Physics and astronomy are quantitative sciences which employ the scientific method of observation, experiment and systemization of the results of experiment. Their objectives are to seek to understand the ways in which the most fundamental or elementary systems in nature really operate.

Courses in the Department of Physics and Astronomy cover basic elements of the major topics delineated during the last 200 years in these rapidly developing fields of knowledge. There are certain required courses (see the program of study requirements in the Faculty of Science and Engineering Programs of Study section) which expose each student to the broad spectrum of physical phenomena and in an elementary way to the techniques of the theoretical physicist or astronomer in numerical analysis and modelling and of the experimental physicist or observational astronomer in measurement, observation and the apparatus of experiment. In developing programs of 3000- and 4000-level courses, students may concentrate their interests around experimental physics, theoretical physics, or astronomy and astrophysics. There are

opportunities to develop Honours Double Major and Honours Major/Minor programs with other disciplines in the Faculty of Science and Engineering or in other Faculties.

The department offers Specialized Honours applied science streams in applied physics and in space science, developed to meet the needs of rapidly expanding technologies in these fields. The requirements for these streams are found in the Faculty of Science and Engineering Programs of Study section.

A brochure giving detailed course descriptions and typical program prescriptions for all programs involving physics and astronomy is available on request from the department office.

Courses in Physics and Astronomy

Admission to any course beyond the 1000 level requires consultation with a member of the departmental admissions committee. Normally, entry to courses at the 3000 and 4000 levels requires successful completion of all lower-level courses that are required for degree programs in Physics and Astronomy. The prerequisites and corequisites stated for certain courses indicate the standard of background preparation deemed necessary for those not taking bachelor or Honours Physics and Astronomy programs. The course director should be consulted by potential entrants who have not completed the normal entry requirements of the department.

Unless otherwise specified, courses whose numbers end in "6.00" (i.e. six-credit courses) have three lecture hours per week for two terms when taught in a fall/winter session; those whose numbers end in "3.00" (i.e. three-credit courses) have three lecture hours per week for one term. Courses offered in the evening and/or in a summer session may have different formats and scheduling, though they will be equivalent in credit value.

The political science curriculum offers students a program of study that highlights the department's particular strengths. The program is designed to develop a student's ability in three areas: 1) **Political analysis:** students will learn to think critically about political life, especially in relation to the use and abuse of power, rights and responsibilities, different forms of diversity, and communities and nations in a global context. 2) **Critical skills:** the program emphasizes the development critical skills that will be an asset for future employment, including effective written and oral communication skills, analytical and numerical skills, and collaborative skills. 3) **Democratic awareness:** students will learn how power and authority are exercised and the possibilities of acting politically to bring about change.

The department offers a broad range of courses that focus on different themes. Students who major or minor in political science may choose to focus on one theme, or may take courses from several of the following themes:

- Canadian Democracy in the North American Context;
- Development, Inequality and the Global South;
- Gender, Diversity and Inclusion;
- Global Politics;
- Law, Social Justice and Ethics;
- Political Economy and Political Power;
- Political Organizing and Communication;
- Political Thought;
- Public Policy and Administration;
- Violence and Security.

In their final year of study, all political science majors and minors will take a capstone course that allows for reflection on their program of study and application of this knowledge to career and life goals. For further information regarding the capstone courses, please consult the departmental supplemental calendar or Web site.

A number of 1000- and 2000-level courses are also available to those students who wish to deepen their knowledge of political issues. As well, many of the upper-level courses are also open to non-majors who wish to further explore various political issues. For more detailed information, please consult the departmental supplemental calendar or Web site.

The Political Science program equips students with a broad set of analytical skills, critical skills and democratic awareness that gives our graduates the opportunity to pursue employment in a range of areas, including: the public service, international agencies, advocacy organizations, the media, and political organizations. Graduates of the program will be especially qualified to pursue graduate work in political science, or further studies in law, education or journalism.

For specific program requirements, please consult the Faculty of Liberal Arts and Professional Studies Programs of Study section.

The department also offers a Specialized Honours BA degree program in Global Political Studies. For details, please consult the Faculty of Liberal Arts and Professional Studies Programs of Study section.

The Portuguese Studies program focuses not only on Portugal, but on the entire Lusophone world across four continents: Europe, Africa, South America and Asia. Students can both learn the Portuguese language and gain a deep understanding of and appreciation for a Lusophone world of diverse literatures, cultures, art, cinema, philosophy and social and political life. Accordingly, the Portuguese Studies program offers courses in several areas: literature, history, political science, music and much more. As Portuguese is the world's sixth most widely used language (spoken daily by over 220 million people), its study will prepare students for work almost anywhere. Upon graduation, students will be ready to enter a variety of careers, particularly those related to globalization, foreign service, business and international development.

The Department of Psychology offers a curriculum which begins with a broad introductory survey of the various areas of enquiry within the discipline of psychology and the various applications of psychological knowledge.

The intermediate level of the curriculum then provides choice from a wide range of courses which pursue selected areas of psychology in greater depth. Insofar as possible, courses are offered in multiple sections with alternative formats so that students may select the format which most nearly meets their needs.

At the advanced level, courses are typically offered in relatively small seminars. Students are encouraged to select a wide range of courses and a high degree of flexibility is possible within the programs offered. It is the intention of the Department of Psychology to serve the needs of students whose interests in the discipline range from curiosity to commitment.

For specific program requirements please consult the Faculty of Health Programs of Study section.

Admission to all 2000-, 3000- and 4000-level courses in psychology (with the exception of HH/PSYC 2020 6.00, HH/PSYC 2021 3.00 and HH/PSYC 2022 3.00) is conditional upon satisfactory completion of Introduction to Psychology, HH/PSYC 1010 6.00. Further, students must obtain a minimum grade of C (4.00) in HH/PSYC 1010 6.00 to be permitted to continue as a major or minor in psychology as well as to take psychology courses for which HH/PSYC 1010 6.00 is a prerequisite. Under exceptional circumstances, non-majors and non-minors who have not obtained a minimum of C (4.00) in HH/PSYC 1010 6.00 may apply for special consideration to enrol in an upper-level psychology course for which HH/PSYC 1010 6.00 is a prerequisite. This application should be made to the psychology undergraduate program director.

Courses in psychology normally meet for at least three hours a week, for one term (three credits – course numbers end in “3.00”) or for two terms (six credits – course numbers end in “6.00”). Most of the courses listed below are offered in more than one section. Students cannot obtain credit for two sections of the same course, except for independent study courses.

Some 3000- and 4000-level courses may require HH/PSYC 2020 6.00 (or equivalent) as a prerequisite. Students should note that the material taught in this course may be important for them in their chosen career or in graduate work. Students might also consider taking HH/PSYC 3010 3.00 as preparation for work in the final academic session.

Students in all psychology courses are encouraged to learn about psychological research by participating as subjects in research projects conducted under the supervision of the Department of Psychology.

Not all of the courses listed below will necessarily be offered in any given year or term. For details of courses to be offered, please consult the psychology supplemental calendar.

This program represents the "cutting edge" in social justice studies, bringing together anti-racist, ethnic and Indigenous studies in a unique program that enables students to explore the specific concerns of racialized, immigrant or Indigenous communities while learning about their interconnections. Students can choose to focus on Indigenous studies, diasporic studies or globalization studies (or a combination of the three). The program is designed for students preparing for graduate studies, professional studies or employment in education, public administration, law or law enforcement, immigration, social work, the health professions, policy work and non-governmental organizations. Students focusing on Indigenous studies can enter the department's MA/PhD program in Indigenous Thought.

Students begin the program with AP/REI 2100: Critical Studies in Race, Ethnicity and Indigeneity and a choice of either AP/REI 2050: Introduction to Indigenous Studies, AP/REI 3580 6.00: Ethnic Communities in Canada or AP/REI 3620 6.00 Racism and Colonialism. They then take a choice of electives addressing anti-racism, diasporic communities, globalization or Indigenous studies. They complete the program with AP/REI 4700: Race and Indigeneity in Social Research and AP/REI 4705: Theory in Colonialism, Race and Indigeneity.

For specific program requirements, please consult the Faculty of Liberal Arts and Professional Studies Programs of Study section.

Religious experience is an indispensable key to the understanding of human behaviour and thought. The Religious Studies program invites students to join in current scholarly efforts to identify and to understand different forms of religious experience from a number of disciplinary perspectives. In the core course, students will learn how to use various analytical methods to explore the rich variety of the world's religious traditions. They may then, if they wish, concentrate on one religious tradition (Buddhism, Christianity, Hinduism, Islam, Judaism, Sikhism etc.) or they may take a comparative approach. Students will have the opportunity to explore the western religious heritage of Judaism and Christianity from secular, historical, cultural, archeological and literary perspectives. Through a variety of important texts — including the recently discovered Dead Sea Scrolls, the Gnostic Writings and works from Apocrypha, and Pseudepigraphic literature — students will deepen their understanding of the historical and cultural foundations of religion and contemporary religious practice. If the political situation eases, students may even participate in a guided tour of sites in Israel and Egypt as part of the program. Students are expected to acquire breadth both in disciplinary approach and in subject matter. Traditionally, religious studies has been a small program, which emphasizes personal contact between its majors and the faculty participating in the program.

With the end of the Cold War and the rise of democracy in Russia, the country has become an integral player in today's global economy. Our program combines an eclectic combination of courses focused on Russia's dynamic present as well as its rich past. Through two streams — one focused specifically on language and literature and one on economics, politics and culture — students will expand their understanding of Russia and its people and prepare themselves for work in a number of globally focused fields such as diplomacy or translation.

Please contact the Department of Languages, Literatures, and Linguistics for up-to-date information on enrolment in either stream of the Russian program and before selecting a Russian degree option.

The Science and Technology Studies program provides students with the opportunity to study the place of modern science and technology in human culture and society from an integrated, critical and interdisciplinary perspective. The program, housed in both the Faculty of Liberal Arts and Professional Studies and the Faculty of Science and Engineering, includes courses dealing with the history, philosophy and sociology of the mathematical, physical, biological and social sciences, as well as the social, cultural and intellectual contexts which both shaped and were shaped by thinking in those fields. Themes and areas of concentration include: 1) science, technology and social change; 2) history and philosophy of science, technology and the social sciences; 3) science, technology and humanistic thought; and 4) science, technology and the arts.

For students in the Faculty of Liberal Arts and Professional Studies, the Science and Technology Studies program equips them with a broad interdisciplinary education which prepares them for all types of careers. Graduating students will have the same postgraduate opportunities as those possessing an Honours BA in arts fields – i.e. an opportunity to enter professional schools or graduate programs. Students who graduate from the Science and Technology Studies program will be especially qualified to pursue graduate work in graduate programs in history and philosophy of science, as well as their congruent disciplines. For Faculty of Science and Engineering students, the Science and Technology Studies program equips them with a broad interdisciplinary education while allowing them to specialize in one of the many fields of science (biology, chemistry, physics etc.). As a result, career opportunities in science and elsewhere are readily available.

All graduates of this program are well equipped for further studies in law, medicine, education, journalism and environmental policy. For specific program requirements, please consult the appropriate Faculty Programs of Study section.

The Social Science degree program is offered jointly by the Department of Equity Studies and the Department of Social Science, providing students with a broad range of interdisciplinary social science courses. The Honours degree program is structured in five streams designated as (1) Social Theory, (2) Economy and Society, (3) Equity and Social Policy, (4) Equity and Culture and (5) Health, Work, and Society: Canadian and Global Perspectives. Students can complete a 120 credit Honours BA degree, or a 90-credit BA degree without the stream option, or arrange for an Honours Double Major or Honours Major/Minor option.

Social science students will study the interpenetration of culture, politics and the economy in Canadian and global contexts. They will examine current public debates about social justice issues through intensive exposure to contemporary struggles over economic and social class disparities, work and health in local and global environments, race, racism, and anti-racism, gender and sexuality, education, and the relation of community, regional, national, and global development.

The degree will assist students to enter into careers such as social policy analyst, researcher, and community program coordinator and/or provide the foundation for future graduate study in interdisciplinary programs such as Social and Political Thought and disciplinary programs as well for students who have the relevant second major.

Sociology is an exciting and dynamic field of study that analyzes and accounts for key moments in our personal lives, our communities and our world. Discover what makes us tick as individuals and as a society by exploring social relations, interactions and various power dynamics. You'll gain a comprehensive understanding of how human action and consciousness both shape and are shaped by surrounding cultural and social structures. You'll also hone your networks and connect with professionals in the field through a unique array of community projects. Though members of the Department of Sociology teach a wide range of materials and perspectives on society in general and on Canadian society in particular, we take social criticism through theory development, research and teaching to be an essential element of our vocation.

Sociology majors learn to study people and the roles they play in society, both as individuals and in groups. There is a wide range of topics in Sociology, just to name a few: Race and Racism, Crime and Social Regulation, Social Policy, Work and Labour, Gender, Canadian Society, Immigration, Education, Health and Health Care, Social Organizations, Culture, Poverty, Social Interaction, Socialization, Criminal Justice Systems.

For specific program requirements, please consult the Faculty of Liberal Arts and Professional Studies Programs of Study section.

Not all of the courses listed below will necessarily be offered in any given year. For details of courses to be offered, please consult the sociology supplemental calendar.

Note for Faculty of Liberal Arts and Professional Studies students: for all 4000-level sociology courses, students must have successfully completed at least 84 credits. However, pending availability of spaces, third-year Honours (sociology majors/minors) students who have successfully completed at least 78 credits who are also taking summer courses may be given permission to enrol.

South Asian studies is offered as an Honours Double Major Interdisciplinary BA program and Honours Minor BA program that can be pursued jointly with another Honours BA program in the Faculty of Liberal Arts and Professional Studies. A Cross-Disciplinary Certificate in South Asian Studies is also available.

Students interested in South Asian studies should first explore the program Web site <http://www.arts.yorku.ca/sosc/sasia> which has the most up-to-date information on the program. The Web site also gives students an overview of how specialized knowledge of South Asia can enhance specific career paths in fields as diverse as business, policymaking, development, humanities or fine arts.

The two main foci of the program are the South Asian region as well as its diaspora. Through a wide range of courses from different disciplines like anthropology, sociology, history, political science, and languages, the program aims to foster a deeper understanding of the South Asian region as an entirety, as well as the range of issues that concern the South Asian diaspora. Given that contemporary South Asia has emerged as a major world force faced with unprecedented social and political changes, the program offers grounded and expert analyses of challenges that face the

region. Importantly, the program engages with the contemporary South Asian diaspora, which has become a significant and powerful presence in Canada and elsewhere.

In addition to an introductory core course and a 4000-level capstone course, students in the program are required to complete a specified number of credits in the following areas of concentration: history and state formations; and, gender, society and culture (including diasporic issues). The program also allows students to substitute specific courses which may be of interest to them – but prior approval of the program coordinator is required. For specific program requirements and the list of program courses, please consult the Faculty of Liberal Arts and Professional Studies Programs of Study section.

The Spanish program studies the language, literatures, and linguistics of Spain and Spanish America. Students undertake intensive training in listening, reading, writing, and speaking, while discovering the Spanish-speaking world's social and cultural context. Spanish courses explore a wide variety of topics: the 900-year literary tradition of Spain; the innovative work of Latin America's writers; and the social, historical, and pedagogical aspects of Spanish linguistics. Qualified bilingual graduates are sought after in national and international law, business, and finance, the media, social services, medicine, education, hospitality, and the environment because they can communicate in a major international language. Spanish is an ideal match, as a specialization, as part of a double major, or as a minor, with any program in the humanities or social sciences and may also inform programs in the natural or physical sciences. Students can participate in York International's study abroad and summer internship programs to Spain and Latin America.

Note: for general regulations and enrolment information please see Languages, Literatures and Linguistics within this section.

General Information for Fine Arts Students

York's Department of Theatre, with 22 full-time faculty members teaching more than 60 half- or full-year courses for majors, is the largest theatre department in Eastern Canada. Because of the department's location in Metropolitan Toronto, students have access to Canada's biggest concentration of English-language professional theatre companies and artists.

The Department of Theatre offers BA, Honours BA and Honours BFA degree programs, providing students with different approaches to achieving their own theatrical goals. (For information on the MFA in acting, directing and playwriting or the MA/PhD in theatre studies see the Faculty of Graduate Studies Calendar.)

All students must be evaluated by the department before being admitted. Students with credits from other postsecondary institutions may possibly be placed in first- or second-year courses, depending on their background and ability. Admission to courses above the first-year level is usually by audition, portfolio and/or interview, with the student's work in first year both within the department and the University given particular emphasis. Advancement within the department is based upon demonstrated proficiency in one or more aspects of theatre and a satisfactory academic standing as defined in this Undergraduate Calendar. It should be noted, however, that a satisfactory academic standing in itself does not guarantee admission to any course. Be aware that the study of theatre requires a special commitment and demands enormous amounts of time and energy.

The first undergraduate year is a foundation year for theatre majors to learn about all aspects of theatre, to get involved in both acting and backstage work, and to understand theatre as it existed in other times and places. In this year, students must also complete several courses in other areas of the University. In their remaining years, students may choose a broad program of study or apply to follow a more specialized option in acting, creative ensemble, production, design, playwriting and dramaturgy, criticism, dramatic literature, educational theatre or theatre history.

Most majors take far more than the minimum number of courses in theatre and, for that reason, the department recommends completing the general education requirements as soon as possible. The Honours BA degree, which is usually chosen by those considering graduate study and careers in teaching or writing, requires at least 48 credits in theatre with a majority of these in theatre studies. The Honours BFA degree for professionally-oriented students in acting, directing, playwriting and dramaturgy, production and design allows students to take up to 81 credits in theatre, the majority in studio. Detailed regulations and programs of study are available in the Faculty of Fine Arts section of this publication and in the department's handbook.

Students pursuing an Honours degree in the Faculty of Liberal Arts and Professional Studies may combine a 42 credit or 48 credit Honours Major in an arts discipline with a second major in theatre (theatre studies or production streams only). Honours degree students in the Faculties of

Environmental Studies, Fine Arts, Liberal Arts and Professional Studies or Science and Engineering may also qualify for a 30 credit theatre minor in theatre studies or theatre production. For details contact the department.

Department classes and productions are only part of the excitement of studying at York University. The Centre for Film and Theatre provides a focus for most departmental activities. Winters College is a designated fine arts college and home for many students. Professionals from across Canada, the US, England, France, Eastern Europe, China and other countries have come to York University to share their vision and expertise.

Three-credit courses usually meet three to six hours a week for one term. Six-credit non-studio courses meet either three or four hours a week for the whole academic year. Six-credit studio courses meet either six or eight hours a week for the whole year. Additional rehearsal and/or crew hours are often required. Not every course listed here is offered every year.

While it is comprehensive in its approach and range, it also aims to achieve depth in the examination of fundamental urban issues. Members of the Urban Studies program share a fascination with cities, among the most fundamental human institutions, and a commitment to their exploration. Across history, cities have been sites of innovation in economic, political and cultural life; centres of trade; seats of empire; and loci of scientific, social and artistic creativity. Today, they are the home of a growing majority of the world's population who increasingly live in metropolitan regions of several million people, regions often characterized by vigorous social diversity, striking contrasts of wealth and poverty, and a complex array of political, planning and environmental dilemmas. All of these themes are concerns of the Urban Studies program. The program's core courses and senior-level work/study course stress direct experience of the urban field and of the process of doing urban fieldwork and research.

Students in urban studies have varied backgrounds and join the program for a range of reasons. Some are curious about the social life of the city, its people, its pleasures and its discontents, and often focus their course work on Toronto's inner city or suburbs. Others orient their coursework to an interest in cities in a world perspective or in the context of a global economy. Some are concerned with social issues or environmental dilemmas that confront the contemporary metropolis. Others enrol in the program as a foundation for professional studies in urban planning and design, or in environmental studies, law, business, education or public administration. Some pursue graduate work in an academic area related to the urban field.

For specific program requirements and the list of program courses, please consult the Faculty of Liberal Arts and Professional Studies Programs of Study section.

Programs of Study

The programs of study in the Department of Visual Arts are based on a creative interaction among the historical, practical and critical/theoretical approaches to the visual arts that is possible only within a modern university. The department educates students within a broad humanist context and provides a strong foundation for those who wish to pursue further study and professional involvement in the visual arts. It offers programs leading to a BA, Honours BA or Honours BFA degree. In addition to courses in visual arts, students are also required to take courses within the humanities, social sciences and natural sciences to complement and reinforce their studies. As a result, the Department of Visual Arts reserves the right to restrict students to 18 credits in visual arts in any given year. Of these 18 credits, only 12 credits will be allowed in the studio area of the department in any given year.

Honours Minors in visual arts (art history) and visual arts (studio) are also available.

Visual Arts (Studio)

Practicum courses have been designed to develop creative thinking and also to accommodate diverse backgrounds, abilities and interests. Students concentrating in studio may work in drawing, painting, sculpture, printmaking, photography or new media.

Studio students are recommended to:

- take FA/VISA 2620 6.00 Modern Art: 1750 to the Present during the course of their studies;
- successfully complete no fewer than 12 credits in two-dimensional and six credits in three-dimensional studio art.

Note: course numbers whose second digit is 0 normally represent studio work.

Art History

Courses in art history are designed primarily for students whose major interest is the history of art or whose Honours program includes the history of art as one of its elements, and for other students majoring in the fine arts. Enrolment for students in other disciplines who wish to take any of these courses as electives may be accepted either with the stated prerequisites or with the approval of the instructor.

Students intending to continue their studies beyond the undergraduate level in art history are advised that most graduate schools require reading facility in modern languages. Students concentrating in this area are urged to include in their course of study at least one foreign language at the earliest possible time.

Some courses may use a title variance to indicate different course content within the same area of study. Courses may be organized in a geographical, chronological or thematic basis. Students should check with the department for more detailed course descriptions in any given year.

Note: not all courses listed are necessarily offered every year.

Women's Studies

Women's studies is both a complement and a corrective to established fields at York and a new academic discipline of its own. Until recently, both the humanities and the social sciences reflected predominantly male perspectives. Women have been largely invisible in literature, art, history, philosophy, politics, social sciences and law. Through cross-cultural and disciplinary assessment, women's studies exposes misconceptions about

women expressed through myth, ideologies, teachings and writings. It replaces negative cultural images of women with visions that reaffirm women's strength, capability and intelligence.

The School of Women's Studies unites academic resources at York University in women's studies, bringing together the undergraduate and graduate programs, the non-credit Bridging program, and the Centre for Feminist Research/le centre de recherches féministes à York.

A feature which distinguishes the Women's Studies program offered at Glendon from the program offered in the Faculty of Liberal Arts and Professional Studies is its bilingual focus. Non-parallel courses are offered in both English and French. As a result, a genuine dialogue develops between the approaches of anglophones and francophones to theory, philosophy, literature, legal structures and language.

Students may pursue a degree in women's studies in the Faculties of Glendon or Liberal Arts and Professional Studies. For specific program requirements, please consult the relevant Programs of Study sections.

Departmental and Divisional Courses in Women's Studies

For an up-to-date listing of courses in other departments and divisions that count for program credit, please refer to the School of Women's Studies annual supplemental calendar.

The Work and Study program provides students with the opportunity to obtain a General Certificate in Work and Study and a bachelor's degree simultaneously. It gives them the opportunity to gain workplace experience, allowing them to choose a work placement according to their individual aspirations and aptitudes.

Working with a traditionally bilingual liberal arts institution, the General Certificate in Work and Study is unique, both in its objectives and in its structure. Work and study does not aim to introduce students to a specific discipline. Focusing on changes in the working world and providing students with the opportunity for unique professional experience, the program is designed to complement or even provide a new dimension to the student's undergraduate study program.

The General Certificate in Work and Study requires 24 credits, 15 of which are offered within the program and nine of which are offered by other programs and departments of Glendon and recognized by the program.

Students enrolled in the Work and Study program may only receive their certificate on the condition that they complete the requirements for their bachelor's degree.

Le programme Travail et études offre à des étudiants, engagés dans des études de baccalauréat, la possibilité de mener, simultanément, des études pour l'obtention du Certificat général en travail et études. Il les invite à vivre une expérience de travail, tenant compte de leurs aspirations et aptitudes, dans une activité de leur choix.

Issu d'un milieu universitaire de tradition bilingue voué à l'enseignement des lettres et des sciences humaines, le Certificat général en travail et études est unique de par sa nature et ses intentions. Il n'a pas à initier des étudiants à une discipline précise mais, en mettant l'accent sur les mutations du monde du travail et en leur permettant de vivre une expérience professionnelle unique, il entend ainsi leur offrir un complément, voire une nouvelle dimension d'une formation déjà en cours.

Le Certificat général en travail et études comprend 24 crédits dont 15 sont pris à l'intérieur du programme et neuf parmi des cours retenus par le programme et offerts au sein de différents départements et programmes du Collège universitaire Glendon.

Les étudiants inscrits au programme Travail et études ne pourront recevoir leur Certificat que s'ils ont rempli toutes les conditions nécessaires à l'obtention de leur Baccalauréat.

Contract Appointments/Enseignants Sous Contrat

York University is fortunate to be able to draw from the community of Metropolitan Toronto and district many qualified people willing to serve the University as contract faculty. Many have long-standing connections with the University, and play important roles in the academic programs of the various departments and Faculties. Contract faculty who have taught at York for five or more years were invited to have their names included in this publication.

L'Université York est heureuse de pouvoir bénéficier des services d'un grand nombre de personnes engagées sous contrat vivant dans la communauté de Toronto et qui apportent à l'Université leurs qualifications et leurs connaissances. Nombreux sont les enseignants qui jouent ainsi un rôle important depuis des années au sein de leur département et faculté. Les personnes qui ont ainsi enseigné à York pendant cinq ans ou plus sont invitées à inscrire leur nom ci-dessous.
