Third or fourth year standing and completion of six credits in Environmental Studies, or permission of the instructor.

ES/ENVS 3800J 3.00 Popular Culture and Nature: Identity and Outdoor Recreation. The course will apply a cultural studies approach to nature through the specific example of outdoor recreation. The main focus will be on how popular and personal understandings of outdoor recreational activities influence perceptions of nature and identity. Prerequisite: Third- or fourth-year standing, and completion of six credits in Environmental Studies or by permission of the course director.

ES/ENVS 3800K 3.00 Business and Sustainability: Issues and Strategies. An introduction to key dimensions of business and sustainability including: what is sustainability?; "values-driven" business models and practices; eco-production in key economic sectors (food, manufacturing, energy, building); financing sustainability; indicators of sustainability; green regulation; and green business strategies.

ES/ENVS 3800L 3.00 Urban and Regional Infrastructures: A Critical Introduction. An introduction into urban and regional infrastructures. With special attention to environmental concerns, the course examines the history of and current issues surrounding hard (water, transportation, etc.) and soft (social) infrastructures in current urbanization processes.

ES/ENVS 3800M 3.00 Climate Change: Policy and Adaptation. The course examines why climate change has become an important issue; the role of scientific uncertainty in the policy debates; how, where and when climate change is likely to affect societies and what can be done to reduce emissions; prospects for enhanced sinks and adaptation; and the potential risks associated with a changing climate. Recent domestic and international policy initiatives will be examined.

ES/ENVS 3800N 3.00 Urban Planning and Practice in the Global South. This course conceives a conceptual approach to studying urban planning and practice in Third World countries, considering the planning practice's response to the problems and issues in cities of these countries. It also examines the origin and evolution of urban planning practice.

ES/ENVS 3800Q 3.00 Policies for Transition: Alternative Vehicles and Fuels in Canada. This course addresses the technical, socio-economic, environmental and policy issues relating to the transition from the current petroleum-based transportation system. It also explores the role of alternative transportation technologies in shaping a sustainable transportation future in Canada and around the world.

ES/ENVS 3800W 3.00 Political and Historical Narratives of Ecological Change in Amazonia. This course will allow students to theoretically and creatively explore the political economic, ecological and cultural processes that historically shape natural landscapes and human communities. Key concepts and perspectives in political ecology and environmental history will be explored. The course will focus on the countries and communities of Amazonia.

ES/ENVS 3800Y 3.00 Contesting Place: Art in the Urban Environment. This course critically explores the meaning of place and cultural representations of urban places through a specific focus on public art in global cities. Providing an overview of a wide variety of public art practices, including historical monuments, community plays and site-specific murals, the course raises critical questions about the significance of place in a transnational age and the role of art in urban placemaking. Key themes are: representations of place in diasporic contexts, the role of public art in the "world class" city, and Indigenous reclamations of urban places.

ES/ENVS 3810A 6.00 International Field Experience: Ecology and Sustainability in Costa Rica. The study, through direct field observation, of the theory and principles of ecology as these apply to sustainable development in tropical environments, specifically in Costa Rica. Note: This course is only open to students who are selected to participate in International Field work. Course credit exclusion: ES/ENVS 4810A 6.00.

ES/ENVS 3900 3.00 Directed Reading. Directed reading and directed study courses are intended for enrolment by BES major students who wish to pursue intensive individual work with a particular Faculty of Environmental Studies faculty member on a specific topic of study.

ES/ENVS 3900 6.00 Directed Reading. Directed reading and directed study courses are intended for enrolment by BES major students who wish to pursue intensive individual work with a particular Faculty of Environmental Studies faculty member on a specific topic of study.

ES/ENVS 3900A 3.00 Directed Reading. Directed reading and directed study courses are intended for enrolment by BES major students who wish to pursue intensive individual work with a particular Faculty of Environmental Studies faculty member on a specific topic of study.

ES/ENVS 4000 6.00 Senior Honours Work Seminar. Students develop their own interests in the context of a collaborative project around select themes led by a faculty member's research interests, connected with the areas of concentration, and developed through a seminar. Includes multiple approaches and outcomes within two broad categories: (1) major paper (research paper, synthesis paper, literature review, content analysis, literary work, etc.), (2) major project (workshops, cultural productions, studio, field project, etc., and accompanied by a reflection paper).

ES/ENVS 4011 3.00 Food, Land and Culture. Examines food, land, and culture from a critical interdisciplinary environmental perspective. Students have the opportunity to pursue their own interests related to food politics, planning, sustainable and alternative agriculture, human-animal relationships and ethics, from a local and or global perspective. Prerequisite: Fourth year standing and completion of six credits in ES/ENVS, or permission of the instructor.

ES/ENVS 4041 6.00 Alternative Economic Firms and Arrangements. This course investigates alternatives to capitalist corporations that are characterized by some degree of mutuality, such as co-operatives and worker-owned firms. Key issues examined include the competitiveness of alternatives and their desirability on other grounds, including contributions to local economic development. Course credit exclusions: None.

Cross-listed to: AS/SOSC 4041 6.00, ES/ENVS 4041 6.00

ES/ENVS 4100 3.00 Environmental Literatures. This course will explore the role of literature and literary criticism (including ecocriticism) in interpreting, creating, and transforming environmental discourse and politics. It will take up questions concerning the historical development of environmental and nature writing, and will explore a variety of contemporary genres that call older traditions to account. Through the close reading of a diverse collection of literary texts (poetry, novels, short stories, plays, etc.), we will examine and practice a number of different approaches to defining, reading, and critiquing environmental literatures. Prerequisite: Third or fourth year standing, or permission of the instructor. This course builds on ENVS 1800 6.00 which is recommended.

ES/ENVS 4110 3.00 Conservation Biology. This course explores the role of biological science in efforts to conserve natural resources, systems and the organisms therein. Two lecture hours, three laboratory hours. One term. Three credits. Prerequisites: SC/BIOL 2010 4.00; one of SC/BIOL 2030 4.00, SC/BIOL 2031 3.00; SC/BIOL 2040 4.00; SC/BIOL 2050 4.00; or permission of the instructor.

Cross-listed to: ES/ENVS 4110 3.00, SC/BIOL 4245 3.00

ES/ENVS 4111 3.00 Biodiversity. We do not know the number of species on Earth, even to the nearest order of magnitude. This course discusses the factors that influence the number of species in an area and the importance of biodiversity to humanity. Two lecture hours, three

laboratory hours. One term. Three credits. Note: Completion of 60 credits required, towards a degree in biology or environmental science or environmental studies, or permission of the instructor.

Cross-listed to: ES/ENVS 4111 3.00, SC/BIOL 4255 3.00

ES/ENVS 4120 3.00 Natural History. Explores the beliefs, theories and practices of naturalists, through readings as well as visits to sites of natural history. It examines the ways in which current approaches to natural history are products of the historical development of the field, and reflect assumptions regarding scientific knowledge formation and practice.

ES/ENVS 4122 6.00 Community Arts Practice Practicum Seminar. Provides students with an opportunity to implement proposals developed in the third-year Community Arts Practice Preparatory Workshop (ENVS 3122/FACS 3122) by immersing them directly in a creative production in collaboration with cultural and/or community organizations to educate and advocate around social-political issues. Prerequisite: FA/FACS 2122 (3.00) and FA/FACS 3122 (3.00).

Cross-listed to: ES/ENVS 4122 6.00, FA/FACS 4122 6.00

ES/ENVS 4123 3.00 Environment and Behaviour. Introduction to the study of human responses to the environment. Emphasis is on built social and natural aspects of environment. Examples are drawn from environmental psychology, environmental sociology, behavioural geography, and environmental health.

ES/ENVS 4140 3.00 Environmental Thought. An introduction to diverse ways of seeing and understanding nature. An historical perspective on the development of environmental thought leads to an exploration of various perspectives and critiques of the standard scientific and technological approaches to understanding nature, as offered by alternative schools of thought such as humanists, deep ecologists and ecofeminists. Prerequisite: ES/ENVS 2100 3.00, or ES/ENVS 2100 6.00, or permission of the instructor.

ES/ENVS 4151 3.00 Environmental Politics and Advocacy II. Focuses on current developments in politics and advocacy on environmental issues. Topics may include: recent trends in political theory; the impact of globalization on environmental advocacy; and the rise of "new" social and environmental movements. Prerequisite: ES/ENVS 3151 3.00 or permission of the instructor.

ES/ENVS 4161 3.00 Social Movements, Activism and Social Change. Examines new social movements that have arisen in response to the crisis of industrial culture, economic restructuring, shifting political formations, and ecological disasters. The course focuses on current theories of social movements, contested issues, and case studies of social movements in action and is intended to provide opportunities for students to gain first hand experience with social movement organizations through participatory research projects. Prerequisite: Fourth year standing, or permission of the instructor. Integrated with ES/ENVS 5073 3.00.

ES/ENVS 4210 3.00 Global Populations: Critical Environmental Perspectives. Examines the trends, causes and consequences in population growth and movements across the globe. It studies the environmental impacts of rises in population, global refugee and immigration patterns and their socio-environmental consequences, and the influence of new immigrants and 'diasporas' on national identity and culture. Case studies explore existing and alternative family planning policies, the enhancement of women's status through educational, health and employment strategies, and immigration and multicultural policies in developed and developing countries. Prerequisite: Third or fourth year standing and completion of six credits in ES/ENVS, or by permission of the instructor.

ES/ENVS 4215 3.00 Globalization and Indigenous Peoples. Indigenous peoples are distinct communities who have experienced the processes of globalization in particular ways. This course reviews the global historical processes of imperialism and colonialism and their legacies of racism, assimilation and marginalization. The course then examines Indigenous peoples' resistance to globalization and engagement with global networks and institutions, in order to protect their

cultures and assert their rights. Pre-requisite: 3rd/4th year standing or permission of the instructor.

ES/ENVS 4220 3.00 Urbanization in Developing Countries. The key issues of cities in the Third World are addressed, including squatter settlements, rural-urban migration, urban agriculture, housing, urban transport, basic services (water, sanitation, waste management, health and education), urban governance, socio-cultural diversity, and urban environmental planning. Case studies demonstrate public policies and their link to socio-economic, cultural and environmental issues. Prerequisite: Third or fourth year standing and completion of six credits in ES/ENVS, or by permission of the instructor.

ES/ENVS 4223 3.00 Global Cities. This course offers an introduction to the literature on global cities and a systematic review of a distinct field of research in urban studies which concerns itself with the globalization of a network of global or world cities. Prerequisite for undergraduates: Fourth year status.

ES/ENVS 4225 3.00 Urban Sustainability I. A conceptual approach to defining "sustainability" for urban areas, considering patterns of land use, human activities, natural systems and needed rehabilitation. Concepts such as urban ecology, social ecology, the ecological footprint, etc. will be discussed. Social sustainability, environmental justice, and urban governance are central to the course design. Case studies explore ways of making urban areas more sustainable. Prerequisite: ES/ENVS 3225 3.00, or by permission of the instructor.

ES/ENVS 4226 3.00 Urban Sustainability II. A pragmatic approach to the problems of urban sustainability. First, it looks at how urbanism shapes perceptions of nature and how environmental and social values are linked; second, how a broadly based ecological view of cities is necessary to their environmental and social health; third, the main part of the course is concerned with how the application of ecological processes to urban design can influence urban form and increase sustainability. Prerequisite: ES/ENVS 3225 3.00, or by permission of the instructor.

ES/ENVS 4312 3.00 Global Justice and Humanitarian Internationalism. In the context of international humanitarianism and advocacy, this course provides a general introduction to international justice, drawing on basic philosophical ethics. It begins with theoretical schools of thought to then enable students to apply ethical analysis to particular controversies. Prerequisite: ES/ENVS 3000 3.00, or any second or third year AS/POLS course dealing with global peace or social justice, or by permission of the instructor. Note: Not open to students who have taken ES/ENVS 4311 3.00.

Cross-listed to: AS/POLS 4212 3.00, ES/ENVS 4312 3.00

ES/ENVS 4320 3.00 Gender & Development. The course presents an overview of gender and development analysis as a framework for considering the role of women in third world development. Consideration of theories and concepts leads to case studies illustrating issues and practices. Prerequisite: Fourth year standing, or permission of the instructor.

ES/ENVS 4410 3.00 Environmental Policy II. Presents a "theory" of policy development, covering the roles of various groups such as the public, NGOs, the media and industry and applies the "theory" to the processes of international Conventions and Protocols. These include the Canada/US Boundary Waters Treaty, and the Canada/USA Air Quality Accord. Covers some of the mechanisms that use environmental science to establish Convention on Substances that Deplete the Ozone Layer, the Convention on Biological Diversity, the Framework Convention on Climate Change and the Kyoto Protocol.

ES/ENVS 4420 3.00 Environment, Media, Culture and Communication. Media and communication technologies both shape and are shaped by cultural constructs, institutions and practices. This course will examine how the environment is framed and contested through dominant and alternative media, applying critical media, communication, and cultural studies theories (such as political economy, textual analysis, and audience reception). A variety of media forms will be explored (print and broadcast, photography and video, Web-based and digital media, spoken word and performance, etc) through active critique and creative

cultural production. Prerequisite: Third or fourth year standing and completion of six credits in ES/ENVS, or permission of the instructor.

ES/ENVS 4421 3.00 Environmental Law & Justice: Stories and Struggles. This course examines and evaluates how contemporary advocates employ law to protect the environment, secure equal access to environmental health, and contribute to social justice. Prerequisite: ENVS 3420 3.00, or permission of the instructor.

ES/ENVS 4430 3.00 Impact Assessment Process & Practice. The current processes and practices of environmental and social impact assessment are critically reviewed through case studies. Emerging conceptual and methodological issues in the field are explored in the context of actual practice situations. Prerequisite: ES/ENVS 3430 3.00, or permission of the instructor.

ES/ENVS 4440 3.00 Environmental Disasters. The overall objective of this course is to gain an understanding of the causes and responses to natural and technological disasters. An in-depth examination of various case studies of disasters will be used to illustrate the principles involved. Topics include the history of disaster research, emergency management, normal accidents, and the psychosocial impacts of disasters. Prerequisite: Third or fourth year standing and completion of six credits in ES/ENVS, or permission of the instructor.

ES/ENVS 4442 3.00 Environmental Monitoring and Auditing. Concepts of environmental monitoring and auditing are presented through lectures, projects and field trips. Emphasis is placed on understanding the categories and objectives of environmental monitoring that routinely provide much of the scientific understanding needed to resolve environmental problems. Students gain a detailed knowledge of national and international monitoring networks and how the results are being applied to current environmental issues such as climate change and biodiversity. Attention is given to the use of monitoring data in establishing "Environmental Indicators". Prerequisite: Third or fourth year standing and completion of six credits in ES/ENVS, or permission of the instructor.

ES/ENVS 4445 3.00 Environmental Conservation in Ontario: Policy and Applications. Examines current and emerging conservation policy and conservation applications in Ontario, including the Greater Toronto Area. Examples of conservation in Ontario to be critically examined include: Protected areas policy, regulatory frameworks, Ontario's Conservation Authorities, land stewardship, citizen engagement with conservation, heritage trusts, the Bruce Trail Association, ecotourism and protection of biodiversity in Northern Ontario. Prerequisite: Third or fourth year standing and completion of six credits in ES/ENVS, or permission of the instructor.

ES/ENVS 4446 3.00 Protected Area Management. This course will explore protected area management, which is a form of environmental management focusing on an area of land and/or freshwater/sea especially dedicated to the protection and maintenance of biological diversity, and of natural and associated cultural resources, and managed through legal or other effective means. Prerequisite: Third or fourth year standing and completion of six credits in ES/ENVS, or permission of the instructor.

ES/ENVS 4450 3.00 Environmental Management and Policy in Practice. Explores the role, existing and future, of environmental policy and management to address environmental challenges through case study analysis of topical Ontario and Canadian environmental issues. Such issues include: Canada's response to the Kyoto Accord and global climate change; air quality in Southern Ontario; drinking water quality in Ontario. Will include field trips and guest lectures. Prerequisite: Third or fourth year standing and completion of six credits in ES/ENVS, or permission of the instructor.

ES/ENVS 4455 3.00 Information Technology: Applications in Environmental Management. Examines the impact of information technology on various aspects of civil society with a special emphasis on environmental management and community sustainability. It focuses on how various software and hardware systems such as Geographic Information System (GIS), Global Positioning System (GPS), remote sensing, modelling and simulation, and broadband Internet communications are being applied to learn about, characterize, and

manage our physical environment. Also explores how software tools such as MapReflections, QUEST, e-Dialogues etc., are also being used to enhance our social infrastructure by enabling community-based participation, knowledge-sharing, and decision making. Prerequisite: Third or fourth year standing and completion of six credits in ES/ENVS, or permission of the instructor.

ES/ENVS 4510 3.00 Ecological Economics. Provides an introduction to the emerging field of ecological economics. Areas of focus include the appropriate scale of the economy in relation to the environment, the role of discount rates in mediating intergenerational and interspecies equity, environmental valuation, full-cost accounting, environmental risk assessment, and the application of thermodynamic and ecological principles in economic analysis. Prerequisite: Third or fourth year standing and completion of six credits in ES/ENVS, or permission of the instructor.

ES/ENVS 4520 3.00 Geographical Information Systems Applications in Environmental Studies. Focuses on advanced applications of Geographic Information Systems to topics related to planning and resource management. The technical aspects of GIS applications will be explored along with considerations related to database development. Students will gain hands-on experience with data input through scanners and digitizers, and with GIS analyses using both vector and raster data models. A significant part of the course will involve the development of a GIS database for analysis through group projects. Prerequisite: ES/ENVS 3520 3.00, or the permission of the instructor.

ES/ENVS 4521 3.00 Remote Sensing and Image Processing for Geographical Analysis and Environmental Monitoring. Sophisticated methods and techniques for collecting, processing and analyzing remote sensing data are examined. Special topics include image enhancement techniques (e.g. texture transforms), non-traditional image classification and data integration for incorporation of remote sensing data products into geographic information systems (GIS). One and one-half lecture hours, one and one-half laboratory hours. One term. Prerequisite: AS/GEOG 3440 3.00 or ES/ENVS 3521 3.00 or SC/EATS 4220 3.00 or written permission of the course director. Course credit exclusions: None.

Cross-listed to: AS/GEOG 4440 3.00, ES/ENVS 4521 3.00, SC/GEOG 4440 3.00

ES/ENVS 4522 3.00 Internet-Distributed Geographic Information System (GIS) for Public Engagement. This course examines the role of geo-spatial information technologies as applied public engagement activities. Students will review literature in areas of social theory, public participation and technology-mediated engagement techniques while developing applied knowledge through project design and implementation exercises. Prerequisite: Third or fourth year standing and completion of six credits in ES/ENVS, or permission of the instructor.

ES/ENVS 4523 3.00 Systems Thinking in Environmental Studies: Theory and Methodologies. This course addresses fundamentals of general and complex systems thinking (such as general systems theory, complex adaptive systems, chaos theory) major paradigms in systems thinking (functionalist, interpretive, emancipatory, postmodern), and their associated methodologies and applications in environmental studies.

ES/ENVS 4530 3.00 Risk Assessment in Resource Management. Theories and concepts of "risk" are discussed and evaluated critically with respect to public policy for the resources sector. The analytical framework employed distinguishes between risk estimation, risk evaluation, and risk management and communication activities. Resource management issues are analyzed with a focus on energy policy in Canada, in the context of environment-energy interactions. Normally offered in alternate years. Prerequisite: AS/GEOG 3340 6.00, or fourth year Honours standing in the Faculty of Environmental Studies or written permission of the instructor. Course credit exclusions: None.

Cross-listed to: AS/GEOG 4160 3.00, ES/ENVS 4530 3.00

ES/ENVS 4700 6.00 Urban Ecologies Workshop. The workshop investigates a current urban landscape ecology issue in Toronto. This collaborative project-based workshop is designed to provide students with direct experience in urban ecology research, field investigation, analysis of relevant political, social, economic, environmental, and cultural dynamics,

and consideration for alternatives improving the ecological infrastructure. Each year a different topic is selected as the basis for the workshop project.

ES/ENVS 4750 3.00 Political Ecology of Landscape. This course is structured around a critical analysis of historical and theoretical issues related to natural and urban landscapes. The emphasis of this course is on the development and transformation of landscapes as an expression of various social, cultural, physical, economic, political, artistic, technological, and ecological forces through space and time. Prerequisite: Third or fourth year standing and completion of six credits in ES/ENVS, or permission of the instructor.

ES/ENVS 4800Q 3.00 Urban Development Process. Critical investigation of approaches to, and topics in, processes of urban growth, decline, development and redevelopment. 20th-century theories of urbanization are examined and their relevancy for understanding selected recent urban problems are studied. Prerequisite: Fourth year standing, or by permission of the course instructor.

ES/ENVS 4810A 3.00 International Field Course. Advanced study, through thorough literature review and direct field observation, of the theory and principles of ecology as these apply to sustainable development in tropical environments, specifically in Costa Rica. Note: This course is only open to students who are selected to participate in International Field work. Course credit exclusion: ES/ENVS 3810A 3.00

ES/ENVS 4810A 6.00 International Field Experience: Ecology and Sustainability in Costa Rica. Advanced study, through thorough literature review and direct field observation, of the theory and principles of ecology as these apply to sustainable development in tropical environments, specifically in Costa Rica. Note: This course is only open to students who are selected to participate in International Field work. Course credit exclusion: ES/ENVS 3810A 6.00

ES/ENVS 4900 3.00 Directed Study. Directed reading and directed study courses are intended for enrolment by BES major students who wish to pursue intensive individual work with a particular Faculty of Environmental Studies faculty member on a specific topic of study. Note: Does not fulfill Area of Concentration requirements.

Cours de langue française pour francophones

GL/FRAN 1740 3.00 Rédaction universitaire I. Ce cours s'adresse aux étudiants francophones qui n'ont pas les connaissances grammaticales nécessaires pour s'exprimer de façon satisfaisante à l'écrit. Le programme comporte une révision grammaticale systématique, des analyses de textes, des exercices d'enrichissement de vocabulaire ainsi que des rédactions.

Language of Instruction: French

GL/FRAN 1745 3.00 Rédaction universitaire II. Ce cours a pour but de consolider les connaissances acquises en GL/FRAN 1740 3.00. Le programme comporte des exercices de vocabulaire, de syntaxe et de composition. Condition préalable: GL/FRAN 1740 3.00.

Language of Instruction: French

GL/FRAN 1800 3.00 Panorama historique de la littérature française I. Ce cours a pour but de donner aux étudiants un aperçu de l'histoire de la littérature française, du Moyen Âge jusqu'à la fin du XVIIe siècle; et d'améliorer leur aptitude à lire et à analyser un texte littéraire ainsi que celle de s'exprimer oralement et par écrit sur des textes et des questions littéraires. Ce cours est destiné aux étudiants de première ou de deuxième année voulant se spécialiser en Études françaises et qui sont capables de s'exprimer en français (oralement et par écrit) et de lire des textes littéraires en français. Cours incompatibles : GL/FRLS 2240 6.00(FR), GL/FRAN 2240 6.00(FR), GL/FRAN 2210 3.00(FR), GL/FRAN 2212 3.00(FR).

Students can double major or minor in European studies and an Honours BA program in the Faculty of Arts. The interdisciplinary program in European Studies permits students to apply their knowledge of a specific discipline to the study of Europe, which is defined as broadly as possible, to include Eastern and Central Europe, the Balkans, Southeastern Europe, Russia and Turkey, as well as Western Europe. In consultation with the program coordinator, students will be able to design a program of study which meets their own particular interests by choosing from among a wide variety of courses from a number of departments and divisions. Students may focus on a national or regional stream in areas, such as France, Germany, Greece, Italy, Portugal, Spain or Russia.

For specific program requirements and the list of program courses, please consult the Faculty of Arts Programs of Study section of this calendar.

Programs of Study

York University's Department of Film enables students to explore the media of film through a program of studio (film and video production) as well as critical, historical and theoretical studies. An undergraduate can specialize in any one of the previously mentioned areas, but must take some courses in each area. All Honours film majors must complete 12 credits in historical and theoretical studies, FA/FILM 1400 6.00 and FA/FILM 2400 6.00, and at least 24 credits at the 3000 or 4000 level, of which at least half are within the student's area of concentration. Students concentrating in cinema and media studies will receive an Honours BA degree. They are required to complete a minimum of 48 credits in the department and must include FA/FILM 1410 6.00 along with their upper-level requirements FA/FILM 3410 3.00, FA/FILM 4800 3.00, and at least three further credits at the 4000 level. They must also complete at least six credits in production or screenwriting, FA/FILM 2040 6.00. Students concentrating in studio will receive an Honours BFA degree. They are required to complete a minimum of 60 credits within the department, of which 21 credits must be studio courses at the 3000 or 4000 level.

For studio students, the Film program encourages a blend of the conceptual areas of writing, directing and producing, while providing a professionally-oriented background in the creative crafts of cinematography, editing and sound. Our intention is to provide each student with a marketable skill in addition to a broad education in film and video. Studio students should be aware that the department does not provide a full subsidy for the sometimes heavy cost of film and video production. Some courses have additional fees which cover part of the

general cost of the courses but in most film production courses students will be required to purchase additional supplies at their own expense and to pay damage deposits. Due to facilities available, spaces in upper-year courses are limited.

Courses in Film

Some upper-year courses are not offered on an annual basis; some courses listed below may not be offered during the current academic session. Consult the Film Department office for further information.

FA/FILM 1010 3.00 Introduction to Filmmaking I. Introduces the student through lectures, screenings, workshops, and guest visits to the concepts, formats and visual elements of the movie, and emphasizes ways in which film and videomakers translate ideas into moving images. Note: Required of all first-year BFA film majors. Enrolment is limited to BFA film majors. Corequisites: FA/FILM 1020 3.00, FA/FILM 1400 6.00.

FA/FILM 1020 3.00 Introduction to Filmmaking II. Offers instruction in the fundamental concepts, procedures and techniques of visual and audio production as an idea is taken from the script to the screen. Course work includes the production of several short projects in various formats. Students are required to purchase production materials. Corequisite: FA/FILM 1010 3.00, FA/FILM 1400 6.00. Note: Required of all first-year BFA film majors specializing in production and/or screenwriting. Enrolment is limited to BFA film majors.

FA/FILM 1400 6.00 Film Art: An Introduction. Introduces the aesthetics, theory and history of film. Lectures concentrate on the elements of film, including narrative structure, visual composition and the uses of sound and editing. Documentary, experimental and feature films are encompassed. Note: Required of all film majors and minors. Corequisite: FA/FILM 1010 3.00, FA/FILM 1020 3.00. Course credit exclusion: FA/FILM 1401 6.00.

FA/FILM 1401 6.00 Introduction to Film (for Non-Majors). Provides a broad survey of the art and criticism of film. Students are introduced to some of the major films and movements that have come to define the evolution of cinema as a popular culture, political discourse and art form. Within an historical framework students will be introduced to the general vocabulary and syntax of film studies. They will also learn about the major technological innovations, aesthetic movements and political discourses that have underscored the development of cinema as a culture industry. Prerequisites: None. Designed for non-majors. Course credit exclusion: FA/FILM 1400 6.00.

FA/FILM 1410 6.00 Film History. Introduces students to the major periods and technological developments in film history from its origin in chronophotography to present understanding of 'world cinema'. The course will address some of the fundamental phases and international movements in cinema history, focusing on film as technology, institution and art form. A range of film genres (both narrative and documentary) and national cinemas representative of the aesthetic and economic contexts of global media cultures will be examined. The course will be framed by a variety of critical issues in film historiography.

FA/FILM 1701 3.00 Hollywood: Old and New. Offers a fully online introductory course that provides Web-based delivery of lectures and discussion groups complemented by the screenings and interviews of TVO's Saturday Night at the Movies. Key concepts in critical film analysis will be introduced and important themes in American film history will be examined. Students are asked to watch the two films per week screened on Saturday Night at the Movies and then to access lectures, post comments, and attend chat rooms via WebCT, a learning program for which they will be given access. Written assignments are to be submitted via the WebCT site.

FA/FILM 2010 6.00 Film & Video Production. Offers an intensive exploration of the techniques basic to film and electronic production. The emphasis is on producing several short subjects in both media for the widest possible experience and exploration of different forms in both media. Four hours. Prerequisites: FA/FILM 1010 3.00, FA/FILM 1020 3.00, FA/FILM 1400 6.00 and permission of the production committee.

Corequisites: FA/FILM 2020 3.00, FA/FILM 2120 6.00, FA/FILM 2400 6.00 and FA/FILM 2170 3.00.

FA/FILM 2020 3.00 Technical Aspects of Filmmaking. Provides a step-by-step practical experience in creative and technical aspects of film and video production and post-production. Procedures and processes explored will include shooting and recording sound for film, lighting for film, and various aspects of post-production work with image and sound. In-class workshops, three hours per week. Prerequisites: FA/FILM 1010 3.00, FA/FILM 1020 3.00. Corequisite: FA/FILM 2010 6.00.

FA/FILM 2040 6.00 Video and Filmmaking. Provides theoretical and practical familiarization with small format video and filmmaking through lecture-demonstration and studio exercises. Working in groups, students will produce short projects in both media. Four hours. Note: Film students in the Specialized Honours BA program and the BA program must take either FA/FILM 2040 6.00 or FA/FILM 2121 6.00 as the required six studio credits. Not intended for students concentrating in film production. Prerequisite: Permission of the production committee.

FA/FILM 2120 6.00 Screenwriting Fundamentals. Introduces the craft of screenwriting, taking a general view of screenwriting and its relationship to filmmaking, storytelling and writing. This course is a prerequisite for all upper-level screenwriting courses. Prerequisites: Film majors: FA/FILM 1010 3.00 or permission of committee. Open to Non-majors by permission of committee.

FA/FILM 2121 6.00 Introduction to Screenwriting. Provides a broad introduction to the art and craft of screenwriting. Designed for students with a strong interest in the subject, but who are not enrolled in the BFA program in the Department of Film. Writing for film is very specific, both an art and a technical document. Students, through the examination of films, will discuss how film stories are told and the fundamental requirements to writing a script. However, unlike FA/FILM 2120, these scripts are not written to be produced and therefore do not cover the technical language of filmmaking (camera angles, production and crewing). This course is a prerequisite to all upper level screenwriting courses in the department of film. Course credit exclusion: FA/FILM 2120 6.00.

FA/FILM 2170 3.00 Production Planning & Management. Offers a practical course in film & video production planning including: script breakdown, scheduling, budgeting, financing, legal issues, collective agreements and administrative procedures. Additional fee required. Prerequisites: FA/FILM 1010 3.00, FA/FILM 1020 3.00, FA/FILM 1400 6.00. Corequisite: FA/FILM 2010 6.00, FA/FILM 2020 3.00, FA/FILM 2120 6.00, FA/FILM 2400 6.00. Course credit exclusion: FA/FILM 3170 3.00.

FA/FILM 2400 6.00 Film Theory. Provides an intensive study of the theories of film, with particular attention to montage, mise-en-scene, auteur, genre and other classical and contemporary conceptions; relevant readings and screenings of key films. Note: Required of film majors and minors. Prerequisite: FA/FILM 1010 3.00, FA/FILM 1020 3.00, FA/FILM 1400 6.00. Corequisites: FA/FILM 2010 6.00, FA/FILM 2020 3.00, FA/FILM 2120 6.00. Open to non-majors by permission of the Film Department.

FA/FILM 2401 6.00 Film, Television and Society. Examines the interrelationship between film and television and the societies in which they are produced and consumed. Attention is paid to the social relations and ideological and political characteristics of contemporary societies, as well as contemporary criticism which has analyzed these media. Course credit exclusions: None.

Cross-listed to: AS/HUMA 2740 6.00, FA/FILM 2401 6.00

FA/FILM 3250C 3.00 Director's Cinema: David Cronenberg. Explores how David Cronenberg's films take aim at the everyday, the power bases of our culture: family, school, science, medicine, commerce, television; they focus on narcissistic consumers who lack meaningful engagement in a socio-cultural world and who instead obsess in a continual monologue with their revolting bodies. If Cronenberg's horror upsets civil society by showing it inside-out, maybe it is because our anxiety over insurrection depends ultimately on whether we stand to gain or lose power by it. Cronenberg's oeuvre insists that, as long as social progress is the legitimating function of horror text, we will not have the vocabulary to really speak or dream horror's end. Skills in critical reading, writing, analysis and argument are required and will be further developed in the course. Students must be prepared to read and write numerous essays and a final exam. Prerequisite: FA/FILM 1400 6.00 or FA/FILM 2401 6.00 (AS/HUMA 2740 6.00) or permission of the Film Department. Course credit exclusion: AK/FILM 3240 3.00.

FA/FILM 3250D 3.00 Director's Cinema: Martin Scorsese. Explores how the cinema of American director Martin Scorsese spans a vast range of genres. Indeed, Scorsese's films and status as an auteur have helped to influence a new generation of independent filmmakers in the United States by bringing a new complexity to the very concept of studio production and film genre. This course will examine theories of genre, style and national cinema (both Italian and American) through the works of this auteur.

FA/FILM 3250E 3.00 Director's Cinema: The Cinemas of Stanley Kubrick and Woody Allen. Presents a consideration of two major American directors. Viewing their films chronologically, it will develop a comparison of their careers as a means of examining their respective approaches to American culture and American filmmaking.

FA/FILM 3300A 3.00 Television/Video: Theory and Criticism. Presents an historical overview of North American television with a focus on the differences between commercial, public and state broadcasting. We will investigate the various television forms that have emerged in the Americas, including soaps and sitcoms, news, talk shows, game shows, reality television, sports programming, music videos, and commercials. We will also consider the theories that have attempted to explain the phenomenon of television, and we will look at video art, culture jamming, computers, and video games as extensions of, and responses to, television culture.

FA/FILM 3310 3.00 Studies in the Documentary. Explores the creative interpretation of actuality in film, from Flaherty to direct cinema and television. A study of changing forms, techniques and theories of documentary; its role in public information, propaganda and social analysis. Prerequisites: FA/FILM 1400 6.00 or FA/FILM 2401 6.00 or permission of the Film Department. Course credit exclusion: AK/FILM 3450 3.00M.

FA/FILM 3320 3.00 The Experimental Tradition. Examines the experimental impulse in film and video from the European avant garde cinema of the 1920s to the present. Prerequisite: FA/FILM 1400 6.00 or permission of the Film Department.

FA/FILM 3321 3.00 Alternative Cinema. Examines the movements within the cinema whose work have traditionally been less publicly accessible. Personal cinema and political films may be included. Four hours. Prerequisite: FA/FILM 1400 6.00 or permission of the Film Department.

FA/FILM 3331 3.00 Community Based Video: Video Art and Activism. Focuses on the community-based video, documentary and video activism. Students create individual and /or group projects on topics of their choosing, working with community organizations. Students gain skills in production, editing and working with community organizations. Pre-requisites: 3rd or 4th year standing.

FA/FILM 3401 3.00 Canadian Cinema. Provides a study of work by selected contemporary Canadian filmmakers working in a variety of areas: Anglophone, Francophone, multi-cultural and aboriginal fiction film traditions; documentary; and the avant garde. Also discussed are the issues surrounding the production and distribution of film in Canada today. The course is designed to work in conjunction with The Independents, a series of speakers and screenings offered by the Film Department. Required of all Film majors. Prerequisite: FA/FILM 1400 6.00 or permission of the Film Department. Course credit exclusion: AK/FILM 4210 3.00.

FA/FILM 3410 3.00 Readings in Film and Television Theory. Provides an intensive reading and discussion course exploring the debates that have developed around film and television as cultural forces in the 20th century. Though readings in classical theory are included, the primary emphasis is on contemporary theory. The course also includes discussions of, and practice in, research methodology. Three hours. Note: Required of all film majors in the BA Honours program. Prerequisite: FA/FILM 2400 6.00 or permission of the course director.

FA/FILM 3411 3.00 Contemporary Canadian Cinema. Examines the last two decades of Canadian cinema with a particular focus on the

regional and political differences that have come to shape the contemporary cultural landscape of film and video in Canada. Political and aesthetic issues particular to Canada along with a focus on a range of genres (from activist documentaries to feature narrative films) will be used to interrogate the very concept of national cinema and the meaning of its place in the age of global media.

FA/FILM 3420A 3.00 Studies in Genre: The Rise and Fall of the Hollywood Musical. Examines and celebrates of the American film musical as a unique genre, emphasizing its multi-disciplinary elements, analyzing its development, structure and meaning and considering the various factors - technological, industrial, political and cultural - and the key creative figures that played important roles in its growth and demise. Prerequisite: FA/FILM 1400 6.00 or FA/FILM 2401 6.00 or permission of the Film Department.

FA/FILM 3420B 3.00 British Comedy. Explores the genres into which films have been classified are numerous and the criteria for classification highly variable. But among the most common groupings are those that film shares with literature, not the least of which are comedy, farce and satire. Critics and philosophers have spent considerable time debating the human comic impulse, how and why it works and its social role. In effect, these debates and theories are concerned with the rhetoric of comedy (how does comedy condition the emotional response of the audience?). One thread of this course will be to explore these varied approaches to understanding the structure of comedy in its different manifestations. At the same time, we will be examining comedy within a particular social context. From Oscar Wilde to the comedies of Ealing Studios, Monty Python's Flying Circus and, more recently, Mr. Bean and The Office, British approaches to, and uses of, humour have often been considered culturally characteristic. British film and TV comedy has also been well received internationally and some TV programmes have developed cult followings. This second aspect of the course, then, will focus on the context of British culture and the role comedy plays within it. It will, in effect, emphasize the poetics of comedy: how do general principals manifest themselves in particular films. Prerequisite: FA/FILM1400 6.00.

FA/FILM 3420D 3.00 Studies in Genre: Horror. Investigates the concept of genre through the study of the horror film or television series as a genre crossing distinctive national, institutional and historical categories. The cultural significance and social/historical determinants of the horror film are central to the course as well as the conventions, evolution and iconography of this popular genre. Prerequisite: FA/FILM 1400 6.00 or permission of the Film Department. Course credit exclusion: AK/FILM 3531 3.00.

FA/FILM 4129 3.00 The Screenwriters' Cinema 2. Explores through an examination of representative screenings, screenplays, commentaries and originating sources (novels, plays, short stories, other screenplays, etc.) the life and work of two or three notable screenwriters, distinct but complimentary to those that may have been studied in FM4128: the Screenwriter's Cinema 1, chosen by the instructor as having especial significance for understanding the craft of screenwriting. Open to non-majors.

FA/FILM 4130 3.00 Editing Techniques II. Continues the exploration of the practice, aesthetics and theory of motion pictures editing, building on the knowledge and skills acquired in FA/FILM 3135 3.00. Prerequisite: FA/FILM 3135 3.00 Editing Techniques I.

FA/FILM 4135 3.00 Editing Techniques III. Explores further the practice, aesthetics and theory of motion picture editing, building on the knowledge and skills acquired in FA/FILM 4130 3.00 Editing Techniques II. This course is for students who show exceptional ability and commitment to the craft of editing. Students will work extensively editing film and video projects undertaken in the project workshops. They may also mentor students in FA/FILM 3135 3.00 Editing Techniques I and FA/FILM 4130 3.00 Editing Techniques II. Prerequisite: FA/FILM 4130 3.00.

FA/FILM 4150 3.00 Sound Techniques II. Offers an advanced exploration of post-production and studio sound practices, building on the

experience and knowledge gained in FA/FILM 3155 3.00 Sound Techniques I. The expressive arts of the sound editor and mixer will be further explored by students as they acquire more advanced knowledge of post-production sound editing and mixing and discover the full breadth of aesthetic possibilities of sound design for film and video. The course will include lectures, field trips and visits from working professionals. Prerequisite: FA/FILM 3155 3.00 Sound Techniques I.

FA/FILM 4161 3.00 Cinematography II. Assists students in continuing to develop creative and technical skills initiated in FA/FILM 3160 3.00 Cinematography I, with an emphasis on the planning and shooting of films and videos produced in the project courses. Prerequisite: FA/FILM 3160 3.00 Cinematography I.

FA/FILM 4165 3.00 Cinematography III. Builds further on the creative and technical skills acquired in FA/FILM 4161 3.00 Cinematography II, providing guidance to students heavily involved in shooting films and videos. Prerequisites: FA/FILM 4161 3.00 Cinematography II.

FA/FILM 4180 3.00 Acting and Directing II - Directing Actors for the Screen. Explores the work that actors and directors do together. It includes scene study, preparation, and the recording and editing of dramatic scenes. Prerequisite: FA/FILM 3180 3.00 Acting and Directing I. Open to both film and video and theatre majors.

FA/FILM 4190 6.00 Film & Video Internship. Consists of an eight-week full-time (minimum 160 hours on site) placement for fourth-year BFA students in an approved company or organization gaining on-the-job experience in a film/video or television field. Admission is based on finding a suitable match between a student's interests and the needs of the partner organization. In the first week of the course prior to the commencement of the site placement, students will be required to attend seminars on workplace health and safety, sexual harassment, insurance, business confidentiality etc. Prerequisite: FA/FILM 2170 3.00 Production Planning or FA/FILM 3170 taken prior to 2005.

FA/FILM 4501A 6.00 Understanding Screenwriting I: The Studio Era. Provides an intensive historical review, for advancing students of screenwriting, of how the working methods of designing films originated and evolved as they did to the end of the studio era (circa 1955). Prerequisite: FA/FILM 3120 or concurrent registration within it; or permission of the Film Department.

FA/FILM 4501B 6.00 Understanding Screenwriting 2: The Post-Studio Era. Continues the work begun in FA/FILM 4501A 6.00. An intensive historical review, for advancing students of screenwriting, of how the working methods of designing films originated and evolved from the end of the studio era (circa 1955) through the 1990s. Prerequisite: FA/FILM 4501A 6.00.

FA/FILM 4600F 3.00 Special Topics in Film/Television: Screenwriting and Philosophy. Examines what can be learned from how screenwriters work and talk about how better to understand three fundamental transitions in the history of philosophy initiated by Kant, Wittgenstein and Collingwood. Prerequisites: a full upper-year course in screenwriting or film production, and another (or the equivalent) in philosophy; or permission of the Film Department.

FA/FILM 4600H 3.00 Special Topics: Narratology and Luis Bunuel. Explores how the films of Luis Bunuel encourage us to consider questions of narrative and of narrative subversion. In doing so, we will examine not only Bunuel's films but also some others relevant to the study of narrative. Integrated with GS/FILM 5320B.

FA/FILM 4600R 3.00 Special Topics in Film/Television: Early Cinema to 1915. Examines the origins of cinema including the technological innovations that made it possible, the development of its economic and social infrastructure and the evolution of varied means of expression in the films themselves.

FA/FILM 4600S 3.00 Contemporary Documentary. Presents a consideration of selected documentary films released after 1980. These films will be examined in the context of both critical writing addressing them

directly and theoretical discussion of the nature of non-fiction film. Prerequisite: FA/FILM 1400 or permission of the Film Department.

FA/FILM 4600T 3.00 Canadian Documentary. Examines as a special topic in Canadian Film/Television the history, theory, criticism and current practice of documentary. Works to be considered include a variety of English and French language documentaries, docudramas, experimental documentary and documentary applications of new media. Prerequisite: 4th year BA (Honours) standing. Integrated with GS/Film 5255.

FA/FILM 4600U 3.00 Issues of Authorship. Debates about "authorship" in relation to both the production of films and critical methodology have occupied a central position in film studies only since the nineteen fifties, when the French magazine *Cahiers du cinéma* formulated the *politique des auteurs*. Originally intended polemically, the *politique* ("policy") argued that, despite the industrial nature of much film production, the director was the sole author of the finished product. This proposition has since been appropriated, attacked and reformulated in many different ways, but it continues to have relevance in critical debates. In this course, we will examine various theories of film authorship, from the roots of the notion in the *politique* to its transformation through the use of such concepts as structuralism, post-structuralism and semiotics. We will discuss the attacks on the assumption of the author as sole creator ("the death of the author"), the questioning of such evaluative categories as "the great director" or "the great film" and how these relate to issues of canon formation. Finally, we will consider the re-examination of these issues in more recent, especially feminist, criticism. The course will include case studies which illustrate the theoretical discussions. Prerequisite: 4th year Film BA (Honours) standing. Integrated with GS/Film 5235

FA/FILM 4601A 3.00 Selected Topics in Film/TV: Script Editing. Based on the understanding that story (or script) editing is an integral part of the development of professional screenplays and teleplays, this course has two areas of focus: to provide an environment of collaboration between Screenwriting and Production stream students and to provide writers with analytical and critical skills based on a dramatic structural model. Integrated with GS/FILM 5320E. Course credit exclusion: FA/FILM 4126 3.00, FA/FILM 4126 6.00, FA/FILM 4127 3.00.

FA/FILM 4601B 3.00 The Narrated Documentary. Examines newsreels and documentaries as well as television news and current affairs programs characterized by voice-over narration. Individual texts will be discussed in terms of this narration as well as its relationship to other elements of the works.

FA/FILM 4700 3.00 Canadian Cinema: Production, Distribution, Exhibition, Marketing and Criticism. Offers a course designed to familiarize students with the inner workings of the Canadian film industry. Using case study approach, most aspects of film production are investigated. Prerequisite: FA/FILM 1400 6.00 or permission of the Film Department.

FA/FILM 4710 3.00 First Nations in Film and Television. Investigates the role of First Nations in film and television culture, from the perspective of post-colonial theory and contemporary media theory. Includes international work, made from the 19th century to the present, and produced by both indigenous and non-indigenous artists. Prerequisite: 2000 level film studies course or permission of the instructor.

FA/FILM 4711 3.00 Issues in Film Historiography. Examines the methods and approaches possible in the study of film history, especially those specific or unique to film. It emphasizes the posing of historical questions, the conducting of research, the analyzing of evidence and the development of conclusions. The course uses particular examples drawn from film history to illustrate issues, problems and approaches. Prerequisite: 4th year standing in the Film BA Honours program.

FA/FILM 4800 3.00 Honours Thesis. Offers a course designed to provide history and criticism students with a focused research and writing project. Consult the department office for more details. Prerequisites: FA/FILM 3410 3.00 and permission of the Film Department.

FA/FILM 4850 3.00 Master Class in Film and Video. Provides Master class modules that are short, intensive workshops offered to take

advantage of visiting or local professional filmmakers, screenwriters and scholars. Courses may be given by specialists from a wide range of specialties.

FA/FILM 4900 3.00 Independent Studies in Film/Television. Provides the individual student an opportunity to pursue a specific and intensive personal study under the supervision of a faculty member on topics not offered in other courses within the department. Proposed topics are subject to departmental approval. Note: Open to fourth-year students by petition to the Film Department.

FA/FILM 4900 6.00 Independent Studies in Film/Television. Provides the individual student an opportunity to pursue a specific and intensive personal study under the supervision of a faculty member on topics not offered in other courses within the department. Proposed topics are subject to departmental approval. Note: Open to fourth-year students by petition to the Film Department.

FA/FILM 4901 3.00 Independent Studies in Film/Television. Open to fourth-year Film students, the Independent Studies course gives the individual student an opportunity to pursue a specific and intensive personal study under the supervision of a faculty member on topics not offered in other courses in the Department. Proposed topics are subject to Department approval. Each student is required to complete an Independent Studies form prior to the commencement of an academic session. Note: Department of Film equipment is not available to students enrolled in Independent Studies Courses. Independent Studies in Production is for production related proposals other than making a film or video outside of one of the third and fourth year project courses. Film/video productions will not normally be considered for this course.

Programs of Study

Fine arts cultural studies (FACS) welcomes students with wide-ranging interests across the fine, performing and new media arts, and offers an opportunity to explore them from various interdisciplinary perspectives set within the critical frameworks. Course options consider the arts through cultural histories and theory, issues in contemporary and popular culture, cross-cultural studies, studio practices—including FACS' new media stream—and arts administration.

Students pursuing Honours Major or Minor programs in Fine Arts Cultural Studies are required to take a minimum of 30 credits from the FACS offerings. For other Faculty of Fine Arts students, FACS courses count as

fine arts or free electives. Some FACS courses are open to all students in the University as electives.

Courses in Fine Arts Cultural Studies

Please note: Not all courses are offered every year.

FA/FACS 1010 6.00 Fine Arts Cultural Studies: An Introduction. Explores the intellectual roots of cultural studies and their relationships to the fine, performing and new media arts. Examines themes, approaches, literatures and practices in the interdisciplinary field of fine arts cultural studies through projects undertaken in various media. Prerequisite: Open to fine arts cultural studies majors.

FA/FACS 1900 6.00 Arts and Ideas. Organized thematically, this introductory course acquaints students with aspects of the fine, performing and new media arts from various interdisciplinary perspectives. Note: FA/FACS 1900 is required for all Faculty of Fine Arts degrees. It may be used to satisfy the humanities general education requirement or as a Fine Arts elective, but not both.

FA/FACS 1939 3.00 Interactive New Media Art: An Introduction. Introduces students with little or no experience in the creation of new media works to the issues and techniques that will enable them to engage critically and creatively with the area. In the relatively short history of new media, a new language and tool set have become pervasive in the world of art making. This course provides students with an introduction to interactive new media. Using HTML, JavaScript, and Photoshop, students will engage with the web as a creative medium. Projects will be based in a variety of new media genres including net.art, blogs, interactive narrative, and randomness. Course Material fees required. Open to non-majors.

FA/FACS 2100 3.00 Critical Biographies: Works and Lives. Explores the use of biography as a critical tool in understanding artistic creativity and cultural theory in the fine, performing, and new media arts. Biographical texts are studied in conjunction with an examination of artistic and theoretical works. Prerequisite: Second-year standing or permission of course director.

FA/FACS 2122 3.00 Community Arts for Social Change. An introduction to community-based creative practices integral to social change in different historical and cultural contexts. These practices are examined in terms of their form, content, production, and reception from interdisciplinary perspectives.

Cross-listed to: ES/ENVS 2122 3.00, FA/FACS 2122 3.00

FA/FACS 2400 6.00 Photography, Film and Popular Culture. Explores the inter-related histories of photography and film within the theoretical constructs of popular culture by examining the origins of these media, their documentation of quotidian life, influence on questions of gender and race and their place in cultural theory. Prerequisite: FA/FACS 1900 6.00 or permission of course director.

FA/FACS 2500 3.00 Contemporary Arts and Technologies. Exposes students to intersections between arts and technologies reflected in the work of theorists, practitioners and critics. The focus in any given year will reflect instructor's interests and key developments in the field. Prerequisites or corequisites: FA/FACS 1900 6.00 or permission of the course director.

FA/FACS 2800A 6.00 Studies Abroad: The Arts in Culture I: The Arts of India I. Located in Mumbai, Pune and surrounding areas, this summer studies abroad course will provide students with a unique lived experience of the 'arts in culture' through the classical and popular arts of India. Prerequisite: Second-year standing or permission of the course director.

FA/FACS 2800B 6.00 Rome: Open City I / Roma: città aperta I (specific). Introduces students to the urban history, structure, and multi-faceted culture of Rome, Italy through the fine, performing, and popular arts, architecture, literature, and related cultural initiatives. Students live in Rome during this four-week intensive study abroad course. Prerequisite: Second-year standing or permission of the course director. Open to Non-Majors

FA/FACS 2900 6.00 Rethinking Representation. Considers the theories, conventions and politics of representation and their impact on the production and reception of the fine, performing and new media arts in both historical and contemporary contexts. Prerequisite: FA/FACS 1900 6.00 or permission of the course director. Course credit exclusion: FA/FACS 2900 6.00 prior to 2003-2004.

FA/FACS 2910 3.00 Performing Arts in Global Perspective. Considers how interconnected music, dance and theatre traditions from around the world respond to the increasing effects of migration, mass media, and new technology within a framework of globalization and transnationalism. We examine the production, reception, appropriation and commodification of a variety of artistic practices, focusing on issues of diaspora, identity, hybridity, authenticity, nationalism, post-colonialism, orientalism, and interculturalism. Our theoretical work is grounded in case studies of performing arts practices from a wide range of artistic and cultural practices and institutions, which may include celtic, hip-hop, belly dancing, salsa, karaoke, wayang kulit, bhangra, bhārata natyām, tango, and Cantonese opera, among others. Prerequisite: FA/FACS 1900 6.00 or permission of the course director.

FA/FACS 2920E 6.00 Special Studies in the Arts I: Arts, Cultures, Representations. Acquaints students with the central ideas and themes of the study of culture and representation as they relate to the fine arts. Topics include: cultural production and reproduction; aesthetic value; culture and identity; and, space, place and representation. Prerequisite: FA/FACS 1900 6.00 or permission of the course director.

FA/FACS 2920F 3.00 In Other Worlds: The Arts and Artists in Three-Dimensional Multi-User Digital Environments. Offers an interdisciplinary course that will critically examine three dimensional, multi-user digital environments (or "virtual worlds") that are rapidly becoming new forms of social literacy and new forums for the fine, performing and new media arts. Open to non-majors. Prerequisite: FA/FACS 1900 6.00 or permission of the course director.

FA/FACS 2930 6.00 The Electronic Landscape. Offers hands-on experience in using the computer as a creative medium. Utilizing a variety of interactive technologies and software, students create interactive works of art in a range of formats. This course requires a basic knowledge of HTML and Photoshop. Students without this background should enrol in FA/FACS 1939 3.00 or seek permission of the course director.

FA/FACS 2935 3.00 Foundations of Digital Media. Examines digital media representations and their interrelationships. Through both written work and creative explorations students engage with the notion of digital media layers as human and computer constructs. Prerequisites: FA/FACS 1900 6.00 and FA/FACS 2930 6.00

FA/FACS 2936 3.00 Designing Interactive Objects I. Explores the gamut of interactive contexts afforded by digital technology. Students will both examine past and current cultural artifacts and art works, and undertake creative explorations that engage with a variety of interactive settings. Prerequisite: FA/FACS 2935 3.00

FA/FACS 2950 3.00 An Introduction to Career Planning and Management. Offers an introductory course designed for students planning for a career in cultural sectors as employed or self-employed professionals. Through research and analysis, in-class presentations and self-examination, students will be better able to make career choices and follow those choices through. May not be taken as part of the FACS major requirement.

FA/FACS 2960A 3.00 Creative and Critical Fictions. Promotes critical and creative thinking and writing around specific themes in cultural studies. The course encourages a blurring of genres and refuses a necessary separation between creative and critical writing. Students produce a variety of short assignments and participate in online writing circles.

FA/FACS 3100 3.00 The Theatricality Of Power: Violence, memory, and revolution. Examines the use of theatre, spectacle, and theatricality-by the state, by oppositional groups, and by performance practitioners - to establish or challenge structures of power. Pre-requisite: 3000 level standing or permission of the course director

FA/FACS 3122 3.00 Community Arts Practice Preparatory Workshop. Lays the groundwork for the fourth-year Community Arts Practice Practicum (ENVS 4122/FACS 4122 6.00). Students identify socially-based projects with cultural organizations or community groups and negotiate an agreement to develop a collaborative cultural production over the subsequent year. Prerequisite: FA/FACS 2122 3.00. Community Arts for Social Change.

Cross-listed to: ES/ENVS 3122 3.00, FA/FACS 3122 3.00

FA/FACS 3200 3.00 Artist as Witness: Representing Disaster, Trauma and Historical Remembrance. Focusing on recent theoretical work on aesthetic responses to 20th C trauma, the course takes an interdisciplinary approach to studying the representational and collaborative strategies of artists living in-and attempting to comment upon-traumatic times. Through our engagement with the concept 'artist as witness,' we will explore the overarching theme of how the larger traumas of history 'live on' in the cultural life of individuals and communities. Students will be required to produce projects and/or prepare seminars and short papers that explore what it might mean to attend to the past through combined visual, auditory and performative modalities. The format of the course combines lectures with visits to art galleries, performances, museums and memorial sites. Drawing on topics such as war, poverty, HIV/AIDS, atomic weapons and 9/11, the course seeks to answer the following questions: What are the challenges for artists seeking to represent subject matter often thought difficult if not impossible to represent? How do artists work across and combine a range of media in order to craft a sense of their responsibility as witness to traumatic history? How do galleries, museums and memorial sites confront viewers with new, interdisciplinary approaches to thinking about history? How do curatorial practices of presentation and display affect the kinds of questions we are able to ask about the past? Open to non-majors.

FA/FACS 3300 3.00 Canadian Arts and Culture. Prime Minister Wilfrid Laurier said that "the 20th century shall be the century of Canada." As the 20th century comes to a close, scholars, artists, critics and cultural practitioners continue to explore the nature of Canadian cultural identity. In this seminar, we examine Canadian arts and culture from the perspective of Canadian identity, myths, image, symbols, imagination, experience and values. We also explore the significance to the Canadian cultural and artistic experience of colonialism, nationalism, regionalism, imperialism and heroism. Prerequisite: Third-year standing.

FA/FACS 3360 3.00 Arts and the Law: Policies and Perspectives. Explores the interaction between the arts and contemporary legal and social issues such as property rights in art, copyright and the moral rights of artists, freelance employment and labour relations in the arts, freedom of expression and censorship. May not be taken as part of the FACS 30-credit major requirement. Prerequisite: Third or fourth-year standing or permission of the course director. Course credit exclusion: FA/FACS 4920D 3.00 and FA/FACS 3920 M 3.00.

FA/FACS 3400 3.00 The Cabinet of Curiosities. Considers the Cabinet of Curiosities, a Renaissance invention designed to classify and preserve collections of "precious" objects, and its more recent manifestations (including museums, artists' installations, and Web sites) to explore a wide range of issues associated with Cultural Studies. Prerequisite: Third-year standing or permission of the course director.

FA/FACS 3450 3.00 Leonardo da Vinci: Art and Science. Explores the ideas and production of Leonardo da Vinci-a painter, sculptor, architect and urban planner, musician and composer, costume and stage designer, anatomist, engineer, mathematician, botanist, and natural scientist-as a case study in multidisciplinary across the arts and sciences. Prerequisite: Third-year standing or permission of the course director.

FA/FACS 3500 3.00 The Body in Performance. Focuses on ideas and issues surrounding embodiment and the body in performance. Through critical inquiry, it will explore various theoretical perspectives on the performing body and some of the traditions from which it has emerged. Prerequisite: FA/FACS 1900 6.00 or permission of the course director. Course credit exclusion: FA/FACS 3920H 3.00.

FA/FACS 3600A 3.00 Collaborative Acts: Designing Interactive Physical Environments. Explores designing interaction for physical environments and objects. Students will be introduced to the world of physical computing and use a real-time software environment (Max/MSP/Jitter). In their projects, students will research, design and implement interactive physical environments. Prerequisite: FACS 3931 or VISA 2057 or VISA 3054 or permission of course directors

FA/FACS 3700 3.00 A Textual Significance of Weimar Flanerie: Writing By Way of Photographic and Cinematic Images. Explore the ways in which flanerie may be used as a means of discussing photography and cinema in Weimar Germany. Prerequisite: FACS 2700 or permission of course director.

FA/FACS 3800A 6.00 Studies Abroad: The Arts in Culture II: The Arts of India II. Located in Mumbai, Pune and surrounding areas, this summer studies abroad course will provide students with a unique lived experience of the 'arts in culture' through the classical and popular arts of India. Prerequisite: Third-year standing or permission of the course director.

FA/FACS 3800B 6.00 Studies Abroad: The Arts in Culture II :Rome: Open City II. Introduces students to the urban history, structure, and multi-faceted culture of Rome, Italy through the fine, performing, and popular arts, architecture, literature, and related cultural initiatives. Students live in Rome during this four-week intensive study abroad course. Prerequisite: Third-year standing or permission of the course director. Open to Non-Majors

FA/FACS 3850 3.00 Cultures InTensions. This course will allow FACS to mount a variety of courses exploring relations between cultures as manifested/exhibited through artistic productions. It will explore a given culture's aspirations in and of itself and social-political tensions within and between cultures. Prerequisite: FA/FACS 1900 and third year standing or permission of course director. Open to Non-Majors

FA/FACS 3850 6.00 Cultures InTensions. This course will allow FACS to mount a variety of courses exploring relations between cultures as manifested/exhibited through artistic productions. It will explore a given culture's aspirations in and of itself and social-political tensions within and between cultures. Open to Non-Majors Prerequisite: FA/FACS 1900 and third year standing or permission of course director.

FA/FACS 3900A 3.00 Arts and Cultures: South Asia. Focuses on issues of post coloniality and art from various cultural contexts in South Asia such as India, Pakistan, and Bangladesh. We will draw from these specific cultural contexts, as well as from traditional and contemporary artists and performers which work and live within the South Asian postcolony. Participation may include field trips to museums, art galleries, dance and music performances, cinemas or theatres. Prerequisite: FA/FACS 1900 6.00 and third-year standing or permission of the course director.

FA/FACS 3900B 3.00 Expressive cultures of the Philippines and its diaspora. Examines Filipino culture and identity as they are expressed through cultural production in the Philippines and in the Filipino diaspora throughout Europe, Latin America, and North America. Prerequisite: FA/FACS 1900 6.00 and third-year standing or permission of the course director. Open to non-majors.

FA/FACS 3900M 3.00 Arts and Cultures: Indigenous Cultures. Focuses on issues of post-coloniality and art from two specific cultural contexts of aboriginal or indigenous peoples that are of North American First Nations cultures and Aboriginal peoples of Australia. We will take a close look at the uses and abuses of traditional art, culture and ritual as well as their more modern reformations and appropriations in the global community. Participation may include field trips to museums, art galleries, dance and music performances, cinemas or theatres. Prerequisites: FA/FACS 1900 6.00 and 3rd year standing or permission of the course director.

FA/FACS 3920D 3.00 Contemporary Theory Through Photography and Film. Making reference to a very small number of carefully selected photographic and cinematic texts, the course uses the mechanically reproduced image as a tool to focus theoretical discourse on either

textuality or intertextuality. Prerequisite: Second-year fine arts cultural studies course.

FA/FACS 3920F 3.00 Arts and Cultural Policy. Introduces students to the politics of arts and cultural policy-making and the civil society. It pays particular attention to the role of Canadian municipal, provincial and federal governments and institutions as well as the struggles that have emerged between the state and the cultural community. It reviews and assesses Canadian arts, heritage and cultural industry policies beside those of one or more other countries such as Australia, France, Great Britain and the United States with particular attention to the cultural, social, economic, political and technological factors that influence the policy process. May not be taken as part of the FACS 30-credit major requirement. Prerequisite: Third- or fourth-year standing or permission of the course director.

FA/FACS 3920J 6.00 Memory and Place. How do places contribute to shaping memory? What is it about objects, art and architecture, for example, that seem to “capture” memory? Why are certain places meaningful and others less so? This course explores objects and ideas all the while embedded in history to better formulate a notion of the power of place and its relationship to memory. Course credit exclusions: AK/FA 3010D 6.00.

Cross-listed to: FA/FACS 3920J6.00, FA/VISA 3710 6.00

FA/FACS 3920K 6.00 Special Studies in the Arts II: Cultural Production in an International Environment. Via WebCT, this course will include students from six universities in Canada and Europe. Each university will focus on a different theme in response to the cultural geography in which it is situated. Drawing from the rich and complex diversity of cultural life in Toronto, the York University segment of the course will examine the topic The Arts in a Multicultural Environment. May not be taken as part of the FACS 30-credit major requirement. Prerequisite: Third- or fourth-year standing in the Faculty of Fine Arts or permission of the course director.

FA/FACS 3920L 3.00 Urban Culture. Explores the modern city as a paradigmatic and vital place of contemporary human experience focusing on a variety of resources from urbanism, visual culture, aesthetics, architecture, cinema, contemporary art and popular culture. Prerequisite: FACS 1900 and third year standing or permission of course director. Open to non-majors.

FA/FACS 3920N 3.00 Special Studies in the Arts II: Arts, Media, and Politics in Indonesia. Investigates the problems of Indonesian arts in relation to Indonesian politics and media from the perspectives of cultural studies. In addition, it will examine how Indonesia contributes to the current intercultural art movements in the international arena. Prerequisite: Third-year standing or permission of the course director.

FA/FACS 3930 3.00 Screen-Based Fluid Interfaces. Looks beyond the vocabulary of the point-and-click gesture to fluid mouse gestures in interactive new media art. Fluid mouse gestures, those that involve reacting to movement, provide a vast array of possibilities to generate complex meaning. A course material fee is required. Course credit exclusion: FA/FACS 3930 6.00. Prerequisite: FA/FACS 2930 6.00 or permission of the course director.

FA/FACS 3931 3.00 Interactive Installation and Performance I. Provides students with an opportunity to explore interactivity in public physical settings. Students create works where the performer and/or audience interact with media on the computer through means other than the keyboard and mouse. Prerequisite: FA/FACS 2930 6.00 (formerly FA/INFA 2930 6.00) or permission of the instructor. Course credit exclusion: FA/FACS 3931 6.00, FA/INFA 3931 6.00.

FA/FACS 3935 3.00 New Media Forms: The Database. Explores the database in new media art. Students will look at the database as a cultural object, evaluate art that uses databases, learn the mechanics of databases and create new media art that uses databases. Course material fees required. Prerequisite: FA/FACS 2930 6.00 or permission of course director.

FA/FACS 3936 3.00 Designing Interactive Objects II. Provides a project-based continuation of Designing Interactive Objects I. Students create advanced interactive works that can actively retain qualities of their participants and/or integrate interactive settings (e.g. cell phone and physical installation). Prerequisite: FA/FACS 2936 3.00

FA/FACS 3937 3.00 Sound for Artists. Explores sound art both as a distinct practice and through its interdisciplinary intersections with new media, sculptural, installation, performative, musical, and other time-based art practices. Prerequisite: FACS 2930 or permission of the course director.

FA/FACS 3938 3.00 Video in the Expanded Field. Explores video through its interdisciplinary intersections with new media, sculptural, installation, performative, musical, and other practices. Open to non-majors. Prerequisite: FACS 2930 or permission of the course director.

FA/FACS 3950 3.00 Arts Administration. Provides an introduction to the skills and knowledge required for contemporary arts management. The management of the arts in Canada is illustrated and analyzed through a survey of the history and development of arts policy and administration practice. May not be taken as part of the FACS 30-credit major requirement. Prerequisite: Third- or fourth-year standing or permission of the course director.

FA/FACS 4122 6.00 Community Arts Practice Practicum Seminar. Provides students with an opportunity to implement proposals developed in the third-year Community Arts Practice Preparatory Workshop (ENVS 3122/FACS 3122) by immersing them directly in a creative production in collaboration with cultural and/or community organizations to educate and advocate around social-political issues. Prerequisite: FA/FACS 2122 (3.00) and FA/FACS 3122 (3.00).

Cross-listed to: ES/ENVS 4122 6.00, FA/FACS 4122 6.00

FA/FACS 4200 3.00 Culture and Memory. Explores the ways in which culture is based on the construction, manipulation and transmission of memories, the role played by memory in the formation of collective and individual identities, and the politics of memory. Prerequisite: Third and fourth year standing in the Faculty of Fine Arts or permission of the course director. Course credit exclusion: FA/FACS 4920 F 3.00

FA/FACS 4210 3.00 Culture & Community in the Liminal City. Explores the idea of the liminal city begins with the assumption that the city is not simply a physical and material structure that exists in linear and progressive time. Rather, the city is something that is constantly produced and reproduced in the inter-subjective field of our everyday lives. As such, the city can also be characterized as an imaginary, ... an enabling but not fully explicable symbolic matrix within which people imagine and act as world-making collective agents. Course credit exclusion: FA/FACS 4920 I 3.00.

FA/FACS 4220 3.00 Feminist Cultural Theory. Designed to give students an awareness of the relationships between practice, representation and theory in feminist approaches in the study of culture. The course considers themes that have become central to feminist theory such as body, identity, nature and the difference in terms of the contributions that have been made by feminist cultural theorists both to feminist theory and cultural theory more generally. The concept of culture itself will be examined according to a range of definitions and redefinitions employed by feminists in addressing cultural identities; cultural practices and everyday life; cultural production (especially visual culture, new media); questions of cultural reproduction, translation and appropriation; postcoloniality and the study of technology. We will consider a wide range of representations and practices. Prerequisite: Permission of the course director. Course credit exclusion: FA/FACS 4920G 3.00.

FA/FACS 4400 3.00 The Sensorium. Considers the five senses (which give humans the potential to see, hear, smell, taste and touch) and their impact on the production and reception of the arts from a range of perspectives. Prerequisite: FA/FACS 1900 and fourth-year standing in the Faculty of Fine Arts or permission of the course director.

FA/FACS 4700 3.00 Exploring Contemporary Theory Through Photographic and Cinematic Texts. Making reference to a very small number of carefully selected photographic and cinematic texts, the course uses the mechanically reproduced image as a tool to focus theoretical discourse on either textuality or intertextuality. Prerequisite: Second-year fine arts cultural studies course. Course credit exclusion: FA/FACS 3920D 3.00.

FA/FACS 4750 3.00 Theories and Practices of Documentary. Explores contemporary documentary theory and historical documentary practices from interdisciplinary perspectives drawing on disciplines such as dance, design, cinema, literature, music, new media, photography, theatre, and/or the visual arts. Individually or collectively, students construct their own interdisciplinary documentary project. Prerequisite: FA/FACS 1900 and fourth-year standing or permission of the course director. Open to non-majors.

FA/FACS 4900A 3.00 Contemporary Issues in the Arts: Anatomy of Post-modernism. Explores post-modernism both broadly, in cultural terms (that is, as it relates to notions of post-modernity), and more narrowly, in terms of its relationships to the fine, performing and new media arts. Prerequisite: Fourth-year standing or permission of the course director.

FA/FACS 4900B 3.00 Hypermedia. Examines contemporary critical issues in the fine arts. Topics vary from year to year, and may include ideas of modernism and post-modernism; the role of aesthetics; gender issues; performance theory; semiotics; and the influence of philosophy, sociology and psychology on current art practice. Where appropriate, visiting artists, critics and curators are invited for guest seminars. Prerequisite: Fourth-year standing in the Faculty of Fine Arts, or permission of the course director.

FA/FACS 4920C 3.00 Colonialism and Arts in Cross-Cultural Perspective. Provides students with the analytical tools necessary to address the current debates in contemporary cultural theory by drawing on ethnographic case studies in Asia, Africa, Latin America and the Caribbean and Native North America. Student projects explore issues in gender and art; museums and representation; cultural appropriation; authenticity and tradition; Western views of the primitive; and consumption. Prerequisite: FA/INFA 3900 6.00, or a non-Western art history course or an introductory course in anthropology or ethnomusicology or permission of the instructor.

FA/FACS 4920H 3.00 Special Studies in the Arts III: Art and Spectacle. A thematic study in which the history, function and production of spectacle will be examined in the light of its relation to the arts and to society. Contemporary relations between art and spectacle will be approached through various artists' works. Prerequisite: Fourth-year Faculty of Fine Arts standing or permission of the course director.

FA/FACS 4920K 3.00 Special Studies in the Arts III: Representing India: The Globalization of Indian Popular Culture. Examines Indian popular culture both within India and beyond its borders in the South Asian Diaspora. Drawing upon various artistic disciplines (dance, film, music, visual arts) and craft traditions (the Hinduization of t-shirts and sacred indigenous motifs on calendars for example), it will survey various popular cultural traditions travelling around the globe. The globalization of these traditions has resulted in a crisis of representation. Thus, the course will theorize the representation of India through postcolonial, postmodern and South Asian Cultural Studies perspectives. Prerequisite: Fourth-year standing or permission of the course director.

FA/FACS 4930 3.00 Cultural Theory Through New Media. Offers an upper-level course in both multimedia art and contemporary cultural theory that is designed for students who have already achieved a significant level of accomplishment in both these areas. Students will undertake extensive theoretical research using both traditional and online resources. The result of that research will be integrated into advanced multimedia projects. Course material fee required. Prerequisite: At least six credits in the new media area at the third-year level or permission of the course director. Course credit exclusion: FA/FACS 4930 6.00, FA/INFA 4930 6.00.

FA/FACS 4931 3.00 Interactive Installation and Performance II. Extends on the foundation laid in FA/FACS 3931: Interactive Installation and Performance I in an advanced studio setting. Students will pursue advanced, self-directed individual and group projects. Prerequisite: FA/FACS 3931 3.00 and three additional credits in the FACS new media area at the third-year level or permission of course director. Course credit exclusion: FA/FACS 3931 6.00.

FA/FACS 4932 3.00 Interactive Dance Studio: Explorations in electronically mediated performance. This interdisciplinary studio course explores interactive dance contexts. Through the creation of electronically mediated performance environments, students in dance and new media art collaborate to merge movement and technology. Prerequisite: FA/FACS 3931 3.00 or FA/DANC 3220 3.00 or FA/DANC 4220 3.00 or permission of the course director.

Cross-listed to: FA/DANC 4221 3.00, FA/FACS 4932 3.00

FA/FACS 4934 3.00 Tactical Media: Art and Activism through New Media. Explores the manifold manners in which art and activism intersect within new technological environments, specifically the Internet. The work of contemporary new media activists will be studied in the context of historical sociopolitical interventionist practices. Prerequisite: Six credits in FACS New Media at the third year level or permission of the course director.

FA/FACS 4935 3.00 New Media Forms: Virtual Communities. Examines virtual communities in the context of doing creative work. We will examine the history of multi-user environments, explore systems that support such work, and pursue creative projects in a virtual environment. Prerequisite: Six credits in the FACS new media area at the third-year level or permission of course director.

FA/FACS 4940 3.00 Art, Music, and Some Languages of Interdisciplinarity. Explores a variety of relationships which have been established between art and music-or, more broadly, between image and sound-through the 20th and 21st century. It offers the opportunity to (re)evaluate from interdisciplinary perspectives the production and cultural positioning of each discipline, or medium, in light of the other as well as to consider the transformative character of artistic productions which result from their marriage. In conjunction, the course works toward developing a critical language which can both explicate, and mediate between, the visual and the aural along with the perceptual experiences they generate. Prerequisite: FA/FACS 1900 6.00 and fourth-year standing or permission of the course director.

FA/FACS 4945 3.00 SoundaXis: Architecture Music Acoustics. Explores intersections between architecture and music, especially as they converge in the interdisciplinary field of acoustics, or the direction and perception of sound. Taking into account a wide range of experiments by architects, composers, artists, filmmakers, and performers, the course will consider relationships between space and sound, the pivotal role of the body in negotiating these relationships, and the possibilities for experiencing the city as a series of soundscapes. Course credit exclusion: FA/FACS 4920L 3.00

FA/FACS 4950 3.00 Independent Study. Accommodates advanced students who wish to undertake an independent project based in the studies stream, studio stream, or a combination of both. Project content must be related to the mandate of the FACS program. Proposals and accompanying bibliography must be signed by a FACS faculty supervisor and approved by the FACS coordinator. Open by application only. Course credit exclusion: FA/FACS 4960 3.00, FA/FACS 4950 6.00.

FA/FACS 4950 6.00 Independent Studies. Accommodates advanced students who wish to undertake an independent project based in the studies stream, studio stream, or a combination of both. Project content must be related to the mandate of the FACS program. Proposals and accompanying bibliography must be signed by a FACS faculty supervisor and approved by the FACS coordinator. Open by application only. Course credit exclusion: FA/FACS 4950 6.00, FA/FACS 4960 3.00.

FA/FACS 4960 3.00 Internship. Allows advanced students to undertake an approved internship at an arts or educational organization. Internship activity must be related to the mandate of the FACS program. Proposals

must be signed by a FACS faculty supervisor and approved by the FACS coordinator. Not available to students who have taken FA/FACS 4950 3.00: Independent Study. Prerequisite: Open by application only. Course credit exclusion: FA/FACS 4960 6.00.

FA/FACS 4970 3.00 Interdisciplinary Seminar. A seminar which revisits relations between the arts and interdisciplinary through a theme selected by the course director. Prerequisites: Fourth-year standing and FA/FACS 1900 6.00 or permission of the course director.

FA/FACS 4970A 3.00 Performance: Theory and Practice. While introducing performance studies as a new and encompassing scholarly field, this course will also focus on performance as an elaborated cultural form in both the Western and non-Western worlds. Prerequisite: Fourth-year standing in the Faculty of Fine Arts or permission of the course director.

The Department of French Studies offers courses in three curricular areas enabling students to pursue interests in French language, linguistics, and literature. The language-skills courses form a prescribed language sequence designed to help students improve their proficiency in French. These courses constitute a curricular core, which is complemented by offerings in linguistics and literature. In addition to Honours BA and BA degree programs, the Department of French Studies offers Certificates of Language Proficiency in Basic French, Intermediate French and Advanced French.

For specific program or certificate requirements, please consult the Faculty of Arts Programs of Study section of this calendar.

Courses in French Studies

A language placement questionnaire must be filled out by students prior to enrolling for the first time in the Department of French Studies.

In order to proceed from one level of French studies to the next (the four levels being 1000, 2000, 3000, 4000), a student must obtain a minimum grade of C in each language course. In order to proceed to AS/FR 4090 6.00, a minimum grade of B must be achieved in AS/FR 3080 6.00 or AS/FR 3081 3.00 and AS/FR 3082 3.00.

AS/FR 1020 6.00 Elementary French: Near Beginners. This course is designed for students who, although they are not complete beginners, have not studied sufficient French to be admitted to AS/FR 1030 6.00. The course involves the development of oral and written skills. Grammar and reading are also emphasized. Four class hours and lab sessions. Course

Geography is concerned with the spatial variations of human and physical phenomena, the processes which produce these variations and the interrelationships between people and their environments. Fields that have always been of importance to geographers are well represented in the department. Regional courses dealing with Canada, S.E. Asia and the Caribbean explore the past and present geography of these areas. Likewise there are clusters of courses relating to urban, economic, cultural, historical and physical geography. Combined with these offerings are specialties such as those dealing with water resources and resource management, urban and regional planning, ecological studies, landforms, arctic climates and environments and the social geography of cities and rural areas.

For specific Honours BA and BA program requirements please consult the Faculty of Arts Programs of Study section of this calendar. For specific Honours BSc and BSc program requirements please consult the Faculty of Science and Engineering Programs of Study section of this calendar.

The department also offers a Specialized Honours BA in geography and urban studies. For details, please consult the Faculty of Arts Programs of Study section of this calendar.

Prerequisites: The specific course prerequisites listed for geography courses in this calendar are intended to ensure that students do not unwittingly enrol in courses for which they have inadequate preparation. In some cases, students lacking the stated course prerequisite(s) may be permitted to enrol in the course by written permission of the course director.

AS/GEOG 2075 3.00 Geographies of Everyday Life. This course critically explores 'everyday life' and the spaces and places through which it is experienced, reproduced, represented and negotiated. Topics covered

include, geographies of mobility; urban parks; geographies of capitalism; geographies of cinema; surveillance; geographies of boredom and silence; geographies of deliberation and everyday sites of citizenship and identity formation. Course credit exclusions: None.

AS/GEOG 2100 6.00 Economic Geography. This course provides a broad overview of how economic geographers understand both spatial patterns of economic activities, and the ways in which these patterns create and shape the places in which we (or others) live and work. Prerequisite: AS/GEOG 1410 6.00 or AS/GEOG 1000 6.00 or AK/GEOG 2500 6.00 or an introductory course in economics or written permission of the course director. Course credit exclusions: AS/GEOG 2105 3.00.

AS/GEOG 2105 3.00 Economic Geography. This course provides an introduction to the geography of economic production units, regional agglomerations of industry, flows of international trade, labour and investment, and the changing political, cultural and environmental context of modern consumption-driven society. Prerequisites: One of AS/GEOG 1410 6.00, AS/GEOG 1000 6.00, AK/GEOG 2500 6.00, an introductory course (full or half) in Economics or written permission of the course director. Course credit exclusions: AS/GEOG 2100 6.00.

AS/SC/GEOG 2130 3.00 Fundamentals of Map Design and Interpretation. This course introduces the basic principles and conventions for compiling, designing, drafting and interpreting maps and other visual representations of geographic data. Two lecture hours, one scheduled laboratory hour. One term. Prerequisite: One of AS/SC/GEOG 1400 6.00, AS/GEOG 1410 6.00, AK/GEOG 2500 6.00, or AK/GEOG 2510 6.00. Course credit exclusions: None.

Cross-listed to: AS/GEOG 2130 3.00, SC/GEOG 2130 3.00

AS/GEOG 2300 6.00 Social Geography. A study of social processes underlying spatial patterns, relationships and interactions within and among social groups. The course examines urban and rural social structures within their spatial settings, focusing on social and environmental problems and solutions. Prerequisite: AS/GEOG 1000 6.00 or AS/GEOG 1410 6.00 or AK/GEOG 2500 6.00, AK/GEOG 3410 6.00, AK/SOSC 3302 6.00. Course credit exclusions: AK/GEOG 3410 6.00, AK/SOSC 3302 6.00.

AS/GEOG 2305 3.00 Geographies of Identity. This course examines the production, reproduction and mediation of identities through space and place at various scales. The course will introduce students to the complex relations between space, place and identity, and ask them to think critically about the spaces of their own lives.

AS/GEOG 2310 6.00 Introduction to Refugee and Migration Studies. An introduction to the problem of refugees: conceptual issues (definitions, refugee rights, ethical norms), the historical background, Canadian policy and the issues in specific areas of the world - Africa, Asia, Latin America, Eastern Europe and the Middle East. Prerequisite: A 1000-level social science course. Course credit exclusions: AS/SOSC 1130 9.00, AS/SOSC 1139 9.00.

Cross-listed to: AK/SOSC 2000 6.00, AS/GEOG 2310 6.00

AS/SC/GEOG 2350 3.00 Introduction to Geoinformatics. This course covers fundamental concepts and approaches of geographical information systems, remote sensing and global positioning systems. Students also acquire knowledge and skills in descriptive statistics, map design and interpretation, and basic computer cartography. Two hour lecture, two hour lab. Prerequisite: AS/GEOG 1410 6.00 or AS/GEOG 1400 6.00 or AS/GEOG 1000 6.00 or AK/GEOG 2500 6.00 or AK/GEOG 2510 6.00 or written permission of the course director. Course credit exclusions: AS/SC/GEOG 2390G 3.00 (prior to Fall/Winter 2003-2004), SC/EATS 2610 2.00, SC/ENG 2110 2.00.

Cross-listed to: AS/GEOG 2350 3.00, SC/GEOG 2350 3.00

AS/SC/GEOG 2400 6.00 The Hydrosphere. This course examines the physical processes and the environmental factors that govern the movement of water and energy in lakes, rivers, oceans and the soil-plant-atmosphere continuum. Boundary-layer climates and mechanisms of water movement and storage are emphasized. Two lecture hours per week, 16 three-hour laboratories over two terms. Prerequisite: AS/SC/

GEOG 1400 6.00 or AK/GEOG 2510 6.00. Course credit exclusions: None.

Cross-listed to: AS/GEOG 2400 6.00, SC/GEOG 2400 6.00

AS/SC/GEOG 2420 3.00 Introductory Statistical Analysis in Geography. This introductory course aims to provide a working knowledge of several statistical techniques which are widely used in many branches of geography. Some attention is also given to broader questions concerning the nature of the scientific method. Two lecture hours per week, nine two-hour laboratory sessions. One term. Prerequisites: 24 credits successfully completed. This course is intended primarily for students majoring in geography and is normally taken during the second year of study. Course credit exclusions: AS/ECON 2500 3.00, AS/SC/KINE 2050 3.00 (Prior to Fall/Winter 2007-08), HH/KINE 2050 3.00, AS/SC/KINE 3150 3.00 (Prior to Fall/Winter 2007-08), HH/KINE 3150 3.00, AS/SC/MATH 1132 3.00, AS/POLS 3300 6.00, AS/SOCI 3030 6.00, AK/ADMS 3320 3.00 (prior to Fall/Winter 2005-2006), AK/MATH 2430 3.00, AK/AS/SC/MATH 2560 3.00, AK/AS/SC/MATH 2565 3.00, AK/AS/SC/MATH 2570 3.00, AK/MATH 2720 3.00, AK/AS/SC/PSYC 2020 6.00 (Prior to Fall/Winter 2007-08), HH/PSYC 2020 6.00, AK/AS/SC/PSYC 2021 3.00 (Prior to Fall/Winter 2007-08), HH/PSYC 2021 3.00, AK/PSYC 2510 3.00, ES/ENVS 2010 6.00, ES/ENVS 2010 3.00, SC/BIOL 2060 3.00.

Cross-listed to: AS/GEOG 2420 3.00, SC/GEOG 2420 3.00

AS/SC/GEOG 2500 3.00 Introduction to Vegetation and Soils. An introduction to the structure and functioning of vegetation and soil systems, emphasizing local patterns and processes, methods of description and sampling, dynamic processes, response to environmental change and human disturbance. Field work is emphasized in laboratories. Two lecture hours and two laboratory hours per week, a one-day field trip. One term. Prerequisite: AS/SC/GEOG 1400 6.00 or AK/GEOG 2510 6.00 or ES/ENVS 2500 6.00. Course credit exclusions: None.

Cross-listed to: AS/GEOG 2500 3.00, SC/GEOG 2500 3.00

AK/GEOG 2500 6.00 Introduction to Human Geography. This course is an analytical introduction to geography. Attention is focused on the impact of human decisions and activities on geographical relationships. The development and present significance of major geographical themes are traced, including population, resources, the environment and occurrence. Course credit exclusion: AS/SC/GEOG 1410 6.00.

AK/GEOG 2510 6.00 Introduction to Physical Geography. Basic concepts in geomorphology, soils, biogeography, meteorology and climatology are discussed. The application of general systems theory to physical problems is considered. Laboratory work and field study are integral parts of the course. Course credit exclusion: AS/SC/GEOG 1400 6.00.

AS/SC/GEOG 2600 3.00 Geomorphology I. This course concentrates on basic principles and fundamental concepts in geomorphology, including energy flows in geomorphic systems, hill slope forms and materials, weathering and landforms, and drainage basin geomorphology and hydrology (with a particular emphasis on Canadian examples). Prerequisite: AS/SC/GEOG 1400 6.00 or AK/GEOG 2510 6.00 or SC/EATS 1010 3.00. Course credit exclusions: AS/SC/GEOG 2700 3.00 (prior to Fall/Winter 2004-2005).

Cross-listed to: AS/GEOG 2600 3.00, SC/GEOG 2600 3.00

AS/SC/GEOG 2610 3.00 Geomorphology II. This course concentrates on geomorphic processes and landforms (with a particular emphasis on Canadian examples). Five main areas are explored: fluvial forms and processes; the glaciation of Canada and glacial mechanics; periglacial; aeolian processes; and coastal processes and landforms. Prerequisite: AS/SC/GEOG 2600 3.00. Course credit exclusions: AS/SC/GEOG 3600 3.00 (prior to Fall/Winter 2004-2005).

Cross-listed to: AS/GEOG 2610 3.00, SC/GEOG 2610 3.00

3000-Level Courses

Prerequisites for Arts and Science: Unless otherwise indicated, 3000-level geography courses are open only to students who have successfully

completed at least 24 credits, including any specific course prerequisites noted in the following course outlines.

AS/GEOG 3010 6.00 Geography of Canada. A study of basic physical and human geographical patterns in Canada, stressing the processes which produced the latter, and selected characteristics of major Canadian regions. Tutorials require intensive reading in selected sources. Prerequisite: One of AS/SC/GEOG 1400 6.00, AK/GEOG 2510 6.00, AS/GEOG 1410 6.00, or AK/GEOG 2500 6.00. Course credit exclusions: AK/GEOG 3540 6.00.

AS/GEOG 3050 3.00 Nature, Power and Society: Introduction to Political Ecology. This course examines the geographic understanding of nature-society relationships. We review popular and scientific theories of environmental change, conflict and conservation, and examine the role that politics and power play in shaping ecological problems and issues. Prerequisite: 54 credits completed including at least three credits in geography (GEOG) or permission of the instructor. Course credit exclusions: AS/GEOG 3050 6.00 (prior to Fall/Winter 2005-2006), AK/GEOG 3450 6.00.

AS/GEOG 3051 3.00 International Political Ecology. This course applies a political ecological approach to the understanding of nature-society relationships. Using case studies from Asia, Africa and the America, the course examines the everyday realities of people and landscapes affected by environmental change, conflict and conversation. Prerequisite: AS/GEOG 3050 3.00 or permission of the instructor. Course credit exclusions: AS/GEOG 3050 6.00 (prior to Fall/Winter 2005-2006).

AS/GEOG 3060 3.00 Post-Colonial Geographies. This course examines the particular landscapes produced by colonialism and the struggles to move beyond it. Attention is paid to the use of space and place as mechanisms of control and liberation. Examples are international, and concern fictional and non-fictional landscapes. Prerequisite: 54 credits successfully completed. Course credit exclusions: None.

AS/GEOG 3080 3.00 Reading Landscapes Through Time. Cultural landscapes change over time. This can result from changes in legal tenure, cultural adaptation, changes in the economic base or historical events. This course considers landscapes in various countries in chronological sequence. Course credit exclusions: None.

Cross-listed to: AS/GEOG 3080 3.00, AS/HIST 3890 3.00

AS/GEOG 3081 3.00 Land and People: Historical Geographies of Modern Ireland. This course explores selected themes on the historical geography of Ireland, concentrating on the period since 1600. Attention is paid to the role and impact of economic, cultural, and political processes that have shaped Irish landscapes and senses of place. Course credit exclusions: None.

AK/GEOG 3100 3.00 Marketing Geography. Geographical concepts in general and locational techniques specifically can be applied to both public sector and private sector problems. The primary concerns are retail location, the behaviour of business and consumers, and the locational strategies of companies. Course credit exclusion: AK/GEOG 3100A 3.00 (prior to Fall/Winter 2005-2006).

AS/GEOG 3120 6.00 Urban Geography. An introductory course in which past and present urban phenomena are examined. Attention is focused on the analysis of regional urban networks and the internal spatial structure of the city. Prerequisites: 54 credits successfully completed, including one of AS/GEOG 1410 6.00, AK/GEOG 2500 6.00, or AS/SOSC 2710 9.00. Course credit exclusions: AK/GEOG 3430 6.00.

AS/GEOG 3130 3.00 The Global Economy. This course examines the evolution of the world economy as well as the major institutions that have supported it, and interprets the new geography of investment, production and consumption that accompanies it. Course credit exclusions: None.

AS/GEOG 3140 3.00 Retailing, Shopping, Society and Space. This course provides an overview of consumer shopping behaviour, the structure and process of retail location, and various social and economic issues associated with the contemporary retail economy. The geographical perspective is emphasized. Prerequisites: 54 credits passed,

including AS/GEOG 1000 6.00 or AS/GEOG 1410 6.00 or AK/GEOG 2500 6.00 or written permission of the course director. Course credit exclusions: AK/GEOG 3100 3.00, AK/GEOG 3100A 3.00 (prior to Fall/Winter 2005-2006).

AS/SC/GEOG 3180 3.00 Introduction to Geographic Information Systems (GIS). An introduction to the application of GIS to geographical/environmental problems. A broad conceptual overview of GIS approaches and their strengths and limitations. Students gain hands-on experience in the use of raster-based GIS technology with particular reference to resource management and planning topics. One and one-half lecture hours, one and one-half laboratory hours. One term. Prerequisite: AS/SC/GEOG 2420 3.00. Course credit exclusions: ES/ENVS 3520 3.00.

Cross-listed to: AS/GEOG 3180 3.00, SC/GEOG 3180 3.00

AS/SC/GEOG 3200 3.00 Terrestrial Ecosystems. An examination of the structure and function of vegetation and soil systems. The course focuses on such topics as the adjustment of ecosystems to human modification and the role of biogeography in conservation and resource management. Three lecture hours. One term. Prerequisite: 54 credits successfully completed, including one of AS/SC/GEOG 1400 6.00, AK/GEOG 2510 6.00, ES/ENVS 2420 3.00 or SC/BIOL 2050 4.00. Course credit exclusions: None.

Cross-listed to: AS/GEOG 3200 3.00, SC/GEOG 3200 3.00

AS/GEOG 3250 3.00 Environmental Perception and Natural Disasters. This course assesses the way people perceive their environment. Initially the course considers the theory of environmental perception. Considerable emphasis is placed on appraisal of natural and technological hazards and cultural perception. Course credit exclusions: None.

AS/GEOG 3300 3.00 Space/Place. This course explores the construction, reproduction and representation of space, place and scale. Students are introduced to important socio-spatial theories that have affected how geographers understand such key concepts, including feminism, Marxism and postmodernism. Prerequisites: 54 credits passed. Course credit exclusions: None.

AK/GEOG 3310 3.00 Glacial and Periglacial Geomorphology. A systematic study of glacial and periglacial landscapes, climatic change and methods used in the study of Quaternary landforms. Special emphasis is given to the Quaternary landscape of Ontario. Prerequisite: AK/GEOG 2510 6.00 or, for students with equivalent preparation, permission of the coordinator of geography. Course credit exclusion: None.

AK/GEOG 3360 3.00 Morphogenesis of Soils. A study of the influence of climate, vegetation, parent material, topography and time on the development, classification and chemistry of soils. Prerequisite: AK/GEOG 2510 6.00 or, for students with equivalent preparation, permission of the coordinator of geography. Course credit exclusion: None.

AK/GEOG 3360 6.00 Morphogenesis of Soils. A study of the influence of climate, vegetation, parent material, topography and time on the development, classification and chemistry of soils. Prerequisite: AK/GEOG 2510 6.00 or, for students with equivalent preparation, permission of the coordinator of geography. Note: When offered as a full course, additional attention will be given to Quaternary soils. Course credit exclusion: None.

AK/GEOG 3370 3.00 Methods of Sediment and Soil Analysis. An examination of methods of field and laboratory analyses of soils and sediments including soil sampling, soil mapping, mechanical analyses and data interpretation. Special emphasis is placed on soil and sediment research and field problems in Ontario. Prerequisite: AK/GEOG 2510 6.00 or, for students with equivalent preparation, permission of the coordinator of geography. Course credit exclusion: None.

AS/GEOG 3370 3.00 Spaces of Third World Development. The course deals with conceptual debates on "Third World" development. It explores issues of development including economic growth and poverty, resource use, agrarian change, industrial transformation, service-sector development, rural-urban inequality, gender relations, neoliberalism and imperialism, and prospect for democracy and macro-level structural social

change in the less developed world. Prerequisites: 54 credits successfully completed including AS/GEOG 1000 6.00 or AS/GEOG 1400 6.00, or written permission of the course director. Course credit exclusions: AS/GEOG 4370 3.00.

AS/GEOG 3400 3.00 Dimensions of Difference: Introduction to Feminist Geography. This course considers the construction, reproduction and representation of identity and difference in, through and across space and time. This course will introduce students to important feminist theorists and academics that have affected how geographers understand social relations through space, including gender relations and their intersection with race and power relations. Prerequisites: 54 credits successfully completed. Course credit exclusions: None.

AK/GEOG 3400 6.00 Gender Population and Migration. Characteristics and problems in growth and distribution of human populations, including birth, fertility and death rates, population growth and environment, globalization and migration and population control policies. Gender perspectives are emphasized. Course credit exclusion: AK/SOCI 3880D 6.00 (prior to Summer 2005).

Cross-listed to: AK/GEOG 3400 6.00, AK/SOCI 3400 6.00

AK/GEOG 3410 6.00 Social and Cultural Spaces. Encompassing two core areas in human geography, this course discusses the ways in which places and identities are socially and culturally produced, the human impact on the landscape, and the diffusion and alteration of languages, religions and other cultural forms. Course credit exclusions: AS/GEOG 2065 3.00, AS/GEOG 2300 6.00.

Cross-listed to: AK/GEOG 3410 6.00, AK/SOSC 3302 6.00

AS/GEOG 3420 3.00 Research Design and Field Studies. This course begins with lectures on field research methodology. The second phase concentrates on defining a field problem, leading to data collection in the field. The final part of the course deals with data analysis, and reviews methodological implications. Two two-hour periods per week (including lectures, seminars and workshops), a three to four day field trip. One term. Prerequisites: Students must be registered as Honours majors in geography and must have successfully completed 54 credits, including AS/SC/GEOG 1400 6.00 or AK/GEOG 2510 6.00; AS/GEOG 1410 6.00 or AK/GEOG 2500 6.00; AS/SC/GEOG 2420 3.00; or permission of the department. Course credit exclusions: AS/SC/GEOG 3390B 3.00 (prior to Fall/Winter 2002-2003), AS/SC/GEOG 4540 3.00, AK/MATH 3330 3.00.

AK/GEOG 3430 6.00 Urban Geography. The pervasive impact of urbanization on human activities and their spatial expression will be the main theme of this course. There will be detailed study of the different types of urban places, considering both urban form and function. Also considered will be the relationships between urban, suburban and rural localities. Field studies, especially of urban land use, may be part of the course. Course credit exclusion: AS/GEOG 3120 6.00.

AS/SC/GEOG 3440 3.00 Environmental Remote Sensing. This course represents an introduction to the methods in which remote sensing data are collected, processed and analyzed. An emphasis is placed on environmental applications. The synergy between the technologies of remote sensing and geographic information systems (GIS) is also stressed. Two lecture hours, two laboratory hours. One term. Prerequisite(s): AS/SC/GEOG 2420 3.00, or ES/ENVS 2010 6.00 and one 2000-level environmental studies theme foundation course; or written permission of the course director. Course credit exclusions: None.

Cross-listed to: AS/GEOG 3440 3.00, ES/ENVS 3521 3.00, SC/GEOG 3440 3.00

AK/GEOG 3490 6.00 Making Canada: Two Centuries of Landscape and Social Changes. This course investigates transformation of the territory from a condition of Nature- to Human-dominance, including attitudes to environment, clearing land, spread of farming, regimentation of the landscape, and the organization of societal responses to occupying a new land. Emphasis is on the 19th and early 20th centuries. Course credit exclusion: None.

AS/SC/GEOG 3500 3.00 Biogeography. An analysis of the geography of plants and animals emphasizing processes that operate at the

population level, the origin and diversity of plants and animals, geographic patterns of diversity, and dynamics of species populations from local to continental scales. Two lecture hours, two laboratory hours. One term. Prerequisite: AS/SC/GEOG 2500 3.00 or SC/BIOL 2050 4.00. Course credit exclusions: None.

Cross-listed to: AS/GEOG 3500 3.00, SC/BIOL 3500 3.00, SC/GEOG 3500 3.00

AK/GEOG 3510 6.00 Conservation and Urbanization. This course clarifies the kinds of dilemmas that arise from growing and spreading urban populations demanding open space, air, water, wilderness. The focus is on how to interpret and assess such demands, and how to plan a true conservator approach to the natural environment. Course credit exclusion: None.

AK/GEOG 3520 3.00 Quantitative Techniques and Application in Geography. This course is an introduction to fundamental descriptive and inferential statistics, and their use in geography. Course credit exclusions: AS/SC/GEOG 2420 3.00, AS/SC GEOG 3421 3.00, EN/ENVS 2009 3.00.

AK/GEOG 3550 3.00 Peopling of Ontario. This course deals with the process of an agricultural population occupying a new territory, gradually developing it, and participating in its transformation from rural - to urban - dominated. There will be a strong historical emphasis, especially embracing the 19th and early 20th centuries, and a number of specific aspects and demographic trends will be followed into recent decades. The peopling of Ontario will be placed in the context of the peopling of Canada. Relevant evidence for Ontario can be gathered from a range of sources, including manuscripts as well as published census data, atlases, scholarly publications and personal papers. Attention will be paid to emigration and immigration and to the ethnic component at various periods. Course credit exclusions: AK/GEOG 3550D 3.00 (prior to Summer 2004), AK/GEOG 3550D 6.00 (prior to Fall/Winter 1998-1999).

AK/GEOG 3590 6.00 Conservation in Canada. The emergence of conservation concern is the focus of this course. Attitudes toward nature are traced through changing geographical knowledge, our role as steward of our habitat, prophets and prophetic actions, uncontrolled and controlled uses of the environment, from the 18th century to the dawning of the Spaceship Earth concept. Course credit exclusion: None.

AS/GEOG 3600 3.00 Nations and Nationalisms. This course examines theories, geographies and histories of nations, nationalisms and nation-states. Course credit exclusions: None.

AK/AS/GEOG 3650 6.00 WiredCities: Community, Technology and Changing Urban Places. Examines the impact of technology on urban form, urban function and community. Emphasis is placed on the social, economic and political parameters of urban infrastructure, community formation, and everyday life in the wake of technological change. Course credit exclusions: None.

Cross-listed to: AK/GEOG 3650 6.00, AS/GEOG 3650 6.00

AS/GEOG 3710 3.00 Society, Space and Environment in South Asia. This course deals with the historical-geographical specificities of South Asia that are products of its own internal economic-political evolution and physical environmental context as well as of its historical and contemporary linkages to other parts of the world. Prerequisites: 54 credits successfully completed including at least one of AS/GEOG 1000 6.00, AS/SC/GEOG 1400 6.00, or AS/GEOG 1410 6.00, or written permission of the course director. Course credit exclusions: None.

AS/GEOG 3730 6.00 Comparative Urban Development. Significant dimensions of urbanization and urban-rural relationships are examined comparatively across major world regions, with emphasis upon Africa, Asia and Latin America. Students may choose a regional focus for research papers, including North America. Migration patterns, socio-economic structure of cities, values and images of rural and urban life, employment and planning to meet the needs of growing cities are the principal topics covered. Course credit exclusions: None.

Cross-listed to: AS/GEOG 3730 6.00, AS/SOSC 3730 6.00

AS/GEOG 3740 3.00 Qualitative Research Methods in Human Geography. This course examines qualitative research design and philosophical bases of qualitative approaches to knowledge, as well as practical techniques such as questionnaire surveys, participant observations, interview/focus groups, archival research and content/textual analysis. These techniques are applied in practical settings involving fieldwork. Course credit exclusions: None.

AS/GEOG 3750 3.00 Africa: The Impoverishment of a Continent. This course critically examines the changing geography and depletion of Africa's resources from the precolonial to the present, with an emphasis on current events. The course covers a range of topics, including agriculture, natural resource extraction, migration, the slave trade, and AIDS. Course credit exclusions: None.

AS/GEOG 3770 3.00 Housing Policy. The course studies Canadian housing policy using the approaches of economics, political science and public administration. The course examines models of housing markets, the effects of housing policies, the politics and process of policy formation and procedures for policy evaluation. Prerequisites: 54 credits successfully completed, including one of AS/GEOG 1410 6.00 or AK/GEOG 2500 6.00 or AS/SOSC 2710 9.00 or permission of the course instructor. Course credit exclusions: None.

Cross-listed to: AS/GEOG 3770 3.00, AS/SOSC 3770 3.00

AS/GEOG 3800 3.00 Geographies of Work. This course examines the geographies of productive and reproductive labour at multiple scales, including global, national, regional, urban, domestic and personal. Course credit exclusions: None

AS/SC/GEOG 3900 3.00 Physical Geography of the City. This course explores the natural and physical systems of the city, focusing on the climate, water, geomorphology, biogeography of the urban landscape, including its built environment. Course credit exclusions: None.

Cross-listed to: AS/GEOG 3900 3.00, SC/GEOG 3900 3.00

4000-Level Courses

Prerequisites: Unless otherwise indicated, 4000-level geography courses are open only to students who have successfully completed at least 54 credits, including any specific course prerequisites noted in the following course outlines.

AS/SC/GEOG 4000 6.00 Honours Thesis. An independent piece of research done under the supervision of a faculty adviser. The thesis must be submitted before the end of classes in the winter term; an exact date is established each year. There is an oral examination on the Honours thesis. One lecture hour per week at the beginning of the course. Two terms. Prerequisite: 84 credits passed. Course credit exclusions: None.

Cross-listed to: AS/GEOG 4000 6.00, SC/GEOG 4000 6.00

AS/GEOG 4020 3.00 The Caribbean Islands since 1492: Process of Regional Geographic Change. This course considers changes in the public perception of the regional character of the Caribbean Islands through five centuries, and then examines the evidence and methods that can be used to assess regional change - both "real" and "imagined". Prerequisite: 54 credits successfully completed including AS/GEOG 1400 6.00, AS/GEOG 1000 6.00 or AS/GEOG 1410 6.00. AS/GEOG 2020 6.00 is recommended. Course credit exclusions: None. Note: Weekly reflections posted to WebCT.

AS/GEOG 4040 6.00 Urban Historical Geography. A course which examines the historical geography of cities, particularly those of 19th-century North America. The major focus of attention is the role of certain economic and cultural factors in the development of spatial arrangements within and among cities. Prerequisite: One of AS/GEOG 1410 6.00, AK/GEOG 2500 6.00, AS/HIST 2510 6.00, AS/HIST 2600 6.00, AS/HIST 3440 6.00, or AS/HIST 3621 6.00. Course credit exclusions: None.

AS/GEOG 4050 3.00 Nature, Neoliberalism and Political Ecology. This seminar explores complementary scholarship on 'first world' political ecology and the commodification of nature in order to critically explore issues of environmental management and resource conflict. It will draw on

case studies about rural and urban North American environments. Prerequisites: 54 credits successfully completed including AS/GEOG 3050 3.00 or permission of the course director. Course credit exclusions: None.

AS/GEOG 4060 3.00 Women in North America: Historical Geographies of Gender and Sexuality. This course explores the changing geographies of women in Canada and the United States over the past three centuries, focusing on the historical and spatial construction of gender. Course credit exclusions: AS/HIST 4050E 3.00 (prior to Fall/Winter 2003-2004), AS/HIST 4081 3.00 (prior to Fall/Winter 2005-2006). Course credit exclusions: None.

AS/GEOG 4065 3.00 Geographies of Gender, Environment, and Development. This course critically explores the histories and geographies of gender, environment and development in Latin America, including the ways in which gendered identities influence the definition, understanding and protection of environments, and access to natural resources. Course credit exclusions: None.

AS/GEOG 4090 3.00 Urban Identities: Historical Perspectives on Race, Ethnicity, Gender and Class in Canadian and American Cities. This course considers the historical and spatial construction of racial, ethnic, gender and class identities in the broader context of urban development in Canada and the United States in the 19th and 20th centuries. Prerequisite: AS/GEOG 3120 6.00 or AS/GEOG 4040 6.00 or AS/GEOG 4170 3.00 or AS/HIST 1000A 6.00 or AS/SOSC 2710 9.00 or AS/SOSC 3760 6.00 or AS/SOSC 3790A 3.00 or AS/SOCI 3830 6.00 or AS/SOCI 4055 6.00 or AS/SOCI 4120 6.00 or AK/AS/GL/WMST 3505 3.00 or written permission of the course director. Course credit exclusions: AS/HIST 4050F 3.00 (prior to Fall/Winter 2003-2004), AS/HIST 4083 3.00 (prior to Fall/Winter 2005-2006).

AS/GEOG 4095 3.00 Aboriginal; Space and the City: North American Urbanization and Aboriginal People, 1890-1980. This course considers the historical construction of Aboriginal space in Canada and the US and its relationship to cities, from early colonization to the present. Course credit exclusions: None.

AK/GEOG 4130 6.00 Planned Communities. This course will study different forms of planned communities such as new towns, planned suburbs, expanded towns and sub-divisions. The relationships of social, ecological and economic factors will be considered. Prerequisites: 78 credits or, for students with equivalent preparation, permission of the coordinator of geography. Course credit exclusion: None.

Cross-listed to: AK/GEOG 4130 6.00, AK/URST 4130 6.00

AK/GEOG 4150 3.00 Directed Reading. Students will select one or two specific areas in which to do extensive reading and writing. Prerequisites: 78 credits, and permission of the coordinator of geography. Note: Students must be accepted by a faculty supervisor before they can register in this course. The course transaction form for such a course must be submitted with a note from the supervisor stating his or her willingness to perform this task. Course credit exclusion: None.

AK/GEOG 4150 6.00 Directed Reading. Students will select one or two specific areas in which to do extensive reading and writing. Prerequisites: 78 credits, and permission of the coordinator of geography. Note: Students must be accepted by a faculty supervisor before they can register in this course. The course transaction form for such a course must be submitted with a note from the supervisor stating his or her willingness to perform this task. Course credit exclusion: None.

AS/GEOG 4160 3.00 Risk Assessment in Resource Management. Theories and concepts of "risk" are discussed and evaluated critically with respect to public policy for the resources sector. The analytical framework employed distinguishes between risk estimation, risk evaluation, and risk management and communication activities. Resource management issues are analyzed with a focus on energy policy in Canada, in the context of environment-energy interactions. Normally offered in alternate years. Prerequisite: AS/GEOG 3340 6.00, or fourth year Honours standing in the Faculty of Environmental Studies or written permission of the instructor. Course credit exclusions: None.

Cross-listed to: AS/GEOG 4160 3.00, ES/ENVS 4530 3.00

AS/GEOG 4170 3.00 Geographic Perspectives on Immigration, Ethnicity and Race in Modern Cities. This course first discusses a number of conceptual issues concerning the residential segregation of ethnic and racial groups. The course then considers several case examples that exemplify the varied experiences of ethnic and racial groups in modern cities. Prerequisites: 84 credits successfully completed, including AS/GEOG 1000 6.00 or AS/GEOG 1410 6.00 or AK/GEOG 2500 6.00 or written permission of the course director. Third-year Honours students with 78 credits completed who are also taking summer courses may enrol. Course credit exclusions: None.

AS/GEOG 4180 3.00 Laboratory Analysis of Ecological Materials. This course introduces students to a comprehensive range of laboratory techniques for the analysis of plant, soil and water samples. Laboratory sessions and projects provide students with experience in analytical procedures and the operation of major items of laboratory equipment. Four scheduled lecture/laboratory hours, three additional laboratory hours. One term. Prerequisite: Six credits in physical geography at the 3000 or 4000 level or ES/ENVS 2410 3.00 or ES/ENVS 2420 3.00 or SC/EATS 1010 3.00 or SC/BIOL 2050 4.00. Course credit exclusions: None.

Cross-listed to: AS/GEOG 4180 3.00, SC/GEOG 4180 4.00

SC/GEOG 4180 4.00 Laboratory Analysis of Ecological Materials. This course introduces students to a comprehensive range of laboratory techniques for the analysis of plant, soil and water samples. Laboratory sessions and projects provide students with experience in analytical procedures and the operation of major items of laboratory equipment. Four scheduled lecture/laboratory hours, three additional laboratory hours. One term. Prerequisite: Six credits in physical geography at the 3000 or 4000 level or ES/ENVS 2410 3.00 or ES/ENVS 2420 3.00 or SC/EATS 1010 3.00 or SC/BIOL 2050 4.00. Course credit exclusions: None.

Cross-listed to: AS/GEOG 4180 3.00, SC/GEOG 4180 4.00

AK/GEOG 4180 6.00 Advanced Urban Geography. This course will examine some current frontiers of research in urban Geography. Settlement distribution models, spatial interaction, urban land-use theory, urban images and decision-making concerning spatial behaviour are some examples of possible subjects of study. Prerequisites: 78 credits or, for students with equivalent preparation, permission of the coordinator of geography. Course credit exclusions: AK/URST 4140 6.00, AK/GEOG 4140 6.00 (prior to Fall/Winter 1997-1998).

Cross-listed to: AK/GEOG 4180 6.00, AK/URST 4180 6.00

AS/GEOG 4190 3.00 Geographies of the Ethnic Economy. This course examines how location helps, hinders, or shapes ethnic economies; how various socio-cultural, economic-political, institutional, and transnational spaces shape ethnic economies; how ethnic economies and other geographically identifiable phenomenon, such as residential segregation or institutional distributions, are related; and how ethnic economies shape the urban landscape. Prerequisites: 84 credits completed; at least one of AS/GEOG 2100 6.00, AS/GEOG 3120 6.00, AS/GEOG 3140 3.00 or permission of instructor. Course credit exclusions: None.

AS/SC/GEOG 4200 3.00 Water Quality and Stream Ecosystems. The course focuses on selected aspects of river water quality, including hillslope hydrology and the transport of pollutants, the impacts of human activities on water chemistry, nutrient transformations within stream ecosystems, and the effects of water quality on stream biological communities. Two lecture hours, one laboratory hour. One term. Prerequisite: One of AS/SC/GEOG 1400 6.00, AK/GEOG 2510 6.00, ES/ENVS 2410 3.00, or SC/BIOL 2050 4.00. Course credit exclusions: None.

Cross-listed to: AS/GEOG 4200 3.00, SC/GEOG 4200 3.00

AS/SC/GEOG 4205 3.00 Climatology of High Latitudes. A study of the processes of energy and moisture exchanges in polar regions with emphasis on the Canadian north. Topics include atmospheric and oceanic transport of energy, surface microclimate and the sensitivity of high latitude environments to climate change. Normally offered in alternate years. Three lecture hours. One term. Prerequisites: 54 credits successfully completed, including AS/SC/GEOG 2400 6.00 or written permission of the course director. Course credit exclusions: None.

Cross-listed to: AS/GEOG 4205 3.00, SC/GEOG 4205 3.00

AS/SC/GEOG 4210 3.00 Hydrometeorology. A study of the relationship between the atmosphere and the hydrosphere with the emphasis on the process of evaporation. The course includes an in-depth review of evaporation models and the instrumentation necessary for data acquisition. Normally offered in alternate years. Three lecture hours per week, one full-day laboratory session. One term. Prerequisite: AS/SC/GEOG 2400 6.00. Course credit exclusions: None.

Cross-listed to: AS/GEOG 4210 3.00, SC/GEOG 4210 3.00

AS/GEOG 4220 3.00 Geographies of Industry: Neoliberal Era. This course draws on contemporary institutional approaches and theories of regulation to interpret trends in industrial production and location in the current neoliberal age. Emphasis is put on concepts of: restructuring; the evolution of post-Fordist systems of production; new regional and global divisions of labour; neo-artisanal production; the emergence of new industrial spaces; cultural production; resource economies; and the social economy. Prerequisite: 54 credits passed, including one of AS/GEOG 2100 6.00, AS/GEOG 3120 6.00, AS/ECON 1010 3.00, AS/ECON 3230 3.00, or written permission of the course director. Integrated with: GS/GEOG 5320 3.00. Course credit exclusions: None.

AS/GEOG 4240 3.00 The Planning of Urban Public Facilities. Theoretical and practical problems concerning the supply and distribution of public goods and services in urban areas. Prerequisite: AS/GEOG 1000 6.00 or AS/GEOG 1410 6.00 or AS/SOSC 2710 9.00 or AK/GEOG 2500 6.00, or written permission of the course director. Course credit exclusions: None.

AS/GEOG 4250 3.00 Imagined Landscapes. This course examines the representation of landscapes in fictional literature, film, visual arts and music. Emphasis is placed on the power, purpose and problems of metaphor, symbolism and representation. Course credit exclusions: None.

AS/GEOG 4260 3.00 Applied Transportation Geography. This course focuses on urban transportation planning and policy analysis as an area of research. It discusses the theoretical principles governing movement and planning, and analytically examines approaches to policy problems. Prerequisites: 84 credits successfully completed, including one of AS/GEOG 2100 6.00, AK/GEOG 3420 6.00, AS/GEOG 3120 6.00, AK/GEOG 3430 6.00. Integrated with: GS/GEOG 5310 3.00. Course credit exclusions: None.

AS/GEOG 4280 3.00 Imagining Toronto: Literary Geographies of a City. This course explores intersections of literature and place in the Toronto region, exposing students to critical and imaginative works on place, culture, and representation. Close readings of a wide selection of Toronto-based literature are paired with critical scholarly works interrogating how places are invented, (re)presented, and (re)produced. Prerequisite: At least 84 credits successfully completed or permission of the instructor. Course credit exclusions: None.

AS/SC/GEOG 4290 3.00 Directed Reading. This course may be used for individualized study, in which case the student requires permission from a faculty member who agrees to supervise the program of directed reading and from the Chair of the department. Course credit exclusions: None. Note: See the Faculty of Arts section of the Undergraduate Programs Calendar for Faculty of Arts regulations on Independent Reading Courses.

Cross-listed to: AS/GEOG 4290 3.00, SC/GEOG 4290 3.00

AS/SC/GEOG 4290 6.00 Directed Reading. This course may be used for individualized study, in which case the student requires permission from a faculty member who agrees to supervise the program of directed reading and from the Chair of the department. Course credit exclusions: None. Note: See the Faculty of Arts section of the Undergraduate Programs Calendar for Faculty of Arts regulations on Independent Reading Courses.

Cross-listed to: AS/GEOG 4290 6.00, SC/GEOG 4290 6.00

AS/SC/GEOG 4310 3.00 Dynamics of Snow and Ice. This course examines the formation, distribution, structure and degradation of snow,

as well as lake, river and sea ice. Two lecture hours and three lab hours every other week, one-day field experiments. One term. Normally offered in alternate years. Prerequisite: AS/SC/GEOG 2400 6.00. Course credit exclusions: None.

Cross-listed to: AS/GEOG 4310 3.00, SC/GEOG 4310 3.00

AS/SC/GEOG 4340 3.00 Geographic Information Systems. Advanced course in geographic information systems (GIS), oriented around raster structures. Computer graphics for mapping introduced and work undertaken on finely divided surfaces. GIS considers both practical and theoretical questions of interpretation. Macintosh computers and raster-based software used for hands-on focus. Two lecture hours, two laboratory hours. One term. Prerequisite: AS/SC/GEOG 3180 3.00. Course credit exclusions: None.

Cross-listed to: AS/GEOG 4340 3.00, SC/GEOG 4340 3.00

AS/GEOG 4370 3.00 The Geography of Third World Development. Problems and patterns of rural and urban development in Third World countries are examined from a geographical perspective. Theoretical and practical aspects are treated, based on case studies drawn mainly from Africa and the Pacific and Indian Ocean basins. Prerequisite: One of AS/SC/GEOG 1400 6.00, AK/GEOG 2510 6.00, AS/GEOG 1410 6.00, or AK/GEOG 2500 6.00. Course credit exclusions: None.

AS/GEOG 4380 3.00 Urban Social Policy. A critical examination of the links between urban social problems and state policies. The course studies how policy makers, planners and geographers understand and deal with social problems in the contemporary city and evaluates selected planning policies. Integrated with: GS/GEOG 5370 3.00. Prerequisites: 84 credits successfully completed, including one of AS/GEOG 1000 6.00, AS/GEOG 1410 6.00, or AK/GEOG 2500 6.00, and at least six additional credits in human geography at the 2000 or 3000 level. Course credit exclusions: None.

AS/GEOG 4395 3.00 Asia-Pacific Development: Geographical Perspectives. This course examines socio-economic development in the Asian-Pacific region from a Canadian perspective. In particular, the course focuses on geographical flows of migration, trade, investment and aid between Canada and Asia, and corresponding social, political and economic changes in Asian societies. Prerequisites: 84 credits successfully completed or written permission of the course director. Course credit exclusions: AS/GEOG 3390K 3.00 (prior to Fall/Winter 2002-2003), AS/GEOG 4390K 3.00 (prior to Fall/Winter 2003-2004). Course credit exclusions: None.

AS/SC/GEOG 4400 3.00 Physical Hydrology and Water Resources. An intermediate course in the physical principles of hydrological and water resource systems. Topics to be discussed include groundwater storage and flow, deterministic hydrological models and physical hydrological aspects of current water resource problems. Normally offered in alternate years. Two lecture hours, two laboratory hours. One term. Prerequisite: AS/SC/GEOG 2400 6.00. Course credit exclusions: None.

Cross-listed to: AS/GEOG 4400 3.00, SC/GEOG 4400 3.00

AS/SC/GEOG 4410 3.00 Desert Ecosystems. This course focuses on the vegetation of the desert, species adaptations to high temperature and aridity and the interactions between organisms, and between plants and their environment. Prerequisites: One of: AS/GEOG 1400 6.00 or SC/BIOL 2050 6.00. Course credit exclusions: None.

Cross-listed to: AS/GEOG 4410 3.00, SC/GEOG 4410 3.00

AS/GEOG 4420 3.00 Project Experience in Geography. This course enables Honours students to apply work experience in geography to their degree program. It provides students an opportunity to put their classroom learning into practice in a non-academic environment. The objective is to encourage students to put geographic skills to work in the addressing of real world problems. Prerequisite: Permission of the course director. Students must be registered in an Honours Geography Program and must have successfully completed at least 84 credits, including AS/SC/GEOG 3420 3.00. Course credit exclusions: None.

AS/SC/GEOG 4440 3.00 Remote Sensing and Image Processing for Geographical Analysis and Environmental Monitoring. Sophisticated methods and techniques for collecting, processing and analyzing remote sensing data are examined. Special topics include image enhancement techniques (e.g. texture transforms), non-traditional image classification and data integration for incorporation of remote sensing data products into geographic information systems (GIS). One and one-half lecture hours, one and one-half laboratory hours. One term. Prerequisite: AS/GEOG 3440 3.00 or ES/ENVS 3521 3.00 or SC/EATS 4220 3.00 or written permission of the course director. Course credit exclusions: None.

Cross-listed to: AS/GEOG 4440 3.00, ES/ENVS 4521 3.00, SC/GEOG 4440 3.00

AK/GEOG 4500 3.00 Research Paper. The research paper, which is normally the last geography course of an Honours candidate, is a piece of work carried out under the supervision of a faculty adviser. Prerequisites: 102 credits and permission of the coordinator of geography. Note: Students must be accepted by a faculty supervisor before they can register in this course. The course transaction form for such a course must be submitted with a note from the supervisor stating his or her willingness to perform this task. Course credit exclusion: None.

AS/SC/GEOG 4500 3.00 Northern Forest Environments. An examination of the northern forested regions of Canada: Coastal, Subalpine, Montane, Columbian, Boreal, Great Lakes-St. Lawrence and Acadian Forests. Various aspects of each region are explored, including vegetation composition and development, environmental conditions and major disturbance regimes. Two lecture hours, two laboratory hours. One term. Prerequisites: 84 credits successfully completed, including AS/SC/GEOG 2420 3.00, and AS/SC/GEOG 2500 3.00 or SC/BIOL 2050 4.00 or permission of the course director. Course credit exclusions: None.

Cross-listed to: AS/GEOG 4500 3.00, SC/GEOG 4500 3.00

AK/GEOG 4500 6.00 Research Paper. The research paper, which is normally the last geography course of an Honours candidate, is a piece of work carried out under the supervision of a faculty adviser. Prerequisites: 102 credits and permission of the coordinator of geography. Note: Students must be accepted by a faculty supervisor before they can register in this course. The course transaction form for such a course must be submitted with a note from the supervisor stating his or her willingness to perform this task. Course credit exclusion: None.

AS/GEOG 4520 3.00 Research Design & Field Studies in Human Geography. The course is an introduction to research design and methodology in human geography. The course integrates on-campus preparation and report writing with off-campus fieldwork during which data collection and preliminary analysis are carried out. The fieldwork relates to a geographic problem offering scope for the special interests of students in various aspects of geography. Students must be registered as Honours majors in geography and must have successfully completed 54 credits, including AS/SC/GEOG 1400 6.00 or AK/GEOG 2510 6.00; AS/GEOG 1000 6.00 or AS/GEOG 1410 6.00 or AK/GEOG 2500 6.00; AS/SC/GEOG 2420 3.00; or permission of the Department. Course credit exclusions: AS/SC/GEOG 3390B 3.00 (prior to Fall/Winter 2002-2003), AS/GEOG 3420 3.00 (prior to Fall/Winter 2007-2008), AS/SC/GEOG 4540 3.00, AK/MATH 3330 3.00.

AS/SC/GEOG 4540 3.00 Field Studies in Physical Geography. This course begins with lectures on field research methodology. The second phase concentrates on defining a field problem, leading to data collection in the field. The final part of the course deals with data analysis, and reviews methodological implications. Two two-hour periods per week (including lectures, seminars and workshops), a three to four day field trip. One term. Prerequisites: Students must be registered as Honours majors in Geography or Environmental Science and must have successfully completed GEOG 2420 3.00 and one of GEOG 2400 6.00, GEOG 2500 3.00 or GEOG 2600 3.00; or permission of the instructor. Course credit exclusions: AS/SC/GEOG 3390B 3.00 (prior to Fall/Winter 2002-2003), AS/SC/GEOG 3420 3.00, AK/MATH 3330 3.00.

Cross-listed to: AS/GEOG 4540 3.00, SC/GEOG 4540 3.00

AS/SC/GEOG 4600 3.00 Rivers: Environment and Process. This course provides fundamental knowledge of river mechanics and related

environmental conditions. It provides an integration of physical, environmental and spatial aspects of river behaviour. The course involves the application of principles of hydrology, geomorphology, sedimentology and fluid mechanics. Course credit exclusions: None.

Cross-listed to: AS/GEOG 4600 3.00, SC/GEOG 4600 3.00

AS/GEOG 4605 3.00 The Greater Toronto Area: A Geographical Perspective. This course examines the processes and issues of urban growth and change in the Greater Toronto Area, including the forces shaping growth, the consequences of growth, and planning initiatives/proposals for managing growth. Prerequisite: Permission of the course director. Course credit exclusions: None.

AS/GEOG 4610 3.00 Geopolitics. This course examines the geographic basis of the political evolution of the nation-state, from its emergence in Western Europe to its varied diffusions throughout the world. It explores notions of turf and territory, nationalism and the growth of geopolitical awareness. Prerequisites: At least 54 credits successfully completed, including AS/GEOG 1000 6.00 or AS/GEOG 1410 6.00. Course credit exclusions: None.

AS/GEOG 4700 3.00 The Critical Geographies of Education. This course explores the complex interactions between education, space and civil society. Particular emphasis is placed on the effects of policy restructuring on the geographies of educational landscapes. Theoretical and empirical studies are used to explore, analyze and critically engage in current debates. Course credit exclusions: None.

AS/GEOG 4750 3.00 Geography of Disabilities. This course explores the inter-relationships between disability, space and environment. It investigates the ways in which these have been treated in the social science literature, examines both individual and collective experiences, explores aspects of planning and design, especially in cities, and seeks paths towards an enabling geography. Prerequisites: AS/GEOG 1000 6.00 or AS/GEOG 1410 6.00, and 54 credits or permission of instructor. Course credit exclusions: None.

AS/GEOG 4800 3.00 Geographies of Organized Labour: Worker Struggles in Contemporary Economic Landscapes. This course explores the contemporary struggles of workers and their institutions to remain relevant actors in the making of economic landscapes. The central theme is the dynamic and multi-scalar nature of organized labour's response to aggressive and increasingly mobile capital. Course credit exclusions: None.

AS/GEOG 4850 3.00 The state, civil society and spaces of development. This course deals with theoretical and empirical understandings of the ways in which the state and civil society organizations co-determine the geography of development. Prerequisites: 54 credits successfully complete, including one of AS/GEOG 1410 6.00 or AS/GEOG 2100 3.00 or written permission of the Course Director. Course credit exclusions: None.

AS/GEOG 4880 3.00 Spaces of Conflict, Violence, and Power. This course examines the spatial aspects of conflict, violence, and power across various scales from the body to the transnational arena. Topics include territory and state violence, terrorism, forced migration, environmental conflict, and the spatial dimensions of resisting violence. Course credit exclusions: None.

AS/GEOG 4900 3.00 Public Space. This course examines the existence, genealogies, qualities, significance, and use of public space, as well as past and emergent challenges and threats to public space. Course credit exclusions: None.

Courses in German Studies

AS/GER 1000 6.00 Elementary German. In this course students acquire basic functional competence in oral and written German. This course also introduces students to aspects of contemporary German culture. No previous knowledge of German is assumed. Course credit exclusions: None.

Language of Instruction: German

AS/GER 2000 6.00 Intermediate German. Development of oral and written skills, intensive grammar review, introduction to cultural and literary readings. Prerequisite: AS/GER 1000 6.00 or Grade 12 U or M German (or equivalent, with appropriate score on departmental placement test). Course credit exclusions: AS/GER 1050 6.00 (prior to Fall/Winter 2002-2003). Note: This course may be taken in conjunction with AS/GER 2200 6.00.

Language of Instruction: German

AS/GER 2200 6.00 Modern and Contemporary German Writers. An introduction to German literary texts in their cultural context. The course provides the basis for further work in German literature and the broader field of German studies. Prerequisite AS/GER 1000 6.00 with a minimum grade of B AND concurrent registration in AS/GER 2000 6.00; OR AS/GER 2000 6.00, or permission of the department. Course credit exclusions: AS/EN 2552 6.00, AS/GER 2201 6.00. Note: Students have the option to write essays, assignments and tests in either English or German; however, students are required to write several assignments as well as respond to several test questions in German.

Language of Instruction: German

AS/GER 2201 6.00 Modern and Contemporary German Writers (in translation). An introduction to German literary texts in their cultural context. The course provides the basis for further work in German literature and the broader field of German studies. No knowledge of German is necessary. Course credit exclusions: AS/GER 2200 6.00. Note: AS/GER 2201 6.00 will count for major or minor credit towards the German culture and society stream in the German studies program, but will not count for major or minor credit towards the German language, literature and culture stream in the German studies program. Course credit exclusions: None.

Cross-listed to: AS/EN 2552 6.00, AS/GER 2201 6.00

AS/GER 2790 9.00 Germany Through the Ages: Culture and Society. This course introduces students to the culture of Germany and the German-speaking countries from a North American perspective. The

course takes an intercultural and interdisciplinary approach to key aspects of the literary, artistic, political and social history of these countries. Course credit exclusions: None.

Cross-listed to: AS/GER 2790 9.00, AS/HUMA 2190 9.00

AS/GER 3000 6.00 Advanced Level German, Level I. This course further develops the student's ability to write and speak correct and idiomatic German. Through reading and discussion, in German, of materials on current affairs, the student is also given an understanding of the cultural context of modern German. The Specialized Honours BA program in Global Political Studies (GPS) provides students with the skills required to analyze global political forces, as well as giving them a broad and liberal education. The GPS program provides an excellent background for future public service work abroad, especially when combined with selected courses in the Public Policy and Administration program. As well, the GPS program is useful for anyone who hopes to find private sector employment in a job dealing with international issues, or for anyone who hopes to pursue graduate studies in international relations or comparative world politics.

Students may wish to specialize in areas such as development studies, post-communist studies, area studies, peace and security, or international political economy for the purposes of preparing for graduate school or for a particular employment goal. These students should consult the program coordinator to seek advice about appropriate course selection.

For specific program requirements and the list of program courses, please consult the Faculty of Arts Programs of Study section of this calendar.

Health and society is a term used to denote a body of scholarship that has emerged over the past 20 years in response to perceived limitations in a strictly biomedical approach to health issues. The health and society concept embraces research conducted in a number of overlapping interdisciplinary fields including: history and philosophy of medicine; medical sociology; behavioural medicine; medical anthropology; social epidemiology; psychosomatic medicine; health psychology; community mental health; international development; family, the life course and gerontology; occupational health and safety; environmental health and women and health.

The program aims to meet the needs of students who wish to go on to work in health-related occupations, to enter graduate programs in health studies, or simply to enrich the experience of those who have general interests in health-related issues.

For specific program requirements and the list of program courses, please consult the Faculty of Arts Programs of Study section of this calendar.

HH/HLST 3110 3.00 Major Themes in Health Policy in Canada. Examines critical points in the development of Canada's health care system at the municipal, provincial and federal level. Focuses on understanding the perspective of the different parties and the historical

context in which the policies were implemented. Prerequisites: AK/HH/HLST 1000 6.00 or AK/HH/HLST 1010 3.00 and AK/HH/HLST 1011 3.00, AK/HH/HLST 2020 3.00 or permission of the instructor. Course credit exclusion: None.

HH/HLST 3120 3.00 Health Policy II: Analyzing Processes of Power and Politics. A continued exploration of the processes of health policy development and the outcomes to which they lead. Varying analytic approaches will be applied to three policy themes: the public/private mix in health care, integrated health systems and international health systems. Prerequisite: AK/HH/HLST 2020 3.00 Health Policy: Power & Politics or permission of course instructor. Course credit exclusion: None.

HH/HLST 3130 3.00 Developing Practical Skills: Writing Health Reports and Research Proposals. Assists in developing practical skills in writing briefing notes and research proposals. Surveys national and international data bases, governmental, nongovernmental and professional association resources, assessing the use of such sources to answer specific research questions in briefing notes and proposals. Prerequisites: AK/HH/HLST 1000 6.00 or (AK/HH/HLST 1010 3.00 and AK/HH/HLST 1011 3.00); AK/HH/HLST 2020 3.00; AK/HH/HLST 2030 3.00; AK/HH/HLST 2040 3.00 and AK/ADMS 2300 6.00. For those with equivalent preparation, permission of the Undergraduate Program Director. Course credit exclusion: None.

HH/HLST 3210 6.00 Health Services Management. Please contact the Chair of the School of Health Policy and Management for more information. Course credit exclusion: None.

HH/HLST 3230 3.00 Integrated Health Systems in Canada. Examines and critiques the elements and concepts of an evolving integrated health system (IHS) in Canada. Studies the evolution and the socio-political-economic impact of this new evolving holistic and integrated health-healing model from an inter-disciplinary and cross-sectoral perspective. Prerequisite: Successful completion of 24 credits or permission of course instructor. Course credit exclusion: None.

HH/HLST 3240 3.00 Occupational Health and Safety. Covers federal and provincial occupational health and safety legislation, hazard identification and control, physical agents, chemical agents, socio-psychological aspects of health and the management of safety programs. Prerequisite: AK/ADMS 1000 3.00, for all BAS and BAS Honours students. Course credit exclusion: AK/HLST 3240 3.00 prior to F/W 2008.

Cross-listed to: AK/ADMS 3400 3.00, HH/HLST 3240 3.00

HH/HLST 3250 3.00 Introduction to Health Care Financial Management. Examines issues related to finance and accounting practices in various health sectors and organizations in Canada. Prerequisites: AK/HH/HLST 1000 6.00 or AK/HH/HLST 1010 3.00/1011 3.00 and AK/ADMS 1000 3.00 or permission of the undergraduate program director. Course credit exclusion: None.

HH/HLST 3300 3.00 Health Management Information Systems I. Please contact the Chair of the School of Health Policy and Management for more information. Course credit exclusion: None.

HH/HLST 3310 3.00 Electronic Health Record. Provides students with the knowledge and skills to manage health information services in health organizations, to use computer technologies to collect, manage analyze and technically evaluate health information and work with confidential health records. Prerequisites: AK/HH/HLST 1000 6.00 or (AK/HH/HLST 1010 3.00 and AK/HH/HLST 1011 3.00), AK/HH/HLST 2040 3.00 and AK/HH/HLST 3341 3.00. Course credit exclusion: AK/HH/NURS 3240 3.00.

HH/HLST 3320 3.00 Health Database Applications. Students will develop a working knowledge of design, implementation, administration and maintenance of relational database systems used in various areas in healthcare. Oracle, the full-scale multi-platform database management system, is used to teach database design and client/server application development and implementation. Prerequisites: AK/HH/HLST 1000 6.00 or AK/HH/HLST 1010 3.00 and AK/HH/HLST 1011 3.00, AK/HH/HLST 2040 3.00 and AK/HH/HLST 3341 3.00 or for those with equivalent preparation, permission of the undergraduate program director. Course credit exclusions: AK/AS/ITEC 3220 3.00, AK/HH/NURS 3230 3.00.

HH/HLST 3341 3.00 Health Informatics II: Health Information Systems. Designed to develop a global understanding of the significance of health information systems (HIS) in healthcare. Topics include: health information management, HIS implications in transformation of health care and health care services delivery, standards development, technical and policy issues surrounding security, privacy and confidentiality of health care data. Prerequisite: AK/HH/HLST 2040 3.00 or, for those with equivalent preparation, permission of the instructor. Course credit exclusion: None.

HH/HLST 3400 3.00 Critical Perspectives on Health Organizations: Micro Level Issues in Health Care Management and Improvement. Analyzes issues related to health system improvement. Examines quality improvement theory and techniques and considers the barriers and facilitating factors for bringing about improvement in the delivery and outcomes of health care faced by managers, clinicians and organizations. Prerequisites: Successful completion of 24 credits or permission of course instructor. Course credit exclusion: None.

HH/HLST 3510 3.00 Poverty and Health in Canada: Current Evidence and Policy Responses. Examines evidence related to the increasing incidence of poverty in Canada and the mechanisms by which poverty threatens the health of both the poor and not poor. Explores various potential policy responses. Prerequisites: 24 credits with at least six in either anthropology, education, health sciences, nursing, psychology, sociology or a related social science or permission of the instructor. Course credit exclusion: None.

HH/HLST 3520 3.00 Lifespan Approaches to Health: Societal Influences on Human Development. Examines research findings on how the health of populations result from the interaction of human potentials with societal influences. Prerequisites: 24 credits at least six of which are in education or the social sciences, or by permission of the instructor. Course credit exclusion: None.

HH/HLST 3530 3.00 Population Aging and Health: Policies, Programs and Issues. Aging in Canada has been depicted by many in the health care community as a looming calamity. Takes a unique Canadian focus and proposes that population aging can be a challenge that will force Canada's health care system to make some careful and innovative policy, program and service choices. Prerequisites: Successful completion of 24 credits or permission of instructor. Course credit exclusion: None.

HH/HLST 3540 3.00 International Agencies in Health Care: The World Bank Versus the World Health Organization (WHO). Non-governmental and supranational agencies are playing an increasing role in the health care planning and in influencing the development of health care policies in both developed and developing countries. Students will examine the roles of a number of these agencies. Prerequisites: 24 credits or permission of the instructor. Course credit exclusion: None.

HH/HLST 3999 0.00 Work Term Report II. Provides the student with an opportunity to contrast and compare classroom learning with practical workplace realities. Students will identify health-related issues in their workplace and illustrate successful applications of their classroom learning. Prerequisite: Successful completion of AK/HH/HLST 2999 0.00. Note: Only open to students in the co-op option, BHS program. Course credit exclusion: None.

HH/HLST 4000 3.00 Health Care Law. Legislation relevant to health care; consent to treatment; cases of negligence; medical staff privileges; release of information. Prerequisites: 1) For students in the program, 54 credits including AK/HH/HLST 1010 3.00, AK/HH/HLST 1011 3.00, AK/HH/HLST 2020 3.00, AK/HH/HLST 2030 3.00 and AK/HH/HLST 2040 3.00. 2) Other students 54 credits and "permission of the instructor". Course credit exclusion: AK/ADMS 4740 3.00 (prior to Summer 2006).

HH/HLST 4010 3.00 Health Care Ethics: Policy and Management Perspectives. Provides an overview of ethical issues involved in health care policy, management and informatics in Canada. It combines theory and practical application to allow for reflection on the role values and beliefs play in health policy, management and informatics decisions. Prerequisites: AK/HH/HLST 1000 6.00 or AK/HH/HLST 1010 3.00/1011 3.00, AK/HH/HLST 2020 3.00, AK/HH/HLST 2030 3.00 and AK/HH/HLST

2040 3.00 or permission of the undergraduate program director. Course credit exclusion: None.

HH/HLST 4020 3.00 History of Health Care Ethics from Ancient Times to the Present. Analyzes the diversity and controversies surrounding health care ethics over more than two thousand years of debates and experiences by practitioners and patients. Makes connections between past practices and present developments upon which to guide future decision-makers. Prerequisites: AK/HH/HLST 1000 6.00 or (AK/HH/HLST 1010 3.00 and AK/HH/HLST 1011 3.00) and completion of 60 credits, or by permission. Course credit exclusion: None.

HH/HLST 4100 6.00 Advanced Contemporary Health Policy. Surveys contemporary Canadian and international health policy including its formation, content and outcome from a range of theoretical perspectives. Integrates different methodological and analytic approaches to the study of public policy and explores health policy issues in several sub-sectors. Prerequisites: AK/HH/HLST 2020 3.00 and AK/HH/HLST 3120 3.00 or equivalent or permission of the course instructor. Course credit exclusion: None.

HH/HLST 4110 3.00 Comparative Health Policy. Examines historical, cultural, environmental, economic and political considerations of national health systems throughout the world, especially as health becomes less isolated and more an interconnected and integral part of all the other systems impacting our globe. Prerequisites: AK/HH/HLST 1000 6.00 and AK/HH/HLST 2020 3.00 or equivalent or permission of course instructor. Course credit exclusion: None.

HH/HLST 4130 3.00 Public Policy and Disabilities. This course examines public policy approaches to disability in Canada and other western nations. It considers the extent to which public policy can provide persons with disabilities access to societal resources; voice in policy development and opportunities for participation in everyday life. Prerequisites: AK/HH/HLST 1000 6.00 and AK/HH/HLST 2020 3.00 or equivalents. Course credit exclusion: None.

HH/HLST 4140 3.00 Mental Health Policy. Involves an analysis of mental health policy, from early conceptualizations and approaches to mental health care, to more recent societal approaches, government initiatives and legislation in the Canadian and other international contexts. Prerequisites: 54 credits including AK/HH/HLST 2020 3.00 or permission of undergraduate program director. Course credit exclusion: None.

HH/HLST 4200 6.00 Applied Research Approaches in Health Studies: Advanced Seminar. Examines key issues associated with inquiry into health policy, management and informatics issues. The advanced seminar topics include various research methods and design issues relevant to health studies, data analysis and communication of research findings. Prerequisites: AK/HH/HLST 1000 6.00, AK/HH/HLST 2020 3.00, AK/HH/HLST 2030 3.00, AK/HH/HLST 2040 3.00 and AK/ADMS 2300 6.00 or with permission of the course director. Course credit exclusion: None.

HH/HLST 4210 3.00 Health Care Leadership. Addresses the most salient leadership skills required for the micro-meso-macro developments in the health care field in Canada: foresight, systems thinking, issue management, impact assessment, critical thinking, contingency planning, visioning, strategic planning, change management, facilitation and negotiation. Prerequisites: AK/HH/HLST 1000 6.00 or AK/HH/HLST 1010 3.00 and AK/HH/HLST 1011 3.00 and successful completion of 54 credits or permission of undergraduate program director. Course credit exclusion: None.

HH/HLST 4250 3.00 Measuring Health System Performance/ Effectiveness. Analyzes issues related to the measurement, dissemination and use of health system performance information. Examines the measurement of health system performance at multiple levels in the system and in different settings and jurisdictions. Prerequisites: AK/HH/HLST 2030 3.00 or equivalent and successful completion of 54 credits or permission of the undergraduate program director. Course credit exclusion: None.

HH/HLST 4300 3.00 Advanced Seminar in Health Informatics. Provides students with up-to-date knowledge of the current research directions in the health informatics domain and the main questions raised in the field. Exposes students to a wide range of current research problems, projects, findings, and debate in health informatics. Prerequisites: Successful completion of 60 credits including AK/HH/HLST 2040 3.00, AK/HH/HLST 3320 3.00 and AK/HH/HLST 3341 3.00 or equivalent or permission of course instructor. Course credit exclusion: None.

HH/HLST 4310 3.00 Analysis and Design of Health Information Systems. Provides the students with the knowledge and the ability to analyze health information systems and design health systems specifications to meet specific objectives, using the appropriate CASE tools. Methods for structured health analysis and design are covered. The use of teamwork is emphasized. Prerequisites: Successful completion of 60 credits including AK/HH/HLST 2040 3.00 and AK/HH/HLST 3320 3.00 or equivalent or permission of course instructor. Course credit exclusion: None.

HH/HLST 4320 3.00 ehealth. Introduces the major issues and trends in the application of Information and Communication Technologies (ICT) in the health care service sector. Prerequisite: AK/HH/HLST 1000 6.00 or permission of the undergraduate program director. Course credit exclusion: None.

HH/HLST 4330 3.00 Decision Making and Decision Support Systems in Healthcare. Integrates literature on decision making and literature on management information systems in the health care context to illuminate the rational and non-rational aspects of decision making in health care. Prerequisites: Successful completion of 60 credits or permission of course instructor. Course credit exclusion: None.

HH/HLST 4340 3.00 Health Technology Assessment. Provides students with the knowledge and skills required to carry out systematic analysis and make informed decisions concerning the introduction, allocation and cost-effective use of technologies in healthcare. Prerequisites: AK/HH/HLST 1000 6.00 or (AK/HH/HLST 1010 3.00 and AK/HH/HLST 1011 3.00), AK/HH/HLST 2040 3.00, AK/HH/HLST 3320 3.00 and AK/HH/HLST 3341 3.00. Students who do not meet the prerequisites should contact the course instructor. Course credit exclusion: None.

HH/HLST 4510 3.00 Health and Human Rights. Examines how health and human rights are complementary approaches to understanding and analyzing human well-being. The congruence of the two fields has arisen as the definition of human rights has expanded from civil and political rights to include social and economic rights. Will examine this evolution and its implications. Prerequisites: At least 36 credits or permission of course instructor. Course credit exclusion: None.

HH/HLST 4900 3.00 Health Studies Project Management: Field Experience. Provides qualified students with the opportunity to work in the health field as part of their degree program. The Atkinson Experiential Education Office will help coordinate a specific field experience placement for students. Prerequisites: 1) Completion of at least 60.00 major credits including completion of or concurrent enrolment in AK/HH/HLST 4200 6.00 and completion of AK/ADMS 2300 3.00 and a grade point average of B+ (7.00) in the health studies courses completed. 2) Open only to students in BHS Honours program. Note 1: The course instructor, together with the Experiential Education Office, will select from those with the prerequisites who apply. Note 2: Students are required to attend an orientation session with a duration of two hours prior to the commencement of the course. The field experience component of this course will require a commitment of 12 hours per week over 11 weeks (132 hours). As part of this 12 hours per week, students will be required to attend weekly seminars with their group members and either the course instructor or the contact person in the field organization with which they are working.

HH/HLST 4999 0.00 Work Term Report III. Calls for students to identify and design a potential inquiry based upon a situation encountered in the workplace. Students will outline, identify reasons for, and make recommendations for a proposed study on a specific problem. Prerequisite: Successful completion of AK/HH/HLST 3999 0.00. Note:

Only open to students in the Coop option, BHS program. Course credit exclusion: None.

Hebrew – Department of Languages, Literatures and Linguistics, Arts

Note: For general regulations and enrolment information please see Languages, Literatures and Linguistics in the Courses of Instruction section of this calendar.

Entry to Hebrew courses: Students will be placed in classes at a level that suits their previous experience.

Courses in Hebrew

AS/HEB 1000 6.00 Elementary Modern Hebrew, Level I. A course in beginning Hebrew, teaching elementary speaking and writing skills, emphasizing oral production and comprehension. Note: This course is not open to anyone who has studied Hebrew before, either formally or informally. Course credit exclusions: None.

Language of Instruction: Hebrew

AS/HEB 1030 3.00 Elementary Biblical Hebrew, Level I. This course introduces students to the basic vocabulary, grammar and syntax of Biblical Hebrew. The class also reads simple narrative prose from the Bible, such as segments from the Joseph story in Genesis. Course credit exclusions: None.

AS/HEB 1040 3.00 Elementary Biblical Hebrew, Level II. This course builds on the skills that the students acquired in AS/HEB 1030 3.00. More advanced issues of grammar and syntax are addressed and students acquire a much larger vocabulary thus allowing more extensive readings of biblical texts. Prerequisite: AS/HEB 1030 3.00 or equivalent. Course credit exclusions: None.

AS/HEB 2000 6.00 Intermediate Modern Hebrew. Review and consolidation of grammar topics to achieve a balance in the students' competence in written and oral skills. Further development in speaking, reading and writing. Course material deals with everyday situations, Jewish history, culture and aspects of life in Israel. Prerequisite: AS/HEB 1000 6.00 or equivalent; not normally open to students with more than seven years of elementary school level Hebrew or equivalent. Course credit exclusions: AS/HEB 2010 6.00 (prior to Fall/Winter 2003-2004).

Language of Instruction: Hebrew

AS/HEB 3000 6.00 Advanced Modern Hebrew. A course in modern Hebrew, emphasizing the study of contemporary Israeli language as seen in a wide variety of writings (education, business, military and religious literature, as well as newspapers, periodicals and some belles lettres). This course includes practice in writing and composition. Prerequisite: AS/HEB 2010 6.00 or equivalent. Not normally open to students with three or more years of high school level Hebrew or to native speakers. Course credit exclusions: None.

Language of Instruction: Hebrew

AS/HEB 3210 3.00 Selections from Hebrew Legal-Religious Texts: Reading and Analysis. This course presents the structure of the core texts of the Jewish legal and religious traditions, using selections from major Hebrew legal codes, responsa literature and exegetical texts. The Department of History offers courses covering thousands of years of history in Africa, Asia, Europe and the Americas. At the 1000 level, students are introduced to the discipline of history through courses that emphasize theory, method and historiography, and that concentrate on fundamental reading, writing, research and analytic skills. At the 2000 level, students are introduced to major chronological and geographic fields of history. More specialized courses are offered at the 3000 level, while 4000-level seminars and colloquia enable small groups of Honours students to focus on specific historical topics.

Courses at the 1000 level have either a lecture/tutorial or seminar format. Courses at the 2000 level normally have two lecture hours and one tutorial hour. Courses at the 3000 level are taught as colloquia, lecture/tutorial or lecture courses. 4000-level courses will be offered as two- or three-hour seminars or colloquia. All courses are open to students studying in other units, unless otherwise indicated. Admission to 4000-level courses is by

permission of the instructor or the instructor's representative. The department urges all students whose concentration is in history to contact the appropriate faculty adviser before choosing courses.

All history courses are numbered and grouped according to field. The thousands digit indicates the level at which the course is offered, the hundreds digit indicates the field (general 000, ancient 100, medieval and early modern Europe 200, modern Europe 300, Great Britain 400, Canada 500, United States 600, Africa, Asia, Latin America and Caribbean 700, comparative and interdisciplinary 800), and the remaining two digits indicate the number of the course within the field.

For specific program requirements, please consult the Faculty of Arts Programs of Study section of this calendar.

Traditionally, the humanities include such fields as literature, philosophy, history, art, architecture, music and religion, and it is characteristic of courses offered in the Division of Humanities that they embrace more than one of these fields or disciplines. In short, the Division of Humanities provides a space for interdisciplinary studies in the area of humanities.

Further, it is characteristic of courses in the Division of Humanities that they pay special attention to what is unique, particular and unpredictable in human experience. They are concerned with all aspects of human creativity and thus with cultural expressions of a wide range. Finally, while questions of value are deliberately (and appropriately) set aside in most scientific investigations, questions of value — aesthetic, moral, religious or social — are focal in a humanities course. In other words, it is part of the concern of courses in the humanities to identify the values implicit in a particular society, a piece of literature, a social theory or a work of art.

For specific program requirements, please consult the Faculty of Arts Programs of Study section of this calendar.

The Division of Humanities also houses a number of interdisciplinary programs, including classical studies, classics, creative writing, East Asian studies, European studies, Hellenic studies, Latin American and Caribbean studies, religious studies, and science and technology studies. For details, please consult the Faculty of Arts Programs of Study section of this calendar.

Selected 1000- and 2000-level courses offered through the Division of Humanities are a part of the Faculty of Arts foundations program. These courses have a nine-credit value and as a part of the Faculty of Arts general education requirement introduce students to interdisciplinary study and emphasize critical thinking, reading and writing skills at the university level. (For purposes of meeting program requirements, all foundations courses will count as six credits towards the major or minor.)

Note: Students enrolling in the German (AS/GER) version of this course are required to do the readings and assignments in German. For students enrolling in the humanities (AS/HUMA) version of this course, all readings and assignments are in English.

Cross-listed to: AS/GER 4720 3.00, AS/HUMA 4720 3.00

AS/HUMA 4725 6.00 Reading Bildung: The German-Language Humanities Tradition. The course teaches students with little or no knowledge of German how to approach key writers of the German tradition (Kant, the Brothers Grimm, Marx, Freud, Benjamin and Adorno) in the original. There will be a WebCT component to the course, which will facilitate course management as well as the distribution and collection of reading materials and assignments. Course credit exclusions: None.

Cross-listed to: AS/GER 4725 6.00, AS/HUMA 4725 6.00

AS/HUMA 4730 6.00 Topics in Arts and Ideas. A study of the sources, contexts, expressions, and inter-relationships of the ideas and the non-

literary arts of a place or period. Social, literary, philosophical and religious works and their interactions with the arts (painting, sculpture, music, and architecture) are examined in a specific context. Prerequisite: Permission of the instructor. Course credit exclusions: None.

AS/HUMA 4750 3.00 Approaches to the Study of Religion: Theories and Methods. This course explores some of the main approaches to the study of religion, as well as the formation of the subject area itself, by examining its various theories and methods. Course credit exclusions: None.

AS/HUMA 4751 3.00 Thinking Mysticism in the Academy: Gender and Power. This course begins by questioning the very possibility of thinking mysticism given its supposed ineffability. Part two analyzes major works and theorists in the academic study of mysticism. Finally, part three charts the major debates within the field. Course credit exclusions: AS/HUMA 3875 6.00.

AS/HUMA 4755 3.00 Gender & Contemporary Religious Movements. This course explores the relationship between gender and religion through the examination of contemporary religious movements such as men's and women's spirituality movements, new religious movements, LGBTQ movements, and fundamentalist movements.

AS/HUMA 4760 3.00 Medieval Middle Eastern Islamic Music in Its Religious, Cultural and Social Context. This course focuses on Middle Eastern Islamic music in its medieval religious, cultural and social setting. Based mainly on literary and historical sources, it also makes reference to the arts, crafts and architecture of the period.

AS/HUMA 4761 3.00 Chanting, Music and Religion in the Medieval and Modern Middle East. This course focuses on the study of Middle Eastern changing and sacred music in its cultural and social context. Using written sources and audio-visual material, it contrasts the styles and functions of sacred Islamic, Jewish and Christian music.

AS/HUMA 4801 6.00 Josephus and Luke-Acts: Judaism and Christianity in the First Century. This examination of the late first-century contemporaries Josephus (thirty volumes) and "Luke" in historical context reveals much about the struggles that Jews and Christians faced in dealing with their shared Roman environment and with each other. Course credit exclusions: AS/HUMA 4000N 6.00 (prior to Fall/Winter 2003-2004).

AS/HUMA 4802 6.00 First-Century Jewish Authors. This course focuses on the writings of Philo of Alexandria and Flavius Josephus. These provide much insight into first-century Jewish life and thought, Jewish-gentile relations, Greco-Roman philosophy and historiography, and the environment in which Christianity was born. Course credit exclusions: AS/HUMA 4000S 6.00 (prior to Fall/Winter 2003-2004).

AS/HUMA 4803 6.00 Church, Mosque and Synagogue: Jews, Muslims and Christians in Medieval Spain. This course explores the contours of Christian-Muslim-Jewish co-existence in medieval Spain, focusing on religious and social themes. Topics include conversion, cross-traditional intellectual stimuli, sacred violence and positive images of the religious other. Course credit exclusions: AS/HUMA 4000V 6.00 (prior to Fall/Winter 2003-2004).

Cross-listed to: AS/HIST 4225 6.00, AS/HUMA 4803 6.00

AS/HUMA 4804 6.00 Historical and Mythological Views of Jewish History. Focusing on several critical periods of Jewish history, this course explores the methodologies and presuppositions of some historians, theologians and creative writers in an attempt to arouse sensitivity to the difficulties of establishing historical truth. Course credit exclusions: AS/HUMA 4820A 6.00 (prior to Fall/Winter 2003-2004).

AS/HUMA 4805 6.00 Jewish-Christian Polemics and Dialogue. This course examines the history of the intellectual relationship between Judaism and Christianity. Works read include polemical literature, philosophic texts, and works of biblical exegesis. The course also examines the modern attempt to substitute dialogue for polemics. Course credit exclusions: AS/HUMA 4820B 6.00 (prior to Fall/Winter 2003-2004).

AS/HUMA 4806 6.00 Judaism: Ritual and Ethics. This course explores classical and contemporary writings on "Ta-ameh ha-Mitzvot", (lit., reasons for the Commandments), the theoretical justification of traditional Jewish religious practices. Course credit exclusions: AS/HUMA 4820C 6.00 (prior to Fall/Winter 2003-2004).

AS/HUMA 4807 6.00 Maimonides. This course is an historical and critical inquiry into the religious thought of Rabbi Moses ben Maimon (1135-1204). Course credit exclusions: AS/HUMA 4820D 6.00 (prior to Fall/Winter 2003-2004).

AS/HUMA 4808 6.00 Sex and Violence in the Hebrew Bible. This course attempts a nuanced reading of texts dealing with sexuality and/or violence in the Hebrew Bible. The discussion focuses both on a contextual and on a contemporaneous reading of these texts. Course credit exclusions: AS/HUMA 4820E 6.00 (prior to Fall/Winter 2003-2004).

AS/HUMA 4809 6.00 The Hebrew Bible and the Literature of the Ancient Near East. This course examines various biblical literary genres and themes within the context of literature from the ancient Near East. Course credit exclusions: None.

AS/HUMA 4810 6.00 Religion in Post-Colonial Literature. This course examines the role and status of the religion in the production and reception of contemporary post-colonial literatures in English. Course credit exclusions: AS/HUMA 4890B 6.00 (prior to Fall/Winter 2003-2004).

AS/HUMA 4811 3.00 Golden Age? The Jews in Muslim and Christian Spain. This course explores issues in the sociocultural history and religious-intellectual creativity of medieval Spanish Jewry, while setting these issues in their larger Hispano-Islamic and Hispano-Christian contexts. Course credit exclusions: None.

AS/HUMA 4812 3.00 Christianity and Film. This course examines the role and representation of the Christian in popular film. It identifies and analyzes ways in which contemporary cinema reflects, shapes and embodies Christian myths, histories, rituals and doctrines and non-Christian attitudes towards them. Course credit exclusions: None.

AS/HUMA 4814 6.00 The Qur'an and its Interpreters. This course focuses on the Qur'an and its different interpretations. Historical, linguistic, literary, sectarian, Sufi, feminist, modernist and traditionalist approaches are considered in the discussion of selected readings from the Qur'an in English translation. Course credit exclusions: None.

AS/HUMA 4815 6.00 Studies in Islamic Mysticism. The course examines the development of Islamic mystical tradition (Sufism) in reference to two issues: one, the development of Sufism as a form of social organization institutionalized in the tariqa orders, and two, the employment of different themes and symbols in Sufi thought that seek to personalize religious experience through esoteric interpretations of the sacred texts. Course credit exclusions: AS/HUMA 4000A 6.00 (prior to Fall/Winter 2003-2004).

AS/HUMA 4816 6.00 Women in Islamic Literatures. The course focuses on the representation of Muslim women in modern Islamic literatures (novel and short stories) and other forms of Islamic cultural production, such as photography and film. Course credit exclusions: AS/HUMA 4890C 6.00 (prior to Fall/Winter 2003-2004).

AS/HUMA 4817 6.00 Imagination and the Sacred. This course examines imagination and metaphor in texts with a religious dimension; that describe encounters with the sacred; that explore a particular metaphor; that examine the extent of metaphor in everyday life and; that offer explanations of metaphor. Course credit exclusions: None.

AS/HUMA 4818 3.00 Shaping Jewish Memory: Meaning, Imagination, and Identity. This course explores how Jewish communities and individuals have remembered, interpreted and given meaning to the past to shape identity and values. It studies fiction, non-fiction, photographs, films, liturgy, and other vehicles of memory. Course credit exclusions: AS/HUMA 4818 6.00.

AS/HUMA 4818 6.00 Shaping Jewish Memory: Meaning, Imagination, and Identity. This course explores how Jewish communities and individuals have remembered, interpreted and given meaning to the past to shape identity and values. It studies fiction, non-fiction, photographs, films, liturgy, and other vehicles of memory. Course credit exclusions: AS/HUMA 4818 3.00.

AS/HUMA 4819 3.00 Visions of the End: Early Jewish and Christian Apocalypticism. This course investigates the origins and development of apocalypticism within ancient Judaism and early Christianity, covering apocalyptic literature (e.g. Daniel, the Dead Sea Scrolls, and Revelation), ancient millennial movements, and the apocalyptic world-view. Course Credit Exclusion: AS/HUMA 4819 6.00.

AS/HUMA 4819 6.00 Visions of the End: Early Jewish and Christian Apocalypticism. This course investigates the origins, development, and continuing legacies of apocalypticism in ancient Judaism and in Christianity to the present day, covering apocalyptic literature (e.g. Daniel, the Dead Sea Scrolls, and Revelation), millennial movements, and the apocalyptic world-view. Course Credit Exclusion: AS/HUMA 4819 3.00.

AS/HUMA 4820 3.00 Transformation of Jewish Thought and Culture. Jewish thought and culture are explored over a millennium (800-1800), focusing on transformations of the classical (biblical-rabbinic) legacy and interplay with the Islamic and Christian religio-cultural spheres in which they developed.

AS/HUMA 4825 6.00 Diversity in Early Christianity. This course explores diversity in early Christian thought and practice by investigating groups traditionally viewed as "heretical". This will include analysis of the New Testament Apocrypha, Nag Hammadi writings, and the opponents attacked in canonical and heresiological literature. Course credit exclusions: None.

AS/HUMA 4881 3.00 Bertolt Brecht: Literature, Culture and Politics (in translation). Using an interdisciplinary approach, the course examines Brecht's understanding of the interplay of literature, culture and politics, as shown in his dramatic, poetical and theoretical works. Course credit exclusions: None.

Cross-listed to: AS/GER 4620 3.00, AS/HUMA 4881 3.00

AS/HUMA 4882 3.00 Inventing the Museum:Collecting, Culture and Modernity. This course examines how the creation of the museum in Germany and Austria formed an exemplary moment of how the museum more generally led to a reinvention of modern Western culture. Prerequisite: AS/GER 2200 6.00 or permission of the Department. Note: Students are required to do readings in German and write assignments in German. Students are expected to prepare all readings and assignments in their own time in preparation for class discussion. Course credit exclusions: AS/GER 3750 3.00, AS/HUMA 4882 3.00.

Cross-listed to: AS/GER 4750 3.00, AS/HUMA 4882 3.00

AS/HUMA 4883 3.00 Germany in Transit: Nation, Migration and Cultural Production. The course investigates recent German-language literary and cinematic representations of migration. Using Germany as a case study, the course explores shifting concepts of home, identity and belonging in a globalized world. Prerequisite: AS/GER 2200 6.00 or permission of the Department. Note: Students are required to do readings in German and write assignments in German. Students are expected to view the films in their own time in the library in preparation for class discussion. Course credit exclusions: AS/GER 3820 3.00, AS/HUMA 4883 3.00.

Cross-listed to: AS/GER 4820 3.00, AS/HUMA 4883 3.00

Individualized Studies – Arts

Program Office:

262 Vanier College, 416-736-5158

Web Address:

<http://www.yorku.ca/human/undergrad/Programs/IndividualizedStudies/>

Program Coordinator:

J. Ginsburg

The Specialized Honours BA program in Individualized Studies is designed for students who wish to pursue a topic or line of enquiry that requires drawing together courses from several of the University's disciplines or fields of study.

Students interested in pursuing an individualized studies degree will be asked by the coordinator to prepare a statement describing the particular subject they wish to pursue. They will also be asked to identify a set of courses, from the Faculty of Arts and elsewhere, which are relevant to this theme. If the coordinator is satisfied that the proposed subject cannot be adequately pursued under an established program or departmental major and that sufficient courses and faculty expertise exist to support individualized study in the area in question, the student will be permitted to enter the Individualized Studies program. Normally, students are eligible to join the program if they have completed at least 24 credits and no more than 66 credits by the start of the academic year.

Students in individualized studies must follow all the rules for a Specialized Honours BA. In addition, they must take, as six of the 54 credits relevant to their theme, the individualized studies thesis course, AS/INDV 4000 6.00. This course is to be taken during the student's final year of study.

Courses in Individualized Studies

AS/INDV 4000 6.00 Individualized Studies Thesis. The purpose of this course is to offer individualized studies students a chance to draw together the parts of their topic by carrying out a sustained piece of research and writing. An adviser, arranged for by the student, directs the thesis and acts as one of its reader. Normally the finished thesis is around 60 pages in length. Course credit exclusions: None. Note: All who intend to register in AS/INDV 4000 6.00 must submit a thesis proposal to the coordinator by September 30.

Courses in Information Technology/Cours de technologie de l'information

AK/ITEC 1000 3.00 Introduction to Information Technologies. This course introduces basic concepts of contemporary information technologies (computers, networks, telecommunications) used to process and store information in organizations. The course material includes both hardware and software components, which students compare, select and combine to solve information problems. NCR Note: No credit will be retained for this course for students who have successfully completed or

who are currently enrolled in any computer science course at the 2000-level or higher. Course credit exclusions: AK/AS/ITEC 1011 3.00, GL/ITEC 1011 3.00.

AK/ITEC 1010 3.00 Information and Organizations. The value and importance of information to organizations, how it is used, stored and processed; emphasizes the uses of information technologies of various kinds, the benefits of the technologies, and the associated costs and problems; use of desktop applications. Course credit exclusion: GL/ITEC 1010 3.00.

GL/ITEC 1010 3.00 Information and Organizations. The value of information; how it is used, stored and processed by the organization; uses of information technology, and its costs and benefits, desktop applications.

GL/ITEC 1010 3.00 Information et organisations. Valeur de l'information; utilisation, stockage et traitement par l'organisation; utilisations de la technologie de l'information, coûts/rendement, applications à la bureautique.

Language of Instruction: French

GL/ITEC 1011 3.00 Introduction to Information Technologies. Hardware and software technology for information handling; single user system architecture, central and networked systems, telecommunications, human-computer interface; storage systems; operating systems; applications software. Prerequisite: GL/ITEC 1010 3.00.

GL/ITEC 1011 3.00 Introduction aux technologies de l'information. Technologie du matériel et du logiciel pour le traitement de l'information; architecture unifiée mono-usager, systèmes centraux et en réseaux, télécommunications, interface homme-machine; systèmes de stockage; systèmes d'exploitation; logiciels d'application. Condition préalable : GL/ITEC 1010 3.00.

Language of Instruction: French

AK/ITEC 1620 3.00 Object-Based Programming. An introduction to problem solving, task decomposition, and algorithm development in the context of object-oriented and structured programming techniques. Taught in Java, topics include primitive data types, control structures, simple classes, strings and arrays. The course also introduces object-oriented design and the use of API's to develop applications from existing classes. Note: This course will not count for computer science major or minor credit. Course credit exclusions: AK/AS/ITEC 1020 3.00, AK/AS/SC/COSC 1020 3.00, AK/AS/SC/CSE 1020 3.00, GL/CSLA/ITEC 1620 3.00.

GL/ITEC 1620 3.00 Programmation par objets I. Ce premier cours sur la résolution de problèmes et la réalisation d'algorithmes à l'aide de Java introduit des techniques de programmation structurées à l'aide de types de données primitives et d'IPA pour construire et utiliser des objets. Ce cours introduit aussi la réalisation d'applications par objets à l'aide de classes existantes. Équivalence de cours : AK/AS/ITEC 1620 3.00. Cours incompatibles : AK/AS/ITEC 1620 3.00; GL/COSC/MODR/ITEC 2960 3.00.

Language of Instruction: French

Cross-listed to: GL/CSLA 1620 3.00, GL/ITEC 1620 3.00

GL/ITEC 1620 3.00 Object-Based Programming. This is a first course on problem solving and algorithm development using Java. It introduces structured programming techniques using primitive data types and APIs to build and implement objects. This course also introduces the object-oriented design of applications using existing classes. Course equivalency: AK/AS/ITEC 1620 3.00. Course credit exclusions: AK/AS/ITEC 1620 3.00; GL/COSC/MODR/ITEC 2960 3.00.

Cross-listed to: GL/CSLA 1620 3.00, GL/ITEC 1620 3.00

AK/ITEC 1630 3.00 Object-Oriented Programming. A continuation of problem solving and algorithm development in the context of object-oriented programming techniques. Taught in Java, topics include inheritance, polymorphism, interfaces and events. Object-oriented design principles are presented in conjunction with applications in graphics and user interface. Prerequisites: AS/AK/ITEC 1620 3.00 or AS/AK/ITEC 1020 3.00 or AS/AK/SC/COSC 1020 3.00 or AS/AK/SC/CSE 1020 3.00. Note: A

grade of C or better is required in this course to take AS/AK/ITEC 2620 3.00. Course credit exclusion: GL/CSLA/ITEC 1630 3.00.

GL/ITEC 1630 3.00 Programmation par objets II. Ce cours introduit la mise en application de classes, soit en partant des bases, soit en élargissant des classes existantes. Cette mise en application permet une étude approfondie de l'héritage et du polymorphisme et aussi de la réalisation par objets (en UML) à l'aide de classes existantes ou nouvellement créées. Condition préalable : GL/CSLA/ITEC 1620 3.00. Équivalence de cours : AK/AS/ITEC 1630 3.00. Cours incompatibles : AK/AS/ITEC 1630 3.00; GL/COSC/MODR/ITEC 2970 3.00.

Language of Instruction: French

Cross-listed to: GL/CSLA 1630 3.00, GL/ITEC 1630 3.00

GL/ITEC 1630 3.00 Object-Oriented Programming. This course introduces class implementation either from scratch or by extending an existing class. Inheritance and polymorphism are discussed in detail. Focus on user-interface classes. Object-oriented design (with UML) using existing or newly created classes is further discussed. Prerequisite: GL/CSLA 1620 3.00. Course equivalency: AK/AS/ITEC 1630 3.00. Course credit exclusions: AK/AS/ITEC 1630 3.00; GL/COSC/MODR/ITEC 2970 3.00.

Cross-listed to: GL/CSLA 1630 3.00, GL/ITEC 1630 3.00

GL/ITEC 1670 6.00 Fundamentals of Mathematics. Intended for the student whose (high school) mathematical background is either weak or incomplete, and designed to train and improve the logical and technical skills in the use of basic mathematics. Topics are chosen from basic algebra, linear, quadratic, polynomial, exponential, logarithmic and trigonometric functions, systems of equations, inequalities, probability, series and derivatives. Course equivalent: AK/MATH 1710 6.00. Course credit exclusions: AK/MATH 1710 6.00, GL/MATH 1880 6.00(EN).

Cross-listed to: GL/ITEC 1670 6.00, GL/MATH 1670 6.00, GL/MODR 1670 6.00

GL/ITEC 1925 3.00 The Elements of Logic for Computer Science. This course introduces the fundamental elements of formal logic and its applications in computer science. The subjects covered include: propositional logic, reasoning, automatic deduction, resolution, logic circuits, predicate logic, applications in programming logic. Course credit exclusions: GL/COSC/MODR 2900 6.00.

Cross-listed to: GL/CSLA 1925 3.00, GL/ITEC 1925 3.00, GL/MATH 1925 3.00, GL/MODR 1925 3.00

GL/ITEC 1925 3.00 Éléments de logique pour l'informatique. Ce cours introduit les éléments fondamentaux de la logique formelle et ses applications en informatique. Les sujets abordés incluent: la logique des propositions, raisonnements, déduction automatique, résolution, circuits logiques, la logique des prédicats, applications dans la programmation logique. Cours incompatibles : GL/COSC/MODR 2900 6.00.

Language of Instruction: French

Cross-listed to: GL/CSLA 1925 3.00, GL/ITEC 1925 3.00, GL/MATH 1925 3.00, GL/MODR 1925 3.00

GL/ITEC 1927 3.00 Mathematical Structures for Computer Science. This course is designed to introduce and analyze some of the main mathematical topics related to computer science. The subjects covered include sets, relations, mathematical induction, congruences, groups, graphs and trees, Boolean algebra and computer circuits. Prerequisite: GL/MATH 1650 3.00. Course credit exclusions: GL/COSC/MODR 2900 6.00.

Cross-listed to: GL/CSLA 1927 3.00, GL/ITEC 1927 3.00, GL/MODR 1927 3.00

GL/ITEC 1927 3.00 Structures mathématiques pour l'informatique. Ce cours a pour but de présenter et d'analyser les principaux éléments de mathématiques nécessaires en informatique. Les sujets abordés incluent les ensembles, les relations, l'induction mathématique, les congruences, les groupes, les graphes et les arborescences, l'algèbre de Boole et les circuits logiques. Condition préalable : GL/MATH 1650 3.00. Cours incompatibles : GL/COSC/MODR 2900 6.00.

Language of Instruction: French

Cross-listed to: GL/CSLA 1927 3.00, GL/ITEC 1927 3.00, GL/MODR 1927 3.00

AK/ITEC 2010 3.00 Systems Analysis and Design I. Case studies in the development of information systems; exposing the reasons for success or failure; IS planning; various IS development methodologies and their strengths and weaknesses; role of the analyst; analysis project. Prerequisites: AK/AS/ITEC 1000 3.00, AK/AS/ITEC 1010 3.00 and AK/AS/ITEC 1620 3.00, or equivalent. Course credit exclusions: GL/CSLA/ITEC 2010 3.00, SB/OMIS 4740 3.00.

GL/ITEC 2010 3.00 Analyse et conception des systèmes d'information I. Le cours présente les concepts et techniques d'analyse et de conception moderne des systèmes informatiques. Les étapes du développement des systèmes et la modélisation des demandes et de la conception des systèmes sont explorées. Les raisons du succès ou de l'échec des systèmes sont discutées. On décrit le rôle de l'analyste de système dans le développement des systèmes, pour définir les demandes de la technologie d'information et pour proposer des recommandations. Condition préalable : GL/ITEC 1010 3.00, GL/ITEC 1011 3.00 et GL/ITEC/CSLA 1620 3.00 ou équivalent. Cours incompatibles : GL/COSC 3500 3.00, AK/ITEC 2010 3.00.

Cross-listed to: GL/CSLA 2010 3.00, GL/ITEC 2010 3.00

AK/ITEC 2610 3.00 Object-Oriented Programming. A continuation of problem solving and algorithm development in the context of object-oriented programming techniques. Taught in Java, topics include inheritance, polymorphism, interfaces and events. Object-oriented design principles are presented in conjunction with applications in graphics and user interface. Prerequisites: AS/AK/ITEC 1620 3.00 or AS/AK/ITEC 1020 3.00 or AS/AK/SC/COSC 1020 3.00 or AS/AK/SC/CSE 1020 3.00. Course credit exclusion: AK/ITEC 1630 3.00 prior to Fall 2008, GL/CSLA ITEC 1630 3.00

AK/ITEC 2620 3.00 Introduction to Data Structures. A completion to introductory problem solving and algorithm development. Taught in Java, topics include linked lists, binary trees, stacks, queues and other elementary data structures. Complexity analysis is introduced with an emphasis on searching and sorting algorithms. Prerequisite: AS/AK/ITEC 1630 3.00 with at least a grade of C, or AS/AK/ITEC 1020 3.00, with at least a grade of C, or AS/AK/SC/COSC 1020 3.00 or AS/AK/SC/CSE 1020 3.00, with at least a grade of C. Course credit exclusions: AS/AK/SC/CSE 1030 3.00. Note: A grade of C or better is required in this course to take any upper-level information technology course. Note: This course will not count for computer science major or minor credit. Course credit exclusions: AK/AS/ITEC 1030 3.00, AK/AS/SC/COSC 1030 3.00, AK/AS/SC/CSE 1030 3.00, GL/CSLA/ITEC 2620 3.00.

GL/ITEC 2620 3.00 Principes fondamentaux des structures de données. Ce cours présente des structures de données abstraites élémentaires : piles, queues et listes et les algorithmes associés. Il présente aussi une introduction aux fichiers, structures de données pour le stockage externe et leur organisation : séquentiel, séquentiel-indexé et fichiers à accès direct. Condition préalable : GL/CSLA/ITEC 1630 3.00. Équivalence de cours : AK/AS/ITEC 2620 3.00. Cours incompatibles : GL/COSC 3400 6.00 et GL/COSC 3400 3.00.

Cross-listed to: GL/CSLA 2620 3.00, GL/ITEC 2620 3.00

GL/ITEC 2620 3.00 Fundamentals of Data Structures. This course presents elementary abstract data structures: stacks, lists and queues, and associated algorithms. It also introduces the files, data structure for external data storage and different file structures: sequential, index sequential and hashes (direct access files). Course equivalency: AK/AS/ITEC 2620 3.00. Prerequisite: GL/CSLA 1630 3.00. Course credit exclusions: AK/AS/ITEC 2620 3.00; GL/COSC 3400 6.00 and GL/COSC 3400 3.00.

Cross-listed to: GL/CSLA 2620 3.00, GL/ITEC 2620 3.00

GL/ITEC 2635 3.00 Creation and Management of a site on the WWW.

This course presents the client server model of the Web with different methods to secure a Web site. The students will learn how to build and manage a Web site using DHTML, Java Script, and animation and sound manipulation software. Prerequisite: GL/ITEC 2915 3.00. Course credit exclusion: GL/CSLA 1960 3.00 and GL/CSLA 1970 3.00, GL/MODR 1960 3.00 and GL/MODR 1970 3.00, GL/SOSC 1960 3.00 and GL/SOSC 1970 3.00.

Cross-listed to: GL/ITEC 2635 3.00, GL/MODR 2635 3.00

GL/ITEC 2635 3.00 La création et la gestion d'un site sur le WWW.

Le cours présente le modèle client serveur du Web et plusieurs méthodes pour sécuriser un site Web. Les étudiants apprendront comment construire et gérer un site Web en utilisant DHTML, Java Script et des logiciels d'animation et de manipulation du son. Condition préalable : GL/ITEC 2915 3.00. Cours incompatibles : GL/CSLA 1960 3.00 et GL/CSLA 1970 3.00, GL/MODR 1960 3.00 et GL/MODR 1970 3.00, GL/SOSC 1960 3.00 et GL/SOSC 1970 3.00.

AK/ITEC 3010 3.00 Systems Analysis and Design I. Case studies in the development of information systems; exposing the reasons for success or failure; IS planning; various IS development methodologies and their strengths and weaknesses; role of the analyst; analysis project. Prerequisites: AK/AS/ITEC 1000 3.00, AK/AS/ITEC 1010 3.00 and AK/ITEC 2610 3.00, or equivalent. Course credit exclusions: GL/CSLA/ITEC 2010 3.00, AK/ITEC 2010 3.00 (prior to Fall 2008), SB/OMIS 4740 3.00.

AK/ITEC 3020 3.00 Web Technologies. Web technology is the amalgamation of Web related software and systems. This course covers some programming topics such as CGI, Java and JavaScript and some fundamental topics such as data markup, networking, security and text processing. Prerequisite: AK/ITEC 1630 3.00 and general prerequisites. Course credit exclusion: None.

AK/ITEC 3210 3.00 Applied Data Communications and Networks. Communications systems, environments and components; choices for data, voice and imagery; network control, design and management; distributed and local networks; client/server and Intranet technologies; Web-based technologies. Prerequisites: General prerequisites. Note: This course will not count for computer science major or minor credit. Course credit exclusions: AK/AS/SC/COSC 3211 3.00, AK/AS/SC/COSC 3212 3.00, AK/COSC 3409A 3.00, AK/COSC 3409B 3.00, GL/CSLA/ITEC 3625 3.00, GL/CSLA/ITEC 4625 3.00.

AK/ITEC 3220 3.00 Using and Designing Database Systems. An examination of databases, trends in database management systems and their application in a wide range of organizational areas. The course provides an overview of database processing in modern organizations and discusses current and emerging trends in database processing. Prerequisites: General prerequisites. Note: This course will not count for computer science major or minor credit. Course credit exclusions: AK/AS/ITEC 3421 3.00, AK/AS/SC/COSC 3421 3.00, GL/CSLA/ITEC 3620 3.00, AK/HLST 3320 3.00, AK/NURS 3230 3.00.

AK/ITEC 3230 3.00 Designing User Interfaces. Examines a range of topics in the analysis and design of interfaces and human-computer interaction. Focusing on the human perspective, the course will discuss improving interaction with computers and reducing the possible mismatch between human and machine. Prerequisites: General prerequisites. Note: This course will not count for computer science major or minor credit. Course credit exclusions: AK/AS/ITEC 3461 3.00, AK/AS/SC/COSC 3461 3.00, AK/AS/SC/CSE 3461 3.00.

AK/ITEC 3325 3.00 Decision Support Technologies. Presents contemporary concepts of decision support technologies and their use in knowledge-based information systems. Introduces the core issues of knowledge representation and management, artificial neural networks, evolutionary computation, hybrid intelligent systems, machine learning, automated reasoning, and knowledge engineering. Prerequisite: AK/ITEC 3220 3.00 and general prerequisites. Course credit exclusion: None.

GL/ITEC 3461 3.00 Human Computer Interaction. This course introduces the concepts and technology necessary to design, manage and implement interactive software. Students will learn how to design user interfaces, how to realize them and how to evaluate the end result. Prerequisite: GL/CSLA/ITEC 2620 3.00.

Cross-listed to: GL/CSLA 3461 3.00, GL/ITEC 3461 3.00

AK/ITEC 3500 3.00 Information Technology Risk Management. This course covers key IT risk components and ways to mitigate those risks. Areas of instruction include how to manage IT-related risks addressed by CobIT, ITIL and ISO 17799 standards. Prerequisites: AK/ITEC 1630 3.00, AK/ITEC 2010 3.00. Course credit exclusions: None.

GL/ITEC 3601 3.00 Le génie des logiciels. Ce cours a pour objectif d'étudier le processus de validation des étapes du cycle de vie du logiciel, la gestion de projet, l'estimation des coûts, les stratégies conception de codage, de test et de la maintenance ainsi que les techniques de vérification de programmes. Condition préalable : GL/CSLA 2620 3.00. Cours incompatible: GL/CSLA 3510 3.00.

GL/ITEC 3610 3.00 Computer Organization. This course reviews the fundamental structures in modern processor design. Topics will include computer organization, instruction set design, memory system design and pipelining. Emphasis will be on a quantitative evaluation of design alternatives and an understanding of timing issues. There will be experimentation with LabVIEW (Laboratory Virtual Instrument Engineering Workbench), a graphical programming language for virtual instrumentation and simulation. Prerequisite: GL/CSLA/ITEC 1630 3.00. Course credit exclusion: GL/COSC 3800 3.00.

Cross-listed to: GL/CSLA 3610 3.00, GL/ITEC 3610 3.00

GL/ITEC 3620 3.00 Database Management Systems I. The course presents some models for the Database Management Systems (DBMS). It concerns the study of the representation of the reality using the entity-relation model, and the relational Database Management System and its normalization. The course includes also an introduction to the SQL, a data definition, data manipulation and data control language, currently used in a relational database. Prerequisite: GL/CSLA/ITEC 2620 3.00. Course credit exclusion: GL/COSC 4510 3.00.

Cross-listed to: GL/CSLA 3620 3.00, GL/ITEC 3620 3.00

GL/ITEC 3625 3.00 Data Communications and Networks. This course concerns the theory and applications of data communications; basic principles of telephony and switching; norms and protocols; algorithms used in data communications; LAN (local area network); ISO/OSI norms; SNA; hardware and software for communications. Prerequisite: GL/CSLA/ITEC 2620 3.00. Course credit exclusion: GL/COSC 4500 3.00.

GL/ITEC 3635 3.00 Graphisme par ordinateur. Ce cours introduit de multiples structures de données et algorithmes essentiels à la représentation graphique de données sur ordinateur. L'objectif est de fournir suffisamment de bases pour écrire des logiciels d'applications graphiques. La première moitié du cours couvrira les applications graphiques à deux dimensions, les opérations "raster", les méthodes pour l'imagerie, ainsi que la conception et l'élaboration des interfaces utilisateur. La seconde partie inclura les sujets relatifs aux applications graphiques à trois dimensions, comprenant les techniques de représentation, d'éclairage, de traitement des ombres, de détermination des parties visibles, d'élaboration du rendu final, et d'animation. Condition préalable : GL/CSLA 2620 3.00. Cours incompatibles : AK/AS/SC/CSE 3431 3.00.

GL/ITEC 3635 3.00 Computer Graphics. This course introduces many important data structures and algorithms to present data visually on a computer in order to provide background to write computer graphics applications. The first half of the course will cover two dimensional computer graphics, raster operations, imaging methods, and user interface design and construction. The second half will include topics related to the three-dimensional computer graphics, such as representation, illumination, shading, visibility determination, rendering and animation. Prerequisite: GL/CSLA/ITEC 2620 3.00. Course credit exclusion: AK/AS/SC/CSE 3431 3.00.

GL/ITEC 3640 3.00 Computer Hardware. This course studies the design, structure and operation of digital computers. Topics include logic circuits and digital electronics, computer arithmetic and machine language programming. Consideration of the design interactions between hardware and software system. Prerequisite: GL/CSLA/ITEC 3610 3.00.

Cross-listed to: GL/CSLA 3640 3.00, GL/ITEC 3640 3.00

GL/ITEC 3645 3.00 MATLAB for data analysis and visualization. This course offers efficient methods for modern data analysis and visualization in the MATLAB environment - MATLAB is a software package to easily solve and represent graphically many quantitative problems. These are illustrated with examples from applications in Cognitive and Life Sciences, Sociology, Psychology, Economics, Mathematics and Business. This course, intended for upper level students working in variety of fields, provides solid approaches for working with real-life data sets and for designing graphical user interfaces (GUIs) for human-machine interaction.

Cross-listed to: GL/ITEC 3645 3.00, GL/MODR 3645 3.00

GL/ITEC 3800 3.00 Systems Analysis and Design II. This course deals with intermediate and advanced topics in systems analysis and design. Topics include the systems development life cycle, object-oriented design, CASE tools and recent advances in system analysis and design; risk management; IS planning, the role of the analyst and the analysis project. This course also applies structured analysis and design techniques to produce process models of the software system to optimize development time. Prerequisite: GL/CSLA/ITEC 2010 3.00.

AK/ITEC 3900 0.00 Internship Term. The industrial internship provides qualified students with the opportunity to work in the technology field as part of their honours degree program. The Technology Internship Office (TIP) will coordinate placement of students with a specific internship position. Prerequisites: 1) Successful completion of 9.00 AK/ITEC credits at the 3000 level and an overall average of at least B in the AK/ITEC courses completed; 2) Open only to full-time students in Honours program. Course credit exclusion: AK/AS/SC COSC 3900 3.00. Note 1: This course

does not count for degree credit in any program. Registration in sections of AK/ITEC 3900 0.00 while on an internship placement provides a transcript notation of the student's participation in the internship program. Note 2: Students are required to register in this course in every term of their work-term (i.e. internship). Note 3: Every student registered in the course will be assigned a faculty supervisor who will assess the student's performance during the internship.

AK/ITEC 4000 3.00 Independent Research Project in Information Technology. Under the supervision of a faculty member, and with permission of the program coordinator, students may carry out an independent research project in an area of information technology. Prerequisites: General prerequisites; AS/AK/ITEC 3210 3.00 or AS/AK/SC/COSC 3211 3.00 or AS/AK/SC/CSE 3211 3.00; AS/AK/ITEC 3220 3.00 or AS/AK/ITEC 3421 3.00 or AS/AK/SC/COSC 3421 3.00 or AS/AK/SC/CSE 3421 3.00; AS/AK/ITEC 3230 3.00 or AS/AK/ITEC 3461 3.00 or AS/AK/SC/COSC 3461 3.00 or AS/AK/SC/CSE 3461 3.00; and permission of the program coordinator. Note: Please consult the Faculty of Arts Academic Advising and Student Responsibility section of the calendar for regulations on independent study courses. Course credit exclusion: None.

AK/ITEC 4010 3.00 Systems Analysis and Design II. This course deals with intermediate and advanced topics in systems analysis and design. Topics include the systems development life cycle, object-oriented design, CASE tools and recent advances in system analysis and design. Prerequisites: General prerequisites; AS/AK/ITEC 3220 3.00 or AS/AK/ITEC 3421 3.00 or AS/AK/SC/COSC 3421 3.00 or AS/AK/SC/CSE 3421 3.00. Course credit exclusion: GL/ITEC 3800 3.00.

AK/ITEC 4020 3.00 Internet Client-Server Systems. This course offers a thorough treatment of client-server systems concepts, with programming techniques that yield results in Web pages and Web-based applications. Topics include effective Web page design, server and client-side scripting, Java servlets, ActiveX controls and the essentials of electronic commerce. Prerequisites: General prerequisites; AS/AK/ITEC 3220 3.00 or AS/AK/ITEC 3421 3.00 or AS/AK/SC/COSC 3421 3.00 or AS/AK/SC/CSE 3421 3.00; AS/AK/ITEC 3230 3.00 or AS/AK/ITEC 3461 3.00 or AS/AK/SC/COSC 3461 3.00 or AS/AK/SC/CSE 3461 3.00. Course credit exclusions: GL/CSLA/ITEC 3632 3.00, GL/CSLA/ITEC 4630 3.00.

AK/ITEC 4030 3.00 Business Process Management Systems. An overview of current generic IT solutions used to support business processes in organizations. An emphasis is placed on the analysis of those business processes, how to improve them and how to connect them with the appropriate IT solutions available. Prerequisites: General prerequisites; AS/AK/ITEC 3210 3.00 or AS/AK/SC/COSC 3211 3.00 or AS/AK/SC/CSE 3211 3.00; AS/AK/ITEC 3220 3.00 or AS/AK/ITEC 3421 3.00 or AS/AK/SC/COSC 3421 3.00 or AS/AK/SC/CSE 3421 3.00. Course credit exclusion: GL/ITEC 4030 3.00.

GL/ITEC 4030 3.00 IT Strategies. This course gives information technology students an operational understanding of current generic IT solutions used to support business processes in organizations. Students will learn to analyze business processes, to improve them and to connect them with the appropriate IT solutions available. Prerequisites: GL/CSLA/ITEC 2010 3.00, GL/CSLA/ITEC 3620 3.00 and GL/CSLA/ITEC 3625 3.00. Course equivalency: AK/AS/ITEC 4030 3.00.

AK/ITEC 4040 3.00 Requirements Management. This course focuses on methods and techniques to elicit, model, analyze and manage software requirements for improving current business processes. Topics include project management, including how to manage software development through all phases of the life cycle. Prerequisites: General prerequisites; AS/AK/ITEC 3220 3.00 or AS/AK/ITEC 3421 3.00 or AS/AK/SC/COSC 3421 3.00 or AS/AK/SC/CSE 3421 3.00. Recommended: AS/AK/ITEC 4010 3.00. Course credit exclusion: None.

AK/ITEC 4100 3.00 Topics in Information Technology. Topics will vary from year to year. Please consult the Information Technology Program supplemental calendar for more detailed information. Prerequisites: General prerequisites; AS/AK/ITEC 3210 3.00 or AS/AK/SC/COSC 3211 3.00 or AS/AK/SC/CSE 3211 3.00; AS/AK/ITEC 3220 3.00 or AS/AK/ITEC 3421 3.00 or AS/AK/SC/COSC 3421 3.00 or AS/AK/SC/CSE 3421 3.00; AS/AK/ITEC 3230 3.00 or AS/AK/ITEC 3461 3.00 or

AS/AK/SC/COSC 3461 3.00 or AS/AK/SC/CSE 3461 3.00; or permission of the program coordinator. Course credit exclusion: None.

AK/ITEC 4101 3.00 Business Integration Technologies. Students learn about business integration issues and use development tools (Websphere Studio) that help organizations meet their business integration needs. Prerequisites: General ITEC upper-year prerequisites and ITEC 3210 3.00, ITEC 3220 3.00 and ITEC 3230 3.00. Course credit exclusion: None.

AK/ITEC 4140 6.00 Seminar on McLuhan, Technology and Cultural History. Examines the thought of Marshall McLuhan within the context of the historical development of contemporary culture as impacted by technology and media. Comparisons are drawn between McLuhan and other thinkers of technology such as Harold Innis, Jacques Ellul, Lewis Mumford. Prerequisite: 78 credits and permission of the coordinator of History. Course Credit Exclusions: None.

GL/ITEC 4200 3.00 La logique floue pour les affaires, la finance et la gestion. Les concepts de base de la logique floue. Décision dans un contexte imprécis. Le contrôle flou pour les affaires, la finance et la gestion. Études de cas pratiques. Condition préalable : GL/CSLA 1927 3.00.

Language of Instruction: French

Cross-listed to: GL/CSLA 4200 3.00, GL/ITEC 4200 3.00

AK/ITEC 4220 3.00 Modern Approaches to Data Management: Database Management Systems. This course examines approaches to relational database administration, and investigates modern logical data models and tools supporting their implementation. Topics include transaction management, crash recovery, security, object database systems and information retrieval systems. Prerequisites: General prerequisites; AS/AK/ITEC 3220 3.00 or AS/AK/ITEC 3421 3.00 or AS/AK/SC/COSC 3421 3.00 or AS/AK/SC/CSE 3421 3.00. Course credit exclusion: None.

AK/ITEC 4305 3.00 Web Mining. Web mining is the application of data mining techniques to discover useful information from the Web. This course provides an overview of relevant techniques from data mining and information retrieval and their applications in e-commerce and Web information systems. Prerequisites: General prerequisites. Course credit exclusion: None.

AK/ITEC 4315 3.00 Information Technology And Human Language. An examination of how information technology has been and can be applied to the study and processing of human language, using both primary research sources, and some hands-on programming. Note: Background in Linguistics or Programming (but not necessarily both) would be helpful. Prerequisites: General prerequisites. Course credit exclusion: None.

GL/ITEC 4620 6.00 Stage en informatique. Un stage à temps plein de 3 ou 4 mois dans une compagnie d'informatique ou de la technologie de l'information. Soumission d'un rapport technique qui lie des aspects de ce travail aux études d'informatique ou de la technologie de l'information que l'étudiant(e) a fait antérieurement. Conditions préalables : GL/CSLA 3830 3.00, GL/CSLA 2010 3.00 et une moyenne cumulative de B+.

Language of Instruction: French

Cross-listed to: GL/CSLA 4620 6.00, GL/ITEC 4620 6.00

GL/ITEC 4635 3.00 Computer Algorithms and Techniques for Imaging Cognition. This course offers an introduction to techniques and computer algorithms (with MATLAB) for functional brain imaging as well as recent developments in cognitive neuropsychology. It examines how theories of normal cognitive functioning can be informed by evidence from brain-damaged patients and how converging evidence may be obtained from functional neuro-imaging techniques. Programming exercises will use data sets from current experiments. This course is intended for upper level students majoring in Psychology, Cognitive and Brain Sciences or Computer Sciences.

Cross-listed to: GL/ITEC 4635 3.00, GL/PSYC 4635 3.00

GL/ITEC 4635 3.00 Algorithmes et techniques informatiques pour l'imagerie cognitive. Ce cours offre une introduction aux techniques et algorithmes (avec MATLAB) de l'imagerie fonctionnelle du cerveau et une présentation des dernières réalisations en neuropsychologie cognitive. Il analyse les théories du fonctionnement cognitif normal à la lumière de mesures prélevées sur des patients atteints de lésions cérébrales, et la convergence avec les résultats obtenus à partir des techniques de l'imagerie fonctionnelle du cerveau. Les exercices de programmation prévus utiliseront les données de recherche expérimentale en cours. Le cours s'adresse aux étudiants de quatrième année qui se spécialisent en psychologie, en sciences cognitives ou en informatique.

GL/ITEC 4640 3.00 Computer Networks. This course studies ISDN (Integrated Service Digital Network); the ATM (Asynchronous Transfer Mode) Protocol Reference Model; Internet and its networking protocol TCP/IP (Transmission Control Protocol/Internet Protocol); transfer of multimedia content; packet and data switching; gateways and network interconnections. Prerequisite: GL/CSLA 4625 3.00. Course credit exclusion: GL/COSC 4520 3.00.

Cross-listed to: GL/CSLA 4640 3.00, GL/ITEC 4640 3.00

GL/ITEC 4645 3.00 Introduction to Bioinformatics A. The course introduces students to elements of Computational Molecular Biology such as nucleotides, amino acids, DNA, proteins, transcription and translation. We will present DNA alignment algorithms such as pair wise alignment, local and global, as well as multiple alignments. The students will use the INTERNET to access biological databases and learn how these can be used for the molecular structure prediction. Prerequisite: GL/CSLA/ITEC 2620 3.00. Course credit exclusions: GL/COSC/ITEC 4010 3.00 (Fall/Winter 2001-2002 and Fall/Winter 2002-2003).

Cross-listed to: GL/CSLA 4645 3.00, GL/ITEC 4645 3.00

GL/ITEC 4647 3.00 Introduction to Bioinformatics B. The course introduces students to the use of Perl language for bioinformatics: to represent and manipulate DNA sequences, to build restriction maps using regular expressions to simulate the DNA mutations, to generate random DNA. We will present the implementation in Perl of data structures and algorithms for text processing that are used in bioinformatics. Prerequisite: GL/CSLA/ITEC 2620 3.00.

Cross-listed to: GL/CSLA 4647 3.00, GL/ITEC 4647 3.00

GL/ITEC 4648 3.00 Programmation logique (PROLOG). Ce cours est une introduction à la programmation logique et à la programmation logique par contraintes. Le langage de programmation PROLOG est présenté (prédicats prédéfinis, retour arrière, "coupure" etc.) et sont discutés divers techniques de programmation, des éléments de méta-interpréteurs en PROLOG et des applications. The interdisciplinary program in International Development Studies offers a variety of courses in the field of development studies. Students in the program are required to complete a coherent set of core courses, as well as a selection of courses from a number of departments and disciplines which focus on the histories, political economies and cultures of various regions and their diasporic communities. The core courses identify central issues in the field from a critical liberal arts and comparative perspective, and introduce students to specific analytical methods and techniques in the field of development studies. While highlighting common themes in the field of development, the core courses also emphasize the diversity of experiences in the developing world and the regional and subregional specificities. In addition to the core courses, the program consists of introductory area studies courses, intended to familiarize students with the social, political, economic and cultural dynamics of regions in the developing world, and additional courses grouped into the following areas of concentration: culture; diasporas and migration; environment; gender; political economy; politics, governance and policy.

The International Development Studies program is intended to provide students with a thorough grounding in the history, debates, dimensions, institutional approaches and critiques of the field. As well, students in the program will develop the skills and knowledge required to read the documents of international development/financial institutions such as the CIDA and the World Bank, understand the institutional language of development professionals, and create and implement development research or delivery proposals.

For specific program requirements and the list of program courses, please consult the Faculty of Arts Programs of Study section of this calendar.

The School of Kinesiology and Health Science has a curriculum which presents wide and flexible offerings to the student. All students take a core of required subject matter encompassing the major areas of emphasis in kinesiology and health science. Students may choose from a variety of elective courses to develop a highly specialized area of interest or to obtain a more general and broad program. The school attaches laboratories, field work and seminars to many of its courses, thereby coupling theory and technical knowledge with applied experiences and providing students with a greater opportunity for exchange and discussion with each other, with teachers and with experts in the area. The school also has grouped courses, enabling students to obtain certification in the areas of athletic therapy, sport administration, coaching and fitness assessment and exercise counselling.

A physical activity skills "practicum" program is an integral part of the undergraduate program in Kinesiology and Health Science. Students take one practicum course in each of the following six areas: dance/gymnastics, aquatics, team sports, individual and dual sports, track and field, and emergency care, and complete their requirements from the large variety of practicum courses offered.

For specific program requirements please consult the Faculty of Health Programs of Study section of this calendar.

Courses in Kinesiology and Health Science

Academic courses in kinesiology and health science offered by the School of Kinesiology and Health Science have the prefix "KINE". Practicum courses have the prefix "PKIN".

HH/KINE 1000 6.00 Sociocultural Perspectives in Kinesiology.

Introduction to the concept of the 'social body' through study of Western historical legacies and sociological factors of class, gender, 'race', culture with emphasis on sport sociology. Critical reading and research essay skills. Two one hour lectures, one hour tutorial/week. Course credit exclusions: AS/SC/KINE 1000 3.00 (prior to Fall/Winter 1998-1999), AS/SC/KINE 1000 4.00 (prior to Fall/Winter 2005-2006), AS/SC/KINE 2010 3.00 (prior to Fall/Winter 2000-2001), AS/SC/PHED 1000 3.00 (prior to Fall/Winter 1996-1997), AS/SC/PHED 1010 3.00 (prior to Fall/Winter 1996-1997), AS/SC/PHED 2010 3.00 (prior to Fall/Winter 1996-1997).

HH/KINE 1020 6.00 Introduction to Fitness and Health.

An examination of the components and principles of fitness and health with particular attention to the evaluation and modification of fitness and health status. Two and a half lecture hours per week plus one hour lab per week. Two terms. Course credit exclusions: AS/SC/KINE 1020 3.00 (prior to Fall/Winter 1998-1999), AS/SC/KINE 1020 4.00 (prior to Fall/Winter 2003-2004), AS/SC/KINE 1020 5.00 (prior to Fall/Winter 2006-2007), AS/SC/PHED 1020 3.00 (prior to Fall/Winter 1996-1997).

HH/KINE 2011 3.00 Human Physiology I.

The focus of this course is the cellular basis of human physiology. Basic principles of physiology are presented from the viewpoint of the simplest structural unit-the cell-in order to provide a sound basis for understanding complex multi-cellular organisms in subsequent courses. Course credit exclusions: AS/HH/SC/KINE 3011 3.00.

HH/KINE 2031 3.00 Human Anatomy.

An overview of the organization and structure of the human body. Each of the following systems is examined with respect to cell morphology, cell and tissue arrangement and inter-systems organization: skeletal, muscular, nervous, circulatory, lymphatic, respiratory, urinary, reproductive and endocrine. Three lecture

hours per week, two laboratory hours in alternate weeks. One term. Course credit exclusions: AS/SC/KINE 3070 3.00 (prior to Fall/Winter 1997-1998), AS/SC/PHED 2070 3.00 (prior to Fall/Winter 1996-1997), SC/PHED 2070 4.00 (prior to Fall/Winter 1996-1997), AS/PHED 3070 3.00 (prior to Fall/Winter 1996-1997), SC/PHED 3070 4.00 (prior to Fall/Winter 1996-1997), SC/NATS 1650 6.00.

HH/KINE 2049 3.00 Research Methods in Kinesiology. This course introduces students to the procedures utilized to design and conduct research in the discipline of kinesiology. Two lecture hours, two laboratory hours, and one hour review/problem solving per week. One term. Course credit exclusions: AS/SC/KINE 2049 4.00 (prior to Fall/Winter 2004-2005), AK/AS/HH/SC/PSYC 2030 3.00, AK/HH/PSYC 2530 3.00.

HH/KINE 2050 3.00 Analysis of Data in Kinesiology I. An introduction to scientific method and the statistical analysis of experimental data. The conduct of simple experiments, techniques of naturalistic observation and the analysis of resulting data using fundamental concepts of descriptive and inferential statistics. Two lecture hours and two laboratory hours per week. One term. Prerequisite: AS/HH/SC/KINE 2049 4.00. Course credit exclusions: SC/BIOL 2060 3.00, AS/ECON 2500 3.00, ES/ENVS 2010 6.00, ES/ENVS 2010 3.00, AS/SC/GEOG 2420 3.00, AS/SC/MATH 1132 3.00, AK/AS/SC/MATH 2500 3.00, AK/AS/SC/MATH 2560 3.00, AK/AS/SC/MATH 2565 3.00, AS/SC/PHED 2050 3.00 (prior to Fall/Winter 1996-1997), AS/POLS 3300 6.00, AK/AS/HH/SC/PSYC 2020 6.00, AK/AS/HH/SC/PSYC 2021 3.00, AK/HH/PSYC 2510 3.00, AS/SOCI 2030 6.00, AS/SOCI 3030 6.00.

HH/KINE 2380 3.00 Introduction to Sport Administration. This course is designed to introduce students to the knowledge and skills needed to be successful in sport management. Topics include leadership styles, communication and change management skills, creative problem-solving and an introduction to event management and marketing. Three lecture hours per week. One term. Course credit exclusions: None. Note: This course does not count for science credit.

HH/KINE 2475 3.00 Coaching: The Art and Science. This course introduces the fundamental principles involved in the coaching process. Background and philosophic issues related to the coach and the athlete are explored. Three lecture hours per week. One term. Course credit exclusions: None. Note: Upon successful completion of this course, students receive Level I Theory certification of the National Coaching Certificate Program.

HH/KINE 2490 3.00 Athletic Therapy I. The purpose of the course is to provide students with a broad spectrum of knowledge relating to the physiological, psychosocial and pathological aspects of participation in sport with an emphasis on the management factors in injury prevention and remediation. Three lecture hours per week. One term. Prerequisite or corequisite: AS/HH/SC/KINE 2031 3.00. Course credit exclusions: AS/SC/PHED 2490 3.00 (prior to Fall/Winter 1996-1997).

HH/KINE 3000 3.00 Psychology of Physical Activity and Health. An overview of the theoretical frameworks and psychological principles related to physical activity, exercise and sport. Three lecture hours per week. One term. Prerequisites: AS/HH/SC/KINE 1000 6.00; AS/HH/SC/KINE 1020 6.00; AS/HH/SC/KINE 2049 3.00; AS/HH/SC/KINE 2050 3.00; AS/SC/PSYC 1010 6.00. Course credit exclusions: AS/SC/KINE 2000 3.00 (prior to Fall/Winter 2007-2008).

HH/KINE 3012 3.00 Human Physiology II. The principles of homeostasis and physiological regulation are studied in relation to the cardiorespiratory, renal, locomotor, reproductive and digestive systems. Laboratory work is an essential part of the course. Three lecture hours per week, two laboratory hours in alternate weeks. One term. Prerequisite: AS/HH/SC/KINE 2011 3.00 or AS/HH/SC/KINE 3011 3.00. Introductory biology or life science is highly recommended. Course credit exclusions: AS/SC/KINE 3070 3.00 (prior to Fall/Winter 1997-1998), AS/SC/PHED 2070 3.00 (prior to Fall/Winter 1996-1997), SC/PHED 2070 4.00 (prior to Fall/Winter 1996-1997), AS/SC/PHED 3010 3.00 (prior to Fall/Winter 1996-1997), SC/PHED 3010 4.00 (prior to Fall/Winter 1996-1997), AS/PHED 3070 3.00 (prior to Fall/Winter 1996-1997), SC/PHED 3070 4.00 (prior to Fall/Winter 1996-1997).

HH/KINE 3020 3.00 Skilled Performance and Motor Learning. An introduction to the analysis and development of skilled performance. Two lecture hours and two laboratory hours per week. One term. Prerequisites: AS/HH/SC/KINE 2050 3.00; AS/SC/PSYC 1010 6.00. Course credit exclusions: AS/SC/PHED 3020 3.00 (prior to Fall/Winter 1996-1997).

HH/KINE 3030 3.00 Introduction to Biomechanical Analysis of Human Movement. Human movement is investigated with particular reference to the laws of physics (mechanics) and anatomical concepts as applied to joint motion and muscular action. Application of biomechanics to sports skills execution and laboratory exposure to contemporary analysis are included. Three lecture hours and one laboratory hour per week. One term. Prerequisite: AS/HH/SC/KINE 2031 3.00. Course credit exclusions: AS/SC/PHED 3030 3.00 (prior to Fall/Winter 1996-1997).

HH/KINE 3090 3.00 Psychology of Sport and Physical Activity. The theories and research of major topics in sport psychology are presented. Three lecture hours per week. One term. Prerequisites: AS/HH/SC/KINE 2050 3.00; AS/SC/PSYC 1010 6.00. Course credit exclusions: AS/HH/SC/KINE 2000 3.00, AS/SC/PHED 3090 3.00 (prior to Fall/Winter 1996-1997).

HH/KINE 3100 3.00 Health Psychology and Kinesiology. This course provides an overview of primary topics in health psychology, emphasizing both psychological research approaches specific to physical activity and its application to behaviours related to eating and weight, pain, cancer and related diseases. Prerequisites for this course: AK/AS/HH/SC/PSYC 1010 6.00. Course credit exclusions: AK/AS/HH/SC/PSYC 3170 3.00.

HH/KINE 3150 3.00 Analysis of Data in Kinesiology II. This intermediate course in inferential statistics includes t-tests, multiple regression, ANOVA and selected non-parametric statistics. Practical applications to research in kinesiology and health science are emphasized. Two lecture hours and two lab hours per week. One term. Prerequisite: AS/HH/SC/KINE 2050 3.00. Course credit exclusions: AK/ADMS 3320 3.00 (prior to Fall/Winter 2005-2006), AK/MATH 2720 3.00, SC/BIOL 2060 3.00, AS/ECON 3500 3.00, ES/ENVS 2010 6.00, AS/SC/GEOG 2420 3.00, AS/SC/MATH 1132 3.00, AK/AS/SC/MATH 2500 3.00, AK/AS/SC/MATH 2570 3.00, AS/POLS 3300 6.00, AK/AS/HH/SC/PSYC 2020 6.00, AK/AS/HH/SC/PSYC 2022 3.00, AK/HH/PSYC 3110 3.00, AS/SOCI 3030 6.00.

HH/KINE 3240 3.00 Behavioural Approach to Administration of Fitness and Sport. The focus of this course is on working with people. Students learn the theory and practice of team building, communication and counselling skills. Three lecture hours per week. One term. Course credit exclusions: AS/PHED 2420 3.00 (prior to Fall/Winter 1996-1997). Note: This course does not count for science credit.

HH/KINE 3250 3.00 Business Management in Sport, Fitness and Allied Health. An overview of the key business management practices in the sport, fitness and allied health fields. The main emphasis is the development of an understanding of the theory, practices and skills which are essential to effective management. Three lecture hours per week. One term. Prerequisites: AS/HH/SC/KINE 1000 6.00; AS/HH/SC/KINE 1020 6.00. Course credit exclusions: AS/HH/KINE 4430 3.00. Not open to students enrolled in the Fitness Assessment and Exercise Counselling Certificate or the Sport Administration Certificate. Note: This course does not count for science credit.

HH/KINE 3340 3.00 Growth, Maturation and Physical Activity. The major purpose of this course is to examine and discuss the literature and research studies in those aspects of physical growth and development that directly concern educators. Individual differences in growth and development are stressed throughout. Three lecture hours per week. One term. Course credit exclusions: AS/SC/PHED 3340 3.00 (prior to Fall/Winter 1996-1997).

HH/KINE 3350 3.00 Physical Activity, Health and Aging. The course examines the aging process, lifestyle changes and the effect of physical activity on the health of aging adults. Three lecture hours per week. One term. Prerequisites: AS/HH/SC/KINE 1020 6.00; AS/HH/SC/KINE 2020 3.00. Note: Internet use is required for this course. Course credit exclusions: None.

HH/KINE 3360 3.00 Gender and Sexuality in Sport and Health. The course introduces students to the social production of gender (including femininity and masculinity) and sexuality and how it impacts the worlds of sport and health. The course introduces students to feminist and queer theory approaches within the discipline. Prerequisite: HH/KINE 1000 6.00. Course credit exclusions: HH/KINE 4350 3.00; HH/KINE 4360 3.00. Note: This course does not count for science credit.

HH/KINE 3400 3.00 Fitness Consulting and Personal Fitness Training. This course provides detailed theoretical and practical instruction on physical activity/exercise prescription, management, supervision and intervention strategies with a focus on health-related fitness outcomes. Three lecture hours per week. One term. Prerequisites: AS/HH/SC/KINE 1020 6.00; AS/HH/SC/KINE 2031 3.00; AS/HH/SC/KINE 3011 3.00. Corequisite: AS/HH/SC/KINE 3012 3.00; AS/HH/SC/KINE 3030 3.00. Course credit exclusions: None.

HH/KINE 3420 3.00 Cultural Studies of Sport, Leisure and Health. An introductory course offering students an opportunity to examine key concepts in cultural studies, such as representation, media, identity and hegemony as they relate to sport, leisure and health. Prerequisite: AS/HH/SC/KINE 1000 6.00. Course credit exclusions: None. Note: This course does not count for science credit.

HH/KINE 3430 3.00 Sports in Canadian Life. An historical examination of sports in Canadian society, including their origin, introduction to North America and development in Canada up to the present. The influence of Canadian culture as a whole on the development of the selected sports is considered. Three lecture hours per week. One term. Course credit exclusions: AS/PHED 3430 3.00 (prior to Fall/Winter 1996-1997). Note: This course does not count for science credit.

HH/KINE 3440 3.00 Politics of the Olympic Games. A comparative analysis of recent developments and characteristics of physical education and sports in representative nations and world regions. The course covers objectives, methods, personnel and facilities in physical education and evaluation of selected national sports programs. Three lecture hours per week. One term. Course credit exclusions: AS/PHED 3440 3.00 (prior to Fall/Winter 1996-1997). Note: This course does not count for science credit.

HH/KINE 3450 3.00 Athletic Injuries. An introductory examination of prevention, recognition and treatment of common athletic injuries. Follow-up remedial procedures and therapeutic modalities to enhance healing are also studied. Two lecture hours and two laboratory hours per week. One term. Prerequisite: AS/SC/KINE 2031 3.00. Course credit exclusions: AS/SC/PHED 3450 3.00 (prior to Fall/Winter 1996-1997).

HH/KINE 3460 3.00 Regional Human Anatomy I. A comprehensive study of the structures of the human body. This course includes an examination of the upper limb, lower limb and back. Two lecture hours and two laboratory hours per week. One term. Prerequisite: AS/HH/SC/KINE 2031 3.00. Course credit exclusions: AS/SC/PHED 3460 3.00 (prior to Fall/Winter 1996-1997).

HH/KINE 3465 3.00 Regional Human Anatomy II. This course examines, in detail, the anatomical regions of the head, neck, back and thorax. Three lecture hours per week. One term. Prerequisite: AS/HH/SC/KINE 2031 3.00. Course credit exclusions: AS/SC/KINE 3050C 3.00 (prior to Fall/Winter 1998-1999).

HH/KINE 3480 3.00 Outdoor and Experiential Education. This course introduces fundamental principles and practices of outdoor and experiential education. Current theories, issues, trends and practices are discussed and the objectives of a range of outdoor programs are considered. Three lecture hours per week. One term. Course credit exclusions: AS/SC/PHED 3480 3.00 (prior to Fall/Winter 1996-1997).

HH/KINE 3490 3.00 Politics and Policy in the Sport Industry. Discussions about power, politics and ethics as they relate to current sport policy issues are explored. Policy development and policy analysis skills are learned and applied to issues in professional sport, amateur sport and university athletics. Three lecture hours per week. One term. Course credit

exclusions: AS/PHED 3490 3.00 (prior to Fall/Winter 1996-1997). Note: This course does not count for science credit.

HH/KINE 3510 3.00 Sport Marketing and Event Management. The purpose of this course is to provide students with both the theory and practical skills required to organize and manage events. Additionally, students have the opportunity to learn from professionals working in this field. Three lecture hours per week. One term. Course credit exclusions: AS/PHED 3510 3.00 (prior to Fall/Winter 1996-1997). Note: This course does not count for science credit.

HH/KINE 3530 3.00 Theories of Play. A critical analysis of definitions, concepts, philosophies and assumptions of classical, recent and modern theories of play with implications for macro and micro programming and planning for play service systems. Three lecture hours per week. One term. Prerequisite: A 1000-level Social Science course. Course credit exclusions: AS/PHED 3530 3.00. Note: This course does not count for science credit.

HH/KINE 3570 3.00 Theory and Methodology of Training. The course provides an examination of the scientific and methodological theories, techniques and planning methods utilized in the training of the skilled athlete, with practical application to selected sports. Three lecture hours per week. One term. Prerequisites: AS/HH/SC/KINE 1000 6.00; AS/HH/SC/KINE 1020 6.00. Course credit exclusions: AS/PHED 3570 3.00 (prior to Fall/Winter 1996-1997).

HH/KINE 3575 3.00 Athletic Injuries - Extremities. This course is an introduction to athletic injuries including injury classification, basic level assessment of the extremities, tissue healing, protective equipment, basic treatment, and common injuries to the extremities. Prerequisite/Corequisite: AS/HH/SC KINE 2031 3.00. Course credit exclusions: AS/HH/SC KINE 3450 3.00.

HH/KINE 3580 3.00 Coaching: The Strategy and Tactics of Sport. This course investigates the conceptual basis of strategic and tactical planning for sports performance. An emphasis is placed on analyzing the variety of sources that contribute to the conceptual framework a coach may use in formulating strategic and tactical plans. Three lecture hours per week. One term. Prerequisites or corequisites: AS/HH/SC/KINE 2475 3.00. Course credit exclusions: None. Note: This course does not count for science credit.

HH/KINE 3585 3.00 Clinical Placement in Athletic Therapy. This course provides students with the opportunity to gain practical experience in clinical situations within the profession of athletic therapy. Students integrate theory and practice in actual workplace situations by working directly with sports medicine specialists. Ten hours clinical placement per week, five one-and-a-half hour seminars. One term. Prerequisites: Open only to athletic therapy certificate students, with permission of the athletic therapy program coordinator. Course credit exclusions: None.

HH/KINE 3600 3.00 Athletic Therapy II. This course provides students with a broad spectrum of knowledge relating to the physiological and pathological aspects of participation in sport with an emphasis on detection and human factors in injury prevention and remediation. Three lecture hours per week. One term. Prerequisite: AS/HH/SC/KINE 2490 3.00. Course credit exclusions: AS/SC/PHED 3600 3.00 (prior to Fall/Winter 1996-1997).

HH/KINE 3610 3.00 Coaching: Psychological and Sociological Aspects. The course focuses upon the application of principles of psychology to coaching. An examination of philosophy of coaching, legal liability, socialization and team dynamics is also undertaken with a view to establishing effective coaching methodology. Three lecture hours per week. One term. Prerequisites: AS/HH/SC/KINE 2475 3.00; AS/SC/PSYC 1010 6.00. Course credit exclusions: AS/SC/PHED 2470 6.00 (prior to Fall/Winter 1996-1997), AS/SC/PHED 3610 3.00 (prior to Fall/Winter 1996-1997).

HH/KINE 3620 3.00 Sociology of Sport I. Sociological analysis of sport in contemporary society with particular emphasis on issues relating to children, gender and the Canadian scene. Three lecture hours per week. One term. Course credit exclusions: AS/SC/PHED 3620 3.00 (prior to Fall/

Winter 1996-1997), AS/SOCI 3670 3.00. Note: This course does not count for science credit.

HH/KINE 3635 3.00 Fundamentals of Epidemiology. The course provides an introduction to the basic principles of Epidemiology with emphasis on studies undertaken in the field of kinesiology. Topics include: understanding of different study designs, analytic methods used, validity, outbreak investigation, diagnostic tests and causation. Prerequisite: AK/AS/HH/SC/KINE 2050 3.00. Course credit exclusions: None.

HH/KINE 3640 3.00 Epidemiology of Physical Activity, Fitness and Health. This course provides an in-depth assessment of the epidemiology of physical activity, fitness and health. General concepts of epidemiology are covered, as well as associations among activity, exercise, fitness and disease/risk factors. Three lecture hours per week. One term. Prerequisite: AS/HH/SC/KINE 2020 3.00. Course credit exclusions: AS/SC/KINE 3050B 3.00 (prior to Fall/Winter 1998-1999).

HH/KINE 3645 3.00 Physical Activity and Health Promotion. This course explores the Canadian context of health promotion and physical activity with a specific emphasis on health communication, "best practices" in programming for communities, workplaces, schools and health care settings, and the development of public policy. Prerequisites: AS/HH/SC/KINE 1020 6.00. Course credit exclusions: None.

HH/KINE 3650 3.00 Functional Neuroanatomy. This course investigates the anatomy of the central nervous system, additionally discussing the clinical functional relevance of each area. Three lecture hours per week. One term. Prerequisite: AS/HH/SC/KINE 2031 3.00. Course credit exclusions: None.

HH/KINE 3710 3.00 The Immune System in Health and Disease. The immune system in health and disease is designed to provide students with an overview of the immune system including innate and adaptive immunity. The emphasis is on normal immune function and on human diseases with immune origin or immune components particularly diseases where motion is limited by disease such as the arthritises. Prerequisite: HH/KINE 2011 3.00; HH/KINE 3012 3.00. Course credit exclusions: None. Note: May not be taken for credit by Biology or Biochemistry majors.

4000-Level Courses

Note: Only students with Honours standing may register in 4000-level kinesiology and health science courses.

HH/KINE 4010 3.00 Exercise Physiology. The study of the physiological mechanisms involved during physical activity. The course covers the physiological effects of exercise and training upon the neuromuscular, cardiovascular, respiratory and metabolic systems. Three lecture hours per week, two laboratory/tutorial hours in alternate weeks. One term. Prerequisites: AS/HH/SC/KINE 3011 3.00; AS/HH/SC/KINE 3012 3.00. Course credit exclusions: None.

HH/KINE 4020 3.00 Human Nutrition. Basic energy and regulatory nutrients are examined, followed by an applied nutrition section in weight control, eating disorders, sport nutrition, food as drugs and food safety. Metabolic interrelationships and health associations are applied throughout. Three lecture hours per week. Prerequisite: AS/HH/SC/KINE 4010 3.00. Course credit exclusions: None.

HH/KINE 4060 3.00 Independent Studies in Kinesiology and Health Science. Students undertake a research project under the supervision of a faculty member. This should include a library investigation, and may include laboratory and/or field investigations. A substantial paper, a poster presentation and an oral presentation are part of the course requirements. Prerequisite: Normally only available to students after completion of 84 credits. Course credit exclusions: None. Note: Some independent study topics may not be eligible for science credit. Students should consult the School of Kinesiology and Health Science for application.

HH/KINE 4060 6.00 Independent Studies in Kinesiology and Health Science. Students undertake a research project under the supervision of a faculty member. This should include a library investigation, and may include laboratory and/or field investigations. A substantial paper, a poster presentation and an oral presentation are part of the course requirements.

Prerequisite: Normally only available to students after completion of 84 credits. Course credit exclusions: None. Note: Some independent study topics may not be eligible for science credit. Students should consult the School of Kinesiology and Health Science for application.

HH/KINE 4060N 3.00 Independent Studies in Kinesiology and Health Science. Students undertake a research project under the supervision of a faculty member. This should include a library investigation, and may include laboratory and/or field investigations. A substantial paper, a poster presentation and an oral presentation are part of the course requirements. Prerequisite: Normally only available to students after completion of 84 credits. Course credit exclusions: None. Note: Some independent study topics may not be eligible for science credit. Students should consult the School of Kinesiology and Health Science for application.

HH/KINE 4100 6.00 Honours Thesis. A thesis involving empirical research. Students arrange for supervision by a member of the School of Kinesiology and Health Science. Contact the Undergraduate Office for details and application form. Prerequisites: Permission of the School of Kinesiology and Health Science; students must be in a Specialized Honours Program in Kinesiology and Health Science and have completed 84 credits. Note: Some Honours thesis topics may not be eligible for science credit.

HH/KINE 4120 3.00 Nutritional Aids in Sport and Exercise. This course investigates the influence of nutritional supplements/aids on exercise performance, with emphasis on the underlying physiologic and biochemical mechanisms behind the effectiveness of ergogenic compounds. Prerequisite: AS/HH/SC KINE 4010 3.00, AS/HH/SC KINE 4020 3.00. Course credit exclusions: None.

HH/KINE 4130 3.00 Advanced Human Nutrition. This course is designed to provide a detailed analysis of the metabolic, biochemical and physiological processes that occur under health, exercise, altered nutritional status, and disease states. Prerequisite: HH/KINE 4010 3.00; HH/KINE 4020 3.00. Course credit exclusions: None. Note: This is an advanced nutrition course that builds on the basic nutrition information acquired in HH/KINE 4020 3.00. It is designed to provide an in depth analysis of the pathways that integrate the metabolism of carbohydrates, protein and fat. It also investigates the role of nutrition in the development and exacerbation of chronic diseases, and under different exercise states. It is targeted towards students interested in nutrition/physiology-related careers.

HH/KINE 4140 3.00 Fundamentals of Protein Nutrition and Metabolism. This course discusses current concepts in metabolism and regulatory roles of different amino acid and amino acid groups in tissue and on whole body nutrition; it analyzes concepts in protein synthesis and breakdown, and their regulation in different nutritional, physical activity, and diseased states; it also discusses methodologies in protein and amino acid nutrition research. Prerequisite: HH/KINE 4020 3.00. Course credit exclusions: None.

HH/KINE 4210 3.00 Disorders of Visual Cognition. We rely heavily on vision to interact with the world. This course investigates the clinical disorders that are manifested with impairments in different stages of visual processing. Prerequisite: AS/HH/SC/KINE 3020 3.00. Course credit exclusions: None.

HH/KINE 4220 3.00 Human Motor Control and Learning. This course deals with concepts of how the brain learns and controls voluntary movement, particularly those of the upper limbs. Prerequisites: AS/HH/SC/KINE 3020 3.00. Course credit exclusions: None.

HH/KINE 4340 3.00 Sport, "Race" and Popular Culture in Canada. The course gives students a historical and contemporary understanding of 'race' and racism in Canadian popular culture as it pertains to the world of sport. Prerequisite: AS/HH/SC/KINE 1000 6.00. Course credit exclusions: AS/KINE 3630 3.00 (prior to Fall/Winter 2005-2006). Note: This course does not count for science credit.

HH/KINE 4360 3.00 Gender and Sport. This course examines sociohistorical links between gender and social power expressed in sporting contexts, normally considered a male domain. The resistance to

such notions by women and girls challenges received values, practices and scholarship. Does any sport have a gender? Three lecture hours per week. One term. Prerequisite: AS/HH/SC/KINE 1000 6.00 or AS/HH/SC/KINE 2010 3.00. Course credit exclusions: None.

HH/KINE 4370 3.00 Body as Illumination: Survey of Meditation Practices Past and Present. Cross-cultural survey of training for enlightenment through meditation techniques, posture practices, and spiritual traditions. From prehistoric times our ancestors used repetitive physical activities to explore altered states of consciousness and to purify or illuminate the body/mind harmony as optimal health. Three lecture hours per week. One term. Prerequisite: AS/HH/SC/KINE 1000 6.00. Course credit exclusions: None. Note: This course does not count for science credit.

HH/KINE 4375 3.00 Body as Weapon: Survey of Martial Arts and Combat Training. Cross-cultural survey of training for combat in military units, martial arts, and self defence. Fighting and war stand as two ancient yet enduring activities evoking study and systematic practice of lethal methods for using the body as a weapon against antagonists. Three lecture hours per week. One term. Prerequisite: AS/HH/SC/KINE 1000 6.00. Course credit exclusions: None. Note: This course does not count for science credit.

HH/KINE 4400 6.00 Advanced Fitness/Lifestyle Assessment and Counselling. Students receive supervised, practical experience in designing, administering and interpreting fitness assessments along with the follow-up exercise counselling for athletes and the general public. Two lecture hours and three laboratory hours per week. Two terms. Prerequisites: AS/HH/SC/KINE 3400 3.00; permission of the course director. Open only to students in the Certificate in Fitness Assessment and Exercise Counselling. Prerequisite or corequisite: AS/HH/SC/KINE 4010 3.00. Course credit exclusions: None.

HH/KINE 4420 3.00 Relaxation: Theory and Practice. This course focuses on an understanding of the physiological and psychological basis of relaxation as a self-management procedure and in the utilization of relaxation strategies in sport, health and physical activity. Three lecture hours per week. One term. Prerequisites: AS/HH/SC/KINE 2031 3.00; AS/HH/SC/KINE 3011 3.00; AS/HH/SC/KINE 3012 3.00 or permission of the course director. Note: This course does not count for science credit.

HH/KINE 4421 3.00 Relaxation II: Research and Application. This course reviews the research and application of self-regulation strategies (relaxation, biofeedback, imagery, cognitive restructuring and attention control) for performance and health enhancement. Three lecture hours per week. One term. Prerequisite: AS/HH/KINE 4420 3.00. Course credit exclusions: None.

HH/KINE 4430 3.00 Business Skills for Sport and Fitness Professionals. This course includes theory and detailed practical instruction about key management/organizational processes and their successful application to sport and fitness-related business initiatives. Three lecture hours per week. One term. Prerequisite: Students must be in the Sport Administration Certificate or the Fitness Assessment and Exercise Counselling Certificate. Course credit exclusions: AS/HH/KINE 3250 3.00. Note: This course does not count for science credit.

HH/KINE 4440 3.00 Advanced Exercise Physiology: Muscle. Advanced topics in exercise physiology and biochemistry, including energy metabolism, fatigue, skeletal muscle physiology, adaptations to exercise and training. Applications of exercise to disease states, animal laboratories, and discussions of original research articles in exercise physiology. Three class hours (lectures/laboratories/tutorials) per week. One term. Prerequisite: AS/HH/SC/KINE 4010 3.00. Course credit exclusions: None.

HH/KINE 4445 3.00 Physiological Basis of Fatigue. An in-depth examination of the physiological processes that limit muscular exercise. Topics include cellular and metabolic failure in sustained muscular contractions, central nervous system limitations, substrate depletion and product accumulation, body fluid shifts and adaptations that forestall fatigue. Three lecture hours per week. One term. Prerequisites: AS/HH/

SC/KINE 3011 3.00; AS/HH/SC/KINE 3012 3.00; AS/HH/SC/KINE 4010 3.00. Course credit exclusions: None.

HH/KINE 4448 3.00 Advanced Human Physiology: Endocrinology. An overview of human endocrinology at the physiological, biochemical and molecular levels, with an emphasis on health, disease, exercise and adaptation. Three hours per week. One term. Prerequisite: AS/SC KINE 4010 3.00. Course credit exclusions: SC/BIOL 4320 3.00.

HH/KINE 4450 3.00 Advanced Exercise Physiology: Cardiovascular. An overview of the cardiovascular physiology of exercise at both the central (heart) and peripheral (blood vessels, capillaries) levels, with an emphasis on health, disease, exercise and adaptation. Physiology adaptations at the molecular level are emphasized. Two lecture hours and two lab hours per week. One term. Prerequisite: AS/HH/SC/KINE 4010 3.00. Course credit exclusions: None.

HH/KINE 4451 3.00 Advanced Biomechanical Analysis of Human Movement (Part I - Kinematics). An examination of human motion, including the fundamentals of motion description, mechanics, and investigative techniques in biomechanics with an emphasis on the kinematics of movement. Special topics and problems relevant to students' interests are covered in seminars and small group laboratory sessions. Two lecture hours per week, plus laboratory hours. One term. Prerequisite: AS/HH/SC/KINE 3030 3.00. Course credit exclusions: None.

HH/KINE 4452 3.00 Advanced Biomechanical Analysis of Human Movement (Part II - Kinetics). An examination of human motion, including the fundamentals of motion description, mechanics, and investigative techniques in biomechanics with an emphasis on the kinetics of movement. Special topics and problems relevant to students' interests are covered in seminars and small group laboratory sessions. Two lecture hours per week, plus laboratory hours. One term. Prerequisite: AS/HH/SC/KINE 4451 3.00. Course credit exclusions: None.

HH/KINE 4455 3.00 Biomechanics and Motor Control Laboratory. This course focuses on the theory and practice of methods for analyzing the mechanics and control of movement. Methods include collection and analysis of biological signals such as electromyography and evoked potentials, as well as techniques for both kinematic and kinetic analysis of movement. Two lecture hours and two lab hours per week. One term. Prerequisites: AS/HH/SC/KINE 3020 3.00, AS/HH/SC/KINE 3030 3.00. Course credit exclusions: None.

HH/KINE 4460 3.00 Occupational Biomechanics. Use of biomechanics in the occupational setting is introduced. Topics include workplace assessment techniques, injury mechanisms, tissue mechanics and the (re)design of tools and workplace. Specific disorders and issues involving the upper extremity and lower back are addressed. Three lecture hours per week. One term. Prerequisite: AS/HH/SC/KINE 3030 3.00. Course credit exclusions: None.

HH/KINE 4470 3.00 Muscle and Joint Biomechanics. Quantitative biomechanical principles are used to evaluate the production of human motion at the joint and muscle level. Factors affecting total joint moment of force are studied including muscle mechanics, muscle architecture, moment arm and electrophysiology. Two lecture hours and two laboratory hours per week. One term. Prerequisite: AS/HH/SC/KINE 3030 3.00. Course credit exclusions: AS/SC/KINE 3470 3.00 (prior to Fall/Winter 2003-2004).

HH/KINE 4475 3.00 Clinical Biomechanics. Quantitative biomechanical techniques are used to evaluate musculoskeletal injuries and pathological movement. Standard biomechanics techniques and modelling methods are combined with an understanding of tissue mechanics to quantitatively evaluate injury mechanisms and rehabilitation of tissues (bone, ligament, tendon, muscle). Three lecture hours per week. One term. Prerequisite: AS/HH/SC/KINE 3030 3.00. Recommended: AS/HH/SC/KINE 3470 3.00. Course credit exclusions: None.

HH/KINE 4480 3.00 Sociology of Sport II. This course focuses on social problems in sport. Topics include inequality, sport as work, sport as a spectacle, and sport and the state. Three lecture hours per week. One term. Prerequisite: AS/HH/KINE 3620 3.00 or permission of the course

director. Course credit exclusions: None. Note: This course does not count for science credit.

HH/KINE 4485 3.00 Political Economy of Sport and Physical Activity in Canada. This course is an introduction to the dynamic interplay of economic, political and social forces within which sport and physical activity have been developed, elaborated and contested in Canada. Prerequisite: AS/HH/SC KINE 1000 6.00. Course credit exclusions: None. Note: This course does not count for science credit.

HH/KINE 4490 3.00 Philosophical Issues in Kinesiology and Health Science. This course examines the philosophical foundations of kinesiology and health science; their manifestation and influences on the development of physical activity, physical education and sport programs; identification and critical analysis of current issues in these programs in modern society. Prerequisite: AS/HH/SC/KINE 1000 6.00. Course credit exclusions: None. Note: This course does not count for science credit.

HH/KINE 4500 3.00 Neural Control of Movement. This course reviews fundamental concepts and current issues in motor control, with an emphasis on the brain mechanisms underlying motor behaviour. Topics include walking, looking, reaching, posture and complex skill coordination. Three lecture hours per week. One term. Prerequisite: AS/HH/SC/KINE 3020 3.00 or permission of the course director. Course credit exclusions: None.

HH/KINE 4505 3.00 Neurophysiology of Movement in Health and Disease. This course provides an overview of current neurophysiological concepts in motor control, with an emphasis on the neurophysiological principles underlying human movement disorders. Three hours per week, no labs. One term. Prerequisite: AS/HH/SC/KINE 3011 3.00 or AS/HH/SC/KINE 3020 3.00. Course credit exclusions: AS/SC/KINE 4050M 3.00 (prior to Fall/Winter 2002-2003), AS/SC/KINE 4050A 3.00 (prior to Fall/Winter 2003-2004).

HH/KINE 4510 3.00 Cellular and Molecular Basis of Muscle Physiology. Topics include muscle development, muscle-specific gene expression, molecular basis of muscle contraction, biochemical plasticity of muscle, sarcolemmal and nuclear signal transduction in muscle. Three lecture hours per week. One term. Prerequisite(s): AS/HH/SC/KINE 2011 3.00, or SC/BIOL 3060 4.00 and SC/BIOL 3070 4.00. Course credit exclusions: None.

Cross-listed to: HH/KINE 4510 3.00, SC/BIOL 4510 3.00

HH/KINE 4512 3.00 Molecular and Cellular Neuroscience with Applications to Health. Study of molecular mechanisms underlying the structure and functions of the nervous system in health and disease. Prerequisite: AS/HH/SC/KINE 3012 3.00. Course credit exclusions: SC/BIOL 4370 3.00

HH/KINE 4515 3.00 Stem Cells: Physiology and Therapeutic Applications. This course examines the physiology of tissue-specific stem cell populations in the context of potential therapeutic strategies used for the treatment of chronic disease states. Prerequisite: AS/HH/SC/KINE 4010 3.00. Course credit exclusions: None.

HH/KINE 4518 3.00 Molecular Basis of Selected Diseases. This course is designed to provide students with an understanding of the molecular mechanisms that underlie selected diseases. Disease states included are cancer, acquired immune deficiency syndrome, Alzheimer's, bovine spongiform encephalopathy and muscular dystrophy. Prerequisites: AS/HH/SC/KINE 3011 3.00, AS/HH/SC/KINE 3012 3.00, and AS/HH/SC/KINE 4010 3.00. Course credit exclusions: None.

HH/KINE 4520 3.00 Sport Psychology Seminar. The course provides an in-depth examination of selected topics in sport psychology: motivation, imagery, self-regulation and attention. The emphasis is on the application of mental training skills in sport settings. Three lecture hours per week. One term. Prerequisite: AS/HH/SC/KINE 3000 3.00. Course credit exclusions: None.

HH/KINE 4530 3.00 Sport Administration Fieldwork Placement. Students spend a minimum of 40 hours working in an administrative setting related directly to the area of sport administration. The practical

experience is supported by lectures, seminars, reports and readings. Three hours per week. One term. Prerequisites: AS/HH/KINE 3490 3.00; students must be in the Sport Administration Certificate. Course credit exclusions: None. Note: This course does not count for science credit.

HH/KINE 4545 6.00 Sport Administration Applied Research Perspectives. This course provides students with an overview of selected current issues facing organizations in the sport industry as well as a grounding in social research methods. Students conduct applied research addressing problems faced by sport organizations. Three lecture hours per week. Two terms. Prerequisites: AS/HH/SC/KINE 2050 3.00 or equivalent; AS/HH/KINE 2380 3.00; AS/HH/KINE 3240 3.00; AS/HH/KINE 3490 3.00; AS/HH/KINE 3510 3.00. Course credit exclusions: None.

HH/KINE 4550 6.00 Coaching Field Experience. The student works with a mentor coach for a complete sport season and submits a comprehensive log book. The field experience includes physiological testing, videotape analysis and three other coaching tasks. Three hours per week. Two terms. Prerequisites or corequisites: AS/HH/SC/KINE 4610 3.00. Open only to students in the Coaching Certificate. Course credit exclusions: None. Note: Students may take this course concurrently with AS/HH/SC/KINE 4610 3.00.

HH/KINE 4560 3.00 Physical Activity and Children: Pedagogy. This course examines teaching methods available for people working in a physical activity setting with children. Emphasis is placed on the core program components of dance, games and gymnastics. Curriculum and lesson planning for school based physical education is included. Two lecture hours and two laboratory hours per week. One term. Prerequisite: AS/HH/SC/KINE 3340 3.00. Course credit exclusions: None. Note: This course does not count for science credit.

HH/KINE 4565 3.00 Epidemiology of Injury Prevention. This course introduces students to the recognition of situations or practices that contribute to injuries, strategies for injury prevention, with an emphasis on an epidemiological/public health approach. Prerequisites: AS/HH/SC/KINE 1000 6.00; AS/HH/SC/KINE 2050 3.00. Course credit exclusions: None.

HH/KINE 4570 3.00 Sports Injury Assessment. An advanced course in the recognition and assessment of common athletic injuries. The course emphasizes a detailed understanding of surface anatomy and landmarking, injury mechanics and assessment techniques, and the implications of injury to a body part. Kinesiology and Health Science Practicum Program

All students enrolled in Kinesiology and Health Science programs must complete the practicum core, which consists of one practicum course in each of the following six areas: dance/gymnastics, aquatics, team sports, individual and dual sports, track and field and emergency care, plus an additional two free choice practicum courses, for a total of eight courses. A detailed description of the course offerings and requirements is available from the School of Kinesiology and Health Science.

Practicum Course List

While practicum courses are required of all kinesiology and health science students in order to graduate, they are not applied towards the academic degree requirements in kinesiology and health science. The second digit of the practica courses indicates the practicum area. One practicum course represents a total of 24 contact hours of sports activity or equivalent.

Practicum courses provide professional preparation for kinesiology and health science students and as such may require vigorous physical

activity. It is strongly recommended that every student in the practicum program have a medical examination prior to participating. Students with disabilities are considered on a case-by-case basis. Practicum courses are open to both men and women unless otherwise specified. For practicum course descriptions, please consult the School of Kinesiology and Health Science supplemental calendar.

Courses in Language, Literature and Culture

General Regulations

1. Entry to Language Courses

Any student may enrol in a language course at any level, subject to the conditions enumerated below.

a) Admission to a student's first course in a language at York is by placement questionnaire and/or interview, or departmental authorization slip.

b) In most cases, students who have completed a 1000-level language course with a grade of at least C are automatically admissible to a course at the next level in the same language, but may be pre-tested for purposes of course or section placement.

c) Registration in any language course may be limited at the discretion of the department.

d) Students intending to major or minor in German studies, Italian studies, Portuguese studies, Russian, Russian studies or Spanish are encouraged to begin study of the relevant language in their first year.

2. Credit for Language Courses

A language course may be taken for credit in any year of any undergraduate program. Credit is given for a course if a grade of D or better is achieved. However, to advance from one level to another level, a student must achieve at least a grade of C.

3. Entry to departmental literature and culture courses, and to courses in classical Greek or Latin literature.

In literature and culture courses of the department, instruction is normally given in the relevant language, and entry to courses and programs depends upon the student's ability to function in that language. The department may require a student to demonstrate language competence before granting admission to a course. For details, please consult the department's supplemental calendar.

For regulations concerning entry to courses in classical Greek or Latin literature, please consult a member of the program in Classical Studies.

Not all of the courses will necessarily be offered in any given year. For details of courses to be offered, please consult the Department of Languages, Literatures and Linguistics supplemental calendar.

The interdisciplinary program in Latin American and Caribbean Studies (LACS) allows students to pursue their interest in Latin America and the

Caribbean by taking courses taught in a number of departments and divisions in the Faculty of Arts. Students can double major or minor in Latin American and Caribbean studies and an Honours BA program in the Faculty of Arts. The LACS program offers introductory core courses in Latin American and Caribbean studies as well as other introductory and upper-level courses in the area. The purpose of the core courses is to introduce and develop interdisciplinary ways of looking at the regions while at the same time integrating knowledge obtained in other courses. The program courses provide shared intellectual meeting grounds for LACS majors and other students. The interdisciplinary nature of the LACS program ensures a broad and deep understanding of the Latin American and Caribbean regions.

The LACS program works together with Founders College and the Centre for Research on Latin America and the Caribbean (CERLAC) to offer students a wide variety of events related to the Latin American and Caribbean regions. These include guest lectures by internationally renowned academics, workshops and conferences, and cultural and social events. LACS majors and minors may also use the Documentation Centre of the Centre for Research on Latin America and the Caribbean (CERLAC, 240 York Lanes).

LACS majors are also encouraged to join the LACS Students Association (LACSA), which provides students with an opportunity to meet together and set their own agenda.

Study Abroad Programs: York University has a formal student exchange agreement with the University of the West Indies (UWI) which allows York students to study at UWI and get credit from York. LACS majors may also get academic credit for other courses taken at other universities in the Latin American and Caribbean area. For further information contact International@York or the LACS coordinator.

Law is one of the most significant expressions of a society's social and political development. In recent years social scientists from many disciplines have begun to analyze the interplay between law and society. We live in a period of widespread public interest in law that arises from a concern with problems of social justice, social control and social deviance. Academic disciplines such as anthropology, economics, history, philosophy, political science, psychology and sociology have increasingly focused on such issues as the nature and origin of law; law-making and law-breaking; rights and obligations; freedom and responsibility and law as social policy. These are matters of increasing concern to teachers, social workers, businessmen, doctors and public servants whose professional responsibilities demand a knowledge of the relationship of law to their own fields.

The goals of the program may be stated briefly: to affirm the intellectual importance of the study of law and society and law in society; to provide a framework within which faculty and students may explore, within disciplines and between them, descriptive and analytic approaches to the subject; and to sharpen the appreciation of law as part of the active daily life of the student.

The program must be seen within the context of a liberal education. It is not a pre-law school program or a prerequisite for law school admission. It

is designed for interested undergraduate students, whatever their future career orientation.

Linguistics is concerned with discovering the principles in terms of which natural languages are organized and applying these principles to the description of individual languages. Using systematic descriptions of language and language usage, linguists also investigate how language interacts with our intellectual life.

Because language mediates virtually all forms of human endeavour, the study of linguistics can provide new perspectives on almost every aspect of the humanities and social sciences. In addition, it has applications to primary and secondary education, speech-language pathology and the applied sciences of communication engineering and computer science.

For specific program requirements, please consult the Faculty of Arts Programs of Study section of this calendar.

Courses in Linguistics

AS/LING 1000 6.00 Introduction to Linguistics. Examination of fundamental principles of language organization in phonology, morphology and syntax from both practical and theoretical points of view with illustrations from English and a variety of other languages. Brief survey of the areas of child language acquisition, historical linguistics and psycholinguistics. Course credit exclusions: None.

AS/LING 2060 6.00 The Grammatical Structure of English. An investigation of the grammatical structure of modern English, including phonology, morphology, syntax and semantics, within the framework of descriptive linguistics. Course credit exclusions: AK/EN 2076 3.00.

Cross-listed to: AS/EN 2060 6.00, AS/LING 2060 6.00

AS/LING 2110 3.00 Phonetics. This course examines various aspects of phonetics, including the articulatory and acoustic properties of speech sounds. There will also be intensive practice in the recognition of speech sounds as well as limited amount of work on sound production. Prerequisite or corequisite: AS/LING 1000 6.00, or permission of the department. Course credit exclusions: None.

AS/LING 2120 3.00 Fundamentals of Phonological Analysis. Practical techniques of phonological analysis exemplified by data taken from a variety of languages. Practice in the use of distinctive features and rule formalisms. Prerequisite: AS/LING 1000 6.00 with a grade of at least C; AS/LING 2110 3.00. Course credit exclusions: None.

AS/LING 2130 3.00 Fundamentals of Morphological Analysis. This course provides an introduction to the nature and organization of morphological patterns in human languages. Students are exposed to a range of cross-linguistic data, with emphasis being placed on how morphological theory accounts for these data. Prerequisite: AS/LING 1000 6.00 with a grade of at least C. Course credit exclusions: None.

AS/LING 2140 3.00 Fundamentals of Grammatical Analysis. Practical techniques of grammatical analysis exemplified by data taken from a variety of languages. Prerequisite: AS/LING 1000 6.00 with a grade of at least C; AS/LING 2130 3.00. Course credit exclusions: None.

AS/LING 2400 3.00 Language in Its Social Context. An introduction to the study of language as a social phenomenon. Topics covered include language varieties; stereotypes and social identity; language, culture and thought; communicative competence; bilingualism and diglossia; languages in contact; language and social deprivation; and language planning and language policy. Course credit exclusions: None.

AS/LING 2410 3.00 Language and Gender. This course explores the relationship between language and sex/gender systems from a feminist perspective. The main areas investigated are language and gender stereotypes; language, power and women's status; and male versus female communicative style in different socio-cultural contexts. Course credit exclusions: None.

Cross-listed to: AK/WMST 2501 3.00, AS/LING 2410 3.00, AS/WMST 2501 3.00, GL/SOSC 2900 3.00, GL/WMST 2501 3.00

AS/LING 2430 3.00 Language, Power and Persuasion. This course investigates the language of power and persuasion. The language used by powerful and powerless groups is analyzed to determine how it reinforces positions of dominance and subordination. The role of language in public persuasion is also considered. Course credit exclusions: None.

AS/LING 2450 3.00 Language and the Law. This course explores ways in which the discipline of linguistics can shed light on the use of language in the legal system. Topics include the special characteristics of written legal language, spoken language in the courtroom and linguists as expert witnesses. Course credit exclusions: None.

AS/LING 2460 3.00 South Asian Language and Society. A survey of the diversity and unity of language in the South Asian cultural area and in South Asian diasporic communities focusing on the role of language in defining identity and in mediating social and cultural change. Course credit exclusions: None.

AS/LING 3040 3.00 Historical Linguistics. An introduction to the study of the development of language systems through time, including the principles of genetic classification of languages, comparative grammar and internal reconstruction. Prerequisite: AS/LING 2120 3.00, or permission of the department. Course credit exclusions: None.

AS/LING 3060 3.00 Linguistic History Of English. A study of the principal changes in the English language from Anglo-Saxon times to the present day. Prerequisites: AS/LING 2120 3.00 and AS/LING 2140 3.00, or permission of the department. Course credit exclusions: AS/LING 4060 3.00 (prior to Fall/Winter 2001-2002).

AS/LING 3120 3.00 Phonology. Theoretical principles and practical techniques of phonological analysis exemplified by data taken from a variety of languages. Prerequisites: AS/LING 2110 3.00 and AS/LING 2120 3.00 or equivalent. Course credit exclusions: None.

AS/LING 3140 3.00 Syntax. This course provides a basic introduction to generative syntax, in particular to the recent work of Noam Chomsky and his followers. Although most of the data analyzed will be English, syntactic patterns of some other languages will be discussed. Prerequisite: AS/LING 2140 3.00 or equivalent. Course credit exclusions: None.

AS/LING 3150 3.00 Semantics. This course provides an introduction to sentence-level semantics. Some topics in word-level semantics are also considered. Issues are examined primarily from the perspective of a version of truth-conditional semantics. Prerequisite: AS/LING 2140 3.00, or permission of the department. Course credit exclusions: AS/LING 4150 3.00, AS/LING 4800C 3.00 (prior to Fall/Winter 2001-2002).

AS/LING 3160 3.00 Discourse Analysis. This course provides an analysis of spoken and written texts in context. Specific topics include spoken versus written discourse; the role of context in the interpretation of utterances; cohesion and coherence; and the relationship between information structuring and grammatical forms. Prerequisite: AS/LING 1000 6.00 or AS/LING 2060 6.00. Course credit exclusions: None.

AS/LING 3210 3.00 First Language Acquisition. This course surveys first language acquisition from a variety of approaches, including social

interactionist, innatist and information processing. Prerequisite: AS/LING 1000 6.00 or AS/LING 3220 3.00. Course credit exclusions: None.

AS/LING 3220 3.00 Psycholinguistics. A survey of psycholinguistic research and theory. Topics chosen from the following: introduction to language structure, biological basis for language, speech perception, sentence processing, speech production, relation of language and thought, language acquisition and atypical language. Prerequisite: AK/AS/HH/SC/PSYC 1010 6.00 or AK/HH/PSYC 2410 6.00, with a minimum grade of C, or AS/LING 1000 6.00. Course credit exclusions: AK/AS/HH/SC/PSYC 3190 3.00 (Prior to Fall/Winter 2007-08), HH/PSYC 3190 3.00, AK/PSYC 3250 3.00 (prior Summer 2002).

Cross-listed to: AS/LING 3220 3.00, HH/PSYC 3290 3.00

AS/LING 3240 3.00 Second Language Acquisition. This course deals with the main issues of second language acquisition. Topics treated include similarities and differences between first and second language acquisition, bilingualism, and various theories such as interlanguage, the contrastive analysis hypothesis and the monitor model. Prerequisite: AS/LING 1000 6.00 or AS/LING 3220 3.00 or AK/AS/SC/PSYC 3290 3.00. Course credit exclusions: None.

AS/LING 3400 3.00 Sociolinguistics: Language Variation and Change. This course provides a survey of issues in the study of language variation and change, using the framework of variationist sociolinguistics. Prerequisites: AS/LING 2120 3.00, AS/LING 2130 3.00, AS/LING 2140 3.00. Recommended prerequisite: AS/LING 2400 3.00. Course credit exclusions: None.

AS/LING 3410 3.00 Writing Systems. Writing Systems. This course deals with the interaction of spoken language and writing structure; functioning and cultural spread of writing systems; historical relationships; and orthographic change, reform and design. Systems studied include Roman, Greek, Cyrillic, Arabic and Hebrew alphabets, and systems of the Indian sub-continent, Korea, China and Japan. Prerequisite: AS/LING 1000 6.00, or AS/LING 2060 6.00 or permission of the department. Course credit exclusions: None.

AS/LING 3440 3.00 Bilingualism: A Sociolinguistic Approach. This course takes a sociolinguistic approach to the study of language contact. Topics include societal bilingualism, linguistic minorities, language maintenance and shift and language mixture. Special emphasis is placed on borrowing and codeswitching and the factors influencing their use. Prerequisites: AS/LING 1000 6.00, AS/LING 2120 3.00 and AS/LING 2140 3.00. Course credit exclusions: AS/LING 3800M 3.00 (prior to Fall/Winter 2002-2003).

AS/LING 3600 3.00 Socio-Political Issues in Second Language Teaching. Teaching English to speakers of other languages (TESOL) takes place within a complex socio-political context. Selected issues are used to consider how this context influences the teaching/learning process. Note: This course does not count for linguistics major credit. Enrollment is restricted to those students in the TESOL program. Course credit exclusions: None.

AS/LING 3800 3.00 Language and Mind. This course explores how the structures of human language reflect the architecture of the human mind. The techniques and results from a number of disciplines and perspectives (e.g. artificial intelligence, linguistics, neuroscience, philosophy, psychology) are considered. Prerequisite: AS/LING 1000 6.00 or AS/PSYC 1010 6.00, or permission of the department. Course credit exclusions: None.

AS/LING 3900 3.00 Independent Reading and Research. A student may take an independent, individually supervised reading/research course, provided that the student and the course meet the requirements as set out by the Faculty of Arts and those established by the department. Course credit exclusions: None. Note: Independent reading/research courses require a signed agreement between the student and faculty member, as well as the approval of the section coordinator and undergraduate director. Note: Please consult the Faculty of Arts Academic Advising and Student Responsibility section of the calendar for detailed regulations regarding independent reading courses.

AS/LING 3900 6.00 Independent Reading and Research. A student may take an independent, individually supervised reading/research course, provided that the student and the course meet the requirements as set out by the Faculty of Arts and those established by the department. Course credit exclusions: None. Note: Independent reading/research courses require a signed agreement between the student and faculty member, as well as the approval of the section coordinator and undergraduate director. Note: Please consult the Faculty of Arts Academic Advising and Student Responsibility section of the calendar for detailed regulations regarding independent reading courses.

AS/LING 4060 3.00 Canadian English. This course provides an overview of the history, linguistic structure and sociolinguistics of English as spoken in Canada. Prerequisites: AS/LING 2120 3.00, AS/LING 2130 3.00, and AS/LING 2140 3.00, all with grades of C+ or higher. Course credit exclusions: None.

AS/LING 4120 3.00 Phonological Theories. This course concentrates on recent developments in phonological theory within a generative framework. Specific topics include the representation of segments, autosegmental phonology, syllable structure, metrical phonology and lexical phonology. Prerequisite: AS/LING 3120 3.00 with a grade of C+ or better, or permission of the department. Course credit exclusions: None.

AS/LING 4140 3.00 Grammatical Theories. This course will examine the metatheoretical issues and assumptions underlying the development of different linguistic theories. The foundations and formal framework of Government-Binding theory, the most recent version of Chomsky's Extended Standard theory, will be introduced and later compared with a competing linguistic theory. Prerequisite: AS/LING 3140 3.00 with a grade of C+ or better, or permission of the department. Course credit exclusions: None.

AS/LING 4150 3.00 Topics in the Syntax-Semantics Interface. This course examines the interface of the syntactic and semantic modules. The first part introduces students to the fundamentals of formal semantic theory. The second part covers quantificational structures, event semantics and discourse related properties of sentence structure (topic-comment/focus-presuppositions structures). Prerequisite: AS/LING 3140 3.00 with a grade of at least C+. Course credit exclusions: AS/LING 3150 3.00, AS/LING 4800C 3.00 (prior to Fall/Winter 2001-2002).

AS/LING 4220 3.00 Acoustic Phonetics. An investigation of acoustic-phonetic aspects of speech and their relation to speech perception and recognition. Practical experience in techniques of acoustic-phonetic research. Prerequisite: AS/LING 2110 3.00 and AS/LING 2120 3.00 with grades of C+ or better, and at least six credits in linguistics (LING) at the 3000-level with grades of C+ or better, or permission of the department. AS/LING 3120 3.00 is recommended. Course credit exclusions: None.

AS/LING 4230 3.00 Language Disorders. This course surveys a variety of language disorders, among them aphasia, delayed language development, dyslexia and language dissolution in old age. Specific disorders are discussed within a psycholinguistic framework. There is some discussion of basic strategies for therapy. Prerequisites: AS/LING 2120 3.00, AS/LING 2140 3.00, AS/LING 3220 3.00 (or AK/AS/SC/PSYC 3290 3.00) with grades of C+ or better, and at least three additional credits in linguistics (AS/LING) at the 3000 level with grades of C+ or better. Course credit exclusions: None.

AS/LING 4240 3.00 Theoretical Issues in Second Language Acquisition. An examination of the relationship between linguistic theory and second language acquisition including the nature of second language learners' linguistic representations from both linguistic and neurolinguistic perspectives, the role of universal grammar, and elicitation and interpretation of second language data. Prerequisite: Completion of AS/LING 3240 3.00 (formerly 3230 3.00) with a grade of B+ and AS/LING 3120 3.00 and AS/LING 3140 3.00 with grades of B, or permission of the department. Course credit exclusions: None.

AS/LING 4250 3.00 The Evolution of Language. Drawing on comparisons of various non-human communication systems with human language, this course examines the evolution of human language. Different theoretical approaches to the structure of human language and

the interrelation of various components of the linguistic system are considered. Prerequisites: AS/LING 2120 3.00, AS/LING 2130 3.00, AS/LING 2140 3.00 and two 3000-level Linguistics courses, all with grades of at least C+, or permission of the department. AS/LING 3220 3.00 is a recommended prerequisite. Course credit exclusions: None.

AS/LING 4320 6.00 Field Methods. This course provides students with the skills and techniques necessary to conduct independent linguistic field work. Prerequisites: AS/LING 2110 3.00, AS/LING 2120 3.00, AS/LING 2130 3.00 and AS/LING 2140 3.00 with grades of C+ or better, and at least six credits in linguistics (LING) at the 3000-level with grades of C+ or better, or permission of the department. AS/LING 3120 3.00 and AS/LING 3140 3.00 are recommended. Course credit exclusions: None.

AS/LING 4350 3.00 Pidgin and Creole Linguistics. Pidgins and Creoles are languages that develop from contact between groups of people who have no common means of communication. This course examines the historical and social circumstances in which these languages, their linguistic characteristics and their relevance to linguistic theory. Integrated with: GS/LING 5350 3.00. Prerequisites: AS/LING 2120 3.00, AS/LING 2130 3.00, AS/LING 2140 3.00 and two 3000-level Linguistics courses, all with grades of at least C+, or permission of the department. Course credit exclusions: AS/LING 4800M 3.00 (prior to Fall/Winter 2003-2004).

AS/LING 4400 3.00 Research in Sociolinguistic Variation and Change. This course is a practical introduction to sociolinguistic research, including methods of data collection and quantitative analysis. Students gain experience in all stages of sociolinguistic research and write an original research paper. Prerequisites: AS/LING 2120 3.00, AS/LING 2130 3.00, AS/LING 2140 3.00 and AS/LING 3400 3.00, all with grades of at least C+, or permission of the Department. Course credit exclusion: AS/LING 4400 3.00 (offered prior to 2008-09).

AS/LING 4400 3.00 Sociolinguistic Variation and Change. This course examines language variation and change. Sociolinguistic variation is not random, but systematically reflects both social organization and features of the sociolinguistic context. Students will gain experience in all stages of sociolinguistic research and do an original research paper. Prerequisites: AS/LING 2120 3.00 and AS/LING 2140 3.00 with grades of C+ or better, and at least six credits in linguistics (LING) at the 3000-level with grades of C+ or better, or permission of the department. AS/LING 2400 3.00 is recommended. Course credit exclusions: None.

AS/LING 4440 3.00 Topics in Grammatical Change. This course deals with morphosyntactic change from a broadly generative perspective. It focuses on large-scale changes, changes resulting in dialectal variation, and changes in progress. Both language-internal and language-external mechanisms by which change takes place are considered. Integrated with: GS/LING 5440 3.00. Prerequisites: AS/LING 2140 3.00 and at least six credits in linguistics (LING) at the 3000-level including AS/LING 3140 3.00, all with grades of C+ or better, or permission of the department. AS/LING 2400 3.00 and AS/LING 3040 3.00 are recommended. Course credit exclusions: AS/LING 4800B 3.00 (prior to Fall/Winter 2000-2001).

AS/LING 4900 3.00 Independent Reading and Research. A student may take an independent, individually supervised reading/research course, provided that the student and the course meet the requirements as set out by the Faculty of Arts and those established by the department. Course credit exclusions: None. Note: Independent reading/research courses require a signed agreement between the student and faculty member, as well as the approval of the section coordinator and undergraduate director. Note: Please consult the Faculty of Arts Academic Advising and Student Responsibility section of the calendar for detailed regulations regarding independent reading courses.

Courses in Linguistics and Language Studies/ Cours de linguistique et sciences du langage

GL/LIN 1200 3.00 Introduction to Descriptive Grammar. This course introduces students to neo-traditional or descriptive grammar. Students are introduced to form classes (noun, verb, adjective and adverb), structure classes (pronouns, determiners, auxiliaries, propositions and conjunctions), phrases, clauses and sentence types. Grammatical function is also examined.

GL/LIN 1200 3.00 Introduction à la grammaire descriptive. Ce cours servira d'introduction à la grammaire descriptive (ou néo-traditionnelle). Les étudiants se familiariseront avec les catégories grammaticales (noms, verbes, adjectifs, etc.) syntagmes, propositions et types de phrases. On examinera également la fonction grammaticale.

Language of Instruction: French

GL/LIN 1716 6.00 Logique formelle et informelle. Le cours a pour but de faire connaître à l'étudiant les moyens de distinguer les bons raisonnements des mauvais. Un texte élémentaire de logique sera utilisé comme livre de référence. Le cours poursuivra aussi une étude détaillée de textes choisis.

Language of Instruction: French

Cross-listed to: GL/LIN 1716 6.00, GL/MODR 1716 6.00

GL/LIN 2600 6.00 Introduction à la linguistique générale et française. On étudiera l'appareil conceptuel de la linguistique structurale, en montrant quel regard elle autorise sur les langues en général et sur le français en particulier. L'examen systématique des niveaux d'analyse (phonologie, morphologie, syntaxe et sémantique) permettra d'aborder les principales théories contemporaines : fonctionnalisme, générativisme, linguistique énonciative. Conditions préalables : Avoir terminé le GL/FRLS 1525 3.00 et GL/FRLS 1530 3.00 ou GL/Fran 1740 3.00 et FRAN 1745 3.00 ou permission du département. Cours incompatibles : AS/FR 2100 6.00, GL/Fran 3220 3.00, GL/Fran 2220 6.00.

Language of Instruction: French

Cross-listed to: GL/Fran 2600 6.00, GL/LIN 2600 6.00

GL/LIN 2605 6.00 Introduction to Linguistics. This course introduces the theory and technique of linguistics with illustrations mainly from English. Core areas of study will include phonetics, phonology, morphology, syntax and semantics. Other areas include pragmatics, discourse analysis and historical linguistics. Course credit exclusions: GL/EN 2570 6.00, GL/EN 2570 3.00(EN).

Cross-listed to: GL/EN 2605 6.00, GL/LIN 2605 6.00

GL/LIN 2608 6.00 The Structure of English. This course offers an introduction to linguistic description of contemporary English, including as principal topics: sound system, vocabulary, syntax, style and usage. The course will also examine, within a linguistic framework, written and oral varieties of English in the world today. Course credit exclusions: GL/EN 2520 3.00, GL/EN 2540 3.00.

Cross-listed to: GL/EN 2608 6.00, GL/LIN 2608 6.00

GL/LIN 2610 6.00 Advanced Level Studies in Spanish Language and Stylistics. This course proposes a comprehensive review of the most difficult aspects of Spanish grammar through advanced exercises in reading, writing and conversation. Special attention will be placed on consolidating the student's oral and written expressive skills and on the stylistic aspects of the language. Course credit exclusion: GL/SP 2240 6.00.

Language of Instruction: English/Spanish

Cross-listed to: GL/LIN 2610 6.00, GL/SP 2610 6.00

GL/LIN 2610 6.00 Étude avancée de la langue et de la stylistique espagnoles. Ce cours est une révision générale des aspects les plus difficiles de la grammaire espagnole à travers des exercices avancés portant sur la lecture, l'écriture et la conversation. L'accent sera mis sur le perfectionnement de l'expression orale et écrite chez les étudiants, ainsi que sur les aspects stylistiques de la langue. It examines various linguistic theories of narrative and applies these to the study of texts. Prerequisite: GL/EN 2605 6.00 or GL/EN 2608 6.00 or an equivalent introductory linguistics course or permission of the instructor.

Cross-listed to: GL/EN 4612 3.00, GL/LIN 4612 3.00

GL/LIN 4617 3.00 Language Policy and Language Planning. This course offers an introduction to the field of language policy and language planning through a discussion of principles and practices covering the field's main topics, such as language ideologies; standardization; status, corpus, acquisition and shift-reversing planning at supra-national, national and sub-national levels. Prerequisites: GL/EN 2605 6.00 or GL/EN 2608 6.00 or an equivalent introductory linguistics course, and at least three credits chosen from GL/EN 3604 3.00, GL/LIN 3636 6.00, GL/LIN 3619 3.00, GL/EN 3632 3.00, GL/EN 3650 6.00, GL/LIN 3655 6.00 or permission of the instructor.

Cross-listed to: GL/EN 4617 3.00, GL/LIN 4617 3.00

GL/LIN 4651 6.00 Histoire de la langue française. Ce cours comprend deux parties: I. Introduction à la linguistique historique (définition et concepts, méthodologie, changement linguistique). II. Évolution historique du français: origine et formation (langue d'oïl et langue d'oc); l'ancien français (structure et dialectes); le moyen français (transformations linguistiques, français littéraire/français populaire); le français moderne (type et tendances, volutives, le français et les langues romanes, les variétés sociolinguistiques et régionales, le français au Canada). Condition préalable : Cours d'introduction à la linguistique. Cours incompatibles : AS/FR 4110 6.00, GL/FRAN 4210 3.00 et GL/FRAN 4651 3.00.

Cross-listed to: GL/FRAN 4651 6.00, GL/LIN 4651 6.00

GL/LIN 4652 3.00 Syntaxe (Domaine du français). Ce cours offre une analyse syntaxique de la phrase française, menée (selon les années) dans le cadre fonctionnaliste ou générativiste. Les concepts fondamentaux abordés sont les catégories et les fonctions, les phrases simples et complexes, les structures profondes et superficielles, transformations etc. Nous ferons les études de cas (polyvalence du marqueur de constructions factitives, subordination et coordination). Condition préalable : Cours d'introduction à la linguistique. Cours incompatible : GL/FRAN 4240 3.00.

Cross-listed to: GL/FRAN 4652 3.00, GL/LIN 4652 3.00

GL/LIN 4653 3.00 Morphologie (Domaine du français). Ce cours étudie les unités de première articulation (monèmes) et leur variation, la délimitation du champ d'étude (mot, monème, syntagme), les problèmes de segmentation et de classification (variantes, signifiant discontinu, amalgame, signifiant zéro, homophonie). Condition préalable : Cours d'introduction à la linguistique. Cours incompatibles : AS/FR 3100 6.00, GL/FRAN 4220 3.00.

Cross-listed to: GL/FRAN 4653 3.00, GL/LIN 4653 3.00

GL/LIN 4654 3.00 Linguistique et critique littéraire (domaine du français). Ce cours examine la spécificité de la communication littéraire ainsi que les apports de la linguistique à l'analyse des textes. Condition préalable : Cours d'introduction à la linguistique. Cours incompatible : GL/FRAN 4230 3.00(FR).

Language of Instruction: French

Cross-listed to: GL/FRAN 4654 3.00, GL/LIN 4654 3.00

GL/LIN 4655 6.00 Le français et l'anglais en perspective typologique. Branche particulièrement féconde de la linguistique contemporaine, la typologie mobilise un appareil conceptuel spécifique. On présentera celui-ci, avant de procéder à l'étude approfondie de domaines tels que la relation entre rôles sémantiques et fonctions syntaxiques, la détermination du nom, l'aspect et le mode. Condition préalable : GL/FRAN 2600 6.00. Cours incompatible : GL/FRAN 4250 6.00.

GL/LIN 4656 3.00 Processus d'acquisition des langues secondes : perspectives psycholinguistiques. Après avoir comparé l'acquisition de L1 et L2, nous discuterons des facteurs individuels (personnalité, attitude, motivation, aptitude...) qui influencent l'acquisition des L2. Nous examinerons si l'hypothèse d'une période critique (Lenneberg) dans l'acquisition de L1 peut s'appliquer à l'acquisition de L2; nous aborderons la question de l'influence de l'âge sur l'acquisition de L2 et comparerons la qualité de l'apprentissage des L2 par les enfants et par les adultes. Nous analyserons ensuite les différentes théories (Chomsky, Piaget...) qui ont aidé à passer du béhaviorisme au cognitivisme qui étudie la multiplicité des processus d'acquisition ainsi que les styles et les stratégies d'apprentissage. Nous verrons enfin comment les théories psycholinguistiques actuelles jettent une lumière nouvelle sur l'analyse des erreurs, leur traitement et la notion d'interlangue. Cours incompatible : GL/FRAN 4285 3.00(FR).

GL/LIN 4659 3.00 Structure et changement dans l'évolution du français. Ce cours se propose d'approfondir une des périodes de l'évolution du français qui sont importantes pour mieux comprendre l'histoire du français et/ou la structure du français contemporain. Dans cette perspective, on étudie la formation et la structure de l'ancien français, les innovations apportées par le moyen français ou la formation et la structure du français moderne. Condition préalable : Cours d'introduction à la linguistique. Cours incompatible : GL/Fran 4320 3.00(FR).

Language of Instruction: French

GL/LIN 4660 3.00 L'analyse phonologique : du concret à l'abstrait et du naturel au formel. Le cours se propose de donner aux étudiants la formation nécessaire pour comprendre et analyser de façon critique les études basées sur quelques-unes des théories phonologiques actuelles. Les étudiants seront aussi capables d'aborder des aspects du français et d'autres langues dans certaines approches phonologiques contemporaines. Condition préalable : Cours d'introduction à la linguistique. Cours incompatible : GL/Fran 4340 3.00.

Language of Instruction: French

Cross-listed to: GL/Fran 4660 3.00, GL/LIN 4660 3.00

GL/LIN 4661 3.00 Variation stylistique et apprentissage du FLS. On analyse dans ce cours les différences de compétence stylistique entre apprenants du français langue seconde et francophones et on relie ces différences aux pratiques d'enseignement de la langue seconde et aux comportements acquisitionnels des apprenants. Condition préalable : Cours d'introduction à la linguistique. Cours incompatible : GL/Fran 4345 3.00.

GL/LIN 4663 3.00 L'apprentissage du français L2 : affectivité et cognition. Ce cours examinera les apports des théories de l'affectivité, des théories socio-psychologiques et des théories cognitivistes qui sont le mieux à même d'expliquer les principaux facteurs facilitant ou inhibant le processus d'apprentissage du français L2 (FL2). Nous étudierons le cas des apprenants en difficulté d'apprentissage (autistes, dyslexiques, etc.) afin d'examiner les avantages et les défis à leur faire apprendre le FL2. Nous verrons aussi dans quelle mesure un tel apprentissage peut avoir des retombées positives sur leur développement non seulement linguistique mais aussi social, cognitif, psychologique et culturel.

The Department of Mathematics and Statistics offers a wide range of courses in both pure and applied mathematics and statistics. These meet the needs of students who wish to major in mathematics or statistics as well as those who require some knowledge of mathematics or statistics in other disciplines. In addition, there are courses for those who have a general interest in these subjects.

Actuarial Profession. Students interested in the actuarial profession should consult the Department of Mathematics and Statistics for guidance. The department will be glad to suggest a program of courses which will be helpful in preparing for examinations of the Society of Actuaries.

Operations Research. The Canadian Operational Research Society (CORS) has recognized that graduation from a program in Applied Mathematics, Mathematics or Statistics with a prescribed set of courses will qualify a student for the Diploma in Operations Research awarded by CORS. Interested students should consult the Department of Mathematics and Statistics for guidance.

For specific requirements of programs offered by this department, see the Faculty of Arts Programs of Study section of this calendar for BA and BA Honours programs and see the Faculty of Science and Engineering Programs of Study section of this calendar for BSc and BSc Honours programs.

Courses in Mathematics and Statistics

When selecting courses, please note the following:

1. All Honours students whose major is in mathematics and statistics (with the exception of the BSc international dual degree program in Mathematics and Statistics) must complete the mathematics/statistics core (see the Faculty of Arts or the Faculty of Science and Engineering Programs of

Study sections of the calendar). This enables students to defer their final decision regarding choice of major within mathematics and statistics to their fourth term of study.

2. Students taking lower-level mathematics courses may wish to make use of the tutorial services provided in many of these courses by the department's mathematics and statistics laboratory.

3. Students who feel that their mathematical background is weak (perhaps despite having passed one or more 12U mathematics course) should consider taking AS/SC/MATH 1510 6.00. This course can serve as preparation for AS/SC/MATH 1520 3.00, which in turn prepares the student for further calculus courses (see below).

4. **Calculus courses for first-year students:** Students must carefully note the requirements of their programs of study before choosing a first-year calculus course. In some cases, where no calculus is required beyond first year, a program might accept six credits of a "second digit 5" University calculus course like AS/MATH 1530 3.00 plus AS/MATH 1540 3.00, or AK/AS/MATH 1550 6.00, or AS/SC/MATH 1505 6.00. (Note that AS/SC/MATH 1520 3.00 is a prerequisite for all of these except AS/SC/MATH 1505 6.00.)

A student with at least one 12U (or equivalent) course in mathematics, but without a high school calculus course, must begin the study of calculus with AS/SC/MATH 1520 3.00. (As noted above, the sole exception to this statement is the student for whom AS/SC/MATH 1505 6.00 is a "terminal" calculus course.) AS/SC/MATH 1520 3.00 is literally intended to be the York equivalent of a high school calculus course.

Students whose programs require the calculus courses (a) AS/SC/MATH 1300 3.00 or (b) AS/SC/MATH 1013 3.00 must first have either a high school calculus course or AS/SC/MATH 1520 3.00, as noted above. These students will normally continue in their study of calculus with (a) AS/SC/MATH 1310 3.00 or (b) AS/SC/MATH 1014 3.00 respectively.

5. **Course numbering.** Courses with second digit 5 cannot be used to satisfy departmental degree requirements except (i) by students in the bachelor program in Mathematics for Commerce; and (ii) by students in other programs in a few cases as noted in program descriptions.

With the exception of AS/MATH 1530 3.00, mathematics courses with third digit 3 involve statistics.

Unless otherwise specified, six-credit courses have three lecture hours per week for two terms, while three-credit courses have three lecture hours per week for one term. In addition, problem sessions or tutorials are scheduled for many courses.

Mathematics and statistics are offered by the Faculty of Arts and the Faculty of Science and Engineering. Mathematics is offered by Glendon College.

Courses in Mathematics and Statistics/Cours de mathématiques

AS/SC/MATH 1000 3.00 Differential Calculus (Honours Version).

Axioms for real numbers, limits, continuity and differentiability. This course covers slightly fewer topics than AK/AS/SC/MATH 1300 3.00, but covers them in greater depth. It should be taken by all those planning an Honours degree in mathematics or a Specialized Honours degree in statistics. Prerequisite: AS/SC/MATH 1515 3.00, 12U Advanced Functions and Introductory Calculus, OAC calculus or equivalent. Course credit exclusions: AS/SC/MATH 1013 3.00, AK/AS/SC/MATH 1300 3.00, AS/SC/MATH 1505 6.00, AS/MATH 1530 3.00, AK/AS/MATH 1550 6.00, GL/MATH/MODR 1930 3.00, AS/ECON 1530 3.00.

Cross-listed to: AS/MATH 1000 3.00, SC/MATH 1000 3.00

AS/SC/MATH 1010 3.00 Integral Calculus (Honours Version).

Riemann integral, fundamental theorems of calculus, transcendental functions, integration techniques, sequences, series. This course covers fewer topics than AK/AS/SC/MATH 1310 3.00, but covers them in greater depth. It should be taken by all those planning an Honours degree in mathematics or a Specialized Honours degree in statistics. Prerequisite: AS/SC/MATH 1000 3.00 or permission of the department. Course credit exclusions: AS/SC/MATH 1014 3.00, AK/AS/SC/MATH 1310 3.00, AS/SC/MATH 1505 6.00, GL/MATH/MODR 1940 3.00, AK/AS/SC/MATH 3110 3.00.

Cross-listed to: AS/MATH 1010 3.00, SC/MATH 1010 3.00

AS/SC/MATH 1013 3.00 Applied Calculus I.

Introduction to the theory and applications of both differential and integral calculus. Limits. Derivatives of algebraic and trigonometric functions. Riemann sums, definite integrals and the Fundamental Theorem of Calculus. Logarithms and exponentials, Extreme value problems, Related rates, Areas and Volumes. Prerequisite: AS/SC/MATH 1515 3.00 or AS/SC/MATH 1520 3.00, or a high school calculus course. Course credit exclusions: AS/SC/MATH 1000 3.00, AK/AS/SC/MATH 1300 3.00, AS/SC/MATH 1505 6.00, AS/SC/MATH 1513 6.00, AS/MATH 1530 3.00, AK/AS/MATH 1550 6.00, GL/MATH/MODR 1930 3.00, AS/ECON 1530 3.00.

Cross-listed to: AS/MATH 1013 3.00, SC/MATH 1013 3.00

AS/SC/MATH 1014 3.00 Applied Calculus II.

Calculus in Polar Coordinates. Techniques of Integration. Indeterminate Forms. Improper Integrals. Sequences, infinite series and power series. Approximations. Introduction to ordinary differential equations. Prerequisite(s): One of AS/SC/MATH 1000 3.00, AS/SC/MATH 1013 3.00, AK/AS/SC/MATH 1300 3.00, or AS/SC/MATH 1513 6.00; for non-science students only, six credits from AS/MATH 1530 3.00 and AS/MATH 1540 3.00, AK/AS/MATH 1550 6.00, AS/ECON 1530 3.00 and AS/ECON 1540 3.00. Course credit exclusions: AS/SC/MATH 1010 3.00, AK/AS/SC/MATH 1310 3.00, AS/SC/MATH 1505 6.00, GL/MATH/MODR 1940 3.00.

Cross-listed to: AS/MATH 1014 3.00, SC/MATH 1014 3.00

AS/SC/MATH 1016 1.00 Applied Mathematics Module I.

Designed for students in applied mathematics to complement and enrich the material in AS/SC/MATH 1013 3.00. The module treats the theory in greater depth, and explores extended applications and modelling. One lecture hour per week. One term. One credit. Prerequisite: 12U Advanced Functions and Introductory Calculus, OAC calculus or AS/SC/MATH 1515 3.00. Prerequisite or corequisite: AS/SC/MATH 1013 3.00. Note: AS/SC/MATH 1016 1.00 must be taken within the first 60 credits of a student's program.

Cross-listed to: AS/MATH 1016 1.00, SC/MATH 1016 1.00

AS/SC/MATH 1017 1.00 Applied Mathematics Module II.

Designed for students in applied mathematics to complement and enrich the material in AS/SC/MATH 1014 3.00. The module treats the theory in greater depth, and explores extended applications and modelling. One lecture hour per week. One term. One credit. Prerequisites: AS/SC/MATH 1013 3.00; AS/SC/MATH 1016 1.00. Prerequisite or corequisite: AS/SC/MATH 1014 3.00. Note: AS/SC/MATH 1017 1.00 must be taken within the first 60 credits of a student's program.

Cross-listed to: AS/MATH 1017 1.00, SC/MATH 1017 1.00

AK/AS/SCMATH 1019 3.00 Discrete Mathematics for Computer Science. Introduction to abstraction. Use and development of precise formulations of mathematical ideas. Informal introduction to logic; introduction to naïve set theory; induction; relations and functions; big O-notation; recursive definitions, recurrence relations and their solutions; graphs and trees. Three lecture hours per week. Plus drop-in optional problem sessions as well as instructor office hours, as these are announced in each term. Prerequisites: AK/AS/SC/MATH 1190 3.00, or both of 12U Advanced Functions and Introductory Calculus and 12U Geometry and Discrete Mathematics. Course credit exclusion: AK/AS/SC/MATH 2320 3.00.

Cross-listed to: AK/CSE 1019 3.00, AK/MATH 1019 3.00, AS/CSE 1019 3.00, AS/MATH 1019 3.00, SC/CSE 1019 3.00, SC/MATH 1019 3.00

AK/AS/SC/MATH 1021 3.00 Linear Algebra I. Linear equations, matrices, Gaussian elimination, determinants and vector spaces. This course covers material similar to that in AK/AS/SC/MATH 2221 3.00 but at a more advanced level. Required in Specialized Honours statistics and in all applied mathematics, mathematics and mathematics for commerce programs except the BA Program in Mathematics for Commerce. Prerequisite: One 12U or OAC mathematics course or equivalent. Course credit exclusions: AS/SC/MATH 1025 3.00, AS/SC/MATH 2021 3.00, AK/AS/SC/MATH 2221 3.00, GL/MATH/MODR 2650 3.00.

Cross-listed to: AK/MATH 1021 3.00, AS/MATH 1021 3.00, SC/MATH 1021 3.00

AS/SC/MATH 1025 3.00 Applied Linear Algebra. Topics include spherical and cylindrical coordinates in Euclidean 3-space, general matrix algebra, determinants, vector space concepts for Euclidean n-space (e.g. linear dependence and independence, basis, dimension, linear transformations etc.), an introduction to eigenvalues and eigenvectors. Prerequisites: One 12U or OAC mathematics course or equivalent. Course credit exclusions: AK/AS/SC/MATH 1021 3.00, AS/SC/MATH 2021 3.00, AK/AS/SC/MATH 2221 3.00, GL/MATH/MODR 2650 3.00.

Cross-listed to: AS/MATH 1025 3.00, SC/MATH 1025 3.00

AS/SC/MATH 1090 3.00 Introduction to Logic for Computer Science. The syntax and semantics of propositional and predicate logic. Applications to program specification and verification. Optional topics include set theory and induction using the formal logical language of the first part of the course. Prerequisite: AK/AS/SC/MATH 1190 3.00 or AK/AS/SC/MATH 1019 3.00. Note: This course may not be taken for degree credit by any student who has passed AK/AS/SC/MATH 4290 3.00.

Cross-listed to: AS/MATH 1090 3.00, SC/MATH 1090 3.00

AK/AS/SC/MATH 1131 3.00 Introduction to Statistics I. Displaying and describing distributions; relations in categorical data; Simpson's paradox and the need for design; experimental design and sampling design; randomization; probability laws and models; central limit theorem; statistical inference including confidence intervals and tests of significance; matched pairs; simulation. Prerequisite: At least one 12U mathematics course or OAC in mathematics is recommended. Course credit exclusion: AK/AS/SC/MATH 2560 3.00.

Cross-listed to: AK/MATH 1131 3.00, AS/MATH 1131 3.00, SC/MATH 1131 3.00

AS/SC/MATH 1190 3.00 Introduction to Sets and Logic. Topics include logic, sets, functions, relations, modular arithmetic and applications of elementary number theory, proof techniques, induction. Prerequisite: One 12U or OAC mathematics course or equivalent, or AK/MATH 1710 6.00. NCR Note: This course may not be taken for degree credit by any student who has passed any 3000- or higher-level mathematics course. Course credit exclusion: GL/CSLA/MATH/MODR 1650 3.00.

Cross-listed to: AS/MATH 1190 3.00, SC/MATH 1190 3.00

AS/SC/MATH 1200 3.00 Problems, Conjectures and Proofs. Extended exploration of elementary problems leading to conjectures, partial solutions, revisions, and convincing reasoning, and hence to proofs. Emphasis on problem solving, reasoning, and proving. Regular participation is required. Prerequisite: 12U Advanced Functions (MHF4U) or Advanced Functions and Introductory Calculus (MCB4U). NCR note:

Not open to any student who is taking or has passed a MATH course at the 3000 level or higher.

Cross-listed to: AS/MATH 1200 3.00, SC/MATH 1200 3.00

AS/SC/MATH 1300 3.00 Differential Calculus with Applications. Limits, derivatives with applications, antiderivatives, fundamental theorem of calculus, beginnings of integral calculus. Prerequisite: AS/SC/MATH 1515 3.00 AS/SC/MATH 1520 3.00 or AK/MATH 1710 6.00 or a high school calculus course. Course credit exclusions: AS/SC/MATH 1000 3.00, AS/SC/MATH 1013 3.00, AS/SC/MATH 1505 6.00, AS/SC/MATH 1513 6.00, AS/MATH 1530 3.00, AK/AS/MATH 1550 6.00, GL/MATH/MODR 1930 3.00, AS/ECON 1530 3.00.

AK/MATH 1700 6.00 The Nature and Growth of Ideas in Mathematics. Students are shown the central position of mathematics in our culture: great discoveries in mathematics and their effect on general culture and society; history of mathematics; mathematics of art and architecture,

sound, games and gambling and computing. Course credit exclusion: None.

AK/MATH 1710 6.00 Fundamentals of Mathematics. A course of consolidation, review and enrichment of basic mathematical principles and techniques. Topics to be covered include: algebraic equations and inequalities, analytic geometry, trigonometry, elements of finite mathematics and an introduction to calculus. Note 1: To register in MATH 1710 6.00 students must either pass the prerequisite test or have successfully completed the Continuing Education course Elementary Mathematics (CEPM 3910) with a grade of B or higher. (An information sheet describing the prerequisite test and the Continuing Education course and is available from the School of Analytic Studies and Information Technology, TEL Building, Room 2005). Note 2: Students who, prior to admission and within the last two years, have completed the following high school mathematics courses with a grade of 70 per cent or higher will be excused from taking, and are not permitted to take, MATH 1710 6.00 (see Note 4): 1) (new high school curriculum) grade 12U advanced functions and introduction to calculus and one other grade 12U mathematics course, or 2) (old curriculum) two OAC mathematics courses, one calculus and one other OAC mathematics course. Note 3: If you have completed and passed any equivalent of a University level calculus course you cannot take MATH 1710 6.00 (see note 4). Note 4: If you have been excused from taking MATH 1710 6.00 you must replace it with another general education mathematics or modes of reasoning course to fulfill the general education requirement. Course credit exclusion: AS/SC/MATH 1510 6.00.

AK/MATH 1720 6.00 Statistics and Reasoning. This course will attempt to provide some insight into the nature, scope and limitations of statistical analysis in modern society. The questions to be studied are: What types of observation or measurement exist and what approaches are used to summarize and analyze the data thus generated? Are statistics value-free? How do inductive and deductive reasoning enter into the statistical process? Examples such as the consumer price index, opinion polls, lotteries etc., may be discussed. Note: Not open to students who have taken or are taking AK/MATH 2560 3.00, or who have received advanced standing for the equivalent. Course credit exclusion: None.

GL/MATH 1925 3.00 The Elements of Logic for Computer Science. This course introduces the fundamental elements of formal logic and its applications in computer science. The subjects covered include: propositional logic, reasoning, automatic deduction, resolution, logic circuits, predicate logic, applications in programming logic. Course credit exclusions: GL/COSC/MODR 2900 6.00.

Cross-listed to: GL/CSLA 1925 3.00, GL/ITEC 1925 3.00, GL/MATH 1925 3.00, GL/MODR 1925 3.00

GL/MATH 1925 3.00 Éléments de logique pour l'informatique. Ce cours introduit les éléments fondamentaux de la logique formelle et ses applications en informatique. Les sujets abordés incluent: la logique des propositions, raisonnements, déduction automatique, résolution, circuits logiques, la logique des prédicats, applications dans la programmation logique. Cours incompatibles : GL/COSC/MODR 2900 6.00.

AK/AS/SC/MATH 2222 3.00 Linear Algebra with Applications II.

Linear transformations and their representation by matrices, change of basis and similarity, eigenvalues and eigenvectors, diagonalization, inner product spaces, orthogonality, the Gram-Schmidt algorithm, least squares approximations, abstract vector spaces, various applications. Prerequisite: One of AK/AS/SC/MATH 1021 3.00, AS/SC/MATH 1025 3.00, AK/AS/SC/MATH 2221 3.00 or GL/MATH/MODR 2650 3.00. Course credit exclusions: AK/AS/SC/MATH 2022 3.00, GL/MATH/MODR 2660 3.00.

Cross-listed to: AK/MATH 2222 3.00, AS/MATH 2222 3.00, SC/MATH 2222 3.00

AK/AS/SC/MATH 2270 3.00 Differential Equations. Introduction to differential equations, including a discussion of the formation of mathematical models for real phenomena; solution by special techniques; applications; linear equations; solutions in series; other topics if time permits. Prerequisites: One of AS/SC/MATH 2010 3.00, AS/SC/MATH 2015 3.00 or AK/AS/SC/MATH 2310 3.00; one of AK/AS/SC/MATH 1021 3.00, AS/SC/MATH 1025 3.00, or AK/AS/SC/MATH 2221 3.00. Course credit exclusion: AS/SC/MATH 2271 3.00, GL/MATH 3400 3.00

Cross-listed to: AK/MATH 2270 3.00, AS/MATH 2270 3.00, SC/MATH 2270 3.00

AS/SC/MATH 2271 3.00 Differential Equations for Scientists and Engineers. Introduction to ordinary and partial differential equations, including their classification, boundary conditions, and methods of solution. Equations, methods, and solutions relevant to science and engineering are emphasized, and exploration is encouraged with the aid of software. Three lecture hours per week. One term. Three credits. Prerequisites: One of AS/SC/MATH 2010 3.00, AS/SC/MATH 2015 3.00, AS/SC/MATH 2310 3.00 or equivalent; one of AS/SC/MATH 1025 3.00, AS/SC/MATH 2022 3.00, AS/SC/MATH 2222 3.00 or equivalent. Course Credit Exclusions: AS/SC/MATH 2270 3.00, GL/MATH 3400 3.00

Cross-listed to: AS/MATH 2271 3.00, SC/MATH 2271 3.00

AS/SC/MATH 2280 3.00 The Mathematical Theory of Interest. Topics include measurement of interest, annuities, amortization of loans, bonds, sinking funds and depreciation. The course is at a level which will prepare students for the interest theory portion of the Society of Actuaries examinations. Prerequisite: AS/SC/MATH 1010 3.00 or AS/SC/MATH 1014 3.00 or AK/AS/SC/MATH 1310 3.00. Course credit exclusions: AK/AS/MATH 2580 6.00, AS/MATH 2581 3.00, GL/MATH 2680 6.00.

Cross-listed to: AS/MATH 2280 3.00, SC/MATH 2280 3.00

AK/AS/SC/MATH 2310 3.00 Calculus of Several Variables with Applications. Vector functions, partial derivatives, gradient, multiple integrals, line integrals, optimization, applications. Prerequisite: AS/SC/MATH 1010 3.00 or AS/SC/MATH 1014 3.00 or AK/AS/SC/MATH 1310 3.00. Students should have a knowledge of vector algebra in two and three dimensions. Course credit exclusions: AS/SC/MATH 2010 3.00, AS/SC/MATH 2015 3.00, GL/MATH/MODR 2670 3.00, GL/MATH 3200 3.00.

AS/SC/MATH 2320 3.00 Discrete Mathematical Structures. Growth of functions (O , Ω , Θ notation), complexity of algorithms; recurrence relations, divide-and-conquer, generating functions; graph theory, Euler and Hamilton paths, Dijkstra's algorithm; trees, binary search, spanning trees, Prim and Kruskal algorithms. Required course in Information Technology. Prerequisite: AK/AS/SC/MATH 1190 3.00, or AK/AS/SC/MATH 1090 3.00, or any 2000-level MATH course without second digit 5. Students who have not taken AK/AS/SC/MATH 1190 3.00 or AK/AS/SC/MATH 2090 3.00 are advised to review set theory, functions, relations and induction proofs, before the course begins. Course credit exclusion: AK/AS/SC/CSE/MATH 1019 3.00.

Cross-listed to: AS/MATH 2320 3.00, SC/MATH 2320 3.00

AK/AS/SC/MATH 2560 3.00 Elementary Statistics I. Displaying and describing distributions, normal distribution. Relationships between variables, regression and correlation. The need for design, experimental design and sampling design. Sampling distributions, bias, variability. Probability models, random variables, probability laws. Prerequisite: Ontario Grade 11 mathematics. Course credit exclusions: AK/AS/SC/

AK/AS/MATH 2580 6.00 Mathematics of Investment and Actuarial Science. Theory of interest; annuities certain; amortization and sinking funds; evaluation of bonds and other investments; depreciation, depletion and capital cost; insurance, including mortality tables, principles of life annuities, premiums and reserves. Prerequisite: One full university mathematics course. Course credit exclusions: AS/MATH 1581 3.00, AS/ SC/MATH 2280 3.00, AS/MATH 2581 3.00, GL/MATH 2680 6.00.

Cross-listed to: AK/MATH 2580 6.00, AS/MATH 2580 6.00

AS/MATH 2581 3.00 Business Mathematics II. Spreadsheets and their application to business mathematics; deepening of topics in Business Mathematics I, including continuous compound interest, perpetuities, annuities where payments vary, callable bonds, bond yield rate, capital budgeting; mortality tables, life annuities, life insurance. Prerequisites: AS/ MATH 1581 3.00; AK/AS/SC/CSE 1520 3.00 (formerly COSC) or permission of the instructor. Course credit exclusions: AS/SC/MATH 2280 3.00, AK/AS/MATH 2580 6.00, GL/MATH 2680 6.00.

AS/MATH 2590 3.00 Thinking Mathematically I. The main objectives of this course include providing opportunities for students to achieve success in thinking mathematically and to reflect on the learning and practice of mathematics. Intended primarily, but not exclusively, for Education students in the PJ and JI streams. Prerequisite: Successful completion of at least 24 credits or permission of the course director. Note: This course is not open to any student who has taken or is taking another university mathematics course unless permission of the course coordinator is obtained. NCR Note: This course may not be taken for credit by any student who has taken AS/SC/MATH 1580 3.00.

Cross-listed to: AS/MATH 2590 3.00, ED/MATH 2590 3.00

AS/MATH 2591 3.00 Thinking Mathematically II. This course continues some of the themes explored in AS/ED/MATH 2590 3.00 (formerly AS/SC/ MATH 1580). It provides additional opportunities for students to develop a positive attitude towards mathematics and to achieve success in thinking mathematically. Prerequisite: AS/ED/MATH 2590 3.00 or AS/SC/MATH 1580 3.00 or permission of the course coordinator. Course credit

exclusions: AS/SC/MATH 1590 3.00. Note: Open to any student who has passed or is taking another university mathematics course (except AS/ED/ MATH 2590 3.00 or AS/SC/MATH 1580 3.00), unless permission of the course coordinator is obtained.

GL/MATH 2630 6.00 Probability and Mathematical Statistics I.

Topics include probability spaces, conditional probability, independence, random variables and vectors, expectation and moments, moment-generating functions, classical discrete and continuous distributions, laws of large numbers, central limit theorem, introduction to sampling, sufficiency, point estimation, confidence intervals, hypothesis testing, regression and correlation. Prerequisite or corequisites: GL/MATH 1930 3.00 and GL/MATH 1940 3.00.

Cross-listed to: GL/MATH 2630 6.00, GL/MODR 2630 6.00

GL/MATH 2650 3.00 Algèbre linéaire I. Algèbre linéaire est un cours de base des mathématiques qui sert également aux étudiants en sciences sociales. Les sujets traités comprendront les vecteurs, les équations linéaires, le rang et le déterminant, avec des applications. Condition préalable : GL/MATH 1940 3.00. Cours incompatibles : AK/MATH 1021 3.00, AK/MATH 2221 3.00.

Language of Instruction: French

GL/MATH 2650 3.00 Linear Algebra I. This is a basic mathematics course as well as a very useful course for someone who wishes to do applied research in the social sciences. Among the topics considered are vectors, bases, matrices, systems of linear equations, rank and determinants. Some applications of linear algebra to various other disciplines, such as economics, are also included. Prerequisite: GL/MATH 1940 3.00 or equivalent or permission of the department. Course credit exclusions: AK/MATH 1021 3.00, AK/MATH 2221 3.00.

Cross-listed to: GL/MATH 2650 3.00, GL/MODR 2650 3.00

GL/MATH 2660 3.00 Linear Algebra II. This is a continuation of Linear Algebra I. More about vectors spaces, subspaces, linear transformations. Eigenvalues, eigenvectors, similarity, diagonalization. Positive definite quadratic forms. Inner product spaces and Gram-Schmidt orthogonalization. Prerequisite: GL/MATH 2650 3.00. Course credit exclusions: AK/MATH 2222 3.00, AK/MATH 2022 3.00.

Cross-listed to: GL/MATH 2660 3.00, GL/MODR 2660 3.00

GL/MATH 2660 3.00 Algèbre linéaire II. Ce cours est la suite du cours GL/MATH 2650 3.00. Les sujets traités comprendront les espaces vectoriels, les sous espaces, les applications linéaires, les vecteurs propres, les changements de base, la diagonalisation ainsi que les formes quadratiques positives. Condition préalable : GL/MATH 2650 3.00. Cours incompatibles : AK/MATH 2222 3.00, AK/MATH 2022 3.00.

GL/MATH 2680 6.00 Mathematics of Investment and Actuarial Science. This course is part of the Mathematics for Commerce Program. Simple and compound interest with applications to calculations of mortgage payments, yields on bonds, interest paid on instalment loans. Depreciation, capitalization, annuities and continuous interest. Mathematical theory of interest with applications to life annuities and life insurance. Prerequisite or corequisite: GL/MATH 1930 3.00 and GL/MATH 1940 3.00. Course credit exclusion: AK/MATH 2580 6.00.

Cross-listed to: GL/MATH 2680 6.00, GL/MODR 2680 6.00

AK/MATH 2720 3.00 Quantitative Methods I. An integrated approach to analyzing business problems from various functional areas. Practical business problems are analyzed using quantitative techniques including probability, statistical inference, estimation and regression as well as non-parametric approaches. Prerequisite: AK/ADMS 1000 3.00, one 12U mathematics course or equivalent. Course credit exclusion: AK/ADMS 3320 3.00 (prior to Summer 2005), AK/ECON 3470 3.00.

Cross-listed to: AK/ADMS 2320 3.00, AK/MATH 2720 3.00

AK/MATH 2730 3.00 Quantitative Methods II. This course continues with a case-oriented approach to quantitative business analysis and research methodologies. Statistical techniques, operations research techniques such as linear programming and modelling, metric and non-metric data analysis are amongst the techniques used. Prerequisite: AK/ADMS 2320 3.00 or AK/ADMS 3320 3.00 (prior to Summer 2005). Course credit exclusion: None.

Cross-listed to: AK/ADMS 3330 3.00, AK/MATH 2730 3.00

AK/MATH 2751 3.00 Operations Management. Management of operations in today's business environment usually involves mathematical and statistical modeling. This course provides a working understanding of the operations management models and techniques such as process analysis, quality management, aggregate planning, inventory control, and material requirements planning. Prerequisite: AK/ADMS 2320 3.00, AK/ADMS 3320 3.00 (prior to Summer 2005).

Cross-listed to: AK/ADMS 3351 3.00, AK/ECON 3120 3.00, AK/MATH 2751 3.00

AK/MATH 2752 3.00 Sampling Techniques and Survey Design. This course deals with different sampling techniques and their applications to management problems. Survey design, pilot surveys, use of focus groups, in-person interviews, mail surveys and polling, will also be dealt with. Prerequisite: AK/ECON 3470 3.00 or AK/ADMS 2320 3.00 or AK/ADMS 3320 3.00 (prior to Summer 2005), or, for students with equivalent preparation, permission of the coordinator. Note: This course counts as an elective in an economics major. Course credit exclusion: None.

AS/SC/MATH 3001 3.00 Real Analysis II. Numerical series, Riemann integration, Taylor polynomials, sequences and series of functions, uniform convergence, power series, introduction to metric spaces including compactness and completeness, Weierstrass Approximation Theorem. Continues MATH 2001. Proof-based, intended for Honours students in Mathematics. Prerequisites: AS/SC/MATH 1010 3.00 or both AS/SC/MATH 2001 3.00 and AS/SC/MATH 1310 3.00. Course credit exclusion: AS/SC/MATH 3210 3.00

Cross-listed to: AS/MATH 3001 3.00, SC/MATH 3001 3.00

AK/AS/SC/MATH 3010 3.00 Vector Integral Calculus. Integrability of continuous functions over suitable domains, iterated integrals and Fubini's theorem, counterexamples, change of variables, Jacobian determinants, polar and spherical coordinates, volumes, vector fields, divergence, curl, line and surface integrals, Green's and Stokes's theorems, differential forms, general Stokes's theorem. Prerequisite: AS/SC/MATH 2010 3.00, or AK/AS/SC/MATH 2310 3.00; or AS/SC/MATH 2015 3.00 and written permission of the mathematics undergraduate director (normally granted only to students proceeding in Honours programs in mathematics or in the Specialized Honours program in statistics). Prerequisite or corequisite: AK/AS/SC/MATH 2022 3.00 or AK/AS/SC/MATH 2222 3.00.

Cross-listed to: AK/MATH 3010 3.00, AS/MATH 3010 3.00, SC/MATH 3010 3.00

AK/AS/SC/MATH 3020 6.00 Algebra I. Introduction to the basic concepts of abstract algebra, with applications: groups (cyclic, symmetric, Lagrange's theorem, quotients, homomorphism theorems); rings (congruences, quotients, polynomials, integral domains, PIDs and UFDs); fields (field extensions, constructions with ruler and compass, coding theory). Prerequisite: AK/AS/SC/MATH 2022 3.00 or AK/AS/SC/MATH 2222 3.00. Course credit exclusion: GL/MATH/MODR 3650 6.00.

Cross-listed to: AK/MATH 3020 6.00, AS/MATH 3020 6.00, SC/MATH 3020 6.00

AK/AS/SC/MATH 3033 3.00 Classical Regression Analysis. General linear model. Properties and geometry of least-squares estimation. General linear hypothesis, confidence regions and intervals. Multicollinearity. Relationship between ANOVA models and linear models. Residual analysis, outliers, partial and added variable plots. Prerequisites: AK/AS/SC/MATH 2131 3.00 or permission of the course coordinator; AK/AS/SC/MATH 2022 3.00 or AK/AS/SC/MATH 2222 3.00. Course credit exclusions: AK/AS/SC/MATH 3330 3.00, AS/SC/GEOG 3421 3.00, AK/AS/SC/PSYC 3030 6.00.

Cross-listed to: AK/MATH 3033 3.00, AS/MATH 3033 3.00, SC/MATH 3033 3.00

AK/AS/SC/MATH 3034 3.00 Applied Categorical Data Analysis. Regression using categorical explanatory variables, one-way and two-way analysis of variance. Categorical response data, two-way and three-way contingency tables, odds ratios, tests of independence, partial association. Generalized linear models. Logistic regression. Loglinear models for contingency tables. Prerequisite: AS/SC/MATH 3033 3.00 or AK/AS/SC/MATH 3330 3.00. Note: Computer/Internet use may be required to facilitate course work.

Cross-listed to: AK/MATH 3034 3.00, AS/MATH 3034 3.00, SC/MATH 3034 3.00

AK/AS/SC/MATH 3050 6.00 Introduction to Geometries. Analytic geometry over a field with vector and barycentric coordinate methods, affine and projective transformations, inversive geometry, foundations of Euclidean and non-Euclidean geometry, applications throughout to Euclidean geometry. Prerequisite: AK/AS/SC/MATH 2022 3.00 or AK/AS/SC/MATH 2222 3.00 or permission of the course coordinator.

Cross-listed to: AK/MATH 3050 6.00, AS/MATH 3050 6.00, SC/MATH 3050 6.00

AK/AS/SC/MATH 3090 3.00 Computational Mathematics. Modelling (discrete and continuous, deterministic and stochastic) and practical solutions to general categories of applied problems. Case studies of solutions through modelling and representation of data. Implementation, numerical considerations, efficiency, and application of numerical algorithms. Three lecture hours per week. Prerequisites: AK/AS/SC/CSE 2031 3.00 or AK/AS/SC/CSE 1540 3.00 (formerly COSC), AK/AS/SC/MATH 2022 3.00, AK/AS/SC/MATH 2030 3.00, AK/AS/SC/MATH 2041 3.00.

AK/AS/SC/MATH 3131 3.00 Mathematical Statistics I. Topics include common density functions, probability functions, principle of likelihood, the likelihood function, the method of maximum likelihood, likelihood regions, tests of hypotheses, likelihood ratio tests, goodness of fit tests, conditional tests and confidence sets with a view towards applications. Prerequisite: AK/AS/SC/MATH 2131 3.00 or permission of the course coordinator.

Cross-listed to: AK/MATH 3131 3.00, AS/MATH 3131 3.00, SC/MATH 3131 3.00

AK/AS/SC/MATH 3132 3.00 Mathematical Statistics II. Important examples and methods of statistical estimation and hypothesis testing are discussed in terms of their mathematical and statistical properties. Topics include sufficiency, Bayesian statistics, decision theory, most powerful tests, likelihood ratio tests. Prerequisite: AK/AS/SC/MATH 3131 3.00.

Cross-listed to: AK/MATH 3132 3.00, AS/MATH 3132 3.00, SC/MATH 3132 3.00

AK/AS/SC/MATH 3140 6.00 Number Theory and Theory of Equations. A study of topics in number theory and theory of equations using relevant methods and concepts from modern algebra, such as Abelian groups, unique factorization domains and field extensions. Prerequisite: AK/AS/SC/MATH 2022 3.00 or AK/AS/SC/MATH 2222 3.00 or permission of the course coordinator.

Cross-listed to: AK/MATH 3140 6.00, AS/MATH 3140 6.00, SC/MATH 3140 6.00

AK/AS/SC/MATH 3170 6.00 Operations Research I. A study of linear programming; transportation problems, including network flows, assignment problems and critical path analysis; integer programming; dynamic programming and an introduction to stochastic models. Application to a set of problems representative of the field of operations research. Prerequisites: AK/AS/SC/MATH 1021 3.00 or AS/SC/MATH 1025 3.00 or AK/AS/SC/MATH 2221 3.00; one of AK/AS/SC/CSE 1520 3.00, AK/AS/SC/CSE 1540 3.00 or AK/AS/SC/CSE 1020 3.00 (formerly COSC) or equivalent. AK/AS/SC/MATH 3210 3.00 Principles of Mathematical Analysis. Rigorous presentation, with proofs, of fundamental concepts of analysis: limits, continuity, differentiation, integration, fundamental theorem, power series, uniform convergence. Prerequisite: At least one of the following four courses or course combinations: 1) AS/SC/MATH 2010 3.00, 2) AK/AS/SC/MATH 3110 3.00, 3) AK/AS/SC/MATH 2310 3.00 and AS/SC/MATH 1010 3.00, 4) AS/SC/MATH 2015 3.00 and AS/SC/MATH 1010 3.00. Course credit exclusion: GL/MATH 3320 3.00.

Cross-listed to: AK/MATH 3210 3.00, AS/MATH 3210 3.00, SC/MATH 3210 3.00

AS/SC/MATH 3241 3.00 Numerical Methods I. An introductory course in computational linear algebra. Topics include simple error analysis, linear systems of equations, non-linear equations, linear least squares and interpolation. Prerequisites: One of AS/SC/MATH 1010 3.00, AS/SC/MATH 1014 3.00, AK/AS/SC/MATH 1310 3.00; one of AK/AS/SC/MATH 1021 3.00, AS/SC/MATH 1025 3.00, AK/AS/SC/MATH 2221 3.00; one of AK/AS/SC/CSE 1540 3.00, AK/AS/SC/CSE 2031 3.00 (formerly COSC), or SC/CSE 2501 1.00. Course credit exclusion: AK/AS/SC/COSC 3121 3.00.

Cross-listed to: AK/CSE 3121 3.00, AS/CSE 3121 3.00, AS/MATH 3241 3.00, SC/CSE 3121 3.00, SC/MATH 3241 3.00

AS/SC/MATH 3242 3.00 Numerical Methods II. Algorithms and computer methods for solving problems of differentiation, integration, systems of non-linear equations and matrix eigenvalues. Prerequisite: AS/SC/MATH 3241 3.00 or AK/AS/SC/CSE 3121 3.00 or AK/AS/SC/COSC 3121 3.00. Course credit exclusion: AK/AS/SC/COSC 3122 3.00.

Cross-listed to: AK/CSE 3122 3.00, AS/CSE 3122 3.00, AS/MATH 3242 3.00, SC/CSE 3122 3.00, SC/MATH 3242 3.00

AK/AS/SC/MATH 3260 3.00 Introduction to Graph Theory. Introductory graph theory with applications. Graphs, digraphs. Eulerian and Hamiltonian graphs. The travelling salesman. Path algorithms; connectivity; trees; planarity; colourings; scheduling; minimal cost networks. Tree searches and sortings, minimal connectors and applications from physical and biological sciences. Prerequisite: At least six credits from 2000-level mathematics courses without second digit 5.

Cross-listed to: AK/MATH 3260 3.00, AS/MATH 3260 3.00, SC/MATH 3260 3.00

AS/SC/MATH 3271 3.00 Partial Differential Equations. Partial differential equations of mathematical physics and their solutions in various coordinates, separation of variables in Cartesian coordinates, application of boundary conditions; Fourier series and eigenfunction expansions; generalized curvilinear coordinates; separation of variables in spherical and polar coordinates. Prerequisites: AK/AS/SC/MATH 2270 3.00; AS/SC/MATH 2010 3.00 or AS/SC/MATH 2015 3.00 or AK/AS/SC/MATH 2310 3.00; AK/AS/SC/MATH 3010 3.00 is also desirable, though not essential, as prerequisite for students presenting AS/SC/MATH 2010 3.00 or AK/AS/SC/MATH 2310 3.00.

Cross-listed to: AS/MATH 3271 3.00, SC/MATH 3271 3.00

AS/SC/MATH 3280 6.00 Actuarial Mathematics. Deterministic and stochastic models for contingent payments. Topics include survival distributions, life tables, premiums and reserves for life insurance and annuities, multiple life contracts, multiple decrement theory. Prerequisite: AS/SC/MATH 2280 3.00. Prerequisite or corequisite: AK/AS/SC/MATH 2131 3.00.

Cross-listed to: AS/MATH 3280 6.00, SC/MATH 3280 6.00

GL/MATH 3300 3.00 Introductory Topology I. This course is an introduction to modern topology, including the topology of \mathbb{R}^n and compact spaces. Prerequisite: GL/MATH 2670 6.00.

GL/MATH 3300 3.00 Introduction à la topologie I. Ce cours est une introduction à la topologie moderne, y compris la topologie de \mathbb{R}^n et les espaces compacts. Condition préalable : GL/MATH 2670 6.00.

Language of Instruction: French

GL/MATH 3301 3.00 Introduction à la topologie II. Ce cours est la suite du cours Introduction à la topologie moderne I. Cet enseignement porte sur les espaces métriques, la topologie des surfaces, l'homotopie des chemins et le groupe fondamental. Condition préalable : GL/MATH 2670 6.00 et GL/MATH 3300 3.00.

Language of Instruction: French

GL/MATH 3301 3.00 Introductory Topology II. This course is the continuation of Introduction to Topology I. It will cover metric spaces, the topology of surfaces, homotopy of paths and the fundamental group. Prerequisite: GL/MATH 2670 6.00 and GL/MATH 3300 3.00.

GL/MATH 3320 3.00 Principles of Mathematical Analysis. The fundamental ideas of analysis that are employed in the calculus sequence are presented rigorously and with proofs. Topics include the axiom for \mathbb{R} , the topology of \mathbb{R} , uniform continuity sequences and series. Prerequisite: GL/MATH 2670 6.00. Course equivalency: Faculty: Arts, Atkinson; Course number: MATH 3210 3.00. Course credit exclusions: AK/MATH 3110 3.00, AK/MATH 3210 3.00.

AK/AS/SC/MATH 3330 3.00 Regression Analysis. Simple regression analysis, multiple regression analysis, matrix form of the multiple regression model, estimation, tests (t- and F-tests), multicollinearity and other problems encountered in regression, diagnostics, model building and variable selection, remedies for violations of regression assumptions. Prerequisites: One of AK/AS/SC/MATH 2131 3.00, AK/AS/SC/MATH 2570 3.00, AS/SC/PSYC 2020 6.00, or equivalent; some acquaintance with matrix algebra (such as is provided in AK/AS/SC/MATH 1021 3.00, AS/SC/MATH 1025 3.00, AS/SC/MATH 1505 6.00, AK/AS/MATH 1550 6.00, or AK/AS/SC/MATH 2221 3.00). Course credit exclusions: AS/SC/MATH 3033 3.00, AS/ECON 4210 3.00, AS/SC/PSYC 3030 6.00.

Cross-listed to: AK/MATH 3330 3.00, AS/MATH 3330 3.00, SC/MATH 3330 3.00

GL/MATH 3400 3.00 Differential Equations. This is an introduction to differential equations, including a discussion of the formulation of mathematical models for real phenomena; solution techniques; linear equations, applications; solution in series; other topics if time permits. Prerequisite: GL/MATH 2670 6.00 or permission of the department. Course credit exclusion: GL/MATH 3400 6.00.

GL/MATH 3400 3.00 Equations différentielles I. Equations différentielles; formulation des modèles mathématiques appliqués à des phénomènes divers du monde réel; solutions par des méthodes spéciales; des équations linéaires. Condition préalable : GL/MATH 2670 6.00. Cours incompatible : GL/MATH 3400 6.00(FR). Équivalence de cours : Faculté : Arts et Atkinson - MATH 2270 3.00.

Language of Instruction: French

AK/AS/SC/MATH 3410 3.00 Complex Variables. Analytic functions, the Cauchy-Riemann equations, complex integrals, the Cauchy integral theorem, maximum modulus theorem. Calculations of residues and applications to definite integrals, two-dimensional potential problems and conformal mappings. Prerequisite: AS/SC/MATH 2010 3.00 or AS/SC/MATH 2015 3.00 or AK/AS/SC/MATH 2310 3.00. (AK/AS/SC/MATH 3010 3.00 is also recommended as a prerequisite for students who have taken AS/SC/MATH 2010 3.00.)

Cross-listed to: AK/MATH 3410 3.00, AS/MATH 3410 3.00, SC/MATH 3410 3.00

AK/AS/SC/MATH 3430 3.00 Sample Survey Design. Principal steps in planning and conducting a sample survey. Sampling techniques including simple random sampling, stratified random sampling, cluster sampling and sampling with probabilities proportional to size. Estimation techniques including difference, ratio and regression estimation. Prerequisite: AK/AS/SC/MATH 2131 3.00 or AK/AS/SC/MATH 3330 3.00.

Cross-listed to: AK/MATH 3430 3.00, AS/MATH 3430 3.00, SC/MATH 3430 3.00

AS/SC/MATH 3450 3.00 Introduction to Differential Geometry. Curves and surfaces in 3-space, tangent vectors, normal vectors, curvature, introduction to topology and to manifolds. Prerequisites: AK/AS/SC/MATH 3010 3.00; AK/AS/SC/MATH 2022 3.00 or AK/AS/SC/MATH 2222 3.00; or permission of the course coordinator. Course credit exclusion: AK/AS/SC/MATH 4250 6.00.

Cross-listed to: AS/MATH 3450 3.00, SC/MATH 3450 3.00

AK/AS/MATH 3500 6.00 Mathematics in the History of Culture. An introduction to the history of mathematical ideas from antiquity to the present, with emphasis on the role of these ideas in other areas of culture such as philosophy, science and the arts. Prerequisite: Six credits in university-level mathematics (other than AS/SC/MATH 1500 3.00, AS/SC/MATH 1510 6.00 or AS/SC/MATH 1515 3.00) is strongly recommended.

Cross-listed to: AK/MATH 3500 6.00, AS/MATH 3500 6.00

GL/MATH 3510 3.00 Modern Algebra I. This course is an introduction to group theory and abstract algebraic structures, with applications to number theory and to symmetry groups of geometrical objects in the plane and in space. Prerequisite: GL/MATH 2660 3.00. Course credit exclusion: GL/MATH 3650 6.00 (Modern Algebra), AK/AS/SC/MATH 3020 6.00 (Algebra I).

GL/MATH 3515 3.00 Modern Algebra II. This course is a continuation of Modern Algebra I, and it also is an introduction to ring theory and to field theory. Included here are the topics of polynomial rings, field extensions, and factorization theory for polynomials. Prerequisite: GL/MATH 3510 3.00. Course credit exclusion: GL/MATH 3650 6.00 (Modern Algebra), AK/AS/SC/MATH 3020 6.00 (Algebra I).

GL/MATH 3660 6.00 Operations Research. Linear Programming, duality theory with applications. The transportation algorithm with applications to the assignment and shortest route problems. Dynamic Programming and Non-Linear Programming including quadratic and convex programming. Prerequisite: GL/MATH 2650 3.00. Course credit exclusion: AK/MATH 3170 6.00.

Cross-listed to: GL/MATH 3660 6.00, GL/MODR 3660 6.00

GL/MATH 3660 6.00 Recherche opérationnelle. Le cours explore la programmation linéaire. On y étudie la méthode du simplexe et la théorie de la dualité ainsi que l'algorithme de la transportation avec applications aux problèmes des réseaux, du partage et de l'itinéraire le plus court. On se penche, enfin, sur les problèmes de l'arbre engendrant minimal et du flux maximal. Condition préalable : GL/MATH 2650 3.00. Cours incompatible : AK/MATH 3170 6.00.

AS/SC/MATH 4001 6.00 Real Analysis III. Complex-valued functions of a real variable, topology of metric spaces, Stone's Theorem, Inverse and Implicit Function Theorems, Lebesgue measure on the real line, Lebesgue integration, introduction to Hilbert Space, Fourier series, Fourier transform. Intended for Honours Mathematics students. Prerequisites: AS/SC/MATH 3210 3.00 or both AS/SC/MATH 3001 3.00 and AS/SC/MATH 2310 3.00. Course credit exclusion: AS/SC/MATH 4010 6.00

Cross-listed to: AS/MATH 4001 6.00, SC/MATH 4001 6.00

AK/AS/SC/MATH 4010 6.00 Real Analysis. Survey of the real and complex number systems, and inequalities. Metric space topology. The Riemann-Stieltjes integral. Some topics of advanced calculus, including

more advanced theory of series and interchange of limit processes. Lebesgue measure and integration. Fourier series and Fourier integrals. Prerequisite: AK/AS/SC/MATH 3210 3.00 or permission of the course coordinator. Course credit exclusion: GL/MATH 4240 6.00.

Cross-listed to: AK/MATH 4010 6.00, AS/MATH 4010 6.00, SC/MATH 4010 6.00

AK/AS/SC/MATH 4020 6.00 Algebra II. Continuation of Algebra I, with applications: groups (finitely generated Abelian groups, solvable groups, simplicity of alternating groups, group actions, Sylow's theorems, generators and relations); fields (splitting fields, finite fields, Galois theory, solvability of equations); additional topics (lattices, Boolean algebras, modules). Prerequisite: AK/AS/SC/MATH 3020 6.00 or permission of the course coordinator. Course credit exclusion: AS/SC/MATH 4241 3.00.

Cross-listed to: AK/MATH 4020 6.00, AS/MATH 4020 6.00, SC/MATH 4020 6.00

AS/SC/MATH 4033 3.00 Applications of Mixed Models. Theory and applications of mixed models and extensions: theoretical formulation, hierarchical models, generalized least-squares, empirical Bayes, shrinkage estimators, fitting algorithms, unbalanced nested structures, longitudinal analysis, non-linear models, categorical dependent variables. Prerequisites: AK/AS/SC/MATH 3033 3.00 or AK/AS/SC/MATH 3330 3.00 or permission of the course director. Note: SAS and Splus computing environments will be used to facilitate course work.

Cross-listed to: AS/MATH 4033 3.00, SC/MATH 4033 3.00

AS/SC/MATH 4034 3.00 Data Mining. This course will review some of the principal methods used for data mining, with the goal of placing them in common perspective and providing a unifying overview. Prerequisites: AK/AS/SC/MATH 3034 3.00 and AK/AS/SC/MATH 3430 3.00 or permission of the course director. Integrated with: GS/MATH 6636 3.00. Corequisites: AK/AS/SC/MATH 4630 3.00 or AK/AS/SC/MATH 4730 3.00 or AK/AS/SC/MATH 4230 3.00. Note: SAS and Splus computing environments will be used to facilitate course work.

Cross-listed to: AS/MATH 4034 3.00, SC/MATH 4034 3.00

AK/MATH 4035 3.00 Data Analysis Systems. Introduces Windows-based data processing software and provides overview of computing concepts and data processing using SAS, SPSS and STATA. Covers such statistics techniques as data visualization and summary, analysis of contingency tables, linear and logistic regressions, and nonparametric methods. Elective course for: BAS ITEC and BAS HURE. Prerequisite: AK/ADMS 2320 3.00 or AK/ADMS 3320 3.00 (prior to Summer 2005). Course credit exclusion: None.

Cross-listed to: AK/ADMS 4370 3.00, AK/MATH 4035 3.00

AK/AS/SC/MATH 4080 6.00 Topology. Topological spaces, continuity, connectedness, compactness, nets, filters, metrization theorems, complete metric spaces, function spaces, fundamental group, covering spaces. Prerequisite: AK/AS/SC/MATH 3210 3.00 or permission of the course coordinator.

Cross-listed to: AK/MATH 4080 6.00, AS/MATH 4080 6.00, SC/MATH 4080 6.00

AK/AS/SC/MATH 4090 3.00 Mathematical Modelling. Discrete, continuous and probabilistic modelling of problems from industry, finance and the life and physical sciences. The ability to model complex problems is stressed. Three lecture hours. One term. Three credits. Note: Registration required in an Honours Program in Mathematics and Statistics, and the completion of all specified core courses in that program.

Cross-listed to: AK/MATH 4090 3.00, AS/MATH 4090 3.00, SC/MATH 4090 3.00

GL/MATH 4100 6.00 Differential Equations. Students will work independently on a project under the supervision of a Course Director with the approval of the Chair of the Department.

AS/SC/MATH 4100A 3.00 Topics in Mathematics Education: Theory and Practice. This course provides opportunities for students to examine topics in mathematics, and themes in mathematics education. The main focus will be on developing students' ability to unpack and communicate

concepts in mathematics, and to think critically about what mathematicians do and what students do when they are learning mathematics. Prerequisites: A minimum of 21 credits in MATH courses without second digit "5"; permission of the course coordinator.

Cross-listed to: AS/MATH 4100A3.00, SC/MATH 4100A3.00

AK/AS/SC/MATH 4130 3.00 Topics in Probability and Statistics. One or two topics which may be chosen from the following: statistical decision theory, statistical inference, sequential analysis, information theory, large sample theory, design of experiments, stochastic processes, time series. Note: Permission of the course coordinator is required.

Cross-listed to: AK/MATH 4130 3.00, AS/MATH 4130 3.00, SC/MATH 4130 3.00

AK/AS/SC/MATH 4130D 3.00 Topics in Probability and Statistics: Methods of Statistical Analysis. A survey of the theoretical basis and methods for analyzing data with emphasis on the application of the methods. Prerequisite: AK/AS/SC/MATH 3132 3.00.

Cross-listed to: AK/MATH 4130D3.00, AS/MATH 4130D3.00, SC/MATH 4130D3.00

AK/AS/SC/MATH 4130E 3.00 Topics in Probability and Statistics: Bayesian Statistics. The course first presents the Bayesian approach to single- and multi-parameter statistical problems and its links to major concepts of non-Bayesian statistics. The course then studies some hierarchical models and regression models using a Bayesian approach with theory and examples. Integrated with: GS/MATH 6639B 3.00. Note: Permission of the course coordinator is required.

Cross-listed to: AK/MATH 4130E3.00, AS/MATH 4130E3.00, SC/MATH 4130E3.00

AK/AS/SC/MATH 4130G 3.00 Topics in Probability and Statistics: Applied Categorical Data Analysis. This course demonstrates the use of categorical data analysis techniques within the context of epidemiology, bioassay and survival analysis. The emphasis is on the analysis and interpretation of real world data sets using the SAS statistical software package. Prerequisite: AK/AS/SC/MATH 3330 3.00 or AS/SC/MATH 3033 3.00. Prerequisite or corequisite: AK/AS/SC/MATH 3430 3.00.

Cross-listed to: AK/MATH 4130G3.00, AS/MATH 4130G3.00, SC/MATH 4130G3.00

AS/SC/MATH 4141 3.00 Advanced Numerical Methods. Numerical methods for solving ordinary differential equations; optimization problems: steepest descents, conjugate gradient methods; approximation theory: least squares, orthogonal polynomials, Chebyshev and Fourier approximation, Padé approximation. Integrated with: GS/MATH 6651 3.00, GS/PHYS 5070A 3.00. Prerequisite: AK/AS/SC/MATH 2270 3.00; AS/SC/MATH 3242 3.00 or AK/AS/SC/CSE 3122 3.00, or AK/AS/SC/COSC 3122 3.00.

Cross-listed to: AS/MATH 4141 3.00, SC/MATH 4141 3.00

AK/AS/SC/MATH 4143 3.00 Scientific Computation for Finance Applications. This course covers the basics numerical analysis/computational methods related to portfolio optimization, risk management and option pricing. It provides background material for computations in finance for two streams in the Computational Mathematics program and other interested students. Prerequisites: One of AK/AS/SC/MATH 2015 3.00 or AK/AS/SC/MATH 2310 3.00; AK/AS/SC/MATH 1131 3.00; AK/AS/SC/MATH 2030 3.00; One of AK/AS/SC/CSE 1530 3.00, AK/AS/SC/CSE 1540 3.00 (formerly COSC) or AK/AS/SC/MATH 2041 3.00.

Cross-listed to: AK/MATH 4143 3.00, AS/MATH 4143 3.00, SC/MATH 4143 3.00

AK/AS/SC/MATH 4160 3.00 Combinatorial Mathematics. Topics from algebra of sets, permutations, combinations, occupancy problems, partitions of integers, generating functions, combinatorial identities, recurrence relations, inclusion-exclusion principle, Polya's theory of counting, permanents, systems of distinct representatives, Latin rectangles, block designs, finite projective planes, Steiner triple systems. Prerequisites: AK/AS/SC/MATH 2022 3.00 or AK/AS/SC/MATH 2222 3.00; six credits from 3000-level mathematics courses without second digit 5; or permission of the course coordinator.

Cross-listed to: AK/MATH 4160 3.00, AS/MATH 4160 3.00, SC/MATH 4160 3.00

AK/AS/SC/MATH 4161 3.00 Mathematics of Cryptography. Probability, information theory and number theory and applications to cryptography. Classical codes such as Caesar shift, Vigenere, ADFGVX, rectangular substitution, and others. Other topics: comma free codes, perfect secrecy, index of coincidence, public key systems, primality testing and factorization algorithms. Prerequisites: At least 12 credits from 2000-level (or higher) MATH courses (without second digit 5, or second digit 7

in the case of Atkinson); or AK/AS/SC/CSE 3101 3.00 or AK/AS/SC/COSC 3101 3.00; or permission of the instructor.

AS/SC/MATH 4170 6.00 Operations Research II. Selected topics from game theory, decision theory, simulation, reliability theory, queuing theory, non-linear programming, classification, pattern-recognition and prediction. Each chapter contains an optimization problem and methods and algorithms for solving it. The course is rich in examples. Integrated with: GS/MATH 6900 3.00, GS/MATH 6901 3.00. Prerequisites: AS/SC/MATH 2010 3.00 or AS/SC/MATH 2015 3.00 or AK/AS/SC/MATH 2310 3.00; AK/AS/SC/MATH 2030 3.00; AK/AS/SC/MATH 3170 6.00; or permission of the course coordinator. Course credit exclusion: AS/MATH 4570 6.00.

Cross-listed to: AS/MATH 4170 6.00, SC/MATH 4170 6.00

AK/AS/SC/MATH 4210 3.00 Complex Analysis. Rigorous development of the basic results, including the complex derivative, contour integrals, Cauchy integral formulas, Taylor and Laurent series representations of analytic functions, calculus of residues, maximum modulus theorem, Rouché's theorem, open mapping theorem. More advanced topics if time permits. Prerequisite: AK/AS/SC/MATH 3210 3.00. Course credit exclusion: GL/MATH 4230 3.00.

Cross-listed to: AK/MATH 4210 3.00, AS/MATH 4210 3.00, SC/MATH 4210 3.00

AK/AS/SC/MATH 4230 3.00 Non-Parametric Methods in Statistics. Order statistics; general rank statistics; one-sample, two-sample and k-sample problems; Kolmogorov-Smirnov statistics; tests of independence and relative efficiencies. Integrated with: GS/MATH 6634 3.00. Prerequisite: AK/AS/SC/MATH 3131 3.00; AK/AS/SC/MATH 3132 3.00 is recommended but not required.

Cross-listed to: AK/MATH 4230 3.00, AS/MATH 4230 3.00, SC/MATH 4230 3.00

GL/MATH 4230 6.00 Analyse Complexe. La topologie du plan complexe. Introduction aux fonctions holomorphes; applications conformes et applications linéaires fractionnelles. L'intégration complexe, la formule intégrale de Cauchy. La théorie des résidus. Les propriétés locales des fonctions holomorphes; les fonctions harmoniques. Prolongement analytique; le théorème de Riemann. Condition préalable : GL/MATH 1930 3.00 et GL/MATH 1940 3.00; GL/MATH 2670 6.00 ou la permission du département. Cours incompatible : AK/MATH 3410 3.00.

AS/SC/MATH 4231 3.00 Robust Statistics. This course provides students with an introduction to robust statistics. Basic robustness concepts and robust estimators will be covered. Prerequisites: AK/AS/SC/MATH 3131 3.00, either AK/AS/SC/MATH 3033 3.00 or AK/AS/SC/MATH 3303 3.00 or permission of the course director. Note: SAS and Splus computing environments will be used to facilitate course work.

Cross-listed to: AS/MATH 4231 3.00, SC/MATH 4231 3.00

GL/MATH 4240 6.00 Analyse réelle. Ce cours est une étude rigoureuse de l'analyse réelle. Parmi les sujets traités figureront: les notions de base de topologie; limite et continuité, fonctions à variations bornées, l'intégrale de Riemann-Stieltjes, les suites et séries de fonctions, l'intégrale de Lebesgue; et éventuellement des séries de Fourier. Condition préalable : GL/MATH 2670 6.00 ou la permission du département. Cours incompatible : AK/MATH 4010 6.00.

Language of Instruction: French

AS/SC/MATH 4241 3.00 Applied Group Theory. Introduction to group theory and its applications in the physical sciences. Finite groups. Compact Lie groups. Representation theory, tensor representations of classical Lie groups, classification of semi-simple Lie groups. Integrated with: GS/PHYS 6060A 3.00. Prerequisites: AS/SC/MATH 2015 3.00; AK/AS/SC/MATH 2022 3.00 or AK/AS/SC/MATH 2222 3.00; AK/AS/SC/MATH 2270 3.00. Course credit exclusion: AK/AS/SC/MATH 4020 6.00.

AK/MATH 4260 3.00 Directed Reading. This course involves reading a standard book or recently published papers under supervision of a faculty member. May require preparation of a paper on the chosen topic. Students should contact the program Chair by April for the following fall/winter term. Prerequisite: 48 mathematics credits with an average grade of B, or, for students with equivalent preparation, permission of the Chair of mathematics. Note 1: Students must be accepted by a faculty supervisor before they can register in 4000-level directed reading courses. The course transaction form for such courses must be submitted with a note from the supervisor stating his/her willingness to perform this task. Permission of the program Chair is also required. Note 2: For either the bachelor or the Honours degree, no student may include more than one full reading course or equivalent in the program of study. Course credit exclusion: None.

AS/SC/MATH 4270 3.00 Integral Transforms and Equations. This course studies the Laplace, Fourier, Hankel and Mellin transforms; the solution of integral equations; and the treatment of asymptotic expansions. The applications are to problems in circuit theory, heat flow, elasticity, transport theory and scattering theory. Prerequisites: AK/AS/SC/MATH 2270 3.00; AK/AS/SC/MATH 3410 3.00. Prerequisite or corequisite: AS/SC/MATH 3271 3.00.

Cross-listed to: AS/MATH 4270 3.00, SC/MATH 4270 3.00

AK/AS/SC/MATH 4271 3.00 Dynamical Systems. Iterations of maps and differential equations; phase portraits, flows; fixed points, periodic solutions and homoclinic orbits; stability, attraction, repulsion; Poincaré maps, transition to chaos. Applications: logistic maps, interacting populations, reaction kinetics, forced Van der Pol, damped Duffing and Lorenz equations. Prerequisites: AK/AS/SC/MATH 2270 3.00; AK/AS/SC/MATH 1021 3.00 or AK/AS/SC/MATH 2221 3.00 or AS/SC/MATH 1025 3.00.

Cross-listed to: AK/MATH 4271 3.00, AS/MATH 4271 3.00, SC/MATH 4271 3.00

AS/SC/MATH 4280 3.00 Risk Theory. Frequency and severity models in insurance, compound distributions, compound Poisson processes, ruin theory, non-proportional reinsurance, related topics in loss models and stochastic processes. Prerequisite: AK/AS/SC/MATH 2131 3.00.

Cross-listed to: AS/MATH 4280 3.00, SC/MATH 4280 3.00

AS/SC/MATH 4300 3.00 Directed Readings. A student may arrange to do independent study with a member of the Mathematics and Statistics Department. Such an arrangement must have prior approval of the department Chair. One term. Three credits. Note: Faculty of Arts students should see the Faculty of Arts section of the Undergraduate Programs Calendar for regulations governing independent reading courses.

Cross-listed to: AS/MATH 4300 3.00, SC/MATH 4300 3.00

Such an arrangement must have prior approval of the department Chair. Two terms. Six credits. Note: Faculty of Arts students should see the Faculty of Arts section of the Undergraduate Programs Calendar for regulations governing independent reading courses.

Cross-listed to: AS/MATH 4300 6.00, SC/MATH 4300 6.00

AS/SC/MATH 4400 6.00 The History of Mathematics. Selected topics in the history of mathematics, discussed in full technical detail but with stress on the underlying ideas, their evolution and their context. Note: 36 credits required from mathematics courses without second digit 5, including at least 12 credits at or above the 3000 level. (12 of the 36 credits may be taken as corequisites.)

Cross-listed to: AS/MATH 4400 6.00, SC/MATH 4400 6.00

AK/AS/SC/MATH 4430 3.00 Stochastic Processes. Basic Markov processes, including Markov chains, Poisson processes, birth-and-death processes, Brownian motion. Prerequisite: AK/AS/SC/MATH 2030 3.00. Corequisite: A mathematics course at the 3000 level or higher, without second digit 5. Integrated with: GS/MATH 6602 3.00.

Cross-listed to: AK/MATH 4430 3.00, AS/MATH 4430 3.00, SC/MATH 4430 3.00

AK/AS/SC/MATH 4431 3.00 Probability Models. This course introduces the theory and applications of several kinds of probabilistic models, including renewal theory, branching processes and martingales. Additional topics may include stationary processes, large deviations or models from the sciences. Integrated with: GS/MATH 6604 3.00. Prerequisite: AK/AS/SC/MATH 2030 3.00. Corequisite: A mathematics course at the 3000 level or higher, without second digit 5.

Cross-listed to: AK/MATH 4431 3.00, AS/MATH 4431 3.00, SC/MATH 4431 3.00

AS/SC/MATH 4470 3.00 Gas and Fluid Dynamics. Fundamental laws; conservation of mass, momentum and energy; vortex motion; incompressible, compressible and viscous flows; turbulent flow; surface waves. Prerequisites: SC/PHYS 2010 3.00 or SC/EATS 2470 3.00; AS/SC/MATH 2015 3.00; AS/SC/MATH 2271 3.00.

Cross-listed to: AS/MATH 4470 3.00, SC/MATH 4470 3.00, SC/PHYS 4120 3.00

AS/MATH 4570 6.00 Applied Optimization. Topics chosen from decision theory, game theory, inventory control, Markov chains, dynamic programming, queuing theory, reliability theory, simulation, non-linear programming. Prerequisites: AK/AS/MATH 1550 6.00 and AK/AS/SC/MATH 2560 3.00 and AK/AS/SC/MATH 3170 6.00. Course credit exclusion: AS/SC/MATH 4170 6.00.

SC/MATH 4585 3.00 Quantitative Methods in Biology. Practical applications of advanced statistics used in biological research, including analysis of variance, regression, and multivariate statistics. Three lecture hours, three laboratory hours every other week. One term. Three credits. Prerequisites: SC/BIOL 2060 3.00, or equivalent with permission of the instructor. Course credit exclusion: AK/MATH 2730 3.00; AK/AS/SC/PSYC 3030 6.00; AS/POL 3300 6.00. NCR Note: Not open to any student who has taken or is taking AK/AS/SC/MATH 2131 3.00 or any other MATH course with a third digit 3 at the 3000 level or higher. Not open to any student who has taken or is taking AK/ADMS 3330 3.00.

Cross-listed to: SC/BIOL 4085 3.00, SC/MATH 4585 3.00

AK/AS/SC/MATH 4630 3.00 Applied Multivariate Statistical Analysis. The course covers the basic theory of the multivariate normal distribution and its application to multivariate inference about a single mean, comparison of several means and multivariate linear regression. As time and interest permit, further related topics may also be covered. Prerequisites: AK/AS/SC/MATH 3131 3.00; AS/SC/MATH 3033 3.00 or AK/AS/SC/MATH 3330 3.00; AK/AS/SC/MATH 2022 3.00 or AK/AS/SC/MATH 2222 3.00. Integrated with: GS/MATH 6632 3.00.

Cross-listed to: AK/MATH 4630 3.00, AS/MATH 4630 3.00, SC/MATH 4630 3.00

AK/AS/SC/MATH 4730 3.00 Experimental Design. An examination of the statistical issues involved in ensuring that an experiment yields relevant information. Topics include randomized block, factorial, fractional factorial, nested, Latin square and related designs. Further topics as time permits. The emphasis is on applications. Prerequisite: AS/SC/MATH 3033 3.00, or AK/AS/SC/MATH 3330 3.00, or permission of the course coordinator.

Cross-listed to: AK/MATH 4730 3.00, AS/MATH 4730 3.00, SC/MATH 4730 3.00

AK/AS/SC/MATH 4731 3.00 Sampling: Design and Analysis. Topics include: sampling weights and design effects in complex surveys; imputation and weighting methods for nonresponse; variance estimation in complex surveys; effects of complex sampling design on categorical data analysis and on regression analysis. Prerequisites: AS/SC/AK/MATH 3430 3.00 or permission of the course director. Note: SAS and Splus computing environments will be used to facilitate course work.

Cross-listed to: AK/MATH 4731 3.00, AS/MATH 4731 3.00, SC/MATH 4731 3.00

AS/SC/MATH 4830 3.00 Time Series and Spectral Analysis. Treatment of discrete sampled data involving correlation, convolution, spectral density estimation, frequency, domain filtering, and Fast Fourier Transforms. Three lecture hours. One term. Three credits. Integrated with: GS/ESS 5020 3.00. Prerequisites: AK/AS/SC/CSE 1540 3.00 or equivalent programming experience; AS/SC/MATH 2015 3.00; AS/SC/MATH 2271 3.00. Course credit exclusions: AK/AS/SC/CSE 3451 4.00, AK/AS/SC/CSE 3451 3.00, AS/SC/MATH 4130B 3.00, AS/SC/MATH 4930C 3.00.

AK/AS/SC/MATH 4930A 3.00 Topics in Applied Statistics: Statistical Quality Control. This course provides a comprehensive coverage of the modern practice of statistical quality control from basic principles to state-of-the-art concepts and applications. Prerequisite: AK/AS/SC/MATH 3330 3.00 or AK/AS/SC/MATH 3033 3.00. Corequisite: AS/SC/MATH 4730 3.00.

Cross-listed to: AK/MATH 4930A3.00, AS/MATH 4930A3.00, SC/MATH 4930A3.00

AK/AS/SC/MATH 4930B 3.00 Topics in Applied Statistics: Simulation and the Monte Carlo Method. Introduction to systems, models, simulation and Monte Carlo methods. Random number generation. Random variate generation. Monte Carlo integration and variance reduction techniques. Applications to queuing systems and networks. Integrated with: GS/MATH 6003V 3.00. Prerequisite: AK/AS/SC/MATH 3330 3.00 or AS/SC/MATH 3033 3.00. Course credit exclusion: AK/AS/SC/CSE 3408 3.00 (formerly COSC).

Cross-listed to: AK/MATH 4930B3.00, AS/MATH 4930B3.00, SC/MATH 4930B3.00

AK/AS/SC/MATH 4930C 3.00 Topics in Applied Statistics: Forecasting and Time Series. Introduction to the needs and uses of forecasting. The components of a time series. Forecasting time series using smoothing methods; using trend projection; using classical decomposition; using regression models. Autoregressive/moving average (ARMA) time series methods. Box-Jenkins methodology. Prerequisites: AS/SC/MATH 3033 3.00 or AK/AS/SC/MATH 3330 3.00. Course credit exclusions: SC/EATS 4020 3.00, AS/SC/MATH 4130B 3.00, AS/SC/MATH 4830 3.00, SC/PHYS 4060 3.00.

Note: AK/MODR 1000-level courses are part of Atkinson's general education requirement. General education courses do not fulfill elective or major requirements.

The overall purpose of all modes of reasoning courses is to enable students to develop critical skills applicable to the analysis of texts, to arguments encountered in every day situations, and to concrete problems. The first half of every course will be devoted to learning analytical techniques. Use and misuse of language will be examined. Conceptual, factual and evaluative issues will be distinguished. The basic forms of reasoning, their uses and limits will be analyzed. Fallacies which are frequently found in ordinary discussion, academic texts, mass media, advertising etc. will be carefully studied. The avoidance of these fallacies and learning techniques of conceptual analysis will be a major concern of this half. The aim is to help students to reason correctly and to express themselves clearly and precisely in verbal and written form. The second half of each course will be concerned with putting into practice the techniques learned from the first half. Students will be given ample opportunity to apply their critical skills on concrete materials and practical issues. For this purpose different modes courses use examples drawn from different areas. The following courses reflect the difference in focus in the second half.

Note: Students are advised before registering in a course to consult the detailed course outlines on the Internet (<http://www.atkinson.yorku.ca/course/>). This is particularly important whenever two or more sections of a course are being offered in any particular session as important differences of emphasis may exist relating both to content and methodology.

Glendon:

Students should consult:

- The Glendon mathematics departmental mini-calendar (329 York Hall, telephone 416-487-6731 for a complete list of modes of reasoning courses offered by the Mathematics Department.
- The Glendon philosophy departmental mini-calendar (C221 York Hall, telephone 416-487-6733 for a complete list of modes of reasoning courses offered by the Philosophy Department. Modes of reasoning courses which have 17 as the first two numbers, e.g. GL/MODR 1710 6.00 are offered by the Philosophy Department.

Les étudiant(e)s doivent consulter le mini-annuaire du :

- Département de mathématiques (Pavillon York, 329, tél. : 416-487-6731) pour une liste complète des cours de logique offerts par le Département de mathématiques.
- Département de philosophie (Pavillon York, C221, tél. : 416-487-6733) pour une liste complète des cours de logique offerts par le Département de philosophie. Les cours de logique commençant par les chiffres 17, par ex : GL/MODR 1710 6.00 sont offerts par le Département de philosophie.

Note: Courses whose numbers have 1 or 2 as the first digit are open to first-year students.

N.B. : Les cours dont le numéro commence par le chiffre 1 ou 2 sont ouverts aux étudiants de première année.

Note: Only one in the GL/MODR 17XX 6.00 series may be taken for credit.

Courses in Modes of Reasoning/Cours de logique

GL/MODR 1610 3.00 Introduction to Statistical Methods I. This course covers the elements of probability theory and standard probability distributions, the measures and techniques used in descriptive statistics, principles of sampling and tests of significance. Prerequisite: OAC or

Grade 12 mathematics. Course credit exclusions: AK/MATH 1131 3.00, AK/MATH 2560 3.00.

Cross-listed to: GL/MATH 1610 3.00, GL/MODR 1610 3.00, GL/POLS 2610 3.00, GL/SOCI 2610 3.00

GL/MODR 1610 3.00 Introduction aux méthodes statistiques I.

Éléments de la théorie des probabilités, les distributions classiques, les mesures et techniques utilisées en statistique descriptive, principes de théorie des sondages et tests statistiques. Condition préalable : Mathématiques de fin d'école secondaire (12e ou CPO). Cours incompatible : AK/MATH 1131 3.00, AK/MATH 2560 3.00.

Language of Instruction: French

Cross-listed to: GL/MATH 1610 3.00, GL/MODR 1610 3.00, GL/POLS 2610 3.00, GL/SOCI 2610 3.00

GL/MODR 1620 3.00 Introductory Statistics II. This course covers the correlation and regression analysis, analysis of variance and parametric tests, and problem work emphasizing applications of statistics in the social sciences. Prerequisite: GL/MATH 1610 3.00 or permission of the instructor. Course credit exclusion: AK/MATH 2570 3.00.

Cross-listed to: GL/MATH 1620 3.00, GL/MODR 1620 3.00, GL/POLS 2620 3.00, GL/SOCI 2620 3.00

GL/MODR 1620 3.00 Introduction aux méthodes statistiques II. Dans ce cours, il est question de corrélation et régression, d'analyse de la variance et les tests paramétriques, d'applications pratiques des statistiques aux sciences sociales. Condition préalable : GL/MATH 1610 3.00 ou permission du professeur. Cours incompatible : AK/MATH 2570 3.00.

Language of Instruction: French

Cross-listed to: GL/MATH 1620 3.00, GL/MODR 1620 3.00, GL/POLS 2620 3.00, GL/SOCI 2620 3.00

GL/MODR 1650 3.00 Elements of Discrete Mathematics. The logic of propositions; truth tables; valid arguments; logic circuits. Set operations; relations on sets; Boolean functions. Counting principles; permutations; combinations; inclusion-exclusion principle; binomial and multinomial coefficients. Recurrence relations of order one and two; mathematical induction. Prerequisites: At least one OAC mathematics credit or its equivalent, or permission of the instructor. Course credit exclusions: AK/MATH 1190 3.00, GL/MATH 1630 3.00 and GL/MATH 1640 3.00.

Cross-listed to: GL/CSLA 1650 3.00, GL/MATH 1650 3.00, GL/MODR 1650 3.00

GL/MODR 1670 6.00 Fundamentals of Mathematics. Intended for the student whose (high school) mathematical background is either weak or incomplete, and designed to train and improve the logical and technical skills in the use of basic mathematics. Topics are chosen from basic algebra, linear, quadratic, polynomial, exponential, logarithmic and trigonometric functions, systems of equations, inequalities, probability, series and derivatives. Course equivalent: AK/MATH 1710 6.00. Course credit exclusions: AK/MATH 1710 6.00, GL/MATH 1880 6.00(EN).

Cross-listed to: GL/ITEC 1670 6.00, GL/MATH 1670 6.00, GL/MODR 1670 6.00

AK/MODR 1710 6.00 Reasoning About Women and Sexism. Note: Not open to students who have taken AK/MODR 1700A 6.00.

GL/MODR 1711 6.00 Critical Thinking. An introduction to reasoning in the humanities. The focus is the presentation of issues and arguments in major texts and articles. The aim of the course is to develop the student's ability to read, write and think critically.

GL/MODR 1714 6.00 Thinking and Writing Critically. This course focuses on the presentation and evaluation of arguments in natural language. Formal techniques are used where appropriate.

GL/MODR 1716 6.00 Logique formelle et informelle. Le cours a pour but de faire connaître à l'étudiant les moyens de distinguer les bons raisonnements des mauvais. Un texte élémentaire de logique sera utilisé comme livre de référence. Le cours poursuivra aussi une étude détaillée de textes choisis.

Cross-listed to: GL/LIN 1716 6.00, GL/MODR 1716 6.00

GL/MODR 1717 6.00 Critical Thinking in Medical Ethics: The Problem of Cloning. The aim of this course is to develop skills in critical thinking through the study of elementary logic and argument analysis, and to use these skills to explore some of the most significant and pressing issues in medical ethics. Of the topics in medical ethics covered, the main focus will be on the ethical and scientific aspects of human cloning. Course credit exclusions: GL/MODR 1701 6.00(EN) Fall/Winter 2002-2003.

AK/MODR 1730 6.00 Reasoning About Social Issues. The particular focus of this course is on the mass media concerning social issues, different positions taken on issues such as abortion, euthanasia, pornography, immigration etc. Typical examples are to be analyzed.

AK/MODR 1760 6.00 Reasoning About Morality and Values. This course uses examples drawn from areas of thought where value judgments are made. Different sections will stress different topics in ethics, aesthetics, religion or law.

AK/MODR 1770 6.00 Techniques of Persuasion. This course takes examples from the various modes of persuasion including advertising, propaganda and political argument.

GL/MODR 1925 3.00 Éléments de logique pour l'informatique. Ce cours introduit les éléments fondamentaux de la logique formelle et ses applications en informatique. Les sujets abordés incluent: la logique des propositions, raisonnements, déduction automatique, résolution, circuits logiques, la logique des prédicats, applications dans la programmation logique. Cours incompatibles : GL/COSC/MODR 2900 6.00.

GL/MODR 1940 3.00 Calculus II. A continuation of Calculus I. Topics covered are logarithms and exponentials, trigonometry including inverse trigonometric functions, hyperbolic trigonometry, the techniques of integration, indeterminate forms and l'Hôpital Rule, an introduction to sequences and series. Applications of the integral to the calculation of areas, volumes, work. Prerequisite: GL/MATH 1930 3.00. Course credit exclusion: AK/MATH 1310 3.00.

Cross-listed to: GL/MATH 1940 3.00, GL/MODR 1940 3.00

GL/MODR 1940 3.00 Calcul différentiel et intégral II. La suite de Calcul différentiel et intégral I. Les notions traitées sont : les logarithmes et exponentielles, la trigonométrie y compris les fonctions trigonométriques inverses, la trigonométrie hyperbolique, les techniques d'intégration, les formes indéterminées et la règle de l'Hôpital, une introduction aux suites et séries. Applications de l'intégrale aux calculs des aires, des volumes et du travail. Condition préalable : GL/MATH 1930 3.00. Cours incompatible : AK/MATH 1310 3.00.

AK/MODR 2410 3.00 Fallacy. A systematic study of practical argument, the analysis of techniques, formal and informal fallacies, the relationship between arguing well and winning an argument. When is argument propaganda? Methods of identifying and undermining specious arguments will be explored and tried.

GL/MODR 2630 6.00 Probability and Mathematical Statistics I. Topics include probability spaces, conditional probability, independence, random variables and vectors, expectation and moments, moment-generating functions, classical discrete and continuous distributions, laws of large numbers, central limit theorem, introduction to sampling, sufficiency, point estimation, confidence intervals, hypothesis testing, regression and correlation. Prerequisite or corequisites: GL/MATH 1930 3.00 and GL/MATH 1940 3.00.

Cross-listed to: GL/MATH 2630 6.00, GL/MODR 2630 6.00

GL/MODR 2635 3.00 Creation and Management of a site on the WWW. This course presents the client server model of the Web with different methods to secure a Web site. The students will learn how to build and manage a Web site using DHTML, Java Script, and animation and sound manipulation software. Prerequisite: GL/ITEC 2915 3.00. Course credit exclusion: GL/CSLA 1960 3.00 and GL/CSLA 1970 3.00, GL/MODR 1960 3.00 and GL/MODR 1970 3.00, GL/SOSC 1960 3.00 and GL/SOSC 1970 3.00.

GL/MODR 3645 3.00 MATLAB for data analysis and visualization. This course offers efficient methods for modern data analysis and visualization in the MATLAB environment - MATLAB is a software package to easily solve and represent graphically many quantitative problems. These are illustrated with examples from applications in Cognitive and Life Sciences, Sociology, Psychology, Economics, Mathematics and Business. This course, intended for upper level students working in variety of fields, provides solid approaches for working with real-life data sets and for designing graphical user interfaces (GUIs) for human-machine interaction.

Cross-listed to: GL/ITEC 3645 3.00, GL/MODR 3645 3.00

GL/MODR 3660 6.00 Operations Research. Linear Programming, duality theory with applications. The transportation algorithm with applications to the assignment and shortest route problems. Dynamic Programming and Non-Linear Programming including quadratic and convex programming. Prerequisite: GL/MATH 2650 3.00. Course credit exclusion: AK/MATH 3170 6.00.

Cross-listed to: GL/MATH 3660 6.00, GL/MODR 3660 6.00

GL/MODR 3660 6.00 Recherche opérationnelle. Le cours explore la programmation linéaire. On y étudie la méthode du simplexe et la théorie de la dualité ainsi que l'algorithme de la transportation avec applications aux problèmes des réseaux, du partage et de l'itinéraire le plus court. On se penche, enfin, sur les problèmes de l'arbre engendrant minimal et du flux maximal. Condition préalable : GL/MATH 2650 3.00. Cours incompatible : AK/MATH 3170 6.00.

GL/MODR 3670 3.00 Mathematical Statistics. Elements of probability, random variables, probability distribution, sampling theory, theory of estimation and tests of hypotheses and regression analysis. Prerequisites: GL/MODR 1930 3.00 and GL/MODR 1940 3.00. Course credit exclusion: AS/ECON 3500 3.00.

Cross-listed to: GL/ECON 3670 3.00, GL/MODR 3670 3.00

GL/MODR 3910 3.00 Philosophy of Language. The course will introduce students to such topics as the nature of reference, the role of intention and convention in determining meaning, the distinctions between

syntax, semantics and pragmatics, the theory of speech acts and the nature of metaphor and other figurative language.

Cross-listed to: GL/LIN 3910 3.00, GL/MODR 3910 3.00, GL/PHIL 3910 3.00

GL/MODR 3934 3.00 Belief, Truth and Knowledge. This course is an examination of the nature and structure of human knowledge. Topics include the relationship between truth, belief and knowledge, the structure of justified belief and knowledge, contextualism, and naturalistic epistemology.

Cross-listed to: GL/MODR 3934 3.00, GL/PHIL 3934 3.00

GL/MODR 4625 3.00 Philosophical Paradoxes. A study of rationality in belief and action approached through the paradoxes which each presents. We are also interested in the sort of reasoning which generates paradoxes, and what is required to resolve them. Topics include: The Prediction Paradox, Newcomb's Problem and the Prisoner's Dilemma. Course credit exclusions: GL/PHIL 3015 3.00 (Fall /Winter 1990-1991, Fall/Winter 1991-1992), GL/PHIL 3013 3.00 (Fall/Winter 1992-1993).

The mandate of our students and faculty is to make and share music and to acquire, develop and disseminate musical knowledge. We understand musical study as interacting with nearly all studies pursued in the University — those of the humanities and the other fine arts, the social and natural sciences and the professions. From its inception, the Music Department has emphasized the study and performance of contemporary music in all its diversity, while bringing to bear a wide range of historical and social perspectives on the music of other times and places.

Students who major in music may pursue the BA, the BA Honours or BFA Honours degree. These degree options address both academic and practical concerns, combining the knowledge and skills needed for professional work in music with experience that will stimulate lifelong musical and personal growth. Undergraduate studies include courses in performance, composition, music history and ethnology, theory and pedagogy, with the emphasis largely depending on the student's own interests and abilities. Many of these courses are open to non-majors, with opportunities for participation in various performances and musical events on and off campus organized by members of the department.

Both the BA Honours and BFA Honours degree programs comprise a total of 120 credits and may be completed in four years of full-time study or over a longer period of part-time study. The major program in Music may be combined with a second major in the Faculty of Arts, or with a minor in the Faculties of Arts, Environmental Studies, Fine Arts or Science and Engineering. A five-year program leading to two degrees (the BA Honours or BFA Honours in music and the bachelor of education degree) is also available. All students begin their studies in the Honours program (120 credits), but may elect at the end of their first year of study to go into the BA program (90 credits). Completion of these degrees form a strong basis for further studies in fields such as music therapy, arts administration and management, music journalism, music marketing, cultural tourism, community arts and cultural management. For students interested in teaching at the primary, junior and intermediate levels, a BA and a BEd can be completed in four years, rather than five, as currently with the BA or BFA Honours.

Admission to the department is by audition. Further information on audition evaluations, admissions, degree requirements and Faculty of Fine Arts regulations may be found in the Faculty of Fine Arts section of this calendar.

In the area of performance, a qualified student may select one or more courses including chamber ensembles in Western art music (piano, percussion, brass, winds, strings, voice, guitar), jazz, world music ensembles and contemporary music. Each course entails ensemble workshops, study of the history and literature of the instruments, and attention to individual problems of performance. Performance experience in large ensembles is provided by the choir, jazz orchestra, jazz choir, wind symphony and world music chorus.

In the area of composition, instruction is given in the skills of writing scores, arranging and orchestration. In addition, fully equipped digital and MIDI studios provide facilities for learning all phases of the composition and production of music.

In the area of musical research (music history, area studies and ethnomusicology), the aim is to integrate musicianship with the history, theory and anthropology of music. Intensive study may be pursued in the musics of Asia, Africa and the Americas as well as of Europe, past and present.

All music majors complete a sequence of foundational courses which equips them with essential concepts and practical skills in ear-training, sight-singing, rhythm, theory and awareness of the social, cultural and historical contexts of music. These requirements include FA/MUSI 1000 6.00, FA/MUSI 1200 9.00, FA/MUSI 2200 6.00, FA/MUSI 2201 3.00 and FA/MUSI 2202 3.00. A student may be exempted from one or more of these courses by passing proficiency exams. Students who do not maintain enrolment in the foundation courses scheduled for their first and second years may not be enrolled in performance and/or composition courses. These foundation courses are prerequisites for all the department's upper-level offerings for majors, and both full and part-time students must complete them within their first 60 credits. All Honours music majors must complete 30 upper-level music credits (at or above the 3000 level), including at least 18 credits in studies courses for the BA Honours degree, and at least 12 credits in studies courses and at least 12 credits in studio courses for the BFA Honours degree. (See the lists of courses below.)

In addition to courses in music, the bachelor's, BA Honours and BFA Honours degrees require 18 general education credits, and 12 credits from other departments in fine arts.

Note: Some courses involve additional ancillary fees. Consult the department's supplementary calendar for details.

Courses in Music

FA/MUSI 1000 6.00 Workshop in Musicianship I. Provides an intensive course designed to develop musical sensitivity, imagination and practical skills, through a variety of individual exercises in singing, playing, composing and listening. Four hours plus self study in the computer lab. Limited to music majors and minors and required of all new majors. Available to students in Fine Arts Cultural Studies and non-majors by entrance examination.

FA/MUSI 1011 3.00 Classical Strings for Non-majors. Develops fundamental skills for violin, viola, cello or double bass performance. Class topics include: developing a characteristic tone, correct bow hold, left hand techniques, simple ensemble repertoire and effective practice techniques. Prerequisite: None. Open to non-majors.

FA/MUSI 1012 3.00 Guitar for Non-Majors. Explores elementary guitar performance in a class for non-majors. Topics include: basic performance technique, introductory theory, repertoire development. Also open to majors wishing to learn a "secondary instrument". Prerequisite: None. Open to non-majors.

FA/MUSI 1013 3.00 Flute for Non-Majors. Explores flute performance setting for non-majors in a class. Topics include: breath control, coordination skill, performance technique, introductory theory, scales, studies, repertoire development. Prerequisite: None. Open to non-majors.

FA/MUSI 1014 3.00 Introduction to Classical Singing for Non-Majors. A vocal class for non-majors who wish to explore the world of classical vocal performance. Topics will include: basic technique, breathing and posture, introductory repertoire development. Open to majors who are non-singers. Prerequisite: None. Some limited ability to play piano and read music is recommended. No choral corequisite. Open to non-majors.

FA/MUSI 1020A 3.00 Classical Performance: Flute. Provides instruction in instrumental performance. Prerequisite: Permission of the instructor, by audition. Corequisite: Enrolment in a major ensemble.

FA/MUSI 1020A 6.00 Classical Performance: Flute. Provides instruction in instrumental performance. Prerequisite: Permission of the instructor, by audition. Corequisite: Enrolment in a major ensemble.

FA/MUSI 1020B 3.00 Classical Performance: Oboe. Provides instruction in instrumental performance. Prerequisite: Permission of the instructor, by audition. Corequisite: Enrolment in a major ensemble.

FA/MUSI 1020B 6.00 Classical Performance: Oboe. This course provides instruction in instrumental performance. Prerequisite: Permission of the instructor, by audition. Corequisite: Enrolment in a major ensemble.

FA/MUSI 1020C 3.00 Classical Performance: Clarinet. Provides instruction in instrumental performance. Prerequisite: Permission of the instructor, by audition. Corequisite: Enrolment in a major ensemble.

FA/MUSI 1020C 6.00 Classical Performance: Clarinet. Provides instruction in instrumental performance. Prerequisite: Permission of the instructor, by audition. Corequisite: Enrolment in a major ensemble.

FA/MUSI 1020D 3.00 Classical Performance: Bassoon. Provides instruction in instrumental performance. Prerequisite: Permission of the instructor, by audition. Corequisite: Enrolment in a major ensemble.

FA/MUSI 1020D 6.00 Classical Performance: Bassoon. Provides instruction in instrumental performance. Prerequisite: Permission of the instructor, by audition. Corequisite: Enrolment in a major ensemble.

FA/MUSI 1020E 3.00 Classical Performance: Saxophone. Provides instruction in instrumental performance. Prerequisite: Permission of the instructor, by audition. Corequisite: Enrolment in a major ensemble.

FA/MUSI 1020E 6.00 Classical Performance: Saxophone. Provides instruction in instrumental performance. Prerequisite: Permission of the instructor, by audition. Corequisite: Enrolment in a major ensemble.

FA/MUSI 1020F 3.00 Classical Performance: French Horn. Provides instruction in instrumental performance. Prerequisite: Permission of the instructor, by audition. Corequisite: Enrolment in a major ensemble.

FA/MUSI 1020F 6.00 Classical Performance: French Horn. Provides instruction in instrumental performance. Prerequisite: Permission of the instructor, by audition. Corequisite: Enrolment in a major ensemble.

FA/MUSI 1020G 3.00 Classical Performance: Trumpet. Provides instruction in instrumental performance. Prerequisite: Permission of the instructor, by audition. Corequisite: Enrolment in a major ensemble.

FA/MUSI 1020G 6.00 Classical Performance: Trumpet. Provides instruction in instrumental performance. Prerequisite: Permission of the instructor, by audition. Corequisite: Enrolment in a major ensemble.

FA/MUSI 1020H 3.00 Classical Performance: Trombone. Provides instruction in instrumental performance. Prerequisite: Permission of the instructor, by audition. Corequisite: Enrolment in a major ensemble.

FA/MUSI 1020H 6.00 Classical Performance: Trombone. Provides instruction in instrumental performance. Prerequisite: Permission of the instructor, by audition. Corequisite: Enrolment in a major ensemble.

FA/MUSI 1020I 3.00 Classical Performance: Tuba. Provides instruction in instrumental performance. Prerequisite: Permission of the instructor, by audition. Corequisite: Enrolment in a major ensemble.

Offers private instruction in Turkish baglama (long-necked, plucked, folk lute with moveable frets) with an emphasis on regional playing styles and repertoire through knowledge of various tunings, modes, meters and mastery of left-hand (hit-ons, pull-offs etc.) and right-hand (plectrum strokes) techniques. Open to non-majors. Prerequisite: FA/MUSI 3099L 6.00 or permission of the instructor.

FA/MUSI 4099M 3.00 World Music: Individual Instruction - Medieval and Renaissance Bowed Strings. Offers private instruction in medieval bowed strings (rebec, vielle, viol da gamba). This course seeks to develop a flexible technique and extensive knowledge of repertoire. Open to non-majors. Prerequisite: FA/MUSI 3099M 3.00 or permission of the instructor.

FA/MUSI 4099M 6.00 World Music: Individual Instruction - Medieval and Renaissance Bowed Strings. Offers private instruction in medieval bowed strings (rebec, vielle, viol da gamba). This course seeks to develop a flexible technique and extensive knowledge of repertoire. Open to non-majors. Prerequisite: FA/MUSI 3099M 6.00 or permission of the instructor.

FA/MUSI 4099N 3.00 Ghanaian Percussion. Explores traditional repertoire from Ghana's rich drumming traditions (Ewe, Ga, Akan, Dagbamba, etc.) with the goals of good ensemble and solo performance, and obtaining an understanding and appreciation of social values, contexts and customs. Work focuses upon developing drum technique for proper tone production, in addition to the techniques required to play other percussion instruments in a given ensemble. Students learn all instrumental parts within the multi-part matrices of traditional repertoire in addition to acquiring skills as soloists, using genre-specific solo repertoire as well as improvisatory sensibilities in developing the latter. Prerequisite: FA/MUSI 3099 N 3.00

FA/MUSI 4099O 3.00 World Music: Individual Instruction - 'Oud. Offers private study of the oud concentrating on performance techniques, developing sensibilities for microtonal tuning and idiomatic ornamentation, modal repertoire (maqam), improvisation (taqsim) and the standard compositional repertoire of various West Asian and North African traditions. Open to non-majors. Prerequisite: FA/MUSI 3099O 3.00 or permission of the instructor.

FA/MUSI 4099O 6.00 World Music: Individual Instruction: 'Oud. Offers private study of the oud concentrating on performance techniques, developing sensibilities for microtonal tuning and idiomatic ornamentation, modal repertoire (maqam), improvisation (taqsim) and the standard compositional repertoire of various West Asian and North African traditions. Open to non-majors. Prerequisite: FA/MUSI 3099O 6.00 or permission of the instructor.

FA/MUSI 4099P 3.00 World Music: Individual Instruction - Pipa. Offers private instruction in pipa (pear-shaped plucked lute). This course will introduce the student to alternative left hand fingering positions, the five finger tremolo, the two finger pi-pa technique, the bending of strings and regional genre studies. Standard Chinese jianpu notation will be used. Open to non-majors. Prerequisite: FA/MUSI 3099P 3.00 or permission of the instructor.

FA/MUSI 4099P 6.00 World Music: Individual Instruction - Pipa. Offers private instruction in pipa (pear-shaped plucked lute). This course will introduce the student to alternative left hand fingering positions, the five finger tremolo, the two finger pi-pa technique, the bending of strings and regional genre studies. Standard Chinese jianpu notation will be used. Open to non-majors. Prerequisite: FA/MUSI 3099P 6.00 or permission of the instructor.

FA/MUSI 4099Q 3.00 World Music: Individual Instruction - Koto. Offers private instruction in Japanese koto. This course will introduce the student to traditional repertoire and performance practice, hand positions, playing techniques and regional and historical variants. Open to non-majors. Prerequisite: FA/MUSI 3099Q 3.00 or permission of the instructor.

FA/MUSI 4099Q 6.00 World Music: Individual Instruction - Koto. Offers private instruction in Japanese koto. This course will introduce the student to traditional repertoire and performance practice, hand positions, playing techniques and regional and historical variants. Open to non-majors. Prerequisite: FA/MUSI 3099Q 6.00 or permission of the instructor.

FA/MUSI 4099R 3.00 World Music: Individual Instruction - Recorder. Offers private study in recorder with an emphasis on performance technique, transposition, ornamentation and repertoire. Use of the recorder as a important pedagogical instrument will be considered and appropriate repertoire studied. Open to non-majors. Prerequisite: FA/MUSI 3099R 3.00 or permission of the instructor.

FA/MUSI 4099R 6.00 World Music: Individual Instruction - Recorder. Offers private study in recorder with an emphasis on performance technique, transposition, ornamentation and repertoire. Use of the recorder as a important pedagogical instrument will be considered and appropriate repertoire studied. Open to non-majors. Prerequisite: FA/MUSI 3099R 6.00 or permission of the instructor.

FA/MUSI 4099S 3.00 World Music: Individual Instruction - Setar. Offers private study of the Persian setar (long necked lute) including technique, traditional repertoire (radif) and performance practice. Open to non-majors. Prerequisite: FA/MUSI 3099S 3.00 or permission of the instructor.

FA/MUSI 4099S 6.00 World Music: Individual Instruction - Setar. Offers private study of the Persian setar (long necked lute) including technique, traditional repertoire (radif) and performance practice. Open to non-majors. Prerequisite: FA/MUSI 3099S 6.00 or permission of the instructor.

FA/MUSI 4099T 3.00 World Music: Individual Instruction - Tabla. Offers private study of North Indian tabla drums including digital technique, tala (rhythmic structure) theory, accompaniment styles, solo repertoire and improvisatory practice. Open to non-majors. Prerequisite: FA/MUSI 3099T 3.00 or permission of the instructor.

FA/MUSI 4099T 6.00 World Music: Individual Instruction - Tabla. Offers private study of North Indian tabla drums including digital technique, tala (rhythmic structure) theory, accompaniment styles, solo repertoire and improvisatory practice. Open to non-majors. Prerequisite: FA/MUSI 3099T 6.00 or permission of the instructor.

FA/MUSI 4099U 3.00 World Music: Individual Instruction - Plucked Strings: Medieval and Renaissance. Offers private study of early music plucked strings: lute, harp, psaltery. Study will include playing techniques, acquisition of repertoire, improvisation, ornamentation and style awareness. Open to non-majors. Prerequisite: FA/MUSI 3099U 3.00 or permission of the instructor.

FA/MUSI 4099U 6.00 World Music: Individual Instruction - Plucked Strings: Medieval and Renaissance. Offers private study of early music plucked strings: lute, harp, psaltery. Study will include playing techniques, acquisition of repertoire, improvisation, ornamentation and style awareness. Open to non-majors. Prerequisite: FA/MUSI 3099U 6.00 or permission of the instructor.

FA/MUSI 4099V 3.00 World Music: Individual Instruction - Village Folk Vocal Styles. Offers private instruction in the vocal techniques and repertoires of various folk vocal traditions with an emphasis on repertoire development, vocal production and ornamentation. Repertoire will be chosen from various world music sources with an emphasis on the Canadian, American and British traditions. Open to non-majors. Prerequisite: FA/MUSI 3099V 3.00 or permission of the instructor.

FA/MUSI 4099V 6.00 World Music: Individual Instruction - Village Folk Vocal Styles. Offers private instruction in the vocal techniques and repertoires of various folk vocal traditions with an emphasis on repertoire development, vocal production and ornamentation. Repertoire will be chosen from various world music sources with an emphasis on the Canadian, American and British traditions. Open to non-majors. Prerequisite: FA/MUSI 3099V 6.00 or permission of the instructor.

FA/MUSI 4099W 3.00 World Music: Individual Instruction - World Rhythms for Drumkit. Offers private instruction on the drumset with an emphasis on developing fluency in the unique rhythmic patterns and grooves drawn from various world music traditions. Work will include odd meters, polyrhythmic forms, national dance styles (samba, reggae etc.) and alternative performance techniques. Open to non-majors. Prerequisite: FA/MUSI 3099W 3.00 or permission of the instructor.

FA/MUSI 4099W 6.00 World Music: Individual Instruction - World Rhythms for Drumkit. Offers private instruction on the drumset with an emphasis on developing fluency in the unique rhythmic patterns and grooves drawn from various world music traditions. Work will include odd meters, polyrhythmic forms, national dance styles (samba, reggae etc.) and alternative performance techniques. Open to non-majors. Prerequisite: FA/MUSI 3099W 6.00 or permission of the instructor.

FA/MUSI 4099X 3.00 World Music: Individual Instruction - Xiao. Offers private instruction in xiao (notched vertical flute). This course will introduce the student to basic and alternative fingerings, embouchure development, tuning techniques, melodic figuration and regional genre studies. Standard Chinese jianpu notation will be used. Open to non-majors. Prerequisite: FA/MUSI 3099X 3.00 or permission of the instructor.

FA/MUSI 4099X 6.00 World Music: Individual Instruction - Xiao. Offers private instruction in xiao (notched vertical flute). This course will introduce the student to basic and alternative fingerings, embouchure development, tuning techniques, melodic figuration and regional genre studies. Standard Chinese jianpu notation will be used. Open to non-majors. Prerequisite: FA/MUSI 3099X 6.00 or permission of the instructor.

FA/MUSI 4099Y 3.00 World Music: Individual Instruction - Yangqin and Zheng. Offers private instruction in yangqin (trapezoidal hammered dulcimer) and zheng (plucked zither) including beater techniques, rhythmic figuration, ornamentation and regional genre studies. Standard Chinese notation will be used. Open to non-majors. Prerequisite: FA/MUSI 3099Y 3.00 or permission of the instructor.

FA/MUSI 4099Y 6.00 World Music: Individual Instruction - Yangqin and Zheng. Offers private instruction in yangqin (trapezoidal hammered dulcimer) and zheng (plucked zither) including beater techniques, rhythmic figuration, ornamentation and regional genre studies. Standard Chinese notation will be used. Open to non-majors. Prerequisite: FA/MUSI 3099Y 6.00 or permission of the instructor.

FA/MUSI 4099Z 3.00 World Music: Individual Instruction - Zhonghu and Erhu. Offers private instruction in Chinese erhu and zhonghu (two-stringed bowed lute) introducing left-hand fingerings, position shifts, various bowing techniques and regional genre studies. Standard Chinese jianpu notation will be used. Open to non-majors. Prerequisite: FA/MUSI 3099Z 3.00 or permission of the instructor.

FA/MUSI 4099Z 6.00 World Music: Individual Instruction - Zhonghu and Erhu. Offers private instruction in Chinese erhu and zhonghu (two-stringed bowed lute) introducing left-hand fingerings, position shifts, various bowing techniques and regional genre studies. Standard Chinese jianpu notation will be used. Open to non-majors. Prerequisite: FA/MUSI 3099Z 6.00 or permission of the instructor.

FA/MUSI 4110 6.00 Composition Studio IV. Offers a continuation of FA/MUSI 3110 6.00. Advanced work in composition, analysis and current music-theoretic ideas of relevance to the composer. Prerequisites: FA/MUSI 3110 6.00 and permission of the course director. Prior or concurrent courses in the theory and literature of 20th-century music, such as FA/MUSI 3310 6.00 or FA/MUSI 4300 3.00 are strongly recommended.

FA/MUSI 4140 6.00 Composing for Film. Offers advanced composition studies involving the creation of recorded soundtracks for motion picture (formats will vary depending on project - i.e. film, video, DV, Internet, Multimedia Applications, Mini-DV, Firewire Port, Random Access, Final Cut Pro, Quicktime etc.). During the course, students will complete several composition projects and sync them to picture. Prerequisite: Permission of the course director.

FA/MUSI 4150 6.00 Digital Recording, Editing and Composition. Deals with digital composition techniques. Included are topics such as: hard disk recording, destructive and non-destructive editing, non-linear editing, digital signal processing, digital audio sampling, multipass processing, processor smoothing, effects portamento, sample looping, cross-fading and other additional rubrics. Prerequisites: Foundation courses and permission of the course director.

FA/MUSI 4151 6.00 Computer Music. Surveys the world of computer music and its growing influence on musicians with respect to composition, recording, film music, notation, sampling, teaching, performance practice, theory, sound design, and other creative options. Prerequisite: FA/MUSI 1000 6.00, FA/MUSI 1200 9.00, FA/MUSI 2200 6.00, FA/MUSI 2201 3.00, FA/MUSI 2002 3.00 or permission of department. Open to non-majors.

FA/MUSI 4200 3.00 Topics in Advanced Theory and Analysis. Offers a seminar in contemporary musical analysis emphasizing the comprehensive investigation of complete musical works. Drawing on such perspectives as set theory or Schenkerian reduction, the course introduces the student to research problems in theory and analysis from various perspectives. Prerequisite: A minimum grade of B in a 3000-level theory course.

FA/MUSI 4300A 3.00 Studies in Contemporary Music. Provides analytical and historical studies of the theory and development of contemporary music, with emphasis on the latter half of the twentieth century. Prerequisites: FA/MUSI 3310 6.00, or permission of the course director.

FA/MUSI 4320 3.00 Honours Seminar. Explores how Researchers are motivated by problems which reflect basic issues in intellectual history, humanities, science and social science. In this course, pilot projects introduce the broad range of research tools which several centuries of theory and academic scholarship have made available to musical study. Prerequisite: A minimum grade of B in an upper-level studies course.

FA/MUSI 4370 3.00 Music of Canada. Explores how Canadians tend to be sharply aware of the derivative aspects of their culture; yet the physiognomy of Canadian music taken as a whole is unique. This course studies selected aspects of Canadian musical achievements which offer perspectives on our national situation. Prerequisite: FA/MUSI 3350 6.00, or FA/MUSI 3310 6.00, or permission of the course director.

FA/MUSI 4399 3.00 Special Topics in the Graduate Program. Fourth-year undergraduates who have the necessary background may apply to take certain courses offered in the graduate program. Prerequisites: Permission of both the graduate program director and the course director; a minimum grade of B+ in an upper-level studies course.

FA/MUSI 4530 3.00 Issues in Popular Music Studies. Examines key problem areas in the study of contemporary popular music. In particular, the relationship between culture contact and musical style, the aesthetics

of authenticity, and the relationship between corporate culture and popular music are studied in detail. Prerequisites: A/MUSI 1000 6.00, FA/MUSI 1200 9.00, FA/MUSI 2201 3.00, FA/MUSI 2202 3.00, FA/MUSI 2200 6.00

FA/MUSI 4556 3.00 Gospel Choir. Explores gospel choral music repertoire and performance techniques. Open to majors and non-majors with permission of instructor.

FA/MUSI 4590 3.00 Honours Project in Music. Offers a special project option open to fourth-year students who have shown an exceptional ability to study independently and who have designed a course that cannot be accommodated elsewhere in the department's offerings. At the end of the year, the student's work is evaluated on the basis of one or more of the following: a recital, composition, research paper, or lecture-recital. Note: See departmental calendar for specific requirements. Prerequisite: Permission of the curriculum committee.

FA/MUSI 4590 6.00 Honours Project in Music. A special project option open to fourth-year students who have shown an exceptional ability to study independently and who have designed a course that cannot be accommodated elsewhere in the department's offerings. At the end of the year, the student's work is evaluated on the basis of one or more of the following: a recital, composition, research paper, or lecture-recital. Note: See departmental calendar for specific requirements. Prerequisite: Permission of the curriculum committee.

FA/MUSI 4600 6.00 Sonic Enhancement of Healing and Learning. Offers a seminar exploring the use of sound, in conjunction with colour and other subtle energies, as tools for the enhancement of healing, learning and creative activity in the context of recent literature from the disciplines of metaphysics, physics, biology, psychology, phonology, thanatology, colour theory and music composition. Prerequisite: An upper-level studies course, or permission of the course director.

Faculty of Science and Engineering Courses in Natural Science

The natural science courses are designed, as part of the general education program, to acquaint those students not intending to be professionally concerned with science with the outlook, methods and some of the achievements of science. The individual courses offered approach this objective by selecting a particular area, problem or aspect of science in which the operations of the scientific enterprise can be studied in some detail. In an increasingly technologically-oriented world, it is very important that all students have some familiarity with science to enable them to make more informed choices and decisions that relate to themselves and society as a whole.

The courses may be broadly classified into four areas, within which and between some overlap occurs, resulting in course credit exclusions as noted. However, in certain circumstances, such exclusions are petitionable. Courses may have laboratory or tutorial sessions associated with them. The four categories are as follows:

a) History and philosophy of science and technology: SC/NATS 1700 6.00, SC/NATS 1710 6.00, SC/NATS 1730 6.00, SC/NATS 1745 6.00, SC/NATS 1760 6.00, SC/NATS 1775 6.00, SC/NATS 1850 6.00;

b) Biological science: SC/NATS 1610 6.00, SC/NATS 1650 6.00, SC/NATS 1660 6.00, SC/NATS 1670 6.00, SC/NATS 1675 6.00, SC/NATS 1680 6.00, SC/NATS 1690 6.00, SC/NATS 1850 6.00;

c) Environmental science: SC/NATS 1840 6.00;

d) Physical science: SC/NATS 1720 6.00, SC/NATS 1740 6.00, SC/NATS 1750 6.00, SC/NATS 1780 6.00, SC/NATS 1790 6.00, SC/NATS 1810 6.00, SC/NATS 1820 6.00, SC/NATS 1830 6.00, SC/NATS 1870 6.00, SC/NATS 1880 6.00, SC/NATS 1910 6.00.

The natural science courses are intended primarily for non-science majors. Courses in biology, chemistry, earth and atmospheric science, physics and astronomy and other science disciplines are described elsewhere in this section of the calendar. Those courses are available, subject to prerequisites, as electives to students in the Faculties of Arts and Fine Arts. Six credits from 1000-level courses offered by the departments of Biology, Chemistry, Earth and Atmospheric Science, Physics and Astronomy, will satisfy the Faculty of Arts natural science general education requirement.

Grading Procedure. Grades will be assigned in the manner described by the Faculty of Science and Engineering in the Faculty of Science and Engineering Regulations Governing Examinations and Academic Standards section of this calendar.

Courses in Natural Science/Cours de sciences naturelles

GL/NATS 1400 6.00 Science, Faith and Science Fiction. This course explores selected topics in the history of modern science and its complex dialogue with Western religion. Changes in our conceptions of human nature and God are examined through our critical reading of science-fiction (sf), a literature that has served both to celebrate and to criticize modern science. Course credit exclusions: GL/NATS 1830 3.00; GL/NATS 1011 6.00.

GL/NATS 1500 6.00 Nutrition, santé et société. Une étude de la façon dont notre corps absorbe et utilise nos aliments. Une perspective scientifique permet de comprendre le rôle des éléments nutritifs et leur interaction dans la croissance, la régénération et le règlement des fonctions vitales.

Language of Instruction: French

GL/NATS 1540 6.00 Introductory Biology. This course is an introduction to the diversity of life. It is designed for non-science majors. To develop an understanding of the many ways living organisms are related, disciplines such as genetics, cell biology, evolutionary biology and ecology will be used.

GL/NATS 1540 6.00 Principes de biologie. Ce cours se veut une introduction à la diversité du monde vivant. Il est conçu pour les étudiants en arts libéraux. Pour bien comprendre les multiples relations entre les organismes vivants, la génétique, la biologie cellulaire, la biologie évolutive et l'écologie seront utilisées.

Language of Instruction: French

GL/NATS 1600 6.00 Science of Flight. This course presents basic physical principles by studying various aspects of aircraft and flying. Topics include properties of air as a fluid, aero-engines, basic theory of flight, principles of aircraft instruments and navigation, and processes which influence the weather. Prerequisite: GL/CDNS 1600 3.00(EN), GL/NATS 1600 3.00(EN), and GL/NATS 1740 3.00(EN).

Cross-listed to: GL/CDNS 1600 6.00, GL/NATS 1600 6.00

GL/NATS 1605 6.00 Communication, Health and Environment. This course connects the three areas of communication, health and environment by exploring the interrelationships between human health and the health of natural and socio-economic environments. It also addresses the influence of mass communication in relation to public policy pertaining to human and ecosystem health. Throughout the course, the sustainability concept is used as a guiding principle.

Cross-listed to: GL/NATS 1605 6.00, GL/SOSC 1605 6.00

SC/NATS 1610 6.00 The Living Body. Some aspects of human biology, including structure and function, reproduction, physiology, genetics and a study of some human diseases. Laboratories are self-paced, scheduled audio-tutorials involving demonstrations, experiments and observations. Three lecture hours, one laboratory hour. Two terms. Six credits. Course credit exclusions: SC/NATS 1650 6.00, SC/NATS 1660 6.00, SC/NATS 1690 6.00, AK/NATS 1820 6.00. Note: Not open to students enrolled in the Biology program.

SC/NATS 1620 6.00 Human Biology: Brain and Behaviour. The first term examines nerve cells, drug action, visual and auditory systems, and neural bases of learning and memory. Brain imaging is discussed. The second term focuses on muscle control, brain development, human genetics and brain evolution. Three lecture hours for two terms, two laboratory hours for one term. Six credits. Note: Not open to students enrolled in the Biology program.

SC/NATS 1650 6.00 Human Anatomy for the Fine Arts. An introductory course on the structure and function of the human body specifically oriented towards the needs of students in Fine Arts. Body systems are studied from anatomical, physiological and biomechanical perspectives. Included as well are on-going references to nutrition, athletic injuries, and health and wellness. Two lecture hours, two laboratory hours. Two terms. Six credits. Course credit exclusions: AS/SC/KINE 2031 3.00, SC/NATS 1610 6.00, SC/NATS 1660 6.00, SC/NATS 1690 6.00, AK/NATS 1820 6.00. Note: Not open to any students enrolled in the Biology program and the Kinesiology program.

SC/NATS 1660 6.00 The Biology of Sex. This course investigates the role of sexual reproduction in the living world. The cellular, physiological and genetic bases of sex are discussed. Other topics include sexual behaviour and the influence of sexual reproduction on evolution. Three lecture hours a week. Two laboratory hours every other week. Six credits. Course credit exclusions: SC/NATS 1610 6.00, SC/NATS 1650 6.00, SC/NATS 1675 6.00, SC/NATS 1690 6.00, AK/NATS 1820 6.00. Note: Not open to students enrolled in Biology programs.

SC/NATS 1670 6.00 Concepts in Human Health and Disease. This course examines health threats from a biological perspective, with focus on issues that are relevant to the 20-30 age group. For example: immunological, bacterial, viral and genetic diseases from a multi-disciplinary perspective. Three lecture hours. Two terms. Six credits.

Course credit exclusion: AK/NATS 1840 6.00. Note: Not open to students in the Biology program.

SC/NATS 1675 6.00 Human Development. Biological development of the human being including the formation of germ cells, fertilization, embryological development, transmission of genetic and chromosomal characteristics and the structure of growing tissues. Emphasis may be placed on child development, learning, human evolution or aging. Three lecture hours for two terms. Six credits. Course credit exclusion: AK/NATS 1820 6.00, SC/NATS 1610 6.00, SC/NATS 1650 6.00, SC/NATS 1660 6.00, SC/NATS 1690 6.00. Note: Not open to students in the Biology program.

SC/NATS 1680 6.00 The Genetic Revolution. This course examines the impact of recent genetic discoveries on medicine, agriculture, ecosystems and industry. New technologies employ enzymes to cut and splice DNA from different organisms. This has the potential to benefit human society but gene manipulations (genetic engineering) raise important ethical questions. Three lecture hours. Two terms. Six credits. Course credit exclusion: AK/NATS 1860 6.00. Note: Not open to students enrolled in the Biology program.

SC/NATS 1690 6.00 Evolution. Origin and diversification of life forms on Earth. Introduction to the historical development of evolutionary theory. Classification of living things and to scientific explanations of how biological diversity has arisen. Three lecture hours a week. Two laboratory hours every other week. Six credits. Course credit exclusions: AK/NATS 1770 6.00, AK/NATS 1820 6.00, AK/NATS 1860 6.00, SC/NATS 1610 6.00, SC/NATS 1640 6.00, SC/NATS 1650 6.00, SC/NATS 1660 6.00, SC/NATS 1675 6.00. Note: Not open to students enrolled in Biology programs.

SC/NATS 1700 6.00 Computers, Information and Society. Selected survey and critical examination of the history and present-day development of information and communication technologies and of their interplay with society and culture. Three lecture hours. Two terms. Six credits. Course credit exclusion: AK/NATS 1700 6.00.

SC/NATS 1710 6.00 The Nature and Growth of Scientific Thought. Science is examined as an intellectual activity. Emphasis is placed on the evolution of some key concepts to show the nature and methodology of natural science, the development of scientific ideas and their grounding in experience. Three lecture hours plus scheduled laboratory sessions. Two terms. Six credits. Course credit exclusions: SC/NATS 1730 6.00, AK/NATS 1710 6.00.

SC/NATS 1720 6.00 Light and Sound. How light and sound waves travel and transfer energy. Topics will include: sound waves and musical instruments; light waves and stars; technologies such as lasers and CDs; rainbows and mirages. Three lecture hours a week. Two laboratory hours every other week. Two terms. Six credits. Course credit exclusions: AK/NATS 1870 6.00.

SC/NATS 1730 6.00 Scientific Change. The nature of scientific change based on case histories, which may include Ptolemaic and Copernican astronomy, Newtonian mechanism, Darwinian evolution, the rise of bacteriology, Einstein's relativity and the discovery of the structure of DNA. Three lecture hours. Two terms. Six credits. Course credit exclusion: AK/NATS 1710 6.00, SC/NATS 1710 6.00.

SC/NATS 1740 6.00 Astronomy. A discussion of our present understanding of the universe and its constituents. Topics include the structure and evolution of the planets, stars, galaxies and the universe as a whole. Three lecture hours per week, two-hour laboratory sessions every second week. Two terms. Six credits. Course credit exclusions: SC/NATS 1880 6.00, AK/NATS 1720 6.00, AK/NATS 1750 6.00. NCR Note: No credit will be retained if this course is taken after the successful completion of SC/PHYS 1070 3.00. Not open to any students enrolled in the Astronomy stream.

SC/NATS 1745 6.00 History of Astronomy. Astronomy from a historical perspective. A selective survey of astronomical knowledge, techniques, applications and uses from the earliest civilizations to the present. Three lecture hours. Two terms. Six credits. Course credit exclusion: AK/NATS 1750 6.00.

SC/NATS 1750 6.00 The Earth and Its Atmosphere. Topics addressed concerning the Earth include geochronology, seismology, geomagnetism and plate tectonics. Topics addressed concerning the atmosphere include the general circulation, climate change, ozone depletion, weather and violent storms. Three lecture hours, one tutorial hour. Two terms. Six credits. Course credit exclusions: SC/NATS 1780 6.00, SC/EATS 1010 3.00, SC/EATS 1011 3.00. Not open to any student who has passed or is taking a course in earth and atmospheric science.

SC/NATS 1760 6.00 Science, Technology and Society. A study of the intellectual and social nature of science and technology, their similarities and differences. The course may deal with the impact of scientific and technological advancements on societies both past and present. Three lecture hours. Two terms. Six credits. Course credit exclusion: AK/NATS 1760 6.00.

GL/NATS 1770 6.00 Heredity and Society. A study of genetic variation in individuals and populations and the genetic basis of evolution. Specific attention is focused on human genetic knowledge and technology.

SC/NATS 1775 6.00 Technology and Civilization. A study of the most important technological advances in the context of various civilizations throughout history. Selected important innovations (e.g. mechanized agriculture, wind, water, steam and nuclear power generation, aviation and railways and communications). Three lecture hours. Two terms. Six credits. Course credit exclusions: AK/NATS 1780 6.00, SC/NATS 1810 6.00.

SC/NATS 1780 6.00 Weather and Climate. The weather and health of our atmosphere affect us all. This course provides an overview of the Earth's atmosphere; its chemistry, physics and dynamics; an introduction to meteorology and weather forecasting; and a discussion of climate. Canada's weather and climate are emphasized. Three lecture hours, one tutorial hour. Two terms. Six credits. Course credit exclusions: SC/NATS 1750 6.00, SC/EATS 1011 3.00. Not open to any students enrolled in the Earth and Atmospheric Science program.

SC/NATS 1790 6.00 The Science of Flight. This course presents basic physical principles by studying various aspects of aircraft and flying. Topics include properties of air as a fluid, aero-engines, basic theory of flight, principles of aircraft instruments and navigation and processes which influence the weather. Three lecture hours, one tutorial hour. Two terms. Six credits.

GL/NATS 1800 3.00 Evolution and Ecology of Humans. This course contrasts the ecological conditions attendant upon early human evolution with the complex environmental situations now faced by modern technological societies. Essential themes are Darwinism, the effect of earlier cultures upon the environment and selected modern examples in human ecology.

SC/NATS 1810 6.00 Energy. Conversion technology of current and possible future energy sources is described. The extent of the resource base of each and the environmental consequences of utilization are discussed, with emphasis on nuclear power and energy policies of Ontario and Canada. Three lecture hours, one tutorial hour. Two terms. Six credits. Course credit exclusion: AK/NATS 1780 6.00.

SC/NATS 1820 6.00 Molecules and the Mind. A study of the role of chemistry in contemporary society. Relevant topics are selected each year to show how chemistry impinges upon daily life. Important historical perspectives and basic concepts, such as energy and atomic/molecular structure, are introduced as background. Three lecture hours, one tutorial hour. Two terms. Six credits. Course credit exclusion: SC/NATS 1830 6.00. NCR Note: No credit will be retained if this course is taken after successful completion of SC/CHEM 1000 3.00 or SC/CHEM 1001 3.00. Not open to any students enrolled in the Chemistry program.

SC/NATS 1830 6.00 Matter and Structure. From atomic structure comes molecular structure, and, in turn, come the physical properties of matter composed of atoms and molecules. The relationship between physical properties and usefulness of materials is developed. The role of science in developing new materials is discussed. Three lecture hours per week, two tutorial/laboratory hours in alternate weeks. Two terms. Six

credits. Course credit exclusion: SC/NATS 1820 6.00. NCR Note: No credit will be retained if this course is taken after successful completion of SC/CHEM 1000 3.00 or SC/CHEM 10001 3.00. Not open to any students enrolled in the Chemistry program.

SC/NATS 1840 6.00 Science, Technology and the Environment. Environmental issues, how they arise, and an exploration of possible solutions to present and future problems. Topics include pollution, water quality, biodiversity, resource usage, population, global warming, and medical consequences of environmental changes. Three lecture hours. Two terms. Six credits. Course credit exclusions: AK/NATS 1790 6.00, ES/ENVS 1500 6.00, SC/NATS 1640 6.00, SC/NATS 1770 6.00. Note: Not open to any students enrolled in the Faculty of Environmental Studies.

SC/NATS 1850 6.00 Science and Pseudoscience. Such topics as astrology, extrasensory perception, the ideas of Velikovsky, as examples of beliefs which meet with little approval in the scientific community. Methodological and social criteria by which science functions in contrast with the attitudes prevalent among those operating along its fringes. Three lecture hours. Two terms. Six credits. Course credit exclusion: AK/NATS 1850 6.00.

SC/NATS 1855 6.00 Frontiers in Modern Science. The concept of the frontier as a zone of exploration and innovation in science and technology will be presented. The historical role of society's exploration of frontiers within the natural world and the resulting growth of science and technology will be reviewed. Three lecture hours. Two terms. Six credits. Course credit exclusion: AK/NATS 1830 6.00.

SC/NATS 1860 6.00 Science: Past, Present and Future. Modern science has drastically changed our lives and how we perceive the world and will do so in future. This course explores, through case studies of revolutions in biological and physical sciences, how scientists work, experiment, theorize, communicate and debate. Three lectures and one hour online tutorial per week. Two terms. Six credits.

SC/NATS 1870 6.00 Understanding Colour. A cross-disciplinary approach in examining colour, with the aim of understanding colour from the multiple viewpoints of art, physics, chemistry, physiology and history. Topics include: perception, wave nature of light, spectroscopy, colour harmony and contrast, natural phenomena, dyes and pigments. Three lecture hours. Two terms. Six credits. Course credit exclusion: AK/NATS 1870 6.00.

GL/NATS 1880 6.00 Human Reproduction and Development. A biological examination of human reproduction and development. Emphasis is on: conditions of fertility and infertility; stages of embryonic/fetal development; generic and environmental factors relating to birth defects.

SC/NATS 1880 6.00 Life Beyond Earth. This course considers the various factors required for life to exist beyond Earth, both life that may have evolved elsewhere and what would be necessary for humans moving out into space. Three lecture hours per week plus alternate week tutorial/laboratory sessions of two hours. Two terms. Six credits. Course credit exclusions: SC/NATS 1740 6.00, AK/NATS 1720 6.00, AK/NATS 1730 6.00. NCR Note: Not open to any student who has passed or is taking SC/PHYS 1070 3.00. Not open to any students enrolled in the Astronomy program.

GL/NATS 1890 6.00 Introduction to the Science, Technology and Society. Introduction to the intellectual and sociocultural context of science and technology. The course will deal with the impact of scientific and technological developments on societies, both past and present. Topics include: historical origins of modern science; science and the humanities; and ethical and philosophical controversies endangered by scientific/technological advances (e.g. biotechnology, computers).

SC/NATS 1910 6.00 Food, Science and Technology. A study of what food is, where it comes from and the roles various foods play in human nutrition and health. Topics include scientific and technological aspects of modern food production such as genetics, farming, fishing, and beverage industries. Three lecture hours. Two terms. Six credits.

GL/NATS 2300 3.00 Écologie générale. Ce cours offre une introduction aux étudiant(e)s en arts libéraux à l'étude scientifique des relations entre les organismes et leur environnement physique et biologique. Les principes généraux serviront à interpréter la distribution, l'abondance et les caractéristiques des organismes dans l'espace et le temps.

Language of Instruction: French

GL/NATS 2300 3.00 General Ecology. This course is an introduction for non-science majors to the scientific study of relationships between organisms and their physical and biological environments. General principles will be used to interpret patterns in the distribution, abundance, and characteristics of organisms in space and time. Course credit exclusion: GL/NATS 1760 3.00(EN).

GL/NATS 2310 3.00 Conservation Biology. Conservation biology has merged as a major new subject area addressing the alarming loss of biological diversity throughout the world. The number of species that are becoming endangered or vulnerable is unprecedented and continues to accelerate. This course explores means of prevention of loss, the causes of species declines and the effect of human intervention. The goals of this course are to understand concepts and theories underlying conservation biology, to develop critical thinking in matters related to biodiversity (both scientifically and politically) and to learn tools used by conservation biologists to protect diversity.

GL/NATS 2400 6.00 Introduction aux sciences de la terre et de l'univers. Ce cours offre aux étudiants les connaissances de base des Sciences de la terre et de l'Univers. Son contenu couvre les disciplines suivantes des sciences de la terre : géologie générale, sédimentologie, tectonique et Géostatistique ainsi que la cosmologie.

Language of Instruction: French

SC/NATS 2700 6.00 Science for Teachers. A study of key ideas in the physical, life, earth, space and environmental sciences necessary to teach the Ontario elementary science curriculum. The social dimensions of science and technology, especially relating to Canada, are integrated with the scientific material. Three lecture hours per week. Two laboratory hours every other week. Two terms. Six credits. Note: Normally open only to those coregistered in the Faculty of Education primary/junior or junior/intermediate programs or planning to apply for those programs. Note: This course fulfills the University's general education requirement for non-science students. Course credit exclusion: SC/NATS 2700 9.00.

GL/NATS 2910 6.00 Medieval Technology, Practice and Theory. A history of technology in the Middle Ages and the economic, social and political ramifications of its use.

Cross-listed to: GL/HIST 2910 6.00, GL/NATS 2910 6.00

GL/NATS 2910 6.00 Technologie du moyen âge : pratique et théorie. Histoire de la technologie employée au cours du moyen âge, les ramifications économiques, sociales, et politiques de son emploi.

Language of Instruction: French

Cross-listed to: GL/HIST 2910 6.00, GL/NATS 2910 6.00

GL/NATS 2920 6.00 Science médiévale, pensée et pratique. Histoire de la pensée scientifique au moyen âge, ses divisions, sa portée, et sa place sociale.

Language of Instruction: French

Cross-listed to: GL/HIST 2920 6.00, GL/NATS 2920 6.00

GL/NATS 2920 6.00 Medieval Science: Thought and Practice. A history of scientific thought in the Middle Ages, its divisions, its scope and its place in medieval society.

Cross-listed to: GL/HIST 2920 6.00, GL/NATS 2920 6.00

GL/NATS 3100 6.00 Travail individuel. Tout étudiant choisit un programme d'étude individuel qu'il mènera à bien sous la direction d'un professeur du collège. Attention : Tous les Travaux individuels offerts dans le cadre d'Études pluridisciplinaires à Glendon sont régis par des règlements précis, que le secrétariat d'Études pluridisciplinaires tient à la disposition des étudiants. (Étant donné qu'il n'existe aucune garantie que

ce projet soit accepté, on conseille vivement à l'étudiant de s'inscrire dans un autre cours jusqu'à ce qu'une décision soit prise.)

Language of Instruction: French

GL/NATS 3100 6.00 Individual Studies. Students do independent reading and research together with written assignments under the guidance of a member of the college. All individual studies in multidisciplinary studies at Glendon are subject to specific regulations which the department will supply on request. (Since there is no assurance that a proposed project will be accepted, the student is encouraged to enrol in another course until a decision is made concerning the proposal.)

GL/NATS 3200 6.00 Historical Trends in Human-Environmental Interrelationships. This course examines the profound impact of ancient environments upon living organisms, with reference to specific biological problems such as extinction. Early Paleolithic humans interacted with various natural ecosystems, which became modified as a result. The subsequent historical impact of human activities on the environment resulted in a trend of increasing pressures upon animal populations, world vegetation and soils. Current urban-rural land use conflicts and conservation problems exemplify the modern impact. Prerequisite: GL/NATS 1540 6.00 or GL/NATS 2300 3.00 or permission of the department.

GL/NATS 3205 3.00 Human-Insect Interactions. This course offers an overview of the multifaceted relationships between the human species and insects. It will include an introduction to entomology. The following aspects will be discussed: economic, health and environmental impact of insects, insects in arts, culture, mythology, phobia etc.

GL/NATS 3215 3.00 Communication and Sensory Ecology. This course explores the various categories of signals used by animals in a variety of contexts, and the sensory channels which allow these signals to be sent and received. Other topics include: honest and deceitful communication; Games Theory and Information Theory applications; bird songs; echolocation; bioluminescence; and the evolution of communication. Prerequisite: GL/NATS 1540 6.00 or GL/NATS 2300 3.00 or permission of the Department.

GL/NATS 3230 6.00 Génétique et santé humaine. Le cours présente les bases cellulaires et moléculaires de la génétique. Il adopte une approche historique de la génétique moderne mendélienne et classique. Il vise à initier les étudiants à l'analyse génétique à la thérapie génique, il aborde les problèmes actuels de la bioéthique, où l'être humain passe l'objet à soigner à l'objet à améliorer et à transformer. Condition(s) préalables : cours de biologie niveau secondaire/CEGEP ou GL/NATS 1540 6.00. Cours incompatibles : GL/NATS 2010 6.00 (2001-2002), GL/NATS 3010 6.00 (2002-2003).

Language of Instruction: French

GL/NATS 3310 3.00 Environmental Impact Assessment. This course offers a review of the methodology involved in environmental impact and risk assessments, with an emphasis on the Canadian process and legislation. Biological methodologies as well as management, planning and other assessment tools will be examined. Prerequisite: GL/NATS 1540 6.00 or GL/NATS 2300 3.00 or permission of the department.

GL/NATS 3500 6.00 Chimie de l'environnement. Ce cours fournit aux étudiants les bases scientifiques nécessaires pour comprendre l'impact de la chimie industrielle sur l'environnement. Les thèmes abordés couvrent, entre autres, les sources de la pollution de l'air, de l'eau, et du sol, la dissémination de la pollution dans la biosphère, ses effets, et le contrôle que l'on doit exercer.

Language of Instruction: French

GL/NATS 3629 3.00 Environmentalism as a Social Movement. This course examines environmentalism from the perspective of social movement analysis. It covers varieties of environmentalism, organizations that embody and articulate these various forms, the institutionalization of environmentalism in governments and the impact of environmentalism on the private sector. Course credit exclusion: GL/SOCI 3980 6.00.

Cross-listed to: GL/NATS 3629 3.00, GL/SOCI 3629 3.00, GL/SOSC 3629 3.00

GL/NATS 3635 3.00 Health Psychology. This course examines psychological contributions to health maintenance, prevention and treatment of illness, and to the identification of correlates of specific conditions in health and illness. Prerequisite: GL/PSYC 2510 6.00. Course credit exclusions: AK/PSYC 3170 3.00, GL/PSYC 3010 3.00 (Fall/Winter 1988-1989, Fall/Winter 1989-1990, Fall/Winter 1991-1992) and GL/PSYC 3700 3.00.

Cross-listed to: GL/NATS 3635 3.00, GL/PSYC 3635 3.00

GL/NATS 3635 3.00 Psychologie de la santé. La psychologie de la santé constitue un secteur d'activité en pleine effervescence. Le cours mettra l'emphase sur le rôle scientifique de la psychologie appliqué aux problèmes de santé, le stress psychologique ainsi que plusieurs variables moderatrices. Condition préalable : GL/PSYC 2510 6.00. Cours incompatibles : AK/PSYC 3170 3.00, GL/PSYC 3010 3.00 (Fall/Winter 1988-1989, Fall/Winter 1989-1990, Fall/Winter 1991-1992) and GL/PSYC 3700 3.00.

Cross-listed to: GL/NATS 3635 3.00, GL/PSYC 3635 3.00

GL/NATS 3640 3.00 La Psycholinguistique. Ce cours examinera les concepts, les théories, et les recherches empiriques les plus importants dans l'étude du langage en tant que système symbolique et en tant qu'activité motrice biologique. On traitera de l'acquisition du langage, du bilinguisme, et de la relation entre le langage et la pensée. Condition préalable : GL/PSYC 2510 6.00 ou l'équivalent. Cours incompatible : AK/PSYC 3190 3.00.

Language of Instruction: French

Cross-listed to: GL/LIN 3640 3.00, GL/NATS 3640 3.00, GL/PSYC 3640 3.00

GL/NATS 3640 3.00 Psychological Studies of Language. Human language is unique among communication systems in its richness, complexity of structure, and function. This course examines language both as a symbolic system and as a motor activity produced by a biological organism. Topics include language acquisition, bilingualism and the interrelationship between language and thinking. Prerequisite: GL/PSYC 2510 6.00 or equivalent. Course credit exclusion: AK/PSYC 3190 3.00.

Cross-listed to: GL/LIN 3640 3.00, GL/NATS 3640 3.00, GL/PSYC 3640 3.00

GL/NATS 3650 3.00 History of Experimental Psychology. This course introduces the student to the main lines of development of scientific psychology, as well as to the major theoretical systems which have emerged within psychology. Prerequisite: GL/PSYC 2510 6.00 or equivalent. Course credit exclusion: AK/PSYC 3470 3.00.

Cross-listed to: GL/NATS 3650 3.00, GL/PSYC 3650 3.00

GL/NATS 3658 3.00 Genetic Technology: Its Applications to Industry, Medicine and Agriculture. This course will focus on DNA technology and its use in areas of health, medicine, pharmaceuticals, forensic science and animal and plant breeding. Ethical, legal, medical and environmental safety issues arising from the application of DNA technology will be discussed, using Canadian examples where possible. Course credit exclusion: GL/NATS 3010C 3.00 (Fall 1996).

Cross-listed to: GL/CDNS 3658 3.00, GL/NATS 3658 3.00

GL/NATS 3670 3.00 Psychobiology. This course reviews the physiological basis of behaviour including elements of neuroanatomy, psycho-physiology, neuropsychology and psycho-pharmacology. Prerequisite: GL/PSYC 2510 6.00 or equivalent. Course credit exclusion: AK/PSYC 2240 3.00.

Cross-listed to: GL/NATS 3670 3.00, GL/PSYC 3670 3.00

GL/NATS 3675 3.00 L'humain comme espèce primate. Ce cours veut examiner la psychologie humaine de la perspective de notre histoire comme espèce dans l'ordre biologique Primata. Le cours discutera les connaissances actuelles sur les primates nonhumains de différentes perspectives - comparative, développementale, évolutionnaire - afin d'explorer leurs implications pour les humains. Cours incompatible : AK/PSYC 3280 3.00.

Language of Instruction: French

Cross-listed to: GL/NATS 3675 3.00, GL/PSYC 3675 3.00

GL/NATS 3675 3.00 Humans as Primates: Comparative Evolutionary Views. This course discusses non-human primate research from comparative, developmental and evolutionary perspectives, focusing on its implications for human psychology. Topics may include primate evolution (brain/behaviour) and ecology, parenting, mating, social dominance/affiliation, language, deception, self-awareness, cognition and imitation. Prerequisite: GL/PSYC 2510 6.00. Course credit exclusions: AK/PSYC 3280 3.00, GL/PSYC/NATS 3010 3.00 (Winter 1994, Winter 1995, Winter 1997).

Cross-listed to: GL/NATS 3675 3.00, GL/PSYC 3675 3.00

GL/NATS 3680 3.00 L'évolution du comportement chez les animaux. Ce cours examinera les concepts et les recherches empiriques les plus importantes dans l'étude de l'évolution du comportement, et portera principalement sur les animaux, mais aussi, sur l'homme. Le cours traitera de l'évolution de la perception, de l'apprentissage, de la physiologie, de la reproduction, de l'alimentation, du comportement social etc. La théorie de l'évolution par sélection naturelle sera discutée. Condition préalable : GL/PSYC 2510 6.00 ou l'équivalent. Cours incompatible : AK/PSYC 3420 3.00.

Language of Instruction: French

Cross-listed to: GL/NATS 3680 3.00, GL/PSYC 3680 3.00

GL/NATS 3680 3.00 Evolution of Behaviour in Animals. Research and theory with animals are considered. Perspectives in evolution, ethology, sociobiology and psychology are dealt with. Topics covered include facial, vocal and spatial communications; perception, learning and reproduction. Prerequisite: GL/PSYC 2510 6.00 or equivalent. Course credit exclusions: AK/PSYC 3420 3.00, AK/PSYC 3280 3.00.

Cross-listed to: GL/NATS 3680 3.00, GL/PSYC 3680 3.00

GL/NATS 3690 3.00 Perception. This course focuses on the nature of light, the eye and the visual nervous system. Early vision (encoding light and pattern) and higher order vision (encoding surfaces and objects) are covered. Neurobiological mechanisms are underlined. The auditory system is also covered. Prerequisite: GL/PSYC 2510 6.00. Course credit exclusions: AK/PSYC 3270 3.00, GL/PSYC 3290 3.00, AK/PSYC 2220 3.00.

Cross-listed to: GL/NATS 3690 3.00, GL/PSYC 3690 3.00

GL/NATS 3720 6.00 Environmental Problems. This course examines selected topics are selected from recent literature in biology and relevant economic, political, geographical and ethical studies. These interpretations emphasize the holistic approach to modern ecological problems, including Canadian examples. Contrasting viewpoints are examined. Prerequisite: GL/NATS 1540 6.00 or GL/NATS 2300 3.00 or permission of the department.

GL/NATS 3720 6.00 Problèmes environnementaux. Ce cours aborde des sujets choisis à partir de la littérature récente en biologie de même qu'en économie, science politique, géographie etc., dans le but d'accentuer l'approche holistique des problèmes environnementaux (en incluant des exemples canadiens). Des points de vue conflictuels seront examinés. Condition préalable : GL/NATS 1540 6.00 ou GL/NATS 2300 3.00 ou permission du département.

Language of Instruction: French

GL/NATS 3970 6.00 Socio-Politics of Science. An examination of the interaction between science and socio-political institutions, with particular focus on the biological sciences. Topics include: government science policy, politicalization of the scientific community, science and public policy (e.g. genetic counselling, food and drug legislation); legal and ethical problems of biomedical research.

Cross-listed to: GL/NATS 3970 6.00, GL/POLS 3970 6.00

GL/NATS 3995 6.00 Les femmes et la santé. Sous une perspective historique et sociologique, ce cours aborde ces sujets: la santé physique et mentale des femmes, les traitements qu'elles reçoivent au sein de la

profession médicale, leurs rôles en tant que guérisseuses au sein de cette profession. Cours incompatible: Aucun.

Language of Instruction: French

Cross-listed to: AK/WMST 3507 6.00, AS/WMST 3507 6.00, GL/NATS 3995 6.00, GL/SOSC 3995 6.00, GL/WMST 3507 6.00

GL/NATS 4000 6.00 Honours Thesis. Please consult department as specific regulations apply. Prerequisite: Permission of the Chair of the Department of Multidisciplinary Studies.

GL/NATS 4645 3.00 Topics in the Philosophy of Descartes. A variety of topics in Descartes' philosophy will be examined in this course. Students may only take one course under this rubric. Descartes' philosophy will be studied in historical context. Emphasis will be placed on Descartes' participation in the scientific revolution and his assessment of its philosophical implications, particularly those concerning human nature and the possibility of knowledge (including self-knowledge) and human freedom. Topics may change from year to year. Integrated with GS/PHIL 5150 3.00. Prerequisite: GL/PHIL 2520 6.00(EN) or permission of the instructor. Course credit exclusions: GL/PHIL 4640 3.00(EN) and GL/NATS 4640 3.00(EN).

Non-Profit Management – Arts

Certificate Office:

Department of Political Science, S672 Ross Building, 416-736-5265

York University students may earn a Certificate in Non-Profit Management concurrent with fulfillment of the requirements for a bachelor's degree. This certificate is open to students in all undergraduate Faculties except for students enrolled in the Schulich School of Business Bachelor of Business Administration program or the Atkinson Bachelor of Administrative Studies program. Students may not earn both a Certificate in Business Fundamentals and a Certificate in Non-Profit Management.

For specific certificate requirements and the list of certificate courses, please consult the Faculty of Arts Programs of Study section of this calendar.

Courses in Nursing

HH/NURS 1000D 30.00 Collaborative Nursing - Durham. First Year Nursing completed at Durham College.

HH/NURS 1000G 30.00 Collaborative Nursing - Georgian. First year Nursing completed at Georgian College.

HH/NURS 1000S 30.00 Collaborative Nursing - Seneca. First year Nursing completed at Seneca College.

HH/NURS 1900 6.00 Health & Healing: Nursing in the Context of Wellness. Introduces students to the foundation of nursing practice through classroom, laboratory, and practicum settings. A wellness focus frames exploration of lifespan issues. Introduces nursing therapeutics through theory and practice of the fundamental healing arts. Open only to: students enrolled in the second entry BScN program. Course credit exclusion: None.

HH/NURS 1950 3.00 Development of Self as Nurse: Foundations of Nursing: Thinking, Communicating, and Relating. Introduces students to the discipline of nursing by exploring its evolution, key concepts, processes and obligations. "Philosophy is to be studied, not for the sake of any definite answers to its questions, since no definite answers can, as a rule, be known to be true, but rather for the sake of the questions themselves; because these questions enlarge our conception of what is possible, enrich our intellectual imagination and diminish the dogmatic assurance which closes the mind against speculation; but above all because, through the greatness of the universe which philosophy contemplates, the mind also is rendered great, and becomes capable of that union with the universe which constitutes its highest good." (Bertrand Russell)

GL/PHIL 4645 3.00 Topics in the Philosophy of Descartes. A variety of topics in Descartes' philosophy will be examined in this course. Students may only take one course under this rubric. Descartes' philosophy will be studied in historical context. Emphasis will be placed on Descartes' participation in the scientific revolution and his assessment of its philosophical implications, particularly those concerning human nature and the possibility of knowledge (including self-knowledge) and human freedom. Topics may change from year to year. Integrated with GS/PHIL 5150 3.00. Prerequisite: GL/PHIL 2520 6.00(EN) or permission of the instructor. Course credit exclusions: GL/PHIL 4640 3.00(EN) and GL/NATS 4640 3.00(EN).

Cross-listed to: GL/NATS 4645 3.00, GL/PHIL 4645 3.00

AS/PHIL 4750 6.00 Honours Thesis in Cognitive Science. Students carry out an individual piece of research in cognitive science in consultation with a thesis supervisor and write a thesis. Course credit exclusions: None.

Cross-listed to: AS/COGS 4750 6.00, AS/PHIL 4750 6.00

AS/PHIL 4800 3.00 Core Theoretical Philosophy I. This course offers an advanced survey of some central themes in contemporary theoretical philosophy. It is designed to ensure that students have sufficient background to pursue graduate-level research in these areas. Prerequisite: At least 30 credits in philosophy (PHIL) and permission of the course director. Course credit exclusions: None.

AS/PHIL 4802 3.00 Core Practical Philosophy I. This course offers an advanced survey of some central themes in contemporary practical philosophy. It is designed to ensure that students have sufficient background to pursue graduate-level research in these areas. Prerequisite: At least 30 credits in philosophy (PHIL) and permission of the course director. Course credit exclusions: None.

AS/PHIL 4900 6.00 Honours Seminar. The focus of this course will vary from year to year. Please consult the philosophy supplemental calendar for further information. Prerequisite: 18 credits in philosophy. Course credit exclusions: None.

Physics and astronomy are quantitative sciences which employ the scientific method of observation, experiment and systemization of the results of experiment. Their objectives are to seek to understand the ways in which the most fundamental or elementary systems in nature really operate.

Courses in the Department of Physics and Astronomy cover basic elements of the major topics delineated during the last 200 years in these rapidly developing fields of knowledge. There are certain required courses (see the program of study requirements in the Faculty of Science and Engineering Programs of Study section of this calendar) which expose each student to the broad spectrum of physical phenomena and in an elementary way to the techniques of the theoretical physicist or astronomer in numerical analysis and modelling and of the experimental physicist or observational astronomer in measurement, observation and the apparatus of experiment. In developing programs of 3000- and 4000-level courses, students may concentrate their interests around experimental physics, theoretical physics, or astronomy and astrophysics. There are opportunities to develop Honours Double Major and Honours Major/Minor programs with other disciplines in the Faculty of Science and Engineering or in other Faculties.

The department offers Specialized Honours applied science streams in applied physics and in space science, developed to meet the needs of rapidly expanding technologies in these fields. The requirements for these streams are found in the Faculty of Science and Engineering Programs of Study section of this calendar.

A brochure giving detailed course descriptions and typical program prescriptions for all programs involving physics and astronomy is available on request from the department office.

Courses in Physics and Astronomy

Admission to any course beyond the 1000 level requires consultation with a member of the departmental admissions committee. Normally, entry to courses at the 3000 and 4000 levels requires successful completion of all lower-level courses that are required for degree programs in Physics and Astronomy. The prerequisites and corequisites stated for certain courses indicate the standard of background preparation deemed necessary for those not taking bachelor or Honours Physics and Astronomy programs. The course director should be consulted by potential entrants who have not completed the normal entry requirements of the department.

Unless otherwise specified, courses whose numbers end in "6.00" (i.e. six-credit courses) have three lecture hours per week for two terms when

taught in a fall/winter session; those whose numbers end in "3.00" (i.e. three-credit courses) have three lecture hours per week for one term. Courses offered in the evening and/or in a summer session may have different formats and scheduling, though they will be equivalent in credit value.

SC/PHYS 1010 6.00 Physics. Topics include linear, rotational and oscillatory motion; Newtonian mechanics; gravitation; electrostatics; magnetostatics; electric current and induction; heat; geometrical and physical optics and sound. Differential and integral calculus and vector algebra are used. This course covers fewer topics than SC/PHYS 1410 6.00, but covers them in greater depth. It should be taken by all those likely to enrol in 2000-level physics courses. Includes three hour laboratory component normally in alternating weeks. Prerequisite: OAC Physics or 12U Physics or SC/PHYS 1510 4.00. Corequisite(s): AS/SC/MATH 1013 3.00 and AS/SC/MATH 1014 3.00, or AS/SC/MATH 1505 6.00, or equivalents. Course credit exclusion: SC/PHYS 1410 6.00.

SC/PHYS 1019 0.00 Tutorial for SC/PHYS 1010 6.00. Students enrolled in SC/PHYS 1010 6.00 must also enrol in this mandatory tutorial.

SC/PHYS 1070 3.00 Fundamentals of Astronomy. An introduction to the foundations of astronomy and astrophysics. The course covers basic measurement concepts and techniques, and gives an overview of the properties and workings of planets and stars. Prerequisite: OAC Physics or 12U Physics or SC/PHYS 1510 4.00. Prerequisite or corequisite: AS/SC/MATH 1013 3.00 or AS/SC/MATH 1505 6.00 or equivalent.

SC/PHYS 1410 6.00 Physical Science. Topics include kinematics, dynamics, momentum and energy for linear and rotational motion; elementary kinetic theory and thermodynamics; static and current electricity; waves and physical and geometrical optics, elements of modern physics. Recommended for students unlikely to enrol in 2000-level physics courses. Includes three hour laboratory component normally in alternating weeks. Prerequisite: OAC Physics or 12U Physics or SC/PHYS 1510 4.00, OAC Algebra and OAC Calculus or 12U Advanced Functions & Introductory Calculus. This is a calculus-based course making use of elementary differential and integral calculus. Course credit exclusion: SC/PHYS 1010 6.00.

SC/PHYS 1419 0.00 Tutorial for SC/PHYS 1410 6.00A. Students enrolled in SC/PHYS 1410 6.00 must also enrol in this mandatory tutorial.

SC/PHYS 1510 4.00 Introduction to Physics. An introductory course for students lacking adequate preparation for SC/PHYS 1010 6.00 or SC/PHYS 1410 6.00. Topics involve Newton's laws applied to linear and angular motion, force, inertia, torque, impulse, momentum, centre of mass, work, energy, oscillatory motion, geometric optics (including lenses and mirrors). No calculus is used, but vectors are used extensively. Three lecture hours per week, a laboratory session alternating weekly with a tutorial session. One term. Prerequisite: Ontario Grade 11 Functions and Relations (new curriculum) or Ontario Grade 12 Advanced Mathematics (old curriculum). Note: May not be taken by any student who has taken or is currently taking another University course in physics.

SC/PHYS 2010 3.00 Classical Mechanics. Newtonian mechanics of mass points and rigid bodies. Accelerated reference frames and rotational motion, centrifugal and Coriolis forces. Central force motion in celestial mechanics. Euler's equations: precession and nutation in the gyroscope. Prerequisites: SC/PHYS 1010 6.00, or a minimum grade of C in SC/PHYS 1410 6.00; AS/SC/MATH 1014 3.00 or equivalent; AS/SC/MATH 1025 3.00 or equivalent. Corequisite: AS/SC/MATH 2015 3.00.

SC/PHYS 2020 3.00 Electricity and Magnetism. The elements of electric and magnetic fields are developed together with DC and AC circuit theory. Prerequisites: SC/PHYS 1010 6.00, or a minimum grade of C in SC/PHYS 1410 6.00. Corequisite: AS/SC/MATH 2015 3.00.

SC/PHYS 2030 3.00 Computational Methods for Physicists and Engineers. The symbolic and numeric computing environments provided by Maple and Matlab are used to solve problems in mechanics and electromagnetism. Prerequisites: SC/PHYS 1010 6.00 or SC/PHYS 1410 6.00; One of AK/AS/SC/CSE 1020 3.00, AK/AS/SC/COSC 1020 3.00, AK/AS/SC/CSE 1540 3.00 or AK/AS/SC/COSC 1540 3.00; AS/SC/MATH

1014 3.00 or equivalent. Corequisite: AS/SC/MATH 2015 3.00 or equivalent.

SC/PHYS 2040 3.00 Relativity and Modern Physics. An introduction to the theories of relativity and quantum mechanics. Relativistic concepts of space, time and energy are presented. The quantum nature of radiation and matter is introduced. Prerequisites: SC/PHYS 1010 6.00, or a minimum grade of C in SC/PHYS 1410 6.00.

SC/PHYS 2060 3.00 Optics and Spectra. An introductory course in optics covering the following topics: wave nature of light, reflection, refraction, spherical mirrors and lenses, interference, diffraction, polarization, introduction to lasers. Prerequisites: SC/PHYS 1010 6.00, or a minimum grade of C in SC/PHYS 1410 6.00; AS/SC/MATH 1014 3.00 or equivalent; AS/SC/MATH 1025 3.00 or equivalent.

SC/PHYS 2070 3.00 Galaxies and the Universe. An introduction to the structure, evolution and origin of galaxies, aggregates of galaxies and the universe as a whole. Relevant details of stellar evolution are encompassed. Topics such as supernovae, pulsars, black holes, quasars, density waves, the cosmic web, cosmic expansion and dark constituents of the universe are included. Prerequisite: OAC Physics or 12U Physics or SC/PHYS 1510 4.00; SC/PHYS 1070 3.00, or SC/NATS 1740 6.00 and permission of the instructor.

SC/PHYS 2211 1.00 Experimental Electromagnetism. An introductory laboratory course for second-year students. The course consists of 10 experiments covering basic concepts of electromagnetism. Normally three laboratory hours per week. One term. One credit. Prerequisite: SC/PHYS 1010 6.00 or a minimum grade of C in SC/PHYS 1410 6.00. Corequisite(s): SC/PHYS 2020 3.00.

SC/PHYS 2212 1.00 Experimental Physics. An introductory laboratory course based on lasers and modern optics. Includes different experiments than those completed in SC/PHYS 2211 1.00. Normally three laboratory hours per week. One term. One credit. Prerequisite: SC/PHYS 1010 6.00 or SC/PHYS 1410 6.00, SC/PHYS 2211 1.00. Corequisite: SC/PHYS 2060 3.00 recommended.

SC/PHYS 2213 3.00 Experimental Physics with Data Analysis. Experiments in Electricity and Magnetism and in Modern Optics. Basic methods for analyzing experimental data and understanding statistical and systematic errors. Three laboratory hours per week, one lecture hour every two weeks. Two terms. Three credits. Prerequisites: SC/PHYS 1010 6.00, or a minimum grade of C in SC/PHYS 1410 6.00. Corequisites: SC/PHYS 2020 3.00, SC/PHYS 2060 3.00 recommended.

SC/PHYS 3001 1.00 Organization and Management Seminar in Space and Communication Sciences. A seminar course taught by guest speakers from industry, government and the University. Content changes from year to year, but includes such topics as professional ethics, communications regulations, space law, space science policy, project management, privacy and security issues in computing. One lecture hour in alternate weeks. Two terms. Prerequisite: Eligibility to proceed in the Specialized Honours stream in Space and Communication Sciences beyond the 2000-level requirements, or permission of the course director. Course credit exclusions: AS/SC/CSE 3002 1.00, AS/SC/COSC 3002 1.00.

Cross-listed to: SC/CSE 3001 1.00, SC/EATS 3001 1.00, SC/PHYS 3001 1.00

SC/PHYS 3010 3.00 Classical Mechanics. Intermediate classical mechanics, including dynamics of particles and systems of particles. Lagrange's equations and Hamilton's equations. Prerequisites: SC/PHYS 2010 3.00; AS/SC/MATH 2015 3.00; AS/SC/MATH 2271 3.00.

SC/PHYS 3020 3.00 Electromagnetics I. Electrostatic and magnetostatic fields, derived from charge and current distributions studied in vacuum and in material media. Prerequisites: SC/PHYS 2020 3.00; AS/SC/MATH 2015 3.00; AS/SC/MATH 2271 3.00

SC/PHYS 3030 3.00 Statistical and Thermal Physics. Statistical mechanics of systems of large numbers of elements. Probability, ensembles, fluctuations. Applications: spin magnetism, electrons in

metals, radiation, specific heats of solids. Transport theory. Prerequisites: SC/PHYS 2020 3.00; AS/SC/MATH 2015 3.00; AS/SC/MATH 2271 3.00.

SC/PHYS 3040 6.00 Modern Physics. Survey of the basis of contemporary physics: introduction to elementary wave mechanics, and the quantum theory of atoms, molecules, solids, nuclei, elementary wave mechanics and elementary particles. Prerequisites: SC/PHYS 2010 3.00; SC/PHYS 2020 3.00; SC/PHYS 2060 3.00; AK/AS/SC/MATH 1025 3.00; AK/AS/SC/MATH 2015 3.00; AS/SC/MATH 2271 3.00.

SC/PHYS 3050 3.00 Electronics I. Introduction to physical electronics including DC and AC circuit theory and network analysis; bandpass filter; introduction to the p-n junction and semiconductor devices: diodes, DC power supplies, transistors, analysis and design of basic amplifiers, operational amplifiers. With laboratory exercises. Two lecture hours, three laboratory hours. One term. Prerequisites: SC/PHYS 1010 6.00; SC/PHYS 2020 3.00 and SC/PHYS 2211 1.00 recommended.

SC/PHYS 3070 3.00 Planets and Planetary Systems. Survey of planetary astrophysics. Specific emphases vary, Topics include: the formation and evolution of planetary systems; the search for and discovery of extra-solar planets; current knowledge of the atmospheres, interiors and surfaces of planets, satellites and minor bodies within the Solar System. Prerequisite: SC/PHYS 1010 6.00 or SC/PHYS 1410 6.00 with a minimum grade of C; SC/PHYS 1070 3.00, Prerequisite(s) or corequisite: AS/SC/MATH 2015 3.00; AS/SC/MATH 2271 3.00.

SC/PHYS 3080 3.00 Atmospheric Radiation and Thermodynamics. Applications of basic thermodynamic principles to dry and moist atmospheric situations. Solar (short wave) and terrestrial (long wave) radiation with respect to absorption and scattering processes involving atmospheric atoms, molecules, aerosol particles and clouds. Three lecture hours. One term. Three credits. Prerequisites: AS/SC/MATH 2015 3.00; AS/SC/MATH 2271 3.00; SC/PHYS 1010 6.00, or a minimum grade of C in SC/PHYS 1410 6.00.

Cross-listed to: SC/EATS 3030 3.00, SC/PHYS 3080 3.00

SC/PHYS 3150 3.00 Electronics II. The concept of feedback and its use in circuits employing operational amplifiers; analysis/design of such circuits, including amplifiers, filters, oscillators, pulse generators; digital concepts and logic circuits with applications to data manipulation (computers) and storage. Laboratory exercises and project. Two lecture hours, three laboratory hours. One term. Prerequisite: SC/PHYS 1010 6.00; and SC/PHYS 3050 3.00 recommended.

SC/PHYS 3220 3.00 Experiments in Modern Physics. A selection of experiments in fluid mechanics, electromagnetism, optics, and atomic, nuclear, and particle physics. Analysis of the data and detailed write-ups are required. One lecture hour which is devoted to techniques of data analysis and three laboratory hours per week. Prerequisites: SC/PHYS 2020 3.00; SC/PHYS 2060 3.00; SC/PHYS 2213 3.00. Corequisite: SC/PHYS 3040 6.00. Course credit exclusion: SC/PHYS 3210 6.00.

SC/PHYS 3250 3.00 Introduction to Space Communications. The course covers all aspects of communications between spacecraft and ground stations. Topics include orbital aspects of satellites and interplanetary spacecraft and ground stations, transmission, reception, link equations, modulation, multiplexing techniques and access to a satellite. Prerequisite: SC/PHYS 2020 3.00.

SC/PHYS 3280 3.00 Physics of the Space Environment. An introduction to the physical processes of the upper atmosphere, the ionosphere, the magnetosphere and the heliosphere, and the interactions that occur with space vehicles that traverse these regions of space. Prerequisites: SC/PHYS 2020 3.00, AS/SC/MATH 2015 3.00, AS/SC/MATH 2271 3.00.

Cross-listed to: SC/EATS 3280 3.00, SC/PHYS 3280 3.00

SC/PHYS 3310 3.00 Space Mission Design. This course covers the basic aspects of space mission design including: mission types, objectives, technical readiness, risk mitigation, subsystems, and public

outreach. Three lecture hours. Prerequisites: SC/ENG 2000 6.00 or permission of the instructor.

Cross-listed to: SC/ENG 3310 3.00, SC/PHYS 3310 3.00

SC/PHYS 3320 3.00 Microsystems Technology. The course covers the principles and implementations of miniaturised sensors and actuators in a range of physical domains, such as optical, magnetic, thermal, and mechanical systems. Examples include electronic cameras, micro-electro-mechanical systems, thermal microsystems and display technologies. Three lecture hours. Prerequisite: SC/PHYS 2020 3.00; SC/PHYS 2211 1.00; SC/PHYS 2060 3.00 recommended; SC/PHYS 2212 1.00 recommended. Corequisite: SC/PHYS 3050 3.00 recommended.

Cross-listed to: SC/ENG 3320 3.00, SC/PHYS 3320 3.00

SC/PHYS 3330 3.00 Space Engineering Materials. This course covers the basic behaviour and processing of engineering materials. The emphasis is on metals and alloys plus discussion of ceramics, plastics and composites. Three lecture hours. Prerequisite: SC/ENG 2000 6.00 or permission of the instructor.

Cross-listed to: SC/ENG 3330 3.00, SC/PHYS 3330 3.00

SC/PHYS 4001 6.00 Space and Communication Sciences Workshop. This course is intended to allow the student to carry out the development of a specific space project, under the supervision of a faculty member, a government scientist or an industrial associate. The equivalent of nine laboratory hours per week for two terms. Prerequisite: Satisfactory completion of the 3000-level courses in the space and communication sciences core. Course credit exclusions: SC/COSC 4001 6.00, AK/AS/SC/COSC 4080 3.00 or AK/AS/SC/CSE 4080 3.00, AK/AS/SC/CSE 4081 6.00, AK/AS/SC/CSE 4082 6.00, AK/AS/SC/CSE 4084 6.00.

Cross-listed to: SC/CSE 4001 6.00, SC/EATS 4001 6.00, SC/PHYS 4001 6.00

SC/PHYS 4010 3.00 Quantum Mechanics. Physical concepts and mathematical foundations of quantum mechanics. Emphasis on approximation methods, treatment of angular momentum, spin and their couplings. Introduction to relativistic quantum mechanics and scattering theory. Prerequisite: SC/PHYS 3040 6.00. Prerequisite(s) or corequisite(s): SC/PHYS 3020 3.00.

SC/PHYS 4011 3.00 Atomic and Molecular Physics. Application of quantum mechanics to atomic and molecular structure. One-electron systems, many electron atoms, Hartree-Fock approximation, fine structure, hyperfine structure, atom-laser interactions. Integrated with: GS/PHYS 5050 3.00. Prerequisite: SC/PHYS 4010 3.00.

SC/PHYS 4020 3.00 Electromagnetics II. Time-dependent electric and magnetic fields, Maxwell's differential equations in linear, isotropic, homogeneous conductors and dielectrics; the radiation and transmission of electromagnetic energy; relativistic transformation; scalar diffraction theory. Prerequisites: SC/PHYS 3020 3.00; SC/PHYS 2040 3.00

SC/PHYS 4040 3.00 Elementary Particle Physics. The properties of the fundamental particles (quarks and leptons), and the forces between them are studied. Topics include the interactions of particles with matter, symmetry principles and experimental techniques. Integrated with: GS/PHYS 5040 3.00. Prerequisites: SC/PHYS 2040 3.00, SC/PHYS 4010 3.00.

SC/PHYS 4050 3.00 Solid State Physics. The structural, mechanical, thermal, electrical and magnetic properties of crystalline solids are studied. Integrated with: GS/PHYS 5100 3.00. Prerequisites: SC/PHYS 3030 3.00; SC/PHYS 4010 3.00.

SC/PHYS 4060 3.00 Time Series and Spectral Analysis. Treatment of discrete sampled data involving correlation, convolution, spectral density estimation, frequency, domain filtering, and Fast Fourier Transforms. Three lecture hours. One term. Three credits. Integrated with: GS/ESS 5020 3.00. Prerequisites: AK/AS/SC/CSE 1540 3.00 or equivalent programming experience; AS/SC/MATH 2015 3.00; AS/SC/MATH 2271 3.00. Course credit exclusions: AK/AS/SC/CSE 3451 4.00, AK/AS/SC/CSE 3451 3.00, AS/SC/MATH 4130B 3.00, AS/SC/MATH 4930C 3.00.

Cross-listed to: AS/MATH 4830 3.00, SC/EATS 4020 3.00, SC/MATH 4830 3.00, SC/PHYS 4060 3.00

SC/PHYS 4061 3.00 Experimental Techniques in Laser Physics. Involves a selection of experiments in laser physics, with emphasis on techniques necessary for trapping neutral atoms with lasers. One lecture hour and one tutorial hour and two three hour laboratory sessions per week. Integrated with: GS/PHYS 5061 3.00. Prerequisites: SC/PHYS 2211 1.00 and SC/PHYS 2212 1.00, or SC/PHYS 2213 3.00; SC/PHYS 2020 3.00; SC/PHYS 2060 3.00. Corequisite: SC/PHYS 3040 6.00.

SC/PHYS 4062 3.00 Atom Trapping. Involves trapping atoms with lasers and investigating the properties of laser-cooled atoms. The course includes a set of lectures that cover theoretical concepts including basic properties of two-level atoms, radiation pressure, the laser cooling force, magnetic trapping, and the dipole force. One lecture hour and one tutorial hour per week and sixteen three hour laboratory sessions over a period of eight weeks. Integrated with: GS/PHYS 5062 3.00. Prerequisites: SC/PHYS 4061 3.00.

SC/PHYS 4070 3.00 Stars and Nebulae. The astrophysics of radiating matter in the universe. The course covers radiation processes, radiative transfer, interstellar matter, stellar atmospheres and stellar interiors. Normally offered in alternate years. Integrated with: GS/PHYS 5090 3.00. Prerequisites: SC/PHYS 1070 3.00; SC/PHYS 3030 3.00; SC/PHYS 3040 6.00. Prerequisite or Corequisite: SC/PHYS 3040 6.00.

SC/PHYS 4110 3.00 Dynamics of Space Vehicles. The dynamics of spacecraft in the near Earth and deep space environments, including the classical theory of orbits, the effects of perturbations on satellite orbits, rocket propulsion, orbital manoeuvres, interplanetary trajectories, and satellite attitude control. Prerequisites: SC/PHYS 2010 3.00 or SC/EATS 2470 3.00; AS/SC/MATH 2015 3.00; AS/SC/MATH 2271 3.00

SC/PHYS 4120 3.00 Gas and Fluid Dynamics. Fundamental laws; conservation of mass, momentum and energy; vortex motion; incompressible, compressible and viscous flows; turbulent flow; surface waves. Prerequisites: SC/PHYS 2010 3.00 or SC/EATS 2470 3.00; AS/SC/MATH 2015 3.00; AS/SC/MATH 2271 3.00.

SC/PHYS 4210 3.00 Advanced Experimental Physics I. Selected advanced experiments in physics related to topics in solid state physics, atomic spectroscopy, microwaves, low-noise measurements, superconductivity, and nuclear and particle physics. Open laboratory hours. One term. Prerequisites: SC/PHYS 3210 6.00, or SC/PHYS 3220 3.00 and SC/PHYS 4061 3.00; registration in an Honours Program in physics and astronomy. Course credit exclusion: SC/PHYS 4210 6.00.

SC/PHYS 4211 3.00 Advanced Experimental Physics II. Selected advanced experiments in physics related to topics in solid state physics, atomic spectroscopy, microwaves, low-noise measurements, superconductivity, and nuclear and particle physics. Open laboratory hours. One term. Prerequisites: SC/PHYS 3210 6.00, or SC/PHYS 3220 3.00 and SC/PHYS 4061 3.00; registration in an Honours Program in physics and astronomy. Course credit exclusion: SC/PHYS 4210 6.00.

SC/PHYS 4250 3.00 Signal and Communications Theory. Signal representation using orthogonal functions; Fourier series and transforms as applied to signals; ideal and physically realizable filters; the sampling theorem; definitions and characterizations of energy, power and their spectral densities; the modulation theorem; various kinds of modulation and bandwidth requirements. Prerequisites: SC/PHYS 3250 3.00; AS/SC/MATH 2015 3.00; AK/AS/SC/MATH 2270 3.00. Course credit exclusion: AS/SC/MATH 4130B 3.00.

SC/PHYS 4270 4.00 Astronomical Techniques. An introduction to modern astronomical instrumentation, observational methods, data analysis and numerical methods. In addition to weekly lectures, the course provides students with hands-on experience with both observational and theoretical techniques of modern astronomy. Normally offered in alternate years. One and one half lecture hours per week, several laboratory exercises. Two terms. Integrated with: GS/PHYS 5390 3.00. Prerequisites: SC/PHYS 1070 3.00; AS/SC/MATH 2015 3.00; AK/AS/SC/MATH 2270 3.00.

SC/PHYS 4270 4.00 Astronomical Techniques. An introduction to modern astronomical instrumentation, observational methods, data analysis and numerical methods. In addition to weekly lectures, the course provides students with hands-on experience with both observational and theoretical techniques of modern astronomy. Normally offered in alternate years. One lecture hour per week, several laboratory exercises. Integrated with: GS/PHYS 5390 3.00. Prerequisites: SC/PHYS 1070 3.00; AS/SC/MATH 2271 3.00. Prerequisite or corequisite: SC/PHYS 3220 3.00

SC/PHYS 4310 3.00 Physics or Astronomy Project. A supervised research endeavour, either theoretical or experimental, in physics or astronomy. The project follows consultation with a faculty member who agrees to supervise. Note: Open to students in the final year of the Physics, Applied Physics, or Astronomy stream of an Honours Physics and Astronomy program.

SC/PHYS 4330 3.00 Radio Science and Techniques for Space Exploration. The theory and application of modern radio science and radio techniques in space exploration and space navigation. Topics include signal processing, radio astronomy fundamentals, Deep Space Network instrumentation, antenna theory, arrays, Very Long Baseline Interferometry, spacecraft navigation, radar systems, range, range rate and the radar equation. Integrated with: GS/PHYS 6190 3.00. Prerequisite: SC/PHYS 3250 3.00.

Cross-listed to: SC/ENG 4330 3.00, SC/PHYS 4330 3.00

SC/PHYS 4350 2.00 Space Hardware. Primarily a laboratory course with modules focusing on communications and data transfer technologies typically used in spacecraft operations or integration and testing. Three laboratory hours per week with some lecture hours, added to refresh theoretical concepts. Prerequisites: AK/AS/SC/CSE 1540 3.00 or AK/AS/SC/CSE 2031 3.00 or equivalent programming experience; SC/PHYS 3150 3.00; SC/PHYS 3250 3.00. Corequisite: SC/ENG/PHYS 4330 3.00

Cross-listed to: SC/ENG 4350 2.00, SC/PHYS 4350 2.00

The political science curriculum offers students a program of study that highlights the department's particular strengths. The program is designed to develop a student's ability in three areas: 1) Political analysis: Students will learn to think critically about political life, especially in relation to the use and abuse of power, rights and responsibilities, different forms of diversity, and communities and nations in a global context. 2) Critical skills: The program emphasizes the development critical skills that will be an asset for future employment, including effective written and oral communication skills, analytical and numerical skills, and collaborative skills. 3) Democratic awareness: Students will learn how power and authority are exercised, and the possibilities of acting politically to bring about change.

The department offers a broad range of courses that focus on different themes. Students who major or minor in political science may choose to focus on one theme, or may take courses from several of the following themes:

- Canadian Democracy in the North American Context;
- Development, Inequality and the Global South;
- Gender, Diversity and Inclusion;
- Global Politics;
- Law, Social Justice and Ethics;
- Political Economy and Political Power;
- Political Organizing and Communication;
- Political Thought;
- Public Policy and Administration;
- Violence and Security.

In their final year of study, all political science majors and minors will take a capstone course that allows for reflection on their program of study and application of this knowledge to career and life goals. For further information regarding the capstone courses, please consult the departmental supplemental calendar or Web site.

A number of 1000- and 2000-level courses are also available to those students who wish to deepen their knowledge of political issues. As well, many of the upper-level courses are also open to non-majors who wish to further explore various political issues. For more detailed information, please consult the departmental supplemental calendar or Web site.

The Political Science program equips students with a broad set of analytical skills, critical skills and democratic awareness that gives our graduates the opportunity to pursue employment in a range of areas, including: the public service, international agencies, advocacy organizations, the media, and political organizations. Graduates of the program will be especially qualified to pursue graduate work in political science, or further studies in law, education or journalism.

For specific program requirements, please consult the Faculty of Arts Programs of Study section of this calendar.

The department also offers a Specialized Honours BA degree program in Global Political Studies. For details, please consult the Faculty of Arts Programs of Study section of this calendar.

The joint Honours BA program in Professional Writing is housed in the Department of English in the Faculty of Arts, and offered in collaboration with Seneca College (at its Seneca@York campus). The program curriculum consists of courses offered by the Department of English, the Division of Humanities and the Centre for Academic Writing in the Faculty of Arts, and by Seneca College through its School of General Education and English, its School for Communication Arts and its Centre for Professional Communication. Graduates of the program will receive an Honours BA degree in professional writing from York University.

Combining historical and theoretical analysis of written expression with the development of practical expertise in creating, managing, coordinating and presenting written information in a constructive and dynamic fashion, the Professional Writing program includes courses in the history and process of the book, in magazine writing, and in communications within institutions alongside courses in editing, copyediting, document design and multimedia technologies. As well, students in the Professional Writing program will have the opportunity to select a second field of study to complement the background and skills developed in the writing program. Graduates of the program will possess the knowledge and abilities to pursue many future possibilities in the writing field including positions in publishing, the media, business, journalism, government, community service and the arts.

For specific program requirements and the list of program courses, please consult the Faculty of Arts Programs of Study section of this calendar.

Note: For purposes of meeting program requirements, all foundations courses will count as six credits towards the major.

Courses in Professional Writing

AS/PRWR 1250 3.00 A Writer's Introduction to Literary Forms. An introduction to the fundamental principles governing the production and reception of four principal literary forms in English: poetry, prose fiction, prose non-fiction and drama. Extensive consideration is given to the form's ties to the parallel concept of genre. Course credit exclusion: AS/PRWR 1250 3.00.

Cross-listed to: AS/EN 1250 3.00, AS/PRWR 1250 3.00

AS/PRWR 1300 3.00 Theories of Writing. Students in this course explore, and learn to apply, some of the recent research on the act of writing from a variety of disciplines including cognitive psychology, linguistics, communications studies and education. Course credit exclusions: None.

Cross-listed to: AS/PRWR 1300 3.00, AS/WRIT 1300 3.00

AS/PRWR 2100 3.00 Studies in Non-Fiction. This course considers the history and practice of several nonfiction genres, from the personal essay to travel writing and investigative journalism. Students will find lectures on style and technique on the course website and will respond to the weekly reading by writing short responses in a computer lab. Note: Internet access is required for this course. Course credit exclusions: None.

Cross-listed to: AS/PRWR 2100 3.00, AS/WRIT 2100 3.00

AS/PRWR 2300 3.00 A Writer's Introduction to Research. A practical introduction to strategies for using library, online and other resources, this course develops students' abilities to formulate research plans, to evaluate and organize information, and to present it effectively and responsibly. Note: Lectures and labs will be offered in alternate weeks. Course credit exclusions: AK/WRIT 3988 3.00.

Cross-listed to: AS/PRWR 2300 3.00, AS/WRIT 2300 3.00

AS/PRWR 3600 3.00 Advanced Research Methods. A problem-based course designed to refine students' skills in searching, sifting, organizing, evaluating and reporting/presenting information. Students are asked to acquaint themselves with and become expert in managing both online and print sources. Course credit exclusions: None.

AS/PRWR 3710 3.00 Research Methods for Reporting. The course provides an introduction to the primary modes of research involved in reporting. Particular attention is paid to digesting print and net-based texts and to the techniques of the interview. Course credit exclusions: None.

AS/PRWR 3720 3.00 Fundamentals of Editing. The course addresses the problems of sorting and arranging information and of writing it up in a manner that is clear and comprehensible in limited spaces. Students edit their own work and the work of others, learning both to administer and accept criticism. Course credit exclusions: None.

AS/PRWR 3810 3.00 Digesting Technical Information. The course addresses the task of translating the languages of specialists for the use and comprehension of non-specialists. Students confront the problem of jargons and develop strategies to understand them themselves and then to translate them for others. Course credit exclusions: None.

AS/PRWR 3820 3.00 Workshop in Presentation Strategies. A workshop course following from AS/PRWR 3810 3.00. Students are assigned lumps of information and develop these for presentation to different audiences. Consideration is given also judging the appropriate technological aids and developing the skills to employ them effectively. Course credit exclusions: None.

AS/PRWR 3910 3.00 The Mechanics of Style. Introduces students to print protocols, explores fundamental problems in book and other print formats and considers the adaptations of these protocols to and in the age of the computer. Also at issue are the basic problems of book design. Course credit exclusions: None.

AS/PRWR 4700 3.00 Advanced Workshop 1: Periodical Genres. A project-based workshop course devoted to refining skills already developed. Students adapt a series of stories to different audiences. Particular attention is paid to issues of length and appropriate language. Peer editing skills are also featured. Course credit exclusions: None.

AS/PRWR 4701 3.00 Advanced Workshop 2: The Feature. A project-based workshop course in which students develop, pitch, research, write, have edited and rewrite an extended article. Each step of the process is examined in detail. Students examine also representative works in the genre. Course credit exclusions: None.

AS/PRWR 4800 3.00 Advanced Workshop 1: Visual Information and Document Design. The course considers various strategies for the visual representation of information. What sorts of figures and illustrations aid communication and what sorts obscure? What visual relations ought there to be between illustration and text? What effects do these relations have on the document as a whole? Course credit exclusions: None.

AS/PRWR 4801 3.00 Advanced Workshop 2: Multimedia Authoring and Practices. The course addresses the challenges and opportunities offered by the hardware and software involved in net-based communications. It considers the advantages and drawbacks of recent applications and develops strategies to avoid becoming the servant of the technology. Course credit exclusions: None.

AS/PRWR 4901 3.00 Copy Editing. A hands-on course that develops verbal editing skills at the level of the sentence and design skills at the level of the page or spread. Students diversify and practice their fluency with mark-up conventions. Conflicts between general mandates and local circumstances are investigated for both the verbal and the visual. Course credit exclusions: None.

AS/PRWR 4902 3.00 Figures and Illustrations. The course considers the function of graphic information in the printed book. It considers how graphs and charts to be selected and treated. It considers the role, selection and placement of photographs, drawings and maps. Illustrated texts both for children and adults are also considered. Course credit exclusions: None.

The Department of Psychology offers a curriculum which begins with a broad introductory survey of the various areas of enquiry within the discipline of psychology and the various applications of psychological knowledge.

The intermediate level of the curriculum then provides choice from a wide range of courses which pursue selected areas of psychology in greater depth. Insofar as possible, courses are offered in multiple sections with alternative formats so that students may select the format which most nearly meets their needs.

At the advanced level, courses are typically offered in relatively small seminars. Students are encouraged to select a wide range of courses and a high degree of flexibility is possible within the programs offered. It is the intention of the Department of Psychology to serve the needs of students whose interests in the discipline range from curiosity to commitment.

For specific program requirements please consult the Faculty of Health Programs of Study section of this calendar.

Admission to all 2000-, 3000- and 4000-level courses in psychology (with the exception of AK/AS/HH/SC/PSYC 2020 6.00, AK/AS/HH/SC/PSYC 2021 3.00 and AK/AS/HH/SC/PSYC 2022 3.00) is conditional upon satisfactory completion of Introduction to Psychology, AK/AS/HH/SC/PSYC 1010 6.00. Further, students must obtain a minimum grade of C (4.00) in AK/AS/HH/SC/PSYC 1010 6.00 to be permitted to continue as a major or minor in psychology as well as to take psychology courses for which AK/AS/HH/SC/PSYC 1010 6.00 is a prerequisite. Under exceptional circumstances, non-majors and non-minors who have not obtained a minimum of C (4.00) in AK/AS/HH/SC/PSYC 1010 6.00 may apply for special consideration to enrol in an upper-level psychology course for which AK/AS/HH/SC/PSYC 1010 6.00 is a prerequisite. This application should be made to the psychology undergraduate program director.

Courses in psychology normally meet for at least three hours a week, for one term (three credits – course numbers end in “3.00”) or for two terms (six credits – course numbers end in “6.00”). Most of the courses listed below are offered in more than one section. Students cannot obtain credit for two sections of the same course, except for independent study courses.

Some 3000- and 4000-level courses may require AK/AS/HH/SC/PSYC 2020 6.00 (or equivalent) as a prerequisite. Students should note that the material taught in this course may be important for them in their chosen career or in graduate work. Students might also consider taking AK/AS/HH/SC/PSYC 3010 3.00 as preparation for work in the final academic session.

Students in all psychology courses are encouraged to learn about psychological research by participating as subjects in research projects conducted under the supervision of the Department of Psychology.

Not all of the courses listed below will necessarily be offered in any given year or term. For details of courses to be offered, please consult the psychology supplemental calendar.

Courses in Psychology/Cours de psychologie

HH/PSYC 1010 6.00 Introduction to Psychology. A survey of psychology introducing basic terms, concepts and methods. Included are topics such as biological bases of behaviour, learning, perception, motivation, cognition, child development, personality, and abnormal and social psychology. Note: This course is required for all students who intend to pursue additional courses in psychology at the 2000, 3000 and 4000 levels. Students must pass the course with a minimum grade of C (4.00) in order to pursue further studies in psychology. Under exceptional circumstances, non-majors who have not obtained a minimum grade of C (4.00) in AK/AS/HH/SC/PSYC 1010 6.00 may apply for special consideration to enrol in an upper-level psychology course for which AK/AS/HH/SC/PSYC 1010 6.00 is a prerequisite. This application should be made to the psychology undergraduate program director of the Faculty offering the course. Course credit exclusions: AK/PSYC 2410 6.00 (prior to Summer 2002), GL/PSYC 2510 6.00.

HH/PSYC 2020 6.00 Statistical Methods I and II. An introduction to the analysis of data from psychological studies. Fundamental concepts and techniques of both descriptive and inferential statistics and their application to psychological research. Prerequisite or corequisite: AK/AS/HH/SC/PSYC 1010 6.00 or AK/HH/PSYC 2410 6.00, with a minimum grade of C when used as a prerequisite. Course credit exclusions: AK/AS/HH/SC/PSYC 2021 3.00, AK/AS/HH/SC/PSYC 2022 3.00, AK/PSYC 2510 3.00 (prior to Summer 2002), AK/PSYC 3110 3.00 (prior to Summer 2002), SC/BIOL 2060 3.00, SC/BIOL 3090 3.00 (prior to Summer 2000), AS/ECON 2500 3.00, AK/ECON 3470 3.00, AK/ECON 3480 3.00, AS/ECON 3500 3.00, AS/HH/SC/KINE 2050 3.00, AS/HH/SC/KINE 3150 3.00, AK/AS/SC/MATH 2500 3.00, AK/AS/SC/MATH 2560 3.00, AK/AS/SC/MATH 2565 3.00, AK/AS/SC/MATH 2570 3.00, AS/POLS 3300 6.00, AS/SOCI 3030 6.00, GL/PSYC 2530 3.00. Note 1: The course credit exclusions listed above may not be substituted for AK/AS/HH/SC/PSYC 2020 6.00 to

satisfy psychology degree requirements unless approved as acceptable substitutes by the department and Faculty. Please consult the relevant department and Faculty for more information. Note 2: Students who discontinue registration in AK/AS/HH/SC/PSYC 2020 6.00 after the fall term may not petition for credit for a half course in statistics.

HH/PSYC 2021 3.00 Statistical Methods I. The fundamental concepts and application of descriptive statistics. An introduction to probability and inferential statistics, including hypothesis testing with the normal- and t-distributions. Prerequisite or corequisite: AK/AS/HH/SC/PSYC 1010 6.00 or AK/HH/PSYC 2410 6.00, GL/PSYC 2510 6.00, with a minimum grade of C when used as a prerequisite. Course credit exclusions: AK/AS/HH/SC/PSYC 2020 6.00, AK/PSYC 2510 3.00 (prior to Summer 2002), SC/BIOL 2060 3.00, SC/BIOL 3090 3.00 (prior to Summer 2000), AS/ECON 2500 3.00, AK/ECON 3470 3.00, AS/HH/SC/KINE 2050 3.00, AK/AS/SC/MATH 2500 3.00, AK/AS/SC/MATH 2560 3.00, AS/POLS 3300 6.00, AS/SOCI 3030 6.00, GL/PSYC 2530 3.00.

HH/PSYC 2022 3.00 Statistical Methods II. A continuation of the study of fundamental concepts and techniques of descriptive and inferential statistics. Topics include correlation, regression, analysis of variance and non-parametric statistics. Prerequisite: One of AK/AS/HH/SC/PSYC 2021 3.00, AK/HH/PSYC 2510 3.00, AS/ECON 2500 3.00, AS/HH/SC/KINE 2050 3.00, AK/AS/SC/MATH 2560 3.00. Prerequisite or corequisite: AK/AS/HH/SC/PSYC 1010 6.00 or AK/HH/PSYC 2410 6.00, GL/PSYC 2510 6.00, with a minimum grade of C when used as a prerequisite. Course credit exclusions: AK/AS/HH/SC/PSYC 2020 6.00, AK/PSYC 3110 3.00 (prior to Summer 2002), AK/ECON 3480 3.00, AS/ECON 3500 3.00, AS/HH/SC/KINE 3150 3.00, AK/AS/SC/MATH 2570 3.00, AS/POLS 3300 6.00, AS/SOCI 3030 6.00. Note: SC/BIOL 2060 3.00, SC/BIOL 3090 3.00, or AS/SC/MATH 2500 3.00 may not be substituted for AK/AS/SCPSYC 2022 3.00 for major or minor credit in psychology.

HH/PSYC 2030 3.00 Introduction to Research Methods. An introduction to the use of experimental and non-experimental research methods by psychologists in the study of behaviour. Topics such as research design, external and internal validity, sources of bias, APA style and ethics are considered. Prerequisite: AK/AS/HH/SC/PSYC 1010 6.00 or AK/HH/PSYC 2410 6.00, with a minimum grade of C. Prerequisite or corequisite: One of AK/AS/HH/SC/PSYC 2020 6.00, AK/AS/HH/SC/PSYC 2021 3.00, AK/HH/PSYC 2510 3.00. NCR note: No credit will be retained for this course for students who have passed or are taking AK/AS/HH/SC/PSYC 3010 3.00 or AK/HH/PSYC 3180 3.00 (prior to Summer 2002). Course credit exclusions: ES/ENVS 2010 6.00 (prior to Summer 2003), EN/ENVS 3009 3.00, AS/SC/KINE 2049 4.00, AK/PSYC 2530 3.00 (prior to Summer 2002), GL/PSYC 2520 3.00.

HH/PSYC 2110 3.00 Developmental Psychology. This course considers physical, intellectual, emotional and social development from birth through adolescence and the impact of the interaction of these various aspects of development upon the individual as a whole. Prerequisite: AK/AS/HH/SC/PSYC 1010 6.00 or AK/HH/PSYC 2410 6.00, with a minimum grade of C. Course credit exclusions: AK/HH/PSYC 3240 3.00, GL/PSYC 3300 3.00.

HH/PSYC 2120 3.00 Social Psychology. This course reviews the theories, methods and empirical evidence in the scientific study of human social behaviour. The aim is to elucidate social psychological processes through the examination of areas such as social influence, attribution, attitudes and stereotyping. Prerequisite: AK/AS/HH/SC/PSYC 1010 6.00 or AK/HH/PSYC 2410 6.00, with a minimum grade of C. Course credit exclusions: AK/PSYC 3210 3.00 (prior to Summer 2002), AK/PSYC 3700C 3.00 (prior to Summer 1997), GL/PSYC 3660 3.00.

HH/PSYC 2130 3.00 Personality. This course examines major theories and research on personality functioning, with a focus on description of the factors contributing to the development, structure and dynamics of personality. Prerequisite: AK/AS/HH/SC/PSYC 1010 6.00 or AK/HH/PSYC 2410 6.00, with a minimum grade of C. Course credit exclusion: GL/PSYC 3220 3.00.

HH/PSYC 2210 3.00 Learning. A course in problems, experimental methods and research findings in learning. Topics include classical and operant conditioning, reinforcement and theories of learning. Prerequisite:

AK/AS/HH/SC/PSYC 1010 6.00 or AK/HH/PSYC 2410 6.00, with a minimum grade of C. Course credit exclusions: AK/PSYC 3150 3.00 (prior to Summer 2002), GL/PSYC 3280 3.00.

HH/PSYC 2220 3.00 Sensation and Perception I. A course in problems, experimental methods and research findings in sensation and perception. Vision and hearing are covered in some detail, including discussion of the structure and function of the eye and ear, and cortical areas responsible for processing visual and auditory information. Prerequisite: AK/AS/HH/SC/PSYC 1010 6.00 or AK/HH/PSYC 2410 6.00, with a minimum grade of C. Course credit exclusions: AK/PSYC 3120 3.00 (prior to Summer 2002), GL/PSYC 3690 3.00.

HH/PSYC 2230 3.00 Motivation. A course in problems, experimental methods and research findings in motivation. Topics include emotion, drives and social motives. Prerequisite: AK/AS/HH/SC/PSYC 1010 6.00 or AK/HH/PSYC 2410 6.00, with a minimum grade of C. Course credit exclusions: AK/PSYC 3155 3.00 (prior to Summer 2002), GL/PSYC 3380 3.00.

HH/PSYC 2240 3.00 Biological Basis of Behaviour. An introduction to fundamental principles of brain function and neural organization, as illustrated by classic findings and current research. Topics may include sleep and dreaming, memory, sensory motor processing, motivation (e.g. eating, reproductive behaviours), higher cognitive processes and neurological disorders. Prerequisite: AK/AS/HH/SC/PSYC 1010 6.00 or AK/HH/PSYC 2410 6.00, with a minimum grade of C. Course credit exclusions: AK/PSYC 3145 3.00 (prior to Summer 2002), GL/PSYC 3670 3.00.

GL/PSYC 2510 6.00 Introduction to Psychology. An overview of the discipline of psychology, which includes sensation and perception, learning and behaviour modification, social psychology, developmental psychology, personality, motivation, abnormal psychology and psychobiology. Course credit exclusion: AK/PSYC 1010 6.00.

GL/PSYC 2510 6.00 Introduction à la psychologie. Revue générale des sujets de base en psychologie tels que la pensée et le langage, la sensation et la perception, l'apprentissage et la modification du comportement, le comportement social, le développement, la personnalité, la motivation, la psychologie anormale, et la base physiologique du comportement. Cours incompatible : AK/PSYC 1010 6.00.

Language of Instruction: French

GL/PSYC 2520 3.00 Introduction à la psychologie expérimentale. Ce cours traitera de la démarche scientifique et des méthodes de recherche utilisées en psychologie. Les thèmes suivants y seront adressés : les méthodes d'acquisition des connaissances, la problématique et les hypothèses de recherche, la validité, les variables expérimentales, les contrôles, les plans de recherche, la généralisation des résultats, la diffusion des connaissances scientifiques et les règles donotologiques en recherche. Tout étudiant devra éditer des articles scientifiques, réaliser une recherche expérimentale, écrire un rapport scientifique, et présenter ses résultats à une mini-conférence. Cours incompatible : AK/PSYC 2030 3.00.

Language of Instruction: French

GL/PSYC 2520 3.00 Introduction to Experimental Psychology. The course is designed to provide the student with an understanding of the process of scientific reasoning as it applies to psychology. The course discusses the relationships between empirical evidence and inference, reliability, and internal and external validity. Students will obtain experience in designing and executing empirical studies. Prerequisite: GL/PSYC 2510 6.00 taken either concurrently with, or preferably prior to GL/PSYC 2520 3.00. Course credit exclusion: AK/PSYC 2030 3.00.

GL/PSYC 2530 3.00 Introduction à la statistique. Introduction aux idées et aux méthodes de base en statistique comprenant les mesures de la tendance centrale, la variabilité, la courbe normale, les différences entre deux moyennes, la corrélation et les analyses de variance. Comment la statistique peut être utilisée dans la planification et l'évaluation de la recherche psychologique sera accentuée. De plus, les principes des plans

d'expérience seront introduits. Conditions préalables : GL/PSYC 2510 6.00 et GL/PSYC 2520 3.00 doivent être suivis, soit concurremment, soit antérieurement à ce cours. Cours incompatible : PSYC 2530 3.00 granted only upon completion of both AK/PSYC 2021 3.00 and AK/PSYC 2022 3.00.

Language of Instruction: French

GL/PSYC 2530 3.00 Introductory Statistics. An introduction to basic statistical methods including coverage of central tendency, variability, normal curve, differences between means, correlation and analysis of variance. The use of statistics in the design and evaluation of psychological research is stressed, and principles of experimental design are introduced. Prerequisites: GL/PSYC 2510 6.00 and GL/PSYC 2520 3.00 should be taken either concurrently with, or prior to, GL/PSYC 2530 3.00. Course credit exclusion: PSYC 2530 3.00 granted only upon completion of both AK/PSYC 2021 3.00 and AK/PSYC 2022 3.00.

HH/PSYC 3010 3.00 Intermediate Research Methods. An intermediate course to provide further experience with the design, execution, analysis, interpretation and communication of psychological studies. Building on the foundation established in AK/AS/HH/SC/PSYC 2030 3.00, the course further prepares students for many types of advanced-research and Honours thesis projects. Prerequisites: AK/AS/HH/SC/PSYC 1010 6.00 or AK/HH/PSYC 2410 6.00, with a minimum grade of C; AK/AS/HH/SC/PSYC 2030 3.00 or AK/HH/PSYC 2530 3.00; one of AK/AS/HH/SC/PSYC 2020 6.00, AK/AS/HH/SC/PSYC 2021 3.00, AK/HH/PSYC 2510 3.00. NCR note: No credit will be retained for this course for students who have successfully completed or who are currently enrolled in AK/AS/HH/SC/PSYC 4000 6.00, AS/SC/PSYC 4170 6.00, AK/HH/PSYC 4700 3.00, or AK/HH/PSYC 4800 6.00. Course credit exclusions: AK/PSYC 3180 3.00 (prior to Summer 2002), GL/PSYC 3525 3.00.

HH/PSYC 3030 6.00 Intermediate Statistics. An intermediate course in applied statistics, emphasizing linear models for regression analysis and analysis of variance. Prerequisites: AK/AS/HH/SC/PSYC 1010 6.00 or AK/HH/PSYC 2410 6.00, with a minimum grade of C; AK/AS/HH/SC/PSYC 2020 6.00 or equivalent. Course credit exclusions: AS/SC/ GEOG 3421 3.00, AS/SC/MATH 3033 3.00, AS/SC/MATH 3034 3.00, AK/AS/SC/MATH 3230 3.00, AK/AS/SC/MATH 3330 3.00, SC/BIOL 4085 3.00/SC/MATH 4585 3.00.

HH/PSYC 3031 3.00 Intermediate Statistics Laboratory. This course provides students with the opportunity to apply, consolidate, and extend their statistical analysis skills to realistic psychological data using methods such as regression analysis. An important component of the course is the use of a statistical software package such as SPSS or SAS to prepare students for independent thesis research. Prerequisite: HH/AK/AS/SC PSYC 1010 6.00 (with a minimum of C) or AK/PSYC 2410 6.00 (with a minimum of C) and HH/AK/AS/SC PSYC 2020 6.00 or substitute. Course Credit Exclusion(s): None.

HH/PSYC 3090 3.00 Psychological Measurement. An introduction to measurement theory, including principles of psychological testing with special emphasis on test construction and the statistical evaluation, interpretation and validation of test scores. The course does not address the applied uses of tests. Prerequisites: AK/AS/HH/SC/PSYC 1010 6.00 or AK/HH/PSYC 2410 6.00, with a minimum grade of C; one of AK/AS/HH/SC/PSYC 2020 6.00, AK/AS/HH/SC/PSYC 2021 3.00, AK/HH/PSYC 2510 3.00. Course credit exclusions: AK/PSYC 3115 3.00 (prior to Fall/Winter 2001-2002), GL/PSYC 3550 3.00.

HH/PSYC 3125 3.00 History of Psychology. This course examines the discipline of psychology from a historical perspective and studies the emergence and development (and sometimes decline) of a number of theoretical systems that have influenced the nature, content and direction of psychological inquiry. Prerequisite: AK/AS/SC/PSYC 1010 6.00 or AK/PSYC 2410 6.00, with a minimum grade of C. Course credit exclusions: AK/PSYC 3260 3.00 (prior to Summer 1997), GL/PSYC 3650 3.00, AK/AS/HH/SC PSYC 3470 3.00.

HH/PSYC 3140 3.00 Abnormal Psychology. A course on the nature, causes and treatment of a number of behaviour disorders. Topics include developmental disorders, anxiety problems, personality disorders,

substance abuse, affective disorders, organic brain disorders and schizophrenia. Prerequisite: AK/AS/HH/SC/PSYC 1010 6.00 or AK/HH/PSYC 2410 6.00, with a minimum grade of C. Course credit exclusions: AK/PSYC 3215 3.00 (prior to Summer 2002), GL/PSYC 3230 3.00.

HH/PSYC 3170 3.00 Health Psychology. This course explores the developing role of psychology in the health field. It provides psychological frameworks that elucidate the (non) practice of health behaviours, the role of stress in illness, adjustment to and coping with illness and representations of health/illness. Prerequisites: AK/AS/HH/SC/PSYC 1010 6.00 or AK/HH/PSYC 2410 6.00, with a minimum grade of C. Course credit exclusions: AS/SC/PSYC 3440 3.00 (prior to Summer 2002), AS/HH/SC/KINE 3100 3.00, AS/HH/SC/KINE 4050D 3.00 (prior to Summer 1997), AS/HH/SC/KINE 4710 3.00, GL/PSYC 3635 3.00.

HH/PSYC 3190 3.00 Psychology of Language. A survey of psychological theory and research on the function, development and use of language. Topics include the acquisition of language, the nature of meaning, animal communication and some pathological language behaviours. Prerequisite: AK/AS/HH/SC/PSYC 1010 6.00 or AK/HH/PSYC 2410 6.00, with a minimum grade of C. Course credit exclusions: AK/PSYC 3250 3.00 (prior to Summer 2002), AK/PSYC 3290 3.00 (after Summer 2001), AS/SC/PSYC 3290 3.00/AS/LING 3220 3.00, GL/PSYC 3640 3.00.

GL/PSYC 3220 3.00 Personality. The course begins with an overview of the issues and perspectives encountered in the study of human personality and the difficulty we have in arriving at an adequate definition of personality. Various theoretical approaches and their applications are then examined in detail. Throughout the course more general aspects and issues in human personality such as aggression, anxiety, sex differences etc. will be discussed in seminar presentations made by the members of the class. Prerequisite: GL/PSYC 2510 6.00 or equivalent. Course credit exclusion: AK/PSYC 2130 3.00.

GL/PSYC 3220 3.00 La personnalité. La première partie du cours traite des approches empiriques à l'étude de la personnalité en accentuant les quatre aspects suivants : l'agression, la compétence, la dépendance, et la sexualité. La deuxième partie concentre sur les approches théoriques traditionnelles et contemporaines. Condition préalable : GL/PSYC 2510 6.00 ou l'équivalent. Cours incompatible : AK/PSYC 2130 3.00.

Language of Instruction: French

GL/PSYC 3230 3.00 Introduction to Abnormal Psychology (Psychopathology). This course discusses what is normal and abnormal, reviews the classical nosology of neurosis, psychosis and character disorders, relates the concept of behaviour disorders to these notions and outlines the different therapy theories and techniques. Prerequisite: GL/PSYC 2510 6.00 or equivalent. Course credit exclusion: AK/PSYC 3140 3.00.

GL/PSYC 3230 3.00 Introduction à la psychologie anormale. Ce cours a pour but d'initier l'étudiant aux concepts de normalité et d'anormalité, d'examiner les névroses, les psychoses, et les désordres de personnalité, et de présenter en revue les différentes formes de thérapeutique qui sont utilisées dans le traitement des comportements anormaux. Condition préalable : GL/PSYC 2510 6.00 ou l'équivalent. Cours incompatible : AK/PSYC 3140 3.00.

Language of Instruction: French

GL/PSYC 3240 3.00 Psychology of Anomalous Experience. Unusual experiences are examined in terms of normal psychological processes (attention, perception, recognition, belief etc.) as well as in relation to psychopathology. Topics discussed include: illusions, hallucinations, déjà vu, cryptomnesia, dop-pelganger, obsessions, ESP and witchcraft. Prerequisite: GL/PSYC 2510 6.00 or equivalent.

HH/PSYC 3250 3.00 Neural Basis of Behaviour. This course surveys issues concerning the development and localization of cerebral functions, and examines experimental and clinical studies illustrating behavioural effects of brain damage. Prerequisites: AK/AS/HH/SC/PSYC 1010 6.00 or AK/HH/PSYC 2410 6.00, with a minimum grade of C; AK/AS/HH/SC/

PSYC 2240 3.00 or AK/HH/PSYC 3145 3.00. Course credit exclusion: None.

HH/PSYC 3260 3.00 Cognition. A survey of higher-order cognitive processes in humans. Topics include attention, memory, problem solving, thinking and language. Prerequisite: AK/AS/HH/SC/PSYC 1010 6.00 or AK/HH/PSYC 2410 6.00, with a minimum grade of C. Course credit exclusions: AK/PSYC 3135 3.00 (prior to Summer 2002), GL/PSYC 3370 3.00.

HH/PSYC 3265 3.00 Memory. An examination of how humans encode, store and retrieve information from memory. Although the course focuses on data from laboratory studies and their theoretical interpretation, some consideration is given to applied aspects of human memory. Prerequisite: AK/AS/HH/SC/PSYC 1010 6.00 or AK/HH/PSYC 2410 6.00, with a minimum grade of C. Course credit exclusions: AK/PSYC 3130 3.00 (prior to Summer 2002), GL/PSYC 3390 3.00.

HH/PSYC 3270 3.00 Sensation and Perception II. A continuation of Sensation and Perception I. Senses such as balance, taste, smell and touch are considered, and there is more thorough discussion of the methods used to study sensory processing and perception. Prerequisites: AK/AS/HH/SC/PSYC 1010 6.00 or AK/HH/PSYC 2410 6.00, with a minimum grade of C; AK/AS/HH/SC/PSYC 2220 3.00 or AK/HH/PSYC 3120 3.00. Course credit exclusion: GL/PSYC 3690 3.00.

GL/PSYC 3280 3.00 Learning. The student is introduced to some of the problems studied by psychologists in the fields of animal and human learning. Some theories of learning are presented for critical consideration by the students. Prerequisite: GL/PSYC 2510 6.00 or equivalent. Course credit exclusion: AK/PSYC 2210 3.00.

HH/PSYC 3280 3.00 Animal Behaviour. An introduction to the study of animal behaviour including comparative psychology, behavioural ecology, ethology and sociobiology. Prerequisite: AK/AS/HH/SC/PSYC 1010 6.00 or AK/HH/PSYC 2410 6.00, with a minimum grade of C. Course credit exclusions: AK/PSYC 3140 3.00 (prior to Summer 2002), GL/PSYC 3675 3.00, GL/PSYC 3680 3.00

HH/PSYC 3290 3.00 Psycholinguistics. A survey of psycholinguistic research and theory. Topics chosen from the following: introduction to language structure, biological basis for language, speech perception, sentence processing, speech production, relation of language and thought, language acquisition and atypical language. Prerequisite: AK/AS/HH/SC/PSYC 1010 6.00 or AK/HH/PSYC 2410 6.00, with a minimum grade of C, or AS/LING 1000 6.00. Course credit exclusions: AK/AS/HH/SC/PSYC 3190 3.00 (Prior to Fall/Winter 2007-08), HH/PSYC 3190 3.00, AK/PSYC 3250 3.00 (prior Summer 2002).

Cross-listed to: AS/LING 3220 3.00, HH/PSYC 3290 3.00

GL/PSYC 3300 3.00 Introduction to Development: Infancy and Childhood. Theory and research in contemporary psychology are presented. Theories include Piaget's, Erickson's, attachment theory and learning theory. Topics include the development of motor skills, perception, learning, cognition, language, the brain, social behaviour, emotional behaviour, personality etc. Prerequisite: GL/PSYC 2510 6.00 or equivalent. Course credit exclusion: AK/PSYC 2110 3.00.

GL/PSYC 3300 3.00 Introduction au développement de l'enfant. Ce cours examinera les théories et les recherches empiriques les plus importantes en psychologie développementale, et portera surtout sur la première enfance et l'enfance. Le cours traitera du développement de la motricité, du cerveau, de la perception, de l'apprentissage, des connaissances, du langage, du comportement social, des émotions, de la personnalité, et de la conscience. Condition préalable : GL/PSYC 2510 6.00 ou l'équivalent. Cours incompatible : AK/PSYC 2110 3.00.

Language of Instruction: French

GL/PSYC 3310 3.00 Introduction to Development: Adolescence, Adulthood and Aging. Is development anything more than maturation? Is individual change simply a response to the Zeitgeist? This course focuses primarily on change in the individual and systemic change is

considered. Prerequisite: GL/PSYC 2510 6.00 or equivalent. Course credit exclusion: AK/PSYC 3490 3.00.

GL/PSYC 3310 3.00 Psychologie du développement : adolescence, âge adulte et âge d'or. Ce cours en psychologie du développement étudie un choix de travaux théoriques et de recherches portant sur le développement durant l'adolescence, l'âge adulte et la vieillesse. Parmi les sujets traités, les théories des stades, la crise de la quarantaine et les changements intellectuels consécutifs à l'âge. Condition préalable : GL/PSYC 2510 6.00 ou l'équivalent. Cours incompatible : AK/PSYC 3490 3.00.

Language of Instruction: French

HH/PSYC 3310 3.00 Psychology and Law. This course examines the applications of psychology to legal issues and procedures. Drawing from the areas of social, cognitive, developmental and clinical psychology, the law's informal theories of human behaviour are compared to what psychologists know on the basis of theories and research. Prerequisite: AK/AS/HH/SC/PSYC 1010 6.00 or AK/HH/PSYC 2410 6.00, with a minimum grade of C. Course credit exclusion: GL/PSYC 3600 3.00.

GL/PSYC 3350 3.00 La psychologie de l'éducation. La mise en application en situation de salle de classe des concepts psychologiques relatifs à l'apprentissage, à la motivation et à l'interaction sociale. Ce cours examinera diverses questions: la communication, la compréhension, le perfectionnement des habiletés, la réflexion critique et créatrice, la conceptualisation, l'apprentissage et l'enseignement. Condition préalable : GL/PSYC 2510 6.00 ou l'équivalent. Cours incompatible : AK/PSYC 3410 3.00.

GL/PSYC 3350 3.00 Educational Psychology. The application of principles from the psychology of learning, motivation and social interaction to the class-room situation. Topics considered include communication and understanding, the development of skills, creative and critical thinking, conceptualization, learning and teaching. Prerequisite: GL/PSYC 2510 6.00 or equivalent. Course credit exclusion: AK/PSYC 3410 3.00.

GL/PSYC 3370 3.00 Cognition. Some characteristics of cognition or thinking processes are examined through active study of selected research on concept learning, concept formation and problem-solving. Selected literature which presents methods to facilitate thinking or problem-solving is also examined. Prerequisite: GL/PSYC 2510 6.00 or equivalent. Course credit exclusion: AK/PSYC 3260 3.00.

GL/PSYC 3380 3.00 Motivation. This course examines the motivational concepts and approaches which are central to contemporary psychology. A survey approach is used and concepts as diverse as instinct and self-actualization are considered. Prerequisite: GL/PSYC 2510 6.00 or equivalent. Course credit exclusion: AK/PSYC 2230 3.00.

GL/PSYC 3390 3.00 Memory. The field of memory is a rapidly developing one. Models of memory and theories of forgetting, both early and present-day, are reviewed. Prerequisite: GL/PSYC 2510 6.00 or equivalent. Course credit exclusion: AK/PSYC 3265 3.00.

GL/PSYC 3390 3.00 La mémoire. Ce cours approfondira l'étude de la mémoire humaine sous ses aspects multiples : 1) la réception, la sélection (consciente ou inconsciente) d'informations reçues par les organes des sens; 2) le codage et le stockage de ces informations sous forme « d'engrammes » au sein d'ensembles de neurones; 3) la capacité d'accéder à ces informations. Condition préalable : GL/PSYC 2510 6.00 ou l'équivalent. Cours incompatibles : AK/PSYC 3265 3.00, GL/PSYC 3390 3.00(EN).

Language of Instruction: French

GL/PSYC 3400 3.00 L'apprentissage et la modification du comportement. Ce cours a pour but d'initier l'étudiant aux phénomènes et aux théories de base de la psychologie de l'apprentissage, ainsi qu'à certaines applications de ces données de base dans des milieux thérapeutiques. Condition préalable : GL/PSYC 2510 6.00 ou l'équivalent. Cours incompatible : GL/PSYC 3280 3.00(FR).

Cross-listed to: AK/SOCI 3880 3.00, HH/PSYC 3480 3.00

HH/PSYC 3490 3.00 Adult Development and Aging. An examination of data and theories relating to the psychology of adult development and aging. Major topics include biological and psychological theories of aging; age changes in intelligence, personality and social relations; pathologies of old age and methods of intervention. Prerequisites: AK/AS/HH/SC/PSYC 1010 6.00 or AK/HH/PSYC 2410 6.00, with a minimum grade of C. Course credit exclusions: AK/PSYC 3700D 3.00 (prior to Summer 2002), GL/PSYC 3310 3.00.

HH/PSYC 3500 3.00 Development in Adolescence. This course involves the scientific study of changes in affective, social and cognitive development during the second decade of life. Focus is on fundamental developmental changes, the contexts in which development occurs and the central psychosocial issues of adolescence. Prerequisites: AK/AS/HH/SC/PSYC 1010 6.00 or AK/HH/PSYC 2410 6.00, with a minimum grade of C; AK/AS/HH/SC/PSYC 2110 3.00 or AK/HH/PSYC 3240 3.00. Course credit exclusion: None.

GL/PSYC 3510 3.00 Disturbances in Development. What is the developmental process? When is it considered abnormal? What causes the psychopathology? Theory, research and intervention related to infantile autism, childhood schizophrenia, learning disorders, mental retardation, genetic disorders, child abuse etc., are presented.

Prerequisites: GL/PSYC 2510 6.00 and either GL/PSYC 3230 3.00, GL/PSYC 3300 3.00, or GL/PSYC 3310 3.00 or their equivalents taken either concurrently with, or preferably, prior to GL/PSYC 3510 3.00. Course credit exclusion: AK/PSYC 4460 3.00.

GL/PSYC 3510 3.00 Le développement anormal. Quand considère-t-on le développement anormal? Quelles sont les causes de cette psychopathologie? Ce cours examinera les concepts, les recherches empiriques, et les thérapies les plus importantes liées à ces questions. Des visites aux institutions voisines seront intégrées dans le cours. Condition préalable : GL/PSYC 2510 6.00 ou l'équivalent. Cours incompatible : AK/PSYC 4460 3.00.

Language of Instruction: French

HH/PSYC 3520 3.00 Infancy. This course involves the scientific study of changes in motor development, perception, and social and physical cognition that occur during the first two years of life. Focus is on the nature and determination of these changes and on theoretical and methodological advances. Prerequisites: AK/AS/HH/SC/PSYC 1010 6.00 or AK/HH/PSYC 2410 6.00, with a minimum grade of C; AK/AS/HH/SC/PSYC 2110 3.00 or AK/HH/PSYC 3240 3.00. Course credit exclusion: None.

GL/PSYC 3525 3.00 Intermediate Experimental Psychology. This is a continuation of GL/PSYC 2520 3.00 for students who intend to complete an Honours Course in psychology. The major focus of the course is on applications of the principles taught in the first-term course in the context of empirical projects that students plan and carry out in association with the course instructors. In addition, students are introduced to the use of the basis statistical tools and discussion also focuses on research as an ongoing enterprise. Prerequisites: GL/PSYC 2510 6.00, GL/PSYC 2520 3.00 and GL/PSYC 2530 3.00, although the latter course may be taken concurrently. Course credit exclusion: AK/PSYC 3010 3.00, GL/PSYC 2521 3.00.

HH/PSYC 3530 3.00 Psychology of Individual Differences. The scientific study of individual difference variables such as traits, values, interests, motives, skills, abilities, attitudes, styles and roles. Prerequisite: AK/AS/HH/SC/PSYC 1010 6.00 or AK/HH/PSYC 2410 6.00, with a minimum grade of C. Course credit exclusion: AK/PSYC 3700H 3.00 (prior to Summer 1994).

GL/PSYC 3530 6.00 Human Neuropsychology. Neuropsychology is concerned with the behavioural expression of brain dysfunction. This course will review the major neuropsychological disorders associated with brain dysfunction and the mechanisms underlying these deficits. Recovery and advances in assessment, diagnosis, and treatment will also be discussed. Prerequisite: GL/PSYC 2510 6.00, GL/PSYC 2520 3.00, GL/PSYC 3230 3.00 and GL/PSYC 3670 3.00.

HH/PSYC 3540 3.00 Introduction to Psychological Testing. This course considers tests of various psychological attributes (e.g. intelligence, personality etc.) and their use in applied settings. Special consideration is given to the interpretation and reporting of test scores and profiles. This course is not intended to teach techniques of test administration. Prerequisites: AK/AS/HH/SC/PSYC 1010 6.00 or AK/HH/PSYC 2410 6.00, with a minimum grade of C; AK/AS/HH/SC/PSYC 3090 3.00 or AK/HH/PSYC 3115 3.00. Course credit exclusion: None.

GL/PSYC 3550 3.00 Psychological Testing and Measurement. Theoretical and practical aspects of testing and measurement are treated, with particular attention being given to the principles and problems of measurement in the areas of personality, social psychology and psychopathology. Prerequisites: GL/PSYC 2510 6.00 and GL/PSYC 2530 3.00 or equivalents. Course credit exclusion: AK/PSYC 3090 3.00.

HH/PSYC 3550 3.00 Creativity. This course offers a systematic study of the persons, processes and products of creativity, including theories, research and measurement methods. Creativity is defined as something that is both novel and significant. Prerequisite: AK/AS/HH/SC/PSYC 1010 6.00 or AK/HH/PSYC 2410 6.00, with a minimum grade of C. Course credit exclusion: AK/PSYC 3700 A 3.00 (prior to Fall/Winter 1998-1999).

GL/PSYC 3555 3.00 Learning, Behaviour Modification, and Behaviour Management. This course will examine fundamentals in learning and behaviour modification, with an emphasis on the application of behavioural principles in a clinical setting. Topics include classical and operant conditioning, reinforcement stimulus and environmental control, self-monitoring, and behavioural intervention geared to people who suffer from various cognitive disorders. Prerequisite: GL/PSYC 2510 6.00, GL/PSYC 2520 3.00 and GL/PSYC 2530 3.00.

HH/PSYC 3560 3.00 Psychology of Death and Dying. This course considers issues and topics in thanatology including sociocultural influences on our understanding of death, care of the dying and medical ethics. It examines research and theory in aging and illness, adjustment to life-threatening conditions and grief reactions. Prerequisite: AK/AS/HH/SC/PSYC 1010 6.00 or AK/HH/PSYC 2410 6.00, with a minimum grade of C. Course credit exclusions: AK/PSYC 3290 3.00 (before Summer 2002), AK/AS/HH/SC/PSYC 4250 3.00, AK/HH/NURS 4790B 3.00.

HH/PSYC 3570 3.00 Organizational Psychology. This course involves the study of how individuals think about and relate to one another in organizations and business. It raises theoretical, scientific and practical questions about various aspects of psychological life in the workplace. Prerequisites: AK/AS/HH/SC/PSYC 1010 6.00 or AK/HH/PSYC 2410 6.00, with a minimum grade of C; AK/AS/HH/SC/PSYC 2120 3.00 or AK/HH/PSYC 3210 3.00. Course credit exclusions: AS/SC/PSYC 3510B 3.00 (prior to Summer 1999), AK/PSYC 3230 3.00 (prior to Summer 2002), SB/OBIR 2000 3.00.

GL/PSYC 3570 6.00 The Psychology and Pedagogy of Children and Adolescents with Behaviour Disorders. This course provides a comprehensive analysis and understanding of typical and maladjusted behaviour in children. Students will develop familiarity with procedures of informal and formal diagnosis and referral, an awareness and understanding of a variety of management techniques and interventions, and finally acquaint themselves with community and support resources available for behaviourally exceptional children. Prerequisite: GL/PSYC 2510 6.00 or equivalent. Course credit exclusion: GL/PSYC 3570 3.00.

HH/PSYC 3580 3.00 The Environment and the Developing Brain. This course introduces students to basic concepts in neuroembryology, including critical periods, and considers the impact of a variety of environmental factors (e.g. poor nutrition, alcohol and industrial pollutants) on the course of human brain and behavioural development. Prerequisite: AK/AS/HH/SC/PSYC 1010 6.00 or AK/HH/PSYC 2410 6.00, with a minimum grade of C; AK/AS/HH/SC/PSYC 2240 3.00 or AK/HH/PSYC 3145 3.00. Course credit exclusion: AK/PSYC 3160 3.00 (prior to Summer 2002).

HH/PSYC 3590 3.00 Drugs and Behaviour. A survey of various aspects of major licit and illicit drugs. HH/PSYC 4230 3.00 Human Performance in Systems. This seminar course examines the application of systems psychology and human factors to the development and evaluation of complex operational systems. Seminar topics include simulation techniques, function allocation, human capabilities, task design, personnel selection, evaluation of individual and system performance. Normally offered in alternate years. Prerequisites: AK/AS/HH/SC/PSYC 1010 6.00 or AK/HH/PSYC 2410 6.00, with a minimum grade of C; AK/AS/HH/SC/PSYC 2030 3.00 or AK/HH/PSYC 2530 3.00; one of AK/AS/HH/SC/PSYC 2021 3.00, AK/AS/HH/SC/PSYC 2020 6.00, AK/HH/PSYC 2510 3.00. or written permission of the instructor. Course credit exclusion: None.

GL/PSYC 4240 3.00 Advanced Experimental Design. The design and evaluation of psychological experiments are stressed, including detailed treatment of various analysis of variance models. In addition, the philosophy of statistics is examined in some detail. Prerequisites: GL/PSYC 2530 3.00 and the permission of the instructor. Note: It is strongly advised that students carefully review the material covered in GL/PSYC 2530 3.00, before lectures begin in this course.

GL/PSYC 4250 3.00 Theories and Techniques of Counselling. This course examines a variety of basic theories of counselling, and approaches to inducing client change. Issues such as client counsellor differences, contextual effects on the counselling relationship and ethical issues will be discussed. Prerequisites: GL/PSYC 2510 6.00 and either GL/PSYC 3220 3.00(EN) or GL/PSYC 3230 3.00(EN/FR). Course credit exclusions: AK/PSYC 4061 3.00, AK/PSYC 4060 6.00.

HH/PSYC 4250 3.00 Seminar in Psychology of Death and Dying. This seminar explores a wide range of issues related to dying and death including the development of attitudes towards death, the psychosocial context of dying, the mental life of the dying person, the movement toward palliative care and the nature and dynamics of grief. Prerequisites: AK/AS/HH/SC/PSYC 1010 6.00 or AK/HH/PSYC 2410 6.00, with a minimum grade of C; AK/AS/HH/SC/PSYC 2030 3.00 or AK/HH/PSYC 2530 3.00; one of AK/AS/HH/SC/PSYC 2021 3.00, AK/AS/HH/SC/PSYC 2020 6.00, AK/HH/PSYC 2510 3.00.; AK/HH/PSYC 3290 3.00 (before summer 2002) or AK/AS/HH/SC/PSYC 3560 3.00; one of AK/AS/HH/SC/PSYC 2130 3.00, AK/HH/PSYC 3140 3.00 (after Winter 2002), AS/SC/PSYC 3140 3.00, AK/HH/PSYC 3215 3.00, AK/HH/PSYC 3220 3.00. Course credit exclusions: AK/PSYC 3290 3.00 (before Summer 2002), AK/AS/HH/SC/PSYC 3560 3.00.

HH/PSYC 4260 3.00 Seminar in Sensation and Perception. A review of current research in normal and disordered sensory and perceptual processes. The course includes the study of the development of normal and abnormal vision, auditory perception, spatially coordinated behaviour, neurological disorders, and robotic simulations of human perceptual abilities. Prerequisites: AK/AS/HH/SC/PSYC 1010 6.00 or AK/HH/PSYC 2410 6.00, with a minimum grade of C; AK/AS/HH/SC/PSYC 2030 3.00 or AK/HH/PSYC 2530 3.00; one of AK/AS/HH/SC/PSYC 2021 3.00, AK/AS/HH/SC/PSYC 2020 6.00, AK/HH/PSYC 2510 3.00; AK/AS/HH/SC/PSYC 2220 3.00 or AK/HH/PSYC 3120 3.00. Course credit exclusion: AK/PSYC 4120 3.00 (before Summer 2002)

GL/PSYC 4270 3.00 Rehabilitation Psychology. Rehabilitation psychology deals with the etiology, assessment and treatment of psychological impairments due to physical injury, chronic disease and other disabling conditions. The course will cover assessment, diagnosis of the impairments, some basic tests (in personality, cognition) and treatment (of mental health). Prerequisites: GL/PSYC 2520 3.00 and GL/PSYC 2530 3.00. Course credit exclusion: AK/PSYC 4040 3.00.

HH/PSYC 4270 3.00 Seminar in Memory and Cognition. An examination of a number of issues in memory and cognition. The course focuses on areas of current interest and may include topics such as pattern recognition, perception of art, memory retrieval, connectionist models, problem solving, thinking, concept formation, categorization and artificial intelligence. Prerequisites: AK/AS/HH/SC/PSYC 1010 6.00 or AK/HH/

PSYC 2410 6.00, with a minimum grade of C; AK/AS/HH/SC/PSYC 2030 3.00 or AK/HH/PSYC 2530 3.00; one of AK/AS/HH/SC/PSYC 2021 3.00, AK/AS/HH/SC/PSYC 2020 6.00, AK/HH/PSYC 2510 3.00; one of AK/HH/PSYC 3130 3.00, AK/HH/PSYC 3135 3.00, AK/HH/PSYC 3260 3.00 (after Winter 2002), AS/SC/PSYC 3260 3.00, AK/AS/HH/SC/PSYC 3265 3.00. Course credit exclusion: AK/PSYC 4130 3.00 (taken between Fall/Winter 1992-1998).

HH/PSYC 4280 3.00 Seminar in Educational Psychology. An examination of a number of issues within the field of educational psychology, including cognitive behaviour modification, exceptional children in the classroom, enhancing creativity, cognitive skills training, and sex differences and gender bias in an educational context. Prerequisites: AK/AS/HH/SC/PSYC 1010 6.00 or AK/HH/PSYC 2410 6.00, with a minimum grade of C; AK/AS/HH/SC/PSYC 2030 3.00 or AK/HH/PSYC 2530 3.00; one of AK/AS/HH/SC/PSYC 2021 3.00, AK/AS/HH/SC/PSYC 2020 6.00, AK/HH/PSYC 2510 3.00; AK/AS/HH/SC/PSYC 3410 3.00 or AK/HH/PSYC 3245 3.00. Course credit exclusion: AK/HH/PSYC 4170 3.00 (prior to Summer 1999).

HH/PSYC 4380 3.00 Seminar in Neuroscience: Rhythms of the Brain. Explores the temporal dynamics of brain activity, from ultradian and circadian cycles to the high-frequency neural oscillations associated with attention and memory. Topics addressed include: sleep rhythms, hippocampal rhythms, central pattern generators, neocortical oscillations and memory consolidation. Prerequisite: AK/AS/HH/SC/PSYC 1010 6.00, AK/AS/HH/SC/PSYC 2021 3.00, AK/AS/HH/SC/PSYC 2030 3.00, AK/AS/HH/SC/PSYC 2240 3.00, AK/AS/HH/SC/PSYC 3250 3.00. Course Credit Exclusion(s): None. Open to: 4th year honours Psychology Majors and Minors.

HH/PSYC 4460 6.00 Atypical Development. An examination of problems relating to children with physical, mental, social and emotional problems. An extensive exploration of the nature and causes of the dysfunction, and of experimental methods, research findings and current remedial techniques. Prerequisites: AK/AS/HH/SC/PSYC 1010 6.00 or AK/HH/PSYC 2410 6.00, with a minimum grade of C; AK/AS/HH/SC/PSYC 2030 3.00 or AK/HH/PSYC 2530 3.00; one of AK/AS/HH/SC/PSYC 2021 3.00, AK/AS/HH/SC/PSYC 2020 6.00, AK/HH/PSYC 2510 3.00; AK/AS/HH/SC/PSYC 2110 3.00 or AK/HH/PSYC 3240 3.00. Course credit exclusion: GL/PSYC 3510 3.00.

GL/PSYC 4510 3.00 Advanced Seminar in Development. Major modern theories and research findings related to psychological development are reviewed in depth and opportunities provided for intensive study of topics of contemporary interest. Prerequisite: GL/PSYC 2510 6.00, GL/PSYC 3300 3.00 and either GL/PSYC 3310 3.00 or GL/PSYC 3510 3.00 and permission of the instructor. Course credit exclusion: AK/PSYC 4010 3.00.

GL/PSYC 4635 3.00 Computer Algorithms and Techniques for Imaging Cognition. This course offers an introduction to techniques and computer algorithms (with MATLAB) for functional brain imaging as well as recent developments in cognitive neuropsychology. It examines how theories of normal cognitive functioning can be informed by evidence from brain-damaged patients and how converging evidence may be obtained from functional neuro-imaging techniques. Programming exercises will use data sets from current experiments. This course is intended for upper level students majoring in Psychology, Cognitive and Brain Sciences or Computer Sciences.

Religious studies invites students to join in current scholarly efforts to describe and to understand forms of religious experience. One of the master keys to the understanding of human behaviour and thought, religious experience is open to examination from a variety of disciplinary perspectives.

In the core course, students will be introduced to various disciplinary perspectives. Afterwards they may choose to specialize in one tradition – e.g. Judaism, Christianity, Islam, or Eastern religions – or they may continue to take a comparative approach. Students will, however, be expected to acquire breadth both in disciplinary approach and in subject matter.

The Science and Technology Studies program provides students with the opportunity to study the place of modern science and technology in human culture and society from an integrated, critical and interdisciplinary perspective. The program, housed in both the Faculty of Arts and the Faculty of Science and Engineering, includes courses dealing with the history, philosophy and sociology of the mathematical, physical, biological and social sciences, as well as the social, cultural and intellectual contexts which both shaped and were shaped by thinking in those fields. Themes and areas of concentration include: 1) science, technology and social change; 2) history and philosophy of science, technology and the social sciences; 3) science, technology and humanistic thought; and 4) science, technology and the arts.

For Faculty of Arts students, the Science and Technology Studies program equips them with a broad interdisciplinary education which prepares them for all types of careers. Graduating students will have the same postgraduate opportunities as those possessing an Honours BA in arts fields – i.e. an opportunity to enter professional schools or graduate programs. Students who graduate from the Science and Technology Studies program will be especially qualified to pursue graduate work in graduate programs in history and philosophy of science, as well as their congruent disciplines. For Faculty of Science and Engineering students, the Science and Technology Studies program equips them with a broad interdisciplinary education while allowing them to specialize in one of the many fields of science (biology, chemistry, physics etc.). As a result, career opportunities in science and elsewhere are readily available.

All graduates of this program are well equipped for further studies in law, medicine, education, journalism and environmental policy. For specific

program requirements, please consult the appropriate Faculty Programs of Study section of this calendar.

Courses in Science and Technology Studies

SC/STS 2010 6.00 History of Modern Science. This course explores some of the central issues and theories in the history of physical and life sciences since the Renaissance. The focus is on the institutional trends and changing conceptual frameworks as they related to larger societal change. Prerequisite: Completion of 24 credits. Course credit exclusions: AK/HIST 2120 6.00, AK/STS 2010 6.00.

Cross-listed to: AK/HIST 2120 6.00, SC/STS 2010 6.00

SC/STS 2411 6.00 Introduction to Science and Technology Studies. This course teaches students to ask questions about science and technology using the methods of the humanities and social sciences. Drawing upon selected issues, it will examine the diversity of approaches in the field of science and technology studies. Course Credit exclusion: AK/STS 1010 6.00.

Cross-listed to: AS/HUMA 2411 6.00, AS/SOSC 2411 6.00, SC/STS 2411 6.00

SC/STS 3500 3.00 The Global Information Society. This course examines current national information societies and their possible transformation into a global information society by analyzing the interplay between the causes for the globalization of information and communication technologies, as well as the societal impact of these technologies. Course credit exclusion: AK/STS 3500 3.00.

Cross-listed to: AS/SOSC 3500 3.00, SC/STS 3500 3.00

SC/STS 3550 6.00 Science as Practice and Culture: Introduction to the Anthropology of Science and Technology. This course is an introduction to the anthropology of science and technology. In this course we read ethnographies of laboratories to explore how scientific facts are made, and how institutions and instruments are deployed to reproduce scientific cultures and knowledge.

Cross-listed to: AS/ANTH 3550 6.00, SC/STS 3550 6.00

SC/STS 3561 3.00 History of Computing and Information Technology. This course examines the evolution of computing and information technology in a broad social, cultural, and historical context, with special emphasis on developments since the early 20th century. Prerequisites: Completion of 24 credits. Course credit exclusions: AK/STS 3700B 3.00, AK/STS 3700B 6.00, AK/STS 3710 3.00, AK/STS 3710 6.00.

Cross-listed to: AK/HIST 3130 3.00, AS/SOSC 3561 3.00, SC/STS 3561 3.00

SC/STS 3600 6.00 Technological Failure: Innovation, Accident and Society. This course explores social, material and philosophical accounts for why technologies fail. Focusing on specific instances of failed technologies and of technological disasters, the course critically examines the relations between society, knowledge and the proper workings of technology. Course credit exclusion: AK/STS 3600 6.00.

Cross-listed to: AS/SOSC 3600 6.00, SC/STS 3600 6.00

SC/STS 3700 6.00 History of Technology. This course examines the history of technology from the first Industrial Revolution to the present. Topics may include: the nature of technology; technology and social change; and technology's role in the exercise of Western influence on the world. Course credit exclusions: AK/STS 3700A 6.00, AK/STS 3700 6.00.

Cross-listed to: AS/HUMA 3700 6.00, SC/STS 3700 6.00

SC/STS 3725 6.00 Science and Exploration. The role of the great expeditions, natural history collectors and museums are examined in the context of major scientific concepts. Exploration of various terrestrial ecosystems are compared.

SC/STS 3726 3.00 Technology, Experts and Society. A critical examination of the introduction and adoption of new technologies and the rise of expert knowledge. Specific historical examples of modern technologies will be considered in order to explore the relationship

between society and technology. Course credit exclusions: AK/STS 2700 3.00, SC/STS 2700 3.00, AS/SOSC 2700 3.00

Cross-listed to: AS/SOSC 3726 3.00, SC/STS 3726 3.00

SC/STS 3730 6.00 Science, Technology, and Modern Warfare. Explores the interplay between warfare, scientific development, and technological change in a broad societal context through a series of representative case-studies from the past and the present. Enhances students' understanding of some of the main forces that shape our world.

SC/STS 3740 3.00 Life Sciences in Modern Society. The emergence of professional biology is explored through examination of conflicting views of the role of natural history in the development of the specialized life sciences.

SC/STS 3750 6.00 Genetics, Evolution and Society. This course will adopt a variety of STS perspectives to examine the interplay between the life and social sciences and biotechnology from the mid-19th century to the present. Course credit exclusion: AK/STS 3750 6.00.

Cross-listed to: AS/HUMA 3750 6.00, SC/STS 3750 6.00

SC/STS 3755 3.00 Emergence of Cosmology as Science. A social and intellectual study of cosmology from Newtonian times to the present. The focus will be upon philosophical issues, the nature of astronomical and physical evidence and the convergence of theoretical physics with astronomy in the late 20th century.

SC/STS 3760 6.00 The Scientific Revolution, 1500-1800. An in-depth examination of the cultural, social, technological and intellectual context of a formative period in the history of modern science. Course credit exclusions: AK/HIST 3810 6.00, AK/HIST 3570 6.00, AK/STS 3760 6.00.

Cross-listed to: AS/HUMA 3760 6.00, SC/STS 3760 6.00

SC/STS 3765 3.00 Natures of Experiment. This course is a focused exploration of the history, philosophy and social dimensions of experimentation. It explores the development of the category of experiment, the probing of the physical world, experiment's relation to theory, and its claims to knowledge.

SC/STS 3770 6.00 Issues in the Modern Physical Sciences. An analysis of the nature of the physical sciences in the 20th century. Case studies may be drawn from astronomy, chemistry, physics and the earth sciences. Course credit exclusion: AK/STS 3770 6.00.

Cross-listed to: AS/HUMA 3770 6.00, SC/STS 3770 6.00

SC/STS 3775 3.00 Physics in the 20th Century. This course examines both the philosophical questions raised by historical developments in modern physics and historical-scientific questions raised by philosophical inquiry. Note: No background in physics required. Readings include scientific, historical and philosophical texts.

SC/STS 3780 6.00 Biomedicine Science in Social & Historical Context. An examination of the changing relationship between biomedical research and technologies, medical practice, and social structures since 1800. Topics may include: risk and medical screening, public health, medical specialization, tropical medicine, immunology, microbiology, psychiatric illness and psychopharmacology. Course credit exclusion: AK/STS 3780 6.00.

Cross-listed to: AS/SOSC 3780 6.00, SC/STS 3780 6.00

SC/STS 3790 6.00 Science and Technology: Global Development. This course critically examines the role of science and technology in developing areas of the globe in general, with particular emphasis on environmental and health effects. Course credit exclusions: AK/STS 3790A 6.00, AK/STS 3790 6.00.

Cross-listed to: AS/SOSC 3790 6.00, SC/STS 3790 6.00

SC/STS 3925 6.00 Interfaces: Technology and the Human. This course examines from a humanist perspective the shifting relationships between social and cultural practices and technologies. It explores several key interfaces, including structures of belief, aesthetic practices and identity formation. Course credit exclusions: None.

Cross-listed to: AS/HUMA 3925 6.00, SC/STS 3925 6.00

SC/STS 3970 6.00 Science and Gender in Modern Western Culture.

This course analyzes the gendered nature of modern Western scientific culture. It draws on literary, historical and philosophical sources, films and contemporary feminist writings. Course credit exclusions: None.

Cross-listed to: AS/HUMA 3970 6.00, SC/STS 3970 6.00

SC/STS 3975 3.00 Science and Religion in Modern Western Culture.

Examination of the relationship between science and religion through a study of the implications of the following intellectual developments for religious thought: the rise and triumph of Newtonian science, the Darwinian revolution, relativity theory, quantum physics, "big bang" theory, and creationism. Course credit exclusions: AS/HUMA 3500H 6.00 (prior to Fall/Winter 2000-2001), AS/HUMA 3975 6.00.

Cross-listed to: AS/HUMA 3975 3.00, SC/STS 3975 3.00

SC/STS 4501 6.00 Seminar in Science & Technology Studies.

This seminar builds upon students' existing skills in science and technology studies. It will familiarize students with central themes in this interdisciplinary field that have emerged from efforts in history, philosophy and social studies of science and technology. Prerequisite: SC/STS 2411 6.00, Introduction to Science and Technology Studies (formerly AK/STS 1010 6.00), or the written permission of the Course Director. Course credit exclusions: SC/STS 4501 6.00, AS/SOSC 4501 6.00, AK/STS 4720 6.00 (prior to Fall/Winter 2006-2007).

Cross-listed to: AS/HUMA 4501 6.00, AS/SOSC 4501 6.00, SC/STS 4501 6.00

SC/STS 4501 6.00 Seminar in Science & Technology Studies.

This seminar builds upon students' existing skills in science and technology studies. It will familiarize students with central themes in this interdisciplinary field that have emerged from efforts in history, philosophy and social studies of science and technology. Sexuality Studies is an interdisciplinary field that examines sexual desires, pleasures, acts, behaviours, identities, subjectivities, communities, cultures, and movements. The field explores artistic, cultural, economic, geographic, historical, linguistic, literary, political, psychological, scientific, and sociological aspects of sexuality. Sexuality Studies at York emphasizes intersections of sexuality with ability, age, class, gender, gender identity, ethnicity, health, nationality, race, religion, and sex. The program examines sexual hierarchy, resistance, power and diversity in Canada; in Africa, Asia and the Pacific, the Caribbean, Europe, North and South America, and Oceania; and in transnational and transcontinental contexts. Committed to examining lesbian, gay, bisexual, transgendered, transsexual, intersexed, heterosexual, and heteronormative formations, the program also studies alternative ways of organizing sexualities and alternatives to sexuality in the past, present and future.

Students may pursue an Honours Minor BA or Cross-Disciplinary Certificate in Sexuality Studies in the Faculties of Arts, Atkinson or Glendon. For specific program and certificate requirements, as well as the list of program courses, please consult the relevant Programs of Study section of this calendar.

The interdisciplinary program in Social and Political Thought is concerned with the interdisciplinary study of human community — its nature, history and foreseeable futures. Students can double major or minor in social and political thought and an Honours BA program in the Faculty of Arts. The program is intended for those students whose breadth of focus is such that they would like to view the social and political situation of contemporary societies, both substantively and theoretically, from a plurality of humanistic and social scientific perspectives.

For specific program requirements and the list of program courses, please consult the Faculty of Arts Programs of Study section of this calendar.

GL/SOSC 3672 3.00 Human Capital, Social Capital and Economic Growth. The sharp disparity between growth rates across OECD countries is one of the most striking economic phenomena. While human capital has been traditionally understood as being one important growth factor, economists are increasingly looking at the linkages between human capital and social capital to explain growth. Without sufficient social capital, human and physical capital are less effective. Recently, international organizations (OECD, the World Bank) provided a forum in which these questions have been analyzed and debated. Prerequisites: GL/ECON 2500 3.00 and GL/ECON 2510 3.00. Corequisite for direct entry BSW Honours majors: AK/SOWK 4020 3.00. Note 1: The School of Social Work assumes responsibility for locating placements and contracting with the setting to provide a suitable learning experience. A student is required to complete a total of 700 hours in AK/SOWK 4000 6.00 and AK/SOWK 4001 6.00. 650 hours will be distributed across Practicum I and Practicum II and will be applied to actual time at the practicum setting with appropriate supervision. The remaining 50 hours includes the process of planning, researching and negotiating the practicum (see School of Social Work Practicum Manual for full details). Note 2: Students register in AK/SOWK 4000 6.00 upon confirmation of the placement during normal enrolment periods using the Web enrolment and registration system. Students must confirm acceptability of their field placement location with the School of Social Work before commencing the practicum. Please refer to the social work supplemental/school calendar, for Notes 3 to 8. Course credit exclusion: None.

AK/SOWK 4001 6.00 Practicum in Social Work II. Students continue their three-day a week placement with increased responsibilities and expectations. At the end of the placement, students must be able to function as an entry-level social worker. Prerequisites for post-degree BSW Honours majors: AK/SOWK 2030 6.00, AK/SOWK 2050 6.00, AK/SOWK 3041 3.00, AK/SOWK 3060 6.00, AK/SOWK 3070 3.00, AK/SOWK 3110 3.00. Pre or Corequisite for post-degree BSW Honours majors: AK/SOWK 4000 6.00, and AK/SOWK 4020 3.00. Prerequisites for direct entry BSW Honours majors: 57 credits in non-SOWK courses and AK/SOWK 1010 6.00, AK/SOWK 2030 6.00, AK/SOWK 2050 6.00, AK/SOWK 3041 3.00, AK/SOWK 3060 6.00, AK/SOWK 3070 3.00, AK/SOWK 3110 3.00, AK/SOWK 4000 6.00 and AK/SOWK 4020 3.00. Note 1: AK/SOWK 4001 6.00 Practicum II is a continuation of the AK/SOWK 4000 6.00 Practicum I setting (see Note 1, AK/SOWK 4000 6.00). Students are expected to attend integrated seminars at the school, presentations and other seminars as required, and to complete assignments as detailed in the practicum manual. Note 2: Students register in AK/SOWK 4001 6.00 during normal enrolment periods using the Web enrolment and registration system. Note 3: A student may withdraw only once from AK/SOWK 4001 6.00 and still be considered a candidate for the BSW degree. The authorization of the second practicum will be at the discretion of the Director of Field Education. Note 4: Post-degree BSW Honours majors normally complete the practicum requirement by spending two to five days per week in their field placement. While the student's performance is evaluated jointly by the field instructor and faculty adviser, the School of Social Work determines whether the student has met the requirements which determine a passing grade. Direct entry BSW Honours majors are expected to spend three days per week in the field. Note 5: Open only to students in the direct entry BSW Honours and post-degree BSW Honours programs. Course credit exclusion: None.

As one of the liberal arts and social sciences, the discipline of sociology contributes to self-comprehension and the understanding of society by developing a body of knowledge concerning its structure, dynamics and symbolic orders. An undergraduate specialization in sociology provides a basis for graduate study and professional careers in fields such as university research and teaching in sociology, law, secondary school teaching, social research, administration and various social services. Though the members of the Department of Sociology teach a wide range of materials and perspectives on society in general and on Canadian society in particular, we take social criticism through theory development, research and teaching to be an essential element of our work.

For specific program requirements, please consult the Faculty of Arts Programs of Study section of this calendar.

Not all of the courses listed below will necessarily be offered in any given year. For details of courses to be offered, please consult the sociology supplemental calendar.

Note for Arts students: For all 4000-level sociology courses, students must have successfully completed at least 84 credits. However, pending availability of spaces, third-year Honours students who have successfully completed at least 78 credits who are also taking summer courses may be given permission to enrol.

South Asian studies is offered as an Honours Double Major Interdisciplinary BA program and Honours Minor BA program that can be pursued jointly with another Honours BA program in the Faculty of Arts. A Cross-Disciplinary Certificate in South Asian Studies is also available.

Students interested in South Asian studies should first explore the program Web site <http://www.arts.yorku.ca/sosc/sasia> which has the most up-to-date information on the program. The Web site also gives students an overview of how specialized knowledge of South Asia can enhance

specific career paths in fields as diverse as business, policymaking, development, humanities or fine arts.

The two main foci of the program are the South Asian region as well as its diaspora. Through a wide range of courses from different disciplines like anthropology, sociology, history, political science, and languages, the program aims to foster a deeper understanding of the South Asian region as an entirety, as well as the range of issues that concern the South Asian diaspora. Given that contemporary South Asia has emerged as a major world force faced with unprecedented social and political changes, the program offers grounded and expert analyses of challenges that face the region. Importantly, the program engages with the contemporary South Asian diaspora, which has become a significant and powerful presence in Canada and elsewhere.

In addition to an introductory core course and a 4000-level capstone course, students in the program are required to complete a specified number of credits in the following areas of concentration: history and state formations; and, gender, society and culture (including diasporic issues). The program also allows students to substitute specific courses which may be of interest to them – but prior approval of the program coordinator is required. For specific program requirements and the list of program courses, please consult the Faculty of Arts Programs of Study section of this calendar.

General Information for Fine Arts Students

York's Department of Theatre, with 22 full-time faculty members teaching more than 60 half- or full-year courses for majors, is the largest theatre department in Eastern Canada. Because of the department's location in Metropolitan Toronto, students have access to Canada's biggest concentration of English-language professional theatre companies and artists.

The Department of Theatre offers BA, BA Honours and BFA Honours degree programs, providing students with different approaches to achieving their own theatrical goals. (For information on the MFA in acting, directing and playwriting or the MA/PhD in theatre studies see the Faculty of Graduate Studies calendar.)

All students must be evaluated by the department before being admitted. Students with credits from other postsecondary institutions may possibly be placed in first- or second-year courses, depending on their background and ability. Admission to courses above the first-year level is usually by audition, portfolio and/or interview, with the student's work in first year both within the department and the University given particular emphasis. Advancement within the department is based upon demonstrated proficiency in one or more aspects of theatre and a satisfactory academic standing as defined in this calendar. It should be noted, however, that a satisfactory academic standing in itself does not guarantee admission to any course. Be aware that the study of theatre requires a special commitment and demands enormous amounts of time and energy.

The first undergraduate year is a foundation year for theatre majors to learn about all aspects of theatre, to get involved in both acting and backstage work, and to understand theatre as it existed in other times and places. In this year, students must also complete several courses in other areas of the University. In their remaining years, students may choose a broad program of study or apply to follow a more specialized option in acting, creative ensemble, production, design, playwriting and dramaturgy, criticism, dramatic literature, educational theatre or theatre history.

Most majors take far more than the minimum number of courses in theatre and, for that reason, the department recommends completing the general education requirements as soon as possible. The BA Honours degree, which is usually chosen by those considering graduate study and careers in teaching or writing, requires at least 48 credits in theatre with a majority of these in theatre studies. The BFA Honours degree for professionally-oriented students in acting, directing, playwriting and dramaturgy, production and design allows students to take up to 81 credits in theatre, the majority in studio. Detailed regulations and programs of study are

available in the Faculty of Fine Arts section of this calendar and in the department's handbook.

Students pursuing an Honours degree in the Faculty of Arts may combine a 42 credit or 48 credit Honours major in an arts discipline with a second major in theatre (theatre studies or production streams only). Honours degree students in the Faculties of Arts, Environmental Studies, Science and Engineering or Fine Arts may also qualify for a 30 credit theatre minor in theatre studies or theatre production. For details contact the department.

Department classes and productions are only part of the excitement of studying at York University. The Centre for Film and Theatre provides a focus for most departmental activities. Winters College is a designated fine arts college and home for many students. Professionals from across Canada, the US, England, France, Eastern Europe, China and other countries have come to York University to share their vision and expertise.

Three-credit courses usually meet three to six hours a week for one term. Six-credit non-studio courses meet either three or four hours a week for the whole academic year. Six-credit studio courses meet either six or eight hours a week for the whole year. Additional rehearsal and/or crew hours are often required. Not every course listed here is offered every year.

The interdisciplinary program in Urban Studies is designed to provide a liberal undergraduate education about the nature and functioning of cities and urban society. While it is comprehensive in its approach and range, it also aims to achieve depth in the examination of fundamental urban issues. Members of the Urban Studies program share a fascination with cities, among the most fundamental human institutions, and a commitment to their exploration. Across history, cities have been sites of innovation in economic, political and cultural life; centres of trade; seats of empire; and loci of scientific, social and artistic creativity. Today, they are the home of a growing majority of the world's population who increasingly live in metropolitan regions of several million people, regions often characterized by vigorous social diversity, striking contrasts of wealth and poverty, and a complex array of political, planning and environmental dilemmas. All of these themes are concerns of the Urban Studies program. The program's core courses and senior-level work/study course stress direct experience of the urban field and of the process of doing urban fieldwork and research.

Students in urban studies have varied backgrounds and join the program for a range of reasons. Some are curious about the social life of the city, its people, its pleasures and its discontents, and often focus their course work on Toronto's inner city or suburbs. Others orient their coursework to an interest in cities in a world perspective or in the context of a global economy. Some are concerned with social issues or environmental dilemmas that confront the contemporary metropolis. Others enrol in the program as a foundation for professional studies in urban planning and design, or in environmental studies, law, business, education or public administration. Some pursue graduate work in an academic area related to the urban field.

For specific program requirements and the list of program courses, please consult the Faculty of Arts Programs of Study section of this calendar.

Programs of Study

The programs of study in the Department of Visual Arts are based on a creative interaction among the historical, practical and critical/theoretical approaches to the visual arts that is possible only within a modern university. The department educates students within a broad humanist context and provides a strong foundation for those who wish to pursue further study and professional involvement in the visual arts. It offers programs leading to a BA, BA Honours or BFA Honours degree. In addition to courses in visual arts, students are also required to take courses within the humanities, social sciences and natural sciences to complement and reinforce their studies. As a result, the Department of Visual Arts reserves the right to restrict students to 18 credits in visual arts in any given year. Of these 18 credits, only 12 credits will be allowed in the studio area of the department in any given year.

Honours Minors in visual arts (art history) and visual arts (studio) are also available.

Visual Arts (Studio)

Practicum courses have been designed to develop creative thinking and also to accommodate diverse backgrounds, abilities and interests. Students concentrating in studio may work in drawing, painting, sculpture, printmaking, photography or new media.

Studio students are recommended to:

- take FA/VISA 2620 6.00 Modern Art: 1750 to the Present during the course of their studies;
- successfully complete no fewer than 12 credits in two-dimensional and six credits in three-dimensional studio art.

Note: Course numbers whose second digit is 0 normally represent studio work.

Art History

Courses in art history are designed primarily for students whose major interest is the history of art or whose Honours program includes the history of art as one of its elements, and for other students majoring in the fine arts. Enrolment for students in other disciplines who wish to take any of these courses as electives may be accepted either with the stated prerequisites or with the approval of the instructor.

Students intending to continue their studies beyond the undergraduate level in art history are advised that most graduate schools require reading facility in modern languages. Students concentrating in this area are urged to include in their course of study at least one foreign language at the earliest possible time.

Some courses may use a title variance to indicate different course content within the same area of study. Courses may be organized in a geographical, chronological or thematic basis. Students should check with the department for more detailed course descriptions in any given year.

Note: Not all courses listed are necessarily offered every year.

Visual Arts Courses

FA/VISA 1000 3.00 Critical Issues in the Studio. Introduces students to visual, conceptual and theoretical language as it relates to studio practice. Ideas are examined through various disciplines from different points of view. Core course for first-year foundation studies in visual arts. Open to non-majors. Course credit exclusion: FA/VISA 1040 3.00.

FA/VISA 1005 6.00 Understanding Digital Art. Offers a basic introduction for non-visual arts majors to digital practices in contemporary art. It does not constitute a prerequisite for further New Media courses. It is offered online, combining exhibition and event visits with Web-based materials and assignments, and monitored chat discussions. An area of contemporary visual art that has its own history, social context, and technical strategies is open to students with no background, but who are interested in investigating some of the significance of the digital revolution. Students become familiar with digital photography, digital video/audio, installation, interactive art works, and art on the Web. Online lectures and readings investigate a broad spectrum of computing issues applicable to visual culture, as well as the unique characteristics of digital art. Specific hours in the week are designated for online discussion time. Not open to visual arts or FACS majors.

FA/VISA 1006 6.00 The Photographic Experience. Offers an introduction to photography practices for non-majors. Basic skills are developed through lectures, tutorials, discussions and group critiques. Aspects of history and theory are explored. Camera required. Students are responsible for all costs associated with image creation and production. Course credit exclusions: FA/VISA 2060 6.00 (formerly FA/VISA 1060 6.00) or AK/VISA 2360 3.00 (as of Summer 2003). Not open to visual arts majors.

FA/VISA 1110 6.00 Introduction to Western Art. Offers fundamentals of Western art history, visual analysis and selected cultural and philosophical themes in the development of human expression in the arts. The emphasis is on the chronological and thematic development of Western European and some North American art with a view to assessing and understanding the history of artistic creativity and its many manifestations. Prerequisite: None.

FA/VISA 1120 6.00 Introduction to Visual Culture: Images, Media, Meanings. Explores the ways that visual images work. What do images mean? Why do they matter? Visual culture is a complex cultural phenomenon affecting how meaning is visually produced, coded and consumed in public art, media, museums, advertising, etc. The course provides an overview of recent and historical approaches to visual culture. It considers various media, contexts and periods. The course introduces students to the study of visual culture in such arenas as film and video, photography, painting and sculpture, the built environment, advertising and fashion, or contemporary arenas such as video games and the Internet. Visual Culture involves the development of a critical framework for the understanding and discussion of those aspects of culture and society which involve any type of visual media. The student will learn how to analyze visual media, interpret meanings, and gain experience in applying critical concepts to these understandings. Open to non-majors.

FA/VISA 2021 3.00 Painting: Approaches to the Human Figure. Examines Aesthetics and techniques through the study of various traditions and approaches to painting the human figure. Visual vocabulary and formal composition are developed through practical application and critical appraisal. Contemporary art concerns are discussed in slide presentations. Open to non-majors.

FA/VISA 2024 3.00 Painting: Composition and Colour. Introduces composition and colour through a number of assigned painting projects on how to structure a painting. Emphasis is on formal elements, particularly colour, and combining them through a diversity of compositional means that cover a range of painting genres. Open to non-majors. Course credit exclusion: FA/VISA 2022 3.00.

FA/VISA 2025 3.00 Painting: Approaches to Techniques and Materials. Explores critical approaches to painting through a study of both traditional and contemporary techniques and materials. Through studio projects, students develop the technical and conceptual competency required for further exploration in painting, and discuss contemporary issues relating to the practice. Open to non-majors.

FA/VISA 2031 3.00 Sculpture: Introductory Wood and Metal Fabrication. Engages students in three-dimensional, non-representational sculpture stressing individual approaches to creative problem solving. Introduces students to sculptural methodologies and skills employing additive and reductive processes. Discusses fundamental concepts of traditional, post-modern, and emerging sculptural production in relation to abstraction, as experienced through individual production. Compulsory supplementary fees apply. Mandatory safety equipment required. Open to non-majors.

FA/VISA 2032 3.00 3-Dimensional Construction. Projects focus on three-dimensional construction processes such as plaster construction, wood construction and found objects. The primary aim of this course is to introduce students to sculptural practices that encompasses more than one material in the production of 3-dimensional objects. The theory and practice of 20th-century constructed sculpture is examined through discussions, slide lectures and course projects.

FA/VISA 2033 3.00 Clay Modelling and Plaster Casting. Introduces students through a combination of slide lectures and studio practice to the historical tradition and the contemporary theory and practice of clay modelling over an armature and the transformation of the modelled object into a plaster casting through the waste mould process. Compulsory materials fees and damage deposit apply. Mandatory safety equipment required. Open to non-majors.

FA/VISA 2034 3.00 Stone Carving. Develops understanding of form by combining primary sculptural method and traditional material. Investigations using stone identify principles of glyptic method and idea through dialogue, slide discussions and readings, resulting in visible signs of process and materialization of completed work. Compulsory supplementary fees. Mandatory safety equipment is required. Course credit exclusion: FA/VISA 2000A 3.00. Open to non-majors.

FA/VISA 2035 3.00 Fundamentals of Sculpture. Familiarity with three dimensional form and methods of production are required for sculptural expression. This course acquaints students with the fundamentals of

sculpture, including constructive methods in wood and metal, clay modelling and replication using gypsum products. Compulsory supplementary fees. Mandatory safety equipment is required. Course credit exclusion: FA/VISA 2000B 3.00. Open to non-majors.

FA/VISA 2036 3.00 Introductory Foundry. Explores a range of foundry techniques used in casting sculpture. Students are introduced to all aspects of casting and are required to take a work from the beginning to the final finishing stage. Small scale metal casting is introduced. Students receive instruction in lost wax and sand casting techniques and are expected to take a work through the entire casting process. Students develop a good understanding of what is required to finish a cast work, including work with air tools and patination. The history of bronze casting is provided through slide presentations of a range of examples from the 5,000 year history of the artform from ancient cast sculpture to recent contemporary works. Examples from China, the Middle East, Africa and Europe are examined in order to establish bronze castings' historical and continued relevance as an artform. Supplementary fees apply.

FA/VISA 2053 3.00 Time-Based Art: Crossing Boundaries. Introduces students to interdisciplinary studio practice, emphasizing critical thinking and creative exploration. Projects may be developed through combinations of different practices, such as photo and text, bookworks, audio/video, and site-specific works. Technical workshops include introductions to Photoshop and Quicktime movies. Compulsory supplementary fees.

FA/VISA 2055 3.00 Time-Based Art: Performance Art and Everyday Life. Focuses on individual and group projects plus readings on time-based media, especially contemporary performance art. Students participate in exercises that promote original responses to the everyday environment, and are encouraged to use a variety of media in making works. Compulsory supplementary fees.

FA/VISA 2056 3.00 Time-Based Art: Introduction to Video Art - Production. Introduces students to the creative practice of video art in a production studio environment, including both concepts and techniques. Classes include workshops on camera, lighting, video effects and sound recording techniques. Students create individual creative video projects. Compulsory supplementary fees. Open to non-majors.

FA/VISA 2057 3.00 Time-Based Art: Interactive Video and Audio. Provides basics of digital video and audio production, and introduction to programming for artists using MAX/MSP. This program lets you use input from the mouse, keyboard or a camera to manipulate how you see video and hear sound. Open to non-majors. Compulsory supplementary fees apply.

FA/VISA 2060 3.00 Introductory Photography: Black and White. Focuses on the creation and production of black and white photographs in this hands-on studio course. Camera, film and print skills are developed in conjunction with critical and aesthetic awareness. A 35 mm manually operable camera is required. Prerequisite for non-majors: FA/VISA 1006 6.00. Compulsory supplementary fees apply. Course credit exclusions: FA/VISA 2060 6.00, FA/VISA 1060 6.00, FA/VISA 2061 3.00, and AK/VISA 2360 6.00 prior to 1998.

FA/VISA 2061 3.00 Photo Studio 1. Offers an introductory studio in photographic theory and practice fundamentals. Tools, techniques and ideas related to seeing and camera art are explored with emphasis on the photographer as informed image-maker. Open only to visual arts majors, this course is a prerequisite for 3000-level photography courses. Course credit exclusions: FA/VISA 2006 3.00; AK/VISA 2360 3.00 (as of Summer 2003).

FA/VISA 2064 3.00 Introductory Photography: Colour. Creating and producing colour photographs is the focus of this hands-on studio course. Camera, film and print skills are developed in conjunction with critical and aesthetic awareness. A 35 mm manually operable camera is required. Prerequisite for non-majors: FA/VISA 1006 6.00. Compulsory supplementary fees. Open to non-majors. Course credit exclusions: FA/VISA 2064 6.00.

FA/VISA 2065 3.00 Introductory Digital Photography: Camera to Image. Introduces photographic practices in a digital environment. Explores camera, tools, techniques and conceptual approaches related to image capture and printing. A digital camera is required. Prerequisite for non-majors: FA/VISA 1006 6.00. Compulsory supplementary fees.

FA/VISA 2066 3.00 Introductory Digital Photography: Virtual Strategies. Introduces Photographic practices in screen-based digital environments. Explores alternatives to printed work including a range of screen-based works, projection, and other digital alternatives for exhibition, dissemination and portfolio production. Prerequisite for non-majors: FA/VISA 1006 6.00. Compulsory supplementary fees.

FA/VISA 2070 3.00 Print Media: Lithography. In this introduction to lithography, students are exposed to the ideas and aesthetics informing contemporary print media. Demonstrations and projects cover various approaches to this medium, including drawing, transfer and photographic or digital methods. An understanding of the material and conceptual possibilities of lithography will allow students to develop individual print practices. Compulsory materials fee. Mandatory safety equipment is required.

FA/VISA 2071 3.00 Print Media: Intaglio. In this introduction to intaglio, students are exposed to the ideas and aesthetics informing contemporary print media. Demonstrations and projects will cover various approaches to intaglio, including drypoint, etching and photo-etching. Compulsory materials fees apply. Mandatory safety equipment required.

FA/VISA 2073 3.00 Print Media: Relief. In this introduction to relief printing, students are exposed to the ideas and aesthetics informing contemporary print media. Demonstrations and projects include various approaches to relief printing such as woodcut, linocut and collagraph, and cover a range of techniques and material processes. Compulsory supplementary fees. Open to non-majors.

FA/VISA 2074 3.00 Print Media: Screenprinting. In this introduction to screenprinting, students are exposed to the ideas and aesthetics informing contemporary print media. Demonstrations and projects cover various approaches to screenprinting with a range of techniques and material processes. Compulsory supplementary fees. Open to non-majors. Course credit exclusion: FA/VISA 2072 3.00.

FA/VISA 2081 3.00 Drawing: Perception, Proportion, Structure. Explores contemporary approaches to traditional genres such as the still life, portrait, landscape and architecture are developed in relation to formal drawing skills. Studio projects include observational drawing and the application of representational systems such as perspective. The creative process is stressed encouraging personal, imaginative solutions to class projects and home assignments. Open to non-majors.

FA/VISA 2082 3.00 Drawing: Approaches to Abstract Image Making. Explores contemporary, non-representational approaches to drawing through studio projects and slide presentations. Develops conceptual methods for generating abstract imagery in conjunction with formal drawing skills and techniques. Stresses the creative process by encouraging personal, imaginative solutions to class projects and home assignments. Open to non-majors.

FA/VISA 2110 6.00 Introduction to the Study of Western Architecture. Offers a chronological study of the theory, practice and development of architecture from ancient Greece to the twentieth century, based on the detailed examination of individual buildings. Prerequisite: None.

FA/VISA 2340 6.00 The Art of Asia. Surveys the art of India, China and Japan, with special emphasis on the informing religious traditions. Fulfills Intro Studies requirement for BA, BFA Major/Minor in visual arts. Open to non-majors. Course credit exclusion: FA/VISA 1340 6.00.

FA/VISA 2930 6.00 History of Photography. Offers a survey of photography as an art form from early experiments in the medium to contemporary work. Open to non-majors. Course credit exclusion: FA/VISA 3930 6.00.

FA/VISA 3000D 6.00 Sculpture Processes. Offers instruction in two of five processes: metal fabrication; carving in stone or wood; modelling in clay and wax; constructing with organic materials in their natural state; casting an object in metal using the lost-wax method. Students will complete two assigned projects in addition to one of their own design.

Prerequisite: Completion of foundation studies, including six credits in sculpture at the 2000-level with an average of C+ or better, or permission of the course director.

FA/VISA 3000G 3.00 Word and Image. Explores the integration and counter-play of text/words with visual forms and images in a variety of media drawn from studio art practice, including painting, drawing, printmaking, performance, electronic media, photography and sculpture. Introduction to the work of contemporary artists using these elements in book works, prints, photographs, posters, painting, performance and electronic media, as well as popular culture, will expand the range of possibilities. Fees apply. Prerequisite: Third- or fourth-year standing and/or permission of the course director.

FA/VISA 3000J 6.00 Interactive Media. Offers a directed studio practice centring on themes for individual and collective investigation, with a particular emphasis on digital manipulation of imagery (still or video) that works with viewer input and interaction. The methods used can range from simple approaches based on multimedia software, to more sophisticated graphical programming environments. Competence in basic multimedia is required. Various kinds of interactive interfaces that a viewer may encounter will be investigated, based on both the small screen (computer or TV) or in the format of an installation. Interface strategies by well-known electronic media artists will be studied, as well as possibilities for networked collaboration (connections with remote users). Students are required to independently research their own creative strategies for interactivity. Materials fee may be required. Prerequisite: FA/VISA 1000 3.00, six credits in the 205x 3.00 series. Note: Open to visual arts majors only.

FA/VISA 3001A 3.00 Critical Issues in the Studio II: The Artist in Electronic Culture. This course is intended to further expand students' awareness of critical debates in contemporary art practice. It focuses on how artists contextualize their own work in relation to key areas of contemporary thought: the impact of new technologies on art, both in electronic and in traditional media; and an overview of the machine-body interrelationship that often shapes the content of art practice in this area. Prerequisites: Successful completion of 1000- and 2000-level studies and practicum requirements for the BFA stream, or permission of the course director for non-majors.

FA/VISA 3001B 3.00 Critical Issues in the Studio II: The Artist as Activist and Educator. This course is intended to further expand students' awareness of critical debates in contemporary art practice. It focuses on how artists contextualize their own work in relation to key areas of contemporary thought: the impact of feminism on social activism as described by the phrase "the personal is the political." Prerequisites: Successful completion of 1000- and 2000-level studies and practicum requirements for the BFA stream, or permission of the course director for non-majors.

FA/VISA 3001C 3.00 The Body & Technology: From Real To Virtual. This course expands students' awareness of critical debates in contemporary art by addressing how artists contextualize their work in relation to ideas about the body and technology. These ideas are examined through viewing works of art, the discussion of readings, presentations and research papers. Prerequisite: FA/VISA 1000 3.0, 3rd or 4th year standing. Non-majors by permission.

FA/VISA 3001D 3.00 The Painter in Postmodernity. Critical Issues in Studio II further expand students' awareness of critical debates in contemporary art practice. It focuses on how artists' contextualize their own work in relation to key debates within painting and contemporary thought. The wider social and cultural implications of modernism and postmodernism are surveyed in relation to contemporary painting. Through examination of the practices of key painters, the course traces changes in painting beginning with the demise of Greenbergian Modernist painting to contemporary practice. Individual seminars focus on contemporary debates in painting moving chronologically from the Neo-expressionists style of the 1980's to the present. Seminar topics include the integration of mass media and influences of new media on painting; the use of simulation and appropriation both as stylistic devices and as sites of meaning; the integration and growing importance of feminist and postcolonial ideas within painting. Prerequisites: Successful completion of

1000-and 2000-level studies and practicum requirements for the BFA stream or permission of the course director for non-majors.

FA/VISA 3001E 3.00 Critical Issues II: Research and Practice in Art. Further expands students' awareness of critical debates in contemporary art practice. It explores how artists establish studio topics and develop areas of research expertise. Case studies explore how individualized art practice intersects and hybridizes established areas of structured research. Prerequisites: Successful completion of 1000- and 2000-level studies and practicum requirements for the BFA stream, or permission of the course director for non-majors.

FA/VISA 3001F 3.00 Critical Issues in the Studio II: Repetition, Reproduction and Reproducibility. Examines recurring, serial and inherently reproducible art forms within a theoretical context. Focusing primarily on print-based practice, topics include: the imprint, ephemera, copies and forgeries. Parallel to this, the presence of the body and/or machine is considered. Prerequisites: Successful completion of 1000- and 2000-level studies and practicum requirements for the BFA stream or permission of the course director for non-majors.

FA/VISA 3001G 3.00 Critical Issues in the Studio II: Reconsidering the Object. This course further expands students' awareness of critical debates in contemporary art practice. It focuses on how artists contextualize their own work in relation to key areas of contemporary thought. Topics vary from year to year. Prerequisites: Successful completion of 1000- and 2000-level studies and practicum requirements for the BFA stream, or permission of the course director for non-majors.

FA/VISA 3001J 3.00 Critical Issues in the Studio II: Artists' Writing / Writing Artists. Explores artists' use of writing in artmaking and the practice of writing as art. Considers the spoken, written, printed, and recorded word, integral to and/or parallel to artwork within the context of art and literary theory. Prerequisite: FA/VISA 1000 3.00, 3rd or 4th year standing. Course Credit Exclusion: 3rd or 4th year standing

FA/VISA 3001X 3.00 Identity: Gender Sexuality Ethnicity. Explores notions of "otherness" including issues pertinent to environments in which gender-bias, homophobia and cultural stereotyping are operative. Encourages resolution for individual & culturally-specific investigations critical to artistic closure but which are not addressed within the traditional studio or studies settings. Prerequisite: FA/VISA 1000 3.00, 3rd or 4th year standing. Non-majors by permission.

FA/VISA 3010 6.00 Feminisms: Women, Art and Culture. Offers studio practice combined with lectures and seminars to address the relationship of women to art specifically and to culture and society generally. Contemporary debate on issues such as race, class and gender is examined in relation to artistic theory and practice. Students are encouraged to develop individual and collaborative works in a variety of media, including photography, text, painting, performance, video and film. Technical workshops and guidance are incorporated into the course as required. Optional materials fees. Prerequisite: Successful completion of foundation studies or permission of the instructor.

FA/VISA 3020 6.00 Painting. A studio course emphasizing various modern concepts in painting. Problems presented are designed to be as flexible as possible, challenging the student's creative expression. Individual work space is assigned to each student; therefore enrolment is limited. Note: Students are expected to work on their own outside scheduled class time. Prerequisite: Successful completion of foundation studies including six credits in painting with an average grade of B or better, or permission of the instructor.

FA/VISA 3021 6.00 Mural Painting (Site Specific Public Art). Studio painting projects explore the nature of public art. Lectures examine works from Mexico, Europe and North America to gain greater social and aesthetic understanding of contemporary mural art. Students work towards a large scale project. Prerequisites: Third- or fourth-year standing, FA/VISA 2021 3.00 with C+ or better. Course credit exclusion: FA/VISA 3000E 3.00.

FA/VISA 3022A 3.00 Painting: The Body and Technology. Offers a thematic studio course that examines contemporary debates on the body

and technology primarily through painting and secondarily through the discussion of selected readings and the viewing of relevant images of works by artists. Prerequisite: FA/VISA 1000 3.00; six credits from 202x series of courses. Course credit exclusion: FA/VISA 3000F 3.00.

FA/VISA 3022B 3.00 Painting: The Spaces We Live In. Offers Thematic painting studio that focuses on contemporary concepts of space: the 'real' space of super-modernity as experienced in large urban centres and virtual or cyberspace. The conceptual ideas related to the theme are introduced through selected readings. Prerequisites: FA/VISA 1000 3.00; six credits from 202x series of courses. Course credit exclusions: FA/VISA 3000H 3.00 Painting.

FA/VISA 3022C 3.00 Painting: Constructing the Human Figure. Investigates the representation of the naked and clothed human figure in painting. Working from close observation of a life model, appropriated images and from their imagination, students explore questions of identity and social references while developing technical and compositional skills. Prerequisites/corequisites: FA/VISA 1000 3.00; six credits from the 202x series of courses.

FA/VISA 3022D 3.00 Painting: Towards a Communal Practice. Explores painting as a relational and dialogical process that can be mobilized to implicate other spaces, individuals and groups. Prerequisites/corequisites: FA/VISA 1000 3.00; six credits from the 202x series of courses.

FA/VISA 3024A 3.00 Painting: A 2- and 3- Dimensional Practice. Explores new forms of contemporary painting that extend the medium from a two-dimensional practice to a critical consideration of its limit/frame, different kinds of support/form, as well as its relationship with the surrounding architecture/environment. Prerequisite/corequisite: FA/VISA 1000 3.00; six credits from the 202x series of courses.

FA/VISA 3024B 3.00 Painting and Mass Media. Explores and utilizes the flow of media images from newspapers, television and the Internet to then translate them in painting. Students manipulate and re-contextualize found images in order to weave formal, narrative and process threads, thereby producing new meaning. Prerequisite/corequisite: FA/VISA 1000 3.00; six credits from the 202x series of courses.

FA/VISA 3024C 3.00 Painting: Shifting the Boundaries of Abstraction. Examines the recent shift of the boundaries of abstraction and figuration in pictorial experience. In a series of painting, students create new relationships between abstraction and figuration by using the visual strategies of convergence, interference and mutation. Prerequisite/corequisite: FA/VISA 1000 3.00; six credits from the 202x series of courses.

FA/VISA 3025A 3.00 Painting: Pre 1950 Strategies. Explores and develops contemporary pictorial strategies from some of the major art movements of the first half of the 20th century such as Cubism, Surrealism and De Stijl. Prerequisite/corequisite: FA/VISA 1000 3.00; six credits from the 202x series of courses.

FA/VISA 3025B 3.00 Painting: Post 1950 Strategies. Explores and develops contemporary pictorial strategies from some of the major art movements of the second half of the 20th century such as Op Art, Minimalism and Neo-expressionism. Prerequisite/corequisite: FA/VISA 1000 3.00; six credits from the 202x series of courses.

FA/VISA 3030 6.00 Sculpture. Investigates sculpture within contemporary art practices encompassing a complex inquiry of materials, process and concept. Prerequisite: FA/VISA 1000 3.00 and six credits in sculpture at the 2000-level with a grade of C+ or better in each course

FA/VISA 3031 6.00 Foundry. Introduces foundry processes in the creation of sculpture with the purpose of exploring the creative potential inherent in metal casting techniques when students apply them to their studio practice. Prerequisites: FA/VISA 1000 3.00, and six credits from the 203x series of courses with a grade of C+ or better.

FA/VISA 3032A 3.00 Intermediate Sculpture Processes: Metal Fabrication. Explores metal fabrication as it can be applied to the sculptural process. Includes instruction in welding and forging. Prerequisites: FA/VISA 2032 3.00, three credits from the 203x series of courses. Supplementary fees apply.

FA/VISA 3032B 3.00 Intermediate Sculpture Processes: Wood and Stone Carving. Explores the possibilities in wood and stone carving as sculpture techniques. Students use hand and air tools to produce finished works. Prerequisite: FA/VISA 2034 3.00 and FA/VISA 2032 3.00. Supplementary fees apply.

FA/VISA 3032C 3.00 Intermediate Sculpture Processes: Clay and Wax Modeling. Explores the highly experimental and immediate process of clay and wax modeling techniques. Prerequisite: FA/VISA 2033 3.00 and FA/VISA 2032 3.00. Supplementary fees apply.

Prerequisite: Fourth-year standing or equivalent, or permission of the course director. Note: FA/VISA 2620 6.00 provides useful background material.

FA/VISA 4340A 6.00 Asian Art: Zen Painting and Poetry. This course offers a chronological survey of paintings inspired by Ch'an and Zen Buddhism. The course also involves a close reading of poetry written by monks and laymen associated with this enigmatic and challenging Buddhist sect. Students are expected to engage fully in class discussion. Prerequisite: A 3000-level course in Chinese or Japanese religion and culture, or permission of the course director. Course credit exclusions: None.

Cross-listed to: AS/HUMA 4405 6.00, FA/VISA 4340A6.00

FA/VISA 4340B 3.00 Monumentality & National Imagination in Asia. Provides an integrated seminar on critical discussions on the concept of monumentality in relation to the formation of political subjectivities, the invention of the past and traditions, and the establishment of the disciplinary state in Asia. Integrated with: GS/ARTH 5341 3.00. Open to non-majors.

FA/VISA 4350 3.00 The Islamic City. Examines the characteristics of Islamic cities in the pre-industrial period. Cities are explored through

documentary evidence, archaeological data and secondary sources. A general conclusion on the genesis of the Islamic city is sought. Prerequisite: FA/VISA 2350 6.00 or permission of the course director.

FA/VISA 4370 6.00 Signs and Symbols in Western Art. Provides an introduction to the pictorial language of attributes, emblems and other identifiers, as developed in classical, Christian and secular art and architecture. Lectures, discussions and student presentations. Prerequisites: One of FA/VISA 1110 6.00 or FA/VISA 1340 6.00 or FA/VISA 2620 6.00; third- or fourth-year standing in any department, or permission of the course director.

FA/VISA 4410 3.00 Celluloid City: Media Images of Architecture. Explores Modernist space, as represented by architecture and the city in photographs, postcards, film and eventually video and digital media, mediates our vision of the city and architecture space. Detailed investigation demonstrates how architecture and the city are intrinsic to visual culture. Prerequisite: Third- or fourth-year standing. Open to non-majors.

FA/VISA 4540A 6.00 Gothic and Gothic Revival Architecture. Examines the form, structure, function and iconography of Gothic architecture from its inception at the abbey church of Saint-Denis in 1140, under the patronage of Abbot Suger, to the 20th century. For the medieval buildings, emphasis is placed on the respective roles of patron and master mason in the design process, and on understanding the structure and iconography of the building. For the Gothic Revival buildings (19th to 20th century), the focus will be on buildings in Toronto and vicinity. Prerequisite: FA/VISA 2110 6.00 or FA/VISA 2540 6.00 or permission of the course director.

FA/VISA 4540E 3.00 Romanesque Sculpture in Britain 1066-1200. Investigates the form and function of ecclesiastical and secular sculpture in Britain from 1066-1200, with emphasis on the meaning and significance of the sculpture for contemporaries and the roles of patron and sculptor in the creative process. Prerequisite 4th year standing or permission of the course director.

FA/VISA 4581 3.00 Artisan to Artist: The Evolution of the Artist and the Creative Process in the Italian Renaissance and Baroque. Explores how the Italian Renaissance and Baroque artist changed from artisan to practitioner of the fine arts. Considers the processes of ideation, preparation and execution of works and the means developed to solve complex artistic and iconographic problems. Prerequisite: FA/VISA 2560 6.00. Open to non-majors.

FA/VISA 4610 3.00 The Senses in Art. Examines the senses in the experience and production of art, with an emphasis on the senses beyond vision -- taste, touch, smell, and hearing - in art and aesthetic experience. Explores how the senses are a prominent factor in contemporary artworks that involve spectators physically, focus on the body, and use new technologies to create distinct perceptual experiences. Considers the regime of visuality and the hierarchy of the senses, the allegorical representation of the senses in art history, and the emergent activation of the non-visual senses in contemporary art practice. Topics will focus on the cultural politics of the senses in art, with focused case studies on art and taste, art and touch, art and smell, audio art and synaesthetic art. The objectives of this course are 1) to introduce students to the impact of the senses in art practice with reference to specific works of art ; 2) to study the cultural politics of sensorial mediation; 3) to develop a critical understanding of non-visual aesthetics. Open to non-majors.

FA/VISA 4620A 3.00 European Art Between Two World Wars. Examines a number of themes which dominate this period: the political – Nazi and Soviet dictatorships with their government-imposed art programs and their destruction of modern art; the social – attempts to build a better world through a better environment (Constructivists, Bauhaus, de Stijl etc.) as well as attempts to create a better society by changing the people; Surrealism Sculpture – the flowering of modern sculpture. There are other themes as well, also photography, and photographs and films by artists. Prerequisite: FA/VISA 2620 6.00 or permission of the course director.

FA/VISA 4620D 3.00 Major Movements in Modern Art: The Decade 1905-1914. Examines key issues that still play their part in art today in this advanced seminar. The extraordinary decade in Europe that saw the founding of modern art, with the equally extraordinary variety of innovations made by movements like Fauvism, Cubism, Futurism, Die Brücke, Der Blaue Reiter, Vorticism, Rayonnism, Suprematism and Orphism are studied. Included are the contributions of individual artists like De Chirico and Chagall, as well as the creation of abstract art by Kupka, Kandinsky, Delaunay and Mondrian etc. Prerequisite: Permission of the course director.

FA/VISA 4620F 3.00 The Artist and the Modern Museum. Recent artistic responses to the modern art museum as providing the context for the consumption of art suggest that the museum may be a dying institutional form. The work of Buren or Broodthaers, for instance, questions the autonomy of art by exposing its reliance or involvement with the museum as its institutional ground. The construction of the category of "artist" in the 19th and 20th centuries is addressed as well as the relations between the "high art" product and the museum as the site of its consumption, display and authorization. Prerequisite: FA/VISA 2620 6.00 (or period study equivalent) and permission of the course director.

FA/VISA 4620G 3.00 Art Criticism: History, Theory, Practice. Offers a consideration of the most rewarding art criticism of the last hundred years, with emphasis on the development of modernist criticism from Pater and Baudelaire in the 19th century to the present. Prerequisite FA/VISA 3310 3.00

FA/VISA 4620H 3.00 Nationalism and Modern Art. Offers a seminar on a single major movement in art in the early 20th century. Teaching is based upon discussion reports and presentation of papers. Topics vary from year to year. Prerequisites: One of FA/VISA 1110 6.00 or FA/VISA 1340 6.00 or FA/VISA 2620 6.00; third- or fourth-year standing in any department, or permission of the course director.

FA/VISA 4620J 3.00 Painters Eleven, the Isaacs Group and the Regina Five. Offers a seminar on a single major movement in the early 20th century. Teaching is based upon discussion, reports and presentation of papers. Prerequisite: FA/VISA 1110 6.00 or FA/VISA 1340 6.00 or FA/VISA 2620 6.00; third- or fourth-year standing in any department or permission of the course director.

FA/VISA 4620K 3.00 Stained Glass as a Modern Art. Explores Architectural stained glass and its imagery in the context of its architectural setting and related developments in painting and sculpture from ca. 1800 to current practice. Representative monuments are discussed from technical, stylistic, and iconographical viewpoints. Prerequisite: FA/VISA 1110 6.00.

FA/VISA 4630 3.00 Art Crimes. Examines a range of modern era art crimes to understand how and why art is invested with material and cultural significance. Topics include museum thefts, vandalism, looting, smuggling, fraud and forgeries. Analyzes the negotiations through which some activities in the art world are criminalized while others are deemed unethical but legal and how and why these distinctions change with historical circumstance. Considers the representation of art crimes in popular culture. Studies specific case studies (such as Nazi looting or smuggling through the Getty Museum) from a contextual perspective to consider both the motives that brought them about and the ramifications they leave behind. Examines the methodologies used to research and sometimes solve these crimes. Open to non-majors.

FA/VISA 4640B 3.00 Contemporary Sculpture. Examines the development in contemporary sculpture from 1980 to the present, within both a theoretical and historical context. Initial seminars successively examine questions concerning the traditional public monument, modernist sculpture and problems of theoretical definition. The principle focus, however, is on sculpture in the past fifteen years. Prerequisite: FA/VISA 2620 6.00 or permission of the course director.

FA/VISA 4640C 3.00 Contemporary Art and Surrealism. Focuses on the art of the 1990s. In exploring this period, major emphasis is placed on the resurgence of Surrealist strategies in recent practice. A central theme involves the complex interplay between theory and practice within

contemporary art of the last 10 years. In this vein, theories such as Kristeva's concept of the abject, Bataille's notion of the formless, Freud's categories of the uncanny and the death drive, and Lacan's problematic of the real receive close attention. Revisionist interpretations of Surrealism itself by contemporary critics such as Yve-Alain Bois, Whitney Chadwick, Hal Foster, Rosalind Krauss and others are extensively discussed. Rachel Whiteread, Jimmie Durham, Mona Hatoum, Gary Hill and Sarah Luca are among the contemporary artists whose work is considered. Prerequisites: FA/VISA 2620 6.00 and preferably a second course in 19th- or 20th-century art, or permission of the course director.

FA/VISA 4720B 3.00 Problems in Canadian Art: Quebec Art: 1935 - 1975. Offers a seminar focusing on art in Quebec from the time of the Automatistes through the next generation, that of the Plasticiens. Students can choose and define topics from a suggested selection in accord with their own interests. Prerequisite: FA/VISA 2620 6.00 or permission of the course director.

FA/VISA 4720C 3.00 Problems in Canadian Art: Focus on Canadian Painting. Reviews the state of contemporary painting in Canada. To arrive at an appreciation of our current predicament - Is painting still the "Queen of the Arts" - we begin with broad questions about the history of painting in Canada, followed by in-depth discussions of key philosophical and critical texts written at the height of "post-modernism." In reviewing the work of current painters in Canada, we address the relative roles of the artist, dealer, curator and critic in defining painting today. Prerequisite: FA/VISA 2620 6.00.

FA/VISA 4720D 3.00 Bawdy Images/Body Theory in Canadian Visual Culture. Ribald, indecent, improper, dirty... definitions of 'bawdy' suggest how some body images have been viewed in Canadian visual culture. Focusing on 20th century case studies, the course provides a forum for formulating theoretical approaches to body imaging in the 21st century. Prerequisite: Third- or fourth-year standing.

FA/VISA 4720F 3.00 Canadian Architecture 1800-1870. An examination of the theory, structure, form, function, iconography and development of architecture in Canada circa 1800-1870. Chronological and thematic approaches are used. Emphasis is placed on architectural-historical research into specific buildings and/or architects. Student projects are designed to hone these research skills. Walking tours of Toronto and a visit to Niagara-on-the-Lake are an integral part of the course. Prerequisite: FA/VISA 1110 6.00 or FA/VISA 2110 6.00 or FA/VISA 2620 6.00, or permission of the course director. Course credit exclusion: FA/VISA 4720E 3.00.

FA/VISA 4720G 3.00 Toronto Architecture. An examination of the theory, structure, form, function and iconography of architecture and urban development in Toronto from the early 19th century to the present. Chronological and thematic approaches are used. Emphasis is placed on architectural historical methodologies and on skills necessary for original research into specific buildings, developments and/or architects. Student projects are designed to hone these research skills. Walking tours of Toronto are an integral part of the course. Prerequisite: FA/VISA 1110 6.00 or FA/VISA 2110 6.00 or FA/VISA 2620 6.00 or permission of the course director.

FA/VISA 4720H 3.00 Canadian Architecture 1870-1900. An examination of the theory, structure, form, function, iconography and development of architecture in Canada circa 1870-1900. Chronological and thematic approaches are used. Emphasis is placed on architectural-historical methodologies and on skills necessary for original research into specific buildings and/or architects. Student projects are designed to hone these research skills. Walking tours of Toronto and a visit to Guelph, Galt and Paris are an integral part of the course. Prerequisite: FA/VISA 1110 6.00 or FA/VISA 2110 6.00 or FA/VISA 2620 6.00, or permission of the course director. Course credit exclusion: FA/VISA 4720E 3.00.

FA/VISA 4720J 3.00 Stained Glass in Canadian Architecture. Explores architectural stained glass, both imported and Canadian-produced, for sites in Canada from ca. 1860 to the present, from the viewpoint of context, material, technique, iconography, and style. Covers the output of commercial studios and independent artists. FA/VISA 1110 6.00, 4th year standing

FA/VISA 4800D 3.00 Arts and Crafts Movement. This lecture/seminar course overviews the Arts and Crafts Movement which revolutionized attitudes towards both art and design in the latter part of the 19th century and the first half of the 20th century. The material covered includes the British Isles (England, Ireland), Europe (Germany, Austria, Scandinavia), the United States and Canada. The interconnection with nationalism, women's movements, museum development and industrialization is discussed, as are aesthetic goals and premises. Architecture and stained glass are studied along with smaller-scale objects. William Morris, Charles Rennie Mackintosh, Frank Lloyd Wright and Harry Clarke are a few of the important innovators whose works and writings are addressed. Prerequisite: FA/VISA 1110 6.00 or FA/VISA 2620 6.00 or FA/VISA 3910 6.00, or permission of the course director.

FA/VISA 4800E 3.00 The Body in Western Art: Identity and Construction. A seminar course with lectures on the representation of the human body in the Western visual traditions, from antiquity through the early 20th century. Primary literary and medical sources supplement an investigation of the visual record. Works of art are powerful cultural tools in the construction of social and sexual identity. This course is about what the body looks like in Western art and how clothing extends, confirms and/or modifies it. The systems of social signs and meanings as shown in works of art can be normative as well as challenging in their expression. The body and clothing are studied in the perspective of social iconography, medical culture and artistic representation. Prerequisites: FA/VISA 1110 6.00, third- or fourth-year standing, and permission of the course director.

FA/VISA 4800I 3.00 Art of the Arctic. This course examines various contemporary, modern and traditional Inuit and First Peoples' creative practices of the northern circumpolar region including video, new media and television, sculpture, printmaking, material culture and oral tradition.

FA/VISA 4800J 3.00 Photography in Contemporary Art. In any given year, one or more courses directly related to the study of art history or theory may be offered. Prerequisite: FA/VISA 3690 3.00 (formerly FA/VISA 3800C 3.00) or permission of the course director.

FA/VISA 4800K 3.00 Image Wars: Iconoclasm and Idolatry. In any given year, one or more courses directly related to the study of art history or theory may be offered. Prerequisite: Permission of the course director.

FA/VISA 4800L 3.00 Selected Topics: Asian Art. Provides advanced studies in traditional and/or contemporary art of Asia. Topic to be determined by the instructor in relation to their scholarly expertise. This course will likely require weekly readings and discussion, and the writing of a research seminar paper. Prerequisite: FA/VISA 1340 6.00, FA/VISA 2340 6.00 or permission of the course director.

FA/VISA 4950 3.00 History of Houses, Decoration and Landscaping in Western Architecture. Examines the history of houses from Greek times to the present at all social levels and domestic arrangements, including principles of interior decoration and domestic landscaping. Special emphasis is placed on class, gender and environment in the evolution and standardization of domestic design. Prerequisite: 1000- or 2000-level course in FA/VISA, FA/FACS or AS/HUMA.

Women's Studies

Women's studies is both a complement and a corrective to established fields at York and a new academic discipline of its own. Until recently, both the humanities and the social sciences reflected predominantly male perspectives. Women have been largely invisible in literature, art, history, philosophy, politics, social sciences and law. Through cross-cultural and disciplinary assessment, women's studies exposes misconceptions about women expressed through myth, ideologies, teachings and writings. It replaces negative cultural images of women with visions that reaffirm women's strength, capability and intelligence.

The School of Women's Studies unites academic resources at York University in Women's Studies, bringing together the undergraduate and graduate programs, the non-credit Bridging program, and the Centre for Feminist Research/le centre de recherches féministes à York.

A feature which distinguishes the Women's Studies program offered at Glendon from the programs offered at the Faculties of Arts and Atkinson is its bilingual focus. Non-parallel courses are offered in both English and French. As a result, a genuine dialogue develops between the approaches of anglophones and francophones to theory, philosophy, literature, legal structures and language.

Students may pursue a degree in Women's Studies in the Faculties of Arts, Atkinson or Glendon. For specific program requirements, please consult the relevant Programs of Study section of this calendar.

School of Women's Studies Courses of Instruction/École des études des femmes Description des cours

Not all courses will necessarily be offered in any given year. Courses may be offered at Glendon or on the Keele campus, during the day or in the evening. For information about specific offerings, or for a listing of other courses that count towards program credit, please consult the School of Women's Studies supplemental calendar.

Note: For purposes of meeting program requirements, all foundations courses will count as six credits towards the major.

Work and Study/Travail et études – Glendon

Program Office/Bureau du programme :

125 York Hall/pavillon York

Coordinator/Coordonnateur du programme :

Y. Frenette

The Work and Study program provides students with the opportunity to obtain a General Certificate in Work and Study and a bachelor's degree simultaneously. It gives them the opportunity to gain workplace experience, allowing them to choose a work placement according to their individual aspirations and aptitudes.

Working with a traditionally bilingual liberal arts institution, the General Certificate in Work and Study is unique, both in its objectives and in its structure. Work and study does not aim to introduce students to a specific discipline. Focusing on changes in the working world and providing students with the opportunity for unique professional experience, the program is designed to complement or even provide a new dimension to the student's undergraduate study program.

The General Certificate in Work and Study requires 24 credits, 15 of which are offered within the program and nine of which are offered by other programs and departments of Glendon and recognized by the program.

Students enrolled in the Work and Study program may only receive their certificate on the condition that they complete the requirements for their bachelor's degree.

Le programme Travail et études offre à des étudiants, engagés dans des études de baccalauréat, la possibilité de mener, simultanément, des études pour l'obtention du Certificat général en travail et études. Il les invite à vivre une expérience de travail, tenant compte de leurs aspirations et aptitudes, dans une activité de leur choix.

Issu d'un milieu universitaire de tradition bilingue voué à l'enseignement des lettres et des sciences humaines, le Certificat général en travail et études est unique de par sa nature et ses intentions. Il n'a pas à initier des étudiants à une discipline précise mais, en mettant l'accent sur les mutations du monde du travail et en leur permettant de vivre une expérience professionnelle unique, il entend ainsi leur offrir un complément, voire une nouvelle dimension d'une formation déjà en cours.

Le Certificat général en travail et études comprend 24 crédits dont 15 sont pris à l'intérieur du programme et neuf parmi des cours retenus par le programme et offerts au sein de différents départements et programmes du Collège universitaire Glendon.

Les étudiants inscrits au programme Travail et études ne pourront recevoir leur Certificat que s'ils ont rempli toutes les conditions nécessaires à l'obtention de leur Baccalauréat.

Contract Appointments/ Enseignants Sous Contrat

York University is fortunate to be able to draw from the community of Metropolitan Toronto and district many qualified people willing to serve the University as contract faculty. Many have long-standing connections with the University, and play important roles in the academic programs of the various departments and Faculties. Contract faculty who have taught at York for five or more years were invited to have their names included in this publication.

L'Université York est heureuse de pouvoir bénéficier des services d'un grand nombre de personnes engagées sous contrat vivant dans la communauté de Toronto et qui apportent à l'Université leurs qualifications et leurs connaissances. Nombreux sont les enseignants qui jouent ainsi un rôle important depuis des années au sein de leur département et faculté. Les personnes qui ont ainsi enseigné à York pendant cinq ans ou plus sont invitées à inscrire leur nom ci-dessous.
