AP/ECON 4170 3.00 Directed Research. Permits students to undertake special programs of private studies, in which emphasis is placed on research design, methodological issues, and data analysis, under the guidance of a full-time faculty member. Prerequisites: 78 credits including AP/ECON 1000 3.00, AP/ECON 1010 3.00, AP/ECON 1530 3.00, AP/ECON 1540 3.00, AP/ECON 2300 3.00, AP/ECON 2350 3.00, AP/ECON 2400 3.00, AP/ECON 2450 3.00, AP/ECON 2500 3.00, and AP/ECON 3210 3.00 or AP/ECON 3500 3.00, or equivalents. Note: Students must be accepted by a faculty supervisor and receive the approval of the Undergraduate Program Director before they can register in the course. Course credit exclusions: None. PRIOR TO FALL 2009: Course credit exclusions: AK/ECON 4170 3.00, AS/ECON 4990/4990A/4999/4999N 3.00.

AP/ECON 4190 3.00 Topics in International Trade. Covers, at the advanced level, the theories of international trade specialization, gains from trade, commercial policies, and new approaches to trade theory. Prerequisites: AP/ECON 2300 3.00, AP/ECON 2350 3.00 and AP/ECON 3150 3.00, or equivalents. Course credit exclusions: None. PRIOR TO FALL 2009: Course credit exclusion: AS/ECON 4190 3.00.

AP/ECON 4200 3.00 Topics in International Monetary Economics. Covers, at the advanced level, topics in international monetary economics including exchange rates, balance of payments accounts, monetary policy under fixed and flexible exchange rates, international monetary problems and possible solutions, and theories of the balance of payments. Prerequisites: AP/ECON 2300 3.00, AP/ECON 2350 3.00, AP/ECON 2400 3.00, AP/ECON 2450 3.00 and AP/ECON 3580 3.00, or equivalents. Course credit exclusions: None. PRIOR TO FALL 2009: Course credit exclusion: AS/ECON 4200 3.00.

AP/ECON 4210 3.00 Econometrics. Derives least squares and maximum likelihood estimators for classical and generalized cases, stressing theorem proving, diagnostic analysis, and careful applied work. Prerequisite: AP/ECON 3500 3.00 or equivalent. Course credit exclusions: GL/ECON 4260 3.00, SC/MATH 3330 3.00. Note: Acceptable course substitutes are available in the Calendar. PRIOR TO FALL 2009: Course credit exclusions: AK/ECON 3490 3.00, AS/ECON 4210 3.00, GL/ECON 4260 3.00, AS/SC/MATH 3330 3.00.

AP/ECON 4220 3.00 Topics in Econometrics. Examines multiple and simultaneous linear equations models. Considers time series analysis and other special topics. Stresses theorem proving, diagnostic analysis, and careful applied work. Prerequisite: AP/ECON 4210 3.00 or equivalent. Course credit exclusions: None. PRIOR TO FALL 2009: Course credit exclusion: AS/ECON 4220 3.00.

GL/ECON 4230 3.00 Advanced Economic Theory. A survey of some of the recent developments in a small number of areas; capital theory, income distribution, theory of the firm, social welfare functions, non-market economics. Prerequisite: GL/ECON 3230 6.00 or GL/ECON 3240 6.00, preferably both. Course credit exclusion: AP/ECON 4010 3.00, AP/ECON 4010 3.00.

AP/ECON 4240 3.00 Topics in Labour Economics. Considers trade unions and employers' organizations in the Canadian labour market. Topics include the design and function of the institutions, worker and employer participation, the processes of conflict and agreement, the regulatory role of the state, and the nature of collective agreements and their effect on the labour market and processes of production. Prerequisites: AP/ECON 2300 3.00 and AP/ECON 2350 3.00 or equivalents. Recommended prior completion: AP/ECON 3249 3.00. Course credit exclusions: AP/ECON 4240 3.00, AS/ECON 4249 3.00. PRIOR TO FALL 2009: Course credit exclusions: AS/ECON 4240/4249 3.00.

AP/ECON 4249 3.00 Topics in Labour Economics. Considers trade unions and employers' organizations in the Canadian labour market. Topics include the design and function of the institutions, worker and employer participation, the processes of conflict and agreement, the regulatory role of the state, and the nature of collective agreements and their effect on the labour market and processes of production. Prerequisites: AP/ECON 2300 3.00 and AP/ECON 2350 3.00 or equivalents. Recommended prior completion: AP/ECON 3240 3.00. Course credit exclusion: AP/ECON 4240 3.00. PRIOR TO FALL 2009: Course credit exclusions: AS/ECON 4240 3.00, AS/ECON 4249 3.00.

GL/ECON 4250 3.00 Mathematical Economics. Selected topics from the classical theory of the consumer and the firm (Hicks and Samuelson), linear programming, game theory, input-output analysis, general equilibrium of multiple markets and the theory of economic growth. Prerequisite: GL/MATH 2650 3.00 or permission of the instructor.

AP/ECON 4259 3.00 Topics in Health Economics. Addresses major issues regarding the cost and quality of health care using theoretical and quantitative techniques drawn from welfare economics, project evaluation, microeconomics, and financial analysis. Prerequisites: AP/ECON 2300 3.00, AP/ECON 2350 3.00 and AP/ECON 3210 3.00 or AP/ECON 3500 3.00, or equivalents. Course credit exclusions: None. PRIOR TO FALL 2009: Course credit exclusions: AK/ECON 3510 3.00, AK/ECON 3520 3.00, AS/ECON 4259 3.00.

GL/ECON 4260 3.00 Introduction to Econometrics. Regression and correlation analysis are studied, including selected applications to economic problems with emphasis on statistical demand analysis and on estimation of production and cost functions. Prerequisites: GL/ECON 3670 3.00, or equivalent, and GL/MATH 2650 3.00, or equivalent, or permission of the instructor. Course credit exclusions: AP/ECON 3490 3.00, AP/ECON 4210 3.00.

GL/ECON 4270 3.00 Forecasting Techniques in Economics and Business. The application of forecasting techniques to selected problems in economics and business. Topics covered include trend-line fitting, leading indicators, autoregressive models, Box-Jenkins models, regression and the evaluation of alternative methods. Considerable use will be made of one or more computer statistical packages. Prerequisites: GL/ECON 2500 3.00 and GL/ECON 2510 3.00. Corequisite: GL/ECON 4260 3.00.

GL/ECON 4275 3.00 The Economic Analysis of Law. An examination of the economic foundations of the legal system. Applications of the economic concept of efficiency to legal decision rules; equity issues will also be addressed. Emphasis will be placed on property law, contract, and tort; if time permits, we will also look at the application of economics to criminal law. Throughout, what is stressed is the economist's approach to the law, rather than the law itself. Prerequisite: GL/ECON 3230 6.00 or equivalent. Course credit exclusions: AP/ECON 3800 3.00, AP/ECON 4309 3.00, GL/ECON 4010 3.00 (Winter 1997), GL/ECON 4011 3.00 (Winter 1998).

AP/ECON 4279 3.00 Housing Economics. Examines housing markets and housing policy. Introduces models of demand, supply, and housing market equilibrium emphasizing the special characteristics of housing. Uses welfare economics to study the design of optimal policies. Prerequisites: AP/ECON 2300 3.00 and AP/ECON 2350 3.00 or equivalents. Course credit exclusions: None. PRIOR TO FALL 2009: Course credit exclusion: AS/ECON 4279 3.00.

GL/ECON 4285 3.00 Electronic Commerce. The rapid improvement in the cost and capacity of personal computers together with lower cost and higher capacity data communications has led to a rapid growth in electronic commerce. These developments have the potential to bring about significant changes in the economic structure, both domestically and internationally. Issues examined include privacy and security, consumer protection, legal and regulatory issues, and both micro and macro economic effects. Prerequisites: GL/ECON 2500 3.00, GL/ECON 2510 3.00 or equivalents and at least six credits at the third year level from one or more of the social sciences.

GL/ECON 4290 6.00 International Economics. An examination of international trade theories (including protectionism) from a general equilibrium point of view. This is followed by an introduction to open macroeconomic theory: the respective roles of fiscal and monetary policies, exchange rate adjustments and non-traded goods in an open economy are studied. Prerequisites: GL/ECON 3230 6.00 and GL/ECON 3240 6.00 or permission of the course director. Course credit exclusions: AP/ECON 3570 3.00, AP/ECON 3150 3.00.

AP/ECON 4309 3.00 Law and Economics. Uses economic concepts to analyze legal institutions in the area of Common Law (Property, Torts, and Contracts) for developed, underdeveloped, and transitional economies. Examines legal cases from a law-and-economics perspective. Prerequisites: AP/ECON 2300 3.00 and AP/ECON 2350 3.00 or equivalents. Course credit exclusion: GL/ECON 4275 3.00. PRIOR TO FALL 2009: Course credit exclusions: AK/ECON 3800 3.00, AS/ECON 4309 3.00, GL/ECON 4275 3.00.

GL/ECON 4310 3.00 Corporate Finance I. This course provides an introduction to the principles of finance and an examination of the financing and investment decisions of a business firm. Recent Canadian examples are used to illustrate these principles and decisions. Prerequisites: GL/ECON 2710 3.00 and GL/ECON 3230 3.00. Course credit exclusions: AP/ECON 4400 3.00, GL/ECON 4014 3.00(FR) (1998-1999 et 1999-2000); GL/ECON 4010 3.00(FR) (2001-2002); GL/ECON 4010 3.00(EN) (2000-2001 et 2002-2003).

GL/ECON 4310 3.00 Gestion financière des sociétés I. Ce cours initie les étudiants aux principes fondamentaux de la gestion financière des sociétés, aux techniques d'analyse et de prévision comptables et à l'allocation des ressources financières. Des exemples canadiens illustrent ces principes et décisions. Conditions préalables : GL/ECON 2710 3.00 et GL/ECON 3230 6.00. Cours incompatibles : AP/ECON 4400 3.00, GL/ECON 4014 3.00(FR) (1998-1999 et 1999-2000); GL/ECON 4010 3.00(FR) (2001-2002); GL/ECON 4010 3.00(EN) (2000-2001 et 2002-2003).

Course Numbering

Letter prefixes are used in each course to identify the Faculty of Education (ED) and the subject area of the course (PRJM – primary/junior math; VISA – visual arts). A typical course number reads as follows ED/PRJM 3031 3.00 – Teaching Mathematics in the Primary/Junior Divisions.

Note: the Faculty reserves the right not to offer courses in particular sessions without advance notice.

Course Descriptions

ED/ACTG 3051 6.00 Teaching and Learning Accounting in the Intermediate/Senior Division. This course examines theories, philosophies, research, policies and practices specific to teaching and learning Accounting in the Intermediate/Senior grades. Candidates broaden and deepen their conceptualizations of teaching and learning through critical analysis of effective, inclusive learning environments for adolescent education. Candidates critically analyze these concepts in order to develop understandings of the complexities of effective, inclusive teaching and learning as it pertains to Accounting.

ED/AUCO 3550 3.00 Educational Audiology I. This course addresses practical and theoretical issues that relate to teachers as facilitators in developing communicative competence mainly through audition. Medical and educational models of assessment and intervention strategies used with deaf and hard-of-hearing students are examined with respect to legal and teaching implications. Particular attention is given to the contributions of the field of audiology to education.

ED/AUCO 3555 6.00 Educational Audiology. This course focuses on maximizing hearing and auditory learning in the classroom for Deaf and Hard-of-Hearing children. It offers an introduction to sound and speech acoustics, the anatomy and physiology of the auditory system, the measurement and effects of dysfunction of various portions of the auditory system, and the role of audition in communication. The focus in the first term will be on clinical audiological practices, hearing aids, FM systems and interpretation of clinical audiological test results. The objective is to gain sufficient familiarity with clinical audiological procedures to allow teachers to work skillfully and collaboratively with parents, audiologists and other professionals. A key part of this course will be the use of amplification by Deaf and Hard-of-Hearing children, in the form of hearing aids, cochlear implants, non-conventional amplification devices and FM systems. The second term of this course focuses on the use of hearing technology in the classroom and the development of listening skills. Students will learn the theoretical and practical aspects of recommending. Fitting, monitoring and troubleshooting hearing technology in the classroom and will also develop an understanding of assessment and development of listening skills for Deaf and Hard-of-Hearing students.

ED/JIMA 3020 3.00 Teaching Mathematics in the Junior and Intermediate Divisions. A study of methods for teaching mathematics in the Junior and Intermediate divisions. Emphasis is placed on the use of materials, relating mathematics to the rest of the curriculum and developmental stages of students.

ED/JIMA 3021 3.00 Teaching Mathematics in the Junior/Intermediate Division. A study of methods for teaching mathematics in the Junior and Intermediate divisions. Emphasis is placed on the use of materials, relating mathematics to the rest of the curriculum and developmental stages of students

ED/JMST 3020 3.00 Teaching Mathematics, Science, & Tech-Junior Division. This course provides a practical and conceptual introduction to the teaching of mathematics, science and technology to students in grades 4 through 6. Emphasis is placed on the importance of students' mathematical and scientific understanding.

ED/LAW 3051 6.00 Teaching and Learning Law in the Intermediate/Senior Division. This course is an introduction to curriculum and instruction in secondary school law courses, derived from the Canadian and World Issues documents: Intermediate and Senior. Topics include Ministry guidelines, objectives, teaching methods, instructional techniques and student evaluation.

ED/LLDV 3730 3.00 Reading and Writing with Deaf and Hard-of-Hearing Learners. The central purposes of this course are to develop an understanding of reading and writing processes in learners with hearing loss, and to develop knowledge about the pedagogical practices and assessment/evaluation strategies that support text-based literacy development in this population. Prerequisites: Enrolment in the Teacher Preparation Program/Deaf and Hard of Hearing or special permission of the program coordinator.

ED/LLDV 3735 6.00 Language Literacy and Development. The central purposes of this course are to enable teacher candidates: (i) to understand the process of language acquisition in hearing, Deaf and Hard-of-Hearing children; (ii) to understand reading/writing processes and how these children learn to read and write; (iii) to develop knowledge about the pedagogical practices and instructional approaches that best promote language/literacy learning with Deaf and Hard-of-Hearing students. There will be an emphasis on how theoretical understandings must underpin notions of pedagogy and classroom practice, and how practice can be interrogated in light of these theoretical frameworks. The expectation is that effective practitioners have a strong sense of what they know and how they know it, and what they are doing and why they are doing it. The general approach of the course will be exploratory rather than didactic. At all levels, learning can be thought of as research: an active construction of personal knowledge, based on formulating and testing hypotheses and, in light of an evaluation of the results, modifying one's beliefs and practices. In this spirit, we shall attempt to make connections between the reading, writing and discussion that take place in the course, and the reading, writing and discussion of the classroom setting. Class sessions will vary in format and will include discussions of the readings which are set for each week, lectures, guest presentations and work on individual and group projects.

ED/MATH 2590 3.00 Thinking Mathematically I. The main objectives of this course include providing opportunities for students to achieve success in thinking mathematically and to reflect on the learning and practice of mathematics. Intended primarily, but not exclusively, for Education students in the PJ and JI streams. Prerequisite: Successful completion of at least 24 credits or permission of the course director. Note: This course is not open to any student who has taken or is taking another university mathematics course unless permission of the course coordinator is obtained. NCR Note: This course may not be taken for credit by any student who has taken SC/MATH 1580 3.00. Prior to Fall 2009: NCR Note: This course may not be taken for credit by any student who has taken AS/SC/MATH 1580 3.00.

Cross-listed to: ED/MATH 2590 3.00, SC/MATH 2590 3.00

ED/MATH 3041 3.00 Teaching Mathematics in the Intermediate Division. The practicum is concerned with assessing students' needs, creating and implementing projects to satisfy these needs, and evaluating their success. The seminar supplements the practicum by discussing materials, resources and methods suited to mathematics teaching.

ED/MATH 3051 6.00 Teaching Mathematics in the Intermediate Senior Division. This course is concerned with assessing students' needs, creating and implementing projects to satisfy these needs, and evaluating their success. The seminar supplements the practicum by discussing materials, resources and methods suited to mathematics teaching. In addition, various themes (e.g., applications, cultural aspects of mathematics) and their relation to the classroom experience may be discussed.

ED/MUSI 3041 3.00 Teaching Music in the Intermediate Division. This course examines the philosophy and methods of music education in relation to students in the Intermediate Division.

ED/MUSI 3051 6.00 Teaching Music in the Intermediate Senior Division. This course examines the philosophy and methods of music education in relation to students in the Intermediate Senior Division.

ED/ORCO 3530 3.00 Oral Communication I. Oral Communication I. This course introduces candidates to the physiological development of speech, examining the speech mechanism and consonant, vowel, and suprasegmental development. Among the issues to be discussed are speech vs. language development in deaf and hard-of-hearing children, speech errors typically made by deaf and hard-of-hearing people and the reasons for such errors.

ED/ORCO 3535 6.00 Oral Communication. The purpose of this course is to provide teacher candidate with the skills and knowledge needed to provide assessment and instruction, in the area of oral communication and spoken language, to students who are Deaf or hard of hearing, within an educational setting. Information about typical speech, auditory and child development and the impact of hearing on child development and the development of communication skills and school achievement will be discussed. This course will focus on the development, assessment and remediation of spoken language, speech and auditory skills. Assessment and instruction techniques will be presented and then applied during the practicum and case study.

ED/ORCO 3540 3.00 Listening and Speaking with Deaf and Hard of Hearing Learners. This course prepares teachers in the oral/aural stream of the Deaf/Hard of Hearing Program to assess, teach and evaluate progress in the development of listening and speech skills of deaf/hard of hearing learners.

ED/ORDE 3600 3.00 Orientation to Deaf Education. This course is a component of the Teaching and Learning Seminar. Its basic objective is to stimulate awareness of topics and issues related to the education of deaf and hard-of-hearing children. Orientation to Deaf Education is required of all candidates in the program.

ED/PHED 3041 3.00 Teaching Physical Education in the Intermediate Division. This course develops a point of view about the teaching of physical education by considering ways in which children learn, and stages in their growth and development. It relates these to the Intermediate Division curriculum and to programme content and lesson planning.

ED/PHED 3051 6.00 Teaching Physical Education in the Intermediate Senior Division. This course extends the philosophy developed in the Intermediate practicum to the Senior Division. In addition, it emphasizes psychological aspects of learning, the teaching of health, administration of classes, and the use of a variety of teaching styles

ED/PHYS 3051 6.00 Teaching Physics in the Intermediate Senior Division. A survey of modern physics curriculum, selection of teaching aids, materials and resources in physics instruction, design of modern physics laboratory programme, and discussion of current research in teaching high school physics.

ED/PJEP 3400 6.00 Teaching As Reflective Practice. This course provides an opportunity for candidates with Early Childhood Education diplomas within the Faculty of Education to generate a research project focused on teaching and learning. Using qualitative methods, the project will promote close examination of classroom practices as well as address issues of equity in the classroom as a route to expanding understanding and performance in teaching.

ED/PJFA 3500 3.00 Integrated Fine Arts. This course is designed to provide Teacher Candidates with a basic understanding of, and appreciation for, the components of an integrated fine arts program, that is, visual art, music, drama and dance. The main focus will be integration of the arts into the curriculum as a central and essential element of education for all children and will include issues of equity. Candidates will have the opportunity to develop personal as well as professional skills in fine arts.

ED/PJIC 3200 0.00 Practicum Seminar 3: The Integrated Classroom in the Primary/Junior Division. Teacher candidates focus on how informal and formal integration of curriculum areas effect student learning. Part One considers Health/Physical Education and Science and Technology. Part Two considers Social Studies in relation to the Arts. The seminar is required for all teacher candidates in their third year of the concurrent program who are preparing for Primary/Junior Certification. It is corequisite with curriculum and instruction courses for Primary/Junior candidates.

ED/PJIE 3500 3.00 Inclusive Education In The P/J Div. An introduction to the policy and practice of inclusive education as it is presented in Ontario schools will be provided in this course. Candidates will have an opportunity to select a focus for inquiry and work directly with students to explore inclusive education in a broad sense.

ED/PJLC 3500 3.00 Literacy & Culture. This course investigates how children become literate and addresses issues of second language learning and culture in literacy development. It will pursue successful practices for literacy development while exploring issues of diversity.

ED/PJLM 3100 0.00 Practicum Seminar 2: Language and Mathematics Learning P/J. This seminar supports classroom placements where teacher candidates become familiar with many aspects of teacher's work in elementary schools. Candidates develop strategies for articulating their development as beginning teachers, particularly in the areas of Languages and Mathematics programs. The seminar is required of all teacher candidates in the second year of the concurrent program and is a corequisite with ED PRJL 3031 3.00 and PRJM 3031 3.00. Successful completion is a prerequisite for a third-year practicum seminar.

ED/PJMS 3500 3.00 Mathematics, Science & Technology. This course will examine how to incorporate mathematics, science and technology as basic dimensions of a balanced, equitable curriculum. The relationship of these disciplines to ecological literacy will be a major emphasis throughout the course.

ED/POLS 3051 6.00 Teaching Political Science in the I/S Division. Provides a supervised study at the Intermediate Senior level for candidates with a special interest in Political Science.

ED/PRAC 2100 0.00 Practicum 1. Practicum 1 consists of community, school and classroom placements where teacher candidates become familiar with aspects of the teacher's work in schools. Candidates develop strategies for articulating their development as beginning teachers in relation to selected aspects of curriculum. The practicum is required of all

teacher candidates in the consecutive P/J/I/S programs and is a corequisite with relevant curriculum and instruction courses. Successful completion is a pre-requisite for Practicum 2.

ED/PRAC 2100 3.00 Practicum. School practicum placement designated for Internationally Trained Teachers.

ED/PRAC 2100 6.00 Practicum. Specially designated for Internationally Trained Teachers

ED/PRAC 3100 0.00 Practicum 2. Practicum 2 consists of community, school and classroom placements where teacher candidates extend familiarity with aspects of the teacher's work in schools. Candidates refine strategies for articulating their development as beginning teachers in relation to selected aspects of the curriculum. The practicum is required of all teacher candidates in the consecutive P/J/I/S programs and is a corequisite with relevant curriculum and instruction courses. Successful completion of the BEd program requires successful completion of Practicum 2.

ED/PRAC 4000 0.00 Practicum Seminar - ED 2 and ED 3. Practicum Seminar - ED 2 and ED 3 consists of community, school and classroom placements where teacher candidates become familiar with aspects of the teacher's work in schools. Candidates develop strategies for articulating their development as beginning teachers in relation to selected aspects of curriculum and pedagogy. Practicum Seminar - ED 2 and ED 3 is required of all teacher candidates in the second and third years of the Concurrent P/J/I/S programs and is co-requisite with relevant curriculum and instruction courses. Graduation from the BEd program requires successful completion of PRAC 4000 in both the second and third years of the program.

ED/PRIJ 3030 6.00 Teaching & Curriculum in P/J Divisions. Candidates study and practice the teaching of subjects in the elementary curriculum, such as music, physical education, science, social studies, and visual arts. Integration of different subjects within the curriculum is emphasized. Further emphasis is placed on the improvement of the candidate's observation and enquiry skills.

ED/PRIJ 3031 1.50 Science and Technology in the Primary Junior Divisions. In this course, teacher candidates develop understandings of the principles underlying the teaching of science and technology in the Primary and Junior Divisions. Through hands-on science and technology activities they develop and practice the skills of inquiry and design.

ED/PRIJ 3032 1.50 Health and Physical Education in the Primary Junior Division. This course examines the principles underlying the teaching of health and physical education in the primary and junior divisions. This course will draw upon research in physiology, kinesiology and health studies, and will involve lectures, readings, and interactive sessions.

ED/PRIJ 3033 3.00 The Arts and Social Studies: Integrating Curriculum Primary Junior. This course explores key concepts in art and social studies education in elementary classrooms and introduces the concept of teaching an integrated curriculum using the Arts (Drama, Dance, Visual Arts and Music) and Social Studies curricula as a foundation.

ED/PRJL 3030 3.00 Teaching Language in the Primary-Junior Divisions. This course is intended to develop an understanding of how children in the Primary and Junior divisions gain facility in reading, writing, speaking and listening. The focus is on exploring current thinking about the language processes and the implications of these insights for instructional practice.

ED/PRJL 3031 3.00 Teaching Language in the P/J Division. This course is intended to develop an understanding of how children in the Primary and Junior divisions gain facility in reading, writing, speaking and listening. The focus is on exploring current thinking about the language processes and the implications of these insights for instructional practice.

ED/PRJM 3030 3.00 Teaching Mathematics in the Primary-Junior Divisions. A study of methods for teaching mathematics in the elementary school. Emphasis is placed on the use of materials, relating mathematics to the rest of the curriculum and developmental stages of students.

ED/PRJM 3031 3.00 Teaching Mathematics in the P/J Division. A study of methods for teaching mathematics in the elementary school. Emphasis is placed on the use of materials, relating mathematics to the rest of the curriculum and developmental stages of students.

ED/RELS 3041 3.00 Teaching Religion in the Intermediate Division. An examination of the Religious Study curriculum in the Intermediate Division and of the methods and materials available to support Religious Studies. Course design and evaluation are considered.

ED/RELS 3051 6.00 Teaching Religion in the Intermediate Senior Division. An examination of the Religious Study curriculum in the Intermediate Senior Division and of the methods and materials available to support Religious Studies. Course design and evaluation are considered.

ED/SCIE 3041 3.00 Teaching Science in the Intermediate Division. An introduction to the philosophy, methods and materials of science instruction, with attention to the science curriculum, laboratory instruction and safe laboratory practices.

ED/SCIE 3051 6.00 Teaching Science in the Intermediate Senior Division. An introduction to the philosophy, methods and materials of science instruction, with attention to the science curriculum, laboratory instruction and safe laboratory practices.

ED/SLGS 3510 3.00 Educational Use of Signs. The purpose of this course is two fold: (i) to provide an introduction and overview of the major issues with respect to the use of signed language in the education of Deaf and Hard-of-Hearing students, and (ii) to develop abilities in the use of sign language, particularly as it applies to its use in school settings across a range of programs and communication philosophies. The emphasis will be on consideration of how we think about the use of sign language and other forms of manual communication in school setting, and the implications for classroom practice. Topics to be taken up include: (i) characteristics and features of various forms of manual communication, (ii) terminology with respect to language, communication and modality, (iii) educational options for Deaf and Hard-of-Hearing students as they relate to the use of manual communication, (iv) community and culture, (v) educational interpreting, and (vii) resources and information for classroom teachers.

ED/SLGS 3520 3.00 American Sign Language. This course builds on a well established base of knowledge of American Sign Language (ASL). The purpose of this course is to focus on how to improve sign language (ASL) for the purpose of using it as a language of instruction in an educational setting. This course will apply principles of American Sign Language to an educational context. Therefore, candidates will learn how to assess sign language skills of Deaf and Hard-of-Hearing students, how to tell a story in ASL, and how to deal with subject specific vocabulary and content using ASL.

ED/SLGS 3525 3.00 American Sign Language 2. This course will focus on developing proficiency in American Sign Language (ASL). The purpose of this course is to develop skills in receptive and expressive ASL. Attention will be given to the grammar of ASL, the importance of proper non manual grammatical signals, non manual signals and cultural aspects of ASL and will lead participants to an understanding of how to use ASL in a bilingual classroom. Assessment of ASL abilities will take place during the first class of each course and grading rubrics will be presented to all participants.

ED/SOSC 3051 6.00 Teaching and Learning Social Sciences in the Intermediate/Senior Division. This course examines theories, philosophies, research, policies and practices specific to teaching and learning Social Sciences in the Intermediate/Senior grades. Candidates broaden and deepen their conceptualizations of teaching and learning through critical analysis of effective, inclusive learning environments for

adolescent education. Candidates critically analyze these concepts in order to develop understandings of the complexities of effective, inclusive teaching and learning.

ED/SPAN 3051 6.00 Teaching and Learning Spanish in the Intermediate/Senior Division. This course examines theories, philosophies, research, policies and practices specific to teaching and learning Spanish in the Intermediate/Senior grades. Candidates broaden and deepen their conceptualizations of teaching and learning through critical analysis of effective, inclusive learning environments for adolescent education. Candidates critically analyze these concepts in order to develop understandings of the complexities of effective, inclusive teaching and learning. This course is required for all teacher candidates in the Intermediate/Senior program with Spanish as one teaching subject. It is corequisite with the Intermediate/Senior Practicum Seminar Part I or Part II.

ED/TESL 3200 6.00 Methodology of Teaching English to Speakers of Other Languages. This course introduces students to key issues of curriculum design and implementation in the language learning classroom. Students will explore the interaction of teacher, student, subject matter and milieu in the generation, implementation, assessment and modification of the language curriculum.

ED/TESL 3300 6.00 Practicum in Teaching English to Speakers of Other Languages. The course provides an opportunity for students to understand the standards of practice in ESOL by observing and analyzing a variety of practicum placements, and exploring the experiences in an ongoing seminar series. Students are supported in the analysis of and preparation for language teaching experiences. *This courses may be taken concurrently with, but not before ED/TESL 3200 6.00 Methodology of Teaching English to Speakers of Other Languages.

ED/TLSE 3715 0.00 Practicum. Teacher candidates participate in two practicum experiences in two different educational settings over the course of the academic year.

ED/TLSE 3715 3.00 Teaching and Learning Seminar. The purpose of this course is to develop an understanding of the current pedagogy, practices and policy relating to the teaching of Deaf and Hard-of-Hearing students. The course content provides a framework for understanding the instructional techniques encountered in practicum placements. The practicum component of this course exposes teachers candidates to the range of educational environments as well as the communication philosophies and modalities used in the education of Deaf and Hard-of-Hearing students.

ED/TLSE 3715 6.00 Teaching and Learning Seminar. The purpose of this course is to develop an understanding of the current pedagogy, practices and policy relating to the teaching of deaf and hard of hearing students. The emphasis of this course is on the integration of theory and practice. The course content provides a framework for appreciating the diversity of teaching/learning situations encountered in practicum placements, and for understanding the nature and structure of the variety of programs for Deaf/HH students in both school boards and provincial schools. All Teacher Candidates will participate in a practicum experience.

ED/TLSE 3725 3.00 Teaching Deaf and Hard of Hearing Learners in Inclusive Settings. This course is an elective option within the Deaf and Hard of Hearing Teacher Education program. It is a half course that prepares teachers in the Oral/Aural stream to examine current research and practices specific to teaching Deaf and Hard of Hearing Learners inclusive settings.

ED/URED 3300 6.00 Urban Education. This course focuses on issues related to schooling in settings characterized by diversity particularly related to socio-economic status, ethnicity, race, culture and citizenship (i.e., immigrant or refugee). It is intended for teacher candidates doing their practicum within the Westview Family of Schools.

ED/VISA 3041 3.00 Teaching the Visual Arts in the Intermediate Division. This course examines the philosophy and methods of art education in relation to students in the Intermediate Division. Curriculum development, the organization and evaluation of lessons, learning

resources and materials, problems in art education, and strategies of art teaching are among the pertinent areas studied. Other areas of concern are determined by the interaction of the instructors, adjunct professors, and candidates. Faculty lectures, candidate presentation, assigned readings, class discussions, and visiting artists and educators contribute to the exchange of knowledge.

ED/VISA 3051 6.00 Teaching Visual Arts in the Intermediate Senior Division. This course examines the philosophy and methods of art education in relation to students in the Intermediate Senior Division. Curriculum development, the organization and evaluation of lessons, learning resources and materials, problems in art education, and strategies of art teaching are among the pertinent areas studied. Other areas of concern are determined by the interaction of the instructors, adjunct professors, and candidates. Faculty lectures, candidate presentations, assigned readings, class discussions and visiting artists and educators contribute to the exchange of knowledge.

The School of Engineering within the Faculty of Science and Engineering offers an Honours bachelor of applied science (BASC Honours) degree in engineering. After completion of a common first-year program, students will choose one of three available programs: computer engineering, geomatics engineering or space engineering.

Courses in Engineering

SC/ENG 1000 6.00 Introduction to Engineering Design. Engineering design and professional practice within economic, health, safety, environmental, social and other constraints, including case studies, teamwork, 3D modeling, and a team design project. Communication skills are emphasized, including a mandatory writing workshop. Three lecture hours per week. Two terms. Six credits. Note: Open only to students in the Engineering program.

SC/ENG 2001 3.00 Engineering Projects: Management, Economics and Safety. Introduction to the management, economics and safety as they relate to engineering projects, including the following. Project management: work breakdown structures, Gantt charts, logic diagrams and change management. Engineering economics: time value of money, comparison methods, rates of return. Workplace safety. Group design projects. Weekly tutorial. Prerequisites: SC/ENG 1000 6.00. NCR Note: This course is not open to any student who has passed SC/ENG 2000 6.00 Engineering Design II

SC/ENG 2002 3.00 Mechanical and Materials Engineering. The course covers the fundamentals of mechanical, electronic, magnetic, thermal and optical properties of materials and applies these materials in engineering designs. The design and analysis of static and dynamic

engineering systems are also introduced. Weekly tutorial. Prerequisites: SC/CHEM 1000 3.00, SC/ENG 1000 6.00, SC/MATH 1013 3.00, SC/MATH 1014 3.00, SC/MATH 1019 3.00, AS/SC/MATH 1025 3.00, SC/PHYS 1010 6.00. NCR Note: This course is not open to any student who has passed SC/ENG 2000 6.00 Engineering Design II Prior to Fall 2009: Prerequisites: SC/CHEM 1000 3.00, SC/ENG 1000 6.00, AS/SC/MATH 1013 3.00, AS/SC/MATH 1014 3.00, AS/SC/MATH 1019 3.00, AS/SC/MATH 1025 3.00, SC/PHYS 1010 6.00. NCR Note: This course is not open to any student who has passed SC/ENG 2000 6.00 Engineering Design II

SC/ENG 2110 2.00 Geomatics and Space Engineering. Introduction to geodesy and geomatics engineering: surveying, geodesy, hydrography, space geodesy and geodynamics, photogrammetry and digital mapping. A survey of communications, remote sensing and geodetic satellites, their engineering characteristics, payloads and use; features of Low Earth Orbiter (LEO) missions. One and one-half lecture hours per week, one and one-half laboratory hours per week. One term. Two credits. Prerequisites: SC/EATS 1010 3.00; SC/PHYS 1010 6.00; or permission of the course instructor.

Cross-listed to: SC/EATS 2610 2.00, SC/ENG 2110 2.00

SC/ENG 2120 4.00 Fundamentals of Surveying. Coordinate systems, conventions and transformations. First and second geodetic problem: trig sections, traverses, eccentricities, areas. Distance measurements, angular measurements, heights. Topographic mapping and property surveys. Route surveying. Introduction to other surveys: alignment, deformation surveys for buildings, bridges, dams, tunnels, pipelines. Three lecture hours per week and three laboratory hours per week. One term. Four credits. Prerequisites: SC/EATS 1010 3.00; SC/MATH 1014 3.00; SC/MATH 1025 3.00; SC/EATS 2610 2.00 or SC/ENG 2110 2.00; or permission of the course instructor.

Cross-listed to: SC/EATS 2620 4.00, SC/ENG 2120 4.00

SC/ENG 2130 3.00 Field Surveys. A two-week field camp comprising field and office work that simulate professional practice. Students participate in organizational, planning, scheduling and logistical aspects of field operations, instrument familiarization and testing, establishment of geodetic control, and land boundary, highway and construction surveys. Two-week field surveys. No lecture. Three credits. Prerequisite: SC/EATS 2620 4.00 or SC/ENG 2120 4.00.

Cross-listed to: SC/EATS 2630 3.00, SC/ENG 2130 3.00

SC/ENG 3000 3.00 Professional Engineering Practice. An introduction to the legal and ethical frameworks of the engineering profession, preparing students for the Professional Practice Examination required for certification as a professional engineer. Also covered are associated professional issues such as entrepreneurship, intellectual property and patents. Three lecture hours per week. One term. Three credits. Prerequisites: Second-year engineering courses (stream specific), including SC/ENG 2001 3.00 (or SC/ENG 2000 6.0 prior to 2009) and SC/ENG 1000 6.00. Course credit exclusions: SC/CSE 3000 3.00, SC/CSE 3001 1.00, SC/CSE 3002 1.00, SC/PHYS 3001 1.00, SC/EATS 3001 1.00.

SC/ENG 3110 4.00 Geodetic Concepts. Geodesy. Reference systems, frames and datums; time systems; the natural system of coordinates; terrestrial, celestial and orbital coordinate systems. Coordinate system transformations. Relative three dimensional positioning; the inertial frame of reference. Positions on the ellipsoid and mapping plane. Height systems. Three lecture hours and three hours of laboratory exercises per week. One term. Four credits. Prerequisites: SC/EATS 2610 2.00 or SC/ENG 2110 2.00; SC/EATS 2620 4.00 or SC/ENG 2120 4.00; SC/MATH 2015 3.00; SC/CSE 2501 1.00. Corequisite: SC/EATS 3620 4.00 or SC/ENG 3120 4.00. Prior to Fall 2009: Prerequisites: SC/EATS 2610 2.00 or SC/ENG 2110 2.00; SC/EATS 2620 4.00 or SC/ENG 2120 4.00; AK/AS/SC/MATH 2015 3.00; AK/AS/SC/CSE 2501 1.00 (formerly COSC). Corequisite: SC/EATS 3620 4.00 or SC/ENG 3120 4.00.

Cross-listed to: SC/EATS 3610 4.00, SC/ENG 3110 4.00

SC/ENG 3120 4.00 Adjustment Calculus. Minima and maxima of functions, Weierstrass theorem, Lagrange multipliers. Quadratic forms. Observables, observations, parameters and mathematical models. The

least squares principle; weight matrix and variance factor; parametric, condition and combined adjustments. Three lecture hours and three hours of laboratory exercises per week. One term. Four credits. Prerequisites: SC/MATH 1025 3.00; SC/MATH 2015 3.00; SC/EATS 2620 4.00 or SC/ENG 2120 4.00; SC/CSE 2501 1.00. Corequisite: SC/EATS 3610 4.00 or SC/ENG 3110 4.00. Prior to Fall 2009: Prerequisites: AK/AS/SC/MATH 1025 3.00; AK/AS/SC/MATH 2015 3.00; SC/EATS 2620 4.00 or SC/ENG 2120 4.00; AK/AS/SC/CSE 2501 1.00 (formerly COSC). Corequisite: SC/EATS 3610 4.00 or SC/ENG 3110 4.00.

Cross-listed to: SC/EATS 3620 4.00, SC/ENG 3120 4.00

SC/ENG 3130 4.00 Analysis of Overdetermined Systems. Hilbert space and statistics. Statistical testing and assessment of observations, parameters and mathematical models. Optimal design. Generalized adjustment, problems with constraints and singularities, step-by-step procedures, Kalman filtering, least-squares collocation. Three lecture hours and three hours of laboratory exercises per week. One term. Four credits. Prerequisites: AP/SC/GEOG 2420 3.00, SC/EATS 3610 4.00 or SC/ENG 3110 4.00, SC/EATS 3620 4.00 or SC/ENG 3120 4.00. Prior to Fall 2009: Prerequisites: AS/SC/GEOG 2420 3.00, SC/EATS 3610 4.00 or SC/ENG 3110 4.00, SC/EATS 3620 4.00 or SC/ENG 3120 4.00.

Cross-listed to: SC/EATS 3630 4.00, SC/ENG 3130 4.00

SC/ENG 3140 4.00 Geodetic Surveys. Instrument systems and procedures for high-precision geodetic surveys. High-precision surveys in engineering physics; geodetic network densification, adjustment and analysis; procedures for deformation surveys and strain analysis. Establishment and observation of control networks for construction and monitoring of large engineering structures. Three lecture hours and three hours of laboratory exercises hours per week. One term. Four credits. Prerequisites: SC/EATS 2620 4.00 or SC/ENG 2120 4.00, SC/EATS 2630 3.00 or SC/ENG 2130 3.00, SC/EATS 3610 4.00 or SC/ENG 3110 4.00; SC/EATS 3620 4.00 or SC/ENG 3120 4.00 Corequisite: SC/EATS 3630 4.00 or SC/ENG 3130 4.00.

Cross-listed to: SC/EATS 3640 4.00, SC/ENG 3140 4.00

SC/ENG 3150 4.00 Photogrammetry. Image and object space. Direct and inverse problems of projective and similarity coordinate transformations. Collinearity and coplanarity. Orientation procedures. Measurement and correction of image coordinates. Stereomodel formation and error analysis. Analog, analytical, independent model, strip and block adjustments. Image rectification. DEM generation. Digital Mapping Applications. Project planning. Three lecture hours and three hours of laboratory exercises per week. One term. Four credits. Prerequisites: SC/EATS 2620 4.00 or SC/ENG 2120 4.00; SC/EATS 3620 4.00 or SC/ENG 3120 4.00. Corequisite: SC/EATS 3630 4.00 or SC/ENG 3130 4.00.

Cross-listed to: SC/EATS 3650 4.00, SC/ENG 3150 4.00

SC/ENG 3160 3.00 Advanced Field Surveys. A two-week camp comprising field and laboratory work. It involves organizational, planning, scheduling and logistical aspects of high precision field operations related to engineering physics, establishment and observation of control networks for construction and monitoring large engineering structures. Two week field surveys. No lectures. Prerequisites: SC/EATS 3640 4.00 or SC/ENG 3140 4.00.

Cross-listed to: SC/EATS 3660 3.00, SC/ENG 3160 3.00

SC/ENG 3310 3.00 Space Mission Design. This course covers the basic aspects of space mission design including: mission types, objectives, technical readiness, risk mitigation, subsystems, and public outreach. Three lecture hours. Prerequisites: SC/ENG 2000 6.00 or permission of the instructor.

Cross-listed to: SC/ENG 3310 3.00, SC/PHYS 3310 3.00

SC/ENG 3320 3.00 Microsystems Technology. The course covers the principles and implementations of miniaturised sensors and actuators in a range of physical domains, such as optical, magnetic, thermal, and mechanical systems. Examples include electronic cameras, micro-electro-mechanical systems, thermal microsystems and display technologies.

Three lecture hours. Prerequisite: SC/PHYS 2020 3.00; SC/PHYS 2211 1.00; SC/PHYS 2060 3.00 recommended; SC/PHYS 2212 1.00 recommended. Corequisite: SC/PHYS 3050 3.00 recommended.

Cross-listed to: SC/ENG 3320 3.00, SC/PHYS 3320 3.00

SC/ENG 3330 3.00 Materials and Thermal Analysis for Space Applications. This course covers the behavior of materials relevant to the engineering of spacecraft. Material responses to thermal, mechanical, vacuum, electrical and ionizing radiation stresses are discussed. Engineering analysis tools including thermal analysis and environment models are also covered. Three lecture hours. Prerequisite: SC/ENG 2000 6.00 or SC/ENG 2002 3.00 or permission of the instructor.

Cross-listed to: SC/ENG 3330 3.00, SC/PHYS 3330 3.00

SC/ENG 3340 3.00 Mechanical Design. This course provides an advanced treatment of machine elements such as bearings, springs, gears, cams, and mechanisms. Analysis of these elements includes extensive application of core engineering curriculum including solid mechanics and fluid dynamics. The course offers practice in skills needed for machine design such as estimation, drawing, and experimentation. Students work in small teams to design and build machines that address real-world challenges.

SC/ENG 3350 3.00 Finite Element Methods In Engineering Design. Basic principles of finite element method, variational and weighted residual principle procedures in discretizing and building up governing equations of physical models. Use of industrial FEM codes to understand model response to external effects such as stress, heat, vibration, and fluids. Prerequisites: SC/MATH 1025 3.00; SC/MATH 2015 3.00; SC/MATH 2271 3.00; SC/PHYS 1010 6.00, or a minimum grade of C in SC/PHYS 1410 6.00; SC/PHYS 2010 3.00; SC/PHYS 2030 3.00; SC/EATS 2470 3.00.

SC/ENG 3900 0.00 Engineering Internship Term. The industrial internship provides students with the opportunity to work in the engineering field as part of their honours degree program as part their honours degree program as part of the Technology Internship Program. The Internship Office will coordinate placement of students with a specific internship position. Prerequisites: Students must have successfully completed at least nine core engineering credits at the 3000 level within the previous two terms, including SC/ENG 3000 3.00 (Professional Engineering Practice), with an overall grade point average (G.P.A.) of at least 5.00 over all courses completed. To qualify, the student must attend all mandatory preparatory sessions as outlined by the Technology Internship Program. Note: This course does not count for degree credit in any program. Registration in sections of SC/ENG 3900 0.00 while on an internship placement provides a transcript notation of the student's participation in the internship program. Students are required to register in this course in every term of their work term (internship). Every student registered in the course will be assigned a Faculty Supervisor who will assess the student's performance during the internship.

SC/ENG 3900 0.00 Engineering Internship Term. SC/ENG 4000 6.00 Engineering Project. The project will include significant elements of design and implementation. The format is intended to resemble engineering projects in practice, including specifications,

background research, innovative solutions, analysis, testing and communication. Two terms. Six credits. Prerequisites: 21 3000-level science or engineering credits in the Engineering Program, exclusive of SC/ENG 3000 3.00. Prerequisite or corequisite: SC/ENG 3000 3.00. Course credit exclusions: SC/CSE 4001 6.00, SC/CSE 4080 3.00, SC/CSE 4081 6.00, SC/CSE 4082 6.00, SC/CSE 4084 6.00, SC/EATS 4001 6.00, SC/PHYS 4001 6.00.

SC/ENG 4110 3.00 Global Positioning Systems. Positioning by space vehicles. Coordinate systems and transformations. GPS, GLONASS, GALILEO, Satellite Laser Ranging, Very Long Baseline Interferometry. Positioning of moving vehicles and platforms: marine, land, airborne and space vehicles. GPS/INS integration. Real time kinematic applications. Three lecture hours weekly and three hours of laboratory exercises every other week. One term. Three credits. Prerequisites: SC/EATS 3020 3.00; SC/EATS 3610 4.00 or SC/ENG 3110 4.00; SC/EATS 3620 4.00 or SC/ENG 3120 4.00; or permission of the course director.

Cross-listed to: SC/EATS 4610 3.00, SC/ENG 4110 3.00

SC/ENG 4120 3.00 Physical and Space Geodesy. Local treatment of the Earth's gravity field. Boundary value problems. Normal and disturbing potential, the normal gravity formula. Geoid, geoidal undulations, deflections of the vertical. Stokes and Vening Meinesz formulae. Gravimetry and gravity reductions. Height systems. Tides. Gravity space missions. Three lecture hours weekly and three hours of laboratory exercises every other week. One term. Three credits. Prerequisites: SC/EATS 3020 3.00; SC/EATS 3610 4.00 or SC/ENG 3110 4.00; SC/EATS 3620 4.00 or SC/ENG 3120 4.00; SC/EATS 4610 3.00 or SC/ENG 4110 3.00.

Cross-listed to: SC/EATS 4620 3.00, SC/ENG 4120 3.00

SC/ENG 4130 3.00 Image Processing for Remote Sensing and Photogrammetry. Digital imaging from remote platforms. Image processing and analysis, including radiometric and geometric corrections and geometric enhancements, multispectral classification, digital photogrammetry fundamentals, workstations, photogrammetric processing. Two lecture hours and three hours of laboratory exercises per week. One term. Three credits. Prerequisites: SC/EATS 3650 4.00 or SC/ENG 3150 4.00; SC/EATS 4220 3.00.

Cross-listed to: SC/EATS 4630 3.00, SC/ENG 4130 3.00

SC/ENG 4140 3.00 Digital Terrain Modeling. Digital Terrain Modeling concepts. Mathematical techniques in data acquisition, processing, storage, manipulation and applications. DTM. Surface representation using moving averages, linear projection and Kriging techniques. Grid resampling methods and search algorithms. DTM derivatives and applications. LIDAR systems and applications. Two lecture hours and three hours of laboratory exercises per week. One term. Three credits. Prerequisites: SC/EATS 2620 4.00 or SC/ENG 2110 2.00; SC/EATS 3620 4.00 or SC/ENG 3110 4.00.

Cross-listed to: SC/EATS 4640 3.00, SC/ENG 4140 3.00

SC/ENG 4150 3.00 Hydrography. Hydrography and its role in offshore management. Elements of oceanography, tides and water levels, seabed and sea water properties. Underwater acoustics. Bathymetric and imaging methods. Marine positioning and navigation. Three lecture hours and three hours of laboratory exercises per week. One term. Three credits. Prerequisite: SC/EATS 4610 3.00 or SC/ENG 4110 3.00.

Cross-listed to: SC/EATS 4650 3.00, SC/ENG 4150 3.00

SC/ENG 4160 3.00 Cadastral Surveys and Land Registration Systems. Cadastral systems, survey law and the role of the professional land surveyor. The Dominion Lands Survey System and Land Surveys Acts and Regulations. Cadastral surveys, including surveys of Canada lands for aboriginal land claims and coastal boundaries. Land registration systems in Canada. Three lecture hours and three hours of laboratory exercises per week. One term. Three credits. Prerequisite: SC/EATS 2620 4.00 or SC/ENG 2120 4.00.

Cross-listed to: SC/EATS 4660 3.00, SC/ENG 4160 3.00

SC/ENG 4170 3.00 Survey Law. Property boundaries, survey monuments, party walls, fences, future issues. Natural boundaries formed by waters and the right of access. Property title issues, legislation, and standards of practice. Prerequisites: SC/EATS 4660 3.00 or SC/ENG 4160 3.00.

Cross-listed to: SC/EATS 4670 3.00, SC/ENG 4170 3.00

SC/ENG 4180 3.00 Geomatics Multi-Sensor Systems. A generalised treatment (with strong lab component) of contemporary geomatics technology (satellite and inertial navigation systems, ranging and imaging sensors) in terms of generic spatial sensors and classical mathematical and hardware integration methods for specific user applications. Prerequisites: One of SC/ENG 3150 4.00, SC/EATS 3650 4.00, SC/GEOG 4440 3.00 or ES/ENVS 4521 3.00. Co-requisites: SC/ENG 4110 3.00 or equivalent.

SC/ENG 4190 3.00 Advanced 3D Geospatial Techniques. Advanced 3D geospatial techniques for data extraction from imaging and ranging sensors (optical, radar and lidar), 3D modeling, 3D data management and Internet mapping using emerging and multi-disciplinary technologies in 3D geospatial information science and engineering. Prerequisites: SC/EATS 3300 3.00 or SC/GEOG 4340 3.00 or equivalent; one of SC/ENG 3150 4.00, SC/EATS 3650 4.00, SC/GEOG 4440 3.00, ES/ENVS 4521 3.00 or equivalent.

SC/ENG 4330 3.00 Radio Science and Techniques for Space Exploration. The theory and application of modern radio science and radio techniques in space exploration and space navigation. Topics include signal processing, radio astronomy fundamentals, Deep Space Network instrumentation, antenna theory, arrays, Very Long Baseline Interferometry, spacecraft navigation, radar systems, range, range rate and the radar equation. Prerequisite: SC/PHYS 3250 3.00.

Cross-listed to: SC/ENG 4330 3.00, SC/PHYS 4330 3.00

SC/ENG 4350 6.00 Space Hardware. Explores the theoretical, practical and experimental techniques needed to acquire and manipulate typical signals used in spacecraft system operations or integration and testing. Three laboratory hours and two lecture hours per week. Prerequisites: SC/CSE 1540 3.00 or SC/CSE 2031 3.00, or equivalent programming experience; SC/PHYS 3150 3.00; SC/PHYS 3250 3.00. Corequisite: SC/ENG 4330 3.00 and SC/PHYS 4330 3.00.

Cross-listed to: SC/ENG 4350 6.00, SC/PHYS 4350 6.00

SC/ENG 4360 3.00 Payload Design. A survey of typical applications of spacecraft technology including communications systems, location systems, terrestrial applications and exploration missions. Prerequisites: SC/PHYS 3050 3.00; SC/PHYS 3280 3.00 or SC/ENG 3310 3.00 or SC/PHYS 3310 3.00.

Cross-listed to: SC/ENG 4360 3.00, SC/PHYS 4360 3.00

SC/ENG 4550 3.00 Control Systems. An introduction to the analysis and design of control systems. Topics include: modeling of continuous systems; stability theory; analysis and design of feedback control systems in time and frequency domains. Prerequisites: SC/MATH 2015 3.00; SC/MATH 2271 3.00 or SC/CSE 3451 3.00. Prior to Fall 2009: Prerequisites: AS/SC/MATH 2015 3.00; AS/SC/MATH 2271 3.00 or AK/AS/SC/CSE 3451 3.00.

Cross-listed to: SC/ENG 4550 3.00, SC/PHYS 4550 3.00

English – Glendon, Liberal Arts and Professional Studies

Glendon

Location:

The English Department offers a variety of courses in the literature of the English language. There are courses in historical periods from medieval to contemporary, in the literature of several nations (Canadian and post-colonial as well as English and American), in the various literary genres such as poetry, fiction, drama, non-fictional prose and criticism and in literary theory. In addition, during their final 36 credits, Honours English majors may propose their own thesis (AP/EN 4160 6.00).

The department also offers an Honours BA in professional writing and a Specialized Honours BA in English and professional writing.

For details, please consult the Faculty of Liberal Arts and Professional Studies Programs of Study section.

Courses in English

1000-Level Courses

*Note for Faculty of Liberal Arts and Professional Studies students: in order to pursue a major or minor in English, students **must take both** EN 1001 3.00 **and** EN 1002 3.00, and must achieve a minimum grade of C (60 per cent) **in each** in order to continue. Students **may not** take any 2000-, 3000- or 4000-level courses until they have successfully completed both 1000-level courses. Also, they may **not** enrol in EN 1002 3.00 until they have successfully completed EN 1001 3.00, that is, until they have passed the course with a grade of C or above. Students who have passed 54 or more credits may enrol in 1000-level courses only if they have permission in writing from the department.*

AP/EN 1001 3.00 An Introduction to Literary Study. This course is an introduction to the study of, and writing about, literature. Through short readings (essays, stories, poems and plays), students learn to observe, understand and evaluate how literary texts work. Through specific attention to the technical language of literature, the mechanics of writing and the preparation of an essay, students learn to write effectively about literature. Course credit exclusions: None. PRIOR TO FALL 2009: Course credit exclusions: AS/EN 1001 3.00.

AP/EN 1002 3.00 Intertextualities. This course advances students' training in comparative literary analysis, research and writing. It introduces students to intertextual relationships between old forms and new that exemplify literary movements and influences as well as canon and counter-canon formation. Prerequisite: AP/EN 1001 3.00 or permission by the department. Course credit exclusions: None. PRIOR TO FALL 2009: Prerequisite: AS/EN 1001 3.00 or permission by the department. Course credit exclusion: AS/EN 1002 3.00.

AP/EN 1006 3.00 A Writer's Introduction to Literary Forms. An introduction to the fundamental principles governing the production and reception of four principal literary forms in English: poetry, prose fiction, prose non-fiction and drama. Extensive consideration is given to the form's ties to the parallel concept of genre. Course credit exclusion: AP/PRWR 1006 3.00. PRIOR TO FALL 2009: Course credit exclusions: AS/EN 1250 3.00, AS/PRWR 1250 3.00.

Cross-listed to: AP/EN 1006 3.00, AP/PRWR 1006 3.00

AP/EN 1007 3.00 Rhetoric: An Historical Introduction. Introduces theories of rhetoric and composition from an historical perspective. Course credit exclusions: None. PRIOR TO FALL 2009: Course credit exclusion: AS/EN 1007 3.00.

AP/EN 1008 6.00 Reading Contemporary Fiction: An Introduction. Examines recent critically acclaimed fictional works. Considers technical questions such as characterization, form and narrative structure. All the texts are bound by a thematic focus on family/home. Course credit exclusions: None. PRIOR TO FALL 2009: Course credit exclusions: AK/EN 1000A 6.00 (prior to Summer 2000), AK/EN 1000B 6.00 (prior to Fall/Winter 2000-2001), AK/EN 1920 6.00.

GL/EN 1520 6.00 The Literary Text: Genres and Approaches. A study of the special characteristics and functions of literary texts. Examples of several literary genres are examined and students have the opportunity to develop their abilities to read and interpret, to discuss and write about literature in English.

AP/EN 1700 9.00 Professional Writing: Process and Practice. This course considers a wide range of written expression including fiction, nonfiction, poetry and technical/business writing, with an emphasis on the theory and practice of writing. Note: Successful completion of this course fulfills General Education requirements in the Faculty of Liberal Arts & Professional Studies. Course credit exclusions: None. PRIOR TO FALL 2009: Course credit exclusion: AS/EN 1980 9.00.

Cross-listed to: AP/EN 1700 9.00, AP/HUMA 1980 9.00, AP/WRIT 1980 9.00

2000-Level Courses

Note for Faculty of Liberal Arts and Professional Studies students: English majors and minors may not take these courses unless they have successfully completed both EN 1001 3.00 and EN 1002 3.00. Students who have passed 84 or more credits may not enrol in 2000-level courses without written permission from the department.

AP/EN 2000 6.00 Literary Theory. This course introduces students to literary studies in English through several systems of interpreting literature. By examining various possible relations among the text, the reader, the author and the world, the student will become familiar with differing strategies of interpretation. Course credit exclusions: AP/EN 2001 3.00, AP/EN 2002 3.00. PRIOR TO FALL 2009: Course credit exclusions: AK/EN 2075 3.00, AS/EN 1300 6.00.

AP/EN 2001 3.00 Literary Theory I. This course introduces students to early literary theory. We will discuss major developments in the theory and practice of literary representation, from antiquity to romanticism; students will learn the meanings and implications of historically foundational critical terms and debates. Course credit exclusion: AP/EN 2000 6.00. PRIOR TO FALL 2009: Course credit exclusion: AS/EN 1300 6.00.

AP/EN 2002 3.00 Literary Theory II. This course introduces students to contemporary literary and cultural theory. We will discuss major developments in the theory and practice of literature, from romanticism to postmodernism; students will learn the meanings and political implications of current critical terms and debates. Course credit exclusion: AP/EN 2000 6.00. PRIOR TO FALL 2009: Course credit exclusion: AS/EN 1300 6.00.

AP/EN 2010 6.00 Gender Studies. An examination of how gender mediates the creation, reception and interpretation of literary/cultural texts. It provides students with critical tools for understanding gender in contemporary theory, and reading and writing about gender in literary texts. Course credit exclusions: AP/EN 2011 3.00, AP/EN 2012 3.00. PRIOR TO FALL 2009: Course credit exclusion: AS/EN 2850 6.00.

AP/EN 2011 3.00 Gender Studies I. What is gender? Is it something biologically determined or socially constructed? Could it be both? Why is it something we can take for granted? And how does sexuality fit in? Issues of race, ethnicity and belonging will be placed alongside discussions of queerness, masculinity and power. We will examine the possibility of gender resistance and revolution through language and identity while bearing in mind the lived, material experience of being gendered. Course credit exclusion: AP/EN 2010 6.00. PRIOR TO FALL 2009: Course credit exclusion: AS/EN 2850 6.00.

AP/EN 2012 3.00 Gender Studies II. We will survey major theoretical approaches to contemporary gender studies, including what Judith Butler has called new gender studies: bodies marked by various crossings (chromosomal sex, gender, sexuality, race, nation) as well as post-queer heterosexual bodies. We will explore competing and often contradictory theories about gender through films, fiction, and gender theory as they articulate trans-sexed, trans-nationalized, and intersexed hybrid bodies. In short, we will explore theory and cultural production that attempts to answer the question: what does gender studies want? Course credit exclusion: AP/EN 2010 6.00. PRIOR TO FALL 2009: Course credit exclusion: AS/EN 2850 6.00.

AP/EN 2020 3.00 English Language and Linguistics. A comparison of traditional school approaches and modern linguistic methods for studying grammar, lexis, and other language-related topics, including the way language is adapted to various kinds of communication, including conversation, fiction, poetry, drama, journalism, and academic essays. Course credit exclusions: None. PRIOR TO FALL 2009: Course credit exclusion: AK/EN 2076 3.00, AS/EN 2060 6.00.

AP/EN 2100 3.00 Poetry. Through the close study of poems and relevant critical material, the course aims to develop in the student the ability to read poetry with discernment and pleasure. Course credit exclusions: AP/EN 2100 6.00, GL/EN 2590 6.00. PRIOR TO FALL 2009: Course credit exclusions: AK/EN 2010 3.00, AS/EN 2110 6.00, GL/EN 2590 6.00.

AP/EN 2100 6.00 Poetry. Through the close study of poems and relevant critical material, the course aims to develop in the student the ability to read poetry with discernment and pleasure. Course credit exclusions: AP/EN 2100 3.00, GL/EN 2590 6.00. PRIOR TO FALL 2009: Course credit exclusions: AK/EN 2010 3.00, AS/EN 2110 6.00, GL/EN 2590 6.00.

AP/EN 2120 3.00 Prose Narrative. An introduction to the formal techniques and generic patterns that have governed the production of prose narrative in English from the 16th century to the present. Primary emphasis is on fiction but non-fictional narrative is addressed as well. Course credit exclusion: AP/EN 2120 6.00. PRIOR TO FALL 2009: Course credit exclusions: AK/EN 2020 3.00, AS/EN 2470 6.00.

AP/EN 2120 6.00 Prose Narrative. An introduction to the formal techniques and generic patterns that have governed the production of prose narrative in English from the 16th century to the present. Primary

emphasis is on fiction but non-fictional narrative is addressed as well. Course credit exclusion: AP/EN 2120 3.00. PRIOR TO FALL 2009: Course credit exclusions: AK/EN 2020 3.00, AS/EN 2470 6.00.

AP/EN 2140 3.00 Drama. An introduction to the study of drama, presented from a theatrical as well as a literary point of view, with the emphasis on the changing nature of dramatic convention and the relation of plays to their historical background. Course credit exclusions: AP/EN 2140 6.00, GL/DRST 2610 3.00, GL/DRST 2612 3.00, GL/EN 2610 3.00, GL/EN 2612 3.00, GL/HUMA 2610 3.00, GL/HUMA 2612 3.00. GL/EN 4695 3.00 English as a World Language. The course examines a number of varieties of English in the world today from three major standpoints: their historical development, their social and geographical deployment and their linguistic characteristics. Prerequisite: At least 12 credits in linguistics offered in English or another language, six credits of which must be from an introductory course in linguistics. Permission of the instructor required.

Cross-listed to: GL/EN 4695 3.00, GL/ILST 4695 3.00, GL/LIN 4695 3.00

GL/EN 4696 6.00 Teaching English as an International Language.

This course surveys current principles and practices of teaching English in settings outside Canada. Besides the methodological instruction at Glendon, an integral component of the course is a teaching practicum, normally fulfilled in an international setting, held for 2-3 weeks following the Spring exam period. Prerequisite: GL/EN 2608 6.00. Co-requisite: GL/EN 3603 3.00 and 3 credits from GL/EN 3632 3.00, GL/EN 3650 6.00 and GL/EN 3655 6.00. Course credit exclusion: GL/EN 4012 3.00 (Fall 1993), GL/EN 4596 6.00 (EN).

Cross-listed to: GL/EN 4696 6.00, GL/LIN 4696 6.00

AP/EN 4700 6.00 The Special Issue. The basic skills of periodical journalism - finding and developing story ideas, interviewing, and story construction - are honed and, working in teams, students produce periodicals comprised of a series of articles on a common theme. Prerequisites: AP/EN 3700 6.00, AP/PRWR 3710 3.00, AP/PRWR 3720 3.00. Co-requisites: AP/EN 4701 3.00 and AP/EN 4753 6.00; or AP/EN 4752 3.00. Course credit exclusions: None. PRIOR TO FALL 2009: Prerequisites: AS/EN 3700 6.00, AS/PRWR 3710 3.00, AS/PRWR 3720 3.00. Co-requisites: AS/EN 4703 3.00 and AS/EN 4850 6.00 or AS/EN 4756 3.00. Course credit exclusions: AS/EN 4710 3.00, AS/EN 4710 6.00.

AP/EN 4701 3.00 Theoretical and Ethical Aspects of Periodical Writing. The course considers the social/cultural role of journalism and of the journalist. What duties and responsibilities has the journalist to subjects, sources, stories, editors, employers, readers? What potential conflicts are there among these interests and how ought these to be considered. Course credit exclusions: None. PRIOR TO FALL 2009: Course credit exclusion: AS/EN 4703 3.00.

AP/EN 4710 3.00 The Ethics of Publicity. The course addresses the ethical and legal issues involved in making information public. How are the potentially conflicting demands of the institution and the public to be reconciled both within and without the organization? Course credit exclusions: None. PRIOR TO FALL 2009: Course credit exclusion: AS/EN 4803 3.00.

AP/EN 4711 3.00 Practical Studies in Damage Control. A problem-based capstone course in which students work in teams to develop and construct institutional responses, both internal and external, to extraordinary circumstances. Course credit exclusions: None. PRIOR TO FALL 2009: Course credit exclusion: AS/EN 4810 3.00.

AP/EN 4720 6.00 Print Culture and the History of the Book. A study of the printed book as manufactured object and of the ways the printing press transformed authorship, the literary, the reader and created print culture. The development of that culture is traced from the 15th century to today. Course credit exclusions: None. PRIOR TO FALL 2009: Course credit exclusion: AS/EN 3900 6.00, AS/EN 4280 6.00.

AP/EN 4721 6.00 Book Publishing Practicum. This Practicum allows students in their 4th year in English and Professional Writing to participate in the publication of a book of short fiction. Manuscripts are chosen from submissions to a contest, edited, produced in both electronic and print editions, and marketed, all under the supervision of English and Professional Writing faculty. Students must grapple with issues from how to judge the publishability of a manuscript to how best to edit, produce, and market an appropriate text. Assessment is through written assignments associated with the publishing tasks the students perform. Prerequisites: AP/PRWR 3720 3.00, AP/EN 3720 6.00, AP/EN 3730 3.00. Corequisite: AP/EN 4720 6.00. Course credit exclusions: None. PRIOR TO FALL 2009: Prerequisites: AS/PRWR 3720 3.00, AS/EN 3600 6.00, AS/EN 3602 3.00. Corequisite: AS/EN 4280 6.00. Course credit exclusion: AS/EN 4600 6.00.

AP/EN 4722 6.00 Editing Shakespeare Electronically and in Print: The Theory and Practice of Editorial Transmission and Transformation.

This course engages the theoretical and practical problems in Shakespearean editorial scholarship and consequently, in how Shakespeare's canonicity has been transmitted, received, interpreted, and transformed by generations of literary critics. Our historical survey of seminal editions (and their theoretical underpinnings) begins with F1 (1623) and ends with the emergence of XML and problems in the architecting of schema. Editorial standards as defined by the MLA as well as the TEI-C will be applied to these seminal editions with the intention of illuminating hermeneutical controversies by means of concrete examples. Prerequisites: 30 credits in English and AP/EN 3535 6.00 (or AS/EN 3190 6.00) or AP/EN 4720 6.00 (or AS/EN 3900 6.00 or AS/EN 4280 6.00), or instructor's permission.

Cross-listed to: AP/EN 4722 6.00, AP/PRWR 4722 6.00

AP/EN 4750 3.00 Oral Traditions and Professional Writing. Oral composition and performance have existed as professions for some 5000 years. This course surveys the aesthetics, history, techniques, and methods of remuneration of professional oral composition. Course credit exclusions: None. PRIOR TO FALL 2009: Course credit exclusion: AS/EN 4754 3.00.

AP/EN 4751 3.00 The Rhetoric of Science. This course examines scientific texts as rhetorical creations, including how scientific authors seek to persuade by means of appeals to personal credibility, authority, community standards, forensic probability, ethics and utility, and emotion. Course credit exclusions: None. PRIOR TO FALL 2009: Course credit exclusion: AS/EN 4751 3.00.

AP/EN 4752 3.00 Reading the News: Examining the Rhetoric of the Press. This course examines not only what is "news" but how the press presents news stories to the reading public. Issues in bias, spinning and framing, ideology and politics will be of focus. Course credit exclusions: None. PRIOR TO FALL 2009: Course credit exclusion: AS/EN 4756 3.00.

AP/EN 4753 6.00 Writing as a Profession: From Orality to Literacy and Beyond. This course surveys the various ways in which people have been paid for writing in the past and applies historical categories to understanding how people now earn money by writing (or using related verbal skills). Course credit exclusions: None. PRIOR TO FALL 2009: Course credit exclusion: AS/EN 4850 6.00.

English as a Second Language – Glendon, Liberal Arts and Professional Studies

Glendon

Director of English as a Second Language:

C. Fraser, C212 York Hall, Tel.: 416-487-6713

Students wishing or required to take English as a second language (ESL) courses must meet with an adviser in ESL before enrolling. Native users of English are not eligible to enrol in ESL courses except under special circumstances (e.g. English as a second dialect) and with the permission of the director of the ESL program. Advanced students at the 3000 level normally take a minimum of three ESL credits and a maximum of 12 ESL credits.

ESL in the English major: No more than six ESL credits, to be taken at the 3000 level, may be counted towards a major in English. These ESL credits may be counted as part of the 3000-4000 level requirement in the bachelor of arts degree program but not in the Honours BA.

Liberal Arts and Professional Studies

Note: for general regulations and enrolment information please see Languages, Literatures and Linguistics within this section.

Courses in English as a Second Language

GL/ENSL 2310 3.00 English Non-Literary Texts. A course for students of English as a second language, based on the study of contemporary non-literary texts. Attention will be given to vocabulary, grammar skills in reading and writing.

GL/ENSL 2400 3.00 English in Performance: Dramatic Arts. A study of English as exemplified through plays, improvisation and role-play, for students of English as a second language. Particular attention will be given to stress, rhythm, intonation and speech styles.

GL/ENSL 2410 3.00 English in Performance: Media. A study of contemporary spoken English through selected exposure to various non-print media, for students of English as a second language.

GL/ENSL 2700 6.00 ESL: Academic Foundations. The goal of this course is to improve English language and academic skill proficiency to enable students on completion of the course to function adequately in academic courses given in English at the University.

GL/ENSL 3501 3.00 Varieties of English Writing. The course is designed for advanced English as a second language students, to develop their writing skills in English by juxtaposing creative writing assignments with other varieties of writing.

GL/ENSL 3502 3.00 Functional Writing. This course examines the main functions of written English outside literature-description, exposition, criticism, persuasion-in various modes (essay, opinion-piece, pamphlet, letter) and leads to the production by students of such texts.

GL/ENSL 3510 3.00 Modes of Communication. Study of processes in human communication (verbal/non verbal) to develop a framework for analyzing the language and social conventions underlying communication in such areas as interpersonal relations, business, the arts, academia, mass media. Focus on interpretative and productive expertise. Prerequisites: Advanced level placement on Glendon English Language Placement Test or equivalent.

GL/ENSL 3700 3.00 Studies in English Literature. The course gives advanced English as a second language students the opportunity to develop their experience of English language and culture through the study of literary texts.

GL/ENSL 3800 3.00 Dealing With Viewpoint. A course on the nature, construction and interpretation of argument, focusing on a broad variety of texts from different sources including academic and public documents and several kinds of media. Development of appropriate language resources for academic tasks.

AP/ESL 1000 9.00 Canadian Language and Culture. This course develops the linguistic/academic skills of students from English as a second language backgrounds, using themes such as language and communication, culture and identity, the immigrant/refugee experience, multiculturalism, Canada's aboriginal peoples and Quebec. A variety of course activities develop course themes and language proficiency. Note: Successful completion of this course fulfills General Education requirements in the Faculty of Liberal Arts & Professional Studies. Course credit exclusions: None. Prior TO FALL 2009: Course credit exclusion: AS/ESL 1000 9.00.

Cross-listed to: AP/ESL 1000 9.00, AP/HUMA 1220 9.00

AP/ESL 1450 6.00 Thinking about Contemporary Canada. Examines how writers, filmmakers, singers and philosophers understand Canada at the end of the 20th century. Emphasizes a range of voices, both rooted in Canada and immigrant, and on issues critical to arrival, belonging and the idea of nation. Note: This course comprises the English as a second language requirement for incoming English as a second language students. It may be counted as fulfilling the general education humanities requirement or as an elective credit. Course credit exclusions: None. Prior TO FALL 2009: Course credit exclusion: AK/ENSL 1450 6.00.

Cross-listed to: AP/ESL 1450 6.00, AP/HUMA 1745 6.00

AP/ESL 2000 6.00 English in Use. This course provides opportunities for students to develop their English language skills while learning more about the varieties of written and spoken English. Students learn to analyze both spoken and written texts as connected discourse and become familiar with some of the ways in which literary and non-literary texts can be examined. Prerequisites: AP/ESL 1000 9.00 or permission of the department. Course credit exclusions: None. Prior TO FALL 2009: Prerequisites: AP/ESL 1000 9.00, AS/ESL 1000 9.00 or permission of the department. Course credit exclusion: AS/ESL 2000 6.00.

Environmental science encompasses the study of the major natural interacting systems of climate, water, biota and landforms and the effects of human activities on these systems. The program provides students with a broad interdisciplinary education which is organized around the field of environmental science rather than being focused on a single academic discipline. It equips students with scientific knowledge and understanding of several environmental systems so that they can effectively analyze and deal with complex environmental problems.

Students are required to focus their studies on one of two streams (physical sciences and life sciences) and complete a set of core courses which provide a minimum breadth in both the physical and life sciences.

For specific requirements of the Specialized Honours BSc program in Environmental Science and for the list of courses, see the Faculty of Science and Engineering Programs of Study section.

The Faculty of Environmental Studies offers both the BES Specialized Honours program (120 credits) and the BES program (90 credits). Both of these programs introduce students to the links between the exploitation of the natural world and justice issues related to class exploitation, racism and gender inequity. Fully aware of the growing interdependencies of human and natural life-worlds in a globalized environment, the Faculty of Environmental Studies believes that an inclusion of non-Western perspectives is essential to a fruitful discussion of all environmental issues. To that end, the Faculty strives to include a broad range of perspectives in its course offerings. The York University BES program is designed to equip students with the knowledge and understanding to deal effectively yet sensitively with complex environmental and social problems arising at the local, national or global scale. In this light, the BES program offers:

- interdisciplinary expertise to understand and solve environmental problems;
- opportunities to develop specific skills and for in-depth learning;
- a wide range of courses covering the humanities, social sciences and environmental science;
- an outlook that includes local and global, philosophical and applied questions;
- an emphasis on bringing theoretical and practical matters together in the classroom;
- the knowledge and skills need for environmental careers and graduate studies;
- an atmosphere in which students know that learning matters.

Note: a BES program handbook is available each spring in the FES Undergraduate Office of Student and Academic Services, 137 HNES Building or on the Faculty of Environmental Studies Web site at <http://www.yorku.ca/fes/>.

Courses in Environmental Studies

ES/ENVS 1000 6.00 Earth in Our Hands: Introduction to Environmental Studies. This course is designed to provide students with an introductory perspective or framework of understanding for environmental studies at the broadest level. The course introduces students to environmental issues, using the urgent, emerging prospect of the fate of the "Earth in our hands" as the main organizing ethical, scientific and practical theme throughout the year. Course credit exclusion: ES/ENVS 1000 6.00 (prior to 2009)

ES/ENVS 1010C 3.00 Scaly, Brown, Furry and Green: The Natural History of the GTA and Southern Ontario. Curious about your critter neighbours? With a focus on discovery through outdoor experience and hands-on activities, this course will provide students with the opportunity to learn about the habitats and wildlife in our common backyard—the Greater Toronto Area.

ES/ENVS 1200 6.00 Taking Action: Engaging People and the Environment. Students learn to identify, research, and act on local/global issues of environmental and social justice. Working in small groups, they develop basic skills in collaborative research, social analysis, action planning and creative communications. The workshop introduces them to the praxis pedagogy of the program, connects them to organizations addressing the issues, and culminates in actions and presentations.

ES/ENVS 1500 6.00 Introduction to Environmental Science: The Web of Life. The course provides an introduction to the elements of physics, chemistry, biology and ecology that are necessary for the study of environmental problems. It also acquaints students with techniques (including computer techniques) for the description, organization and display of quantitative data. Note: This course is not intended for students who have both Grade 12 Biology and Chemistry. Students are encouraged to speak to their academic adviser about an alternative course.

ES/ENVS 1800 6.00 Environmental Writing / Writing the Environment. Introduces students to a range of modes of writing in environmental studies. In the process of reading, discussing, and practicing different kinds of environmental writing, students will develop a variety of writing skills in addition to an appreciation of writing as an important form of environmental action. The course also considers writing in relation to oral traditions and newer technologies. Prerequisite: First-year specialty or permission of the instructor. Note: This course is not intended for ESL students.

ES/ENVS 2009 3.00 Quantitative Methods in Environmental Studies. An introduction to the skills necessary to pursue and understand statistical data analysis. Topics include: graphing, frequency distributions, measures of central tendency, an introduction to probability, statistical inference, hypothesis testing and bivariate regression. Statistical software will be utilized to perform data analysis on the computer. Course credit exclusion: ES/ENVS 3009 3.00, ES/ENVS 2010 3.00, ES/ENVS 2010 6.00.

ES/ENVS 2100 6.00 Foundations in Environment and Culture: Philosophy, Arts, Technology, and Education. This foundational course enables students to develop a rigorous engagement with some of the complex dimensions of environmental culture, and to develop their abilities as engaged cultural actors in varied environmental milieu - as artists, critics, scholars and educators. In addition to learning how to read texts and situations critically and carefully, students will develop a cross-cultural, cross-disciplinary, environmentally-grounded array of creative skills. The course prepares students to address such issues as: the historical, conceptual and philosophical dimensions of environmental problems; the co-development of social, technological and ecological histories in particular places and globally; the cultural production of environmental issues in literature, the arts and popular culture; relations among nature science and technology in such areas as biotechnology or animal rights; the transformation of environments through literary, visual and performing arts; critical analysis of representations of nature and media literacy; and the contemporary range of environmental and social discourses in diverse cultural and disciplinary traditions and practices. Course Credit Exclusion: ES/ENVS 2100 3.00.

ES/ENVS 2122 3.00 Community Arts for Social Change. An introduction to community-based creative practices integral to social change in different historical and cultural contexts. These practices are examined in terms of their form, content, production, and reception from interdisciplinary perspectives.

Cross-listed to: ES/ENVS 2122 3.00, FA/FACS 2122 3.00

ES/ENVS 2150 3.00 Environment, Technology and Sustainable Society. The course introduces the various technical, socio-political and philosophical issues associated with the concept of sustainable society. Emphasis is placed on the analysis of the complex relationship between humans, technology, nature, ideology and the social infrastructure. Prerequisite: Second-year standing or by permission of the instructor. Note: ES/ENVS 2150 3.00 is not open to ES/ENVS students.

ES/ENVS 2200 6.00 Foundations of Urban and Regional Environments: Analysis, Planning, and Design. Focuses on the interrelationships of the ecological, social, built and organizational environments within the urban and regional setting. It provides a critical understanding of urban and regional environments along with a solutions-based approach to addressing urban and regional issues with an explicitly environmental perspective. With the Greater Toronto Area as a field laboratory, there will be an emphasis on application and involvement. Prerequisite: Second year standing or permission of the instructor. Course credit exclusion: ES/ENVS 2200 3.00.

ES/ENVS 2300 6.00 Foundations of Environmental Politics: Development, Globalization, and Justice. Examines how communities and environments are being dramatically transformed by the globalization of economies and cultures. It analyzes the reasons for this transformation as well as responses to them at local, regional, national and international levels. It explores competing approaches to environmental politics, development and justice that are being formulated and put into practice by

a variety of governmental, non-governmental and international actors. Prerequisite: Second year standing or permission of the instructor. Course credit exclusion: ES/ENVS 2300 3.00.

ES/ENVS 2400 6.00 Foundations of Environmental Management: Policy, Resources and Conservation. Drawing on the natural and social sciences, this course examines the role of policy and management strategies in addressing environmental, nature resource and conservation challenges, in ways supportive of sustainable development. It provides an overview of the concepts, knowledge and skills that are needed to be effective in environmental policy and management in government, business and not-for-profit sectors. Prerequisite: Second-year standing or by permission of the instructor. Course credit exclusion: ES/ENVS 2400 3.00.

ES/ENVS 2410 3.00 The Science of Pollution: Impacts on the Environment and Human Health. Introduces students to the major scientific concepts and principles that govern the origin, fate and effect of pollutants in the environment. Topics include fossil fuel and alternative energy sources, atmospheric pollution, heavy metal and pesticide toxicology, organic sewage, and endocrine disrupters. Further objectives of this course are to develop students' ability to analyze, manipulate, present and interpret scientific data and to develop the students' ability to review and critique scientific reports on scientific problems. Prerequisite: Second year standing and permission of the instructor. Course credit exclusion: ES/ENVS 2500 6.00.

ES/ENVS 2420 3.00 Ecology and Conservation Science. Presents the main scientific concepts and principles of ecology and conservation science that are applicable to environmental problems frequently encountered in Environmental Studies. Topics include diagnosing species declines, conservation genetics, ecology of invasive species, habitat fragmentation, national parks, and ecotourism. Prerequisite: Second year standing and permission of the instructor. Course credit exclusion: ES/ENVS 2500 6.00.

ES/ENVS 3000 3.00 Environmental Ethics and Epistemology. This course identifies, examines, and compares ethical perspectives from diverse traditions with a particular focus on the interplay of ethics and epistemology, and metaphysical issues and their relationship to underlying cultural, environmental, and spiritual values. Individual ethics and practical applications in "living a good life" will be explored. Prerequisite: Third or fourth year standing and completion of six credits in ES/ENVS, or permission of the instructor.

ES/ENVS 3010 3.00 Qualitative Methods in Environmental Studies. After a discussion of the logic of qualitative research, selected qualitative methods will be examined in detail. Topics include: field research, participant and non-participant observation, interviews, oral history, field experiments, participatory action research, non-obtrusive research, grounded theory and the analysis of qualitative data. Prerequisite: Third or fourth year standing and completion of six credits in ES/ENVS, or permission of the instructor. Course credit exclusion: ES/ENVS 2010 6.00, ES/ENVS 2010 3.00.

ES/ENVS 3011 3.00 Introduction to Senior Honours Work. Prepares students for their fourth year Senior Honours Work around selected interdisciplinary themes proposed by faculty members around their research interests. Sections organized by faculty members will explore appropriate methods and will help students develop proposal for major papers or major projects that relate to the theme. This course lays the groundwork for ES/ENVS 4000 6.00, Senior Honours Work Seminar. Prerequisite: Third-year standing with ES/ENVS as Major 1. Note: Third year standing means that the student has completed 54 or more credits that are eligible towards a BES degree. This course is a prerequisite to ES/ENVS 4000 6.00 Senior Honours Work Seminar.

ES/ENVS 3110 3.00 Scientific Knowledge and Environmental Issues. Explores links between environmental science and its application to identifying and resolving environmental issues. It starts with an examination of the nature of scientific knowledge. Case studies then critically examine scientific knowledge, in particular how environmental scientific knowledge, has or has not affected environmental policies, environmental programs and the state of the environment and how they, in

turn, affect the production of scientific knowledge. Prerequisite: Third or fourth year standing and completion of six credits in ES/ENVS, or permission of the instructor.

ES/ENVS 3120 3.00 Environmental History. Examines the culture-environment relationship in historical perspective. The focus is on ways in which social change is triggered by environmental change and vice-versa. Case studies illustrate general patterns of change, such as those associated with the introduction of alien species, new modes of agricultural production. Prerequisite: ES/ENVS 2100 3.00, or ES/ENVS 2100 6.00, or permission of the instructor.

ES/ENVS 3122 3.00 Community Arts Practice Preparatory Workshop. Lays the groundwork for the fourth-year Community Arts Practice Practicum (ENVS 4122/FACS 4122 6.00). Students identify socially-based projects with cultural organizations or community groups and negotiate an agreement to develop a collaborative cultural production over the subsequent year. Prerequisite: FA/FACS 2122 3.00. Community Arts for Social Change.

Cross-listed to: ES/ENVS 3122 3.00, FA/FACS 3122 3.00

ES/ENVS 3125 3.00 Popular Education for Environmental and Social Justice. Students explore the key notions of popular education related to knowledge and power, and various forms of anti-oppression practice addressing racism, sexism, classism, homophobia, ableism, and human/non-human domination in the context of organizations and movements for social and environmental justice in a globalizing and diasporic context.

ES/ENVS 3130 3.00 Energy & The Environment. The course focuses on relationships between socio-economic development, energy use, and the environment in Canada. Energy sources, energy end use, energy technology, and energy institutions as well as the social and ecological impacts of energy use are examined. Energy systems supportive of sustainable development are explored. Prerequisite: Third or fourth year standing, or permission of the instructor.

ES/ENVS 3140 3.00 Environmental and Sustainability Education. Explores concepts and practices in environmental education in the widest sense, comprising formal, informal and aboriginal education ideas. The course takes a critical and historical and cultural approach to environmental education with an emphasis on developing and practising sustainable perspectives on how people learn about, think about and remember the natural environment. Prerequisite: Third or fourth year standing, or permission of the instructor.

ES/ENVS 3150 3.00 Human/Non-Human Animal Relations. Dwelling within the emergent field of animal studies, this course will consider a diverse range of human relationships to other animals. The foundation of the course is a contemporary, post-Cartesian vision of animals, with an emphasis on the relational knowledge that is made about, and between humans and other animals from a cultural and environmental studies perspective. The course enables students to develop a creative and rigorous engagement with some of the complex dimensions of such issues as: the historical and philosophical scope of animals studies; animal agency, sociality and consciousness; animal representations in literature, the arts and popular culture; animal advocacy, social movements and humane education; and animal questions in science and technology. Prerequisite: Third or fourth year standing, or permission of the instructor.

ES/ENVS 3151 3.00 Environmental Politics & Advocacy I. Introduces students to a range of approaches and issues in environmental politics and advocacy. Themes include: political dimensions of contemporary environmental problems; main currents in environmental political thought; and relations between governmental and non-governmental organizations in environmental advocacy. Prerequisite: Third or fourth year standing and completion of any environmental studies course, or permission of the instructor.

ES/ENVS 3160 3.00 Race/Racism and Environmental Justice. Examines the intersection of "race"/racism and environmentalism. It begins from the premise that environmental issues are always already racialized. Issues as diverse as toxic facility siting, environmental assessment practices, ecological philosophies, and popular nature representations (re)produce powerful assumptions that turn on racist/

racialized constructs. Discussion may include: the history and current practices of environmental justice movements; questions of race and representation in green politics; the significance of environmentalism's silence about race; cross-cultural and anti-racist environmental politics; and postcolonial perspectives on global environmental issues. Prerequisite: Third or fourth year standing.

ES/ENVS 3170 3.00 Indigenous Environmental Thought. This course will explore various Traditional Aboriginal processes of "coming to know" the environment. Students will be guided through an examination of these Aboriginal relationships, as they existed traditionally, through times of critical change, and into the present. The underlying theme of this course will focus on individual, regional, and national ways of "being and becoming" environmentally responsible moving outwards towards a Global responsibility. Prerequisite: Third or fourth year standing, or permission of the instructor. Pre-requisite: 3rd/4th year standing or permission of the instructor.

ES/ENVS 3225 3.00 Regional Governance. Regional governance includes the government and civic organization of all aspects of life in an (urban) region. This course introduces concepts of the region, regionalism, regional government, and regional economic development. While the course has an international perspective, there will be a strong focus on historical and current regional governance in the Toronto urban region. Particular attention will be paid to issues related to environmental governance, bioregional issues and watershed planning and management. Prerequisite: Third or fourth year standing, or permission of the instructor. This course builds on ENVS 2200 6.00 which is recommended.

ES/ENVS 3226 3.00 Planning Environmentally. This course considers the potential for planning environmentally both within and outside the formal planning processes, and by and planners and non-planners alike. The relationships between planning and environmental issues are explored at different scales ranging from the neighbourhood to the urban region. Prerequisite: Third or fourth year standing, or permission of the instructor. This course builds on ENVS 2200 6.00 which is recommended.

ES/ENVS 3230 3.00 Restoration Ecology. This course explores the theoretical, biophysical and applied dimensions of restoration ecology. The course examines the circumstances surrounding policy, design and planning, and implementation of ecological restoration. It investigates many approaches (techniques and methods) enhancing the ecological integrity of degraded sites. The regional focus of the course is the Greater Toronto bioregion though lessons and experiences will relate to broader issues of ecological restoration.

ES/ENVS 3310 3.00 Tropical Conservation and Sustainable Development. A study of the theory and practice of conservation as applied to sustainable development in tropical environments. Emphasis on the integration of ecological, cultural and institutional dimensions in conservation practice for sustainability. Prerequisite: Third or fourth year standing and completion of six credits in ES/ENVS, or permission of the instructor.

ES/ENVS 3320 3.00 Sex, Gender, Nature: Ecofeminist Perspectives. This course acquaints students with literature and advocacy that celebrates 'intersections' between women/gender and nature. Attention is given to various approaches, and biological, social, cultural and spiritual perceptions, through course activities involving experience, reflection, creative representation, reading, discussion, and writing.

ES/ENVS 3340 3.00 Global Environmental Politics. Examines the interrelationship between globalization and environment. It analyzes the historical development of the global environmental system and theoretical approaches to understanding the global environment. It considers the main actors, institutions and legal instruments related to global environmental issues. The environmental impacts of, and political responses to, such phenomena as global warming, trade, structural adjustment, transnational corporate activity, foreign aid, environmental security, and biodiversity depletion are studied. Prerequisite: Third or fourth year standing and completion of six credits in ES/ENVS, or permission of the instructor.

ES/ENVS 3410 3.00 Environmental Policy I. The formulation of environmental policy is the focus its underlying scope, concepts, legal bases, methodologies. Case studies illustrate the interaction of environmental policy with other policy areas: foreign and trade policy, economic and social policy. Critical review of how policy is created participants, effects, burdens and benefits. Prerequisite: Third or fourth year standing, or permission of the instructor.

ES/ENVS 3420 3.00 Environmental Law. Introduction to basic legal concepts: sources of law, legal remedies, common law, administrative law. Planning acts, environmental protection acts and environmental assessment acts. Litigation processes, hearing boards, and their operation. Critical review of environmental legal concepts and their social, economic and environmental effects. Prerequisite: ES/ENVS 2400 3.00, or ES/ENVS 2400 6.00, or permission of the instructor.

ES/ENVS 3430 3.00 Environmental Assessment. Provides a critical overview of the theory and practice of environmental assessment (EA). Course objectives include gaining familiarity with the fundamentals of EA; exploring substantive and process-oriented issues through case studies; and practising methods and techniques. EA is examined broadly as a management and decision-support tool with applications at the project, planning and policy levels. Prerequisite: Third or fourth year standing and completion of six credits in ES/ENVS, or permission of the instructor.

ES/ENVS 3440 3.00 Resource Management. Current theories of resource management, methods, information and decision-making are reviewed critically. Ethical, cultural, social and economic perspectives on resource management are explored through case studies. Prerequisite: Third or fourth year standing and completion of six credits in ES/ENVS, or permission of the instructor.

ES/ENVS 3450 3.00 Environment and Health: Social and Political Dimensions. The overall purpose of this course is to develop a broader and critical framework that can be used to understand how human health is influenced by the larger cultural, ecological and political-economic forces at work in contemporary society. Topics include: socio-political aspects of toxicological risk management, environmental epidemiology, the precautionary principle, and social movements and environmental health. Prerequisite: Third- or fourth-year standing and completion of six credits in ES/ENVS, or by permission of the instructor.

ES/ENVS 3510 3.00 Environmental Economics. The application of economic principles to environmental issues is introduced and critically reviewed. Linkages between economic factors, social processes and natural environments are explored. The use of economic principles in deriving solutions to issues of pollution control, resource depletion, and environmental regulation is explored. Prerequisite: Third or fourth year standing and completion of six credits in ES/ENVS, or permission of the instructor.

ES/ENVS 3520 3.00 Applications of Geographic Information Systems in Environmental Studies. Provides students with an introduction to the application of Geographic Information Systems (GIS) as they are commonly used to address contemporary environmental issues. Various applications, techniques and theoretical frameworks are presented to provide a critical appreciation of this geo-spatial technology. Students gain hands-on experience using industry standard software products and associated technologies (ie. Global positioning systems) to increase their ability to apply these computer-based methods of geographic inquiry. A wide range of case studies, research projects and laboratory assignments are used to demonstrate the principles of the growing area of study. Prerequisite: Third or fourth year standing and completion of six credits in ES/ENVS, or permission of the instructor.

ES/ENVS 3521 3.00 Environmental Remote Sensing. This course represents an introduction to the methods in which remote sensing data are collected, processed and analyzed. An emphasis is placed on environmental applications. The synergy between the technologies of remote sensing and geographic information systems (GIS) is also stressed. Two lecture hours, two laboratory hours. One term. Prerequisites: AP/SC/GEOG 2420 3.00 or ES/ENVS 2010 6.00 and one 2000-level environmental studies theme foundation course; or written permission of the course director. Course credit exclusions: None. PRIOR

TO FALL 2009: Prerequisites: AS/SC/GEOG 2420 3.00 or ES/ENVS 2010 6.00 and one 2000-level environmental studies theme foundation course; or written permission of the course director. Course credit exclusion: AS/ GEOG 3440 3.00.

Cross-listed to: AP/GEOG 3440 3.00, ES/ENVS 3521 3.00, SC/GEOG 3440 3.00

ES/ENVS 3710 3.00 Landscape Ecology. This course examines the interactions between ecological processes and spatial patterns. It reviews the basic principles of ecology and ecological interactions. It emphasizes applied and theoretical approaches to study landscape ecology patterns and dynamics of ecosystems, and ecological processes, and the implications for degraded environments.

ES/ENVS 3740 3.00 Urban Ecology. This course examines the challenges and potentials of incorporating ecological factors in urban systems. Lectures, field trips, readings and discussion provide the framework for the understanding of natural processes and cultural patterns and practices in the urban landscape. Functional and structural contexts are examined in relationship to the dynamics of natural urban ecosystems. Different urban environments and design projects provide a framework of systemic inquiry, criticism and interpretation.

ES/ENVS 3760 3.00 Plant Ecology. This course provides an introduction to a broad range of native plants through their particular relationships to plant communities, physiological characteristics, environmental conditions and patterns. Basic concepts of plant ecology are reviewed prior to intensive field visits emphasizes plant identification, dynamics and distribution in various natural and/or urban ecosystems and plant communities.

ES/ENVS 3800A 3.00 On the move: A new world of migration and transnationalism. This course focuses on the relationships between globalization, international migration, and transnationalism. Students will gain insight on theories of migration, the construction of cultural and political identities, and how power relations shape movements through space. By identifying the Greater Toronto Area as a key transnational site, students will be given the opportunity to share their own migrant experiences and/or everyday transnational lives. Prerequisite: Third or fourth year standing or permission of the instructor.

ES/ENVS 3800K 3.00 Business and Sustainability: Issues and Strategies. An introduction to key dimensions of business and sustainability including: what is sustainability?; "values-driven" business models and practices; eco-production in key economic sectors (food, manufacturing, energy, building); financing sustainability; indicators of sustainability; green regulation; and green business strategies.

ES/ENVS 3800L 3.00 Urban and Regional Infrastructures: A Critical Introduction. An introduction into urban and regional infrastructures. With special attention to environmental concerns, the course examines the history of and current issues surrounding hard (water, transportation, etc.) and soft (social) infrastructures in current urbanization processes.

ES/ENVS 3800M 3.00 Climate Change: Policy and Adaptation. The course examines why climate change has become an important issue; the role of scientific uncertainty in the policy debates; how, where and when climate change is likely to affect societies and what can be done to reduce emissions; prospects for enhanced sinks and adaptation; and the potential risks associated with a changing climate. Recent domestic and international policy initiatives will be examined.

ES/ENVS 3800N 3.00 Urban Planning and Practice in the Global South. This course conceives a conceptual approach to studying urban planning and practice in Third World countries, considering the planning practice's response to the problems and issues in cities of these countries. It also examines the origin and evolution of urban planning practice.

ES/ENVS 3800Q 3.00 Policies for Transition: Alternative Vehicles and Fuels in Canada. This course addresses the technical, socio-economic, environmental and policy issues relating to the transition from the current petroleum-based transportation system. It also explores the role of alternative transportation technologies in shaping a sustainable transportation future in Canada and around the world.

ES/ENVS 3800Y 3.00 Contesting Place: Art in the Urban Environment. This course critically explores the meaning of place and cultural representations of urban places through a specific focus on public art in global cities. Providing an overview of a wide variety of public art practices, including historical monuments, community plays and site-specific murals, the course raises critical questions about the significance of place in a transnational age and the role of art in urban placemaking. Key themes are: representations of place in diasporic contexts, the role of public art in the "world class" city, and Indigenous reclamations of urban places.

ES/ENVS 3810A 6.00 International Field Experience: Ecology and Sustainability in Costa Rica. The study, through direct field observation, of the theory and principles of ecology as these apply to sustainable development in tropical environments, specifically in Costa Rica. Note: This course is only open to students who are selected to participate in International Field work. Course credit exclusion: ES/ENVS 4810A 6.00.

ES/ENVS 3900 3.00 Directed Reading. Directed reading and directed study courses are intended for enrolment by BES major students who wish to pursue intensive individual work with a particular Faculty of Environmental Studies faculty member on a specific topic of study.

ES/ENVS 3900 6.00 Directed Reading. Directed reading and directed study courses are intended for enrolment by BES major students who wish to pursue intensive individual work with a particular Faculty of Environmental Studies faculty member on a specific topic of study.

ES/ENVS 4000 6.00 Senior Honours Work Seminar. Students develop their own interests in the context of a collaborative project around select themes led by a faculty member's research interests, connected with the areas of concentration, and developed through a seminar. Includes multiple approaches and outcomes within two broad categories: (1) major paper (research paper, synthesis paper, literature review, content analysis, literary work, etc.), (2) major project (workshops, cultural productions, studio, field project, etc., and accompanied by a reflection paper).

ES/ENVS 4011 3.00 Food, Land and Culture. Examines food, land, and culture from a critical interdisciplinary environmental perspective. Students have the opportunity to pursue their own interests related to food politics, planning, sustainable and alternative agriculture, human-animal relationships and ethics, from a local and or global perspective. Prerequisite: Fourth year standing and completion of six credits in ES/ ENVS, or permission of the instructor.

ES/ENVS 4041 6.00 Alternative Economic Firms and Arrangements. This course investigates alternatives to capitalist corporations that are characterized by some degree of mutuality, such as co-operatives and worker-owned firms. Key issues examined include the competitiveness of alternatives and their desirability on other grounds, including contributions to local economic development. Course credit exclusions: None. PRIOR TO FALL 2009: Course credit exclusion: AS/SOSC 4041 6.00.

Cross-listed to: AP/SOSC 4041 6.00, ES/ENVS 4041 6.00

ES/ENVS 4100 3.00 Environmental Literatures. This course will explore the role of literature and literary criticism (including ecocriticism) in interpreting, creating, and transforming environmental discourse and politics. It will take up questions concerning the historical development of environmental and nature writing, and will explore a variety of contemporary genres that call older traditions to account. Through the close reading of a diverse collection of literary texts (poetry, novels, short stories, plays, etc.), we will examine and practice a number of different approaches to defining, reading, and critiquing environmental literatures. Prerequisite: Third or fourth year standing, or permission of the instructor. This course builds on ENVS 1800 6.00 which is recommended.

ES/ENVS 4110 3.00 Conservation Biology. This course explores the role of biological science in efforts to conserve natural resources, systems and the organisms therein. Two lecture hours, three laboratory hours. One term. Three credits. Prerequisites: SC/BIOL 2010 4.00; one of SC/BIOL 2030 4.00, SC/BIOL 2031 3.00; SC/BIOL 2040 4.00; SC/BIOL 2050 4.00; or permission of the instructor.

Cross-listed to: ES/ENVS 4110 3.00, SC/BIOL 4245 3.00

ES/ENVS 4111 3.00 Biodiversity. We do not know the number of species on Earth, even to the nearest order of magnitude. This course discusses the factors that influence the number of species in an area and the importance of biodiversity to humanity. Two lecture hours, three laboratory hours. One term. Three credits. Note: Completion of 60 credits required, towards a degree in biology or environmental science or environmental studies, or permission of the instructor.

Cross-listed to: ES/ENVS 4111 3.00, SC/BIOL 4255 3.00

ES/ENVS 4120 3.00 Natural History. Explores the beliefs, theories and practices of naturalists, through readings as well as visits to sites of natural history. It examines the ways in which current approaches to natural history are products of the historical development of the field, and reflect assumptions regarding scientific knowledge formation and practice.

ES/ENVS 4122 6.00 Community Arts Practice Practicum Seminar. Provides students with an opportunity to implement proposals developed in the third-year Community Arts Practice Preparatory Workshop (ENVS 3122/FACS 3122) by immersing them directly in a creative production in collaboration with cultural and/or community organizations to educate and advocate around social-political issues. Prerequisite: FA/FACS 2122 (3.00) and FA/FACS 3122 (3.00).

Cross-listed to: ES/ENVS 4122 6.00, FA/FACS 4122 6.00

ES/ENVS 4123 3.00 Environment and Behaviour. Introduction to the study of human responses to the environment. Emphasis is on built social and natural aspects of environment. Examples are drawn from environmental psychology, environmental sociology, behavioural geography, and environmental health.

ES/ENVS 4140 3.00 Environmental Thought. An introduction to diverse ways of seeing and understanding nature. An historical perspective on the development of environmental thought leads to an exploration of various perspectives and critiques of the standard scientific and technological approaches to understanding nature, as offered by alternative schools of thought such as humanists, deep ecologists and ecofeminists. Prerequisite: ES/ENVS 2100 3.00, or ES/ENVS 2100 6.00, or permission of the instructor.

ES/ENVS 4151 3.00 Environmental Politics and Advocacy II. Focuses on current developments in politics and advocacy on environmental issues. Topics may include: recent trends in political theory; the impact of globalization on environmental advocacy; and the rise of "new" social and environmental movements. Prerequisite: ES/ENVS 3151 3.00 or permission of the instructor.

ES/ENVS 4161 3.00 Social Movements, Activism and Social Change. This course examines new social movements that have arisen in response to the crisis of industrial culture, economic restructuring, shifting political formations, and ecological disasters. The course focuses on current theories of social movements, contested issues, and case studies of social movements in action and is intended to provide opportunities for students to gain first hand experience with social movement organizations through participatory research projects. Prerequisite: Fourth year standing, or permission of the instructor.

ES/ENVS 4205 3.00 HIV and Globalization: Where do we go from here? This course will study the AIDS pandemic in the context of the uneven impact of globalization processes. Our framework for understanding 'global AIDS' will stretch beyond biomedical and behavioral theories. We will focus on the social and environmental determinants of HIV risk through an examination of the structural barriers to health protection. Prerequisite: Third or fourth year standing or permission of the instructor.

ES/ENVS 4210 3.00 Global Populations: Critical Environmental Perspectives. Examines the trends, causes and consequences in population growth and movements across the globe. It studies the environmental impacts of rises in population, global refugee and immigration patterns and their socio-environmental consequences, and the influence of new immigrants and 'diasporas' on national identity and

culture. Case studies explore existing and alternative family planning policies, the enhancement of women's status through educational, health and employment strategies, and immigration and multicultural policies in developed and developing countries. Prerequisite: Third or fourth year standing and completion of six credits in ES/ENVS, or by permission of the instructor.

ES/ENVS 4215 3.00 Globalization and Indigenous Peoples. Indigenous peoples are distinct communities who have experienced the processes of globalization in particular ways. This course reviews the global historical processes of imperialism and colonialism and their legacies of racism, assimilation and marginalization. The course then examines Indigenous peoples' resistance to globalization and engagement with global networks and institutions, in order to protect their cultures and assert their rights. Pre-requisite: 3rd/4th year standing or permission of the instructor.

ES/ENVS 4220 3.00 Urbanization in Developing Countries. The key issues of cities in the Third World are addressed, including squatter settlements, rural-urban migration, urban agriculture, housing, urban transport, basic services (water, sanitation, waste management, health and education), urban governance, socio-cultural diversity, and urban environmental planning. Case studies demonstrate public policies and their link to socio-economic, cultural and environmental issues. Prerequisite: Third or fourth year standing and completion of six credits in ES/ENVS, or by permission of the instructor.

ES/ENVS 4223 3.00 Global Cities. This course offers an introduction to the literature on global cities and a systematic review of a distinct field of research in urban studies which concerns itself with the globalization of a network of global or world cities. Prerequisite: Fourth-year standing or permission of the instructor.

ES/ENVS 4225 3.00 Urban Sustainability I. A conceptual approach to defining "sustainability" for urban areas, considering patterns of land use, human activities, natural systems and needed rehabilitation. Concepts such as urban ecology, social ecology, the ecological footprint, etc. will be discussed. Social sustainability, environmental justice, and urban governance are central to the course design. Case studies explore ways of making urban areas more sustainable. Prerequisite: ES/ENVS 3225 3.00, or by permission of the instructor.

ES/ENVS 4226 3.00 Urban Sustainability II. A pragmatic approach to the problems of urban sustainability. First, it looks at how urbanism shapes perceptions of nature and how environmental and social values are linked; second, how a broadly based ecological view of cities is necessary to their environmental and social health; third, the main part of the course is concerned with how the application of ecological processes to urban design can influence urban form and increase sustainability. Prerequisite: ES/ENVS 3225 3.00, or by permission of the instructor.

ES/ENVS 4230 6.00 Design for Sustainability in the Built Environment: Interactive Workshop. This course explores the principles and best practices in sustainable building design and sustainable development in an urban context. It takes an international perspective on the issues. The interactive workshop format actively engages students to collaborate in small groups to complete exercises and to plan and participate in an inter-disciplinary design charrette. NOTE: This course is held off-site at the Kortright Centre in Woodbridge. Prerequisite: Third or fourth-year standing and by permission of the instructor only.

ES/ENVS 4312 3.00 Global Justice & International Humanitarianism. In the context of international humanitarianism and advocacy, this course provides a general introduction to international justice, drawing on basic philosophical ethics. It begins with theoretical schools of thought to then enable students to apply ethical analysis to particular controversies. Prerequisite: ES/ENVS 3000 3.00, or any second or third year Political Science course dealing with global peace or social justice, or by permission of the instructor. Course credit exclusions: ES/ENVS 4311 3.00. PRIOR TO FALL 2009: Course credit exclusions: AS/POLS 4212 3.00, AS/POLS 4311 3.00.

Cross-listed to: AP/POLS 4212 3.00, ES/ENVS 4312 3.00

ES/ENVS 4315 3.00 Humanitarian Crises and Action. Humanitarian crises, causing or threatening mass deaths, include environmental disasters, famines, epidemics, mass persecution and displacement, genocide and war. Reactive, reconstructive and preventive humanitarian action and its organizational forms and context are examined in relation to the descriptive and causal analysis of crises. Complex emergencies are emphasized. Cases, recurrent patterns and relevant theories are covered. Prerequisite: Third or fourth year standing and completion of 6 credits in Environmental Studies, International Development, Global Studies or International Relations (Political Science) or by permission of the instructor.

ES/ENVS 4320 3.00 Gender & Development. The course presents an overview of gender and development analysis as a framework for considering the role of women in third world development. Consideration of theories and concepts leads to case studies illustrating issues and practices. Prerequisite: Fourth year standing, or permission of the instructor.

ES/ENVS 4410 3.00 Environmental Policy II. Presents a "theory" of policy development, covering the roles of various groups such as the public, NGOs, the media and industry and applies the "theory" to the processes of international Conventions and Protocols. These include the Canada/US Boundary Waters Treaty, and the Canada/USA Air Quality Accord. Covers some of the mechanisms that use environmental science to establish Convention on Substances that Deplete the Ozone Layer, the Convention on Biological Diversity, the Framework Convention on Climate Change and the Kyoto Protocol.

ES/ENVS 4420 3.00 Environment, Media, Culture and Communication. Media and communication technologies both shape and are shaped by cultural constructs, institutions and practices. This course will examine how the environment is framed and contested through dominant and alternative media, applying critical media, communication, and cultural studies theories (such as political economy, textual analysis, and audience reception). A variety of media forms will be explored (print and broadcast, photography and video, Web-based and digital media, spoken word and performance, etc) through active critique and creative cultural production. Prerequisite: Third or fourth year standing and completion of six credits in ES/ENVS, or permission of the instructor.

ES/ENVS 4421 3.00 Environmental Law & Justice: Stories and Struggles. This course examines and evaluates how contemporary advocates employ law to protect the environment, secure equal access to environmental health, and contribute to social justice. Prerequisite: ENVS 3420 3.00, or permission of the instructor.

ES/ENVS 4430 3.00 Impact Assessment Process & Practice. The current processes and practices of environmental and social impact assessment are critically reviewed through case studies. Emerging conceptual and methodological issues in the field are explored in the context of actual practice situations. Prerequisite: ES/ENVS 3430 3.00, or permission of the instructor.

ES/ENVS 4440 3.00 Environmental Disasters. The overall objective of this course is to gain an understanding of the causes and responses to natural and technological disasters. An in-depth examination of various case studies of disasters will be used to illustrate the principles involved. Topics include the history of disaster research, emergency management, normal accidents, and the psychosocial impacts of disasters. Prerequisite: Third or fourth year standing and completion of six credits in ES/ENVS, or permission of the instructor.

ES/ENVS 4442 3.00 Environmental Monitoring and Auditing. Concepts of environmental monitoring and auditing are presented through lectures, projects and field trips. Emphasis is placed on understanding the categories and objectives of environmental monitoring that routinely provide much of the scientific understanding needed to resolve environmental problems. Students gain a detailed knowledge of national and international monitoring networks and how the results are being applied to current environmental issues such as climate change and biodiversity. Attention is given to the use of monitoring data in establishing "Environmental Indicators". Prerequisite: Third or fourth year standing and completion of six credits in ES/ENVS, or permission of the instructor.

ES/ENVS 4445 3.00 Environmental Conservation in Ontario: Policy and Applications. Examines current and emerging conservation policy and conservation applications in Ontario, including the Greater Toronto Area. Examples of conservation in Ontario to be critically examined include: Protected areas policy, regulatory frameworks, Ontario's Conservation Authorities, land stewardship, citizen engagement with conservation, heritage trusts, the Bruce Trail Association, ecotourism and protection of biodiversity in Northern Ontario. Prerequisite: Third or fourth year standing and completion of six credits in ES/ENVS, or permission of the instructor.

ES/ENVS 4446 3.00 Protected Area Management. This course will explore protected area management, which is a form of environmental management focusing on an area of land and/or freshwater/sea especially dedicated to the protection and maintenance of biological diversity, and of natural and associated cultural resources, and managed through legal or other effective means. Prerequisite: Third or fourth year standing and completion of six credits in ES/ENVS, or permission of the instructor.

ES/ENVS 4447 3.00 Northern Ecosystems: A Natural History of Arctic Regions. This course examines the interactions between species and their environment in northern terrestrial and marine habitats. We review the postglacial history, climate, and energy flow in boreal and arctic ecosystems and examine evolutionary adaptations to cold, highly-seasonal environments. We consider strategies for wildlife management and conservation and the threats posed by climate change, resource development, and pollution. Prerequisite: Third or fourth year standing and completion of ENVS 1500 6.00, or by permission of the instructor.

ES/ENVS 4450 3.00 Environmental Management and Policy in Practice. Explores the role, existing and future, of environmental policy and management to address environmental challenges through case study analysis of topical Ontario and Canadian environmental issues. Such issues include: Canada's response to the Kyoto Accord and global climate change; air quality in Southern Ontario; drinking water quality in Ontario. Will include field trips and guest lectures. Prerequisite: Third or fourth year standing and completion of six credits in ES/ENVS, or permission of the instructor.

ES/ENVS 4455 3.00 Information Technology: Applications in Environmental Management. Examines the impact of information technology on various aspects of civil society with a special emphasis on environmental management and community sustainability. It focuses on how various software and hardware systems such as Geographic Information System (GIS), Global Positioning System (GPS), remote sensing, modelling and simulation, and broadband Internet communications are being applied to learn about, characterize, and manage our physical environment. Also explores how software tools such as MapReflections, QUEST, e-Dialogues etc., are also being used to enhance our social infrastructure by enabling community-based participation, knowledge-sharing, and decision making. Prerequisite: Third or fourth year standing and completion of six credits in ES/ENVS, or permission of the instructor.

ES/ENVS 4510 3.00 Ecological Economics. Provides an introduction to the emerging field of ecological economics. Areas of focus include the appropriate scale of the economy in relation to the environment, the role of discount rates in mediating intergenerational and interspecies equity, environmental valuation, full-cost accounting, environmental risk assessment, and the application of thermodynamic and ecological principles in economic analysis. Prerequisite: Third or fourth year standing and completion of six credits in ES/ENVS, or permission of the instructor.

ES/ENVS 4520 3.00 Geographical Information Systems Applications in Environmental Studies. Focuses on advanced applications of Geographic Information Systems to topics related to planning and resource management. The technical aspects of GIS applications will be explored along with considerations related to database development. Students will gain hands-on experience with data input through scanners and digitizers, and with GIS analyses using both vector and raster data models. A significant part of the course will involve the development of a GIS database for analysis through group projects. Prerequisite: ES/ENVS 3520 3.00, or the permission of the instructor.

ES/ENVS 4521 3.00 Remote Sensing and Image Processing for Geographical Analysis and Environmental Monitoring. Sophisticated methods and techniques for collecting, processing and analyzing remote sensing data are examined. Special topics include image enhancement techniques (e.g. texture transforms), non-traditional image classification and data integration for incorporation of remote sensing data products into geographic information systems (GIS). One and one-half lecture hours, one and one-half laboratory hours. One term. Prerequisite: AP/GEOG 3440 3.00 or ES/ENVS 3521 3.00 or SC/EATS 4220 3.00 or written permission of the course director. Course credit exclusions: None. PRIOR TO FALL 2009: Prerequisite: AS/GEOG 3440 3.00 or ES/ENVS 3521 3.00 or SC/EATS 4220 3.00 or written permission of the course director. Course credit exclusion: AS/GEOG 4440 3.00.

ES/ENVS 4522 3.00 Internet-Distributed Geographic Information System (GIS) for Public Engagement. This course examines the role of geo-spatial information technologies as applied public engagement activities. Students will review literature in areas of social theory, public participation and technology-mediated engagement techniques while developing applied knowledge through project design and implementation exercises. Prerequisite: Third or fourth year standing and completion of six credits in ES/ENVS, or permission of the instructor.

ES/ENVS 4523 3.00 Systems Thinking in Environmental Studies: Theory and Methodologies. This course addresses fundamentals of general and complex systems thinking (such as general systems theory, complex adaptive systems, chaos theory) major paradigms in systems thinking (functionalist, interpretive, emancipatory, postmodern), and their associated methodologies and applications in environmental studies.

ES/ENVS 4530 3.00 Risk Assessment in Resource Management. Theories and concepts of "risk" are discussed and evaluated critically with respect to public policy for the resources sector. The analytical framework employed distinguishes between risk estimation, risk evaluation, and risk management and communication activities. Resource management issues are analyzed with a focus on energy policy in Canada, in the context of environment-energy interactions. Normally offered in alternate years. Prerequisite: fourth year Honours standing in the Faculty of Environmental Studies or written permission of the instructor. Course credit exclusions: None. Prior TO FALL 2009: Prerequisite: AS/GEOG 3340 6.00 (prior to Summer 2002) or fourth year Honours standing in the Faculty of Environmental Studies or written permission of the instructor. Course credit exclusion: AS/GEOG 4160 3.00.

ES/ENVS 4700 6.00 Urban Ecologies Workshop. The workshop investigates a current urban landscape ecology issue in Toronto. This collaborative project-based workshop is designed to provide students with direct experience in urban ecology research, field investigation, analysis of relevant political, social, economic, environmental, and cultural dynamics, and consideration for alternatives improving the ecological infrastructure. Each year a different topic is selected as the basis for the workshop project.

ES/ENVS 4750 3.00 Political Ecology of Landscape. This course is structured around a critical analysis of historical and theoretical issues related to natural and urban landscapes. The emphasis of this course is on the development and transformation of landscapes as an expression of various social, cultural, physical, economic, political, artistic, technological, and ecological forces through space and time. Prerequisite: Third or fourth year standing and completion of six credits in ES/ENVS, or permission of the instructor.

ES/ENVS 4800B 3.00 Creativity and Cities in Urban Politics and Planning. This course links the current politics of urban planning ("revitalization"), culture and cultural workers, and urban place marketing. The overall aim is to critically examine notions of "creativity" and aesthetics in urban planning, design, cultural policy and community development. Through class discussions, presentations, films, walking tours, and

debates with visiting lecturers, we will explore the cultural, political, economic and social politics of these current trends. Prerequisite: Third or fourth year standing or permission of the instructor.

ES/ENVS 4800Q 3.00 Urban Development Process. Critical investigation of approaches to, and topics in, processes of urban growth, decline, development and redevelopment. 20th-century theories of urbanization are examined and their relevancy for understanding selected recent urban problems are studied. Prerequisite: Fourth year standing, or by permission of the course instructor.

ES/ENVS 4810A 3.00 International Field Course. Advanced study, through thorough literature review and direct field observation, of the theory and principles of ecology as these apply to sustainable development in tropical environments, specifically in Costa Rica. Note: This course is only open to students who are selected to participate in International Field work. Course credit exclusion: ES/ENVS 3810A 3.00

Students can double major or minor in European studies and an Honours BA program in the Faculty of Liberal Arts and Professional Studies. In European studies students learn to approach the study of Europe from an intercultural perspective and with an interdisciplinary approach. We define Europe as broadly as possible to include Eastern and Central Europe, the Balkans, Southeastern Europe, Russia and Turkey, as well as Western Europe. Our program encourages students to consider European

developments over a broad chronological sweep from the Middle Ages onwards and attaches equal importance to both humanities and social science disciplines. In consultation with the program coordinator, students design a program of study which meets their own particular interests by choosing from among the wide variety of courses offered at York. Where curricular resources suffice, students completing a major or a minor in European studies may focus on one of the following national streams: France, Germany, Great Britain, Greece, Italy, Portugal, Russia or Spain. (Other areas, such as Scandinavia, may be possible by means of study abroad or a letter of permission.) By successfully completing 18 credits within such a stream, students qualify for a sub-specialization which will be noted accordingly on the diploma and transcript. For example, a student might graduate in political science and European studies (Focus: Greece) or Italian and European studies (Focus: Italy), economics and European studies (Focus: Portugal), or history and European studies (Focus: Spain). Courses in the focus area may include language courses pertaining to the area of focus. Students who choose not to focus on a particular stream would graduate with a degree in European studies.

Programs of Study

York University's Department of Film enables students to explore the media of film through a program of studio (film and video production) as well as critical, historical and theoretical studies. An undergraduate can specialize in any one of the previously mentioned areas, but must take some courses in each area. All Honours film majors must complete 12 credits in historical and theoretical studies, FA/FILM 1400 6.00 and FA/FILM 2400 6.00, and at least 24 credits at the 3000 or 4000 level, of which at least half are within the student's area of concentration. Students concentrating in cinema and media studies will receive an Honours BA degree. They are required to complete a minimum of 48 credits in the department and must include FA/FILM 1410 6.00 along with their upper-level requirements FA/FILM 3410 3.00, FA/FILM 4800 3.00, and at least three further credits at the 4000 level. They must also complete at least six credits in production or screenwriting, FA/FILM 2040 6.00. Students concentrating in studio will receive an Honours BFA degree. They are required to complete a minimum of 60 credits within the department, of which 21 credits must be studio courses at the 3000 or 4000 level.

For studio students, the Film program encourages a blend of the conceptual areas of writing, directing and producing, while providing a professionally-oriented background in the creative crafts of cinematography, editing and sound. Our intention is to provide each

student with a marketable skill in addition to a broad education in film and video. Studio students should be aware that the department does not provide a full subsidy for the sometimes heavy cost of film and video production. Some courses have additional fees which cover part of the general cost of the courses but in most film production courses students will be required to purchase additional supplies at their own expense and to pay damage deposits. Due to facilities available, spaces in upper-year courses are limited.

Courses in Film

Some upper-year courses are not offered on an annual basis; some courses listed below may not be offered during the current academic session. Consult the Film Department office for further information.

FA/FILM 1001 3.00 Making Movies. Offers a D.I.Y. production course for non-majors where students learn the fundamentals of visual storytelling and self-expression, the role of sound, image and directorial authorship through hands-on filmmaking exercises in lectures and tutorials. Students must provide their own production equipment.

FA/FILM 1010 3.00 Introduction to Filmmaking I. Introduces the student through lectures, screenings, workshops, and guest visits to the concepts, formats and visual elements of the movie, and emphasizes ways in which film and videomakers translate ideas into moving images. Note: Required of all first-year BFA film majors. Enrolment is limited to BFA film majors. Corequisites: FA/FILM 1020 3.00, FA/FILM 1400 6.00.

FA/FILM 1020 3.00 Introduction to Filmmaking II. Offers instruction in the fundamental concepts, procedures and techniques of visual and audio production as an idea is taken from the script to the screen. Course work includes the production of several short projects in various formats. Students are required to purchase production materials. Corequisite: FA/FILM 1010 3.00, FA/FILM 1400 6.00. Note: Required of all first-year BFA film majors specializing in production and/or screenwriting. Enrolment is limited to BFA film majors.

FA/FILM 1121 3.00 Introduction to Screenwriting. Provides an overview of the role of storytelling in filmmaking practice, introducing students to the techniques used by screenwriters and directors as they engage with story in both fiction and non-fiction films and television programs and other moving picture media. Course credit exclusion: FA/FILM 1010 3.00

FA/FILM 1400 6.00 Film Art: An Introduction. Introduces the aesthetics, theory and history of film. Lectures concentrate on the elements of film, including narrative structure, visual composition and the uses of sound and editing. Documentary, experimental and feature films are encompassed. Note: Required of all film majors and minors. Corequisite: FA/FILM 1010 3.00, FA/FILM 1020 3.00. Course credit exclusion: FA/FILM 1401 6.00.

FA/FILM 1401 6.00 Introduction to Film (for Non-Majors). Provides a broad survey of the art and criticism of film. Students are introduced to some of the major films and movements that have come to define the evolution of cinema as a popular culture, political discourse and art form. Within an historical framework students will be introduced to the general vocabulary and syntax of film studies. They will also learn about the major technological innovations, aesthetic movements and political discourses that have underscored the development of cinema as a culture industry. Prerequisites: None. Designed for non-majors. Course credit exclusion: FA/FILM 1400 6.00.

FA/FILM 1410 6.00 Film History. Introduces students to the major periods and technological developments in film history from its origin in chronophotography to present understanding of 'world cinema'. The course will address some of the fundamental phases and international movements in cinema history, focusing on film as technology, institution and art form. A range of film genres (both narrative and documentary) and national cinemas representative of the aesthetic and economic contexts of global media cultures will be examined. The course will be framed by a variety of critical issues in film historiography.

FA/FILM 1701 3.00 Hollywood: Old and New. Offers a fully online introductory course that provides Web-based delivery of lectures and discussion groups complemented by the screenings and interviews of TVO's Saturday Night at the Movies. Key concepts in critical film analysis will be introduced and important themes in American film history will be examined. Students are asked to watch the two films per week screened on Saturday Night at the Movies and then to access lectures, post comments, and attend chat rooms via WebCT, a learning program for which they will be given access. Written assignments are to be submitted via the WebCT site.

FA/FILM 2010 6.00 Film & Video Production. Offers an intensive exploration of the techniques basic to film and electronic production. The emphasis is on producing several short subjects in both media for the widest possible experience and exploration of different forms in both media. Four hours. Prerequisites: FA/FILM 1010 3.00, FA/FILM 1020 3.00, FA/FILM 1400 6.00 and permission of the production committee. Corequisites: FA/FILM 2020 3.00, FA/FILM 2120 6.00, FA/FILM 2400 6.00 and FA/FILM 2170 3.00.

FA/FILM 2020 3.00 Technical Aspects of Filmmaking. Provides a step-by-step practical experience in creative and technical aspects of film and video production and post-production. Procedures and processes explored will include shooting and recording sound for film, lighting for film, and various aspects of post-production work with image and sound. In-class workshops, three hours per week. Prerequisites: FA/FILM 1010 3.00, FA/FILM 1020 3.00. Corequisite: FA/FILM 2010 6.00.

FA/FILM 2040 6.00 Video and Filmmaking. Provides theoretical and practical familiarization with small format video and filmmaking through lecture-demonstration and studio exercises. Working in groups, students will produce short projects in both media. Four hours. Note: Film students in the Specialized Honours BA program and the BA program must take either FA/FILM 2040 6.00 or FA/FILM 2121 6.00 as the required six studio credits. Not intended for students concentrating in film production. Prerequisite: Permission of the production committee.

FA/FILM 2120 6.00 Screenwriting Fundamentals (Production). Introduces the craft of screenwriting, taking a general view of screenwriting and its relationship to filmmaking, storytelling and writing. This course is a prerequisite for all upper-level screenwriting courses. Prerequisites: Film majors: FA/FILM 1010 3.00 or permission of committee. Open to Non-majors by permission of committee.

FA/FILM 2121 6.00 Screenwriting Fundamentals. Provides a broad introduction to the art and craft of screenwriting. Designed for students with a strong interest in the subject, but who are not enrolled in the BFA program in the Department of Film. Writing for film is very specific, both an art and a technical document. Students, through the examination of films, will discuss how film stories are told and the fundamental requirements to writing a script. However, unlike FA/FILM 2120, these scripts are not written to be produced and therefore do not cover the technical language of filmmaking (camera angles, production and crewing). This course is a prerequisite to all upper level screenwriting courses in the department of film. Course credit exclusion: FA/FILM 2120 6.00.

FA/FILM 2170 3.00 Production Planning & Management. Offers a practical course in film & video production planning including: script breakdown, scheduling, budgeting, financing, legal issues, collective agreements and administrative procedures. Additional fee required. Prerequisites: FA/FILM 1010 3.00, FA/FILM 1020 3.00, FA/FILM 1400 6.00. Corequisite: FA/FILM 2010 6.00, FA/FILM 2020 3.00, FA/FILM 2120 6.00, FA/FILM 2400 6.00. Course credit exclusion: FA/FILM 3170 3.00.

FA/FILM 2400 6.00 Film Theory. Provides an intensive study of the theories of film, with particular attention to montage, mise-en-scene, auteur, genre and other classical and contemporary conceptions; relevant readings and screenings of key films. Note: Required of film majors and minors. Prerequisite: FA/FILM 1010 3.00, FA/FILM 1020 3.00, FA/FILM 1400 6.00. Corequisites: FA/FILM 2010 6.00, FA/FILM 2020 3.00, FA/FILM 2120 6.00. Open to non-majors by permission of the Film Department.

FA/FILM 2401 6.00 Film, Television and Society. Examines the interrelationship between film and television and the societies in which they are produced and consumed. Attention is paid to the social relations and ideological and political characteristics of contemporary societies, as well as contemporary criticism which has analyzed these media. Course credit exclusions: None.

Cross-listed to: AP/HUMA 2740 6.00, FA/FILM 2401 6.00

FA/FILM 2600 6.00 Contemporary World Cinema. Provides a cross cultural exploration and history of world cinema produced from 1960 to the present. The course will study the major auteurs, movements and manifestos of (among others) the "cinema of garbage" and Cinema nuevo in Brazil, cinemas of liberation in Africa, magic realism in Latin America, cinema of exile, new social movements in developing world including new black cinemas in Britain, the Caribbean and North America and first nation aboriginal video and filmmaking. Prerequisites: none.

FA/FILM 3001 6.00 Fiction Project Workshop I. Explores the practice, aesthetics and theory of fictional narrative filmmaking. Students engage in practical exercises as well as discussions to prepare them to direct the main project of the course, a short, sync sound, colour narrative film. Prerequisites: FA/FILM 1010 3.00, FA/FILM 1020 3.00, FA/FILM 1400 6.00, FA/FILM 2010 6.00, FA/FILM 2020 3.00, FA/FILM 2120 6.00, FA/FILM 2400 and permission of the Film Department. Prerequisite or corequisite: FA/FILM 2170 3.00 Production Planning.

FA/FILM 3002 6.00 Documentary Project Workshop I. Explores the practice, aesthetics and theory of documentary film and video making, at an advanced level. Over the course of the year, students will engage in various preparatory practical exercises, culminating with the production of a short documentary on film and/or video. Prerequisites: FA/FILM 1010 3.00, FA/FILM 1020 3.00, FA/FILM 1400 6.00, FA/FILM 2010 6.00, FA/FILM 2020 3.00, FA/FILM 2120 6.00, FA/FILM 2400 and permission of the Film Department. Prerequisite or corequisite: FA/FILM 2170 3.00 Production Planning.

FA/FILM 3003 6.00 Alternative Project Workshop I. Provides a workshop environment for the development, production and post-production of a range of film and video projects, with an emphasis on works which cross boundaries through the use of innovative subjects, processes and approaches. Prerequisites: FA/FILM 1010 3.00, FA/FILM 1020 3.00, FA/FILM 1400 6.00, FA/FILM 2010 6.00, FA/FILM 2020 3.00, FA/FILM 2120 6.00, FA/FILM 2400 and permission of the Film Department. Prerequisite or corequisite: FA/FILM 2170 3.00 Production Planning.

FA/FILM 3120 6.00 Feature Screenwriting I. Focuses on the initial stages of writing a feature-length screenplay. Explores idea of development, story groundwork and principles of story structure. Leads students through craft challenges in the creation of a fully developed story outline. The first of two year-long courses. Prerequisite: FA/FILM 2120; or FA/FILM 2121 and permission of the Film Department.

FA/FILM 3124 3.00 Writing for Television I. Provides a focus on the craft of writing dramatic scripts (teleplays) for television and related media, and hands-on experience with working in a story department, culminating in each student's creation of an original one-hour prime time television series.

FA/FILM 3125 3.00 Screenwriting for Production. Building on FA/FILM 2120 6.00 Screenwriting Fundamentals, this course explores in more depth the craft of writing screenplays for short film and video projects, in particular projects geared for student production. Prerequisite: FA/FILM 2120 6.00, FA/FILM 2121 6.00 and permission of the Film Department.

FA/FILM 3125 6.00 Screenwriting for Production. Building on FA/FILM 2120 6.00 Screenwriting Fundamentals, this course explores in more depth the craft of writing screenplays for short film and video projects, in particular projects geared for student production. Prerequisite: FA/FILM 2120 6.00, FA/FILM 2121 6.00 and permission of the Film Department.

FA/FILM 3130 3.00 Editing Technique I. Examines the step-by-step practical experience in the editing of a synchronized dialogue sequence from the receipt of rushes to final mix including synching, edge-coding,

cataloguing, picture and sound editing, music and sound effects recording and transfer and re-recording. Additional fee required. Prerequisites: FA/FILM 2010 6.00 and permission of the Film Department.

FA/FILM 3135 3.00 Editing Techniques I. Explores the practice, aesthetics and theory of image editing. Over the course of the term, students will engage in a series of short exercises covering a variety of styles, genres and modes. Prerequisites: FA/FILM 1010 3.00, FA/FILM 1020 3.00, FA/FILM 1400 6.00, FA/FILM 2010 6.00, FA/FILM 2020 3.00, FA/FILM 2120 6.00, FA/FILM 2400 and permission of the Film Department. Prerequisite or corequisite: FA/FILM 2170 3.00 Production Planning.

FA/FILM 3155 3.00 Sound Techniques I. Explores all aspects of sound recording and design for film and video production, focusing on both theory and technique. The curriculum will cover techniques in location recording, and provide an overview of sound editing and sound mixing. Prerequisites: FA/FILM 1010 3.00, FA/FILM 1020 3.00, FA/FILM 1400 6.00, FA/FILM 2010 6.00, FA/FILM 2020 3.00, FA/FILM 2120 6.00, FA/FILM 2400 and permission of the Film Department. Prerequisite or corequisite: FA/FILM 2170 3.00 Production Planning.

FA/FILM 3160 3.00 Cinematography I. Provides an intensive study of the foundational elements of lighting, camera and photography, as they relate to film and video production. Prerequisites: FA/FILM 2010 6.00, FA/FILM 2020 3.00 and permission of the Film Department.

FA/FILM 3175 3.00 Production Planning & Management II. Examines the creative and financial role of the production team, including the Production Manager, Assistant Directors and the Location manager in detail. Students will apply these skills on a senior Fiction project during the course. Prerequisite FA/FILM 2170 3.00. Open to non-majors by permission of the Film Department.

FA/FILM 3180 6.00 Acting and Directing I - Basic Concepts and Technique. Guides developing directors towards an understanding of the process of acting. Understanding of the actor's process and territory is the first requirement of effective directing. Prerequisites: FA/FILM 1010 3.00, FA/FILM 1020 3.00, FA/FILM 1400 6.00, FA/FILM 2010 6.00, FA/FILM 2020 3.00, FA/FILM 2120 6.00, FA/FILM 2400 and permission of the Film Department.

FA/FILM 3210 3.00 The American Film I. Surveys the major events and significant trends involved in the development of American fiction and documentary film from its beginnings through the classical studies period. Four hours. Prerequisite: FA/FILM 1400 6.00 or permission of the course director. Course credit exclusions: None.

Cross-listed to: AP/HUMA 3909 3.00, FA/FILM 3210 3.00

FA/FILM 3211 3.00 The American Film II. Studies the development of American cinema since the Second World War including the break-up of the studio system, the changing styles of American feature films and of documentary since the advent of network television. Four hours. Prerequisite: FA/FILM 1400 6.00 or permission of the course director. Course credit exclusions: None.

Cross-listed to: AP/HUMA 3910 3.00, FA/FILM 3211 3.00

FA/FILM 3211 3.00 The American Film II. Studies the development of American cinema since the Second World War including the break-up of the studio system, the changing styles of American feature films and of documentary since the advent of network television. Four hours. Prerequisite: FA/FILM 1400 6.00 or permission of the course director. Course credit exclusions: None.

Cross-listed to: AP/HUMA 3910 3.00, FA/FILM 3211 3.00

FA/FILM 3220A 3.00 European Cinema to 1960. Examines cinematic movements and the work of selected directors in the immediate post war period. Movements such as French Poetic Realism and Italian Neo-Realism are situated in relation to their broad historic and social contexts and in relation to their aesthetic and stylistic innovations. Prerequisite: FA/FILM 1400 6.00 or permission of the Film Department.

FA/FILM 3220B 3.00 European Cinema: 1960 - Present. Examines cinematic movements and the work of selected directors from 1960 to the present. Movements such as the French New Wave, New German Cinema, New Spanish Cinema and Dogma are situated in relation to their broad historic and social contexts and in relation to their aesthetic and stylistic innovations. Prerequisite: FA/FILM 1400 6.00 or permission of the Film Department.

FA/FILM 3250C 3.00 Director's Cinema: David Cronenberg. Explores how David Cronenberg's films take aim at the everyday, the power bases of our culture: family, school, science, medicine, commerce, television; they focus on narcissistic consumers who lack meaningful engagement in a socio-cultural world and who instead obsess in a continual monologue with their revolting bodies. If Cronenberg's horror upsets civil society by showing it inside-out, maybe it is because our anxiety over insurrection depends ultimately on whether we stand to gain or lose power by it. Cronenberg's oeuvre insists that, as long as social progress is the legitimating function of horror text, we will not have the vocabulary to really speak or dream horror's end. Skills in critical reading, writing, analysis and argument are required and will be further developed in the course. Students must be prepared to read and write numerous essays and a final exam. Prerequisite: FA/FILM 1400 6.00 or FA/FILM 2401 6.00 (AP/HUMA 2740 6.00) or permission of the Film Department.

FA/FILM 3250E 3.00 Director's Cinema: The Cinemas of Stanley Kubrick and Woody Allen. Presents a consideration of two major American directors. Viewing their films chronologically, it will develop a comparison of their careers as a means of examining their respective approaches to American culture and American filmmaking.

FA/FILM 3260 3.00 Film Remakes. Helps students engage critically with a dominant trend in contemporary world cinema: the trend to remaking and sequelization. Film remakes and sequels raise important questions about cinema in the age of globalization: questions about authorship, genre-crossing, national and transnational cinema.

FA/FILM 3300A 3.00 Television/Video: Theory and Criticism. Presents a historical overview of North American television with a focus on the differences between commercial, public and state broadcasting. We will investigate the various television forms that have emerged in the Americas, including soaps and sitcoms, news, talk shows, game shows, reality television, sports programming, music videos, and commercials. We will also consider the theories that have attempted to explain the phenomenon of television, and we will look at video art, culture jamming, computers, and video games as extensions of, and responses to, television culture.

FA/FILM 3310 3.00 Studies in the Documentary. Explores the creative interpretation of actuality in film, from Flaherty to direct cinema and television. A study of changing forms, techniques and theories of documentary; its role in public information, propaganda and social analysis. Prerequisites: FA/FILM 1400 6.00 or FA/FILM 2401 6.00 or permission of the Film Department.

FA/FILM 3320 3.00 The Experimental Tradition. Examines the experimental impulse in film and video from the European avant garde cinema of the 1920s to the present. Prerequisite: FA/FILM 1400 6.00 or permission of the Film Department.

FA/FILM 3321 3.00 Alternative Cinema. Examines the movements within the cinema whose work have traditionally been less publicly accessible. Personal cinema and political films may be included. Four hours. Prerequisite: FA/FILM 1400 6.00 or permission of the Film Department.

FA/FILM 3331 3.00 Community Based Video: Video Art and Activism. Focuses on the community-based video, documentary and video activism. Students create individual and/or group projects on topics of their choosing, working with community organizations. Students gain skills in production, editing and working with community organizations. Pre-requisites: 3rd or 4th year standing.

Cross-listed to: FA/FILM 3331 3.00, FA/VISA 3053 3.00

FA/FILM 3401 3.00 Canadian Cinema. Provides a study of work by selected contemporary Canadian filmmakers working in a variety of areas: Anglophone, Francophone, multi-cultural and aboriginal fiction film traditions; documentary; and the avant garde. Also discussed are the issues surrounding the production and distribution of film in Canada today. The course is designed to work in conjunction with The Independents, a series of speakers and screenings offered by the Film Department. Required of all Film majors. Prerequisite: FA/FILM 1400 6.00 or permission of the Film Department.

FA/FILM 3410 3.00 Readings in Film and Television Theory. Provides an intensive reading and discussion course exploring the debates that have developed around film and television as cultural forces in the 20th century. Though readings in classical theory are included, the primary emphasis is on contemporary theory. The course also includes discussions of, and practice in, research methodology. Three hours. Note: Required of all film majors in the BA Honours program. Prerequisite: FA/FILM 2400 6.00 or permission of the course director.

FA/FILM 3411 3.00 Contemporary Canadian Cinema. Examines the last two decades of Canadian cinema with a particular focus on the regional and political differences that have come to shape the contemporary cultural landscape of film and video in Canada. Political and aesthetic issues particular to Canada along with a focus on a range of genres (from activist documentaries to feature narrative films) will be used to interrogate the very concept of national cinema and the meaning of its place in the age of global media.

FA/FILM 3420A 3.00 Studies in Genre: The Rise and Fall of the Hollywood Musical. Examines and celebrates the American film musical as a unique genre, emphasizing its multi-disciplinary elements, analyzing its development, structure and meaning and considering the various factors - technological, industrial, political and cultural - and the key creative figures that played important roles in its growth and demise. Prerequisite: FA/FILM 1400 6.00 or FA/FILM 2401 6.00 or permission of the Film Department.

FA/FILM 3420B 3.00 British Comedy. Explores the genres into which films have been classified are numerous and the criteria for classification highly variable. But among the most common groupings are those that film shares with literature, not the least of which are comedy, farce and satire. Critics and philosophers have spent considerable time debating the human comic impulse, how and why it works and its social role. In effect, these debates and theories are concerned with the rhetoric of comedy (how does comedy condition the emotional response of the audience?). One thread of this course will be to explore these varied approaches to understanding the structure of comedy in its different manifestations. At the same time, we will be examining comedy within a particular social context. From Oscar Wilde to the comedies of Ealing Studios, Monty Python's Flying Circus and, more recently, Mr. Bean and The Office, British approaches to, and uses of, humour have often been considered culturally characteristic. British film and TV comedy has also been well received internationally and some TV programmes have developed cult followings. This second aspect of the course, then, will focus on the context of British culture and the role comedy plays within it. It will, in effect, emphasize the poetics of comedy: how do general principals manifest themselves in particular films. Prerequisite: FA/FILM1400 6.00.

FA/FILM 3420D 3.00 Studies in Genre: Horror. Investigates the concept of genre through the study of the horror film or television series as a genre crossing distinctive national, institutional and historical categories. The cultural significance and social/historical determinants of the horror film are central to the course as well as the conventions, evolution and iconography of this popular genre. Prerequisite: FA/FILM 1400 6.00 or permission of the Film Department.

FA/FILM 3420E 3.00 Studies in Genre: The Science Fiction Film. Surveys science fiction films to 1965, the course explores the place of science fiction film in the overall development of cinema as well as the theoretical and ideological issues arising from the films themselves. Prerequisites: None.

FA/FILM 3420F 3.00 Studies in Genre: The Science Fiction Film Since 1965. Surveys science fiction films and television programs since 1965, the course will explore issues pertaining to the place of science fiction film in contemporary cinema, depiction of technology, issues of ideology, gender, diversity and class. Prerequisites: None.

FA/FILM 3420G 3.00 Studies in Genre: The Musical From Bollywood to Hollywood. Provides a cross cultural exploration of the musical in world cinema. This course will investigate the musical in a variety of historical and cultural contexts including Bollywood, Hollywood and contemporary postmodern re-inventions of the genre. Prerequisites: None.

FA/FILM 3420H 3.00 Studies in the Genre: The Crime Film. Explores the history of the crime film genre, with attention to its genesis in American early sound cinema (gangster films), and its development in film noir, mob (Godfather cycle), French New Wave and other international cinemas, and television (Sopranos). Prerequisites: None. Open to non-majors.

FA/FILM 3420J 3.00 The Western. Offers a critical examination of the Western, not just as a genre specific to Hollywood cinema, but an ideological construct that has manifested itself in other popular cinemas throughout the world. Open to non-majors.

FA/FILM 3610A 3.00 Studies in National Cinemas: Chinese Film. Provides students with the opportunity to view and study some 15 rare examples of early Chinese cinema, most from the silent period. These films demonstrate the growth of a film industry in pre-Revolutionary China. They are also indicative of the cultural and political values of China at the time. The aim of the course in examining this work is to place it both in the context of Chinese society and Chinese culture and in the perspective of world cinema during this period. Prerequisite: FA/FILM 1400 6.00 or permission of the Film Department.

FA/FILM 3610B 3.00 Studies in National Cinemas: Quebecois Film & Television. Examines the history and development of Quebecois cinema from several points of view: its technological and aesthetic development, and its significant contribution to the construction and representation of Quebecois culture and national identity.

FA/FILM 3610C 3.00 African Cinema. Offers a critical examination of the national cinemas of Africa. The course will closely examine African film history including discussion of a variety of filmmakers who foreground the themes of modernity and tradition; the urban and rural; and pre and post colonialism.

FA/FILM 3610D 3.00 Studies in National Cinema: Japanese Cinema. Introduces Japanese cinema in the socio-historical context of both the film industry and modern Japanese history. Special emphasis will be placed on the relationship between the body and landscape in terms of colonialism, regionalism, nationalism, and globalization.

FA/FILM 3810 3.00 Women and Film I. Examines the feminist perspective of the ways in which women have been represented in mainstream Hollywood and classical film traditions. Discussion of formative texts of feminist film theory on issues of body representation, the look, the place of women in mainstream narrative, the construction of gendered positions of spectatorship in Hollywood and popular culture. Prerequisite: FA/FILM 1400 6.00 or permission of the department.

FA/FILM 3812 3.00 Queer Cinema. Provides an historical and theoretical overview of the major themes and political and aesthetic debates in the evolution of gay, lesbian and transgendered artistic practice concentrating in the areas of film and video. Prerequisites: FA/FILM 1400 6.00 or permission of the Film Department.

FA/FILM 3820 3.00 Environmentalism & Cinema. Explores the rich history of films and television in which the environment is a subject. The course will feature a variety of perspectives and topics including conservationism, preservationism, anthropomorphism, radical ecology, feminism, and discourses about power and domination. Open to non-Majors

FA/FILM 3910 3.00 Jewish Film I. Investigates how Jews have been depicted in world cinema by investigating how films of various genres have portrayed Jewish characters and dealt with Jewish themes. Prerequisite: FA/FILM 1400 6.00 or permission of the Film Department.

FA/FILM 4001 6.00 Fiction Project Workshop II. Provides film majors with a workshop context for the production of fictional narrative film and video projects. Each student will direct one major production, running 10 - 25 minutes. Prerequisites: Film BFA foundation program and permission of the Film Department. Prerequisite or corequisite: FA/FILM 2170 3.00 Production Planning or FA/FILM 3170 3.00 prior to 2005.

FA/FILM 4002 6.00 Documentary Project Workshop II. Provides students who have taken FA/FILM 3002 6.00 Documentary Project Workshop I with the opportunity to continue documentary production at a more advanced level. Prerequisites: FA/FILM 3002 6.00 and permission of the Film Department.

FA/FILM 4003 6.00 Alternative Project Workshop II. Provides students who have taken Alternative Project Workshop I with the opportunity to continue alternative production at a more advanced level. Prerequisites: FA/FILM 3003 6.00 and permission of the Film Department.

FA/FILM 4120 6.00 Feature Screenwriting II. Develops the student's existing story outlines into full feature-length screenplays and through several rewrites. The course will also examine the realities of working as a writer in the Canadian and international film industries. Prerequisite: Grade of B+ or better in FA/FILM 3120 6.00.

FA/FILM 4122 6.00 Writing for Television. Writing for Television is an intensive introduction for aspiring screenwriters to the subtle but encompassing problems they may expect to encounter when writing for series television. Students will study the form and format of half-hour and one hour episodic comedies and dramas intended to be encompassed as part of a television series. They will also undertake the pitching, outlining and drafting of a single episode; the creation and development of a series proposal; the make up and function of a story department; plus an overview of the industry as a whole. Long form drama including television movies and mini-series will also be examined. Students will be required to submit, as their term and final projects for the course, a 'spec script' for an existing prime-time dramatic series of their choice (Fall term) and the writing of a proposal and pilot script for an original half-hour comedy or drama series (Winter term). Course Credit Exclusion: FA/FILM 4122 3.00 prior to Fall 2008.

FA/FILM 4123 3.00 Screenwriting and the History of Ideas. Examines what can be learned from how screenwriters work and talk about how better to understand three fundamental transitions in the history of philosophy initiated by Kant, Wittgenstein and Collingwood. Prerequisites: a full upper-year course in screenwriting or film production, and another (or the equivalent) in philosophy; or permission of the Film Department. Course credit exclusion: FA/FILM 4600F 3.00

FA/FILM 4124 6.00 Writing for Television II. Provides an advanced focus on the craft of writing dramatic scripts (teleplays) for television and related media, and hands-on experience with working in a story department, culminating in each student's creation of an original one-hour prime time television series.

FA/FILM 4125 3.00 Scene Writing Workshop. Offers an intensive writing workshop treating the dramatic scene as a microcosm of the screenplay. Students will write, rewrite and adapt dramatic scenes executed by actors. Prerequisite: Open by permission of the Film Department. Priority given to students pursuing a screenwriting specialization.

FA/FILM 4126 6.00 Story Editing I. An advanced screenwriting seminar/workshop for students specializing in Screenwriting. The course will include critical story analysis, story editing and story development of projects by students directors. Prerequisites: FA/FILM 3125 6.00 or FA/FILM 3120 6.00. Course credit exclusions: FA/FILM 4601A 3.00, FA/FILM 4126 3.00, FA/FILM 4127 3.00.

FA/FILM 4128 3.00 The Screenwriters' Cinema 1. Explores through an examination of representative screenings, screenplays, commentaries and originating sources (novels, plays, short stories, other screenplays, etc.) the life and work of two or three notable screenwriters chosen by the instructor as having especial significance for understanding the craft of screenwriting. Open to non-majors.

FA/FILM 4129 3.00 The Screenwriters' Cinema 2. Explores through an examination of representative screenings, screenplays, commentaries and originating sources (novels, plays, short stories, other screenplays, etc.) the life and work of two or three notable screenwriters, distinct but complementary to those that may have been studied in FM4128: the Screenwriter's Cinema 1, chosen by the instructor as having especial significance for understanding the craft of screenwriting. Open to non-majors.

FA/FILM 4130 3.00 Editing Techniques II. Continues the exploration of the practice, aesthetics and theory of motion pictures editing, building on the knowledge and skills acquired in FA/FILM 3135 3.00. Prerequisite: FA/FILM 3135 3.00 Editing Techniques I.

FA/FILM 4135 3.00 Editing Techniques III. Explores further the practice, aesthetics and theory of motion picture editing, building on the knowledge and skills acquired in FA/FILM 4130 3.00 Editing Techniques II. This course is for students who show exceptional ability and commitment to the craft of editing. Students will work extensively editing film and video projects undertaken in the project workshops. They may also mentor students in FA/FILM 3135 3.00 Editing Techniques I and FA/FILM 4130 3.00 Editing Techniques II. Prerequisite: FA/FILM 4130 3.00.

FA/FILM 4150 3.00 Sound Techniques II. Offers an advanced exploration of post-production and studio sound practices, building on the experience and knowledge gained in FA/FILM 3155 3.00 Sound Techniques I. The expressive arts of the sound editor and mixer will be further explored by students as they acquire more advanced knowledge of post-production sound editing and mixing and discover the full breadth of aesthetic possibilities of sound design for film and video. The course will include lectures, field trips and visits from working professionals. Prerequisite: FA/FILM 3155 3.00 Sound Techniques I.

FA/FILM 4161 3.00 Cinematography II. Assists students in continuing to develop creative and technical skills initiated in FA/FILM 3160 3.00 Cinematography I, with an emphasis on the planning and shooting of films and videos produced in the project courses. Prerequisite: FA/FILM 3160 3.00 Cinematography I.

FA/FILM 4165 3.00 Cinematography III. Builds further on the creative and technical skills acquired in FA/FILM 4161 3.00 Cinematography II, providing guidance to students heavily involved in shooting films and videos. Prerequisites: FA/FILM 4161 3.00 Cinematography II.

FA/FILM 4180 3.00 Acting and Directing II - Directing Actors for the Screen. Explores the work that actors and directors do together. It includes scene study, preparation, and the recording and editing of dramatic scenes. Prerequisite: FA/FILM 3180 3.00 Acting and Directing I. Open to both film and video and theatre majors.

FA/FILM 4190 6.00 Film & Video Internship. Consists of an eight-week full-time (minimum 160 hours on site) placement for fourth-year BFA students in an approved company or organization gaining on-the-job experience in a film/video or television field. Admission is based on finding a suitable match between a student's interests and the needs of the partner organization. In the first week of the course prior to the commencement of the site placement, students will be required to attend seminars on workplace health and safety, sexual harassment, insurance, business confidentiality etc. Prerequisite: FA/FILM 2170 3.00 Production Planning or FA/FILM 3170 taken prior to 2005.

FA/FILM 4600F 3.00 Special Topics in Film/Television: Screenwriting and Philosophy. Examines what can be learned from how screenwriters work and talk about how better to understand three fundamental transitions in the history of philosophy initiated by Kant, Wittgenstein and

Collingwood. Prerequisites: a full upper-year course in screenwriting or film production, and another (or the equivalent) in philosophy; or permission of the Film Department.

FA/FILM 4600H 3.00 Special Topics: Narratology and Luis Bunuel. Explores how the films of Luis Bunuel encourage us to consider questions of narrative and of narrative subversion. In doing so, we will examine not only Bunuel's films but also some others relevant to the study of narrative.

FA/FILM 4600R 3.00 Special Topics in Film/Television: Early Cinema to 1915. Examines the origins of cinema including the technological innovations that made it possible, the development of its economic and social infrastructure and the evolution of varied means of expression in the films themselves.

FA/FILM 4600S 3.00 Contemporary Documentary. Presents a consideration of selected documentary films released after 1980. These films will be examined in the context of both critical writing addressing them directly and theoretical discussion of the nature of non-fiction film. Prerequisite: FA/FILM 1400 or permission of the Film Department.

FA/FILM 4600T 3.00 Canadian Documentary. Examines as a special topic in Canadian Film/Television the history, theory, criticism and current practice of documentary. Works to be considered include a variety of English and French language documentaries, docudramas, experimental documentary and documentary applications of new media. Prerequisite: 4th year BA (Honours) standing. Integrated with GS/Film 5255.

FA/FILM 4600U 3.00 Issues of Authorship. Debates about "authorship" in relation to both the production of films and critical methodology have occupied a central position in film studies only since the nineteen fifties, when the French magazine *Cahiers du cinéma* formulated *la politique des auteurs*. Originally intended polemically, the *politique* ("policy") argued that, despite the industrial nature of much film production, the director was the sole author of the finished product. This proposition has since been appropriated, attacked and reformulated in many different ways, but it continues to have relevance in critical debates. In this course, we will examine various theories of film authorship, from the roots of the notion in *la politique* to its transformation through the use of such concepts as structuralism, post-structuralism and semiotics. We will discuss the attacks on the assumption of the author as sole creator ("the death of the author"), the questioning of such evaluative categories as "the great director" or "the great film" and how these relate to issues of canon formation. Finally, we will consider the re-examination of these issues in more recent, especially feminist, criticism. The course will include case studies which illustrate the theoretical discussions. Prerequisite: 4th year Film BA (Honours) standing. Integrated with GS/Film 5235

FA/FILM 4601A 3.00 Selected Topics in Film/TV: Script Editing. Based on the understanding that story (or script) editing is an integral part of the development of professional screenplays and teleplays, this course has two areas of focus: to provide an environment of collaboration between Screenwriting and Production stream students and to provide writers with analytical and critical skills based on a dramatic structural model. Integrated with GS/FILM 5320E. Course credit exclusion: FA/FILM 4126 3.00, FA/FILM 4126 6.00, FA/FILM 4127 3.00.

FA/FILM 4700 3.00 Canadian Cinema: Production, Distribution, Exhibition, Marketing and Criticism. Offers a course designed to familiarize students with the inner workings of the Canadian film industry. Using case study approach, most aspects of film production are investigated. Prerequisite: FA/FILM 1400 6.00 or permission of the Film Department.

FA/FILM 4710 3.00 First Nations in Film and Television. Investigates the role of First Nations in film and television culture, from the perspective of post-colonial theory and contemporary media theory. Includes international work, made from the 19th century to the present, and produced by both indigenous and non-indigenous artists. Prerequisite: 2000 level film studies course or permission of the instructor.

FA/FILM 4711 3.00 Issues in Film Historiography. Examines the methods and approaches possible in the study of film history, especially those specific or unique to film. It emphasizes the posing of historical

questions, the conducting of research, the analyzing of evidence and the development of conclusions. The course uses particular examples drawn from film history to illustrate issues, problems and approaches. Prerequisite: 4th year standing in the Film BA Honours program.

FA/FILM 4800 3.00 Honours Thesis. Offers a course designed to provide history and criticism students with a focused research and writing project. Consult the department office for more details. Prerequisites: FA/FILM 3410 3.00 and permission of the Film Department.

FA/FILM 4850 3.00 Master Class in Film and Video. Provides Master class modules that are short, intensive workshops offered to take advantage of visiting or local professional filmmakers, screenwriters and scholars. Courses may be given by specialists from a wide range of specialties.

FA/FILM 4900 3.00 Independent Studies in Film/Television. Provides the individual student an opportunity to pursue a specific and intensive personal study under the supervision of a faculty member on topics not offered in other courses within the department. Proposed topics are subject to departmental approval. Note: Open to fourth-year students by petition to the Film Department.

FA/FILM 4900 6.00 Independent Studies in Film/Television. Provides the individual student an opportunity to pursue a specific and intensive personal study under the supervision of a faculty member on topics not offered in other courses within the department. Proposed topics are subject to departmental approval. Note: Open to fourth-year students by petition to the Film Department.

FA/FILM 4901 3.00 Independent Studies in Film/Television. Open to fourth-year Film students, the Independent Studies course gives the individual student an opportunity to pursue a specific and intensive personal study under the supervision of a faculty member on topics not offered in other courses in the Department. Proposed topics are subject to Department approval. Each student is required to complete an Independent Studies form prior to the commencement of an academic session. Note: Department of Film equipment is not available to students enrolled in Independent Studies Courses. Independent Studies in Production is for production related proposals other than making a film or video outside of one of the third and fourth year project courses. Film/video productions will not normally be considered for this course.

Programs of Study

Fine arts cultural studies (FACS) welcomes students with wide-ranging interests across the fine, performing and new media arts, and offers an opportunity to explore them from various interdisciplinary perspectives set within the critical frameworks. Course options consider the arts through cultural histories and theory, issues in contemporary and popular culture, cross-cultural studies, studio practices—including FACS' new media stream—and arts administration.

Students pursuing Honours Major or Minor programs in Fine Arts Cultural Studies are required to take a minimum of 30 credits from the FACS offerings. For other Faculty of Fine Arts students, FACS courses count as fine arts or free electives. Some FACS courses are open to all students in the University as electives.

Courses in Fine Arts Cultural Studies

Please note: not all courses are offered every year.

FA/FACS 1010 6.00 Fine Arts Cultural Studies: An Introduction.

Explores the intellectual roots of cultural studies and their relationships to the fine, performing and new media arts. Examines themes, approaches, literatures and practices in the interdisciplinary field of fine arts cultural studies through projects undertaken in various media. Prerequisite: Open to fine arts cultural studies majors.

FA/FACS 1900 6.00 Arts and Ideas. Organized thematically, this introductory course acquaints students with aspects of the fine, performing and new media arts from various interdisciplinary perspectives. Note: FA/FACS 1900 is required for all Faculty of Fine Arts degrees. It may be used to satisfy the humanities general education requirement or as a Fine Arts elective, but not both.

FA/FACS 1939 3.00 Interactive New Media Art: An Introduction.

Introduces students with little or no experience in the creation of new media works to the issues and techniques that will enable them to engage critically and creatively with the area. In the relatively short history of new media, a new language and tool set have become pervasive in the world of art making. This course provides students with an introduction to interactive new media. Using HTML, JavaScript, and Photoshop, students will engage with the web as a creative medium. Projects will be based in a variety of new media genres including net.art, blogs, interactive narrative, and randomness. Course Material fees required. Open to non-majors.

FA/FACS 2100 3.00 Critical Biographies: Works and Lives.

Explores the use of biography as a critical tool in understanding artistic creativity and cultural theory in the fine, performing, and new media arts. Biographical texts are studied in conjunction with an examination of artistic and theoretical works. Prerequisite: Second-year standing or permission of course director.

FA/FACS 2122 3.00 Community Arts for Social Change.

An introduction to community-based creative practices integral to social change in different historical and cultural contexts. These practices are examined in terms of their form, content, production, and reception from interdisciplinary perspectives.

Cross-listed to: ES/ENVS 2122 3.00, FA/FACS 2122 3.00

FA/FACS 2400 6.00 Photography, Film and Popular Culture.

Explores the inter-related histories of photography and film within the theoretical constructs of popular culture by examining the origins of these media, their documentation of quotidian life, influence on questions of gender and race and their place in cultural theory. Prerequisite: FA/FACS 1900 6.00 or permission of course director.

FA/FACS 2500 3.00 Contemporary Arts and Technologies.

Exposes students to intersections between arts and technologies reflected in the work of theorists, practitioners and critics. The focus in any given year will reflect instructor's interests and key developments in the field. Prerequisites or corequisites: FA/FACS 1900 6.00 or permission of the course director.

FA/FACS 2800A 6.00 Studies Abroad: The Arts in Culture I: The Arts of India I.

Located in Mumbai, Pune and surrounding areas, this summer studies abroad course will provide students with a unique lived experience of the 'arts in culture' through the classical and popular arts of India. Prerequisite: Second-year standing or permission of the course director.

FA/FACS 2800B 6.00 Rome: Open City I / Roma: città aperta I (specific).

Introduces students to the urban history, structure, and multifaceted culture of Rome, Italy through the fine, performing, and popular arts, architecture, literature, and related cultural initiatives. Students live in Rome during this four-week intensive study abroad course. Prerequisite: Second-year standing or permission of the course director. Open to Non-Majors

FA/FACS 2900 6.00 Rethinking Representation.

Considers the theories, conventions and politics of representation and their impact on the production and reception of the fine, performing and new media arts in both historical and contemporary contexts. Prerequisite: FA/FACS 1900 6.00 or permission of the course director. Course credit exclusion: FA/FACS 2900 6.00 prior to 2003-2004.

FA/FACS 2910 3.00 Performing Arts in Global Perspective.

Considers how interconnected music, dance and theatre traditions from around the world respond to the increasing effects of migration, mass media, and new technology within a framework of globalization and transnationalism. We examine the production, reception, appropriation and commodification of a variety of artistic practices, focusing on issues of diaspora, identity, hybridity, authenticity, nationalism, post-colonialism, orientalism, and interculturalism. Our theoretical work is grounded in case studies of performing arts practices from a wide range of artistic and cultural practices and institutions, which may include celtic, hip-hop, belly dancing, salsa, karaoke, wayang kulit, bhangra, bhārata nāṭyam, tango, and Cantonese opera, among others. Prerequisite: FA/FACS 1900 6.00 or permission of the course director.

FA/FACS 2920F 3.00 In Other Worlds: The Arts and Artists in Three-Dimensional Multi-User Digital Environments. Offers an interdisciplinary course that will critically examine three dimensional, multi-user digital environments (or "virtual worlds") that are rapidly becoming new forms of social literacy and new forums for the fine, performing and new media arts. Open to non-majors. Prerequisite: FA/FACS 1900 6.00 or permission of the course director.

FA/FACS 2930 6.00 The Electronic Landscape. Offers hands-on experience in using the computer as a creative medium. Utilizing a variety of interactive technologies and software, students create interactive works of art in a range of formats. This course requires a basic knowledge of HTML and Photoshop. Students without this background should enrol in FA/FACS 1939 3.00 or seek permission of the course director.

FA/FACS 2935 3.00 Foundations of Digital Media. Examines digital media representations and their interrelationships. Through both written work and creative explorations students engage with the notion of digital media layers as human and computer constructs. Prerequisites: FA/FACS 1900 6.00 and FA/FACS 2930 6.00

FA/FACS 2936 3.00 Designing Interactive Objects I. Explores the gamut of interactive contexts afforded by digital technology. Students will both examine past and current cultural artifacts and art works, and undertake creative explorations that engage with a variety of interactive settings. Prerequisite: FA/FACS 2935 3.00

FA/FACS 2950 3.00 An Introduction to Career Planning and Management. Offers an introductory course designed for students planning for a career in cultural sectors as employed or self-employed professionals. Through research and analysis, in-class presentations and self-examination, students will be better able to make career choices and follow those choices through. May not be taken as part of the FACS major requirement.

FA/FACS 2960A 3.00 Creative and Critical Fictions. Promotes critical and creative thinking and writing around specific themes in cultural studies. The course encourages a blurring of genres and refuses a necessary separation between creative and critical writing. Students produce a variety of short assignments and participate in online writing circles.

FA/FACS 3100 3.00 The Theatricality Of Power: Violence, memory, and revolution. Examines the use of theatre, spectacle, and theatricality-by the state, by oppositional groups, and by performance practitioners - to establish or challenge structures of power. Pre-requisite: 3000 level standing or permission of the course director

FA/FACS 3122 3.00 Community Arts Practice Preparatory Workshop. Lays the groundwork for the fourth-year Community Arts Practice Practicum (ENVS 4122/FACS 4122 6.00). Students identify socially-based projects with cultural organizations or community groups and negotiate an agreement to develop a collaborative cultural production over the subsequent year. Prerequisite: FA/FACS 2122 3.00. Community Arts for Social Change.

Cross-listed to: ES/ENVS 3122 3.00, FA/FACS 3122 3.00

FA/FACS 3200 3.00 Artist as Witness: Representing Disaster, Trauma and Historical Remembrance. Focusing on recent theoretical work on aesthetic responses to 20th C trauma, the course takes an interdisciplinary approach to studying the representational and collaborative strategies of artists living in-and attempting to comment upon-traumatic times. Through our engagement with the concept 'artist as witness,' we will explore the overarching theme of how the larger traumas of history 'live on' in the cultural life of individuals and communities. Students will be required to produce projects and/or prepare seminars and short papers that explore what it might mean to attend to the past through combined visual, auditory and performative modalities. The format of the course combines lectures with visits to art galleries, performances, museums and memorial sites. Drawing on topics such as war, poverty, HIV/AIDS, atomic weapons and 9/11, the course seeks to answer the following questions: What are the challenges for artists seeking to represent subject matter often thought difficult if not impossible to represent? How do artists work across and combine a range of media in order to craft a sense of their responsibility as witness to traumatic history? How do galleries, museums and memorial

sites confront viewers with new, interdisciplinary approaches to thinking about history? How do curatorial practices of presentation and display affect the kinds of questions we are able to ask about the past? Open to non-majors.

FA/FACS 3300 3.00 Canadian Arts and Culture. Prime Minister Wilfrid Laurier said that "the 20th century shall be the century of Canada." As the 20th century comes to a close, scholars, artists, critics and cultural practitioners continue to explore the nature of Canadian cultural identity. In this seminar, we examine Canadian arts and culture from the perspective of Canadian identity, myths, image, symbols, imagination, experience and values. We also explore the significance to the Canadian cultural and artistic experience of colonialism, nationalism, regionalism, imperialism and heroism. Prerequisite: Third-year standing.

FA/FACS 3360 3.00 Arts and the Law: Policies and Perspectives. Explores the interaction between the arts and contemporary legal and social issues such as property rights in art, copyright and the moral rights of artists, freelance employment and labour relations in the arts, freedom of expression and censorship. May not be taken as part of the FACS 30-credit major requirement. Prerequisite: Third or fourth-year standing or permission of the course director. Course credit exclusion: FA/FACS 4920D 3.00 and FA/FACS 3920 M 3.00.

FA/FACS 3400 3.00 The Cabinet of Curiosities. Considers the Cabinet of Curiosities, a Renaissance invention designed to classify and preserve collections of "precious" objects, and its more recent manifestations (including museums, artists' installations, and Web sites) to explore a wide range of issues associated with Cultural Studies. Prerequisite: Third-year standing or permission of the course director.

FA/FACS 3450 3.00 Leonardo da Vinci: Art and Science. Explores the ideas and production of Leonardo da Vinci-a painter, sculptor, architect and urban planner, musician and composer, costume and stage designer, anatomist, engineer, mathematician, botanist, and natural scientist-as a case study in multidisciplinary across the arts and sciences. Prerequisite: Third-year standing or permission of the course director.

FA/FACS 3500 3.00 The Body in Performance. Focuses on ideas and issues surrounding embodiment and the body in performance. Through critical inquiry, it will explore various theoretical perspectives on the performing body and some of the traditions from which it has emerged. Prerequisite: FA/FACS 1900 6.00 or permission of the course director. Course credit exclusion: FA/FACS 3920H 3.00.

FA/FACS 3600A 3.00 Collaborative Acts: Designing Interactive Physical Environments. Explores designing interaction for physical environments and objects. Students will be introduced to the world of physical computing and use a real-time software environment (Max/MSP/Jitter). In their projects, students will research, design and implement interactive physical environments. Prerequisite: FACS 3931 or VISA 2057 or VISA 3054 or permission of course directors

FA/FACS 3700 3.00 A Textual Significance of Weimar Flanerie: Writing By Way of Photographic and Cinematic Images. Explore the ways in which flanerie may be used as a means of discussing photography and cinema in Weimar Germany. Prerequisite: FACS 2700 or permission of course director.

FA/FACS 3800A 6.00 Studies Abroad: The Arts in Culture II: The Arts of India II. Located in Mumbai, Pune and surrounding areas, this summer studies abroad course will provide students with a unique lived experience of the 'arts in culture' through the classical and popular arts of India. Prerequisite: Third-year standing or permission of the course director.

FA/FACS 3800B 6.00 Studies Abroad: The Arts in Culture II :Rome: Open City II. Introduces students to the urban history, structure, and multi-faceted culture of Rome, Italy through the fine, performing, and popular arts, architecture, literature, and related cultural initiatives. Students live in Rome during this four-week intensive study abroad course. Prerequisite: Third-year standing or permission of the course director. Open to Non-Majors

FA/FACS 3900A 3.00 Arts and Cultures: South Asia. Focuses on issues of post coloniality and art from various cultural contexts in South Asia such as India, Pakistan, and Bangladesh. We will draw from these specific cultural contexts, as well as from traditional and contemporary artists and performers which work and live within the South Asian postcolony. Participation may include field trips to museums, art galleries, dance and music performances, cinemas or theatres. Prerequisite: FA/FACS 1900 6.00 and third-year standing or permission of the course director.

FA/FACS 3900B 3.00 Expressive cultures of the Philippines and its diaspora. Examines Filipino culture and identity as they are expressed through cultural production in the Philippines and in the Filipino diaspora throughout Europe, Latin America, and North America. Prerequisite: FA/FACS 1900 6.00 and third-year standing or permission of the course director. Open to non-majors.

FA/FACS 3900M 3.00 Arts and Cultures: Indigenous Cultures. Focuses on issues of post-coloniality and art from two specific cultural contexts of aboriginal or indigenous peoples that are of North American First Nations cultures and Aboriginal peoples of Australia. We will take a close look at the uses and abuses of traditional art, culture and ritual as well as their more modern reformations and appropriations in the global community. Participation may include field trips to museums, art galleries, dance and music performances, cinemas or theatres. Prerequisites: FA/FACS 1900 6.00 and 3rd year standing or permission of the course director.

FA/FACS 3920D 3.00 Contemporary Theory Through Photography and Film. Making reference to a very small number of carefully selected photographic and cinematic texts, the course uses the mechanically reproduced image as a tool to focus theoretical discourse on either textuality or intertextuality. Prerequisite: Second-year fine arts cultural studies course.

FA/FACS 3920F 3.00 Arts and Cultural Policy. Introduces students to the politics of arts and cultural policy-making and the civil society. It pays particular attention to the role of Canadian municipal, provincial and federal governments and institutions as well as the struggles that have emerged between the state and the cultural community. It reviews and assesses Canadian arts, heritage and cultural industry policies beside those of one or more other countries such as Australia, France, Great Britain and the United States with particular attention to the cultural, social, economic, political and technological factors that influence the policy process. May not be taken as part of the FACS 30-credit major requirement. Prerequisite: Third- or fourth-year standing or permission of the course director.

FA/FACS 3920J 6.00 Memory and Place. How do places contribute to shaping memory? What is it about objects, art and architecture, for example, that seem to "capture" memory? Why are certain places meaningful and others less so? This course explores objects and ideas all the while embedded in history to better formulate a notion of the power of place and its relationship to memory.

Cross-listed to: FA/FACS 3920J6.00, FA/VISA 3710 6.00

FA/FACS 3920K 6.00 Special Studies in the Arts II: Cultural Production in an International Environment. Via WebCT, this course will include students from six universities in Canada and Europe. Each university will focus on a different theme in response to the cultural geography in which it is situated. Drawing from the rich and complex diversity of cultural life in Toronto, the York University segment of the course will examine the topic The Arts in a Multicultural Environment. May not be taken as part of the FACS 30-credit major requirement. Prerequisite: Third- or fourth-year standing in the Faculty of Fine Arts or permission of the course director.

FA/FACS 3920L 3.00 Urban Culture. Explores the modern city as a paradigmatic and vital place of contemporary human experience focusing on a variety of resources from urbanism, visual culture, aesthetics, architecture, cinema, contemporary art and popular culture. Prerequisite: FACS 1900 and third year standing or permission of course director. Open to non-majors.

FA/FACS 3920N 3.00 Special Studies in the Arts II: Arts, Media, and Politics in Indonesia. Investigates the problems of Indonesian arts in relation to Indonesian politics and media from the perspectives of cultural studies. In addition, it will examine how Indonesia contributes to the current intercultural art movements in the international arena. Prerequisite: Third-year standing or permission of the course director.

FA/FACS 3930 3.00 Screen-Based Fluid Interfaces. Looks beyond the vocabulary of the point-and-click gesture to fluid mouse gestures in interactive new media art. Fluid mouse gestures, those that involve reacting to movement, provide a vast array of possibilities to generate complex meaning. A course material fee is required. Course credit exclusion: FA/FACS 3930 6.00. Prerequisite: FA/FACS 2930 6.00 or permission of the course director.

FA/FACS 3931 3.00 Interactive Installation and Performance I. Provides students with an opportunity to explore interactivity in public physical settings. Students create works where the performer and/or audience interact with media on the computer through means other than the keyboard and mouse. Prerequisite: FA/FACS 2930 6.00 (formerly FA/INFA 2930 6.00) or permission of the instructor. Course credit exclusion: FA/FACS 3931 6.00, FA/INFA 3931 6.00.

FA/FACS 3935 3.00 New Media Forms: The Database. Explores the database in new media art. Students will look at the database as a cultural object, evaluate art that uses databases, learn the mechanics of databases and create new media art that uses databases. Course material fees required. Prerequisite: FA/FACS 2930 6.00 or permission of course director.

FA/FACS 3936 3.00 Designing Interactive Objects II. Provides a project-based continuation of Designing Interactive Objects I. Students create advanced interactive works that can actively retain qualities of their participants and/or integrate interactive settings (e.g. cell phone and physical installation). Prerequisite: FA/FACS 2936 3.00

FA/FACS 3937 3.00 Sound for Artists. Explores sound art both as a distinct practice and through its interdisciplinary intersections with new media, sculptural, installation, performative, musical, and other time-based art practices. Prerequisite: FACS 2930 or permission of the course director.

FA/FACS 3938 3.00 Video in the Expanded Field. Explores video through its interdisciplinary intersections with new media, sculptural, installation, performative, musical, and other practices. Open to non-majors. Prerequisite: FACS 2930 or permission of the course director.

FA/FACS 3950 3.00 Arts Administration. Provides an introduction to the skills and knowledge required for contemporary arts management. The management of the arts in Canada is illustrated and analyzed through a survey of the history and development of arts policy and administration practice. May not be taken as part of the FACS 30-credit major requirement. Prerequisite: Third- or fourth-year standing or permission of the course director.

FA/FACS 4122 6.00 Community Arts Practice Practicum Seminar. Provides students with an opportunity to implement proposals developed in the third-year Community Arts Practice Preparatory Workshop (ENVS 3122/FACS 3122) by immersing them directly in a creative production in collaboration with cultural and/or community organizations to educate and advocate around social-political issues. Prerequisite: FA/FACS 2122 (3.00) and FA/FACS 3122 (3.00).

Cross-listed to: ES/ENVS 4122 6.00, FA/FACS 4122 6.00

FA/FACS 4200 3.00 Culture and Memory. Explores the ways in which culture is based on the construction, manipulation and transmission of memories, the role played by memory in the formation of collective and individual identities, and the politics of memory. Prerequisite: Third and four year standing in the Faculty of Fine Arts or permission of the course director. Course credit exclusion: FA/FACS 4920 F 3.00

FA/FACS 4210 3.00 Culture & Community in the Liminal City. Explores the idea of the liminal city begins with the assumption that the city is not simply a physical and material structure that exists in linear and progressive time. Rather, the city is something that is constantly produced and reproduced in the inter-subjective field of our everyday lives. As such, the city can also be characterized as an imaginary, ... an enabling but not fully explicable symbolic matrix within which people imagine and act as world-making collective agents. Course credit exclusion: FA/FACS 4920 I 3.00.

FA/FACS 4220 3.00 Feminist Cultural Theory. Designed to give students an awareness of the relationships between practice, representation and theory in feminist approaches in the study of culture. The course considers themes that have become central to feminist theory such as body, identity, nature and the difference in terms of the contributions that have been made by feminist cultural theorists both to feminist theory and cultural theory more generally. The concept of culture itself will be examined according to a range of definitions and redefinitions employed by feminists in addressing cultural identities; cultural practices and everyday life; cultural production (especially visual culture, new media); questions of cultural reproduction, translation and appropriation; postcoloniality and the study of technology. We will consider a wide range of representations and practices. Prerequisite: Permission of the course director. Course credit exclusion: FA/FACS 4920G 3.00.

FA/FACS 4400 3.00 The Sensorium. Considers the five senses (which give humans the potential to see, hear, smell, taste and touch) and their impact on the production and reception of the arts from a range of perspectives. Prerequisite: FA/FACS 1900 and fourth-year standing in the Faculty of Fine Arts or permission of the course director.

FA/FACS 4700 3.00 Exploring Contemporary Theory Through Photographic and Cinematic Texts. Making reference to a very small number of carefully selected photographic and cinematic texts, the course uses the mechanically reproduced image as a tool to focus theoretical discourse on either textuality or intertextuality. Prerequisite: Second-year fine arts cultural studies course. Course credit exclusion: FA/FACS 3920D 3.00.

FA/FACS 4750 3.00 Theories and Practices of Documentary. Explores contemporary documentary theory and historical documentary practices from interdisciplinary perspectives drawing on disciplines such as dance, design, cinema, literature, music, new media, photography, theatre, and/or the visual arts. Individually or collectively, students construct their own interdisciplinary documentary project. Prerequisite: FA/FACS 1900 and fourth-year standing or permission of the course director. Open to non-majors.

FA/FACS 4900A 3.00 Contemporary Issues in the Arts: Anatomy of Post-modernism. Explores post-modernism both broadly, in cultural terms (that is, as it relates to notions of post-modernity), and more narrowly, in terms of its relationships to the fine, performing and new media arts. Prerequisite: Fourth-year standing or permission of the course director.

FA/FACS 4900B 3.00 Hypermedia. Examines contemporary critical issues in the fine arts. Topics vary from year to year, and may include ideas of modernism and post-modernism; the role of aesthetics; gender issues; performance theory; semiotics; and the influence of philosophy, sociology and psychology on current art practice. Where appropriate, visiting artists, critics and curators are invited for guest seminars. Prerequisite: Fourth-year standing in the Faculty of Fine Arts, or permission of the course director.

FA/FACS 4920C 3.00 Colonialism and Arts in Cross-Cultural Perspective. Provides students with the analytical tools necessary to address the current debates in contemporary cultural theory by drawing on ethnographic case studies in Asia, Africa, Latin America and the Caribbean and Native North America. Student projects explore issues in gender and art; museums and representation; cultural appropriation; authenticity and tradition; Western views of the primitive; and consumption. Prerequisite: FA/INFA 3900 6.00, or a non-Western art history course or an introductory course in anthropology or ethnomusicology or permission of the instructor.

FA/FACS 4920H 3.00 Special Studies in the Arts III: Art and Spectacle. A thematic study in which the history, function and production of spectacle will be examined in the light of its relation to the arts and to society. Contemporary relations between art and spectacle will be approached through various artists' works. Prerequisite: Fourth-year Faculty of Fine Arts standing or permission of the course director.

FA/FACS 4920K 3.00 Special Studies in the Arts III: Representing India: The Globalization of Indian Popular Culture. Examines Indian popular culture both within India and beyond its borders in the South Asian Diaspora. Drawing upon various artistic disciplines (dance, film, music, visual arts) and craft traditions (the Hinduization of t-shirts and sacred indigenous motifs on calendars for example), it will survey various popular cultural traditions travelling around the globe. The globalization of these traditions has resulted in a crisis of representation. Thus, the course will theorize the representation of India through postcolonial, postmodern and South Asian Cultural Studies perspectives. Prerequisite: Fourth-year standing or permission of the course director.

FA/FACS 4930 3.00 Cultural Theory Through New Media. Offers an upper-level course in both multimedia art and contemporary cultural theory that is designed for students who have already achieved a significant level of accomplishment in both these areas. Students will undertake extensive theoretical research using both traditional and online resources. The result of that research will be integrated into advanced multimedia projects. Course material fee required. Prerequisite: At least six credits in the new media area at the third-year level or permission of the course director. Course credit exclusion: FA/FACS 4930 6.00, FA/INFA 4930 6.00.

FA/FACS 4931 3.00 Interactive Installation and Performance II. Extends on the foundation laid in FA/FACS 3931: Interactive Installation and Performance I in an advanced studio setting. Students will pursue advanced, self-directed individual and group projects. Prerequisite: FA/FACS 3931 3.00 and three additional credits in the FACS new media area at the third-year level or permission of course director. Course credit exclusion: FA/FACS 3931 6.00.

FA/FACS 4932 3.00 Interactive Dance Studio: Explorations in electronically mediated performance. This interdisciplinary studio course explores interactive dance contexts. Through the creation of electronically mediated performance environments, students in dance and new media art collaborate to merge movement and technology. Prerequisite: FA/FACS 3931 3.00 or FA/DANC 3220 3.00 or FA/DANC 4220 3.00 or permission of the course director.

Cross-listed to: FA/DANC 4221 3.00, FA/FACS 4932 3.00

FA/FACS 4934 3.00 Tactical Media: Art and Activism through New Media. Explores the manifold manners in which art and activism intersect within new technological environments, specifically the Internet. The work of contemporary new media activists will be studied in the context of historical sociopolitical interventionist practices. Prerequisite: Six credits in FACS New Media at the third year level or permission of the course director.

FA/FACS 4935 3.00 New Media Forms: Virtual Communities. Examines virtual communities in the context of doing creative work. We will examine the history of multi-user environments, explore systems that support such work, and pursue creative projects in a virtual environment. Prerequisite: Six credits in the FACS new media area at the third-year level or permission of course director.

FA/FACS 4940 3.00 Art, Music, and Some Languages of Interdisciplinarity. Explores a variety of relationships which have been established between art and music-or, more broadly, between image and sound-through the 20th and 21st century. It offers the opportunity to (re)evaluate from interdisciplinary perspectives the production and cultural positioning of each discipline, or medium, in light of the other as well as to consider the transformative character of artistic productions which result from their marriage. In conjunction, the course works toward developing a critical language which can both explicate, and mediate between, the visual and the aural along with the perceptual experiences they generate. Prerequisite: FA/FACS 1900 6.00 and fourth-year standing or permission of the course director.

FA/FACS 4945 3.00 SoundaXis: Architecture Music Acoustics. Explores intersections between architecture and music, especially as they converge in the interdisciplinary field of acoustics, or the direction and perception of sound. Taking into account a wide range of experiments by architects, composers, artists, filmmakers, and performers, the course will consider relationships between space and sound, the pivotal role of the body in negotiating these relationships, and the possibilities for experiencing the city as a series of soundscapes. Course credit exclusion: FA/FACS 4920L 3.00

FA/FACS 4950 3.00 Independent Study. Accommodates advanced students who wish to undertake an independent project based in the studies stream, studio stream, or a combination of both. Project content must be related to the mandate of the FACS program. Proposals and accompanying bibliography must be signed by a FACS faculty supervisor and approved by the FACS coordinator. Open by application only. Course credit exclusion: FA/FACS 4960 3.00, FA/FACS 4950 6.00.

FA/FACS 4950 6.00 Independent Studies. Accommodates advanced students who wish to undertake an independent project based in the studies stream, studio stream, or a combination of both. Project content must be related to the mandate of the FACS program. Proposals and accompanying bibliography must be signed by a FACS faculty supervisor and approved by the FACS coordinator. Open by application only. Course credit exclusion: FA/FACS 4950 6.00, FA/FACS 4960 3.00.

FA/FACS 4960 3.00 Internship. Allows advanced students to undertake an approved internship at an arts or educational organization. Internship activity must be related to the mandate of the FACS program. Proposals must be signed by a FACS faculty supervisor and approved by the FACS coordinator. Not available to students who have taken FA/FACS 4950 3.00: Independent Study. Prerequisite: Open by application only. Course credit exclusion: FA/FACS 4960 6.00.

FA/FACS 4970 3.00 Interdisciplinary Seminar. A seminar which revisits relations between the arts and interdisciplinary through a theme selected by the course director. Prerequisites: Fourth-year standing and FA/FACS 1900 6.00 or permission of the course director.

FA/FACS 4970A 3.00 Performance: Theory and Practice. While introducing performance studies as a new and encompassing scholarly field, this course will also focus on performance as an elaborated cultural form in both the Western and non-Western worlds. Prerequisite: Fourth-year standing in the Faculty of Fine Arts or permission of the course director.

The Department of French Studies offers courses in three curricular areas enabling students to pursue interests in French language, linguistics, and literature. The language-skills courses form a prescribed language sequence designed to help students improve their proficiency in French. The curricular core consists of courses in French language, literature and linguistics. In addition to Honours BA and BA degree programs, the Department of French Studies offers Certificates of Language Proficiency in Basic French, Intermediate French and Advanced French.

For specific program or certificate requirements, please consult the Faculty of Liberal Arts and Professional Studies Programs of Study section.

Courses in French Studies

A language placement questionnaire must be filled out by students prior to enrolling for the first time in the Department of French Studies.

In order to proceed from one level of French studies to the next (the four levels being 1000, 2000, 3000, 4000), a student must obtain a minimum grade of C in each language course. In order to proceed to AP/FR 4090 6.00, a minimum grade of B must be achieved in AP/FR 3080 6.00 or AP/FR 3081 3.00 and AP/FR 3082 3.00.

AP/FR 1020 6.00 Introductory French. This course, which is designed for beginners or near-beginners, focuses on the development of basic oral and written skills in French and offers an introduction to French culture. Note: Students may only register in AP/FR 1020 6.00 through a language placement questionnaire. Course credit exclusions: GL/FRLS 0400 6.00. PRIOR TO FALL 2009: Course credit exclusions: GL/FRLS 0400 6.00 and AS/FR 1020 6.00.

Language of Instruction: French

AP/FR 1030 6.00 Intermediate French. This course is designed for students who have previously studied French. The aims of the course are to consolidate basic oral and written skills, to apply them in various contexts relating to everyday life, and to raise cultural awareness. Prerequisite: AP/FR 1020 6.00 (with a minimum grade of C), GL/FRLS 0400 6.00 (with a minimum grade of C), or through a language placement questionnaire. Course credit exclusions: GL/FRLS 1500 6.00. PRIOR TO FALL 2009: Prerequisite: AS/FR 1020 6.00 (with a minimum grade of C), GL/FRLS 0400 6.00 (with a minimum grade of C), or through a language placement questionnaire. Course credit exclusions: GL/FRLS 1500 6.00 and AS/FR 1030 6.00.

Language of Instruction: French

AP/FR 1060 6.00 Business and Culture in French. Designed for students interested in business, this language course focuses on oral and, to a lesser extent, written French. It examines the role of the corporate world in our society and its influence on social issues. Note: Internet access is required for this course. Geography is a unique discipline in that it rests on all the three pillars of intellectual life: physical sciences, social sciences and humanities. Consequently it offers students opportunities to understand and explore different dimensions of the world in which we live and offers a synthetic approach to understanding landscapes, people, places and environments. Geography asks questions about how environmental, social, political and cultural processes shape how the world functions (and often fails to

function!). In particular, geography is concerned with the spatial variations of human and physical phenomena, the processes that produce these variations and the interrelationships between people and their environments. Our courses are divided into seven themes, each of which include regional and systematic courses:

- The City;
- Globalization, Environment and Development;
- Production and the Politics of Difference;
- State, Empire and Power;
- Extreme Environments;
- Biophysical Processes and Geoinformatics.

Students are exposed to the breadth of geography in the Years 1 and 2 and encouraged to specialize in one or more of these themes in Years 3 and 4.

For specific Honours BA and BA program requirements please consult the Faculty of Liberal Arts and Professional Studies Programs of Study section. For specific Honours BSc and BSc program requirements please consult the Faculty of Science and Engineering Programs of Study section.

The department also offers a Specialized Honours BA in geography and urban studies. For details, please consult the Faculty of Liberal Arts and Professional Studies Programs of Study section.

Courses in Geography

Prerequisites: the specific course prerequisites listed for geography courses in this Undergraduate Calendar are intended to ensure that students do not unwittingly enrol in courses for which they have inadequate preparation. In some cases, students lacking the stated course prerequisite(s) may be permitted to enrol in the course by written permission of the course director.

AP/GEOG 2105 3.00 Economic Geography. This course provides an introduction to the geography of economic production units, regional agglomerations of industry, flows of international trade, labour and investment, and the changing political, cultural and environmental context of modern consumption-driven society. Prerequisites: One of: AP/GEOG 1000 6.00, AP/GEOG 1410 6.00, an introductory course (full or half) in Economics or written permission of the course director. Course credit exclusion: AP/GEOG 2100 6.00. Prerequisites: One of: AK/GEOG 2500 6.00, AS/GEOG 1000 6.00, AS/GEOG 1410 6.00, an introductory course (full or half) in Economics or written permission of the course director. Course credit exclusions: AS/GEOG 2100 6.00 and AS/GEOG 2105 6.00.

AP/SC/GEOG 2130 3.00 Fundamentals of Map Design and Interpretation. This course introduces the basic principles and conventions for compiling, designing, drafting and interpreting maps and other visual representations of geographic data. Two lecture hours, one scheduled laboratory hour. One term. Prerequisite: One of: AP/SC/GEOG 1400 6.00, AP/GEOG 1410 6.00. Course credit exclusions: None. Prior TO FALL 2009: Prerequisite: One of: AK/GEOG 2500 6.00, AK/GEOG 2510 6.00, AS/SC/GEOG 1400 6.00, or AS/GEOG 1410 6.00. Course credit exclusion: AS/GEOG 2130 3.00.

AP/GEOG 2220 6.00 Urban Geography. In a world where over 50 per cent of the population lives in urban areas, cities play a significant role in shaping the social, cultural, economic, political, and environmental conditions of people's everyday lives. This course introduces the geographical literature on the urbanization process in historical and contemporary perspective. It provides students with a necessary general survey of the characteristics of urban processes and patterns, urban systems and structure, and urban social issues from a geographical perspective. Course credit exclusions: None. PRIOR TO FALL 2009: Course credit exclusions: AS/GEOG 3120 6.00 and AK/GEOG 3430 6.00.

AP/GEOG 2300 6.00 Social Geography. A study of social processes underlying spatial patterns, relationships and interactions within and among social groups. The course examines urban and rural social structures within their spatial settings, focusing on social and environmental problems and solutions. Prerequisite: AP/GEOG 1000 6.00 or AP/GEOG 1410 6.00. Course credit exclusions: None. Prior TO FALL 2009: Prerequisite: AK/GEOG 2500 6.00 or AS/GEOG 1000 6.00 or AS/GEOG 1410 6.00. Course credit exclusions: AK/GEOG 3410 6.00, AK/SOSC 3302 6.00, AS/GEOG 2300.

AP/GEOG 2305 3.00 Geographies of Identity. This course examines the production, reproduction and mediation of identities through space and place at various scales. The course will introduce students to the complex relations between space, place and identity, and ask them to think critically about the spaces of their own lives. Course credit exclusions: None. Prior TO FALL 2009: Course credit exclusion: AS/GEOG 2305 3.00.

AP/GEOG 2310 6.00 Introduction to Refugee and Migration Studies. An introduction to the problem of refugees: conceptual issues (definitions, refugee rights, ethical norms), the historical background, Canadian policy and the issues in specific areas of the world - Africa, Asia, Latin America, Eastern Europe and the Middle East. Prerequisite: A 1000-level social science course. Course credit exclusions: AP/SOSC 1130 9.00, AP/SOSC 1139 9.00. Prior TO FALL 2009: Prerequisite: A 1000-level social science course. Course credit exclusions: AS/SOSC 1130 9.00, AS/SOSC 1139 9.00, AK/SOSC 2000 6.00.

Cross-listed to: AP/GEOG 2310 6.00, AP/REI 2000 6.00

AP/SC/GEOG 2350 3.00 Introduction to Geoinformatics. This course covers fundamental concepts and approaches of geographical information systems, remote sensing and global positioning systems. Students also acquire knowledge and skills in descriptive statistics, map design and interpretation, and basic computer cartography. Two hour lecture, two hour lab. Prerequisite: AP/GEOG 1000 6.00 or AP/GEOG 1400 6.00 or AP/GEOG 1410 6.00 or written permission of the course director. Course credit exclusions: SC/EATS 2610 2.00, SC/ENG 2110 2.00. Prior TO FALL 2009: Prerequisite: AK/GEOG 2500 6.00 or AK/GEOG 2510 6.00 or AS/GEOG 1400 6.00 or AS/GEOG 1410 6.00 or AS/GEOG 1000 6.00 or written permission of the course director. Course credit exclusions: AS/GEOG 2350 3.00, AS/SC/GEOG 2390G 3.00 (prior to Fall/Winter 2003-2004), SC/EATS 2610 2.00, SC/ENG 2110 2.00.

Cross-listed to: AP/GEOG 2350 3.00, SC/GEOG 2350 3.00

AP/SC/GEOG 2400 6.00 The Hydrosphere. This course examines the physical processes and the environmental factors that govern the movement of water and energy in lakes, rivers, oceans and the soil-plant-atmosphere continuum. Boundary-layer climates and mechanisms of water movement and storage are emphasized. Two lecture hours per week, 16 three-hour laboratories over two terms. Prerequisite: AP/SC/GEOG 1400 6.00. Course credit exclusions: None. Prior TO FALL 2009: Prerequisite: AK/GEOG 2510 6.00 or AS/SC/GEOG 1400 6.00. Course credit exclusions: AS/GEOG 2400 6.00.

Cross-listed to: AP/GEOG 2400 6.00, SC/GEOG 2400 6.00

AP/SC/GEOG 2420 3.00 Introductory Statistical Analysis in Geography. This introductory course aims to provide a working knowledge of several statistical techniques which are widely used in many branches of geography. Some attention is also given to broader questions concerning the nature of the scientific method. Two lecture hours per week, nine two-hour laboratory sessions. One term. Prerequisites: 24

credits successfully completed. This course is intended primarily for students majoring in geography and is normally taken during the second year of study. NCR: AK/GEOG 3520 3.00. AP/GEOG 3010 6.00 Geography of Canada. A study of basic physical and human geographical patterns in Canada, stressing the processes which produced the latter, and selected characteristics of major Canadian regions. Tutorials require intensive reading in selected sources. Prerequisite: One of AP/GEOG 1410 6.00 or AP/SC/GEOG 1400 6.00. Course credit exclusions: None. Prior TO FALL 2009: Prerequisite: One of AK/GEOG 2500 6.00 or AK/GEOG 2510 6.00 or AS/GEOG 1410 6.00 or AS/SC/GEOG 1400 6.00. Course credit exclusions: AK/GEOG 3540 6.00, AS/GEOG 3010 6.00.

AP/GEOG 3030 3.00 Peopling of Ontario. This course deals with the process of an agricultural population occupying a new territory, gradually developing it, and participating in its transformation from rural - to urban-dominated. There will be a strong historical emphasis, especially embracing the 19th and early 20th centuries, and a number of specific aspects and demographic trends will be followed into recent decades. The peopling of Ontario will be placed in the context of the peopling of Canada. Attention will be paid to emigration and immigration and to the ethnic

component at various periods. Course credit exclusions: None. PRIOR TO FALL 2009: Course credit exclusions: AK/GEOG 3550D 3.00 (prior to Summer 2004), AK/GEOG 3550D 6.00 (prior to Fall/Winter 1998-1999), AK/GEOG 3550 3.00.

AP/GEOG 3040 3.00 Urban Environmental Justice. This course examines how processes of urbanization result in the unequal spatial and social distribution of environmental goods (e.g., pollution, toxic waste, landfills) in North American cities. It investigates the ways in which cities, as dynamic human ecologies in their own right, have increasingly become sites of environmental contestation, and explores the articulation of social justice, urbanization and environmentalism. Course credit exclusions: None. PRIOR TO FALL 2009: Course credit exclusion: AK/GEOG 3520 3.00.

AP/GEOG 3050 3.00 Nature, Power and Society. This course examines the geographic understanding of nature-society relationships. We review popular and scientific theories of environmental change, conflict and conservation, and examine the role that politics and power play in shaping ecological problems and issues. Prerequisites: 54 credits completed including at least three credits in geography (GEOG) or permission of the instructor. Course credit exclusions: None. PRIOR TO FALL 2009: Prerequisites: 54 credits completed including at least three credits in geography (GEOG) or permission of the instructor. Course credit exclusions: AK/GEOG 3450 6.00 (prior to Summer 2003), AS/GEOG 3050 3.00 and AS/GEOG 3050 6.00 (prior to Fall/Winter 2005-2006).

AP/GEOG 3051 3.00 International Political Ecology. This course applies a political ecological approach to the understanding of nature-society relationships. Using case studies from Asia, Africa and the America, the course examines the everyday realities of people and landscapes affected by environmental change, conflict and conversation. Prerequisite: AP/GEOG 3050 3.00 or permission of the instructor. Course credit exclusions: None. PRIOR TO FALL 2009: Prerequisite: AS/GEOG 3050 3.00 or permission of the instructor. Course credit exclusions: AS/GEOG 3050 6.00 (prior to Fall/Winter 2005-2006), AS/GEOG 3051 3.00.

AP/GEOG 3060 3.00 Post-Colonial Geographies. This course examines the particular landscapes produced by colonialism and the struggles to move beyond it. Attention is paid to the use of space and place as mechanisms of control and liberation. Examples are international, and concern fictional and non-fictional landscapes. Prerequisite: 54 credits successfully completed. Course credit exclusions: None. PRIOR TO FALL 2009: Prerequisite: 54 credits successfully completed. Course credit exclusion: AS/GEOG 3060 3.00.

AP/GEOG 3080 3.00 Reading Landscapes Through Time. Cultural landscapes change over time. This can result from changes in legal tenure, cultural adaptation, changes in the economic base or historical events. This course considers landscapes in various countries in chronological sequence. Course credit exclusions: None. PRIOR TO FALL 2009: Course credit exclusion: AS/GEOG 3080 3.00.

Cross-listed to: AP/GEOG 3080 3.00, AP/HIST 3890 3.00

AP/GEOG 3081 3.00 Land and People: Historical Geographies of Modern Ireland. This course explores selected themes on the historical geography of Ireland, concentrating on the period since 1600. Attention is paid to the role and impact of economic, cultural, and political processes that have shaped Irish landscapes and senses of place. Course credit exclusions: None. PRIOR TO FALL 2009: Course credit exclusion: AS/GEOG 3081 3.00.

AP/GEOG 3130 3.00 The Global Economy. This course examines the evolution of the world economy as well as the major institutions that have supported it, and interprets the new geography of investment, production and consumption that accompanies it. Course credit exclusions: None. PRIOR TO FALL 2009: Course credit exclusion: AS/GEOG 3130 3.00.

AP/GEOG 3140 3.00 Retailing, Shopping, Society and Space. This course provides an overview of consumer shopping behaviour, the structure and process of retail location, and various social and economic issues associated with the contemporary retail economy. The geographical perspective is emphasized. Prerequisites: 54 credits passed, including AP/GEOG 1000 6.00 or AP/GEOG 1410 6.00 or written

permission of the course director. Course credit exclusion: AP/GEOG 3100 3.00. Prior TO FALL 2009: Prerequisites: 54 credits passed, including AK/GEOG 2500 6.00 or AS/GEOG 1000 6.00 or AS/GEOG 1410 6.00 or written permission of the course director. Course credit exclusions: AK/GEOG 3100 3.00, AK/GEOG 3100A 3.00 (prior to Fall/Winter 2005-2006), AS/GEOG 3140 3.00.

AP/SC/GEOG 3180 3.00 Introduction to Geographic Information Systems (GIS). An introduction to the application of GIS to geographical/environmental problems. A broad conceptual overview of GIS approaches and their strengths and limitations. Students gain hands-on experience in the use of raster-based GIS technology with particular reference to resource management and planning topics. One and one-half lecture hours, one and one-half laboratory hours. One term. Prerequisite: AP/SC/GEOG 2420 3.00. Course credit exclusion: ES/ENVS 3520 3.00. PRIOR TO FALL 2009: Prerequisite: AS/SC/GEOG 2420 3.00. Course credit exclusions: ES/ENVS 3520 3.00, AS/GEOG 3180 3.00.

Cross-listed to: AP/GEOG 3180 3.00, SC/GEOG 3180 3.00

AP/SC/GEOG 3200 3.00 Terrestrial Ecosystems. An examination of the structure and function of vegetation and soil systems. The course focuses on such topics as the adjustment of ecosystems to human modification and the role of biogeography in conservation and resource management. Three lecture hours. One term. Prerequisites: 54 credits successfully completed, including one of AP/SC/GEOG 1400 6.00 or ES/ENVS 2420 3.00 or SC/BIOL 2050 4.00. Course credit exclusions: None. Prior TO FALL 2009: Prerequisites: 54 credits successfully completed, including one of AK/GEOG 2510 6.00 or AS/SC/GEOG 1400 6.00 or ES/ENVS 2420 3.00 or SC/BIOL 2050 4.00. Course credit exclusion: AS/GEOG 3200 3.00.

Cross-listed to: AP/GEOG 3200 3.00, SC/GEOG 3200 3.00

AP/GEOG 3220 6.00 Advanced Urban Geography. This course addresses significant contemporary urban issues that frame geographic understandings of metropolitan change in the twenty-first century. Attention is directed towards understanding how cities are produced, consumed, and theorized as complex social, economic, ecological, and political systems. Case studies are drawn from Canada and other More Economically Developed and Less Economically Developed countries. Through lectures, discussion, and assignments students are encouraged to challenge geographical interpretations of the urban world, and to think critically about cities as products of capital investment, as collective public goods, and as socio-cultural spaces. Prerequisites: 54 credits including AP/GEOG 2220 6.00. Course credit exclusions: None. PRIOR TO FALL 2009: Prerequisites: 54 credits including AS/GEOG 3120 6.00. Course credit exclusion: AK/GEOG 4180 6.00.

AP/GEOG 3250 3.00 Environmental Perception and Natural Disasters. This course assesses the way people perceive their environment. Initially the course considers the theory of environmental perception. Considerable emphasis is placed on appraisal of natural and technological hazards and cultural perception. Course credit exclusions: None. PRIOR TO FALL 2009: Course credit exclusion: AS/GEOG 3250 3.00.

AP/GEOG 3300 3.00 Space/Place. This course explores the construction, reproduction and representation of space, place and scale. Students are introduced to important socio-spatial theories that have affected how geographers understand such key concepts, including feminism, Marxism and postmodernism. Prerequisites: 54 credits passed. Course credit exclusions: None. PRIOR TO FALL 2009: Prerequisites: 54 credits passed. Course credit exclusion: AS/GEOG 3300 3.00.

AP/SC/GEOG 3360 3.00 Morphogenesis of Soils. This course is concerned with the systematic study of climate, vegetation, parent material, topography and time on the development, classification and chemistry of soils. A field trip and laboratory work will form part of this course. Course credit exclusions: None. PRIOR TO FALL 2009: Course credit exclusions: AK/GEOG 3360 3.00 and AK/GEOG 3360 6.00.

Cross-listed to: AP/GEOG 3360 3.00, SC/GEOG 3360 3.00

AP/GEOG 3370 3.00 Spaces of Third World Development. The course deals with conceptual debates on "Third World" development. It explores issues of development including economic growth and poverty, resource use, agrarian change, industrial transformation, service-sector development, rural-urban inequality, gender relations, neoliberalism and imperialism, and prospect for democracy and macro-level structural social change in the less developed world. Prerequisites: 54 credits successfully completed, including AP/GEOG 1000 6.00 or AP/GEOG 1400 6.00 or written permission of the course director. Course credit exclusion: AP/GEOG 4370 3.00. Prior TO FALL 2009: Prerequisites: 54 credits successfully completed, including AS/GEOG 1000 6.00 or AS/GEOG 1400 6.00 or written permission of the course director. Course credit exclusions: AS/GEOG 3370 3.00, AS/GEOG 4370 3.00.

AP/GEOG 3400 3.00 Dimensions of Difference: Introduction to Feminist Geography. This course considers the construction, reproduction and representation of identity and difference in, through and across space and time. This course will introduce students to important feminist theorists and academics that have affected how geographers understand social relations through space, including gender relations and their intersection with race and power relations. Prerequisites: 54 credits successfully completed. Course credit exclusions: None. PRIOR TO FALL 2009: Prerequisites: 54 credits successfully completed. Course credit exclusion: AS/GEOG 3400 3.00.

AP/GEOG 3410 6.00 Gender Population & Migration. Characteristics and problems in growth and distribution of human populations, including birth, fertility and death rates, population growth and environment, globalization and migration and population control policies. Gender perspectives are emphasized. Course credit exclusions: None. PRIOR TO Fall 2009: Course credit exclusion: AK/SOCI 3880D 6.00 (prior to Summer 2005), AK/GEOG 3400 6.00.

AP/SC/GEOG 3421 3.00 Intermediate Statistical Methods in Geography. This course examines the application of methods of geographical analysis to empirical data sets representing geographical and ecological phenomena. Bivariate linear regression and multiple regression and time/spatial series are emphasized. Two lecture hours, two laboratory hours. One term. Prerequisite: AP/SC/GEOG 2420 3.00 or equivalent. Course credit exclusions: AP/SC/MATH 3033 3.00, AP/SC/MATH 3034 3.00, AP/SC/MATH 3230 3.00, AP/SC/MATH 3330 3.00, AP/POLS 3300 6.00, AP/SC/PSYC 2020 6.00, AP/SC/PSYC 2022 3.00, AS/SOCI 3030 6.00 and HH/PSYC 3030 3.00. PRIOR TO FALL 2009: Prerequisite: AS/SC/GEOG 2420 3.00 or equivalent. Course credit exclusions: AK/AS/SC/MATH 3034 3.00, AK/AS/SC/MATH 3230 3.00, AK/AS/SC/MATH 3330 3.00, AK/AS/SC/PSYC 2020 6.00, AK/AS/SC/PSYC 2022 3.00, AK/AS/SC/PSYC 3030 3.00 (Prior to Fall/Winter 2007-08), AK/PSYC 3110 3.00 (prior to Fall/Winter 2002-2003), AS/GEOG 3421 3.00, AS/POLS 3300 6.00, AS/SC/MATH 3033 3.00, AS/SOCI 3030 6.00 and HH/PSYC 3030 3.00.

AP/SC/GEOG 3440 3.00 Environmental Remote Sensing. This course represents an introduction to the methods in which remote sensing data are collected, processed and analyzed. An emphasis is placed on environmental applications. The synergy between the technologies of remote sensing and geographic information systems (GIS) is also stressed. Two lecture hours, two laboratory hours. One term. Prerequisites: AP/SC/GEOG 2420 3.00 or ES/ENVS 2010 6.00 and one 2000-level environmental studies theme foundation course; or written permission of the course director. Course credit exclusions: None. PRIOR TO FALL 2009: Prerequisites: AS/SC/GEOG 2420 3.00 or ES/ENVS 2010 6.00 and one 2000-level environmental studies theme foundation course; or written permission of the course director. Course credit exclusion: AS/GEOG 3440 3.00.

AP/GEOG 3490 3.00 Making Canada. This course investigates the historical transformations of Canada's geography prior to the 20th century, including settlement by indigenous peoples, resettlement by colonizing and immigrant populations, the expansion of the nation-state's territory, land clearance, resource extraction and related geographies of the labour

force, the creation of national parks, and urbanization. Course credit exclusions: None. PRIOR to Fall 2009: Course credit exclusion: AK/GEOG 3490 6.00.

AP/SC/GEOG 3500 3.00 Biogeography. An analysis of the geography of plants and animals emphasizing processes that operate at the population level, the origin and diversity of plants and animals, geographic patterns of diversity, and dynamics of species populations from local to continental scales. Two lecture hours, two laboratory hours. One term. Prerequisite: AP/SC/GEOG 2500 3.00 or SC/BIOL 2050 4.00. Course credit exclusions: None. PRIOR TO FALL 2009: Prerequisite: AS/SC/GEOG 2500 3.00 or SC/BIOL 2050 4.00. Course credit exclusion: AS/GEOG 3500 3.00.

AP/GEOG 3510 3.00 Methods of Sediment. An examination of methods of laboratory analysis of soils and sediments including soil/sediment sampling, particle size, water and organic component analyses, microscopic analysis and data interpretation. Special emphasis is placed on methods of analysis in soil/sediment research. Course credit exclusions: None. PRIOR TO FALL 2009: Course credit exclusion: AK/GEOG 3370 3.00.

AP/GEOG 3590 3.00 Conservation in Canada. This course investigates the significance of conservation in Canada, charting its history, and examining the socio-political and economic trends that gave rise to a particular vision of conservation. The course additionally examines the social and environmental effects of conservation policies and practices and the significance of these measures for the Canadian nation-state. Course credit exclusions: None. PRIOR TO FALL 2009: Course credit exclusion: AK/GEOG 3590 6.00.

AP/GEOG 3600 3.00 Nations and Nationalisms. This course examines theories, geographies and histories of nations, nationalisms and nation-states. Course credit exclusions: None. PRIOR TO FALL 2009: Course credit exclusion: AS/GEOG 3600 3.00.

AP/GEOG 3650 6.00 WiredCities: Community, Technology and Changing Urban Places. Examines the impact of technology on urban form, urban function and community. Emphasis is placed on the social, economic and political parameters of urban infrastructure, community formation, and everyday life in the wake of technological change. AP/GEOG 3710 3.00 Society, Space and Environment in South Asia. This course deals with the historical-geographical specificities of South Asia that are products of its own internal economic-political evolution and physical environmental context as well as of its historical and contemporary linkages to other parts of the world. Prerequisites: 54 credits successfully completed, including at least one of AP/GEOG 1000 6.00 or AP/GEOG 1410 6.00 or AP/SC/GEOG 1400 6.00, or written permission of the course director. Course credit exclusions: None. Prior TO FALL 2009: Prerequisites: 54 credits successfully completed, including at least one of AS/GEOG 1000 6.00 or AS/GEOG 1410 6.00 or AS/SC/GEOG 1400 6.00, or written permission of the course director. Course credit exclusion: AS/GEOG 3710 3.00.

AP/GEOG 3730 6.00 Comparative Urban Development. Significant dimensions of urbanization and urban-rural relationships are examined comparatively across major world regions, with emphasis upon Africa, Asia and Latin America. Students may choose a regional focus for research papers, including North America. Migration patterns, socio-economic structure of cities, values and images of rural and urban life, employment and planning to meet the needs of growing cities are the principal topics covered. Course credit exclusions: None. PRIOR TO FALL 2009: Course credit exclusion: AS/SOSC 3730 6.00.

Cross-listed to: AP/GEOG 3730 6.00, AP/SOSC 3730 6.00

AP/GEOG 3740 3.00 Qualitative Research Methods in Human Geography. This course examines qualitative research design and philosophical bases of qualitative approaches to knowledge, as well as practical techniques such as questionnaire surveys, participant observations, interview/focus groups, archival research and content/textual analysis. These techniques are applied in practical settings involving fieldwork. Course credit exclusions: None. PRIOR TO FALL 2009: Course credit exclusion: AS/GEOG 3740 3.00.

AP/GEOG 3750 3.00 Africa: The Impoverishment of a Continent. This course critically examines the changing geography and depletion of Africa's resources from the precolonial to the present, with an emphasis on current events. The course covers a range of topics, including agriculture, natural resource extraction, migration, the slave trade, and AIDS. Course credit exclusions: None. PRIOR TO FALL 2009: Course credit exclusion: AS/GEOG 3750 3.00.

AP/GEOG 3770 3.00 Housing Policy. The course studies Canadian housing policy using the approaches of economics, political science and public administration. The course examines models of housing markets, the effects of housing policies, the politics and process of policy formation and procedures for policy evaluation. AP/GEOG 4050 3.00 Nature, Neoliberalism and Political Ecology. This seminar explores complementary scholarship on 'first world' political ecology and the commodification of nature in order to critically explore issues of environmental management and resource conflict. It will draw on case studies about rural and urban North American environments. Prerequisites: 54 credits successfully completed including AP/GEOG 3050 3.00 or permission of the course director. Course credit exclusions: None. PRIOR TO FALL 2009: Prerequisites: 54 credits successfully completed including AS/GEOG 3050 3.00 or permission of the course director. Course credit exclusion: AS/GEOG 4050 3.00.

AP/GEOG 4051 3.00 Comparative Politics of Environment and Development. This course applies a political ecological approach to the understanding of nature-society relationships. Using case studies from Asia, Africa and the America, the course examines the everyday realities of people and landscapes affected by environmental change, conflict and conversation. Prerequisite: AP/GEOG 3050 3.00 or permission of the instructor. Course credit exclusions: None. PRIOR TO FALL 2009: Prerequisite: AS/GEOG 3050 3.00 or permission of the instructor. Course credit exclusions: AS/GEOG 3050 6.00 (prior to Fall/Winter 2005-2006), AS/GEOG 3051 3.00.

AP/GEOG 4060 3.00 Women in North America: Historical Geographies of Gender and Sexuality. This course explores the changing geographies of women in Canada and the United States over the past three centuries, focusing on the historical and spatial construction of gender. Course credit exclusions: None. PRIOR TO FALL 2009: Course credit exclusions: AS/GEOG 4060 3.00, AS/HIST 4050E 3.00 (prior to Fall/Winter 2003-2004) and AS/HIST 4081 3.00 (prior to Fall/Winter 2005-2006).

AP/GEOG 4065 3.00 Geographies of Gender, Environment, and Development. This course critically explores the histories and geographies of gender, environment and development in Latin America, including the ways in which gendered identities influence the definition, understanding and protection of environments, and access to natural resources. Course credit exclusions: None. PRIOR TO FALL 2009: Course credit exclusion: AS/GEOG 4065 3.00.

AP/GEOG 4070 6.00 Gender, Population and Migration. Characteristics and problems in growth and distribution of human populations, including birth, fertility and death rates, population growth and environment, globalization and migration and population control policies. Gender perspectives are emphasized. Course credit exclusions: None. PRIOR TO Fall 2009: Course credit exclusion: AK/SOCI 3880D 6.00 (prior to Summer 2005), AK/GEOG 3400 6.00.

AP/GEOG 4090 3.00 Urban Identities: Historical Perspectives on Race, Ethnicity, Gender and Class in Canadian and American Cities. This course considers the historical and spatial construction of racial, ethnic, gender and class identities in the broader context of urban development in Canada and the United States in the 19th and 20th centuries. Prerequisite: AP/GEOG 2220 6.00 or AP/GEOG 4040 6.00 or AP/GEOG 4170 3.00 or AP/GL/WMST 3505 3.00 or AP/SOSC 2710 9.00 or AP/SOSC 3760 6.00 or AP/SOCI 3830 6.00 or AP/SOCI 4055 6.00 or AP/SOCI 4120 6.00 or written permission of the course director. AP/GEOG 4095 3.00 Aboriginal; Space and the City: North American Urbanization and Aboriginal People, 1890-1980. This course considers the historical construction of Aboriginal space in Canada and the US and its relationship to cities, from early colonization to the present. Course credit exclusions: None. PRIOR TO FALL 2009: Course credit exclusion: AS/GEOG 4095 3.00.

AP/GEOG 4130 3.00 Planning Suburbs. From garden suburbs to post-war inner- and outer-suburbs, from New Urbanist communities to edge cities, technoburbs, and exurbs, this course critically considers the planning of suburban built form and the suburbanization process in historical perspective. Consideration is given to the mechanisms and the challenges of managing suburban growth, and to the complex socio-cultural geographies and values that shape the suburbs and the suburban way of life. Attention is directed to issues of gender, racialized poverty, unemployment, infrastructural inadequacy, sprawl, and sustainability, and an effort is made to envision alternative futures. Course credit exclusions: None. PRIOR TO FALL 2009: Course credit exclusion: AK/GEOG 4130 6.00.

Cross-listed to: AP/GEOG 4130 3.00, AP/URST 4130 3.00

AP/GEOG 4150 3.00 Foodscapes and Agri-scapes: Geographical Perspectives. The course explores the landscapes and scales of food and agriculture. Questions include: Can we change ourselves and the world through what we eat? Why do we still have world hunger? Who really controls how food is produced and consumed? Emphasis is given to food and agricultural geographies in the global south. Pre-requisites: 84 credits completed. Course credit exclusions: None.

AP/GEOG 4160 3.00 Risk Assessment in Resource Management. Theories and concepts of "risk" are discussed and evaluated critically with respect to public policy for the resources sector. The analytical framework employed distinguishes between risk estimation, risk evaluation, and risk management and communication activities. Resource management issues are analyzed with a focus on energy policy in Canada, in the context of environment-energy interactions. Normally offered in alternate years. Prerequisite: fourth year Honours standing in the Faculty of Environmental Studies or written permission of the instructor. Course credit exclusions: None. Prior TO FALL 2009: Prerequisite: AS/GEOG 3340 6.00 (prior to Summer 2002) or fourth year Honours standing in the Faculty of Environmental Studies or written permission of the instructor. AP/SC/GEOG 4400 3.00 Physical Hydrology and Water Resources. An intermediate course in the physical principles of hydrological and water resource systems. Topics to be discussed include groundwater storage and flow, deterministic hydrological models and physical hydrological aspects of current water resource problems. Normally offered in alternate years. Two lecture hours, two laboratory hours. One term. Prerequisite: AP/SC/GEOG 2400 6.00. Course credit exclusions: None. PRIOR TO FALL 2009: Prerequisite: AS/SC/GEOG 2400 6.00. Course credit exclusion: AS/GEOG 4400 3.00.

Cross-listed to: AP/GEOG 4400 3.00, SC/GEOG 4400 3.00

AP/SC/GEOG 4410 3.00 Desert Ecosystems. This course focuses on the vegetation of the desert, species adaptations to high temperature and aridity and the interactions between organisms, and between plants and their environment. Prerequisites: One of: AP/GEOG 1400 6.00 or SC/BIOL 2050 6.00. Course credit exclusions: None. Prior TO FALL 2009: Prerequisites: One of: AS/GEOG 1400 6.00 or SC/BIOL 2050 6.00. Course credit exclusion: AS/GEOG 4410 3.00.

Cross-listed to: AP/GEOG 4410 3.00, SC/GEOG 4410 3.00

AP/GEOG 4420 3.00 Project Experience in Geography. This course enables Honours students to apply work experience in geography to their degree program. It provides students an opportunity to put their classroom learning into practice in a non-academic environment. The objective is to encourage students to put geographic skills to work in the addressing of real world problems. Prerequisites: Permission of the course director. Students must be registered in an Honours Geography Program and must have successfully completed at least 84 credits, including AP/SC/GEOG 3420 3.00. Course credit exclusions: None. PRIOR TO FALL 2009: Prerequisites: Permission of the course director. Students must be registered in an Honours Geography Program and must have successfully completed at least 84 credits, including AS/SC/GEOG 3420 3.00. Course credit exclusion: AS/GEOG 4420 3.00.

AP/SC/GEOG 4440 3.00 Remote Sensing and Image Processing for Geographical Analysis and Environmental Monitoring. Sophisticated methods and techniques for collecting, processing and analyzing remote sensing data are examined. Special topics include image enhancement techniques (e.g. texture transforms), non-traditional image classification and data integration for incorporation of remote sensing data products into geographic information systems (GIS). One and one-half lecture hours, one and one-half laboratory hours. One term. Prerequisite: AP/GEOG 3440 3.00 or ES/ENVS 3521 3.00 or SC/EATS 4220 3.00 or written permission of the course director. Course credit exclusions: None. PRIOR TO FALL 2009: Prerequisite: AS/GEOG 3440 3.00 or ES/ENVS 3521 3.00 or SC/EATS 4220 3.00 or written permission of the course director. Course credit exclusion: AS/GEOG 4440 3.00.

Cross-listed to: AP/GEOG 4440 3.00, ES/ENVS 4521 3.00, SC/GEOG 4440 3.00

AP/SC/GEOG 4500 3.00 Northern Forest Environments. An examination of the northern forested regions of Canada: Coastal, Subalpine, Montane, Columbian, Boreal, Great Lakes-St. Lawrence and Acadian Forests. Various aspects of each region are explored, including vegetation composition and development, environmental conditions and major disturbance regimes. Two lecture hours, two laboratory hours. One term. Prerequisites: 84 credits successfully completed, including AP/SC/GEOG 2420 3.00, and AP/SC/GEOG 2500 3.00 or SC/BIOL 2050 4.00 or permission of the course director. Course credit exclusions: None. PRIOR TO FALL 2009: Prerequisites: 84 credits successfully completed, including AS/SC/GEOG 2420 3.00, and AS/SC/GEOG 2500 3.00 or SC/BIOL 2050 4.00 or permission of the course director. Course credit exclusion: AS/GEOG 4500 3.00.

Cross-listed to: AP/GEOG 4500 3.00, SC/GEOG 4500 3.00

AP/GEOG 4520 3.00 Research Design & Field Studies in Human Geography. The course is an introduction to research design and methodology in human geography. The course integrates on-campus preparation and report writing with off-campus fieldwork during which data collection and preliminary analysis are carried out. The fieldwork relates to a geographic problem offering scope for the special interests of students in various aspects of geography. Prerequisites: Students must be registered as Honours majors in geography and must have successfully completed 54 credits, including AP/SC/GEOG 1400 6.00 or AP/GEOG 2510 6.00; AP/GEOG 1000 6.00 or AP/GEOG 1410 6.00 or AP/GEOG 2500 6.00; AP/SC/GEOG 2420 3.00; or permission of the Department. Course credit exclusions: SC/MATH 3330 3.00, AP/SC/GEOG 4540 3.00. PRIOR TO FALL 2009: Prerequisites: Students must be registered as Honours majors in geography and must have successfully completed 54 credits, including AS/SC/GEOG 1400 6.00 or AK/GEOG 2510 6.00; AS/GEOG 1000 6.00 or AS/GEOG 1410 6.00 or AK/GEOG 2500 6.00; AS/SC/GEOG 2420 3.00; or permission of the Department. Course credit exclusions: AK/MATH 3330 3.00, AS/SC/GEOG 3390B 3.00 (prior to Fall/Winter 2002-2003), AS/GEOG 3420 3.00 (prior to Fall/Winter 2007-2008), AS/GEOG 4520 3.00 and AS/SC/GEOG 4540 3.00.

AP/SC/GEOG 4540 3.00 Field Studies in Physical Geography. This course begins with lectures on field research methodology. The second phase concentrates on defining a field problem, leading to data collection in the field. The final part of the course deals with data analysis, and reviews methodological implications. Two two-hour periods per week (including lectures, seminars and workshops), a three to four day field trip. One term. Prerequisites: Students must be registered as Honours majors

in Geography or Environmental Science and must have successfully completed AP/GEOG 2420 3.00 and one of AP/GEOG 2400 6.00, AP/GEOG 2500 3.00 or AP/GEOG 2600 3.00; or permission of the instructor. Course credit exclusions: SC/MATH 3330 3.00, AP/SC/GEOG 3420 3.00. PRIOR TO FALL 2009: Prerequisites: Students must be registered as Honours majors in Geography or Environmental Science and must have successfully completed AS/GEOG 2420 3.00 and one of AS/GEOG 2400 6.00, AS/GEOG 2500 3.00 or AS/GEOG 2600 3.00; or permission of the instructor. Course credit exclusions: AK/MATH 3330 3.00, AS/GEOG 4540 3.00, AS/SC/GEOG 3390B 3.00 (prior to Fall/Winter 2002-2003) and AS/SC/GEOG 3420 3.00.

Cross-listed to: AP/GEOG 4540 3.00, SC/GEOG 4540 3.00

AP/SC/GEOG 4600 3.00 Rivers: Environment and Process. This course provides fundamental knowledge of river mechanics and related environmental conditions. It provides an integration of physical, environmental and spatial aspects of river behaviour. The course involves the application of principles of hydrology, geomorphology, sedimentology and fluid mechanics. Course credit exclusions: None. PRIOR TO FALL 2009: Course credit exclusion: AS/GEOG 4600 3.00.

Cross-listed to: AP/GEOG 4600 3.00, SC/GEOG 4600 3.00

AP/GEOG 4605 3.00 The Greater Toronto Area: A Geographical Perspective. This course examines the processes and issues of urban growth and change in the Greater Toronto Area, including the forces shaping growth, the consequences of growth, and planning initiatives/proposals for managing growth. Prerequisite: Permission of the course director. Course credit exclusions: None. PRIOR TO FALL 2009: Prerequisite: Permission of the course director. Course credit exclusion: AS/GEOG 4605 3.00.

AP/GEOG 4610 3.00 Geopolitics. This course examines the geographic basis of the political evolution of the nation-state, from its emergence in Western Europe to its varied diffusions throughout the world. It explores notions of turf and territory, nationalism and the growth of geopolitical awareness. Prerequisites: At least 54 credits successfully completed, including AP/GEOG 1000 6.00 or AP/GEOG 1410 6.00. Course credit exclusions: None. PRIOR TO FALL 2009: Prerequisites: At least 54 credits successfully completed, including AS/GEOG 1000 6.00 or AS/GEOG 1410 6.00. Course credit exclusion: AS/GEOG 4610 3.00.

AP/GEOG 4700 3.00 The Critical Geographies of Education. This course explores the complex interactions between education, space and civil society. Particular emphasis is placed on the effects of policy restructuring on the geographies of educational landscapes. Theoretical and empirical studies are used to explore, analyze and critically engage in current debates. Course credit exclusions: None. PRIOR TO FALL 2009: Course credit exclusion: AS/GEOG 4700 3.00.

AP/GEOG 4750 3.00 Geography of Disabilities. This course explores the inter-relationships between disability, space and environment. It investigates the ways in which these have been treated in the social science literature, examines both individual and collective experiences, explores aspects of planning and design, especially in cities, and seeks paths towards an enabling geography. Prerequisites: AP/GEOG 1000 6.00 or AP/GEOG 1410 6.00, and 54 credits or permission of instructor. Course credit exclusions: None. PRIOR TO FALL 2009: Prerequisites: AS/GEOG 1000 6.00 or AS/GEOG 1410 6.00, and 54 credits or permission of instructor. Course credit exclusion: AS/GEOG 4750 3.00.

AP/GEOG 4800 3.00 Geographies of Organized Labour: Worker Struggles in Contemporary Economic Landscapes. This course explores the contemporary struggles of workers and their institutions to remain relevant actors in the making of economic landscapes. The central theme is the dynamic and multi-scalar nature of organized labour's response to aggressive and increasingly mobile capital. Course credit exclusions: None. PRIOR TO FALL 2009: Course credit exclusion: AS/GEOG 4800 3.00.

AP/GEOG 4850 3.00 The state, civil society and spaces of development. This course deals with theoretical and empirical understandings of the ways in which the state and civil society organizations co-determine the geography of development. Prerequisites:

54 credits successfully completed, including one of AP/GEOG 1410 6.00 or AP/GEOG 2100 3.00 or written permission of the Course Director. Course credit exclusions: None. Prior TO FALL 2009: Prerequisites: 54 credits successfully completed, including one of AS/GEOG 1410 6.00 or AS/GEOG 2100 3.00 or written permission of the Course Director. Course credit exclusion: AS/GEOG 4850 3.00.

AP/GEOG 4880 3.00 Spaces of Conflict, Violence, and Power. This course examines the spatial aspects of conflict, violence, and power across various scales from the body to the transnational arena. Topics include territory and state violence, terrorism, forced migration, environmental conflict, and the spatial dimensions of resisting violence. Course credit exclusions: None. PRIOR TO FALL 2009: Course credit exclusion: AS/GEOG 4880 3.00.

AP/GEOG 4900 3.00 Public Space. This course examines the existence, genealogies, qualities, significance, and use of public space, as well as past and emergent challenges and threats to public space. Course credit exclusions: None. PRIOR TO FALL 2009: Course credit exclusion: AS/GEOG 4900 3.00.

AP/GEOG 4999 3.00 Research Paper. The research paper, which is normally the last geography course of an Honours candidate, is a piece of work carried out under the supervision of a faculty adviser. Note: Students must be accepted by a faculty supervisor before they can register in this course. Prerequisites: 102 credits and permission of the Chair of geography. The course transaction form for such a course must be submitted with a note from the supervisor stating his or her willingness to perform this task. Course credit exclusions: None. German studies courses enable students to explore the enormous contributions the German-speaking world has made to world culture in the areas of music, art, literature, film, philosophy, education and science. Students can pursue a variety of major or minor programs or select individual courses to complement their existing areas of study. Students majoring in German also have the opportunity to study in Germany for one year through well-established exchange programs.

German is a vital tool for academic work in numerous disciplines across the fields of humanities and social sciences and is also a major language of business, diplomacy and tourism in the European Union and Eastern Europe. Language classes are open to students in any discipline and are offered at introductory to advanced levels. Students who complete a required number of language courses and pass an oral/written examination can obtain a certificate of proficiency.

Note: for general regulations and enrolment information please see Languages, Literatures and Linguistics within this section.

Courses in German Studies

The Specialized Honours BA program in Global Political Studies (GPS) provides students with the skills required to analyze global political forces, as well as giving them a broad and liberal education. The GPS program provides an excellent background for future public service work abroad, especially when combined with selected courses in the Public Policy and Administration program. As well, the GPS program is useful for anyone who hopes to find private sector employment in a job dealing with international issues, or for anyone who hopes to pursue graduate studies in international relations or comparative world politics.

Students may wish to specialize in areas such as development studies, post-communist studies, area studies, peace and security, or international political economy for the purposes of preparing for graduate school or for a particular employment goal. These students should consult the program coordinator to seek advice about appropriate course selection.

For specific program requirements and the list of program courses, please consult the Faculty of Liberal Arts and Professional Studies Programs of Study section.

Health and society is a term used to denote a body of scholarship that has emerged over the past 20 years in response to perceived limitations in a strictly biomedical approach to health issues. The health and society concept embraces research conducted in a number of overlapping interdisciplinary fields including: history and philosophy of medicine; medical sociology; behavioural medicine; medical anthropology; social epidemiology; psychosomatic medicine; health psychology; community mental health; international development; family, the life course and gerontology; occupational health and safety; environmental health and women and health.

The program aims to meet the needs of students who wish to go on to work in health-related occupations, to enter graduate programs in health studies, or simply to enrich the experience of those who have general interests in health-related issues.

For specific program requirements and the list of program courses, please consult the Faculty of Liberal Arts and Professional Studies Programs of Study section.

The Department of History offers courses covering thousands of years of history in Africa, Asia, Europe and the Americas. At the 1000 level, students are introduced to the discipline of history through courses that emphasize theory, method and historiography, and that concentrate on fundamental reading, writing, research and analytic skills. At the 2000 level, students are introduced to major chronological and geographic fields of history. More specialized courses are offered at the 3000 level, while 4000-level seminars and colloquia enable small groups of Honours students to focus on specific historical topics.

Courses at the 1000 level have either a lecture/tutorial or seminar format. Courses at the 2000 level normally have two lecture hours and one tutorial hour. Courses at the 3000 level are taught as colloquia, lecture/tutorial or lecture courses. 4000-level courses will be offered as two- or three-hour seminars or colloquia. All courses are open to students studying in other units, unless otherwise indicated. Admission to 4000-level courses is by permission of the instructor or the instructor's representative. The department urges all students whose concentration is in history to contact the appropriate faculty adviser before choosing courses.

All history courses are numbered and grouped according to field. The thousands digit indicates the level at which the course is offered, the hundreds digit indicates the field (general 000, ancient 100, medieval and early modern Europe 200, modern Europe 300, Great Britain 400, Canada 500, United States 600, Africa, Asia, Latin America and Caribbean 700, comparative and interdisciplinary 800), and the remaining two digits indicate the number of the course within the field.

For specific program requirements, please consult the Faculty of Liberal Arts and Professional Studies Programs of Study section.

The Department of Humanities offers a broadly-based program of interdisciplinary study emphasizing the different ways in which human cultures and their multiple forms of expression have developed historically and continue to develop today. Humanities courses devote particular attention to the cultural practices of peoples in various times and places and the ways they have expressed cultural values and ideas of a philosophical, religious, moral, political and aesthetic nature. They foster a critical approach to reading and research that, in helping students learn to identify and question preconceived assumptions and values, allows them to engage and appreciate the interrelationship between diverse value systems and thereby to develop an analysis of the human and of human community. Courses offered in the Department of Humanities stress careful scrutiny of texts and cultural artifacts, critical thinking, reading, writing, seminar discussion and close contact between teacher and student.

The Department of Humanities offers Honours BA, Honours iBA and BA degrees in humanities which allow students to take advantage of a wide range of courses addressing important themes in the liberal arts. The department also offers Honours BA, Honours iBA and BA degrees in Canadian studies, children's studies, classics, classical and Hellenic studies, culture and expression, East Asian studies, European studies, individualized studies, Jewish studies and religious studies. The department also participates in the Latin American and Caribbean Studies and Science and Technology Studies programs. Many humanities courses reflect these areas of concentration, thereby ensuring that humanities students have a wide range of course options to select from. For details, please consult the Faculty of Liberal Arts and Professional Studies Programs of Study section.

Most first-year and second-year courses offered through the Department of Humanities count towards the general education requirements of the Faculty of Liberal Arts and Professional Studies (see General Education Requirements). Foundations courses have a nine-credit value and place additional emphasis on developing critical thinking, reading and writing

skills at the university level. Modes of reasoning courses are also offered as part of the general education program. For purposes of meeting program requirements, all nine-credit foundations courses count as six credits towards the major or minor. Six-credit first year courses do not count toward the major or minor.

PRIOR TO FALL 2009: Course credit exclusion: AK/HREQ 3962 3.00.

AP/HREQ 3963 3.00 Language, Linguistic Rights and Human Rights. Explores issues involving social and cultural impact of language; gives students the conceptual tools to analyze relationship between linguistic rights and human rights; and discusses topics such as language and identity, ethnolinguistic nationalism and emergence of new languages. Course credit exclusions: None. PRIOR TO FALL 2009: Course credit exclusion: AK/HREQ 3963 3.00.

AP/HREQ 3964 3.00 Equity in Schooling and Human Rights. Issues of inequality and equity in education are examined from a critical human rights perspective. Exposes students to literature linking educational rights to human rights. Comparative perspectives are incorporated. Efforts to achieve equity in education are examined. Course credit exclusions: None. PRIOR TO FALL 2009: Course credit exclusion: AK/HREQ 3964 3.00.

AP/HREQ 4020 6.00 Canadian Society in Comparative Perspective.

This course is focused on the implications of funding cuts to Canadian educational, health and other state programs and institutions and the embrace of market oriented reforms for Canadian identity and structural inequality despite an estrangement from American values. Course credit exclusions: None. Prior TO FALL 2009: Course credit exclusions: AK/SOCI 4000D 6.00 (prior to Fall/Winter 2005-2006), AK/SOCI 4020 6.00.

Cross-listed to: AP/HREQ 4020 6.00, AP/SOCI 4020 6.00

AP/HREQ 4165 3.00 Canadian Social Policy in Comparative Perspective. The course analyzes the design and implementation of social policy in Canada, seen in the context of social policy development in other Western societies, including the United States and Western Europe. Course credit exclusions: None. Prior TO FALL 2009: Course credit exclusion: AK/AS/POLS 4165 3.00.

Cross-listed to: AP/HREQ 4165 3.00, AP/POLS 4165 3.00

AP/HREQ 4181 3.00 Research Seminar in the Political Economy of Canada. Examines theories, trends and debates pertaining to the political economy of Canada in the emerging global context, including economic restructuring, the changing nature of work, the future of the welfare state and prospects for reform. Students will undertake a major research project on an aspect of Canada's political economy. Prerequisite: one of AP/HREQ/POLS 3125 6.00, AP/HREQ/PPAS 3761 3.00, AP/HREQ/PPAS 3762 3.00, AP/POLS 3270 3.00, AP/POLS 3275 3.00, AP/POLS 3170 3.00, AP/POLS 3171 3.00, AP/REI 3745 6.00; or permission of the instructor. Course credit exclusions: None. Prior TO FALL 2009: Prerequisite: one of AK/AS/POLS 3125 6.00; AK/POLS 3700 6.00, AK/POLS 3740 6.00, AK/POLS 3761 3.00, AK/POLS 3762 3.00; AK/SOCI 3745 6.00, AK/SOCI 3125 6.00; or permission of the instructor. Course credit exclusions: AK/POLS 4181 6.00.

Cross-listed to: AP/HREQ 4181 3.00, AP/POLS 4181 3.00

AP/HREQ 4185 3.00 Philosophical Perspectives on Justice. An examination of contemporary perspectives on justice through the lens of practical political issues in Canada and the international arena. Topics may include: multiculturalism, ethnic conflict, racism, sexism, nationalism, cosmopolitanism, human rights, and 'humanitarian' intervention. Prerequisite: at least 9 credits in philosophy. Course credit exclusions: None. Prior TO FALL 2009: Prerequisite: at least 9 credits in philosophy. Course credit exclusion: AK/PHIL 4185 3.00.

Cross-listed to: AP/HREQ 4185 3.00, AP/PHIL 4185 3.00

AP/HREQ 4240 6.00 Health, Society and Human Resources. Using both historical and comparative materials from sociology and anthropology this course examines the relationship between human health and social and economic organization. It focuses on cultural definitions of health and illness, care and cure on the one hand, and the ideology and social institutions of the larger society on the other. Prerequisites: 78 credits including AP/SOCI 1010 6.00, or, for students with equivalent preparation, permission of the Undergraduate Program Director of the School of Social Science. Course credit exclusions: None. Prior TO FALL 2009: Prerequisites: 78 credits including AK/SOCI 2410 6.00, or, for students with equivalent preparation, permission of the Undergraduate Program Director of the School of Social Science. Course credit exclusion: AK/SOCI 4240 6.00.

AP/HREQ 4410 3.00 The Anthropology of Human Rights. This course surveys anthropology's attempts to confront, analyze, and reframe claims about the nature of human beings implicit in the discourse of human rights. Course credit exclusions: None. PRIOR TO FALL 2009: Course credit exclusion: AS/ANTH 4410 3.00.

Cross-listed to: AP/ANTH 4410 3.00, AP/HREQ 4410 3.00

AP/HREQ 4500 6.00 Social Theory, Culture and Politics. Introduction to major writings in social theory, and to connections between social theory, cultural expression and politics. Both classical and contemporary works are discussed. Prerequisites: 78 credits including AP/SOCI 1010 6.00; or permission of the Undergraduate Program Director of Social Science for students with the equivalents. Course credit exclusions: None. Prior TO FALL 2009: Prerequisites: 78 credits including AK/SOCI 2410

6.00; or permission of the coordinator of the School of Social Science for students with the equivalents. Course credit exclusion: AK/SOCI 4500 6.00.

Cross-listed to: AP/HREQ 4500 6.00, AP/SOCI 4500 6.00

AP/HREQ 4510 3.00 Health and Human Rights. Examines how health and human rights are complementary approaches to understanding and analyzing human well-being. The congruence of the two fields has arisen as the definition of human rights has expanded from civil and political rights to include social and economic rights. Will examine this evolution and its implications. Prerequisites: At least 36 credits or permission of course instructor. Course credit exclusion: None.

Cross-listed to: AP/HREQ 4510 3.00, HH/HLST 4510 3.00

AP/HREQ 4600 6.00 Research Seminar. Provides an opportunity for the development and completion of a substantial project in research and writing at a more advanced level. Restricted to Honours majors in sociology or political science. Papers are written under the supervision of a faculty member, and each step in the research is discussed in seminar. Prerequisites: 78 credits, or permission of the Undergraduate Program Director of Social Science for students with equivalent. Normally before entry, Political Science majors will have completed AP/POLS 1000 6.00; Sociology majors will have completed AP/SOCI 1010 6.00 AP/SOCI 2030 6.00 and AP/SOCI 2040 6.00. Course credit exclusions: None. PRIOR TO FALL 2009: Prerequisites: 78 credits, or permission of the Undergraduate Program Director of the School of Social Sciences for students with equivalent. Normally before entry, Political Science majors will have completed AK/POLS 2410 6.00, AK/POLS 2440 6.00 and AK/POLS 3420 6.00; Sociology majors will have completed AK/SOCI 2410 6.00, AK/SOCI 3310 6.00 and AK/SOCI 3330 6.00. Course credit exclusion: AK/SOCI 4600 6.00.

Cross-listed to: AP/HREQ 4600 6.00, AP/REI 4600 6.00, AP/SOCI 4600 6.00

AP/HREQ 4650 3.00 Equity In The Workplace: Labour Rights and Human Rights. Examines initiatives to promote equity in the workplace. Public policy strategies to address inequalities of race, gender, sexuality, disability, age, and citizenship are critically assessed, as are recent efforts to establish international labour standards as fundamental human rights. Course credit exclusions: None. PRIOR TO FALL 2009: Course credit exclusion: AK/HREQ 4650 3.00.

Cross-listed to: AP/HREQ 4650 3.00, AP/SOCI 4650 3.00

AP/HREQ 4651 3.00 Chinese Rights and Virtues In East Asia. Compares and contrasts Chinese virtues of benevolence, propriety, righteousness, wisdom and faithfulness with Western human rights in both contemporary and ancient perspectives. Compares universal claims of Western social and cultural rights with particular forms of virtue in Chinese society. Course credit exclusions: None. PRIOR TO FALL 2009: Course credit exclusion: AK/HREQ 4651 3.00.

Cross-listed to: AP/HREQ 4651 3.00, AP/PHIL 4651 3.00

AP/HREQ 4652 3.00 Violence, Enslavement and Human Rights. Examines violent domination, slave trade and slavery, and the place of enslavement as an extreme form of social exclusion and violation of human rights. Course credit exclusions: None. PRIOR TO FALL 2009: Course credit exclusion: AK/HREQ 4652 3.00.

Cross-listed to: AP/HREQ 4652 3.00, AP/SOCI 4652 3.00

AP/HREQ 4720 3.00 Directed Reading. Students will do supervised special study in one or two selected areas. Prerequisites: 78 credits including at least 12 credits in social science courses; or, for students with equivalent preparation, permission of the Undergraduate Program Director. Note: Students must be accepted by a faculty supervisor before they can register in the 4000-level reading course. The course transaction form for this course must be submitted with a note from the supervisor stating his/her willingness to perform this task. Course credit exclusions: None. Prior TO FALL 2009: Prerequisites: 78 credits including at least 12 credits in social science courses; or, for students with equivalent preparation, permission of the Undergraduate Program Director. Course credit exclusion: AK/SOSC 4720 3.00.

AP/HREQ 4720 6.00 Directed Reading/Special Study. Students will do supervised special study in one or two selected areas. Prerequisites: 78 credits including at least 12 credits in social science courses; or, for students with equivalent preparation, permission of the Undergraduate Program Director. Note: Students must be accepted by a faculty supervisor before they can register in the 4000-level reading course. The course transaction form for this course must be submitted with a note from the supervisor stating his/her willingness to perform this task. Course credit exclusions: None. Prior TO FALL 2009: Prerequisites: 78 credits including at least 12 credits in social science courses; or, for students with equivalent preparation, permission of the Undergraduate Program Director of the School of Social Science. Course credit exclusion: AK/SOSC 4720 6.00.

AP/HREQ 4740 6.00 Ideology, Social Policy and the State. Application of social science material to analysis of state systems and resultant social policies. The seminar selects social policy issues for critical consideration with a focus on ideological implications and the interests of the state apparatus thereby served. Prerequisites: 78 credits including at least 12 credits in social science courses; or, for students with equivalent preparation, permission of the Undergraduate Program Director. Course credit exclusions: None. Prior TO FALL 2009: Prerequisites: 78 credits including at least 12 credits in social science courses; or, for students with equivalent preparation, permission of the Undergraduate Program Director of the School of Social Science. Course credit exclusion: AK/SOSC 4740 6.00.

AP/HREQ 4770 6.00 Democracy, the State and Freedom of Expression. An advanced level research course focusing on the legal and institutional safeguards required for democratic deliberation and communication. It takes an historical view of the constitutional and practical measures required to protect the operation of a democratic public sector in varying historical forms of the state, as well as the legitimate constraints on the operation of the right to freedom of expression. Course credit exclusions: None. Prior TO FALL 2009: Prerequisites: 78 credits including at least 12 credits in social science courses; or, for students with equivalent preparation, permission of the Undergraduate Program Director of the School of Social Science. Course credit exclusion: AK/SOSC 4770 6.00.

AP/HREQ 4820 6.00 Crime and Deviance. The formation of marginal or deviant communities in modern society, including such issues as underworld identities, networks and markets; legislative and judicial adaptation to current realities; unconventional lifestyles and their stability factors. Prerequisite: 78 credits including AP/SOCI 1010 6.00, or, for students with equivalent preparation, permission of the Undergraduate Program Director of the Department of Equity Studies. Course credit exclusions: None. Prior TO FALL 2009: Prerequisite: 78 credits including AK/SOCI 2410 6.00, or, for students with equivalent preparation, permission of the Undergraduate Program Director of the School of Social Science. Course credit exclusions: AK/SOCI 4360 3.00, AK/SOCI 4360 6.00.

Indigenous Studies – Liberal Arts and Professional Studies

Location:

436 Atkinson Building, Tel.: 416-736-2100, ext. 20089

Coordinator:

B. Lawrence

Affiliated Faculty:

B. Lawrence, P. O'Riley, D. McNab, H. Shewell, V. Alston

Through the Indigenous studies field in the REI program, students can complete a BA, Specialized Honours BA, Honours BA, Honours Double Major BA, Honours Major/Minor BA or an Honours Minor BA entirely in Indigenous studies. Indigenous studies offers a unique range of courses that address the histories, experiences, cultural expression and concerns of Indigenous peoples, with a strong focus on self-empowerment, as well as their relationships with other racialized communities and with Canada

as a whole. The program enables students to enter into careers relating to Indigenous peoples, as well as further academic studies in law, social work, education and York's upcoming graduate program in Indigenous Thought.

The Cross-Disciplinary Certificate in Indigenous Studies addresses the experiences of Indigenous people including issues in language, history and culture. This certificate offers a range of courses that provide a unique focus on the history of the relationship between Aboriginal and non-Aboriginal people in Canada. The program will be of interest to any students for whom knowledge of Aboriginal history, culture and issues may have a particular salience in their envisioned career paths and/or future academic studies.

J. Ginsburg

The Specialized Honours BA program in Individualized Studies is designed for students who wish to pursue a topic or line of enquiry that requires drawing together courses from several of the University's disciplines or fields of study.

Students interested in pursuing an individualized studies degree will be asked by the coordinator to prepare a statement describing the particular subject they wish to pursue. They will also be asked to identify a set of courses, from the Faculty of Liberal Arts and Professional Studies and elsewhere, which are relevant to this theme. If the coordinator is satisfied that the proposed subject cannot be adequately pursued under an established program or departmental major and that sufficient courses and faculty expertise exist to support individualized study in the area in question, the student will be permitted to enter the Individualized Studies program. Normally, students are eligible to join the program if they have completed at least 24 credits and no more than 66 credits by the start of the academic year.

Students in individualized studies must follow all the rules for a Specialized Honours BA. In addition, they must take, as six of the 54 credits relevant to their theme, the individualized studies thesis course, AP/INDV 4000 6.00. This course is to be taken during the student's final year of study.

Courses in Individualized Studies

AP/INDV 4000 6.00 Individualized Studies Thesis. The purpose of this course is to offer individualized studies students a change to draw together the parts of their topic by carrying out a sustained piece of research and writing. An adviser, arranged for by the student, directs the thesis and acts as one of its reader. Normally the finished thesis is around 60 pages in length. Note: All who intend to register in AP/INDV 4000 6.00 must submit a thesis proposal to the coordinator by September 30. Course credit exclusions: None. PRIOR TO FALL 2009: Course credit exclusion: AS/INDV 4000 6.00.

Courses in Information Technology

AP/ITEC 1000 3.00 Introduction to Information Technologies. This course introduces basic concepts of contemporary information technologies (computers, networks, telecommunications) used to process and store information in organizations. The course material includes both hardware and software components, which students compare, select and combine to solve information problems. NCR Note: No credit will be retained for this course for students who have successfully completed or who are currently enrolled in any computer science course at the 2000-level or higher. Course credit exclusion: GL/ITEC 1011 3.00. Prior TO FALL 2009: Course credit exclusions: AK/AS/ITEC 1000 3.00, AK/AS/ITEC 1011 3.00, GL/ITEC 1011 3.00.

AP/ITEC 1010 3.00 Information and Organizations. The value and importance of information to organizations, how it is used, stored and processed; emphasizes the uses of information technologies of various kinds, the benefits of the technologies, and the associated costs and problems; use of desktop applications. Course credit exclusion: GL/ITEC 1010 3.00. Prior TO FALL 2009: Course credit exclusions: AK/ITEC 1010 3.00, GL/ITEC 1010 3.00.

GL/ITEC 1010 3.00 Information et organisations. Valeur de l'information; utilisation, stockage et traitement par l'organisation; utilisations de la technologie de l'information, coûts/rendement, applications à la bureautique.

Language of Instruction: French

GL/ITEC 1010 3.00 Information and Organizations. The value of information; how it is used, stored and processed by the organization; uses of information technology, and its costs and benefits, desktop applications.

GL/ITEC 1011 3.00 Introduction to Information Technologies. Hardware and software technology for information handling; single user system architecture, central and networked systems, telecommunications, human-computer interface; storage systems; operating systems; applications software. Prerequisite: GL/ITEC 1010 3.00.

GL/ITEC 1011 3.00 Introduction aux technologies de l'information. Technologie du matériel et du logiciel pour le traitement de l'information; architecture unifiée mono-usager, systèmes centraux et en réseaux, télécommunications, interface homme-machine; systèmes de stockage; systèmes d'exploitation; logiciels d'application. Condition préalable : GL/ITEC 1010 3.00.

Language of Instruction: French

AP/ITEC 1620 3.00 Object-Based Programming. An introduction to problem solving, task decomposition, and algorithm development in the context of object-oriented and structured programming techniques. Taught in Java, topics include primitive data types, control structures, simple classes, strings and arrays. The course also introduces object-oriented design and the use of API's to develop applications from existing classes.

Note: This course will not count for computer science major or minor credit. Course credit exclusions: GL/CSLA/ITEC 1620 3.00, SC/CSE 1020 3.00. Prior TO FALL 2009: Course credit exclusions: AK/AS/SC/COSC 1020 3.00, AK/AS/SC/CSE 1020 3.00, AK/ITEC 1620 3.00, AK/AS/ITEC 1020 3.00, GL/CSLA/ITEC 1620 3.00.

GL/ITEC 1620 3.00 Object-Based Programming. This is a first course on problem solving and algorithm development using Java. It introduces structured programming techniques using primitive data types and APIs to build and implement objects. This course also introduces the object-oriented design of applications using existing classes. Course equivalency: AP/ITEC 1620 3.00. Course credit exclusions: AP/ITEC 1620 3.00; GL/COSC/MODR/ITEC 2960 3.00.

Cross-listed to: GL/CSLA 1620 3.00, GL/ITEC 1620 3.00

GL/ITEC 1620 3.00 Programmation par objets I. Ce premier cours sur la résolution de problèmes et la réalisation d'algorithmes à l'aide de Java introduit des techniques de programmation structurées à l'aide de types de données primitives et d'IPA pour construire et utiliser des objets. Ce cours introduit aussi la réalisation d'applications par objets à l'aide de classes existantes. Équivalence de cours : AK/AS/ITEC 1620 3.00. Cours incompatibles : AK/AS/ITEC 1620 3.00; GL/COSC/MODR/ITEC 2960 3.00.

Cross-listed to: GL/CSLA 1620 3.00, GL/ITEC 1620 3.00

GL/ITEC 1630 3.00 Object-Oriented Programming. This course introduces class implementation either from scratch or by extending an existing class. Inheritance and polymorphism are discussed in detail. Focus on user-interface classes. Object-oriented design (with UML) using existing or newly created classes is further discussed. Prerequisite: GL/CSLA 1620 3.00. Course equivalency: AP/ITEC 1630 3.00. Course credit exclusions: AP/ITEC 1630 3.00; GL/COSC/MODR/ITEC 2970 3.00.

Cross-listed to: GL/CSLA 1630 3.00, GL/ITEC 1630 3.00

GL/ITEC 1630 3.00 Programmation par objets II. Ce cours introduit la mise en application de classes, soit en partant des bases, soit en élargissant des classes existantes. Cette mise en application permet une étude approfondie de l'héritage et du polymorphisme et aussi de la réalisation par objets (en UML) à l'aide de classes existantes ou nouvellement créées. Condition préalable : GL/CSLA/ITEC 1620 3.00. Équivalence de cours : AP/ITEC 1630 3.00. Cours incompatibles : AP/ITEC 1630 3.00; GL/COSC/MODR/ITEC 2970 3.00.

Cross-listed to: GL/CSLA 1630 3.00, GL/ITEC 1630 3.00

GL/ITEC 1670 6.00 Fundamentals of Mathematics. Intended for the student whose (high school) mathematical background is either weak or incomplete, and designed to train and improve the logical and technical skills in the use of basic mathematics. Topics are chosen from basic algebra, linear, quadratic, polynomial, exponential, logarithmic and trigonometric functions, systems of equations, inequalities, probability, series and derivatives. Course credit exclusions: SC/MATH 1710 6.00, GL/MATH 1880 6.00(EN).

Cross-listed to: GL/ITEC 1670 6.00, GL/MATH 1670 6.00, GL/MODR 1670 6.00

GL/ITEC 1925 3.00 The Elements of Logic for Computer Science. This course introduces the fundamental elements of formal logic and its applications in computer science. The subjects covered include: propositional logic, reasoning, automatic deduction, resolution, logic circuits, predicate logic, applications in programming logic. Course credit exclusions: GL/COSC/MODR 2900 6.00.

Cross-listed to: GL/CSLA 1925 3.00, GL/ITEC 1925 3.00, GL/MATH 1925 3.00, GL/MODR 1925 3.00

GL/ITEC 1925 3.00 Éléments de logique pour l'informatique. Ce cours introduit les éléments fondamentaux de la logique formelle et ses applications en informatique. Les sujets abordés incluent: la logique des

propositions, raisonnements, déduction automatique, résolution, circuits logiques, la logique des prédicats, applications dans la programmation logique. Cours incompatibles : GL/COSC/MODR 2900 6.00.

Language of Instruction: French

Cross-listed to: GL/CSLA 1925 3.00, GL/ITEC 1925 3.00, GL/MATH 1925 3.00, GL/MODR 1925 3.00

GL/ITEC 1927 3.00 Mathematical Structures for Computer Science. This course is designed to introduce and analyze some of the main mathematical topics related to computer science. The subjects covered include sets, relations, mathematical induction, congruences, groups, graphs and trees, Boolean algebra and computer circuits. Prerequisite: GL/MATH 1650 3.00. Course credit exclusions: GL/COSC/MODR 2900 6.00.

Cross-listed to: GL/CSLA 1927 3.00, GL/ITEC 1927 3.00, GL/MODR 1927 3.00

GL/ITEC 1927 3.00 Structures mathématiques pour l'informatique. Ce cours a pour but de présenter et d'analyser les principaux éléments de mathématiques nécessaires en informatique. Les sujets abordés incluent les ensembles, les relations, l'induction mathématique, les congruences, les groupes, les graphes et les arborescences, l'algèbre de Boole et les circuits logiques. Condition préalable : GL/MATH 1650 3.00. Cours incompatibles : GL/COSC/MODR 2900 6.00.

AP/ITEC 2610 3.00 Object-Oriented Programming. A continuation of problem solving and algorithm development in the context of object-oriented programming techniques. Taught in Java, topics include inheritance, polymorphism, interfaces and events. Object-oriented design principles are presented in conjunction with applications in graphics and user interface. Prerequisites: AP/ITEC 1620 3.00 or SC/CSE 1020 3.00. Course credit exclusion: GL/CSLA ITEC 1630 3.00. PRIOR TO FALL 2009: Prerequisites: AK/AS/ITEC 1020 3.00 or AK/AS/SC/COSC 1020 3.00 or AK/AS/SC/CSE 1020 3.00 or AK/AS/ITEC 1620 3.00. Course credit exclusions: AK/ITEC 1630 3.00, GL/CSLA/ITEC 1630 3.00.

AP/ITEC 2620 3.00 Introduction to Data Structures. A completion to introductory problem solving and algorithm development. Taught in Java, topics include linked lists, binary trees, stacks, queues and other elementary data structures. Complexity analysis is introduced with an emphasis on searching and sorting algorithms. Note: This course will not count for computer science major or minor credit. Prerequisites: AP/ITEC 1620 3.00, AP/ITEC 2610 3.00. Course credit exclusions: GL/CSLA/ITEC 2620 3.00, SC/CSE 1030 3.00. Prior TO FALL 2009: Prerequisites: AS/AK/ITEC 1620 3.00, AS/AK/ITEC 2610 3.00. AP/ITEC 3010 3.00 Systems Analysis and Design I. Case studies in the development of information systems; exposing the reasons for success or failure; IS planning; various IS development methodologies and their strengths and weaknesses; role of the analyst; analysis project. Prerequisites: AP/ITEC 1000 3.00, AP/ITEC 1010 3.00 and AP/ITEC 1620 3.00, or equivalent. Course credit exclusion: GL/CSLA/ITEC 2010 3.00. PRIOR TO FALL 2009: Prerequisites: AK/AS/ITEC 1000 3.00, AK/AS/ITEC 1010 3.00 and AK/AS/ITEC 1620 3.00, or equivalent. Course credit exclusions: AK/ITEC 2010 3.00, GL/CSLA/ITEC 2010 3.00, SB/OMIS 4740 3.00.

AP/ITEC 3020 3.00 Web Technologies. Web technology is the amalgamation of Web related software and systems. This course covers some programming topics such as CGI, Java and JavaScript and some fundamental topics such as data markup, networking, security and text processing. Prerequisite: AP/ITEC 2610 3.00 and general prerequisites. Course credit exclusion: SC/CSE 2041 3.00. Prior TO FALL 2009: Prerequisite: AK/ITEC 1630 3.00 and general prerequisites. Course credit exclusion: AK/ITEC 3020 3.00.

AP/ITEC 3210 3.00 Applied Data Communications and Networks. Communications systems, environments and components; choices for data, voice and imagery; network control, design and management; distributed and local networks; client/server and Intranet technologies; Web-based technologies. Prerequisites: General prerequisites. Course credit exclusions: None. Prior TO FALL 2009: Course credit exclusions: AK/AS/SC/COSC 3211 3.00, AK/AS/SC/COSC 3212 3.00, AK/COSC 3409A 3.00, AK/COSC 3409B 3.00, AK/ITEC 3210 3.00, GL/CSLA/ITEC 3625 3.00, GL/CSLA/ITEC 4625 3.00.

AP/ITEC 3220 3.00 Using and Designing Database Systems. An examination of databases, trends in database management systems and their application in a wide range of organizational areas. The course provides an overview of database processing in modern organizations and discusses current and emerging trends in database processing. Prerequisites: General prerequisites. Course credit exclusions: GL/CSLA/ITEC 3620 3.00, HH/HLST 3320 3.00, HH/NURS 3230 3.00. Prior TO FALL 2009: Prerequisites: General prerequisites. AP/ITEC 3230 3.00 Designing User Interfaces. Examines a range of topics in the analysis and design of interfaces and human-computer interaction. Focusing on the human perspective, the course will discuss improving interaction with computers and reducing the possible mismatch between human and machine. Prerequisites: General prerequisites. Course credit exclusions: SC/CSE 3461 3.00. Prior TO FALL 2009: Prerequisites: General prerequisites. Course credit exclusions: AK/ITEC 3230 3.00, AK/AS/ITEC 3461 3.00, AK/AS/SC/COSC 3461 3.00, AK/AS/SC/CSE 3461 3.00.

AP/ITEC 3325 3.00 Decision Support Technologies. Presents contemporary concepts of decision support technologies and their use in knowledge-based information systems. Introduces the core issues of knowledge representation and management, artificial neural networks, evolutionary computation, hybrid intelligent systems, machine learning,

automated reasoning, and knowledge engineering. Prerequisite: AP/ITEC 3220 3.00 and general prerequisites. Course credit exclusions: None. Prior TO FALL 2009: Prerequisite: AK/ITEC 3220 3.00 and general prerequisites. Course credit exclusion: AK/ITEC 3325 3.00.

GL/ITEC 3461 3.00 Human Computer Interaction. This course introduces the concepts and technology necessary to design, manage and implement interactive software. Students will learn how to design user interfaces, how to realize them and how to evaluate the end result. Prerequisite: GL/CSLA/ITEC 2620 3.00.

Cross-listed to: GL/CSLA 3461 3.00, GL/ITEC 3461 3.00

AP/ITEC 3500 3.00 Information Technology Risk Management. This course covers key IT risk components and ways to mitigate those risks. Areas of instruction include how to manage IT-related risks addressed by CobIT, ITIL and ISO 17799 standards. Prerequisites: AP/ITEC 2610 3.00, AP/ITEC 3010 3.00. Course credit exclusions: None. Prior TO FALL 2009: Prerequisites: AK/ITEC 1630 3.00, AK/ITEC 2010 3.00. Course credit exclusion: AK/ITEC 3500 3.00.

AP/ITEC 3505 3.00 Information Technology Project Management. This course is uniquely suited to the needs of IT professionals entering the corporate world as effective project managers or project team members. It examines all aspects of IT projects including hardware, software, methodologies, and vendor relationships and presents core concepts, skills, tools, and techniques needed to develop information systems on time, within budget and to specification. Prerequisites: General Prerequisites for all 3000 level (except for AP/ITEC 3010 3.00) or above courses. Students must have successfully completed all 1000 and 2000 level required courses in information technology and mathematics required for their program option and AP/ITEC 3010 3.00 before taking courses in information technology at the 3000 or 4000 level including earning a minimum grade of C in either AP/ITEC 2610 3.00 or AP/ITEC 3010 3.00. Course credit exclusion: AP/ADMS 3353 3.00.

GL/ITEC 3601 3.00 Le génie des logiciels. Ce cours a pour objectif d'étudier le processus de validation des étapes du cycle de vie du logiciel, la gestion de projet, l'estimation des coûts, les stratégies conception de codage, de test et de la maintenance ainsi que les techniques de vérification de programmes. Condition préalable : GL/CSLA 2620 3.00. Cours incompatible: GL/CSLA 3510 3.00.

GL/ITEC 3610 3.00 Computer Organization. This course reviews the fundamental structures in modern processor design. Topics will include computer organization, instruction set design, memory system design and pipelining. Emphasis will be on a quantitative evaluation of design alternatives and an understanding of timing issues. There will be experimentation with LabVIEW (Laboratory Virtual Instrument Engineering Workbench), a graphical programming language for virtual instrumentation and simulation. Prerequisite: GL/CSLA/ITEC 1630 3.00. Course credit exclusion: GL/COSC 3800 3.00.

GL/ITEC 3635 3.00 Graphisme par ordinateur. Ce cours introduit de multiples structures de données et algorithmes essentiels à la représentation graphique de données sur ordinateur. L'objectif est de fournir suffisamment de bases pour écrire des logiciels d'applications graphiques. La première moitié du cours couvrira les applications graphiques à deux dimensions, les opérations "raster", les méthodes pour l'imagerie, ainsi que la conception et l'élaboration des interfaces utilisateur. La seconde partie inclura les sujets relatifs aux applications graphiques à trois dimensions, comprenant les techniques de représentation, d'éclairage, de traitement des ombres, de détermination des parties visibles, d'élaboration du rendu final, et d'animation. Condition préalable : GL/CSLA 2620 3.00. Cours incompatibles : AP/SC/CSE 3431 3.00.

GL/ITEC 3640 3.00 Computer Hardware. This course studies the design, structure and operation of digital computers. Topics include logic circuits and digital electronics, computer arithmetic and machine language programming. Consideration of the design interactions between hardware and software system. Prerequisite: GL/CSLA/ITEC 3610 3.00.

Cross-listed to: GL/CSLA 3640 3.00, GL/ITEC 3640 3.00

GL/ITEC 3645 3.00 MATLAB for data analysis and visualization. This course offers efficient methods for modern data analysis and visualization in the MATLAB environment - MATLAB is a software package to easily solve and represent graphically many quantitative problems. These are illustrated with examples from applications in Cognitive and Life Sciences, Sociology, Psychology, Economics, Mathematics and Business. This course, intended for upper level students working in variety of fields, provides solid approaches for working with real-life data sets and for designing graphical user interfaces (GUIs) for human-machine interaction.

Cross-listed to: GL/ITEC 3645 3.00, GL/MODR 3645 3.00

GL/ITEC 3800 3.00 Systems Analysis and Design II. This course deals with intermediate and advanced topics in systems analysis and design. Topics include the systems development life cycle, object-oriented design, CASE tools and recent advances in system analysis and design; risk management; IS planning, the role of the analyst and the analysis project. This course also applies structured analysis and design techniques to produce process models of the software system to optimize development time. Prerequisite: GL/CSLA/ITEC 2010 3.00.

AP/ITEC 3900 0.00 Internship Term. The industrial internship provides qualified students with the opportunity to work in the technology field as part of their honours degree program. The Technology Internship Office (TIP) will coordinate placement of students with a specific internship position. Note 1: This course does not count for degree credit in any program. Registration in sections of AP/ITEC 3900 0.00 while on an internship placement provides a transcript notation of the student's participation in the internship program. Note 2: Students are required to register in this course in every term of their work-term (i.e. internship). Note 3: Every student registered in the course will be assigned a faculty supervisor who will assess the student's performance during the internship. Prerequisites: 1) Successful completion of nine AP/ITEC credits at the 3000 level and an overall average of at least B in the AP/ITEC courses completed; 2) Open only to full-time students in Honours program. Course credit exclusions: none. PRIOR TO FALL 2009: Prerequisites: 1) Successful completion of 9.00 AK/ITEC credits at the 3000 level and an overall average of at least B in the AK/ITEC courses completed; 2) Open only to full-time students in Honours program. Course credit exclusions: AK/AS/SC COSC 3900 3.00, AK/ITEC 3900 0.00.

AP/ITEC 4000 3.00 Independent Research Project in Information Technology. Under the supervision of a faculty member, and with permission of the program coordinator, students may carry out an independent research project in an area of information technology. Note: Please consult the Faculty of Liberal Arts & Professional Studies Advising and Student Responsibility section of the calendar for regulations on independent study courses. Prerequisites: General prerequisites; AP/ITEC 3210 3.00 or SC/CSE 3211 3.00; AP/ITEC 3220 3.00 or SC/CSE 3421 3.00; AP/ITEC 3230 3.00 or SC/CSE 3461 3.00; and permission of the program coordinator. Course credit exclusions: None. PRIOR TO FALL 2009: Prerequisites: General prerequisites; AS/AK/ITEC 3210 3.00 or AS/AK/SC/COSC 3211 3.00 or AS/AK/SC/CSE 3211 3.00; AP/ITEC 3220 3.00 or AS/AK/ITEC 3421 3.00 or AS/AK/SC/COSC 3421 3.00 or AS/AK/SC/CSE 3421 3.00; AS/AK/ITEC 3230 3.00 or AS/AK/ITEC 3461 3.00 or AS/AK/SC/COSC 3461 3.00 or AS/AK/SC/CSE 3461 3.00; and permission of the program coordinator. AP/ITEC 4010 3.00 Systems Analysis and Design II. This course deals with intermediate and advanced topics in systems analysis and design. Topics include the systems development life cycle, object-oriented design, CASE tools and recent advances in system analysis and design. Prerequisites: General prerequisites; AP/ITEC 3220 3.00 or SC/CSE 3421 3.00. Course credit exclusion: GL/ITEC 3800 3.00. Prior TO FALL 2009: Prerequisites: General prerequisites; AK/AS/ITEC 3220 3.00 or AK/AS/ITEC 3421 3.00 or AK/AS/SC/COSC 3421 3.00 or AK/AS/SC/CSE 3421 3.00. Course credit exclusions: AK/ITEC 4010 3.00, GL/ITEC 3800 3.00.

AP/ITEC 4020 3.00 Internet Client-Server Systems. This course offers a thorough treatment of client-server systems concepts, with programming techniques that yield results in Web pages and Web-based applications. Topics include effective Web page design, server and client-side scripting, Java servlets, ActiveX controls and the essentials of electronic commerce. Prerequisites: General prerequisites; AP/ITEC 3220 3.00 or SC/CSE 3421 3.00; AP/ITEC 3230 3.00 or SC/CSE 3461 3.00. Course credit exclusion: GL/CSLA/ITEC 3632 3.00. Prior TO FALL 2009: Prerequisites: General prerequisites; AK/AS/ITEC 3220 3.00 or AK/AS/ITEC 3421 3.00 or AK/AS/SC/COSC 3421 3.00 or AK/AS/SC/CSE 3421 3.00; AK/AS/ITEC 3230 3.00 or AK/AS/ITEC 3461 3.00 or AK/AS/SC/COSC 3461 3.00 or AK/AS/SC/CSE 3461 3.00. Course credit exclusions: AK/ITEC 4020 3.00, GL/CSLA/ITEC 3632 3.00, GL/CSLA/ITEC 4630 3.00.

AP/ITEC 4030 3.00 Business Process Management Systems. An overview of current generic IT solutions used to support business processes in organizations. An emphasis is placed on the analysis of those business processes, how to improve them and how to connect them with the appropriate IT solutions available. Prerequisites: General prerequisites; AP/ITEC 3210 3.00 or SC/CSE 3211 3.00; AP/ITEC 3220 3.00 or SC/CSE 3421 3.00. Course credit exclusion: GL/ITEC 4030 3.00. Prior TO FALL 2009: Prerequisites: General prerequisites; AK/AS/ITEC 3210 3.00 or AK/AS/SC/COSC 3211 3.00 or AK/AS/SC/CSE 3211 3.00; AK/AS/ITEC 3220 3.00 or AK/AS/ITEC 3421 3.00 or AK/AS/SC/COSC 3421 3.00 or AK/AS/SC/CSE 3421 3.00. Course credit exclusions: AK/ITEC 4030 3.00, GL/ITEC 4030 3.00.

GL/ITEC 4030 3.00 IT Strategies. This course gives information technology students an operational understanding of current generic IT solutions used to support business processes in organizations. Students will learn to analyze business processes, to improve them and to connect them with the appropriate IT solutions available. Prerequisites: GL/CSLA/ITEC 2010 3.00, GL/CSLA/ITEC 3620 3.00 and GL/CSLA/ITEC 3625 3.00. Course equivalency: AP/ITEC 4030 3.00.

AP/ITEC 4040 3.00 Requirements Management. This course focuses on methods and techniques to elicit, model, analyze and manage software requirements for improving current business processes. Topics include project management, including how to manage software development through all phases of the life cycle. Prerequisites: General prerequisites; AP/ITEC 3220 3.00 or SC/CSE 3421 3.00. Recommended: AP/ITEC 4010 3.00. Course credit exclusions: None. Prior TO FALL 2009: Prerequisites: General prerequisites; AS/AK/ITEC 3220 3.00 or AS/AK/ITEC 3421 3.00 or AS/AK/SC/COSC 3421 3.00 or AS/AK/SC/CSE 3421 3.00. Recommended: AS/AK/ITEC 4010 3.00. Course credit exclusion: AK/ITEC 4040 3.00.

AP/ITEC 4100 3.00 Topics in Information Technology. Topics will vary from year to year. Please consult the Information Technology Program supplemental calendar for more detailed information. Prerequisites: General prerequisites; AP/ITEC 3210 3.00 or SC/CSE 3211 3.00; AP/ITEC 3220 3.00 or SC/CSE 3421 3.00; AP/ITEC 3230 3.00 or SC/CSE 3461 3.00; or permission of the program coordinator. Course credit exclusions: None. Prior TO FALL 2009: Prerequisites: General prerequisites; AK/AS/ITEC 3210 3.00 or AK/AS/SC/COSC 3211 3.00 or AK/AS/SC/CSE 3211 3.00; AK/AS/ITEC 3220 3.00 or AK/AS/ITEC 3421 3.00 or AK/AS/SC/COSC 3421 3.00 or AK/AS/SC/CSE 3421 3.00; AK/AS/ITEC 3230 3.00 or AK/AS/ITEC 3461 3.00 or AK/AS/SC/COSC 3461 3.00 or AK/AS/SC/CSE 3461 3.00; or permission of the program coordinator. Course credit exclusion: AK/ITEC 4100 3.00.

AP/ITEC 4101 3.00 Business Integration Technologies. Students learn about business integration issues and use development tools (Websphere Studio) that help organizations meet their business

integration needs. Prerequisites: General ITEC upper-year prerequisites and AP/TEC 3210 3.00, AP/ITEC 3220 3.00 and AP/ITEC 3230 3.00. Course credit exclusions: None. Prior TO FALL 2009: Prerequisites: General ITEC upper-year prerequisites and AK/ITEC 3210 3.00, AK/ITEC 3220 3.00 and AK/ITEC 3230 3.00. Course credit exclusion: AK/ITEC 4101 3.00.

AP/ITEC 4140 6.00 Seminar on McLuhan, Technology and Cultural History. Examines the thought of Marshall McLuhan within the context of the historical development of contemporary culture as impacted by technology and media. Comparisons are drawn between McLuhan and other thinkers of technology such as Harold Innis, Jacques Ellul, Lewis Mumford. Prerequisite: 78 credits and permission of the coordinator. Course credit exclusions: None. Prior TO FALL 2009: Prerequisite: 78 credits and permission of the coordinator of History. Course credit exclusion: AK/ITEC 4140 6.00.

GL/ITEC 4200 3.00 La logique floue pour les affaires, la finance et la gestion. Les concepts de base de la logique floue. Décision dans un contexte imprécis. Le contrôle flou pour les affaires, la finance et la gestion. Études de cas pratiques. Condition préalable : GL/CSLA 1927 3.00.

Language of Instruction: French

Cross-listed to: GL/CSLA 4200 3.00, GL/ITEC 4200 3.00

AP/ITEC 4220 3.00 Modern Approaches to Data Management: Database Management Systems. This course examines approaches to relational database administration, and investigates modern logical data models and tools supporting their implementation. Topics include transaction management, crash recovery, security, object database systems and information retrieval systems. Prerequisites: General prerequisites; AP/ITEC 3220 3.00 or SC/CSE 3421 3.00. Course credit exclusions: None. Prior TO FALL 2009: General prerequisites; AS/AK/ITEC 3220 3.00 or AS/AK/ITEC 3421 3.00 or AS/AK/SC/COSC 3421 3.00 or AS/AK/SC/CSE 3421 3.00. Course credit exclusion: AK/ITEC 4220 3.00.

AP/ITEC 4305 3.00 Web Mining. Web mining is the application of data mining techniques to discover useful information from the Web. This course provides an overview of relevant techniques from data mining and information retrieval and their applications in e-commerce and Web information systems. Prerequisites: General prerequisites. Course credit exclusions: None. Prior TO FALL 2009: Prerequisites: General prerequisites. Course credit exclusion: AK/ITEC 4305 3.00.

AP/ITEC 4315 3.00 Information Technology And Human Language. An examination of how information technology has been and can be applied to the study and processing of human language, using both primary research sources, and some hands-on programming. Note: Background in Linguistics or Programming (but not necessarily both) would be helpful. Prerequisites: General prerequisites. Course credit exclusions: None. Prior TO FALL 2009: Prerequisites: General prerequisites. Course credit exclusion: AK/ITEC 4315 3.00.

GL/ITEC 4620 6.00 Stage en informatique. Un stage à temps plein de 3 ou 4 mois dans une compagnie d'informatique ou de la technologie de l'information. Soumission d'un rapport technique qui lie des aspects de ce travail aux études d'informatique ou de la technologie de l'information que l'étudiant(e) a fait antérieurement. Conditions préalables : GL/CSLA 3830 3.00, GL/CSLA 2010 3.00 et une moyenne cumulative de B+.

Language of Instruction: French

Cross-listed to: GL/CSLA 4620 6.00, GL/ITEC 4620 6.00

GL/ITEC 4635 3.00 Computer Algorithms and Techniques for Imaging Cognition. This course offers an introduction to techniques and computer algorithms (with MATLAB) for functional brain imaging as well as recent developments in cognitive neuropsychology. It examines how theories of normal cognitive functioning can be informed by evidence from brain-damaged patients and how converging evidence may be obtained from functional neuro-imaging techniques. Programming exercises will use data sets from current experiments. This course is intended for upper level students majoring in Psychology, Cognitive and Brain Sciences or Computer Sciences.

Cross-listed to: GL/ITEC 4635 3.00, GL/PSYC 4635 3.00

GL/ITEC 4635 3.00 Algorithmes et techniques informatiques pour l'imagerie cognitive. Ce cours offre une introduction aux techniques et algorithmes (avec MATLAB) de l'imagerie fonctionnelle du cerveau et une présentation des dernières réalisations en neuropsychologie cognitive. Il analyse les théories du fonctionnement cognitif normal à la lumière de mesures prélevées sur des patients atteints de lésions cérébrales, et la convergence avec les résultats obtenus à partir des techniques de l'imagerie fonctionnelle du cerveau. Les exercices de programmation prévus utiliseront les données de recherche expérimentale en cours. Le cours s'adresse aux étudiants de quatrième année qui se spécialisent en psychologie, en sciences cognitives ou en informatique.

GL/ITEC 4640 3.00 Computer Networks. This course studies ISDN (Integrated Service Digital Network); the ATM (Asynchronous Transfer Mode) Protocol Reference Model; Internet and its networking protocol TCP/IP (Transmission Control Protocol/Internet Protocol); transfer of multimedia content; packet and data switching; gateways and network interconnections. Prerequisite: GL/CSLA 4625 3.00. Course credit exclusion: GL/COSC 4520 3.00.

Cross-listed to: GL/CSLA 4640 3.00, GL/ITEC 4640 3.00

GL/ITEC 4645 3.00 Introduction to Bioinformatics A. The course introduces students to elements of Computational Molecular Biology such as nucleotides, amino acids, DNA, proteins, transcription and translation. We will present DNA alignment algorithms such as pair wise alignment, local and global, as well as multiple alignments. The students will use the INTERNET to access biological databases and learn how these can be used for the molecular structure prediction. Prerequisite: GL/CSLA/ITEC 2620 3.00. Course credit exclusions: GL/COSC/ITEC 4010 3.00 (Fall/Winter 2001-2002 and Fall/Winter 2002-2003).

Cross-listed to: GL/CSLA 4645 3.00, GL/ITEC 4645 3.00

GL/ITEC 4647 3.00 Introduction to Bioinformatics B. The course introduces students to the use of Perl language for bioinformatics: to represent and manipulate DNA sequences, to build restriction maps using regular expressions to simulate the DNA mutations, to generate random DNA. We will present the implementation in Perl of data structures and algorithms for text processing that are used in bioinformatics. Prerequisite: GL/CSLA/ITEC 2620 3.00.

Cross-listed to: GL/CSLA 4647 3.00, GL/ITEC 4647 3.00

GL/ITEC 4648 3.00 Programmation logique (PROLOG). Ce cours est une introduction à la programmation logique et à la programmation logique par contraintes. Le langage de programmation PROLOG est présenté (prédicats prédéfinis, retour arrière, "coupure" etc.) et sont discuté divers techniques de programmation, des éléments de méta-interpréteurs en PROLOG et des applications. Condition préalable : GL/CSLA 1630 3.00. Cours incompatible : GL/CSLA 4700 3.00.

The interdisciplinary program in International Development Studies offers a variety of courses in the field of development studies. Students in the program are required to complete a coherent set of core courses, as well as a selection of courses from a number of departments and disciplines which focus on the histories, political economies and cultures of various regions and their diasporic communities. The core courses identify central issues in the field from a critical liberal arts and comparative perspective, and introduce students to specific analytical methods and techniques in the field of development studies. While highlighting common themes in the field of development, the core courses also emphasize the diversity of experiences in the developing world and the regional and subregional specificities. In addition to the core courses, the program consists of introductory area studies courses, intended to familiarize students with the social, political, economic and cultural dynamics of regions in the developing world, and additional courses grouped into the following areas of concentration: culture; diasporas and migration; environment; gender; political economy; politics, governance and policy.

The International Development Studies program is intended to provide students with a thorough grounding in the history, debates, dimensions, institutional approaches and critiques of the field. As well, students in the program will develop the skills and knowledge required to read the documents of international development/financial institutions such as the CIDA and the World Bank, understand the institutional language of development professionals, and create and implement development research or delivery proposals.

For specific program requirements and the list of program courses, please consult the Faculty of Liberal Arts and Professional Studies Programs of Study section.

Italian studies at York offers an exciting learning experience in the areas of Italian language, culture, literature and linguistics. Our program leads to a variety of majors or minors as well as a Certificate of Proficiency in Italian. The curriculum includes courses on a wide variety of literary topics through the centuries, linguistic history and dialectology as well as a range of courses in Italian civilization, cinema and the Italian-Canadian immigration experience. Students also have the opportunity to study abroad either through the Summer Program in Italy (offered in Florence, Rome and Bologna) or through the international bachelor of arts (iBA).

Note: for general regulations and enrolment information please see *Languages, Literatures and Linguistics* within this section.

The Program in Jewish Studies is an interdisciplinary program housed in the Division of Humanities that brings together courses and members of York's faculties whose focus is the exceptionally diverse subject areas that Jewish studies, as an academic discipline, encompasses.

In addition to Judaism as a religion, Jewish studies explores the texts, histories, cultures, sociologies, languages and fine arts of the Jewish people from biblical times to the present, locating these within the context of the many western and non-western civilizations in which Jews have lived. It also examines Jewish interactions with non-Jews over the ages, both cooperative and conflictual, elements of cultural symbiosis, evolving attitudes towards and images of Jews within various non-Jewish cultures, and the history of anti-semitism, including the Holocaust.

All the while, Jewish studies explores the Jewish experience with a view to understanding the human situation in its diversity and complexity.

The School of Kinesiology and Health Science has a curriculum which presents wide and flexible offerings to the student. All students take a core of required subject matter encompassing the major areas of emphasis in kinesiology and health science. Students may choose from a variety of elective courses to develop a highly specialized area of interest or to obtain a more general and broad program. The school attaches laboratories, field work and seminars to many of its courses, thereby coupling theory and technical knowledge with applied experiences and providing students with a greater opportunity for exchange and discussion with each other, with teachers and with experts in the area. The school also has grouped courses, enabling students to obtain certification in the areas of athletic therapy, sport administration, coaching and fitness assessment and exercise counselling.

A physical activity skills "practicum" program is an integral part of the undergraduate program in Kinesiology and Health Science. Students take one practicum course in each of the following six areas: dance/gymnastics, aquatics, team sports, individual and dual sports, track and field, and emergency care, and complete their requirements from the large variety of practicum courses offered.

For specific program requirements please consult the Faculty of Health Programs of Study section.

Courses in Kinesiology and Health Science

Academic courses in kinesiology and health science offered by the School of Kinesiology and Health Science have the prefix "KINE". Practicum courses have the prefix "PKIN".

HH/KINE 1000 6.00 Sociocultural Perspectives in Kinesiology. Introduction to the concept of the 'social body' through study of Western historical legacies and sociological factors of class, gender, 'race', culture with emphasis on sport sociology. Critical reading and research essay skills. Two one hour lectures, one hour tutorial/week. Course credit exclusions: AS/SC/KINE 1000 3.00 (prior to Fall/Winter 1998-1999), AS/SC/KINE 1000 4.00 (prior to Fall/Winter 2005-2006), AS/SC/KINE 2010 3.00 (prior to Fall/Winter 2000-2001), AS/SC/PHED 1000 3.00 (prior to Fall/Winter 1996-1997), AS/SC/PHED 1010 3.00 (prior to Fall/Winter 1996-1997), AS/SC/PHED 2010 3.00 (prior to Fall/Winter 1996-1997).

HH/KINE 1020 6.00 Introduction to Fitness and Health. An examination of the components and principles of fitness and health with particular attention to the evaluation and modification of fitness and health status. Two and a half lecture hours per week plus one hour lab per week. Two terms. Course credit exclusions: AS/SC/KINE 1020 3.00 (prior to Fall/Winter 1998-1999), AS/SC/KINE 1020 4.00 (prior to Fall/Winter 2003-2004), AS/SC/KINE 1020 5.00 (prior to Fall/Winter 2006-2007), AS/SC/PHED 1020 3.00 (prior to Fall/Winter 1996-1997).

HH/KINE 2011 3.00 Human Physiology I. The focus of this course is the cellular basis of human physiology. Basic principles of physiology are presented from the viewpoint of the simplest structural unit-the cell-in order to provide a sound basis for understanding complex multi-cellular organisms in subsequent courses. Course credit exclusions: AS/HH/SC/KINE 3011 3.00.

HH/KINE 2031 3.00 Human Anatomy. An overview of the organization and structure of the human body. Each of the following systems is examined with respect to cell morphology, cell and tissue arrangement and inter-systems organization: skeletal, muscular, nervous, circulatory, lymphatic, respiratory, urinary, reproductive and endocrine. Three lecture hours per week, two laboratory hours in alternate weeks. One term. Course credit exclusions: AS/SC/KINE 3070 3.00 (prior to Fall/Winter 1997-1998), AS/SC/PHED 2070 3.00 (prior to Fall/Winter 1996-1997), SC/PHED 2070 4.00 (prior to Fall/Winter 1996-1997), AS/PHED 3070 3.00 (prior to Fall/Winter 1996-1997), SC/PHED 3070 4.00 (prior to Fall/Winter 1996-1997), SC/NATS 1650 6.00.

HH/KINE 2049 3.00 Research Methods in Kinesiology. This course introduces students to the procedures utilized to design and conduct research in the discipline of kinesiology. Two lecture hours, two laboratory hours, and one hour review/problem solving per week. One term. Course credit exclusions: AS/SC/KINE 2049 4.00 (prior to Fall/Winter 2004-2005), AK/AS/HH/SC/PSYC 2030 3.00, AK/HH/PSYC 2530 3.00.

HH/KINE 2050 3.00 Analysis of Data in Kinesiology I. An introduction to scientific method and the statistical analysis of experimental data. The conduct of simple experiments, techniques of naturalistic observation and the analysis of resulting data using fundamental concepts of descriptive and inferential statistics. Two lecture hours and two laboratory hours per week. One term. Prerequisite: AS/HH/SC/KINE 2049 4.00. Course credit exclusions: SC/BIOL 2060 3.00, AS/ECON 2500 3.00, ES/ENVS 2010 6.00, ES/ENVS 2010 3.00, AS/SC/GEOG 2420 3.00, AS/SC/MATH 1132 3.00, AK/AS/SC/MATH 2500 3.00, AK/AS/SC/MATH 2560 3.00, AK/AS/SC/MATH 2565 3.00, AS/SC/PHED 2050 3.00 (prior to Fall/Winter 1996-

1997), AS/POLS 3300 6.00, AK/AS/HH/SC/PSYC 2020 6.00, AK/AS/HH/SC/PSYC 2021 3.00, AK/HH/PSYC 2510 3.00, AS/SOCI 2030 6.00, AS/SOCI 3030 6.00.

HH/KINE 2380 3.00 Introduction to Sport Administration. This course is designed to introduce students to the knowledge and skills needed to be successful in sport management. Topics include leadership styles, communication and change management skills, creative problem-solving and an introduction to event management and marketing. Three lecture hours per week. One term. Course credit exclusions: None. Note: This course does not count for science credit.

HH/KINE 2475 3.00 Coaching: The Art and Science. This course introduces the fundamental principles involved in the coaching process. Background and philosophic issues related to the coach and the athlete are explored. Three lecture hours per week. One term. Course credit exclusions: None. Note: Upon successful completion of this course, students receive Level I Theory certification of the National Coaching Certificate Program.

HH/KINE 2490 3.00 Athletic Therapy I. The purpose of the course is to provide students with a broad spectrum of knowledge relating to the physiological, psychosocial and pathological aspects of participation in sport with an emphasis on the management factors in injury prevention and remediation. Three lecture hours per week. One term. Prerequisite or corequisite: AS/HH/SC/KINE 2031 3.00. Course credit exclusions: AS/SC/PHED 2490 3.00 (prior to Fall/Winter 1996-1997).

HH/KINE 3000 3.00 Psychology of Physical Activity and Health. An overview of the theoretical frameworks and psychological principles related to physical activity, exercise and sport. Three lecture hours per week. One term. Prerequisites: AS/HH/SC/KINE 1000 6.00; AS/HH/SC/KINE 1020 6.00; AS/HH/SC/KINE 2049 3.00; AS/HH/SC/KINE 2050 3.00; AS/SC/PSYC 1010 6.00. Course credit exclusions: AS/SC/KINE 2000 3.00 (prior to Fall/Winter 2007-2008).

HH/KINE 3012 3.00 Human Physiology II. The principles of homeostasis and physiological regulation are studied in relation to the cardiorespiratory, renal, locomotor, reproductive and digestive systems. Laboratory work is an essential part of the course. Three lecture hours per week, two laboratory hours in alternate weeks. One term. Prerequisite: AS/HH/SC/KINE 2011 3.00 or AS/HH/SC/KINE 3011 3.00. Introductory biology or life science is highly recommended. Course credit exclusions: AS/SC/KINE 3070 3.00 (prior to Fall/Winter 1997-1998), AS/SC/PHED 2070 3.00 (prior to Fall/Winter 1996-1997), SC/PHED 2070 4.00 (prior to Fall/Winter 1996-1997), AS/SC/PHED 3010 3.00 (prior to Fall/Winter 1996-1997), SC/PHED 3010 4.00 (prior to Fall/Winter 1996-1997), AS/PHED 3070 3.00 (prior to Fall/Winter 1996-1997), SC/PHED 3070 4.00 (prior to Fall/Winter 1996-1997).

HH/KINE 3020 3.00 Skilled Performance and Motor Learning. An introduction to the analysis and development of skilled performance. Two lecture hours and two laboratory hours per week. One term. Prerequisites: AS/HH/SC/KINE 2050 3.00; AS/SC/PSYC 1010 6.00. Course credit exclusions: AS/SC/PHED 3020 3.00 (prior to Fall/Winter 1996-1997).

HH/KINE 3030 3.00 Introduction to Biomechanical Analysis of Human Movement. Human movement is investigated with particular reference to the laws of physics (mechanics) and anatomical concepts as applied to joint motion and muscular action. Application of biomechanics to sports skills execution and laboratory exposure to contemporary analysis are included. Three lecture hours and one laboratory hour per week. One term. Prerequisite: AS/HH/SC/KINE 2031 3.00. Course credit exclusions: AS/SC/PHED 3030 3.00 (prior to Fall/Winter 1996-1997).

HH/KINE 3090 3.00 Psychology of Sport and Physical Activity. The theories and research of major topics in sport psychology are presented. Three lecture hours per week. One term. Prerequisites: AS/HH/SC/KINE 2050 3.00; AS/SC/PSYC 1010 6.00. Course credit exclusions: AS/HH/SC/KINE 2000 3.00, AS/SC/PHED 3090 3.00 (prior to Fall/Winter 1996-1997).

HH/KINE 3100 3.00 Health Psychology and Kinesiology. This course provides an overview of primary topics in health psychology, emphasizing both psychological research approaches specific to physical activity and

its application to behaviours related to eating and weight, pain, cancer and related diseases. Prerequisites for this course: AK/AS/HH/SC/PSYC 1010 6.00. Course credit exclusions: AK/AS/HH/SC/PSYC 3170 3.00.

HH/KINE 3150 3.00 Analysis of Data in Kinesiology II. This intermediate course in inferential statistics includes t-tests, multiple regression, ANOVA and selected non-parametric statistics. Practical applications to research in kinesiology and health science are emphasized. Two lecture hours and two lab hours per week. One term. Prerequisite: AS/HH/SC/KINE 2050 3.00. Course credit exclusions: AK/ADMS 3320 3.00 (prior to Fall/Winter 2005-2006), AK/MATH 2720 3.00, SC/BIOL 2060 3.00, AS/ECON 3500 3.00, ES/ENVS 2010 6.00, AS/SC/GEOG 2420 3.00, AS/SC/MATH 1132 3.00, AK/AS/SC/MATH 2500 3.00, AK/AS/SC/MATH 2570 3.00, AS/POLS 3300 6.00, AK/AS/HH/SC/PSYC 2020 6.00, AK/AS/HH/SC/PSYC 2022 3.00, AK/HH/PSYC 3110 3.00, AS/SOCI 3030 6.00.

HH/KINE 3240 3.00 Behavioural Approach to Administration of Fitness and Sport. The focus of this course is on working with people. Students learn the theory and practice of team building, communication and counselling skills. Three lecture hours per week. One term. Course credit exclusions: AS/PHED 2420 3.00 (prior to Fall/Winter 1996-1997). Note: This course does not count for science credit.

HH/KINE 3250 3.00 Business Management in Sport, Fitness and Allied Health. An overview of the key business management practices in the sport, fitness and allied health fields. The main emphasis is the development of an understanding of the theory, practices and skills which are essential to effective management. Three lecture hours per week. One term. Prerequisites: AS/HH/SC/KINE 1000 6.00; AS/HH/SC/KINE 1020 6.00. Course credit exclusions: AS/HH/KINE 4430 3.00. Not open to students enrolled in the Fitness Assessment and Exercise Counselling Certificate or the Sport Administration Certificate. Note: This course does not count for science credit.

HH/KINE 3340 3.00 Growth, Maturation and Physical Activity. The major purpose of this course is to examine and discuss the literature and research studies in those aspects of physical growth and development that directly concern educators. Individual differences in growth and development are stressed throughout. Three lecture hours per week. One term. Course credit exclusions: AS/SC/PHED 3340 3.00 (prior to Fall/Winter 1996-1997).

HH/KINE 3350 3.00 Physical Activity, Health and Aging. The course examines the aging process, lifestyle changes and the effect of physical activity on the health of aging adults. Three lecture hours per week. One term. Prerequisites: AS/HH/SC/KINE 1020 6.00; AS/HH/SC/KINE 2020 3.00. Note: Internet use is required for this course. Course credit exclusions: None.

HH/KINE 3360 3.00 Gender and Sexuality in Sport and Health. The course introduces students to the social production of gender (including femininity and masculinity) and sexuality and how it impacts the worlds of sport and health. The course introduces students to feminist and queer theory approaches within the discipline. Prerequisite: HH/KINE 1000 6.00. Course credit exclusions: HH/KINE 4350 3.00; HH/KINE 4360 3.00. Note: This course does not count for science credit.

HH/KINE 3400 3.00 Fitness Consulting and Personal Fitness Training. This course provides detailed theoretical and practical instruction on physical activity/exercise prescription, management, supervision and intervention strategies with a focus on health-related fitness outcomes. Three lecture hours per week. One term. Prerequisites: AS/HH/SC/KINE 1020 6.00; AS/HH/SC/KINE 2031 3.00; AS/HH/SC/KINE 3011 3.00. Corequisite: AS/HH/SC/KINE 3012 3.00; AS/HH/SC/KINE 3030 3.00. Course credit exclusions: None.

HH/KINE 3420 3.00 Cultural Studies of Sport, Leisure and Health. An introductory course offering students an opportunity to examine key concepts in cultural studies, such as representation, media, identity and hegemony as they relate to sport, leisure and health. Prerequisite: AS/HH/SC/KINE 1000 6.00. Course credit exclusions: None. Note: This course does not count for science credit.

HH/KINE 3430 3.00 Sports in Canadian Life. An historical examination of sports in Canadian society, including their origin, introduction to North America and development in Canada up to the present. The influence of Canadian culture as a whole on the development of the selected sports is considered. Three lecture hours per week. One term. Course credit exclusions: AS/PHED 3430 3.00 (prior to Fall/Winter 1996-1997). Note: This course does not count for science credit.

HH/KINE 3440 3.00 Politics of the Olympic Games. A comparative analysis of recent developments and characteristics of physical education and sports in representative nations and world regions. The course covers objectives, methods, personnel and facilities in physical education and evaluation of selected national sports programs. Three lecture hours per week. One term. Course credit exclusions: AS/PHED 3440 3.00 (prior to Fall/Winter 1996-1997). Note: This course does not count for science credit.

HH/KINE 3450 3.00 Athletic Injuries. An introductory examination of prevention, recognition and treatment of common athletic injuries. Follow-up remedial procedures and therapeutic modalities to enhance healing are also studied. Two lecture hours and two laboratory hours per week. One term. Prerequisite: HH/KINE 2031 3.00. Course credit exclusions: AS/SC/PHED 3450 3.00 (prior to Fall/Winter 1996-1997).

HH/KINE 3460 3.00 Regional Human Anatomy I. A comprehensive study of the structures of the human body. This course includes an examination of the upper limb, lower limb and back. Two lecture hours and two laboratory hours per week. One term. Prerequisite: AS/HH/SC/KINE 2031 3.00. Course credit exclusions: AS/SC/PHED 3460 3.00 (prior to Fall/Winter 1996-1997).

HH/KINE 3465 3.00 Regional Human Anatomy II. This course examines, in detail, the anatomical regions of the head, neck, back and thorax. Three lecture hours per week. One term. Prerequisite: AS/HH/SC/KINE 2031 3.00. Course credit exclusions: AS/SC/KINE 3050C 3.00 (prior to Fall/Winter 1998-1999).

HH/KINE 3480 3.00 Outdoor and Experiential Education. This course introduces fundamental principles and practices of outdoor and experiential education. Current theories, issues, trends and practices are discussed and the objectives of a range of outdoor programs are considered. Three lecture hours per week. One term. Course credit exclusions: AS/SC/PHED 3480 3.00 (prior to Fall/Winter 1996-1997).

HH/KINE 3490 3.00 Politics and Policy in the Sport Industry. Discussions about power, politics and ethics as they relate to current sport policy issues are explored. Policy development and policy analysis skills are learned and applied to issues in professional sport, amateur sport and university athletics. Three lecture hours per week. One term. Course credit exclusions: AS/PHED 3490 3.00 (prior to Fall/Winter 1996-1997). Note: This course does not count for science credit.

HH/KINE 3510 3.00 Sport Marketing and Event Management. The purpose of this course is to provide students with both the theory and practical skills required to organize and manage events. Additionally, students have the opportunity to learn from professionals working in this field. Three lecture hours per week. One term. Course credit exclusions: AS/PHED 3510 3.00 (prior to Fall/Winter 1996-1997). Note: This course does not count for science credit.

HH/KINE 3530 3.00 Theories of Play. A critical analysis of definitions, concepts, philosophies and assumptions of classical, recent and modern theories of play with implications for macro and micro programming and planning for play service systems. Three lecture hours per week. One term. Prerequisite: A 1000-level Social Science course. Course credit exclusions: AS/PHED 3530 3.00 (prior to Summer 1996). Note: This course does not count for science credit.

HH/KINE 3570 3.00 Theory and Methodology of Training. The course provides an examination of the scientific and methodological theories, techniques and planning methods utilized in the training of the skilled athlete, with practical application to selected sports. Three lecture hours

per week. One term. Prerequisites: AS/HH/SC/KINE 1000 6.00; AS/HH/SC/KINE 1020 6.00. Course credit exclusions: AS/PHED 3570 3.00 (prior to Fall/Winter 1996-1997).

HH/KINE 3575 3.00 Athletic Injuries - Extremities. This course is an introduction to athletic injuries including injury classification, basic level assessment of the extremities, tissue healing, protective equipment, basic treatment, and common injuries to the extremities. Prerequisite/Corequisite: AS/HH/SC KINE 2031 3.00. Course credit exclusions: AS/HH/SC KINE 3450 3.00.

HH/KINE 3580 3.00 Coaching: The Strategy and Tactics of Sport. This course investigates the conceptual basis of strategic and tactical planning for sports performance. An emphasis is placed on analyzing the variety of sources that contribute to the conceptual framework a coach may use in formulating strategic and tactical plans. Three lecture hours per week. One term. Prerequisites or corequisites: AS/HH/SC/KINE 2475 3.00. Course credit exclusions: None. Note: This course does not count for science credit.

HH/KINE 3585 3.00 Clinical Placement in Athletic Therapy. This course provides students with the opportunity to gain practical experience in clinical situations within the profession of athletic therapy. Students integrate theory and practice in actual workplace situations by working directly with sports medicine specialists. Ten hours clinical placement per week, five one-and-a-half hour seminars. One term. Prerequisites: Open only to athletic therapy certificate students, with permission of the athletic therapy program coordinator. Course credit exclusions: None.

HH/KINE 3600 3.00 Athletic Therapy II. This course provides students with a broad spectrum of knowledge relating to the physiological and pathological aspects of participation in sport with an emphasis on detection and human factors in injury prevention and remediation. Three lecture hours per week. One term. Prerequisite: AS/HH/SC/KINE 2490 3.00. Course credit exclusions: AS/SC/PHED 3600 3.00 (prior to Fall/Winter 1996-1997).

HH/KINE 3610 3.00 Coaching: Psychological and Sociological Aspects. The course focuses upon the application of principles of psychology to coaching. An examination of philosophy of coaching, legal liability, socialization and team dynamics is also undertaken with a view to establishing effective coaching methodology. Three lecture hours per week. One term. Prerequisites: AS/HH/SC/KINE 2475 3.00; AS/SC/PSYC 1010 6.00. Course credit exclusions: AS/SC/PHED 2470 6.00 (prior to Fall/Winter 1996-1997), AS/SC/PHED 3610 3.00 (prior to Fall/Winter 1996-1997).

HH/KINE 3620 3.00 Sociology of Sport I. Sociological analysis of sport in contemporary society with particular emphasis on issues relating to children, gender and the Canadian scene. Three lecture hours per week. One term. Course credit exclusions: AS/SC/PHED 3620 3.00 (prior to Fall/Winter 1996-1997), AP/SOCI 3670 3.00. Note: This course does not count for science credit.

HH/KINE 3635 3.00 Fundamentals of Epidemiology. The course provides an introduction to the basic principles of Epidemiology with emphasis on studies undertaken in the field of kinesiology. Topics include: understanding of different study designs, analytic methods used, validity, outbreak investigation, diagnostic tests and causation. Prerequisite: AK/AS/HH/SC/KINE 2050 3.00. Course credit exclusions: None.

HH/KINE 3640 3.00 Epidemiology of Physical Activity, Fitness and Health. This course provides an in-depth assessment of the epidemiology of physical activity, fitness and health. General concepts of epidemiology are covered, as well as associations among activity, exercise, fitness and disease/risk factors. Three lecture hours per week. One term. Prerequisite: AS/HH/SC/KINE 2020 3.00. Course credit exclusions: AS/SC/KINE 3050B 3.00 (prior to Fall/Winter 1998-1999).

HH/KINE 3645 3.00 Physical Activity and Health Promotion. This course explores the Canadian context of health promotion and physical activity with a specific emphasis on health communication, "best practices"

in programming for communities, workplaces, schools and health care settings, and the development of public policy. Prerequisites: AS/HH/SC/KINE 1020 6.00. Course credit exclusions: None.

HH/KINE 3650 3.00 Functional Neuroanatomy. This course investigates the anatomy of the central nervous system, additionally discussing the clinical functional relevance of each area. Three lecture hours per week. One term. Prerequisite: AS/HH/SC/KINE 2031 3.00. Course credit exclusions: None.

HH/KINE 3670 3.00 Molecular and Cellular Neuroscience with Applications to Health. The course covers the basic principles of molecular and cellular neuroscience. The course introduces students to the most basic fundamentals of neuroscience, which is the study of the functional properties of the nervous system and relationship between brain and disease. Topics covered range from neuronal structure and function, communication at the synapse and neuromuscular junction, membrane receptors, synaptic transmission, neurotransmitters to the intra- and intercellular signaling systems within the sensory, motor and memory systems. This course provides the background for higher-level courses that deal with more specialized topics in neuroscience and the neurobiology of disease. Prerequisite: HH/KINE 3012 3.00. Course credit exclusions: HH/KINE 4512 3.00 (prior to Summer 2009).

HH/KINE 3710 3.00 The Immune System in Health and Disease. The immune system in health and disease is designed to provide students with an overview of the immune system including innate and adaptive immunity. The emphasis is on normal immune function and on human diseases with immune origin or immune components particularly diseases where motion is limited by disease such as the arthritises. Prerequisite: HH/KINE 2011 3.00; HH/KINE 3012 3.00. Course credit exclusions: None. Note: May not be taken for credit by Biology or Biochemistry majors.

4000-Level Courses

Note: only students with Honours standing may register in 4000-level kinesiology and health science courses.

HH/KINE 4010 3.00 Exercise Physiology. The study of the physiological mechanisms involved during physical activity. The course covers the physiological effects of exercise and training upon the neuromuscular, cardiovascular, respiratory and metabolic systems. Three lecture hours per week, two laboratory/tutorial hours in alternate weeks. One term. Prerequisites: AS/HH/SC/KINE 3011 3.00; AS/HH/SC/KINE 3012 3.00. Course credit exclusions: None.

HH/KINE 4020 3.00 Human Nutrition. Basic energy and regulatory nutrients are examined, followed by an applied nutrition section in weight control, eating disorders, sport nutrition, food as drugs and food safety. Metabolic interrelationships and health associations are applied throughout. Three lecture hours per week. Prerequisite: AS/HH/SC/KINE 4010 3.00. Course credit exclusions: None.

HH/KINE 4060 3.00 Independent Studies in Kinesiology and Health Science. Students undertake a research project under the supervision of a faculty member. This should include a library investigation, and may include laboratory and/or field investigations. A substantial paper, a poster presentation and an oral presentation are part of the course requirements. Prerequisite: Normally only available to students after completion of 84 credits. Course credit exclusions: None. Note: Some independent study topics may not be eligible for science credit. Students should consult the School of Kinesiology and Health Science for application.

HH/KINE 4060 6.00 Independent Studies in Kinesiology and Health Science. Students undertake a research project under the supervision of a faculty member. This should include a library investigation, and may include laboratory and/or field investigations. A substantial paper, a poster presentation and an oral presentation are part of the course requirements. Prerequisite: Normally only available to students after completion of 84 credits. Course credit exclusions: None. Note: Some independent study topics may not be eligible for science credit. Students should consult the School of Kinesiology and Health Science for application.

HH/KINE 4060N 3.00 Independent Studies in Kinesiology and Health Science. Students undertake a research project under the supervision of a faculty member. This should include a library investigation, and may include laboratory and/or field investigations. A substantial paper, a poster presentation and an oral presentation are part of the course requirements. Prerequisite: Normally only available to students after completion of 84 credits. Course credit exclusions: None. Note: Some independent study topics may not be eligible for science credit. Students should consult the School of Kinesiology and Health Science for application.

HH/KINE 4100 6.00 Honours Thesis. A thesis involving empirical research. Students arrange for supervision by a member of the School of Kinesiology and Health Science. Contact the Undergraduate Office for details and application form. Prerequisites: Permission of the School of Kinesiology and Health Science; students must be in a Specialized Honours Program in Kinesiology and Health Science and have completed 84 credits. Note: Some Honours thesis topics may not be eligible for science credit.

HH/KINE 4120 3.00 Nutritional Aids in Sport and Exercise. This course investigates the influence of nutritional supplements/aids on exercise performance, with emphasis on the underlying physiologic and biochemical mechanisms behind the effectiveness of ergogenic compounds. Prerequisite: AS/HH/SC KINE 4010 3.00, AS/HH/SC KINE 4020 3.00. Course credit exclusions: None.

HH/KINE 4130 3.00 Advanced Human Nutrition. This course is designed to provide a detailed analysis of the metabolic, biochemical and physiological processes that occur under health, exercise, altered nutritional status, and disease states. Prerequisite: HH/KINE 4010 3.00; HH/KINE 4020 3.00. Course credit exclusions: None. Note: This is an advanced nutrition course that builds on the basic nutrition information acquired in HH/KINE 4020 3.00. It is designed to provide an in depth analysis of the pathways that integrate the metabolism of carbohydrates, protein and fat. It also investigates the role of nutrition in the development and exacerbation of chronic diseases, and under different exercise states. It is targeted towards students interested in nutrition/physiology-related careers.

HH/KINE 4140 3.00 Fundamentals of Protein Nutrition and Metabolism. This course discusses current concepts in metabolism and regulatory roles of different amino acid and amino acid groups in tissue and on whole body nutrition; it analyzes concepts in protein synthesis and breakdown, and their regulation in different nutritional, physical activity, and diseased states; it also discusses methodologies in protein and amino acid nutrition research. Prerequisite: HH/KINE 4020 3.00. Course credit exclusions: None.

HH/KINE 4210 3.00 Disorders of Visual Cognition. We rely heavily on vision to interact with the world. This course investigates the clinical disorders that are manifested with impairments in different stages of visual processing. Prerequisite: AS/HH/SC/KINE 3020 3.00. Course credit exclusions: None.

HH/KINE 4220 3.00 Human Motor Control and Learning. This course deals with concepts of how the brain learns and controls voluntary movement, particularly those of the upper limbs. Prerequisites: AS/HH/SC/KINE 3020 3.00. Course credit exclusions: None.

HH/KINE 4230 3.00 Neuronal development for activity and health. Analyzes the cellular, molecular and physiological processes underlying neuronal and neuromuscular development in health and disease. Prerequisite: HH/KINE 3012 3.00. Course credit exclusions: None.

HH/KINE 4240 3.00 Applied Human Factors. This course discusses human factors, e.g. sensory, perceptual, motor and cognitive systems, and how they feature in machines, systems design, procedures and skills, with an emphasis on physical activities and sport. Prerequisite: HH/KINE 3020 3.00. Course credit exclusions: None.

HH/KINE 4250 3.00 Physical Activity and Cognition. This course examines the effects of engaging in physical activity on cognitive systems such as attention, learning, and memory. Both normal healthy and disease states will be discussed. Course credit exclusions: None.

HH/KINE 4340 3.00 Sport, "Race" and Popular Culture in Canada. The course gives students a historical and contemporary understanding of 'race' and racism in Canadian popular culture as it pertains to the world of sport. Prerequisite: AS/HH/SC/KINE 1000 6.00. Course credit exclusions: AS/KINE 3630 3.00 (prior to Fall/Winter 2005-2006). Note: This course does not count for science credit.

HH/KINE 4370 3.00 Body as Illumination: Survey of Meditation Practices Past and Present. Cross-cultural survey of training for enlightenment through meditation techniques, posture practices, and spiritual traditions. From prehistoric times our ancestors used repetitive physical activities to explore altered states of consciousness and to purify or illuminate the body/mind harmony as optimal health. Three lecture hours per week. One term. Prerequisite: AS/HH/SC/KINE 1000 6.00. Course credit exclusions: None. Note: This course does not count for science credit.

HH/KINE 4375 3.00 Body as Weapon: Survey of Martial Arts and Combat Training. Cross-cultural survey of training for combat in military units, martial arts, and self defence. Fighting and war stand as two ancient yet enduring activities evoking study and systematic practice of lethal methods for using the body as a weapon against antagonists. Three lecture hours per week. One term. Prerequisite: AS/HH/SC/KINE 1000 6.00. Course credit exclusions: None. Note: This course does not count for science credit.

HH/KINE 4400 6.00 Advanced Fitness/Lifestyle Assessment and Counselling. Students receive supervised, practical experience in designing, administering and interpreting fitness assessments along with the follow-up exercise counselling for athletes and the general public. Two lecture hours and three laboratory hours per week. Two terms. Prerequisites: AS/HH/SC/KINE 3400 3.00; permission of the course director. Open only to students in the Certificate in Fitness Assessment and Exercise Counselling. Prerequisite or corequisite: AS/HH/SC/KINE 4010 3.00. Course credit exclusions: None.

HH/KINE 4420 3.00 Relaxation: Theory and Practice. This course focuses on an understanding of the physiological and psychological basis of relaxation as a self-management procedure and in the utilization of relaxation strategies in sport, health and physical activity. Three lecture hours per week. One term. Prerequisites: AS/HH/SC/KINE 2031 3.00; AS/HH/SC/KINE 3011 3.00; AS/HH/SC/KINE 3012 3.00 or permission of the course director. Note: This course does not count for science credit.

HH/KINE 4421 3.00 Relaxation II: Research and Application. This course reviews the research and application of self-regulation strategies (relaxation, biofeedback, imagery, cognitive restructuring and attention control) for performance and health enhancement. Three lecture hours per week. One term. Prerequisite: AS/HH/KINE 4420 3.00. Course credit exclusions: None.

HH/KINE 4430 3.00 Business Skills for Sport and Fitness Professionals. This course includes theory and detailed practical instruction about key management/organizational processes and their successful application to sport and fitness-related business initiatives. Three lecture hours per week. One term. Prerequisite: Students must be in the Sport Administration Certificate or the Fitness Assessment and Exercise Counselling Certificate. Course credit exclusions: AS/HH/KINE 3250 3.00. Note: This course does not count for science credit.

HH/KINE 4440 3.00 Advanced Exercise Physiology: Muscle. Advanced topics in exercise physiology and biochemistry, including energy metabolism, fatigue, skeletal muscle physiology, adaptations to exercise and training. Applications of exercise to disease states, animal laboratories, and discussions of original research articles in exercise physiology. Three class hours (lectures/laboratories/tutorials) per week. One term. Prerequisite: AS/HH/SC/KINE 4010 3.00. Course credit exclusions: None.

HH/KINE 4445 3.00 Physiological Basis of Fatigue. An in-depth examination of the physiological processes that limit muscular exercise. Topics include cellular and metabolic failure in sustained muscular contractions, central nervous system limitations, substrate depletion and product accumulation, body fluid shifts and adaptations that forestall

fatigue. Three lecture hours per week. One term. Prerequisites: AS/HH/SC/KINE 3011 3.00; AS/HH/SC/KINE 3012 3.00; AS/HH/SC/KINE 4010 3.00. Course credit exclusions: None.

HH/KINE 4448 3.00 Advanced Human Physiology: Endocrinology. An overview of human endocrinology at the physiological, biochemical and molecular levels, with an emphasis on health, disease, exercise and adaptation. Three hours per week. One term. Prerequisite: HH/ KINE 4010 3.00. Course credit exclusions: SC/BIOL 4320 3.00.

HH/KINE 4450 3.00 Advanced Exercise Physiology: Cardiovascular. An overview of the cardiovascular physiology of exercise at both the central (heart) and peripheral (blood vessels, capillaries) levels, with an emphasis on health, disease, exercise and adaptation. Physiology adaptations at the molecular level are emphasized. Two lecture hours and two lab hours per week. One term. Prerequisite: AS/HH/SC/KINE 4010 3.00. Course credit exclusions: None.

HH/KINE 4451 3.00 Advanced Biomechanical Analysis of Human Movement (Part I - Kinematics). An examination of human motion, including the fundamentals of motion description, mechanics, and investigative techniques in biomechanics with an emphasis on the kinematics of movement. Special topics and problems relevant to students' interests are covered in seminars and small group laboratory sessions. Two lecture hours per week, plus laboratory hours. One term. Prerequisite: AS/HH/SC/KINE 3030 3.00. Course credit exclusions: None.

HH/KINE 4452 3.00 Advanced Biomechanical Analysis of Human Movement (Part II - Kinetics). An examination of human motion, including the fundamentals of motion description, mechanics, and investigative techniques in biomechanics with an emphasis on the kinetics of movement. Special topics and problems relevant to students' interests are covered in seminars and small group laboratory sessions. Two lecture hours per week, plus laboratory hours. One term. Prerequisite: AS/HH/SC/ KINE 4451 3.00. Course credit exclusions: None.

HH/KINE 4455 3.00 Biomechanics and Motor Control Laboratory. This course focuses on the theory and practice of methods for analyzing the mechanics and control of movement. Methods include collection and analysis of biological signals such as electromyography and evoked potentials, as well as techniques for both kinematic and kinetic analysis of movement. Two lecture hours and two lab hours per week. One term. Prerequisites: AS/HH/SC/KINE 3020 3.00, AS/HH/SC/KINE 3030 3.00. Course credit exclusions: None.

HH/KINE 4460 3.00 Occupational Biomechanics. Use of biomechanics in the occupational setting is introduced. Topics include workplace assessment techniques, injury mechanisms, tissue mechanics and the (re)design of tools and workplace. Specific disorders and issues involving the upper extremity and lower back are addressed. Three lecture hours per week. One term. Prerequisite: AS/HH/SC/KINE 3030 3.00. Course credit exclusions: None.

HH/KINE 4470 3.00 Muscle and Joint Biomechanics. Quantitative biomechanical principles are used to evaluate the production of human motion at the joint and muscle level. Factors affecting total joint moment of force are studied including muscle mechanics, muscle architecture, moment arm and electrophysiology. Two lecture hours and two laboratory hours per week. One term. Prerequisite: AS/HH/SC/KINE 3030 3.00. Course credit exclusions: AS/SC/KINE 3470 3.00 (prior to Fall/Winter 2003-2004).

HH/KINE 4475 3.00 Clinical Biomechanics. Quantitative biomechanical techniques are used to evaluate musculoskeletal injuries and pathological movement. Standard biomechanics techniques and modelling methods are combined with an understanding of tissue mechanics to quantitatively evaluate injury mechanisms and rehabilitation of tissues (bone, ligament, tendon, muscle). Three lecture hours per week. One term. Prerequisite: AS/HH/SC/KINE 3030 3.00. Recommended: AS/ HH/SC/KINE 3470 3.00. Course credit exclusions: None.

HH/KINE 4480 3.00 Sociology of Sport II. This course focuses on social problems in sport. Topics include inequality, sport as work, sport as a spectacle, and sport and the state. Three lecture hours per week. One

term. Prerequisite: AS/HH/KINE 3620 3.00 or permission of the course director. Course credit exclusions: None. Note: This course does not count for science credit.

HH/KINE 4485 3.00 Political Economy of Sport and Physical Activity in Canada. This course is an introduction to the dynamic interplay of economic, political and social forces within which sport and physical activity have been developed, elaborated and contested in Canada. Prerequisite: AS/HH/SC KINE 1000 6.00. Course credit exclusions: None. Note: This course does not count for science credit.

HH/KINE 4490 3.00 Philosophical Issues in Kinesiology and Health Science. This course examines the philosophical foundations of kinesiology and health science; their manifestation and influences on the development of physical activity, physical education and sport programs; identification and critical analysis of current issues in these programs in modern society. Prerequisite: AS/HH/SC/KINE 1000 6.00. Course credit exclusions: None. Note: This course does not count for science credit.

HH/KINE 4500 3.00 Neural Control of Movement. This course reviews fundamental concepts and current issues in motor control, with an emphasis on the brain mechanisms underlying motor behaviour. Topics include walking, looking, reaching, posture and complex skill coordination. Three lecture hours per week. One term. Prerequisite: AS/HH/SC/KINE 3020 3.00 or permission of the course director. Course credit exclusions: None.

HH/KINE 4505 3.00 Neurophysiology of Movement in Health and Disease. This course provides an overview of current neurophysiological concepts in motor control, with an emphasis on the neurophysiological principles underlying human movement disorders. Three hours per week, no labs. One term. Prerequisite: AS/HH/SC/KINE 3011 3.00 or AS/HH/SC/ KINE 3020 3.00. Course credit exclusions: AS/SC/KINE 4050M 3.00 (prior to Fall/Winter 2002-2003), AS/SC/KINE 4050A 3.00 (prior to Fall/Winter 2003-2004).

HH/KINE 4510 3.00 Cellular and Molecular Basis of Muscle Physiology. Topics include muscle development, muscle-specific gene expression, molecular basis of muscle contraction, biochemical plasticity of muscle, sarcolemmal and nuclear signal transduction in muscle. Three lecture hours per week. One term. Prerequisite(s): AS/HH/SC/KINE 2011 3.00, or SC/BIOL 3060 4.00 and SC/BIOL 3070 4.00. Course credit exclusions: None.

Cross-listed to: HH/KINE 4510 3.00, SC/BIOL 4510 3.00

HH/KINE 4512 3.00 Molecular and Cellular Neuroscience with Applications to Health. Study of molecular mechanisms underlying the structure and functions of the nervous system in health and disease. Prerequisite: AS/HH/SC/KINE 3012 3.00. Course credit exclusions: SC/ BIOL 4370 3.00

HH/KINE 4515 3.00 Stem Cells: Physiology and Therapeutic Applications. This course examines the physiology of tissue-specific stem cell populations in the context of potential therapeutic strategies used for the treatment of chronic disease states. Prerequisite: AS/HH/SC/KINE 4010 3.00. Course credit exclusions: None.

HH/KINE 4518 3.00 Molecular Basis of Selected Diseases. This course is designed to provide students with an understanding of the molecular mechanisms that underlie selected diseases. Disease states included are cancer, acquired immune deficiency syndrome, Alzheimer's, bovine spongiform encephalopathy and muscular dystrophy. Prerequisites: AS/HH/SC/KINE 3011 3.00, AS/HH/SC/KINE 3012 3.00, and AS/HH/SC/KINE 4010 3.00. Course credit exclusions: None.

HH/KINE 4520 3.00 Sport Psychology Seminar. The course provides an in-depth examination of selected topics in sport psychology: motivation, imagery, self-regulation and attention. The emphasis is on the application of mental training skills in sport settings. Three lecture hours per week. One term. Prerequisite: AS/HH/SC/KINE 3000 3.00. Course credit exclusions: None.

HH/KINE 4530 3.00 Sport Administration Fieldwork Placement. Students spend a minimum of 40 hours working in an administrative setting related directly to the area of sport administration. The practical experience is supported by lectures, seminars, reports and readings. Three hours per week. One term. Prerequisites: AS/HH/KINE 3490 3.00; students must be in the Sport Administration Certificate. Course credit exclusions: None. Note: This course does not count for science credit.

HH/KINE 4545 6.00 Sport Administration Applied Research Perspectives. This course provides students with an overview of selected current issues facing organizations in the sport industry as well as a grounding in social research methods. Students conduct applied research addressing problems faced by sport organizations. Three lecture hours per week. Two terms. Prerequisites: AS/HH/SC/KINE 2050 3.00 or equivalent; AS/HH/KINE 2380 3.00; AS/HH/KINE 3240 3.00; AS/HH/KINE 3490 3.00; AS/HH/KINE 3510 3.00. Course credit exclusions: None.

HH/KINE 4550 6.00 Coaching Field Experience. The student works with a mentor coach for a complete sport season and submits a comprehensive log book. The field experience includes physiological testing, videotape analysis and three other coaching tasks. Three hours per week. Two terms. Prerequisites or corequisites: AS/HH/SC/KINE 4610 3.00. Open only to students in the Coaching Certificate. Course credit exclusions: None. Note: Students may take this course concurrently with AS/HH/SC/KINE 4610 3.00.

HH/KINE 4560 3.00 Physical Activity and Children: Pedagogy. This course examines teaching methods available for people working in a physical activity setting with children. Emphasis is placed on the core program components of dance, games and gymnastics. Curriculum and lesson planning for school based physical education is included. Two lecture hours and two laboratory hours per week. One term. Prerequisite: AS/HH/SC/KINE 3340 3.00. Course credit exclusions: None. Note: This course does not count for science credit.

This course introduces students to the recognition of situations or practices that contribute to injuries, strategies for injury prevention, with an emphasis on an epidemiological/public health approach. Prerequisites: AS/HH/SC/KINE 1000 6.00; AS/HH/SC/KINE 2050 3.00. Course credit exclusions: None.

HH/KINE 4570 3.00 Sports Injury Assessment. An advanced course in the recognition and assessment of common athletic injuries. The course emphasizes a detailed understanding of surface anatomy and landmarking, injury mechanics and assessment techniques, and the implications of injury to a body part. Two lecture hours and one laboratory session per week. One term. Prerequisites: AS/HH/SC/KINE 3450 3.00; AS/HH/SC/KINE 3600 3.00; current CPR and First Aid; clinical and field experience. Open only to students in the Athletic Therapy Certificate. Prerequisite or corequisite: AS/HH/SC/KINE 3460 3.00. Course credit exclusions: None.

HH/KINE 4575 3.00 Athletic Injuries - Body Core. This is a course in the assessment, care and prevention of orthopaedic and neurological injuries and conditions of the head, body and spine. Also included is a review of palpations and muscle testing related to the body core. Prerequisites: AS/HH/SC KINE 3575 3.00, AS/HH/SC KINE 2031 3.00. Course credit exclusions: None.

HH/KINE 4580 3.00 Treatment and Rehabilitation of Sports Injuries. An advanced course in the treatment and rehabilitation of common athletic injuries including generalized body reactions to injury, specific tissue responses to trauma, the immediate treatment of injuries, the long-term rehabilitation of injuries and the use of modalities. Two lecture hours and two laboratory hours per week. One term. Prerequisites: AS/HH/SC/KINE 4570 3.00; current CPR and First Aid; clinical and field experience. Open only to students in the Athletic Therapy Certificate. Course credit exclusions: None.

HH/KINE 4590 6.00 Athletic Therapy Seminar. An advanced-level course in athletic therapy applying theoretical background to sport-related injuries and rehabilitation. Two seminar hours per week plus extra out-of-class hours. Two terms. Prerequisites: AS/HH/SC/KINE 3450 3.00; AS/

HH/SC/KINE 3460 3.00; AS/HH/SC/KINE 3600 3.00; AS/HH/SC/KINE 4570 3.00; AS/HH/SC/KINE 4580 3.00. Open only to students in the Athletic Therapy Certificate or with permission of the course director. Prerequisite or corequisite: AS/HH/SC/KINE 3585 3.00.

HH/KINE 4595 3.00 Ethics for Kinesiology and Health. This course provides grounding in ethical theories and approaches, and applies ethical paradigms to issues in kinesiology and health science. Two lecture hours and one seminar hour per week. One term. Prerequisite: AS/HH/SC/KINE 1000 6.00. Course credit exclusions: None.

HH/KINE 4600 3.00 Coaching: Science and Methodology. The course focuses on coaching methodology and scientific principles applied to coaching. Methodology includes planning, conducting and evaluating training sessions, and time, stress and team management. Systems of training, scientific conditioning methods and other influences on conditioning and performance are included. Three lecture hours per week. One term. Prerequisites: AS/HH/SC/KINE 2475 3.00, AS/HH/SC/KINE 3610 3.00. Note: Levels I, II and III Theory of the National Coaching Certification are granted with the successful completion of AS/HH/SC/KINE 3610 3.00 and AS/HH/SC/KINE 4600 3.00. Course credit exclusions: None.

HH/KINE 4610 3.00 Advanced Coaching Seminar. The course consists of selected topics in coaching. A review of the literature with an application to coaching is presented from the areas of psychology, physiology, sociology, sports management etc. Guest lecturers and symposiums are featured. Three hours per week. One term. Prerequisite: AS/HH/SC/KINE 2475 3.00. Course credit exclusions: None.

HH/KINE 4620 3.00 Counselling Skills for Kinesiology and Health Science. This course explores concepts, issues and skills related to "embedded" helping/counselling from a person-centred framework. Effective professional relationships and motivational interviewing are emphasized. Supervised skills practice is included. Relevant to persons working in health care, education and community services. Two lecture hours and one tutorial hour per week. Prerequisite: HH/PSYC 1010 6.00. Course credit exclusions: None. The interdisciplinary program in Work and Labour Studies draws widely on the social sciences, industrial relations and law to explore the Canadian and international world of work and workers in the global era. In addition to its core faculty (listed above), WALs draws on more than 50 York faculty who teach work and labour from more than a dozen disciplinary perspectives.

WALS is doubly focused: preparing students for graduate and professional further education; preparing students for work in the public and private sectors. WALs' Labour Studies Placement course, now in its 19th year, has placed almost 300 students in internships with employers in the public, private and community sectors, which have led on to employment as well as to entry to graduate professional programs.

Labour studies students go on to graduate and professional studies in industrial relations, labour studies, human resource management, law, economics, public administration, environmental studies, political science, sociology, social work. Their careers are in law, government, the trade union movement, international development, the private sector, teaching, social work and occupational health and safety.

The Department of Languages, Literatures, and Linguistics offers one of the widest selections of languages of any Canadian university: American Sign Language, Arabic, Chinese (Mandarin), German, Greek (both Classical and Modern), Hebrew, Hindi-Urdu, Jamaican Creole, Italian, Japanese, Korean, Latin, Portuguese, Russian, Swahili, Tamil and Yiddish. The study of foreign languages and literatures makes communication possible among people of different linguistic and cultural backgrounds and fosters intercultural understanding. This enables our students to engage the global community thoughtfully and creatively.

The department also offers courses in linguistics, the discipline concerned with discovering the organizing principles of human language and applying these principles to the description of individual languages. Linguistics attempts to answer questions about the structure of languages, about how languages are alike and how they differ, about how children acquire language, about the relation between language and thought, language perception and production, as well as language and society. As a result, the study of linguistics can provide new perspectives on almost every aspect of the humanities and social sciences.

The department offers courses leading to Honours BA and BA degrees in German/German studies, Italian culture, Italian studies, linguistics, Portuguese studies, Russian/Russian studies and Spanish, as well as graduate MA and PhD degrees in Linguistics and Applied Linguistics. The department also offers Certificates of Language Proficiency in Chinese, German, Italian, Japanese, Modern Greek, Portuguese, Russian and Spanish, as well as an Advanced Certificate in Hebrew and Judaic Studies and a Certificate in Teaching English to Speakers of Other Languages (TESOL). The department's language programs, through their various courses and language proficiency certificates, contribute to a variety of area studies and interdisciplinary programs: African Studies, Classical Studies, East Asian Studies, Environmental Studies, European Studies, Hellenic Studies, International Development Studies, Jewish Studies, Latin American and Caribbean Studies, South Asian Studies, Religious Studies and Women's Studies. For course listings, please see the individual languages within this section. For specific program or certificate requirements, please consult the Faculty of Liberal Arts and Professional Studies Programs of Study section.

Courses in Language, Literature and Culture

General Regulations

1. Entry to Language Courses

Any student may enrol in a language course at any level, subject to the conditions enumerated below.

- Admission to a student's first course in a language at York is by placement questionnaire and/or interview, or departmental authorization slip.
- In most cases, students who have completed a 1000-level language course with a grade of at least C are automatically admissible to a course at the next level in the same language, but may be pre-tested for purposes of course or section placement.
- Registration in any language course may be limited at the discretion of the department.
- Students intending to major or minor in German studies, Italian studies, Portuguese studies, or Spanish are encouraged to begin study of the relevant language in their first year.

2. Credit for Language Courses

A language course may be taken for credit in any year of any undergraduate program. Credit is given for a course if a grade of D or better is achieved. However, to advance from one level to another level, a student must achieve at least a grade of C.

3. Language of Instruction

Some literature and culture courses are given in English. In others, instruction is given in the relevant language, and entry to courses and programs depends upon the student's ability to function in that language. The department may require a student to demonstrate language competence before granting admission to a course. For details, please consult the department's supplemental calendar.

4. Frequency of Course Offerings

Not all of the courses will necessarily be offered in any given year. For details of courses to be offered, please consult the Department of Languages, Literatures and Linguistics supplemental calendar.

The interdisciplinary program in Latin American and Caribbean Studies (LACS) allows students to pursue their interest in Latin America and the Caribbean by taking courses taught in a number of departments and divisions in the Faculty of Liberal Arts and Professional Studies. Students can double major or minor in Latin American and Caribbean studies and an Honours BA program in the Faculty of Liberal Arts and Professional Studies. The LACS program offers introductory core courses in Latin American and Caribbean studies as well as other introductory and upper-level courses in the area. The purpose of the core courses is to introduce and develop interdisciplinary ways of looking at the regions while at the same time integrating knowledge obtained in other courses. The program courses provide shared intellectual meeting grounds for LACS majors and other students. The interdisciplinary nature of the LACS program ensures a broad and deep understanding of the Latin American and Caribbean regions.

The LACS program works together with Founders College and the Centre for Research on Latin America and the Caribbean (CERLAC) to offer students a wide variety of events related to the Latin American and Caribbean regions. These include guest lectures by internationally renowned academics, workshops and conferences, and cultural and social events. LACS majors and minors may also use the Documentation Centre of the Centre for Research on Latin America and the Caribbean (CERLAC, 240 York Lanes).

Study Abroad Programs. York University has a formal student exchange agreements with the University of the West Indies (UWI) with campuses in Barbados, Jamaica and Trinidad and Tobago, as well as universities in Brazil, Ecuador, Guyana, Mexico and Venezuela which allows York students to study at these institutions and get credit from York. LACS majors may also get permission to earn academic credit for other courses taken at other universities in the Latin American and Caribbean area. For further information contact International@York or the LACS coordinator.

For specific program requirements and the list of program courses, please consult the Faculty of Liberal Arts and Professional Studies Programs of Study section.

The Law and Society program is an undergraduate, interdisciplinary Honours program that examines law in its broader social and cultural context. It is one of the oldest and largest such legal studies programs in North America with an over 30-year history and approximately 1,000 majors. Our faculty brings a range of interdisciplinary expertise and training to the classroom and draw from fields as diverse as anthropology, history, philosophy, law, sociology, criminology and political science.

The goals of the Law and Society program are to promote the intellectual importance of the study of law and society, and law in society; to provide a framework within which students may explore different approaches to law using interdisciplinary resources as well as international and comparative perspectives; to equip students with critical skills for socio-legal study and research; and to sharpen a view of law as implicated in the everyday life of students. The program must be seen within the context of a liberal arts undergraduate education. It is designed for interested undergraduate students, whatever their future career orientation.

While some of our students will plan to go on to law school, we in Law and Society distinguish sharply between law as a vocation or profession, and law as an object of interdisciplinary study. In turn, many of our students will also choose to follow up our program with a graduate degree in a related field of the social sciences, humanities or public policy and administration studies. Some will also choose to go on to acquire additional qualifications in Legal Assistant, Conflict Mediation or Court and Tribunal Administration programs offered at various community colleges. Others still will pursue careers focused on social justice, education or journalism.

Linguistics is the scientific study of natural language organization. It concerns itself with discovering the universal principles of human language and applying these principles to provide systematic descriptions of individual languages. To this purpose, linguists investigate sound and word patterns, sentence structure, language usage and change, the acquisition of first and second languages, as well as the relationship between language and the mind and language and society.

Because language mediates virtually all forms of human endeavour, the study of linguistics can provide new perspectives on almost every aspect of the humanities and social sciences. In addition, it has applications to primary and secondary education, speech-language pathology and the applied sciences of communication engineering and computer science.

For specific program requirements, please consult the Faculty of Liberal Arts and Professional Studies Programs of Study section.

Courses in Linguistics

AP/LING 1000 6.00 Introduction to Linguistics. Examination of fundamental principles of language organization in phonology, morphology and syntax from both practical and theoretical points of view with illustrations from English and a variety of other languages. Brief survey of the areas of child language acquisition, historical linguistics and psycholinguistics. Course credit exclusions: None. PRIOR TO FALL 2009: Course credit exclusion: AS/LING 1000 6.00.

AP/LING 2060 6.00 The Grammatical Structure of English. An investigation of the grammatical structure of modern English, including phonology, morphology, syntax and semantics, within the framework of descriptive linguistics. Course credit exclusion: AP/EN 2076 3.00. PRIOR TO FALL 2009: Course credit exclusions: AK/EN 2076 3.00, AS/LING 2060 6.00.

AP/LING 2110 3.00 Phonetics. This course examines various aspects of phonetics, including the articulatory and acoustic properties of speech sounds. There will also be intensive practice in the recognition of speech sounds as well as limited amount of work on sound production. Prerequisite or corequisite: AP/LING 1000 6.00 or permission of the department. Course credit exclusions: None. Prior TO FALL 2009: Prerequisite or corequisite: AS/LING 1000 6.00 or permission of the department. Course credit exclusion: AS/LING 2110 3.00.

AP/LING 2120 3.00 Fundamentals of Phonological Analysis. Practical techniques of phonological analysis exemplified by data taken from a variety of languages. Practice in the use of distinctive features and rule formalisms. Prerequisite: AP/LING 1000 6.00 with a grade of at least C; AP/LING 2110 3.00. Course credit exclusions: None. PRIOR TO FALL 2009: Prerequisite: AS/LING 1000 6.00 with a grade of at least C; AS/LING 2110 3.00. Course credit exclusion: AS/LING 2120 3.00.

AP/LING 2130 3.00 Fundamentals of Morphological Analysis. This course provides an introduction to the nature and organization of morphological patterns in human languages. Students are exposed to a range of cross-linguistic data, with emphasis being placed on how morphological theory accounts for these data. Prerequisite: AP/LING 1000 6.00 with a grade of at least C. Course credit exclusions: None. PRIOR TO FALL 2009: Prerequisite: AS/LING 1000 6.00 with a grade of at least C, AS/LING 2110 3.00. Course credit exclusion: AS/LING 2130 3.00.

AP/LING 2140 3.00 Fundamentals of Grammatical Analysis. Practical techniques of grammatical analysis exemplified by data taken from a variety of languages. Prerequisite: AP/LING 1000 6.00 with a grade of at least C; AP/LING 2130 3.00. Course credit exclusions: None. PRIOR TO FALL 2009: Prerequisite: AS/LING 1000 6.00 with a grade of at least C; AS/LING 2130 3.00. Course credit exclusion: AS/LING 2140 3.00.

AP/LING 2400 3.00 Language in Its Social Context. An introduction to the study of language as a social phenomenon. Topics covered include language varieties; stereotypes and social identity; language, culture and thought; communicative competence; bilingualism and diglossia; languages in contact; language and social deprivation; and language planning and language policy. Course credit exclusions: None. PRIOR TO FALL 2009: Course credit exclusion: AS/LING 2400 3.00.

AP/LING 2410 3.00 Language and Gender. This course explores the relationship between language and sex/gender systems from a feminist perspective. The main areas investigated are language and gender stereotypes; language, power and women's status; and male versus female communicative style in different socio-cultural contexts. Course credit exclusions: None. PRIOR TO FALL 2009: Course credit exclusion: AK/AS/WMST 2501 3.00.

Cross-listed to: AP/LING 2410 3.00, AP/WMST 2501 3.00, GL/SOSC 2900 3.00, GL/WMST 2501 3.00

AP/LING 2430 3.00 Language, Power and Persuasion. This course investigates the language of power and persuasion. The language used by powerful and powerless groups is analyzed to determine how it reinforces

positions of dominance and subordination. The role of language in public persuasion is also considered. Course credit exclusions: None. PRIOR TO FALL 2009: Course credit exclusion: AS/LING 2430 3.00.

AP/LING 2450 3.00 Language and the Law. This course explores ways in which the discipline of linguistics can shed light on the use of language in the legal system. Topics include the special characteristics of written legal language, spoken language in the courtroom and linguists as expert witnesses. Course credit exclusions: None. PRIOR TO FALL 2009: Course credit exclusion: AS/LING 2450 3.00.

AP/LING 2460 3.00 South Asian Language and Society. A survey of the diversity and unity of language in the South Asian cultural area and in South Asian diasporic communities focusing on the role of language in defining identity and in mediating social and cultural change. Course credit exclusions: None. PRIOR TO FALL 2009: Course credit exclusion: AS/LING 2460 3.00.

AP/LING 3040 3.00 Historical Linguistics. An introduction to the study of the development of language systems through time, including the principles of genetic classification of languages, comparative grammar and internal reconstruction. Prerequisite: AP/LING 2120 3.00, or permission of the department. Course credit exclusions: None. PRIOR TO FALL 2009: Prerequisite: AS/LING 2120 3.00, or permission of the department. Course credit exclusion: AS/LING 3040 3.00.

AP/LING 3060 3.00 Linguistic History Of English. A study of the principal changes in the English language from Anglo-Saxon times to the present day. Prerequisites: AP/LING 2120 3.00 and AP/LING 2140 3.00, or permission of the department. Course credit exclusions: None. PRIOR TO FALL 2009: Prerequisites: AS/LING 2120 3.00 and AS/LING 2140 3.00, or permission of the department. Course credit exclusions: AS/LING 3060 3.00, AS/LING 4060 3.00 (prior to Fall/Winter 2001-2002).

AP/LING 3120 3.00 Phonology. Theoretical principles and practical techniques of phonological analysis exemplified by data taken from a variety of languages. Prerequisites: AP/LING 2110 3.00 and AP/LING 2120 3.00 or equivalent. Course credit exclusions: None. PRIOR TO FALL 2009: Prerequisites: AS/LING 2110 3.00 and AS/LING 2120 3.00 or equivalent. Course credit exclusion: AS/LING 3120 3.00.

AP/LING 3140 3.00 Syntax. This course provides a basic introduction to generative syntax, in particular to the recent work of Noam Chomsky and his followers. Although most of the data analyzed will be English, syntactic patterns of some other languages will be discussed. Prerequisite: AP/LING 2140 3.00 or equivalent. Course credit exclusions: None. PRIOR TO FALL 2009: Prerequisite: AS/LING 2140 3.00 or equivalent. Course credit exclusion: AS/LING 3140 3.00.

AP/LING 3150 3.00 Semantics. This course provides an introduction to sentence-level semantics. Some topics in word-level semantics are also considered. Issues are examined primarily from the perspective of a version of truth-conditional semantics. Prerequisite: AP/LING 2140 3.00, or permission of the department. Course credit exclusion: AP/LING 4150 3.00. PRIOR TO FALL 2009: Prerequisite: AS/LING 2140 3.00, or permission of the department. Course credit exclusions: AS/LING 3150 3.00, AS/LING 4150 3.00 and AS/LING 4800C 3.00 (prior to Fall/Winter 2001-2002).

AP/LING 3160 3.00 Discourse Analysis. This course provides an analysis of spoken and written texts in context. Specific topics include spoken versus written discourse; the role of context in the interpretation of utterances; cohesion and coherence; and the relationship between information structuring and grammatical forms. Prerequisite: AP/LING 1000 6.00 or AP/LING 2060 6.00. Course credit exclusions: None. PRIOR TO FALL 2009: Prerequisite: AS/LING 1000 6.00 or AS/LING 2060 6.00. Course credit exclusion: AS/LING 3160 3.00.

AP/LING 3210 3.00 First Language Acquisition. This course surveys first language acquisition from a variety of approaches, including social interactionist, innatist and information processing. Prerequisite: AP/LING 1000 6.00 or AP/LING 3220 3.00. Course credit exclusions: None. PRIOR TO FALL 2009: Prerequisite: AS/LING 1000 6.00 or AS/LING 3220 3.00. Course credit exclusion: AS/LING 3210 3.00.

AP/LING 3220 3.00 Psycholinguistics. A survey of psycholinguistic research and theory. Topics chosen from the following: introduction to language structure, biological basis for language, speech perception, sentence processing, speech production, relation of language and thought, language acquisition and atypical language. Prerequisite: HH/PSYC 1010 6.00 or HH/PSYC 2410 6.00, with a minimum grade of C, or AP/LING 1000 6.00. Course credit exclusions: AK/AS/SC/PSYC 3190 3.00 (Prior to Fall/Winter 2007/2008), HH/PSYC 3190 3.00, AK/PSYC 3250 3.00 (prior Summer 2002).

Cross-listed to: AP/LING 3220 3.00, HH/PSYC 3290 3.00

AP/LING 3240 3.00 Second Language Acquisition. This course deals with the main issues of second language acquisition. Topics treated include similarities and differences between first and second language acquisition, bilingualism, and various theories such as interlanguage, the contrastive analysis hypothesis and the monitor model. Prerequisite: AP/LING 1000 6.00 or AP/LING 3220 3.00 or AP/SC/PSYC 3290 3.00. Course credit exclusions: None. PRIOR TO FALL 2009: Prerequisite: AK/AS/SC/PSYC 3290 3.00 or AS/LING 1000 6.00 or AS/LING 3220 3.00. Course credit exclusion: AS/LING 3240.

AP/LING 3400 3.00 Sociolinguistics: Language Variation and Change. This course provides a survey of issues in the study of language variation and change, using the framework of variationist sociolinguistics. Prerequisites: AP/LING 2120 3.00, AP/LING 2130 3.00, AP/LING 2140 3.00. Recommended prerequisite: AP/LING 2400 3.00. Course credit exclusions: None. PRIOR TO FALL 2009: Prerequisites: AS/LING 2120 3.00, AS/LING 2130 3.00, AS/LING 2140 3.00. Recommended prerequisite: AS/LING 2400 3.00. Course credit exclusion: AS/LING 3400 3.00.

AP/LING 3410 3.00 Writing Systems. Writing Systems. This course deals with the interaction of spoken language and writing structure; functioning and cultural spread of writing systems; historical relationships; and orthographic change, reform and design. Systems studied include Roman, Greek, Cyrillic, Arabic and Hebrew alphabets, and systems of the Indian sub-continent, Korea, China and Japan. Prerequisite: AP/LING 1000 6.00, or AP/LING 2060 6.00 or permission of the department. Course credit exclusions: None. PRIOR TO FALL 2009: Prerequisite: AS/LING 1000 6.00, or AS/LING 2060 6.00 or permission of the department. Course credit exclusion: AP/LING 3410 3.00.

AP/LING 3440 3.00 Bilingualism: A Sociolinguistic Approach. This course takes a sociolinguistic approach to the study of language contact. Topics include societal bilingualism, linguistic minorities, language maintenance and shift and language mixture. Special emphasis is placed on borrowing and codeswitching and the factors influencing their use. Prerequisites: AP/LING 1000 6.00, AP/LING 2120 3.00 and AP/LING 2140 3.00. Course credit exclusions: None. PRIOR TO FALL 2009: Prerequisites: AS/LING 1000 6.00, AS/LING 2120 3.00 and AS/LING 2140 3.00. Course credit exclusions: AS/LING 3440 3.00, AS/LING 3800M 3.00 (prior to Fall/Winter 2002-2003).

AP/LING 3600 3.00 Socio-Political Issues in Second Language Teaching. Teaching English to speakers of other languages (TESOL) takes place within a complex socio-political context. Selected issues are used to consider how this context influences the teaching/learning process. Note: This course does not count for linguistics major credit. Enrolment is restricted to those students in the TESOL program. Course credit exclusions: None. PRIOR TO FALL 2009: Course credit exclusion: AS/LING 3600 3.00.

AP/LING 3800 3.00 Language and Mind. This course explores how the structures of human language reflect the architecture of the human mind. The techniques and results from a number of disciplines and perspectives (e.g. artificial intelligence, linguistics, neuroscience, philosophy, psychology) are considered. Prerequisite: AP/LING 1000 6.00 or AP/PSYC 1010 6.00 or permission of the department. Course credit exclusions: None. PRIOR TO FALL 2009: Prerequisite: AS/LING 1000 6.00 or AS/PSYC 1010 6.00 or permission of the department. Course credit exclusion: AS/LING 3800 3.00.

AP/LING 3900 3.00 Independent Reading and Research. A student may take an independent, individually supervised reading/research course, provided that the student and the course meet the requirements as set out by the Faculty of Liberal Arts and Professional Studies and those established by the department. Note: Independent reading/research courses require a signed agreement between the student and faculty member, as well as the approval of the section coordinator and undergraduate director. Note: Please consult the Faculty of Liberal Arts and Professional Studies Academic Advising and Student Responsibility section of the calendar for detailed regulations regarding independent reading courses. Course credit exclusions: None. PRIOR TO FALL 2009: Course credit exclusion: AS/LING 3900 3.00.

AP/LING 3900 6.00 Independent Reading and Research. A student may take an independent, individually supervised reading/research course, provided that the student and the course meet the requirements as set out by the Faculty of Liberal Arts and Professional Studies and those established by the department. Note: Independent reading/research courses require a signed agreement between the student and faculty member, as well as the approval of the section coordinator and undergraduate director. Note: Please consult the Faculty of Liberal Arts and Professional Studies Academic Advising and Student Responsibility section of the calendar for detailed regulations regarding independent reading courses. Course credit exclusions: None. PRIOR TO FALL 2009: Course credit exclusion: AS/LING 3900 6.00.

AP/LING 4060 3.00 Canadian English. This course provides an overview of the history, linguistic structure and sociolinguistics of English as spoken in Canada. Prerequisites: AP/LING 2120 3.00, AP/LING 2130 3.00, and AP/LING 2140 3.00, all with grades of C+ or higher. Course credit exclusions: None. PRIOR TO FALL 2009: Prerequisites: AS/LING 2120 3.00, AS/LING 2130 3.00, and AS/LING 2140 3.00, all with grades of C+ or higher. Course credit exclusion: AS/LING 4060 3.00.

AP/LING 4120 3.00 Phonological Theories. This course concentrates on recent developments in phonological theory within a generative framework. Specific topics include the representation of segments, autosegmental phonology, syllable structure, metrical phonology and lexical phonology. Prerequisite: AP/LING 3120 3.00 with a grade of C+ or better, or permission of the department. Course credit exclusions: None. PRIOR TO FALL 2009: Prerequisite: AS/LING 3120 3.00 with a grade of C+ or better, or permission of the department. Course credit exclusion: AS/LING 4120 3.00.

AP/LING 4140 3.00 Grammatical Theories. This course will examine the metatheoretical issues and assumptions underlying the development of different linguistic theories. The foundations and formal framework of Government-Binding theory, the most recent version of Chomsky's Extended Standard theory, will be introduced and later compared with a competing linguistic theory. Prerequisite: AP/LING 3140 3.00 with a grade of C+ or better, or permission of the department. Course credit exclusions: None. PRIOR TO FALL 2009: Prerequisite: AS/LING 3140 3.00 with a grade of C+ or better, or permission of the department. Course credit exclusion: AS/LING 4140 3.00.

AP/LING 4150 3.00 Topics in the Syntax-Semantics Interface. This course examines the interface of the syntactic and semantic modules. The first part introduces students to the fundamentals of formal semantic theory. The second part covers quantificational structures, event semantics and discourse related properties of sentence structure (topic-comment/focus-presuppositions structures). Prerequisite: AP/LING 3140 3.00 with a grade of at least C+. Course credit exclusion: AP/LING 3150 3.00. PRIOR TO FALL 2009: Prerequisite: AS/LING 3140 3.00 with a grade of at least C+. Course credit exclusions: AS/LING 3150 3.00, AS/LING 4150 3.00, AS/LING 4800C 3.00 (prior to Fall/Winter 2001-2002).

AP/LING 4220 3.00 Acoustic Phonetics. An investigation of acoustic-phonetic aspects of speech and their relation to speech perception and recognition. Practical experience in techniques of acoustic-phonetic research. Prerequisite: AP/LING 2110 3.00 and AP/LING 2120 3.00 with grades of C+ or better, and at least six credits in linguistics (LING) at the 3000-level with grades of C+ or better, or permission of the department. AP/LING 3120 3.00 is recommended. Course credit exclusions: None. PRIOR TO FALL 2009: Prerequisite: AS/LING 2110 3.00 and AS/LING

2120 3.00 with grades of C+ or better, and at least six credits in linguistics (LING) at the 3000-level with grades of C+ or better, or permission of the department. AS/LING 3120 3.00 is recommended. Course credit exclusion: AS/LING 4220 3.00.

AP/LING 4230 3.00 Language Disorders. This course surveys a variety of language disorders, among them aphasia, delayed language development, dyslexia and language dissolution in old age. Specific disorders are discussed within a psycholinguistic framework. There is some discussion of basic strategies for therapy. Prerequisites: AP/LING 2120 3.00, AP/LING 2140 3.00, and AP/LING 3220 3.00 or AP/SC/PSYC 3290 3.00 with grades of C+ or better; and at least three additional credits in linguistics (AP/LING) at the 3000 level with grades of C+ or better. Course credit exclusions: None. PRIOR TO FALL 2009: Prerequisites: AS/LING 2120 3.00, AS/LING 2140 3.00, and AS/LING 3220 3.00 or AK/AS/SC/PSYC 3290 3.00 with grades of C+ or better; and at least three additional credits in linguistics (AS/LING) at the 3000 level with grades of C+ or better. Course credit exclusion: AS/LING 4230 3.00.

AP/LING 4240 3.00 Theoretical Issues in Second Language Acquisition. An examination of the relationship between linguistic theory and second language acquisition including the nature of second language learners' linguistic representations from both linguistic and neurolinguistic perspectives, the role of universal grammar, and elicitation and interpretation of second language data. Prerequisite: Completion of AP/LING 3120 3.00, AP/LING 3140 3.00 with grades of B, and AP/LING 3240 3.00 with a grade of B+, or permission of the department. Course credit exclusions: None. PRIOR TO FALL 2009: Prerequisite: Completion of AS/LING 3120 3.00, AS/LING 3140 3.00 with grades of B, and AS/LING 3240 3.00 (formerly 3230 3.00) with a grade of B+, or permission of the department. Course credit exclusion: AS/LING 4240 3.00.

AP/LING 4250 3.00 The Evolution of Language. Drawing on comparisons of various non-human communication systems with human language, this course examines the evolution of human language. Different theoretical approaches to the structure of human language and the interrelation of various components of the linguistic system are considered. Prerequisites: AP/LING 2120 3.00, AP/LING 2130 3.00, AP/LING 2140 3.00 and two 3000-level Linguistics courses, all with grades of at least C+, or permission of the department. AP/LING 3220 3.00 is a recommended prerequisite. Course credit exclusions: None. PRIOR TO FALL 2009: Prerequisites: AS/LING 2120 3.00, AS/LING 2130 3.00, AS/LING 2140 3.00 and two 3000-level Linguistics courses, all with grades of at least C+, or permission of the department. AS/LING 3220 3.00 is a recommended prerequisite. Course credit exclusion: AS/LING 4250 3.00.

AP/LING 4320 6.00 Field Methods. This course provides students with the skills and techniques necessary to conduct independent linguistic field work. Prerequisites: AP/LING 2110 3.00, AP/LING 2120 3.00, AP/LING 2130 3.00 and AP/LING 2140 3.00 with grades of C+ or higher, and at least six credits in linguistics (LING) at the 3000-level with grades of C+ or higher, or permission of the department. AP/LING 3120 3.00 and AP/LING 3140 3.00 are recommended. Course credit exclusions: None. PRIOR TO FALL 2009: Prerequisites: AS/LING 2110 3.00, AS/LING 2120 3.00, AS/LING 2130 3.00 and AS/LING 2140 3.00 with grades of C+ or higher, and at least six credits in linguistics (LING) at the 3000-level with grades of C+ or higher, or permission of the department. AS/LING 3120 3.00 and AS/LING 3140 3.00 are recommended. Course credit exclusion: AS/LING 4320 6.00.

AP/LING 4350 3.00 Pidgin and Creole Linguistics. Pidgins and Creoles are languages that develop from contact between groups of people who have no common means of communication. This course examines the historical and social circumstances in which these languages, their linguistic characteristics and their relevance to linguistic theory. Integrated with: GS/LING 5350 3.00. Prerequisites: AP/LING 2120 3.00, AP/LING 2130 3.00, AP/LING 2140 3.00 and two 3000-level Linguistics courses, all with grades of at least C+, or permission of the department. Course credit exclusions: None. PRIOR TO FALL 2009: Prerequisites: AS/LING 2120 3.00, AS/LING 2130 3.00, AS/LING 2140 3.00 and two 3000-level Linguistics courses, all with grades of at least C+, or permission of the department. Course credit exclusions: AS/LING 4350 3.00, AS/LING 4800M 3.00 (prior to Fall/Winter 2003-2004).

AP/LING 4400 3.00 Research in Sociolinguistic Variation and Change. This course is a practical introduction to sociolinguistic research, including methods of data collection and quantitative analysis. Students gain experience in all stages of sociolinguistic research and write an original research paper. Prerequisites: AP/LING 2120 3.00, AP/LING 2130 3.00, AP/LING 2140 3.00 and AP/LING 3400 3.00, all with grades of at least C+, or permission of the Department. Course credit exclusions: None. PRIOR TO FALL 2009: Prerequisites: AS/LING 2120 3.00, AS/LING 2130 3.00, AS/LING 2140 3.00 and AS/LING 3400 3.00, all with grades of at least C+, or permission of the Department. Course credit exclusion: AS/LING 4400 3.00.

AP/LING 4440 3.00 Topics in Grammatical Change. This course deals with morphosyntactic change from a broadly generative perspective. It focuses on large-scale changes, changes resulting in dialectal variation, and changes in progress. Both language-internal and language-external mechanisms by which change takes place are considered. Prerequisites: AP/LING 2140 3.00 and at least six credits in linguistics (LING) at the 3000-level including AP/LING 3140 3.00, all with grades of C+ or better, or permission of the department. AP/LING 2400 3.00 and AP/LING 3040 3.00 are recommended. Course credit exclusions: None. PRIOR TO FALL 2009: Prerequisites: AS/LING 2140 3.00 and at least six credits in linguistics (LING) at the 3000-level including AS/LING 3140 3.00, all with grades of C+ or better, or permission of the department. AS/LING 2400 3.00 and AS/LING 3040 3.00 are recommended. Course credit exclusions: AS/LING 4440 3.00, AS/LING 4800B 3.00 (prior to Fall/Winter 2000-2001).

AP/LING 4900 3.00 Independent Reading and Research. A student may take an independent, individually supervised reading/research course, provided that the student and the course meet the requirements as set out by the Faculty of Liberal Arts and Professional Studies and those established by the department. Note: Independent reading/research courses require a signed agreement between the student and faculty member, as well as the approval of the section coordinator and undergraduate director. Note: Please consult the Faculty of Liberal Arts and Professional Studies Academic Advising and Student Responsibility section of the calendar for detailed regulations regarding independent reading courses. Course credit exclusions: None. PRIOR TO FALL 2009: Course credit exclusion: AS/LING 4900 3.00.

Courses in Linguistics and Language Studies/Cours en linguistique et sciences du langage

GL/LIN 1200 3.00 Introduction to Descriptive Grammar. This course introduces students to neo-traditional or descriptive grammar. Students are introduced to form classes (noun, verb, adjective and adverb),

structure classes (pronouns, determiners, auxiliaries, propositions and conjunctions), phrases, clauses and sentence types. Grammatical function is also examined.

GL/LIN 1200 3.00 Introduction à la grammaire descriptive. Ce cours servira d'introduction à la grammaire descriptive (ou néo-traditionnelle). Les étudiants se familiariseront avec les catégories grammaticales (noms, verbes, adjectifs, etc.) syntagmes, propositions et types de phrases. On examinera également la fonction grammaticale.

Language of Instruction: French

GL/LIN 1716 6.00 Logique formelle et informelle. Le cours a pour but de faire connaître à l'étudiant les moyens de distinguer les bons raisonnements des mauvais. Un texte élémentaire de logique sera utilisé comme livre de référence. Le cours poursuivra aussi une étude détaillée de textes choisis. Note: Only one in the MODR 17xx 6.00 series may be taken for credit.

GL/LIN 4656 3.00 Processus d'acquisition des langues secondes : perspectives psycholinguistiques. Après avoir comparé l'acquisition de L1 et L2, nous discuterons des facteurs individuels (personnalité, attitude, motivation, aptitude...) qui influencent l'acquisition des L2. Nous examinerons si l'hypothèse d'une période critique (Lenneberg) dans l'acquisition de L1 peut s'appliquer à l'acquisition de L2; nous aborderons la question de l'influence de l'âge sur l'acquisition de L2 et comparerons la qualité de l'apprentissage des L2 par les enfants et par les adultes. Nous analyserons ensuite les différentes théories (Chomsky, Piaget...) qui ont aidé à passer du béhaviorisme au cognitivisme qui étudie la multiplicité des processus d'acquisition ainsi que les styles et les stratégies d'apprentissage. Nous verrons enfin comment les théories psycholinguistiques actuelles jettent une lumière nouvelle sur l'analyse des erreurs, leur traitement et la notion d'interlangue. Le cours se propose de donner aux étudiants la formation nécessaire pour comprendre et analyser de façon critique les études basées sur quelques-unes des théories phonologiques actuelles. Les étudiants seront aussi capables d'aborder des aspects du français et d'autres langues dans certaines approches phonologiques contemporaines. Condition préalable : Cours d'introduction à la linguistique. Cours incompatible : GL/FRAN 4340 3.00.

Language of Instruction: French

Cross-listed to: GL/FRAN 4660 3.00, GL/LIN 4660 3.00

GL/LIN 4661 3.00 Variation stylistique et apprentissage du FLS. On analyse dans ce cours les différences de compétence stylistique entre apprenants du français langue seconde et francophones et on relie ces différences aux pratiques d'enseignement de la langue seconde et aux

comportements acquisitionnels des apprenants. Condition préalable : Cours d'introduction à la linguistique. Cours incompatible : GL/Fran 4345 3.00.

GL/LIN 4663 3.00 L'apprentissage du français L2 : affectivité et cognition. Ce cours examinera les apports des théories de l'affectivité, des théories socio-psychologiques et des théories cognitivistes qui sont le mieux à même d'expliquer les principaux facteurs facilitant ou inhibant le processus d'apprentissage du français L2 (FL2). Nous étudierons le cas des apprenants en difficulté d'apprentissage (autistes, dyslexiques, etc.) afin d'examiner les avantages et les défis à leur faire apprendre le FL2. Nous verrons aussi dans quelle mesure un tel apprentissage peut avoir des retombées positives sur leur développement non seulement linguistique mais aussi social, cognitif, psychologique et culturel.

GL/LIN 4695 3.00 English as a World Language. The course examines a number of varieties of English in the world today from three major standpoints: their historical development, their social and geographical deployment and their linguistic characteristics. Prerequisite: At least 12 credits in linguistics offered in English or another language, six credits of which must be from an introductory course in linguistics. Permission of the instructor required.

GL/LIN 4696 6.00 Teaching English as an International Language. This course surveys current principles and practices of teaching English in settings outside Canada. Besides the methodological instruction at Glendon, an integral component of the course is a teaching practicum, normally fulfilled in an international setting, held for 2-3 weeks following the Spring exam period. Prerequisite: GL/EN 2608 6.00. Co-requisite: GL/EN 3603 3.00 and 3 credits from GL/EN 3632 3.00, GL/EN 3650 6.00 and GL/EN 3655 6.00. Course credit exclusion: GL/EN 4012 3.00 (Fall 1993), GL/EN 4596 6.00 (EN).

The Department of Mathematics and Statistics offers a wide range of courses in both pure and applied mathematics and statistics. These meet the needs of students who wish to major in mathematics or statistics as well as those who require some knowledge of mathematics or statistics in other disciplines. In addition, there are courses for those who have a general interest in these subjects.

Actuarial Profession. Students interested in the actuarial profession should consult the Department of Mathematics and Statistics for guidance. The department will be glad to suggest a program of courses which will be helpful in preparing for examinations of the Society of Actuaries.

Operations Research. The Canadian Operational Research Society (CORS) has recognized that graduation from a program in Applied Mathematics, Mathematics or Statistics with a prescribed set of courses will qualify a student for the Diploma in Operations Research awarded by CORS. Interested students should consult the Department of Mathematics and Statistics for guidance.

For specific requirements of programs offered by this department, see the Faculty of Science and Engineering Programs of Study section for BA and Honours BA, as well as BSc and Honours BSc programs.

Courses in Mathematics and Statistics

When selecting courses, please note the following:

1. All Honours students whose major is in mathematics and statistics (with the exception of the BSc international dual degree program in Mathematics and Statistics) must complete the mathematics/statistics core (see the Faculty of Science and Engineering Programs of Study section of the Undergraduate Calendar). This enables students to defer their final decision regarding choice of major within mathematics and statistics to their fourth term of study.
2. Students taking lower-level mathematics courses may wish to make use of the tutorial services provided in many of these courses by the department's mathematics and statistics laboratory.
3. Students who feel that their mathematical background is weak (perhaps despite having passed one or more 12U mathematics course) should consider taking SC/MATH 1510 6.00. This course can serve as preparation for SC/MATH 1520 3.00, which in turn prepares the student for further calculus courses (see below).
4. **Calculus courses for first-year students.** Students must carefully note the requirements of their programs of study before choosing a first-year calculus course. In some cases, where no calculus is required beyond first year, a program might accept six credits of a "second digit 5" University calculus course like SC/MATH 1530 3.00 plus SC/MATH 1540 3.00, or SC/MATH 1550 6.00, or SC/MATH 1505 6.00. (Note that SC/MATH 1520 3.00 is a prerequisite for all of these except SC/MATH 1505 6.00.)

A student with at least one 12U (or equivalent) course in mathematics, but without a high school calculus course, must begin the study of calculus with SC/MATH 1520 3.00. (As noted above, the sole exception to this statement is the student for whom SC/MATH 1505 6.00 is a "terminal" calculus course.) SC/MATH 1520 3.00 is literally intended to be the York equivalent of a high school calculus course.

Students whose programs require the calculus courses a) SC/MATH 1300 3.00 or b) SC/MATH 1013 3.00 must first have either a high school calculus course or SC/MATH 1520 3.00, as noted above. These students will normally continue in their study of calculus with a) SC/MATH 1310 3.00 or b) SC/MATH 1014 3.00 respectively.

5. **Course numbering.** Courses with second digit 5 cannot be used to satisfy departmental degree requirements except (i) by students in the bachelor program in Mathematics for Commerce; and (ii) by students in other programs in a few cases as noted in program descriptions.

With the exception of SC/MATH 1530 3.00, mathematics courses with third digit 3 involve statistics.

Unless otherwise specified, six-credit courses have three lecture hours per week for two terms, while three-credit courses have three lecture hours per week for one term. In addition, problem sessions or tutorials are scheduled for many courses.

Mathematics and statistics are offered by the Faculty of Science and Engineering. Mathematics is offered by Glendon College.

Courses in Mathematics and Statistics/Cours en mathématiques

SC/MATH 1000 3.00 Differential Calculus (Honours Version). Axioms for real numbers, limits, continuity and differentiability. This course covers slightly fewer topics than SC/MATH 1300 3.00, but covers them in greater depth. It should be taken by all those planning an Honours degree in mathematics or a Specialized Honours degree in statistics. Prerequisite: SC/MATH 1515 3.00, 12U Advanced Functions and Introductory Calculus, OAC calculus or equivalent. Course credit exclusions: SC/MATH 1013 3.00, SC/MATH 1300 3.00, SC/MATH 1505 6.00, SC/MATH 1530 3.00, SC/MATH 1550 6.00, GL/MATH/MODR 1930 3.00, AP/ECON 1530 3.00. Prior to Fall 2009: Prerequisite: AS/SC/MATH 1515 3.00, 12U Advanced Functions and Introductory Calculus, OAC calculus or equivalent. Course credit exclusions: AS/SC/MATH 1013 3.00, AK/AS/SC/MATH 1300 3.00, AS/SC/MATH 1505 6.00, AS/MATH 1530 3.00, AK/AS/MATH 1550 6.00, GL/MATH/MODR 1930 3.00, AS/ECON 1530 3.00.

SC/MATH 1010 3.00 Integral Calculus (Honours Version). Riemann integral, fundamental theorems of calculus, transcendental functions, integration techniques, sequences, series. This course covers fewer topics than SC/MATH 1310 3.00, but covers them in greater depth. It should be taken by all those planning an Honours degree in mathematics or a Specialized Honours degree in statistics. Prerequisite: SC/MATH 1000 3.00 or permission of the department. Course credit exclusions: SC/MATH 1014 3.00, SC/MATH 1310 3.00, SC/MATH 1505 6.00, GL/MATH/MODR 1940 3.00, SC/MATH 3110 3.00. Prior to Fall 2009: Prerequisite: AS/SC/MATH 1000 3.00 or permission of the department. Course credit exclusions: AS/SC/MATH 1014 3.00, AK/AS/SC/MATH 1310 3.00, AS/SC/MATH 1505 6.00, GL/MATH/MODR 1940 3.00, AK/AS/SC/MATH 3110 3.00.

SC/MATH 1013 3.00 Applied Calculus I. Introduction to the theory and applications of both differential and integral calculus. Limits. Derivatives of algebraic and trigonometric functions. Riemann sums, definite integrals and the Fundamental Theorem of Calculus. Logarithms and exponentials, Extreme value problems, Related rates, Areas and Volumes. Prerequisite: SC/MATH 1515 3.00 or SC/MATH 1520 3.00, or a high school calculus course. Course credit exclusions: SC/MATH 1000 3.00, SC/MATH 1300 3.00, SC/MATH 1505 6.00, SC/MATH 1513 6.00, SC/MATH 1530 3.00, SC/MATH 1550 6.00, GL/MATH/MODR 1930 3.00, AP/ECON 1530 3.00. Prior to Fall 2009: Prerequisite: AS/SC/MATH 1515 3.00 or AS/SC/MATH 1520 3.00, or a high school calculus course. Course credit exclusions: AS/

SC/MATH 1000 3.00, AK/AS/SC/MATH 1300 3.00, AS/SC/MATH 1505 6.00, AS/SC/MATH 1513 6.00, AS/MATH 1530 3.00, AK/AS/MATH 1550 6.00, GL/MATH/MODR 1930 3.00, AS/ECON 1530 3.00.

SC/MATH 1014 3.00 Applied Calculus II. Calculus in Polar Coordinates. Techniques of Integration. Indeterminate Forms. Improper Integrals. Sequences, infinite series and power series. Approximations. Introduction to ordinary differential equations. Prerequisite(s): One of SC/MATH 1000 3.00, SC/MATH 1013 3.00, SC/MATH 1300 3.00, or SC/MATH 1513 6.00; for non-science students only, six credits from SC/MATH 1530 3.00 and SC/MATH 1540 3.00, SC/MATH 1550 6.00, AP/ECON 1530 3.00 and AP/ECON 1540 3.00. Course credit exclusions: SC/MATH 1010 3.00, SC/MATH 1310 3.00, SC/MATH 1505 6.00, GL/MATH/MODR 1940 3.00. Prior to Fall 2009: Prerequisite(s): One of AS/SC/MATH 1000 3.00, AS/SC/MATH 1013 3.00, AK/AS/SC/MATH 1300 3.00, or AS/SC/MATH 1513 6.00; for non-science students only, six credits from AS/MATH 1530 3.00 and AS/MATH 1540 3.00, AK/AS/MATH 1550 6.00, AS/ECON 1530 3.00 and AS/ECON 1540 3.00. Course credit exclusions: AS/SC/MATH 1010 3.00, AK/AS/SC/MATH 1310 3.00, AS/SC/MATH 1505 6.00, GL/MATH/MODR 1940 3.00.

SC/MATH 1016 1.00 Applied Mathematics Module I. Designed for students in applied mathematics to complement and enrich the material in SC/MATH 1013 3.00. The module treats the theory in greater depth, and explores extended applications and modelling. One lecture hour per week. One term. One credit. Prerequisite: 12U Advanced Functions and Introductory Calculus, OAC calculus or SC/MATH 1515 3.00. Prerequisite or corequisite: SC/MATH 1013 3.00. Note: SC/MATH 1016 1.00 must be taken within the first 60 credits of a student's program. Prior to Fall 2009: Prerequisite: 12U Advanced Functions and Introductory Calculus, OAC calculus or AS/SC/MATH 1515 3.00. Prerequisite or corequisite: AS/SC/MATH 1013 3.00. Note: AS/SC/MATH 1016 1.00 must be taken within the first 60 credits of a student's program.

SC/MATH 1017 1.00 Applied Mathematics Module II. Designed for students in applied mathematics to complement and enrich the material in SC/MATH 1014 3.00. The module treats the theory in greater depth, and explores extended applications and modelling. One lecture hour per week. One term. One credit. Prerequisites: SC/MATH 1013 3.00; SC/MATH 1016 1.00. Prerequisite or corequisite: SC/MATH 1014 3.00. Note: SC/MATH 1017 1.00 must be taken within the first 60 credits of a student's program. Prior to Fall 2009: Prerequisites: AS/SC/MATH 1013 3.00; AS/SC/MATH 1016 1.00. Prerequisite or corequisite: AS/SC/MATH 1014 3.00. Note: AS/SC/MATH 1017 1.00 must be taken within the first 60 credits of a student's program.

SC/MATH 1019 3.00 Discrete Mathematics for Computer Science. Introduction to abstraction. Use and development of precise formulations of mathematical ideas. Informal introduction to logic; introduction to naïve set theory; induction; relations and functions; big O-notation; recursive definitions, recurrence relations and their solutions; graphs and trees. Three lecture hours per week. Plus drop-in optional problem sessions as well as instructor office hours, as these are announced in each term. Prerequisites: SC/MATH 1190 3.00, or both of 12U Advanced Functions and Introductory Calculus and 12U Geometry and Discrete Mathematics. Course credit exclusion: SC/MATH 2320 3.00. Prior to Fall 2009: Prerequisites: AK/AS/SC/MATH 1190 3.00, or both of 12U Advanced Functions and Introductory Calculus and 12U Geometry and Discrete Mathematics. Course credit exclusion: AK/AS/SC/MATH 2320 3.00.

Cross-listed to: SC/CSE 1019 3.00, SC/MATH 1019 3.00

SC/MATH 1021 3.00 Linear Algebra I. Linear equations, matrices, Gaussian elimination, determinants and vector spaces. This course covers material similar to that in SC/MATH 2221 3.00 but at a more advanced level. Required in Specialized Honours statistics and in all applied mathematics, mathematics and mathematics for commerce programs except the BA Program in Mathematics for Commerce. Prerequisite: One 12U or OAC mathematics course or equivalent. Course credit exclusions: SC/MATH 1025 3.00, SC/MATH 2021 3.00, SC/MATH 2221 3.00, GL/MATH/MODR 2650 3.00. Prior to Fall 2009: Course credit exclusions: AS/SC/MATH 1025 3.00, AS/SC/MATH 2021 3.00, AK/AS/SC/MATH 2221 3.00, GL/MATH/MODR 2650 3.00.

SC/MATH 1025 3.00 Applied Linear Algebra. Topics include spherical and cylindrical coordinates in Euclidean 3-space, general matrix algebra, determinants, vector space concepts for Euclidean n-space (e.g. linear dependence and independence, basis, dimension, linear transformations etc.), an introduction to eigenvalues and eigenvectors. Prerequisites: One 12U or OAC mathematics course or equivalent. Course credit exclusions: SC/MATH 1021 3.00, SC/MATH 2021 3.00, SC/MATH 2221 3.00, GL/MATH/MODR 2650 3.00. Prior to Fall 2009: Course credit exclusions: AK/AS/SC/MATH 1021 3.00, AS/SC/MATH 2021 3.00, AK/AS/SC/MATH 2221 3.00, GL/MATH/MODR 2650 3.00.

SC/MATH 1090 3.00 Introduction to Logic for Computer Science. The syntax and semantics of propositional and predicate logic. Applications to program specification and verification. Optional topics include set theory and induction using the formal logical language of the first part of the course. Prerequisite: SC/MATH 1190 3.00 or SC/MATH 1019 3.00. Note: This course may not be taken for degree credit by any student who has passed SC/MATH 4290 3.00. Prior to Fall 2009: Prerequisite: AK/AS/SC/MATH 1190 3.00 or AK/AS/SC/MATH 1019 3.00. Note: This course may not be taken for degree credit by any student who has passed AK/AS/SC/MATH 4290 3.00.

SC/MATH 1131 3.00 Introduction to Statistics I. Displaying and describing distributions; relations in categorical data; Simpson's paradox and the need for design; experimental design and sampling design; randomization; probability laws and models; central limit theorem; statistical inference including confidence intervals and tests of significance; matched pairs; simulation. Prerequisite: At least one 12U mathematics course or OAC in mathematics is recommended. Course credit exclusion: SC/MATH 2560 3.00. Prior to Fall 2009: Course credit exclusion: AK/AS/SC/MATH 2560 3.00.

SC/MATH 1190 3.00 Introduction to Sets and Logic. Topics include logic, sets, functions, relations, modular arithmetic and applications of elementary number theory, proof techniques, induction. Prerequisite: One 12U or OAC mathematics course or equivalent, or SC/MATH 1710 6.00. NCR Note: This course may not be taken for degree credit by any student who has passed any 3000- or higher-level mathematics course. Course credit exclusion: GL/CSLA/MATH/MODR 1650 3.00.

SC/MATH 1200 3.00 Problems, Conjectures and Proofs. Extended exploration of elementary problems leading to conjectures, partial solutions, revisions, and convincing reasoning, and hence to proofs. Emphasis on problem solving, reasoning, and proving. Regular participation is required. Prerequisite: 12U Advanced Functions (MHF4U) or Advanced Functions and Introductory Calculus (MCB4U). NCR note: Not open to any student who is taking or has passed a MATH course at the 3000 level or higher.

SC/MATH 1300 3.00 Differential Calculus with Applications. Limits, derivatives with applications, antiderivatives, fundamental theorem of calculus, beginnings of integral calculus. Prerequisite: SC/MATH 1515 3.00 SC/MATH 1520 3.00 or SC/MATH 1710 6.00 or a high school calculus course. Course credit exclusions: SC/MATH 1000 3.00, SC/MATH 1013 3.00, SC/MATH 1505 6.00, SC/MATH 1513 6.00, SC/MATH 1530 3.00, SC/MATH 1550 6.00, GL/MATH/MODR 1930 3.00, AP/ECON 1530 3.00. Prior to Fall 2009: Prerequisite: AS/SC/MATH 1515 3.00 AS/SC/MATH 1520 3.00 or AK/MATH 1710 6.00 or a high school calculus course. Course credit exclusions: AS/SC/MATH 1000 3.00, AS/SC/MATH 1013 3.00, AS/SC/MATH 1505 6.00, AS/SC/MATH 1513 6.00, AS/MATH 1530 3.00, AK/AS/MATH 1550 6.00, GL/MATH/MODR 1930 3.00, AS/ECON 1530 3.00.

SC/MATH 1310 3.00 Integral Calculus with Applications. Transcendental functions, differential equations, techniques of integration, improper integrals, infinite series. Prerequisite(s): One of SC/MATH 1000 3.00, SC/MATH 1013 3.00, SC/MATH 1300 3.00, or SC/MATH 1513 6.00; or, for non-science students only, six credits from SC/MATH 1530 3.00 and SC/MATH 1540 3.00, SC/MATH 1550 6.00, AP/ECON 1530 3.00 and AP/ECON 1540 3.00. Course credit exclusions: SC/MATH 1010 3.00, SC/MATH 1014 3.00, SC/MATH 1505 6.00, GL/MATH/MODR 1940 3.00. Prior to Fall 2009: Prerequisite: AS/SC/MATH 1515 3.00 AS/SC/MATH 1520 3.00 or AK/MATH 1710 6.00 or a high school calculus course. Course credit exclusions: AS/SC/MATH 1000 3.00, AS/SC/MATH 1013

3.00, AS/SC/MATH 1505 6.00, AS/SC/MATH 1513 6.00, AS/MATH 1530 3.00, AK/AS/MATH 1550 6.00, GL/MATH/MODR 1930 3.00, AS/ECON 1530 3.00.

SC/MATH 1505 6.00 Mathematics for the Life and Social Sciences. A presentation of the elements of single-variable differential and integral calculus, elementary linear algebra and introductory probability and statistics. This course is designed to provide a comprehensive mathematical background for students of the biological and social sciences. Emphasis is placed on basic mathematical skills and their applications. Prerequisite: At least one 12U or OAC mathematics course or SC/MATH 1510 6.00. Course credit exclusions: SC/MATH 1000 3.00, SC/MATH 1010 3.00, SC/MATH 1013 3.00, SC/MATH 1014 3.00, SC/MATH 1300 3.00, SC/MATH 1310 3.00, SC/MATH 1513 6.00, SC/MATH 1530 3.00, SC/MATH 1540 3.00, SC/MATH 1550 6.00, GL/MATH/MODR 1930 3.00, GL/MATH/MODR 1940 3.00, AP/ECON 1530 3.00, AP/ECON 1540 3.00. Prior to Fall 2009: Prerequisite: At least one 12U or OAC mathematics course or AS/SC/MATH 1510 6.00. Course credit exclusions: AS/SC/MATH 1000 3.00, AS/SC/MATH 1010 3.00, AS/SC/MATH 1013 3.00, AS/SC/MATH 1014 3.00, AK/AS/SC/MATH 1300 3.00, AK/AS/SC/MATH 1310 3.00, AS/SC/MATH 1513 6.00, AS/MATH 1530 3.00, AS/MATH 1540 3.00, AK/AS/MATH 1550 6.00, GL/MATH/MODR 1930 3.00, GL/MATH/MODR 1940 3.00, AS/ECON 1530 3.00, AS/ECON 1540 3.00.

SC/MATH 1510 6.00 Fundamentals of Mathematics. Designed for the student whose mathematical background is weak and who wishes to take further courses in mathematics. Topics include algebraic equations and inequalities; simple sequences and series; analytic geometry; trigonometry; functions, including algebraic, exponential, logarithmic and trigonometric functions. Prerequisites: Ontario Grade 11 Functions or Functions & Relations (new curriculum) or Grade 12 Advanced Mathematics (old curriculum). NCR Note: May not be taken by any student who has taken or is currently taking another university course in mathematics or statistics except for SC/MATH 1500 3.00 or SC/MATH 1515 3.00 or SC/MATH 1520 3.00. Course credit exclusions: SC/MATH 1710 6.00, GL/ITEC/MATH/MODR 1670 6.00. Prior to Fall 2009: NCR Note: May not be taken by any student who has taken or is currently taking another university course in mathematics or statistics except for AS/SC/MATH 1500 3.00 or AS/SC/MATH 1515 3.00 or AS/SC/MATH 1520 3.00. Course credit exclusions: AK/MATH 1710 6.00, GL/ITEC/MATH/MODR 1670 6.00.

SC/MATH 1513 6.00 Differential Calculus (1520 plus 1300). This course is a 6-credit combination of MATH 1520 and MATH 1300. Fall term. Elements of vectors in 2- and 3- space; differential calculus, limits, derivatives and Mean Value Theorem with applications, the definite integral, Fundamental Theorems of Calculus. Prerequisite: One of: SC/MATH 1510 6.00, an OAC mathematics course, 12U Advanced Functions (MHF4U), or equivalent; or permission of the department. Course Credit Exclusions: SC/MATH 1515 3.00, SC/MATH 1520 3.00, SC/MATH 1300 3.00, SC/MATH 1000 3.00, SC/MATH 1013 3.00, SC/MATH 1505 6.00, AP/MATH/ECON 1530 3.00, SC/MATH 1550 6.00, GL/MATH/MODR 1930 3.00. Prior to Fall 2009: Prerequisite: One of: AS/SC/MATH 1510 6.00, an OAC mathematics course, 12U Advanced Functions (MHF4U), or equivalent; or permission of the department. Course Credit Exclusions: AS/SC/MATH 1515 3.00, AS/SC/MATH 1520 3.00, AS/SC/MATH 1300 3.00, AS/SC/MATH 1000 3.00, AS/SC/MATH 1013 3.00, AS/SC/MATH 1505 6.00, AS/MATH/ECON 1530 3.00, AS/MATH 1550 6.00, GL/MATH/MODR 1930 3.00. NCR Note: May not be taken by any student who has passed or is currently taking another university course in calculus. Note: This course is intended for students with good mathematical skills, who have never taken a calculus course in high school or at university. The successful completion of this course will allow for entry into AS/AS/SC/MATH 1310 3.00.

SC/MATH 1520 3.00 Introduction to Calculus, with Vectors. Elements of vectors in 2- and 3-space including dot products, cross products, lines, and planes; elements of differential calculus including limits and derivatives. Designed for student who have not taken (or who have performed inadequately in) Ontario high school calculus. Prerequisite: One of: MATH 1510 6.00, an OAC mathematics course, 12U Advanced Functions (MHF4U), or equivalent; or permission of the department. This course may be taken at the same time as the second half

of MATH 1510 6.00. Course credit exclusions: SC/MATH 1513 6.00, SC/MATH 1515 3.00. NCR Note: May not be taken by any student who has passed or is currently taking another university course in calculus, with the exception of students taking SC/MATH 1550 6.00 concurrently. Prior to Fall 2009: Course credit exclusions: AS/SC/MATH 1513 6.00, AS/SC/MATH 1515 3.00. NCR Note: May not be taken by any student who has passed or is currently taking another university course in calculus, with the exception of students taking AS/SC/MATH 1550 6.00 concurrently.

SC/MATH 1530 3.00 Introductory Mathematics for Economists I. Introduces and develops topics in differential calculus and integral calculus with applications to marginal analysis and profit maximization. Prerequisite: Grade 12U Advanced Functions or equivalent. Prerequisites/Co-requisites: AP/ECON 1000 3.00 or AP/ECON 1010 3.00, or equivalent. Recommended completion: high-school calculus or equivalent. Course credit exclusions: SC/MATH 1000 3.00, SC/MATH 1013 3.00, SC/MATH 1300 3.00, SC/MATH 1505 6.00, SC/MATH 1513 6.00, SC/MATH 1550 6.00, GL/MATH/MODR 1930 3.00. Note: Acceptable course substitutes are available in the Calendar. PRIOR TO FALL 2009: Course credit exclusions: AK/AS/ECON 1530 3.00, AS/SC/MATH 1000 3.00, AS/SC/MATH 1013 3.00, AK/AS/SC/MATH 1300 3.00, AS/SC/MATH 1505 6.00, AS/SC/MATH 1513 6.00, AS/MATH 1530 3.00, AK/AS/MATH 1550 3.00, GL/MATH/MODR 1930 3.00.

SC/MATH 1532 3.00 Statistics for Business and Society. An introduction to statistics with an emphasis on concepts and applications relevant in the Business and Society program. Students learn basic and practical statistical techniques to explore and analyze data. Emphasis is placed on statistical reasoning and the critical interpretation of statistical information such as that seen in the media and journals. NCR note: SC/MATH 1532 3.00 may not be taken for credit by any student who has successfully completed or is concurrently enrolled in SC/MATH 1131 3.00, SC/MATH 2560 3.00, SC/MATH 2570 3.00 or equivalents. Course credit exclusions: AK/MATH 1720 3.00; SC/NATS 1500 3.00.

SC/MATH 1540 3.00 Introductory Mathematics for Economists II. Introduces and develops topics in comparative statics of general function models and matrix algebra with applications to input-output models, unconstrained and constrained optimization with applications to microeconomic and macroeconomic models, and elements of linear programming with applications to decision-making in economics. Prerequisite: AP/ECON 1530 3.00 or equivalent. Prerequisites/Co-requisites: AP/ECON 1000 3.00 or AP/ECON 1010 3.00, or equivalent. Note: No credit will be retained for this course for students who have successfully completed or who are currently enrolled in SC/MATH 1021 3.00, SC/MATH 1025 3.00, or SC/MATH 2221 3.00. Course credit exclusions: SC/MATH 1505 6.00, SC/MATH 1550 6.00, GL/MATH/MODR 2650 3.00. Note: Acceptable course substitutes are available in the Calendar. PRIOR TO FALL 2009: Course credit exclusions: AK/AS/ECON 1540 3.00, AS/SC/MATH 1505 6.00, AS/MATH 1540 3.00, AK/AS/MATH 1550 6.00, GL/MATH/MODR 2650 3.00.

SC/MATH 1550 6.00 Mathematics with Management Applications. This course is designed to provide a mathematical background for students in the BBA Honours program. It is also suitable for the bachelor program in mathematics for commerce, but should not be taken by those who intend to major in any other program in mathematics or statistics or in computer science. It includes calculus, matrix algebra and elements of optimization with applications to management. Prerequisite: SC/MATH 1515 3.00 or SC/MATH 1520 3.00 (may also be taken as a first-term corequisite), or a high school calculus course. Course credit exclusions: SC/MATH 1000 3.00, SC/MATH 1013 3.00, SC/MATH 1300 3.00, SC/MATH 1505 6.00, SC/MATH 1513 6.00, SC/MATH 1530 3.00, SC/MATH 1540 3.00, GL/MATH/MODR 1930 3.00, AP/ECON 1530 3.00, AP/ECON 1540 3.00. NCR Note: This course may not be taken by any student who has passed or is taking SC/MATH 1021 3.00, SC/MATH 1025 3.00, SC/MATH 2021 3.00, SC/MATH 2221 3.00, GL/MATH/MODR 2650 3.00 or equivalent. Prior to Fall 2009: Prerequisite: AS/SC/MATH 1515 3.00 or AS/SC/MATH 1520 3.00 (may also be taken as a first-term corequisite), or a high school calculus course. SC/MATH 1581 3.00 Business Mathematics I. This course is an introduction to interest rates (simple, compound), annuities (ordinary, due, deferred), amortization (mortgages, other debts), sinking funds, bonds (face value, bond rate, price, yield rate) and depreciation (straight line, constant percentage). Prerequisite: Ontario Grade 11 mathematics or equivalent. Course credit exclusion: SC/MATH 2580 6.00, GL/MATH 2680 6.00. Prior to Fall 2009: Course credit exclusion: AK/AS/MATH 2580 6.00, GL/MATH 2680 6.00.

GL/MATH 1610 3.00 Introduction to Statistical Methods I. This course covers the elements of probability theory and standard probability distributions, the measures and techniques used in descriptive statistics, principles of sampling and tests of significance. Prerequisite: OAC or Grade 12 mathematics. Course credit exclusions: SC/MATH 1131 3.00, SC/MATH 2560 3.00.

Cross-listed to: GL/MATH 1610 3.00, GL/MODR 1610 3.00, GL/POLS 2610 3.00, GL/SOCI 2610 3.00

GL/MATH 1610 3.00 Introduction aux méthodes statistiques I. Éléments de la théorie des probabilités, les distributions classiques, les mesures et techniques utilisées en statistique descriptive, principes de théorie des sondages et tests statistiques. Condition préalable : Mathématiques de fin d'école secondaire (12e ou CPO). Cours incompatible : SC/MATH 1131 3.00, SC/MATH 2560 3.00.

Language of Instruction: French

GL/MATH 1620 3.00 Introductory Statistics II. This course covers the correlation and regression analysis, analysis of variance and parametric tests, and problem work emphasizing applications of statistics in the social sciences. Prerequisite: GL/MATH 1610 3.00 or permission of the instructor. Course credit exclusion: SC/MATH 2570 3.00.

Cross-listed to: GL/MATH 1620 3.00, GL/MODR 1620 3.00, GL/POLS 2620 3.00, GL/SOCI 2620 3.00

GL/MATH 1620 3.00 Introduction aux méthodes statistiques II. Dans ce cours, il est question de corrélation et régression, d'analyse de la variance et les tests paramétriques, d'applications pratiques des statistiques aux sciences sociales. Condition préalable : GL/MATH 1610 3.00 ou permission du professeur. Cours incompatible : SC/MATH 2570 3.00.

GL/MATH 1650 3.00 Elements of Discrete Mathematics. The logic of propositions; truth tables; valid arguments; logic circuits. Set operations; relations on sets; Boolean functions. Counting principles; permutations; combinations; inclusion-exclusion principle; binomial and multinomial coefficients. Recurrence relations of order one and two; mathematical induction. Prerequisites: At least one OAC mathematics credit or its equivalent, or permission of the instructor. Course credit exclusions: SC/MATH 1190 3.00, GL/MATH 1630 3.00 and GL/MATH 1640 3.00.

Cross-listed to: GL/CSLA 1650 3.00, GL/MATH 1650 3.00, GL/MODR 1650 3.00

GL/MATH 1670 6.00 Fundamentals of Mathematics. Intended for the student whose (high school) mathematical background is either weak or incomplete, and designed to train and improve the logical and technical skills in the use of basic mathematics. Topics are chosen from basic algebra, linear, quadratic, polynomial, exponential, logarithmic and trigonometric functions, systems of equations, inequalities, probability, series and derivatives. Course credit exclusions: SC/MATH 1710 6.00, GL/MATH 1880 6.00(EN).

Cross-listed to: GL/ITEC 1670 6.00, GL/MATH 1670 6.00, GL/MODR 1670 6.00

SC/MATH 1700 6.00 The Nature and Growth of Ideas in Mathematics. Students are shown the central position of mathematics in our culture: great discoveries in mathematics and their effect on general culture and society; history of mathematics; mathematics of art and architecture, sound, games and gambling and computing. Course credit exclusion: None.

SC/MATH 1710 6.00 Fundamentals of Mathematics. A course of consolidation, review and enrichment of basic mathematical principles and techniques. Topics to be covered include: algebraic equations and inequalities, analytic geometry, trigonometry, elements of finite mathematics and an introduction to calculus. Note 1: To register in MATH 1710 6.00 students must either pass the prerequisite test or have successfully completed the Continuing Education course Elementary Mathematics (CEPM 3910) with a grade of B or higher. (An information sheet describing the prerequisite test and the Continuing Education course and is available from the School of Analytic Studies and Information Technology, TEL Building, Room 2005). Note 2: Students who, prior to admission and within the last two years, have completed the following high school mathematics courses with a grade of 70 per cent or higher will be excused from taking, and are not permitted to take, MATH 1710 6.00 (see Note 4): 1) (new high school curriculum) grade 12U advanced functions and introduction to calculus and one other grade 12U mathematics course, or 2) (old curriculum) two OAC mathematics courses, one calculus and one other OAC mathematics course. Note 3: If you have completed and passed any equivalent of a University level calculus course you cannot take MATH 1710 6.00 (see note 4). Note 4: If you have been excused from taking MATH 1710 6.00 you must replace it with another general education mathematics or modes of reasoning course to fulfill the general education requirement. Course credit exclusion: SC/MATH 1510 6.00. Prior to Fall 2009: Course credit exclusion: AS/SC/MATH 1510 6.00. This course will not count for major credit for any student majoring in any mathematics program.

SC/MATH 1720 6.00 Statistics and Reasoning. This course will attempt to provide some insight into the nature, scope and limitations of statistical analysis in modern society. The questions to be studied are: What types of observation or measurement exist and what approaches are used to summarize and analyze the data thus generated? Are statistics value-free? How do inductive and deductive reasoning enter into the statistical process? Examples such as the consumer price index, opinion polls, lotteries etc., may be discussed. Note: Not open to students who have taken or are taking MATH 2560 3.00, or who have received advanced standing for the equivalent. Course credit exclusion: None.

GL/MATH 1925 3.00 The Elements of Logic for Computer Science. This course introduces the fundamental elements of formal logic and its applications in computer science. The subjects covered include: propositional logic, reasoning, automatic deduction, resolution, logic circuits, predicate logic, applications in programming logic. Course credit exclusions: GL/COSC/MODR 2900 6.00.

Cross-listed to: GL/CSLA 1925 3.00, GL/ITEC 1925 3.00, GL/MATH 1925 3.00, GL/MODR 1925 3.00

GL/MATH 1925 3.00 Éléments de logique pour l'informatique. Ce cours introduit les éléments fondamentaux de la logique formelle et ses applications en informatique. Les sujets abordés incluent: la logique des propositions, raisonnements, déduction automatique, résolution, circuits logiques, la logique des prédicats, applications dans la programmation logique. Cours incompatibles : GL/COSC/MODR 2900 6.00.

GL/MATH 1930 3.00 Calculus I. This is a basic course in university calculus. Topics covered are functions, limits, continuity, differentiation, curve sketching, maximization and minimization problems for functions of one variable, the Riemann integral and antiderivatives. Prerequisite: At least one OAC mathematics credit or permission of the department. Course credit exclusion: SC/MATH 1300 3.00.

Cross-listed to: GL/MATH 1930 3.00, GL/MODR 1930 3.00

GL/MATH 1930 3.00 Calcul différentiel et intégral I. Ce cours est le premier cours de base de mathématiques de niveau universitaire. Les notions traitées sont : les fonctions, les limites, la continuité, la différentiation, le graphe des fonctions, les problèmes de maximisation et de minimisation de fonctions d'une variable, l'intégrale de Riemann et les primitives. Condition préalable : au moins un crédit en mathématiques CPO ou permission du département. Cours incompatible : SC/MATH 1300 3.00.

Language of Instruction: French

Cross-listed to: GL/MATH 1930 3.00, GL/MODR 1930 3.00

GL/MATH 1940 3.00 Calculus II. A continuation of Calculus I. Topics covered are logarithms and exponentials, trigonometry including inverse trigonometric functions, hyperbolic trigonometry, the techniques of integration, indeterminate forms and l'Hôpital Rule, an introduction to sequences and series. Applications of the integral to the calculation of areas, volumes, work. Prerequisite: GL/MATH 1930 3.00. Course credit exclusion: SC/MATH 1310 3.00.

Cross-listed to: GL/MATH 1940 3.00, GL/MODR 1940 3.00

GL/MATH 1940 3.00 Calcul différentiel et intégral II. La suite de Calcul différentiel et intégral I. Les notions traitées sont : les logarithmes et exponentielles, la trigonométrie y compris les fonctions trigonométriques inverses, la trigonométrie hyperbolique, les techniques d'intégration, les formes indéterminées et la règle de l'Hôpital, une introduction aux suites et séries. Applications de l'intégrale aux calculs des aires, des volumes et du travail. Condition préalable : GL/MATH 1930 3.00. Cours incompatible : SC/MATH 1310 3.00.

SC/MATH 2001 3.00 Real Analysis I. Axioms for, and properties of, the real numbers; sequences; functions of a real variable, continuity, and differentiation. Rigorous definitions of convergence and limit underpin a proof-based treatment of the subject material. Intended for Honours students in Mathematics. Prerequisites: SC/MATH 1200 3.00, SC/MATH 1300 3.00. Course credit exclusion: SC/MATH 3110 3.00. NCR note: MATH 2001 3.00 is not open to any student who has passed MATH 1010 3.00 Prior to Fall 2009: Prerequisites: AS/SC/MATH 1200 3.00, AS/SC/MATH 1300 3.00. Course credit exclusion: AK/AS/SC/MATH 3110 3.00. NCR note: MATH 2001 3.00 is not open to any student who has passed MATH 1010 3.00

SC/MATH 2010 3.00 Vector Differential Calculus. Power series, partial derivatives, linear maps, differentiability of maps from n-space to m-space, chain rule, gradients, tangent lines to curves, tangent planes to surfaces, cross product, implicit function theorem, multidimensional Taylor's theorem with remainder, extrema, quadratic forms, Hessian, Lagrange multipliers. Prerequisite: SC/MATH 1010 3.00 or permission of the department. Course credit exclusions: SC/MATH 2015 3.00, SC/MATH 2310 3.00, GL/MATH 2670 3.00, GL/MATH 3200 3.00. Prior to 2009: Prerequisite: AS/SC/MATH 1010 3.00 or permission of the department. Course credit exclusions: AS/SC/MATH 2015 3.00, AK/AS/SC/MATH 2310 3.00, GL/MATH 2670 3.00, GL/MATH 3200 3.00.

SC/MATH 2015 3.00 Applied Multivariate and Vector Calculus. Topics covered include partial derivatives; grad, div, curl and Laplacian operators; line and surface integrals; theorems of Gauss and Stokes; double and triple integrals in various coordinate systems; extrema and Taylor series for multivariate functions. Prerequisite: One of SC/MATH 1010 3.00, SC/MATH 1014 3.00, SC/MATH 1310 3.00; or SC/MATH 1505 6.00 plus permission of the course coordinator. Course credit exclusions: SC/MATH 2010 3.00, SC/MATH 2310 3.00, GL/MATH/MODR 2670 3.00, GL/MATH 3200 3.00. Prior to Fall 2009: Prerequisite: One of AS/SC/MATH 1010 3.00, AS/SC/MATH 1014 3.00, AK/AS/SC/MATH 1310 3.00; or AS/SC/MATH 1505 6.00 plus permission of the course coordinator. Course credit exclusions: AS/SC/MATH 2010 3.00, AK/AS/SC/MATH 2310 3.00, GL/MATH/MODR 2670 3.00, GL/MATH 3200 3.00.

SC/MATH 2018 1.00 Applied Mathematics Module III. Designed for students in applied mathematics to complement and enrich material in MATH 2015 3.00. The module treats the theory in greater depth, and explores extended applications and modelling. One lecture hour per week. One term. One credit. Prerequisites: SC/MATH 1014 3.00; SC/MATH 1017 1.00. Prerequisite or corequisite: SC/MATH 2015 3.00. Note: SC/MATH 2018 1.00 must be taken within the first 90 credits of a student's program. Prior to Fall 2009: Prerequisites: AS/SC/MATH 1014 3.00; AS/SC/MATH 1017 1.00. Prerequisite or corequisite: AS/SC/MATH 2015 3.00. Note: AS/SC/MATH 2018 1.00 must be taken within the first 90 credits of a student's program.

SC/MATH 2022 3.00 Linear Algebra II. Inner product spaces, linear transformations, eigenvalues, diagonalization, least squares, quadratic forms and Markov chains. Similar to MATH 2222 3.00 but at a more advanced level. Required in Specialized Honours applied mathematics, Specialized Honours statistics and in all mathematics and mathematics for commerce programs except the BA program in mathematics for commerce. Prerequisite: SC/MATH 1021 3.00, SC/MATH 2021 3.00, GL/MATH/MODR 2650 3.00 or permission of the course coordinator. Course credit exclusions: SC/MATH 2222 3.00, GL/MATH/MODR 2660 3.00. Prior to Fall 2009: Prerequisite: AK/AS/SC/MATH 1021 3.00, AS/SC/MATH 2021 3.00, GL/MATH/MODR 2650 3.00 or permission of the course coordinator. Course credit exclusions: AK/AS/SC/MATH 2222 3.00, GL/MATH/MODR 2660 3.00.

SC/MATH 2030 3.00 Elementary Probability. Introduction to the theory of probability as preparation for further study in either mathematical or applied probability and statistics. Topics include probability spaces, conditional probability, independence, random variables, distribution functions, expectation, Chebyshev's inequality, common distributions, moment-generating functions and limit theorems. Prerequisite: One of SC/MATH 1010 3.00, SC/MATH 1014 3.00, SC/MATH 1310 3.00. Prior to Fall 2009: Prerequisite: One of AS/SC/MATH 1010 3.00, AS/SC/MATH 1014 3.00, AK/AS/SC/MATH 1310 3.00.

SC/MATH 2041 3.00 Symbolic Computation Laboratory I. An introduction to symbolic computing in the Maple environment. Topics from single-variable differential and integral calculus, including simple ordinary differential equations, are covered. Both mathematical understanding and applications are emphasized. Three lecture hours, open laboratory hours. One term. Three credits. Prerequisites: SC/CSE 1540 3.00 (formerly COSC) or equivalent computing experience; SC/MATH 1010 3.00 or SC/MATH 1014 3.00 or SC/MATH 1310 3.00. Prior to Fall 2009: Prerequisites: AK/AS/SC/CSE 1540 3.00 (formerly COSC) or equivalent computing experience; AS/SC/MATH 1010 3.00 or AS/SC/MATH 1014 3.00 or AK/AS/SC/MATH 1310 3.00.

SC/MATH 2042 3.00 Symbolic Computation Laboratory II. Advanced symbolic computing with Maple. Topics from linear algebra, differential equations, multivariate calculus, integral theorems are covered. Both mathematical understanding and applications are emphasized. Three lecture hours, open laboratory hours. One term. Three credits. Prerequisites: SC/MATH 2041 3.00; SC/MATH 2010 3.00 or SC/MATH 2015 3.00 or SC/MATH 2310 3.00; SC/MATH 1021 3.00 or SC/MATH 1025 3.00 or SC/MATH 2221 3.00. Prerequisites or corequisites: SC/MATH 2270 3.00; SC/MATH 2022 3.00 or SC/MATH 2222 3.00. Prior to Fall 2009: Prerequisites: AS/SC/MATH 2041 3.00; AS/SC/MATH 2010 3.00 or AS/SC/MATH 2015 3.00 or AK/AS/SC/MATH 2310 3.00; AK/AS/SC/MATH 1021 3.00 or AS/SC/MATH 1025 3.00 or AK/AS/SC/MATH 2221 3.00. Prerequisites or corequisites: AK/AS/SC/MATH 2270 3.00; AK/AS/SC/MATH 2022 3.00 or AK/AS/SC/MATH 2222 3.00.

SC/MATH 2090 3.00 Applications of Logic to Discrete Mathematics. A continuation of MATH 1090 3.00, this course uses formal logic to study topics in discrete mathematics, including sets, relations, functions, induction, the integers. Optional topics include program specification, sequences, recurrence relations. Prerequisite: SC/MATH 1090 3.00, taken after Summer 1998. Prior to Fall 2009: Prerequisite: AK/AS/SC/MATH 1090 3.00, taken after Summer 1998.

SC/MATH 2131 3.00 Introduction to Statistics II. This course is a continuation of MATH 2030 3.00. It provides students with an introduction to statistical methods with an emphasis on applications using continuous

probability models. Prerequisites: SC/MATH 1131 3.00; SC/MATH 2030 3.00; SC/MATH 2015 3.00 or SC/MATH 2310 3.00. Prior to Fall 2009: Prerequisites: AK/AS/SC/MATH 1131 3.00; AK/AS/SC/MATH 2030 3.00; AS/SC/MATH 2015 3.00 or AK/AS/SC/MATH 2310 3.00.

SC/MATH 2221 3.00 Linear Algebra with Applications I. Systems of linear equations, linear and affine subspaces of Euclidean n -space, the Gauss-Jordan algorithm, matrices and matrix algebra, determinants, vector space concepts for Euclidean n -space (linear dependence and independence, basis, dimension etc.), various applications. Prerequisite: A 12U mathematics course or OAC algebra or any university mathematics course. Course credit exclusions: SC/MATH 1021 3.00, SC/MATH 1025 3.00, SC/MATH 2021 3.00, GL/MATH/MODR 2650 3.00. Prior to Fall 2009: Course credit exclusions: AK/AS/SC/MATH 1021 3.00, AS/SC/MATH 1025 3.00, AS/SC/MATH 2021 3.00, GL/MATH/MODR 2650 3.00.

SC/MATH 2222 3.00 Linear Algebra with Applications II. Linear transformations and their representation by matrices, change of basis and similarity, eigenvalues and eigenvectors, diagonalization, inner product spaces, orthogonality, the Gram-Schmidt algorithm, least squares approximations, abstract vector spaces, various applications. Prerequisite: One of SC/MATH 1021 3.00, SC/MATH 1025 3.00, SC/MATH 2221 3.00 or GL/MATH/MODR 2650 3.00. Course credit exclusions: SC/MATH 2022 3.00, GL/MATH/MODR 2660 3.00. Prior to Fall 2009: Prerequisite: One of AK/AS/SC/MATH 1021 3.00, AS/SC/MATH 1025 3.00, AK/AS/SC/MATH 2221 3.00 or GL/MATH/MODR 2650 3.00. Course credit exclusions: AK/AS/SC/MATH 2022 3.00, GL/MATH/MODR 2660 3.00.

SC/MATH 2270 3.00 Differential Equations. Introduction to differential equations, including a discussion of the formation of mathematical models for real phenomena; solution by special techniques; applications; linear equations; solutions in series; other topics if time permits. Prerequisites: One of SC/MATH 2010 3.00, SC/MATH 2015 3.00 or SC/MATH 2310 3.00; one of SC/MATH 1021 3.00, SC/MATH 1025 3.00, or SC/MATH 2221 3.00. Course credit exclusion: SC/MATH 2271 3.00, GL/MATH 3400 3.00. Prior to Fall 2009: Prerequisites: One of AS/SC/MATH 2010 3.00, AS/SC/MATH 2015 3.00 or AK/AS/SC/MATH 2310 3.00; one of AK/AS/SC/MATH 1021 3.00, AS/SC/MATH 1025 3.00, or AK/AS/SC/MATH 2221 3.00. Course credit exclusion: AS/SC/MATH 2271 3.00, GL/MATH 3400 3.00.

SC/MATH 2271 3.00 Differential Equations for Scientists and Engineers. Introduction to ordinary and partial differential equations, including their classification, boundary conditions, and methods of solution. Equations, methods, and solutions relevant to science and engineering are emphasized, and exploration is encouraged with the aid of software. Three lecture hours per week. One term. Three credits. Prerequisites: One of SC/MATH 2010 3.00, SC/MATH 2015 3.00, SC/MATH 2310 3.00 or equivalent; one of SC/MATH 1025 3.00, SC/MATH 2022 3.00, SC/MATH 2222 3.00 or equivalent. Course Credit Exclusions: SC/MATH 2270 3.00, GL/MATH 3400 3.00. Prior to Fall 2009: Prerequisites: One of AS/SC/MATH 2010 3.00, AS/SC/MATH 2015 3.00, AS/SC/MATH 2310 3.00 or equivalent; one of AS/SC/MATH 1025 3.00, AS/SC/MATH 2022 3.00, AS/SC/MATH 2222 3.00 or equivalent. Course Credit Exclusions: AS/SC/MATH 2270 3.00, GL/MATH 3400 3.00.

SC/MATH 2280 3.00 The Mathematical Theory of Interest. Topics include measurement of interest, annuities, amortization of loans, bonds, sinking funds and depreciation. The course is at a level which will prepare students for the interest theory portion of the Society of Actuaries examinations. Prerequisite: SC/MATH 1010 3.00 or SC/MATH 1014 3.00 or SC/MATH 1310 3.00. Course credit exclusions: SC/MATH 2580 6.00, SC/MATH 2581 3.00, GL/MATH 2680 6.00. Prior to Fall 2009: Prerequisite: AS/SC/MATH 1010 3.00 or AS/SC/MATH 1014 3.00 or AK/AS/SC/MATH 1310 3.00. Course credit exclusions: AK/AS/MATH 2580 6.00, AS/MATH 2581 3.00, GL/MATH 2680 6.00.

SC/MATH 2310 3.00 Calculus of Several Variables with Applications. Vector functions, partial derivatives, gradient, multiple integrals, line integrals, optimization, applications. Prerequisite: SC/MATH 1010 3.00 or SC/MATH 1014 3.00 or SC/MATH 1310 3.00. Students should have a knowledge of vector algebra in two and three dimensions. Course credit exclusions: SC/MATH 2010 3.00, SC/MATH 2015 3.00, GL/MATH/MODR 2670 3.00, GL/MATH 3200 3.00. Prior to Fall 2009: Prerequisite: AS/SC/

MATH 1010 3.00 or AS/SC/MATH 1014 3.00 or AK/AS/SC/MATH 1310 3.00. Students should have a knowledge of vector algebra in two and three dimensions. Course credit exclusions: AS/SC/MATH 2010 3.00, AS/SC/MATH 2015 3.00, GL/MATH/MODR 2670 3.00, GL/MATH 3200 3.00.

SC/MATH 2320 3.00 Discrete Mathematical Structures. Growth of functions (0, Omega, Theta notation), complexity of algorithms; recurrence relations, divide-and-conquer, generating functions; graph theory, Euler and Hamilton paths, Dijkstra's algorithm; trees, binary search, spanning trees, Prim and Kruskal algorithms. Required course in Information Technology. Prerequisite: SC/MATH 1190 3.00, or SC/MATH 1090 3.00, or any 2000-level MATH course without second digit 5. Students who have not taken SC/MATH 1190 3.00 or SC/MATH 2090 3.00 are advised to review set theory, functions, relations and induction proofs, before the course begins. Course credit exclusion: SC/CSE/MATH 1019 3.00. Prior to Fall 2009: Prerequisite: AK/AS/SC/MATH 1190 3.00, or AK/AS/SC/MATH 1090 3.00, or any 2000-level MATH course without second digit 5. Students who have not taken AK/AS/SC/MATH 1190 3.00 or AK/AS/SC/MATH 2090 3.00 are advised to review set theory, functions, relations and induction proofs, before the course begins. Course credit exclusion: AK/AS/SC/CSE/MATH 1019 3.00.

SC/MATH 2500 3.00 An Introduction to the Basic Practice of Statistics. This course provides an introduction to the concepts of statistics with an emphasis on developing a critical attitude towards the use and misuse of statistics in business, health sciences and other areas. Course credit exclusions: HH/KINE 2050 3.00, HH/KINE 3150 3.00, HH/PSYC 2020 6.00, HH/PSYC 2021 3.00, HH/PSYC 2022 3.00. Prior to Fall 2009: Course credit exclusions: HH/AS/SC/KINE 2050 3.00, HH/AS/SC/KINE 3150 3.00, HH/AS/SC/PSYC 2020 6.00, HH/AS/SC/PSYC 2021 3.00, HH/AS/SC/PSYC 2022 3.00. Note: May not be taken by students who have taken or are taking any university course in statistics. Note: Computer/Internet use may be required to facilitate course work.

SC/MATH 2560 3.00 Elementary Statistics I. Displaying and describing distributions, normal distribution. Relationships between variables, regression and correlation. The need for design, experimental design and sampling design. Sampling distributions, bias, variability. Probability models, random variables, probability laws. Prerequisite: Ontario Grade 11 mathematics. Course credit exclusions: SC/MATH 1131 3.00, SC/BIOL 2060 3.00, AP/ECON 2500 3.00, AP/SC/GEOG 2420 3.00, HH/KINE 2050 3.00, GL/MATH/MODR 1610 3.00, SB/OMIS 1000 3.00, AS/POLS 3300 6.00, GL/POLS 2610 3.00, HH/PSYC 2020 6.00, HH/PSYC 2021 3.00, GL/SOCI 2610 3.00, SB/OMIS 1000 3.00. Prior to Fall 2009: Course credit exclusions: AK/AS/SC/MATH 1131 3.00, SC/BIOL 2060 3.00, AS/ECON 2500 3.00, AS/SC/GEOG 2420 3.00, HH/AS/SC/KINE 2050 3.00, GL/MATH/MODR 1610 3.00, SB/OMIS 1000 3.00, AS/POLS 3300 6.00, GL/POLS 2610 3.00, HH/AS/SC/PSYC 2020 6.00, HH/AS/SC/PSYC 2021 3.00, AK/PSYC 2510 3.00, AS/SOCI 3030 6.00, GL/SOCI 2610 3.00, SB/OMIS 1000 3.00.

SC/MATH 2565 3.00 Introduction to Applied Statistics. The aim of this course is to give students in various disciplines some fundamental tools in statistical inference. Through a mixture of theory given in lecture hours and practice acquired during lab time, the student will understand when and how to use statistical tools such as the z, t or chi-squared tests, regression analysis, analysis of variance and various other techniques. Prerequisites: High school MATH 11U or MATH 11U/C. Course credit exclusions: SC/BIOL 2060 3.00, AP/ECON 2500 3.00, AP/SC/GEOG 2420 3.00, HH/KINE 2050 3.00, SC/MATH 2560 3.00, SC/MATH 2570 3.00, HH/PSYC 2020 6.00, SB/OMIS 1000 3.00. Prior to Fall 2009: Course credit exclusions: SC/BIOL 2060 3.00, AS/ECON 2500 3.00, AS/SC/GEOG 2420 3.00, HH/AS/SC/KINE 2050 3.00, AK/AS/SC/MATH 2560 3.00, AK/AS/SC/MATH 2570 3.00, HH/AS/SC/PSYC 2020 6.00, AS/SOCI 3030 6.00, SB/OMIS 1000 3.00. Note: Students who have passed AK/AS/SC/MATH 1131 3.00 may not take AK/AS/SC/MATH 2565 3.00.

SC/MATH 2570 3.00 Elementary Statistics II. Binomial distribution, sampling distribution of sample proportions and means, central limit theorem. Confidence intervals, tests and decisions, abuse of tests. Inference for a single mean, comparing two means and for spread. Contingency tables. Simple regression and basic analysis of variance. Prerequisite: SC/MATH 2560 3.00 or SC/MATH 1131 3.00. Course credit

exclusions: AP/SC/GEOG 2420 3.00, HH/KINE 3150 3.00, GL/MATH/MODR 1620 3.00, AS/POLS 3300 6.00, GL/POLS 2620 3.00, HH/PSYC 2020 6.00, HH/PSYC 2022 3.00, GL/SOCI 2620 3.00. Prior to Fall 2009: Prerequisite: AK/AS/SC/MATH 2560 3.00 or AK/AS/SC/MATH 1131 3.00. Course credit exclusions: AS/SC/GEOG 2420 3.00, HH/AS/SC/KINE 3150 3.00, GL/MATH/MODR 1620 3.00, AS/POLS 3300 6.00, GL/POLS 2620 3.00, HH/AS/SC/PSYC 2020 6.00, HH/AS/SC/PSYC 2022 3.00, AS/SOCI 3030 6.00, GL/SOCI 2620 3.00.

SC/MATH 2580 6.00 Mathematics of Investment and Actuarial Science. Theory of interest; annuities certain; amortization and sinking funds; evaluation of bonds and other investments; depreciation, depletion and capital cost; insurance, including mortality tables, principles of life annuities, premiums and reserves. Prerequisite: One full university mathematics course. Course credit exclusions: SC/MATH 1581 3.00, SC/MATH 2280 3.00, SC/MATH 2581 3.00, GL/MATH 2680 6.00. Prior to Fall 2009: Course credit exclusions: AS/MATH 1581 3.00, AS/SC/MATH 2280 3.00, AS/MATH 2581 3.00, GL/MATH 2680 6.00.

SC/MATH 2581 3.00 Business Mathematics II. Spreadsheets and their application to business mathematics; deepening of topics in Business Mathematics I, including continuous compound interest, perpetuities, annuities where payments vary, callable bonds, bond yield rate, capital budgeting; mortality tables, life annuities, life insurance. Prerequisites: SC/MATH 1581 3.00; SC/CSE 1520 3.00 or permission of the instructor. Course credit exclusions: SC/MATH 2280 3.00, SC/MATH 2580 6.00, GL/MATH 2680 6.00. Prior to Fall 2009: Prerequisites: AS/MATH 1581 3.00; AK/AS/SC/CSE 1520 3.00 (formerly COSC) or permission of the instructor. Course credit exclusions: AS/SC/MATH 2280 3.00, AK/AS/MATH 2580 6.00, GL/MATH 2680 6.00.

SC/MATH 2590 3.00 Thinking Mathematically I. The main objectives of this course include providing opportunities for students to achieve success in thinking mathematically and to reflect on the learning and practice of mathematics. Intended primarily, but not exclusively, for Education students in the PJ and JI streams. Prerequisite: Successful completion of at least 24 credits or permission of the course director. Note: This course is not open to any student who has taken or is taking another university mathematics course unless permission of the course coordinator is obtained. NCR Note: This course may not be taken for credit by any student who has taken SC/MATH 1580 3.00. Prior to Fall 2009: NCR Note: This course may not be taken for credit by any student who has taken AS/SC/MATH 1580 3.00.

Cross-listed to: ED/MATH 2590 3.00, SC/MATH 2590 3.00

SC/MATH 2591 3.00 Thinking Mathematically II. This course continues some of the themes explored in MATH 2590 3.00 (formerly AS/SC/MATH 1580). It provides additional opportunities for students to develop a positive attitude towards mathematics and to achieve success in thinking mathematically. Prerequisite: SC/ED/MATH 2590 3.00 or SC/MATH 1580 3.00 or permission of the course coordinator. Course credit exclusions: SC/MATH 1590 3.00. Note: Open to any student who has passed or is taking another university mathematics course (except SC/ED/MATH 2590 3.00 or SC/MATH 1580 3.00), unless permission of the course coordinator is obtained. Prior to Fall 2009: Prerequisite: AS/ED/MATH 2590 3.00 or AS/SC/MATH 1580 3.00 or permission of the course coordinator. Course credit exclusions: AS/SC/MATH 1590 3.00. Note: Open to any student who has passed or is taking another university mathematics course (except AS/ED/MATH 2590 3.00 or AS/SC/MATH 1580 3.00), unless permission of the course coordinator is obtained.

GL/MATH 2630 6.00 Probability and Mathematical Statistics I. Topics include probability spaces, conditional probability, independence, random variables and vectors, expectation and moments, moment-generating functions, classical discrete and continuous distributions, laws of large numbers, central limit theorem, introduction to sampling, sufficiency, point estimation, confidence intervals, hypothesis testing, regression and correlation. Prerequisite or corequisites: GL/MATH 1930 3.00 and GL/MATH 1940 3.00.

Cross-listed to: GL/MATH 2630 6.00, GL/MODR 2630 6.00

GL/MATH 2650 3.00 Linear Algebra I. This is a basic mathematics course as well as a very useful course for someone who wishes to do applied research in the social sciences. Among the topics considered are vectors, bases, matrices, systems of linear equations, rank and determinants. Some applications of linear algebra to various other disciplines, such as economics, are also included. Prerequisite: GL/MATH 1940 3.00 or equivalent or permission of the department. Course credit exclusions: SC/MATH 1021 3.00, SC/MATH 2221 3.00.

Cross-listed to: GL/MATH 2650 3.00, GL/MODR 2650 3.00

GL/MATH 2650 3.00 Algèbre linéaire I. Algèbre linéaire est un cours de base des mathématiques qui sert également aux étudiants en sciences sociales. Les sujets traités comprendront les vecteurs, les équations linéaires, le rang et le déterminant, avec des applications. Condition préalable : GL/MATH 1940 3.00. Cours incompatibles : SC/MATH 1021 3.00, SC/MATH 2221 3.00.

Language of Instruction: French

Cross-listed to: GL/MATH 2650 3.00, GL/MODR 2650 3.00

GL/MATH 2660 3.00 Linear Algebra II. This is a continuation of Linear Algebra I. More about vectors spaces, subspaces, linear transformations. Eigenvalues, eigenvectors, similarity, diagonalization. Positive definite quadratic forms. Inner product spaces and Gram-Schmidt orthogonalization. Prerequisite: GL/MATH 2650 3.00. Course credit exclusions: SC/MATH 2222 3.00, SC/MATH 2022 3.00.

Cross-listed to: GL/MATH 2660 3.00, GL/MODR 2660 3.00

GL/MATH 2660 3.00 Algèbre linéaire II. Ce cours est la suite du cours GL/MATH 2650 3.00. Les sujets traités comprendront les espaces vectoriels, les sous espaces, les applications linéaires, les vecteurs propres, les changements de base, la diagonalisation ainsi que les formes quadratiques positives. Condition préalable : GL/MATH 2650 3.00. Cours incompatibles : SC/MATH 2222 3.00, SC/MATH 2022 3.00.

Language of Instruction: French

Cross-listed to: GL/MATH 2660 3.00, GL/MODR 2660 3.00

GL/MATH 2670 6.00 Second Year Calculus. Numerical series and power series, vector algebra and calculus (with applications to curves, and motions along curves in two and three dimensions). Functions of several variables, including partial differentiation, properties of surfaces, tangent lines and planes, and the problem of finding maximum and minimum values for such functions (with or without constraining side conditions). The rest of the course is devoted to double and triple integrals, line integrals and surface integrals, and some elementary differential equations. Prerequisite: GL/MATH 1940 3.00. Course credit exclusion: SC/MATH 2310 3.00.

Cross-listed to: GL/MATH 2670 6.00, GL/MODR 2670 6.00

GL/MATH 2680 6.00 Les mathématiques de l'investissement et de l'actuariat. Théorie de l'intérêt (simple, composé et continu). Calculs d'hypothèques, de rendements d'obligations, d'amortissement et de remboursement de prêts. Théorie de la dépréciation et de la capitalisation des biens. L'assurance-vie et les rentes viagères. Les primes et les tables de mortalité. Condition préalable ou concomitante : GL/MATH 1930 3.00 et GL/MATH 1940 3.00. Cours incompatible : SC/MATH 2580 6.00.

Cross-listed to: GL/MATH 2680 6.00, GL/MODR 2680 6.00

GL/MATH 2680 6.00 Mathematics of Investment and Actuarial Science. This course is part of the Mathematics for Commerce Program. Simple and compound interest with applications to calculations of mortgage payments, yields on bonds, interest paid on instalment loans. Depreciation, capitalization, annuities and continuous interest. Mathematical theory of interest with applications to life annuities and life insurance. Prerequisite or corequisite: GL/MATH 1930 3.00 and GL/MATH 1940 3.00. Course credit exclusion: SC/MATH 2580 6.00.

Cross-listed to: GL/MATH 2680 6.00, GL/MODR 2680 6.00

SC/MATH 3001 3.00 Real Analysis II. Numerical series, Riemann integration, Taylor polynomials, sequences and series of functions, uniform convergence, power series, introduction to metric spaces

including compactness and completeness, Weierstrass Approximation Theorem. Continues MATH 2001. Proof-based, intended for Honours students in Mathematics. Prerequisites: SC/MATH 1010 3.00 or both SC/MATH 2001 3.00 and SC/MATH 1310 3.00. Course credit exclusion: SC/MATH 3210 3.00 Prior to Fall 2009: Prerequisites: AS/SC/MATH 1010 3.00 or both AS/SC/MATH 2001 3.00 and AS/SC/MATH 1310 3.00. Course credit exclusion: AS/SC/MATH 3210 3.00

SC/MATH 3010 3.00 Vector Integral Calculus. Integrability of continuous functions over suitable domains, iterated integrals and Fubini's theorem, counterexamples, change of variables, Jacobian determinants, polar and spherical coordinates, volumes, vector fields, divergence, curl, line and surface integrals, Green's and Stokes's theorems, differential forms, general Stokes's theorem. Prerequisite: SC/MATH 2010 3.00, or SC/MATH 2310 3.00; or SC/MATH 2015 3.00 and written permission of the mathematics undergraduate director (normally granted only to students proceeding in Honours programs in mathematics or in the Specialized Honours program in statistics). Prerequisite or corequisite: SC/MATH 2022 3.00 or SC/MATH 2222 3.00. Prior to Fall 2009: Prerequisite: AS/SC/MATH 2010 3.00, or AK/AS/SC/MATH 2310 3.00; or AS/SC/MATH 2015 3.00 and written permission of the mathematics undergraduate director (normally granted only to students proceeding in Honours programs in mathematics or in the Specialized Honours program in statistics). Prerequisite or corequisite: AK/AS/SC/MATH 2022 3.00 or AK/AS/SC/MATH 2222 3.00.

SC/MATH 3020 6.00 Algebra I. Introduction to the basic concepts of abstract algebra, with applications: groups (cyclic, symmetric, Lagrange's theorem, quotients, homomorphism theorems); rings (congruences, quotients, polynomials, integral domains, PIDs and UFDs); fields (field extensions, constructions with ruler and compass, coding theory). Prerequisite: SC/MATH 2022 3.00 or SC/MATH 2222 3.00. Prior to Fall 2009: Prerequisite: AK/AS/SC/MATH 2022 3.00 or AK/AS/SC/MATH 2222 3.00. Course credit exclusion: GL/MATH/MODR 3650 6.00.

SC/MATH 3033 3.00 Classical Regression Analysis. General linear model. Properties and geometry of least-squares estimation. General linear hypothesis, confidence regions and intervals. Multicollinearity. Relationship between ANOVA models and linear models. Residual analysis, outliers, partial and added variable plots. Prerequisites: SC/MATH 2131 3.00 or permission of the course coordinator; SC/MATH 2022 3.00 or SC/MATH 2222 3.00. Course credit exclusions: SC/MATH 3330 3.00, AP/SC/GEOG 3421 3.00, HH/PSYC 3030 6.00. Prior to Fall 2009: Prerequisites: AK/AS/SC/MATH 2131 3.00 or permission of the course coordinator; AK/AS/SC/MATH 2022 3.00 or AK/AS/SC/MATH 2222 3.00. Course credit exclusions: AK/AS/SC/MATH 3330 3.00, AS/SC/GEOG 3421 3.00, HH/AK/AS/SC/PSYC 3030 6.00.

SC/MATH 3034 3.00 Applied Categorical Data Analysis. Regression using categorical explanatory variables, one-way and two-way analysis of variance. Categorical response data, two-way and three-way contingency tables, odds ratios, tests of independence, partial association. Generalized linear models. Logistic regression. Loglinear models for contingency tables. Prerequisite: SC/MATH 3033 3.00 or SC/MATH 3330 3.00. Prior to Fall 2009: Prerequisite: AS/SC/MATH 3033 3.00 or AK/AS/SC/MATH 3330 3.00. Note: Computer/Internet use may be required to facilitate course work.

SC/MATH 3050 6.00 Introduction to Geometries. Analytic geometry over a field with vector and barycentric coordinate methods, affine and projective transformations, inverse geometry, foundations of Euclidean and non-Euclidean geometry, applications throughout to Euclidean geometry. Prerequisite: SC/MATH 2022 3.00 or SC/MATH 2222 3.00 or permission of the course coordinator. Prior to Fall 2009: Prerequisite: AK/AS/SC/MATH 2022 3.00 or AK/AS/SC/MATH 2222 3.00 or permission of the course coordinator.

SC/MATH 3090 3.00 Computational Mathematics. Modelling (discrete and continuous, deterministic and stochastic) and practical solutions to general categories of applied problems. Case studies of solutions through modelling and representation of data. Implementation, numerical considerations, efficiency, and application of numerical algorithms. Three lecture hours per week. Prerequisites: SC/CSE 2031 3.00 or SC/CSE 1540 3.00, SC/MATH 2022 3.00, SC/MATH 2030 3.00, SC/MATH 2041

3.00. Prior to Fall 2009: Prerequisites: AK/AS/SC/CSE 2031 3.00 or AK/AS/SC/CSE 1540 3.00 (formerly COSC), AK/AS/SC/MATH 2022 3.00, AK/AS/SC/MATH 2030 3.00, AK/AS/SC/MATH 2041 3.00.

SC/MATH 3100 3.00 Famous Problems in Mathematics. An attempt to foster an appreciation of the history, the personalities and some of the content of different areas of mathematics, by means of a study of some specific problems which have exercised the minds of mathematicians. Prerequisites: At least 12 credits from 2000-level mathematics courses without second digit 5, or permission of the course coordinator.

SC/MATH 3110 3.00 Introduction to Mathematical Analysis. Proofs in calculus and analysis. Topics include sets, functions, axioms for \mathbb{R} , applications of the completeness axiom, countability, sequences and their limits, monotone sequences, limits of functions, continuity. Prerequisite: SC/MATH 1310 3.00 or SC/MATH 1014 3.00. Prerequisites or corequisites: SC/MATH 2310 3.00 or SC/MATH 2010 3.00 or SC/MATH 2015 3.00; SC/MATH 1021 3.00 or SC/MATH 2221 3.00 or SC/MATH 1025 3.00. Course credit exclusion: SC/MATH 1010 3.00. Prior to Fall 2009: Prerequisite: AK/AS/SC/MATH 1310 3.00 or AS/SC/MATH 1014 3.00. Prerequisites or corequisites: AK/AS/SC/MATH 2310 3.00 or AS/SC/MATH 2010 3.00 or AS/SC/MATH 2015 3.00; AK/AS/SC/MATH 1021 3.00 or AK/AS/SC/MATH 2221 3.00 or AS/SC/MATH 1025 3.00. Course credit exclusion: AS/SC/MATH 1010 3.00.

SC/MATH 3131 3.00 Mathematical Statistics I. Topics include common density functions, probability functions, principle of likelihood, the likelihood function, the method of maximum likelihood, likelihood regions, tests of hypotheses, likelihood ratio tests, goodness of fit tests, conditional tests and confidence sets with a view towards applications. Prerequisite: SC/MATH 2131 3.00 or permission of the course coordinator. Prior to Fall 2009: Prerequisite: AK/AS/SC/MATH 2131 3.00 or permission of the course coordinator.

SC/MATH 3132 3.00 Mathematical Statistics II. Important examples and methods of statistical estimation and hypothesis testing are discussed in terms of their mathematical and statistical properties. Topics include sufficiency, Bayesian statistics, decision theory, most powerful tests, likelihood ratio tests. Prerequisite: SC/MATH 3131 3.00. Prior to Fall 2009: Prerequisite: AK/AS/SC/MATH 3131 3.00.

SC/MATH 3140 6.00 Number Theory and Theory of Equations. A study of topics in number theory and theory of equations using relevant methods and concepts from modern algebra, such as Abelian groups, unique factorization domains and field extensions. Prerequisite: SC/MATH 2022 3.00 or SC/MATH 2222 3.00 or permission of the course coordinator. Prior to Fall 2009: Prerequisite: AK/AS/SC/MATH 2022 3.00 or AK/AS/SC/MATH 2222 3.00 or permission of the course coordinator

SC/MATH 3170 6.00 Operations Research I. A study of linear programming; transportation problems, including network flows, assignment problems and critical path analysis; integer programming; dynamic programming and an introduction to stochastic models. Application to a set of problems representative of the field of operations research. Prerequisites: SC/MATH 1021 3.00 or SC/MATH 1025 3.00 or SC/MATH 2221 3.00; one of SC/CSE 1520 3.00, SC/CSE 1540 3.00 or SC/CSE 1020 3.00 or equivalent. Course credit exclusions: SC/MATH 2751 3.00, AP/ECON 3120 3.00, AP/ADMS 3331 3.00, AP/ADMS 3351 3.00, GL/MATH 3660 6.00. Prior to Fall 2009: Prerequisites: AK/AS/SC/MATH 1021 3.00 or AS/SC/MATH 1025 3.00 or AK/AS/SC/MATH 2221 3.00; one of AK/AS/SC/CSE 1520 3.00, AK/AS/SC/CSE 1540 3.00 or AK/AS/SC/CSE 1020 3.00 (formerly COSC) or equivalent. Course credit exclusions: AK/MATH 2751 3.00, AK/ECON 3120 3.00, AK/ADMS 3331 3.00, AK/ADMS 3351 3.00, GL/MATH 3660 6.00.

GL/MATH 3200 3.00 Differential and Integral Calculus III. This course completes the calculus sequence, bringing together linear algebra and analysis to study functions from \mathbb{R}^n and \mathbb{R}^m . Derivatives and Jacobian matrices; extrema and Hessian matrices; vector differential operators; theorems of Gauss, Green and Stokes. Prerequisite: GL/MATH 2660 3.00 and GL/MATH 2670 6.00.

GL/MATH 3200 3.00 Calcul différentiel et intégral III. Ce cours complète le cycle des cours de calcul différentiel en appliquant l'algèbre linéaire à l'analyse des fonctions de \mathbb{R}^n et \mathbb{R}^m . Les matrices jacobiniennes; les matrices hessiennes; les opérateurs différentiels; les théorèmes de Gauss, Green et Stokes.

Language of Instruction: French

SC/MATH 3210 3.00 Principles of Mathematical Analysis. Rigorous presentation, with proofs, of fundamental concepts of analysis: limits, continuity, differentiation, integration, fundamental theorem, power series, uniform convergence. Prerequisite: At least one of the following four courses or course combinations: 1) SC/MATH 2010 3.00, 2) SC/MATH 3110 3.00, 3) SC/MATH 2310 3.00 and SC/MATH 1010 3.00, 4) SC/MATH 2015 3.00 and SC/MATH 1010 3.00. Prior to Fall 2009: Prerequisite: At least one of the following four courses or course combinations: 1) AS/SC/MATH 2010 3.00, 2) AK/AS/SC/MATH 3110 3.00, 3) AK/AS/SC/MATH 2310 3.00 and AS/SC/MATH 1010 3.00, 4) AS/SC/MATH 2015 3.00 and AS/SC/MATH 1010 3.00. Course credit exclusion: GL/MATH 3320 3.00.

SC/MATH 3241 3.00 Numerical Methods I. An introductory course in computational linear algebra. Topics include simple error analysis, linear systems of equations, non-linear equations, linear least squares and interpolation. Prerequisites: One of SC/MATH 1010 3.00, SC/MATH 1014 3.00, SC/MATH 1310 3.00; one of SC/MATH 1021 3.00, SC/MATH 1025 3.00, SC/MATH 2221 3.00; one of SC/CSE 1540 3.00, SC/CSE 2031 3.00, or SC/CSE 2501 1.00. Course credit exclusion: SC/COSC 3121 3.00. Prior to Fall 2009: Prerequisites: One of AS/SC/MATH 1010 3.00, AS/SC/MATH 1014 3.00, AK/AS/SC/MATH 1310 3.00; one of AK/AS/SC/MATH 1021 3.00, AS/SC/MATH 1025 3.00, AK/AS/SC/MATH 2221 3.00; one of AK/AS/SC/CSE 1540 3.00, AK/AS/SC/CSE 2031 3.00 (formerly COSC), or SC/CSE 2501 1.00. Course credit exclusion: AK/AS/SC/COSC 3121 3.00.

Cross-listed to: SC/CSE 3121 3.00, SC/MATH 3241 3.00

SC/MATH 3242 3.00 Numerical Methods II. Algorithms and computer methods for solving problems of differentiation, integration, systems of non-linear equations and matrix eigenvalues. Prerequisite: SC/MATH 3241 3.00 or SC/CSE 3121 3.00. Course credit exclusion: SC/COSC 3122 3.00. Prior to Fall 2009: Prerequisite: AS/SC/MATH 3241 3.00 or AK/AS/SC/CSE 3121 3.00 or AK/AS/SC/COSC 3121 3.00. Course credit exclusion: AK/AS/SC/COSC 3122 3.00.

Cross-listed to: SC/CSE 3122 3.00, SC/MATH 3242 3.00

SC/MATH 3260 3.00 Introduction to Graph Theory. Introductory graph theory with applications. Graphs, digraphs. Eulerian and Hamiltonian graphs. The travelling salesman. Path algorithms; connectivity; trees; planarity; colourings; scheduling; minimal cost networks. Tree searches and sortings, minimal connectors and applications from physical and biological sciences. Prerequisite: At least six credits from 2000-level mathematics courses without second digit 5.

SC/MATH 3271 3.00 Partial Differential Equations. Partial differential equations of mathematical physics and their solutions in various coordinates, separation of variables in Cartesian coordinates, application of boundary conditions; Fourier series and eigenfunction expansions; generalized curvilinear coordinates; separation of variables in spherical and polar coordinates. Prerequisites: SC/MATH 2270 3.00; SC/MATH 2010 3.00 or SC/MATH 2015 3.00 or SC/MATH 2310 3.00; SC/MATH 3010 3.00 is also desirable, though not essential, as prerequisite for students presenting SC/MATH 2010 3.00 or SC/MATH 2310 3.00. Prior to Fall 2009: Prerequisites: AK/AS/SC/MATH 2270 3.00; AS/SC/MATH 2010 3.00 or AS/SC/MATH 2015 3.00 or AK/AS/SC/MATH 2310 3.00; AK/AS/SC/MATH 3010 3.00 is also desirable, though not essential, as prerequisite for students presenting AS/SC/MATH 2010 3.00 or AK/AS/SC/MATH 2310 3.00.

SC/MATH 3280 6.00 Actuarial Mathematics. Deterministic and stochastic models for contingent payments. Topics include survival distributions, life tables, premiums and reserves for life insurance and annuities, multiple life contracts, multiple decrement theory. Prerequisite: SC/MATH 2280 3.00. Prerequisite or corequisite: SC/MATH 2131 3.00. Prior to Fall 2009: Prerequisite: AS/SC/MATH 2280 3.00. Prerequisite or corequisite: AK/AS/SC/MATH 2131 3.00.

GL/MATH 3300 3.00 Introductory Topology I. This course is an introduction to modern topology, including the topology of \mathbb{R}^n and compact spaces. Prerequisite: GL/MATH 2670 6.00.

GL/MATH 3300 3.00 Introduction à la topologie I. Ce cours est une introduction à la topologie moderne, y compris la topologie de \mathbb{R}^n et les espaces compacts. Condition préalable : GL/MATH 2670 6.00.

Language of Instruction: French

GL/MATH 3301 3.00 Introductory Topology II. This course is the continuation of Introduction to Topology I. It will cover metric spaces, the topology of surfaces, homotopy of paths and the fundamental group. Prerequisite: GL/MATH 2670 6.00 and GL/MATH 3300 3.00.

GL/MATH 3301 3.00 Introduction à la topologie II. Ce cours est la suite du cours Introduction à la topologie moderne I. Cet enseignement porte sur les espaces métriques, la topologie des surfaces, l'homotopie des chemins et le groupe fondamental. Condition préalable : GL/MATH 2670 6.00 et GL/MATH 3300 3.00.

Language of Instruction: French

GL/MATH 3320 3.00 Principles of Mathematical Analysis. The fundamental ideas of analysis that are employed in the calculus sequence are presented rigorously and with proofs. Topics include the axiom for \mathbb{R} , the topology of \mathbb{R} , uniform continuity sequences and series. Prerequisite: GL/MATH 2670 6.00. Course credit exclusions: SC/MATH 3110 3.00, SC/MATH 3210 3.00.

SC/MATH 3330 3.00 Regression Analysis. Simple regression analysis, multiple regression analysis, matrix form of the multiple regression model, estimation, tests (t- and F-tests), multicollinearity and other problems encountered in regression, diagnostics, model building and variable selection, remedies for violations of regression assumptions. Prerequisites: One of SC/MATH 2131 3.00, SC/MATH 2570 3.00, HH/PSYC 2020 6.00, or equivalent; some acquaintance with matrix algebra (such as is provided in SC/MATH 1021 3.00, SC/MATH 1025 3.00, SC/MATH 1505 6.00, SC/MATH 1550 6.00, or SC/MATH 2221 3.00). Course credit exclusions: SC/MATH 3033 3.00, AP/ECON 4210 3.00, HH/PSYC 3030 6.00. Prior to Fall 2009: Prerequisites: One of AK/AS/SC/MATH 2131 3.00, AK/AS/SC/MATH 2570 3.00, HH/AS/SC/PSYC 2020 6.00, or equivalent; some acquaintance with matrix algebra (such as is provided in AK/AS/SC/MATH 1021 3.00, AS/SC/MATH 1025 3.00, AS/SC/MATH 1505 6.00, AK/AS/MATH 1550 6.00, or AK/AS/SC/MATH 2221 3.00). Course credit exclusions: AS/SC/MATH 3033 3.00, AS/ECON 4210 3.00, HH/AS/SC/PSYC 3030 6.00.

GL/MATH 3400 3.00 Differential Equations. This is an introduction to differential equations, including a discussion of the formulation of mathematical models for real phenomena; solution techniques; linear equations, applications; solution in series; other topics if time permits. Prerequisite: GL/MATH 2670 6.00 or permission of the department. Course credit exclusion: GL/MATH 3400 6.00.

SC/MATH 3410 3.00 Complex Variables. Analytic functions, the Cauchy-Riemann equations, complex integrals, the Cauchy integral theorem, maximum modulus theorem. Calculations of residues and applications to definite integrals, two-dimensional potential problems and conformal mappings. Prerequisite: SC/MATH 2010 3.00 or SC/MATH 2015 3.00 or SC/MATH 2310 3.00. (SC/MATH 3010 3.00 is also recommended as a prerequisite for students who have taken SC/MATH 2010 3.00.) Prior to Fall 2009: Prerequisite: AS/SC/MATH 2010 3.00 or AS/SC/MATH 2015 3.00 or AK/AS/SC/MATH 2310 3.00. (AK/AS/SC/MATH 3010 3.00 is also recommended as a prerequisite for students who have taken AS/SC/MATH 2010 3.00.)

SC/MATH 3430 3.00 Sample Survey Design. Principal steps in planning and conducting a sample survey. Sampling techniques including simple random sampling, stratified random sampling, cluster sampling and sampling with probabilities proportional to size. Estimation techniques including difference, ratio and regression estimation. Prerequisite: SC/MATH 2131 3.00 or SC/MATH 3330 3.00. Prior to Fall 2009: Prerequisite: AK/AS/SC/MATH 2131 3.00 or AK/AS/SC/MATH 3330 3.00.

SC/MATH 3450 3.00 Introduction to Differential Geometry. Curves and surfaces in 3-space, tangent vectors, normal vectors, curvature, introduction to topology and to manifolds. Prerequisites: SC/MATH 3010 3.00; SC/MATH 2022 3.00 or SC/MATH 2222 3.00; or permission of the course coordinator. Course credit exclusion: SC/MATH 4250 6.00. Prior to Fall 2009: Prerequisites: AK/AS/SC/MATH 3010 3.00; AK/AS/SC/MATH 2022 3.00 or AK/AS/SC/MATH 2222 3.00; or permission of the course coordinator. Course credit exclusion: AK/AS/SC/MATH 4250 6.00

SC/MATH 3500 6.00 Mathematics in the History of Culture. An introduction to the history of mathematical ideas from antiquity to the present, with emphasis on the role of these ideas in other areas of culture such as philosophy, science and the arts. Prerequisite: Six credits in university-level mathematics (other than SC/MATH 1500 3.00, SC/MATH 1510 6.00 or SC/MATH 1515 3.00) is strongly recommended. Prior to Fall 2009: Prerequisite: Six credits in university-level mathematics (other than AS/SC/MATH 1500 3.00, AS/SC/MATH 1510 6.00 or AS/SC/MATH 1515 3.00) is strongly recommended.

GL/MATH 3501 3.00 Geometry I. This course studies the geometry of projective spaces, including conics, quadrics and duality theory. Euclidean space is studied as a specialization of projective space. Non-Euclidean geometries including hyperbolic space will also be studied. Prerequisite: GL/MATH 2660 3.00.

GL/MATH 3510 3.00 Modern Algebra I. This course is an introduction to group theory and abstract algebraic structures, with applications to number theory and to symmetry groups of geometrical objects in the plane and in space. Prerequisite: GL/MATH 2660 3.00. Course credit exclusion: GL/MATH 3650 6.00 (Modern Algebra), SC/MATH 3020 6.00 (Algebra I).

GL/MATH 3510 3.00 Algèbre moderne I. Ce cours est une introduction à la théorie des groupes et aux structures de l'algèbre abstraite, avec des applications à la théorie des nombres et aux groupes symétriques d'objets géométriques dans le plan et dans l'espace. Condition préalable : GL/MATH 2660 3.00. Cours incompatibles : GL/MATH 3650 6.00, SC/MATH 3020 6.00.

Language of Instruction: French

GL/MATH 3515 3.00 Modern Algebra II. This course is a continuation of Modern Algebra I, and it also is an introduction to ring theory and to field theory. Included here are the topics of polynomial rings, field extensions, and factorization theory for polynomials. Prerequisite: GL/MATH 3510 3.00. Course credit exclusion: GL/MATH 3650 6.00 (Modern Algebra), SC/MATH 3020 6.00 (Algebra I).

GL/MATH 3515 3.00 Algèbre moderne II. Ce cours est la continuation du cours « Algèbre moderne I », et il sert aussi d'introduction à la théorie des anneaux et des corps. Y sont traités les anneaux des polynômes, les extensions d'un corps et la théorie de factorisation des polynômes. Condition préalable : GL/MATH 2660 3.00. Cours incompatibles : GL/MATH 3650 6.00, SC/MATH 3020 6.00.

Language of Instruction: French

GL/MATH 3660 6.00 Operations Research. Linear Programming, duality theory with applications. The transportation algorithm with applications to the assignment and shortest route problems. Dynamic Programming and Non-Linear Programming including quadratic and convex programming. Prerequisite: GL/MATH 2650 3.00. Course credit exclusion: SC/MATH 3170 6.00.

Cross-listed to: GL/MATH 3660 6.00, GL/MODR 3660 6.00

GL/MATH 3660 6.00 Recherche opérationnelle. Le cours explore la programmation linéaire. On y étudie la méthode du simplexe et la théorie de la dualité ainsi que l'algorithme de la transportation avec applications aux problèmes des réseaux, du partage et de l'itinéraire le plus court. On se penche, enfin, sur les problèmes de l'arbre engendrant minimal et du flux maximal. Condition préalable : GL/MATH 2650 3.00. Cours incompatible : SC/MATH 3170 6.00.

Language of Instruction: French

Cross-listed to: GL/MATH 3660 6.00, GL/MODR 3660 6.00

SC/MATH 4000 3.00 Individual Project. A project of a pure or applied nature in mathematics or statistics under the supervision of a faculty member. The project allows the student to apply mathematical or statistical knowledge to problems of current interest. A report is required at the conclusion of the project. Prerequisites: Open to all students in Honours programs in the Department of Mathematics and Statistics. Permission of the program director is required. Applied mathematics students can enrol only after they have completed the core program in applied mathematics.

GL/MATH 4000 6.00 Lectures dirigées en mathématiques. Les étudiants peuvent faire des études indépendantes sous la direction d'un membre du département avec l'approbation du chef du département. Condition préalable : la permission du département.

Prerequisites: Open to all students in Honours programs in the Department of Mathematics and Statistics. Permission of the program director is required. Applied mathematics students can enrol only after they have completed the core program in applied mathematics.

SC/MATH 4001 6.00 Real Analysis III. Complex-valued functions of a real variable, topology of metric spaces, Stone's Theorem, Inverse and Implicit Function Theorems, Lebesgue measure on the real line, Lebesgue integration, introduction to Hilbert Space, Fourier series, Fourier transform. Intended for Honours Mathematics students. Prerequisites: SC/MATH 3210 3.00 or both SC/MATH 3001 3.00 and SC/MATH 2310 3.00. Course credit exclusion: SC/MATH 4010 6.00 Prior to Fall 2009: Prerequisites: AS/SC/MATH 3210 3.00 or both AS/SC/MATH 3001 3.00 and AS/SC/MATH 2310 3.00. Course credit exclusion: AS/SC/MATH 4010 6.00

SC/MATH 4010 6.00 Real Analysis. Survey of the real and complex number systems, and inequalities. Metric space topology. The Riemann-Stieltjes integral. Some topics of advanced calculus, including more advanced theory of series and interchange of limit processes. Lebesgue measure and integration. Fourier series and Fourier integrals. Prerequisite: SC/MATH 3210 3.00 or permission of the course coordinator. Prior to Fall 2009: Prerequisite: AK/AS/SC/MATH 3210 3.00 or permission of the course coordinator. Course credit exclusion: GL/MATH 4240 6.00.

SC/MATH 4020 6.00 Algebra II. Continuation of Algebra I, with applications: groups (finitely generated Abelian groups, solvable groups, simplicity of alternating groups, group actions, Sylow's theorems, generators and relations); fields (splitting fields, finite fields, Galois theory, solvability of equations); additional topics (lattices, Boolean algebras, modules). Prerequisite: SC/MATH 3020 6.00 or permission of the course coordinator. Course credit exclusion: SC/MATH 4241 3.00. Prior to Fall 2009: Prerequisite: AK/AS/SC/MATH 3020 6.00 or permission of the course coordinator. Course credit exclusion: AS/SC/MATH 4241 3.00.

SC/MATH 4030 3.00 Probability Theory. Elementary measure theory, convergence of random variables, strong law of large numbers, convergence in distribution, stable laws, conditional expectation, martingales. Prerequisite: SC/MATH 2030 3.00. Prior to Fall 2009: Prerequisite: AK/AS/SC/MATH 2030 3.00.

SC/MATH 4033 3.00 Applications of Mixed Models. Theory and applications of mixed models and extensions: theoretical formulation, hierarchical models, generalized least-squares, empirical Bayes, shrinkage estimators, fitting algorithms, unbalanced nested structures, longitudinal analysis, non-linear models, categorical dependent variables. Prerequisites: SC/MATH 3033 3.00 or SC/MATH 3330 3.00 or permission of the course director. Prior to Fall 2009: Prerequisites: AK/AS/SC/MATH 3033 3.00 or AK/AS/SC/MATH 3330 3.00 or permission of the course director. Note: SAS and Splus computing environments will be used to facilitate course work.

SC/MATH 4034 3.00 Data Mining. This course will review some of the principal methods used for data mining, with the goal of placing them in common perspective and providing a unifying overview. Prerequisites: SC/MATH 3034 3.00 and SC/MATH 3430 3.00 or permission of the course

director. Corequisites: SC/MATH 4630 3.00 or SC/MATH 4730 3.00 or SC/MATH 4230 3.00. Prior to Fall 2009: Prerequisites: AK/AS/SC/MATH 3034 3.00 and AK/AS/SC/MATH 3430 3.00 or permission of the course director. Corequisites: AK/AS/SC/MATH 4630 3.00 or AK/AS/SC/MATH 4730 3.00 or AK/AS/SC/MATH 4230 3.00. Note: SAS and Splus computing environments will be used to facilitate course work.

SC/MATH 4080 6.00 Topology. Topological spaces, continuity, connectedness, compactness, nets, filters, metrization theorems, complete metric spaces, function spaces, fundamental group, covering spaces. Prerequisite: SC/MATH 3210 3.00 or permission of the course coordinator. Prior to Fall 2009: Prerequisite: AK/AS/SC/MATH 3210 3.00 or permission of the course coordinator.

SC/MATH 4090 3.00 Mathematical Modelling. Discrete, continuous and probabilistic modelling of problems from industry, finance and the life and physical sciences. The ability to model complex problems is stressed. Three lecture hours. One term. Three credits. Note: Registration required in an Honours Program in Mathematics and Statistics, and the completion of all specified core courses in that program.

GL/MATH 4100 6.00 Differential Equations. Students will work independently on a project under the supervision of a Course Director with the approval of the Chair of the Department.

SC/MATH 4100A 3.00 Topics in Mathematics Education: Theory and Practice. This course provides opportunities for students to examine topics in mathematics, and themes in mathematics education. The main focus will be on developing students' ability to unpack and communicate concepts in mathematics, and to think critically about what mathematicians do and what students do when they are learning mathematics. Prerequisites: A minimum of 21 credits in MATH courses without second digit "5"; permission of the course coordinator.

SC/MATH 4110N 3.00 Topics in Analysis: Ordinary Differential Equations. This course is an advanced introduction to a number of topics in ordinary differential equations. The topics are chosen from the following: existence and uniqueness theorems, qualitative theory, oscillation and comparison theory, stability theory, bifurcation, dynamical systems, boundary value problems, asymptotic methods. Note: Permission of the course coordinator required.

SC/MATH 4120 3.00 Gas and Fluid Dynamics. Fundamental laws; conservation of mass, momentum and energy; vortex motion; incompressible, compressible and viscous flows; turbulent flow; surface waves. Prerequisites: SC/PHYS 2010 3.00 or SC/EATS 2470 3.00; AS/SC/MATH 2015 3.00; AS/SC/MATH 2271 3.00. Prior to Fall 2009: Prerequisites: SC/PHYS 2010 3.00 or SC/EATS 2470 3.00; SC/MATH 2015 3.00; SC/MATH 2271 3.00.

Cross-listed to: SC/MATH 4120 3.00, SC/PHYS 4120 3.00

SC/MATH 4120A 3.00 Topics in Algebra: Advanced Linear Algebra. A selection of advanced theoretical and applied topics is proposed for study, from which choices are made at the beginning of the semester; there is sufficient flexibility to accommodate the common interests of the professor and the students. Prerequisite: SC/MATH 2022 3.00 or SC/MATH 2222 3.00. Prior to Fall 2009: Prerequisite: AK/AS/SC/MATH 2022 3.00 or AK/AS/SC/MATH 2222 3.00.

SC/MATH 4130 3.00 Topics in Probability and Statistics. One or two topics which may be chosen from the following: statistical decision theory, statistical inference, sequential analysis, information theory, large sample theory, design of experiments, stochastic processes, time series. Note: Permission of the course coordinator is required.

SC/MATH 4130A 3.00 Topics in Probability and Statistics. tba

SC/MATH 4130B 3.00 Topics in Probability and Statistics: Introduction to the Theory and Methods of Time Series Analysis. A systematic presentation of many statistical techniques for the analysis of time series data. The core topics include time dependence and randomness, trend, seasonality and error, stationary processes, ARMA and ARIMA processes, multivariate time series models and state-space models. Prerequisites: either SC/MATH 3033 3.00 or SC/MATH 3330

3.00; SC/MATH 3131 3.00; or permission of the course coordinator. Course credit exclusions: SC/CSE 3451 4.00, SC/EATS 4020 3.00, SC/MATH 4830 3.00, SC/MATH 4930C 3.00, SC/PHYS 4060 3.00, SC/PHYS 4250 3.00. Prior to Fall 2009: Prerequisites: either AS/SC/MATH 3033 3.00 or AS/SC/MATH 3330 3.00; AK/AS/SC/MATH 3131 3.00; or permission of the course coordinator. SC/MATH 4130C 3.00 Topics in Probability and Statistics: Statistical Inference. Topics in Probability and Statistics: Statistical Inference.

SC/MATH 4130D 3.00 Topics in Probability and Statistics: Methods of Statistical Analysis. A survey of the theoretical basis and methods for analyzing data with emphasis on the application of the methods. Prerequisite: SC/MATH 3132 3.00. Prior to Fall 2009: Prerequisite: AK/AS/SC/MATH 3132 3.00.

SC/MATH 4130E 3.00 Topics in Probability and Statistics: Bayesian Statistics. The course first presents the Bayesian approach to single- and multi-parameter statistical problems and its links to major concepts of non-Bayesian statistics. The course then studies some hierarchical models and regression models using a Bayesian approach with theory and examples. Note: Permission of the course coordinator is required.

SC/MATH 4130G 3.00 Topics in Probability and Statistics: Applied Categorical Data Analysis. This course demonstrates the use of categorical data analysis techniques within the context of epidemiology, bioassay and survival analysis. The emphasis is on the analysis and interpretation of real world data sets using the SAS statistical software package. Prerequisite: SC/MATH 3330 3.00 or SC/MATH 3033 3.00. Prerequisite or corequisite: SC/MATH 3430 3.00. Prior to Fall 2009: Prerequisite: AK/AS/SC/MATH 3330 3.00 or AS/SC/MATH 3033 3.00. Prerequisite or corequisite: AK/AS/SC/MATH 3430 3.00.

SC/MATH 4130K 3.00 Topics in Probability and Statistics: Survival Analysis. This course provides students with an introduction to the statistical methods for analyzing censored data which are common in medical research, industrial life-testing and related fields. Topics include accelerated life models, proportional hazards model, time dependent covariates. Integrated with: GS/MATH 6641 3.00. Prerequisites: SC/MATH 3131 3.00; either SC/MATH 3033 3.00 or SC/MATH 3330 3.00. Prior to Fall 2009: Prerequisites: AK/AS/SC/MATH 3131 3.00; either AS/SC/MATH 3033 3.00 or AK/AS/SC/MATH 3330 3.00. Note: Computer/Internet use is essential for course work.

SC/MATH 4130N 3.00 Topics in Probability and Statistics: Multivariate Statistics. Topics in Probability and Statistics: Multivariate Statistics.

SC/MATH 4134 3.00 Biostatistics. This course provides students with an introduction to the statistical methods which are commonly used in medical research and epidemiology. Prerequisites: SC/MATH 3034 3.00 and SC/MATH 3131 3.00 or permission of the course director. Prior to Fall 2009: Prerequisites: AK/AS/SC/MATH 3034 3.00 and AK/AS/SC/MATH 3131 3.00 or permission of the course director. Note: SAS and Splus computing environments will be used to facilitate course work.

SC/MATH 4141 3.00 Advanced Numerical Methods. Numerical methods for solving ordinary differential equations; optimization problems: steepest descents, conjugate gradient methods; approximation theory: least squares, orthogonal polynomials, Chebyshev and Fourier approximation, Padé approximation. Prerequisite: SC/MATH 2270 3.00; SC/MATH 3242 3.00 or SC/CSE 3122 3.00. Prior to Fall 2009: Prerequisite: AK/AS/SC/MATH 2270 3.00; AS/SC/MATH 3242 3.00 or AK/AS/SC/CSE 3122 3.00, or AK/AS/SC/COSC 3122 3.00.

SC/MATH 4143 3.00 Scientific Computation for Finance Applications. This course covers the basics numerical analysis/computational methods related to portfolio optimization, risk management and option pricing. It provides background material for computations in finance for two streams in the Computational Mathematics program and other interested students. Prerequisites: One of SC/MATH 2015 3.00 or

SC/MATH 2310 3.00; SC/MATH 1131 3.00; SC/MATH 2030 3.00; One of SC/CSE 1530 3.00, SC/CSE 1540 3.00 or SC/MATH 2041 3.00. Prior to Fall 2009: Prerequisites: One of AK/AS/SC/MATH 2015 3.00 or AK/AS/SC/MATH 2310 3.00; AK/AS/SC/MATH 1131 3.00; AK/AS/SC/MATH 2030 3.00; One of AK/AS/SC/CSE 1530 3.00, AK/AS/SC/CSE 1540 3.00 (formerly COSC) or AK/AS/SC/MATH 2041 3.00.

SC/MATH 4150X 3.00 Topics in Geometry: Algebraic Curves. A self-contained introduction to algebraic geometry. Prerequisites: SC/AK/MATH 2022 3.00 or SC/AK/MATH 2222 3.00; six credits from 3000-level MATH courses without second digit 5; or permission of the course coordinator. Prior to Fall 2009: Prerequisites: AS/SC/AK/MATH 2022 3.00 or AS/SC/AK/MATH 2222 3.00; six credits from 3000-level MATH courses without second digit 5; or permission of the course coordinator.

SC/MATH 4160 3.00 Combinatorial Mathematics. Topics from algebra of sets, permutations, combinations, occupancy problems, partitions of integers, generating functions, combinatorial identities, recurrence relations, inclusion-exclusion principle, Polya's theory of counting, permanents, systems of distinct representatives, Latin rectangles, block designs, finite projective planes, Steiner triple systems. Prerequisites: SC/MATH 2022 3.00 or SC/MATH 2222 3.00; six credits from 3000-level mathematics courses without second digit 5; or permission of the course coordinator. Prior to Fall 2009: Prerequisites: AK/AS/SC/MATH 2022 3.00 or AK/AS/SC/MATH 2222 3.00; six credits from 3000-level mathematics courses without second digit 5; or permission of the course coordinator.

SC/MATH 4161 3.00 Mathematics of Cryptography. Probability, information theory and number theory and applications to cryptography. Classical codes such as Caesar shift, Vigenere, ADFGVX, rectangular substitution, and others. Other topics: comma free codes, perfect secrecy, index of coincidence, public key systems, primality testing and factorization algorithms. Prerequisites: At least 12 credits from 2000-level (or higher) MATH courses (without second digit 5, or second digit 7); or SC/CSE 3101 3.00 or permission of the instructor. Prior to Fall 2007: Prerequisites: At least 12 credits from 2000-level (or higher) MATH courses (without second digit 5, or second digit 7 in the case of Atkinson); or AK/AS/SC/CSE 3101 3.00 or AK/AS/SC/COSC 3101 3.00; or permission of the instructor.

Cross-listed to: SC/CSE 4161 3.00, SC/MATH 4161 3.00

SC/MATH 4170 6.00 Operations Research II. Selected topics from game theory, decision theory, simulation, reliability theory, queuing theory, non-linear programming, classification, pattern-recognition and prediction. Each chapter contains an optimization problem and methods and algorithms for solving it. The course is rich in examples. Prerequisites: SC/MATH 2010 3.00 or SC/MATH 2015 3.00 or SC/MATH 2310 3.00; SC/MATH 2030 3.00; SC/MATH 3170 6.00; or permission of the course coordinator. Course credit exclusion: AS/MATH 4570 6.00. Prior to Fall 2009: Prerequisites: AS/SC/MATH 2010 3.00 or AS/SC/MATH 2015 3.00 or AK/AS/SC/MATH 2310 3.00; AK/AS/SC/MATH 2030 3.00; AK/AS/SC/MATH 3170 6.00; or permission of the course coordinator. Course credit exclusion: AS/MATH 4570 6.00.

SC/MATH 4210 3.00 Complex Analysis. Rigorous development of the basic results, including the complex derivative, contour integrals, Cauchy integral formulas, Taylor and Laurent series representations of analytic functions, calculus of residues, maximum modulus theorem, Rouché's theorem, open mapping theorem. More advanced topics if time permits. Prerequisite: SC/MATH 3210 3.00. Prior to Fall 2009: Prerequisite: AK/AS/SC/MATH 3210 3.00. Course credit exclusion: GL/MATH 4230 3.00.

SC/MATH 4230 3.00 Non-Parametric Methods in Statistics. Order statistics; general rank statistics; one-sample, two-sample and k-sample problems; Kolmogorov-Smirnov statistics; tests of independence and relative efficiencies. Prerequisite: SC/MATH 3131 3.00; SC/MATH 3132 3.00 is recommended but not required. Prior to Fall 2009: Prerequisite: AK/AS/SC/MATH 3131 3.00; AK/AS/SC/MATH 3132 3.00 is recommended but not required.

GL/MATH 4230 6.00 Analyse Complexe. La topologie du plan complexe. Introduction aux fonctions holomorphes; applications conformes et applications linéaires fractionnelles. L'intégration complexe,

la formule intégrale de Cauchy. La théorie des résidus. Les propriétés locales des fonctions holomorphes; les fonctions harmoniques. Prolongement analytique; le théorème de Riemann. Condition préalable : GL/MATH 1930 3.00 et GL/MATH 1940 3.00; GL/MATH 2670 6.00 ou la permission du département. Cours incompatible : SC/MATH 3410 3.00.

Language of Instruction: French

SC/MATH 4231 3.00 Robust Statistics. This course provides students with an introduction to robust statistics. Basic robustness concepts and robust estimators will be covered. Prerequisites: SC/MATH 3131 3.00, either SC/MATH 3033 3.00 or SC/MATH 3303 3.00 or permission of the course director. Prior to Fall 2009: Prerequisites: AK/AS/SC/MATH 3131 3.00, either AK/AS/SC/MATH 3033 3.00 or AK/AS/SC/MATH 3303 3.00 or permission of the course director. Note: SAS and Splus computing environments will be used to facilitate course work.

GL/MATH 4240 6.00 Analyse réelle. Ce cours est une étude rigoureuse de l'analyse réelle. Parmi les sujets traités figureront: les notions de base de topologie; limite et continuité, fonctions à variations bornées, l'intégrale de Riemann-Stieltjes, les suites et séries de fonctions, l'intégrale de Lebesgue; et éventuellement des séries de Fourier. Condition préalable : GL/MATH 2670 6.00 ou la permission du département. Cours incompatible : ASC/MATH 4010 6.00.

Language of Instruction: French

SC/MATH 4241 3.00 Applied Group Theory. Introduction to group theory and its applications in the physical sciences. Finite groups. Compact Lie groups. Representation theory, tensor representations of classical Lie groups, classification of semi-simple Lie groups. Prerequisites: SC/MATH 2015 3.00; SC/MATH 2022 3.00 or SC/MATH 2222 3.00; SC/MATH 2270 3.00. Course credit exclusion: SC/MATH 4020 6.00. Prior to Fall 2009: Prerequisites: AS/SC/MATH 2015 3.00; AK/AS/SC/MATH 2022 3.00 or AK/AS/SC/MATH 2222 3.00; AK/AS/SC/MATH 2270 3.00. Course credit exclusion: AK/AS/SC/MATH 4020 6.00.

SC/MATH 4250 6.00 Differential Geometry. Curves and surfaces in 3-space, tangent vectors, normal vectors, curvature, introduction to topology, manifolds, tangent spaces, multilinear algebra and tensors. Prerequisites: SC/MATH 3010 3.00; SC/MATH 2022 3.00 or SC/MATH 2222 3.00; or permission of the course coordinator. Course credit exclusion: SC/MATH 3450 3.00. Prior to Fall 2009: Prerequisites: AK/AS/SC/MATH 3010 3.00; AK/AS/SC/MATH 2022 3.00 or AK/AS/SC/MATH 2222 3.00; or permission of the course coordinator. Course credit exclusion: AS/SC/MATH 3450 3.00.

SC/MATH 4270 3.00 Integral Transforms and Equations. This course studies the Laplace, Fourier, Hankel and Mellin transforms; the solution of integral equations; and the treatment of asymptotic expansions. The applications are to problems in circuit theory, heat flow, elasticity, transport theory and scattering theory. Prerequisites: SC/MATH 2270 3.00; SC/MATH 3410 3.00. Prerequisite or corequisite: SC/MATH 3271 3.00. Prior to Fall 2009: Prerequisites: AK/AS/SC/MATH 2270 3.00; AK/AS/SC/MATH 3410 3.00. Prerequisite or corequisite: AS/SC/MATH 3271 3.00.

SC/MATH 4271 3.00 Dynamical Systems. Iterations of maps and differential equations; phase portraits, flows; fixed points, periodic solutions and homoclinic orbits; stability, attraction, repulsion; Poincaré maps, transition to chaos. Applications: logistic maps, interacting populations, reaction kinetics, forced Van der Pol, damped Duffing and Lorenz equations. Prerequisites: SC/MATH 2270 3.00; SC/MATH 1021 3.00 or SC/MATH 2221 3.00 or SC/MATH 1025 3.00. Prior to Fall 2009: Prerequisites: AK/AS/SC/MATH 2270 3.00; AK/AS/SC/MATH 1021 3.00 or AK/AS/SC/MATH 2221 3.00 or AS/SC/MATH 1025 3.00.

SC/MATH 4280 3.00 Risk Theory. Frequency and severity models in insurance, compound distributions, compound Poisson processes, ruin theory, non-proportional reinsurance, related topics in loss models and stochastic processes. Prerequisite: SC/MATH 2131 3.00. Prior to Fall 2009: Prerequisite: AK/AS/SC/MATH 2131 3.00.

SC/MATH 4290 3.00 Mathematical Logic. Predicate logic, rules of inference, elimination of quantifiers, Tarski semantics, Gödel's completeness, compactness and incompleteness theorems. Ultrapowers.

Non-standard analysis. Prerequisite: SC/MATH 3020 6.00 or SC/MATH 3190 3.00 or SC/MATH 3210 3.00 or permission of the instructor; SC/MATH 1090 3.00 or SC/MATH 1190 3.00 is recommended. Prior to Fall 2009: Prerequisite: AK/AS/SC/MATH 3020 6.00 or AK/AS/SC/MATH 3190 3.00 or AK/AS/SC/MATH 3210 3.00 or permission of the instructor; AK/AS/SC/MATH 1090 3.00 or AK/AS/SC/MATH 1190 3.00 is recommended.

SC/MATH 4300 3.00 Directed Readings. A student may arrange to do independent study with a member of the Mathematics and Statistics Department. Such an arrangement must have prior approval of the department Chair. One term. Three credits.

SC/MATH 4300 6.00 Directed Readings. A student may arrange to do independent study with a member of the Mathematics and Statistics Department. Such an arrangement must have prior approval of the department Chair. Two terms. Six credits.

SC/MATH 4400 6.00 The History of Mathematics. Selected topics in the history of mathematics, discussed in full technical detail but with stress on the underlying ideas, their evolution and their context. Note: 36 credits required from mathematics courses without second digit 5, including at least 12 credits at or above the 3000 level. (12 of the 36 credits may be taken as corequisites.)

SC/MATH 4430 3.00 Stochastic Processes. Basic Markov processes, including Markov chains, Poisson processes, birth-and-death processes, Brownian motion. Prerequisite: SC/MATH 2030 3.00. Prior to Fall 2009: Prerequisite: AK/AS/SC/MATH 2030 3.00. Corequisite: A mathematics course at the 3000 level or higher, without second digit 5.

SC/MATH 4431 3.00 Probability Models. This course introduces the theory and applications of several kinds of probabilistic models, including renewal theory, branching processes and martingales. Additional topics may include stationary processes, large deviations or models from the sciences. Prerequisite: SC/MATH 2030 3.00. Prior to Fall 2009: Prerequisite: AK/AS/SC/MATH 2030 3.00. Corequisite: A mathematics course at the 3000 level or higher, without second digit 5.

SC/MATH 4570 6.00 Applied Optimization. Topics chosen from decision theory, game theory, inventory control, Markov chains, dynamic programming, queueing theory, reliability theory, simulation, non-linear programming. Prerequisites: SC/MATH 1550 6.00 and SC/MATH 2560 3.00 and SC/MATH 3170 6.00. Course credit exclusion: SC/MATH 4170 6.00. Prior to Fall 2009: Prerequisites: AK/AS/MATH 1550 6.00 and AK/AS/SC/MATH 2560 3.00 and AK/AS/SC/MATH 3170 6.00. Course credit exclusion: AS/SC/MATH 4170 6.00.

SC/MATH 4585 3.00 Quantitative Methods in Biology. Practical applications of advanced statistics used in biological research, including analysis of variance, regression, and multivariate statistics. Three lecture hours, three laboratory hours every other week. One term. Three credits. Prerequisites: SC/BIOL 2060 3.00, or equivalent with permission of the instructor. Course credit exclusion: AP/ADMS 3330 3.00; HH/PSYC 3030 6.00; AP/POL 3300 6.00. NCR Note: Not open to any student who has taken or is taking AK/AS/SC/MATH 2131 3.00 or any other MATH course with a third digit 3 at the 3000 level or higher. Prior to Fall 2009: Prerequisites: SC/BIOL 2060 3.00, or equivalent with permission of the instructor. Course credit exclusion: AK/MATH 2730 3.00; HH/PSYC 3030 6.00; AS/POL 3300 6.00. SC/MATH 4730 3.00 Experimental Design. An examination of the statistical issues involved in ensuring that an experiment yields relevant information. Topics include randomized block, factorial, fractional factorial, nested, Latin square and related designs. Further topics as time permits. The emphasis is on applications. Prerequisite: SC/MATH 3033 3.00, or SC/MATH 3330 3.00, or permission of the course coordinator. Prior to Fall 2009: Prerequisite: AS/SC/MATH 3033 3.00, or AK/AS/SC/MATH 3330 3.00, or permission of the course coordinator.

SC/MATH 4731 3.00 Sampling: Design and Analysis. Topics include: sampling weights and design effects in complex surveys; imputation and weighting methods for nonresponse; variance estimation in complex surveys; effects of complex sampling design on categorical data analysis and on regression analysis. Prerequisites: SC/MATH 3430 3.00 or permission of the course director. Prior to Fall 2009: Prerequisites: AS/SC/AK/MATH 3430 3.00 or permission of the course director. Note: SAS and Splus computing environments will be used to facilitate course work.

SC/MATH 4830 3.00 Time Series and Spectral Analysis. Treatment of discrete sampled data involving correlation, convolution, spectral density estimation, frequency, domain filtering, and Fast Fourier Transforms. Three lecture hours. One term. Three credits. Prerequisites: SC/CSE 1540 3.00 or equivalent programming experience; SC/MATH 2015 3.00; SC/MATH 2271 3.00. Course credit exclusions: SC/CSE 3451 4.00, SC/CSE 3451 3.00, SC/MATH 4130B 3.00, SC/MATH 4930C 3.00. SC/MATH 4930A 3.00 Topics in Applied Statistics: Statistical Quality Control. This course provides a comprehensive coverage of the modern practice of statistical quality control from basic principles to state-of-the-art concepts and applications. Prerequisite: SC/MATH 3330 3.00 or SC/MATH 3033 3.00. Corequisite: SC/MATH 4730 3.00. Prior to Fall 2009: Prerequisite: AK/AS/SC/MATH 3330 3.00 or AK/AS/SC/MATH 3033 3.00. Corequisite: AS/SC/MATH 4730 3.00.

SC/MATH 4930B 3.00 Topics in Applied Statistics: Simulation and the Monte Carlo Method. Introduction to systems, models, simulation and Monte Carlo methods. Random number generation. Random variate generation. Monte Carlo integration and variance reduction techniques. Applications to queuing systems and networks. Prerequisite: SC/MATH 3330 3.00 or SC/MATH 3033 3.00. Course credit exclusion: SC/CSE 3408 3.00. Prior to Fall 2009: Prerequisite: AK/AS/SC/MATH 3330 3.00 or AS/SC/MATH 3033 3.00. Course credit exclusion: AK/AS/SC/CSE 3408 3.00 (formerly COSC).

SC/MATH 4930C 3.00 Topics in Applied Statistics: Forecasting and Time Series. Introduction to the needs and uses of forecasting. The components of a time series. Forecasting time series using smoothing methods; using trend projection; using classical decomposition; using regression models. Autoregressive/moving average (ARMA) time series methods. Box-Jenkins methodology. Prerequisites: SC/MATH 3033 3.00 or SC/MATH 3330 3.00. Course credit exclusions: SC/EATS 4020 3.00, SC/MATH 4130B 3.00, SC/MATH 4830 3.00, SC/PHYS 4060 3.00. Modes of Reasoning/Logique – Glendon, Liberal Arts and Professional Studies

Glendon

Students should consult:

- The Glendon mathematics departmental mini-calendar (329 York Hall, Tel.: 416-487-6731 for a complete list of modes of reasoning courses offered by the Mathematics Department.

- The Glendon philosophy departmental mini-calendar (C221 York Hall, Tel.: 416-487-6733 for a complete list of modes of reasoning courses offered by the Philosophy Department. Modes of reasoning courses which have 17 as the first two numbers, e.g. GL/MODR 1710 6.00 are offered by the Philosophy Department.

Les étudiant(e)s doivent consulter le mini-annuaire du :

- Département de mathématiques (Pavillon York, 329, tél. : 416-487-6731) pour une liste complète des cours de logique offerts par le Département de mathématiques.
- Département de philosophie (Pavillon York, C221, tél. : 416-487-6733) pour une liste complète des cours de logique offerts par le Département de philosophie. Les cours de logique commençant par les chiffres 17, par ex : GL/MODR 1710 6.00 sont offerts par le Département de philosophie.

Note: Courses whose numbers have 1 or 2 as the first digit are open to first-year students.

N.B. : Les cours dont le numéro commence par le chiffre 1 ou 2 sont ouverts aux étudiants de première année.

Note: Only one in the GL/MODR 17XX 6.00 series may be taken for credit.

Note: AP/MODR 1000-level courses are part of Liberal Arts and Professional Studies' general education requirement. General education courses do not fulfill elective or major requirements.

The overall purpose of all modes of reasoning courses is to enable students to develop critical skills applicable to the analysis of texts, to arguments encountered in every day situations, and to concrete problems. The first half of every course will be devoted to learning analytical techniques. Use and misuse of language will be examined. Conceptual, factual and evaluative issues will be distinguished. The basic forms of reasoning, their uses and limits will be analyzed. Fallacies which are frequently found in ordinary discussion, academic texts, mass media, advertising etc. will be carefully studied. The avoidance of these fallacies and learning techniques of conceptual analysis will be a major concern of this half. The aim is to help students to reason correctly and to express themselves clearly and precisely in verbal and written form. The second half of each course will be concerned with putting into practice the techniques learned from the first half. Students will be given ample opportunity to apply their critical skills on concrete materials and practical issues. For this purpose different modes courses use examples drawn from different areas. The following courses reflect the difference in focus in the second half.

Note: students are advised before registering in a course to consult the detailed course outlines on the Internet. This is particularly important whenever two or more sections of a course are being offered in any particular session as important differences of emphasis may exist relating both to content and methodology.

Courses in Modes of Reasoning/Cours en logique

GL/MODR 1610 3.00 Introduction to Statistical Methods I. This course covers the elements of probability theory and standard probability distributions, the measures and techniques used in descriptive statistics,

principles of sampling and tests of significance. Prerequisite: OAC or Grade 12 mathematics. Course credit exclusions: SC/MATH 1131 3.00, SC/MATH 2560 3.00.

AP/MODR 1710 6.00 Reasoning About Women and Sexism. Note: Not open to students who have taken AK/MODR 1700A 6.00. Course credit exclusions: None. Note: Successful completion of this course fulfills General Education requirements in the Faculty of Liberal Arts & Professional Studies. Prior TO FALL 2009: Course credit exclusion: AK/MODR 1710 6.00.

GL/MODR 1711 6.00 Critical Thinking. An introduction to reasoning in the humanities. The focus is the presentation of issues and arguments in major texts and articles. The aim of the course is to develop the student's ability to read, write and think critically. Note: Only one in the MODR 17xx 6.00 series may be taken for credit.

GL/MODR 1714 6.00 Thinking and Writing Critically. This course focuses on the presentation and evaluation of arguments in natural language. Formal techniques are used where appropriate. Note: Only one in the MODR 17xx 6.00 series may be taken for credit.

GL/MODR 1716 6.00 Logique formelle et informelle. Le cours a pour but de faire connaître à l'étudiant les moyens de distinguer les bons raisonnements des mauvais. Un texte élémentaire de logique sera utilisé comme livre de référence. Le cours poursuivra aussi une étude détaillée de textes choisis. Note: Only one in the MODR 17xx 6.00 series may be taken for credit.

GL/MODR 1717 6.00 Critical Thinking in Medical Ethics: The Problem of Cloning. The aim of this course is to develop skills in critical thinking through the study of elementary logic and argument analysis, and to use these skills to explore some of the most significant and pressing issues in medical ethics. Of the topics in medical ethics covered, the main focus will be on the ethical and scientific aspects of human cloning. Course credit exclusions: GL/MODR 1701 6.00(EN) Fall/Winter 2002-2003. Note: Only one in the MODR 17xx 6.00 series may be taken for credit.

AP/MODR 1730 6.00 Reasoning About Social Issues. The particular focus of this course is on the mass media concerning social issues, different positions taken on issues such as abortion, euthanasia, pornography, immigration etc. Typical examples are to be analyzed. Course credit exclusions: None. Note: Successful completion of this course fulfills General Education requirements in the Faculty of Liberal Arts & Professional Studies. Prior TO FALL 2009: Course credit exclusion: AK/MODR 1730 6.00.

AP/MODR 1760 6.00 Reasoning About Morality and Values. This course uses examples drawn from areas of thought where value judgments are made. Different sections will stress different topics in ethics, aesthetics, religion or law. Course credit exclusions: None. Note: Successful completion of this course fulfills General Education requirements in the Faculty of Liberal Arts & Professional Studies. Prior TO FALL 2009: Course credit exclusion: AK/MODR 1760 6.00.

AP/MODR 1770 6.00 Techniques of Persuasion. This course takes examples from the various modes of persuasion including advertising, propaganda and political argument. Course credit exclusions: None. Note: Successful completion of this course fulfills General Education requirements in the Faculty of Liberal Arts & Professional Studies. Prior TO FALL 2009: Course credit exclusion: AK/MODR 1770 6.00.

GL/MODR 1925 3.00 The Elements of Logic for Computer Science. This course introduces the fundamental elements of formal logic and its applications in computer science. The subjects covered include: propositional logic, reasoning, automatic deduction, resolution, logic circuits, predicate logic, applications in programming logic. Course credit exclusions: GL/COSC/MODR 2900 6.00.

The mandate of our students and faculty is to make and share music and to acquire, develop and disseminate musical knowledge. We understand musical study as interacting with nearly all studies pursued in the University — those of the humanities and the other fine arts, the social and natural sciences and the professions. From its inception, the Music Department has emphasized the study and performance of contemporary music in all its diversity, while bringing to bear a wide range of historical and social perspectives on the music of other times and places.

Students who major in music may pursue the BA, the Honours BA or Honours BFA degree. These degree options address both academic and practical concerns, combining the knowledge and skills needed for professional work in music with experience that will stimulate lifelong musical and personal growth. Undergraduate studies include courses in performance, composition, music history and ethnology, theory and pedagogy, with the emphasis largely depending on the student's own interests and abilities. Many of these courses are open to non-majors, with opportunities for participation in various performances and musical events on and off campus organized by members of the department.

Both the Honours BA and Honours BFA degree programs comprise a total of 120 credits and may be completed in four years of full-time study or over a longer period of part-time study. The major program in Music may be combined with a second major in the Faculty of Liberal Arts and Professional Studies, or with a minor in the Faculties of Environmental Studies, Fine Arts, Liberal Arts and Professional Studies or Science and Engineering. A five-year program leading to two degrees (the Honours BA or Honours BFA in music and the bachelor of education degree) is also available. All students begin their studies in the Honours program (120 credits), but may elect at the end of their first year of study to go into the BA program (90 credits). Completion of these degrees form a strong basis for further studies in fields such as music therapy, arts administration and management, music journalism, music marketing, cultural tourism, community arts and cultural management. For students interested in teaching at the primary, junior and intermediate levels, a BA and a BEd can be completed in four years, rather than five, as currently with the Honours BA or BFA.

Admission to the department is by audition. Further information on audition evaluations, admissions, degree requirements and Faculty of Fine Arts regulations may be found in the Faculty of Fine Arts section.

In the area of performance, a qualified student may select one or more courses including chamber ensembles in Western art music (piano, percussion, brass, winds, strings, voice, guitar), jazz, world music ensembles and contemporary music. Each course entails ensemble workshops, study of the history and literature of the instruments, and attention to individual problems of performance. Performance experience in large ensembles is provided by the choir, jazz orchestra, jazz choir, wind symphony and world music chorus.

In the area of composition, instruction is given in the skills of writing scores, arranging and orchestration. In addition, fully equipped digital and MIDI studios provide facilities for learning all phases of the composition and production of music.

In the area of musical research (music history, area studies and ethnomusicology), the aim is to integrate musicianship with the history, theory and anthropology of music. Intensive study may be pursued in the musics of Asia, Africa and the Americas as well as of Europe, past and present.

All music majors complete a sequence of foundational courses which equips them with essential concepts and practical skills in ear-training, sight-singing, rhythm, theory and awareness of the social, cultural and historical contexts of music. These requirements include FA/MUSI 1000 6.00, FA/MUSI 1200 9.00, FA/MUSI 2200 6.00, FA/MUSI 2201 3.00 and FA/MUSI 2202 3.00. A student may be exempted from one or more of these courses by passing proficiency exams. Students who do not maintain enrolment in the foundation courses scheduled for their first and

second years may not be enrolled in performance and/or composition courses. These foundation courses are prerequisites for all the department's upper-level offerings for majors, and both full and part-time students must complete them within their first 60 credits. All Honours music majors must complete 30 upper-level music credits (at or above the 3000 level), including at least 18 credits in studies courses for the Honours BA degree, and at least 12 credits in studies courses and at least 12 credits in studio courses for the Honours BFA degree. (See the lists of courses below.)

In addition to courses in music, the bachelor's, Honours BA and Honours BFA degrees require 18 general education credits, and 12 credits from other departments in fine arts.

Note: Some courses involve additional ancillary fees. Consult the department's supplementary calendar for details.

Standard Chinese jianpu notation will be used. Open to non-majors. Prerequisite: FA/MUSI 3099Z 6.00 or permission of the instructor.

FA/MUSI 4110 6.00 Composition Studio IV. Offers a continuation of FA/MUSI 3110 6.00. Advanced work in composition, analysis and current music-theoretic ideas of relevance to the composer. Prerequisites: FA/MUSI 3110 6.00 and permission of the course director. Prior or concurrent courses in the theory and literature of 20th-century music, such as FA/MUSI 3310 6.00 or FA/MUSI 4300 3.00 are strongly recommended.

FA/MUSI 4140 6.00 Composing for Film. Offers advanced composition studies involving the creation of recorded soundtracks for motion picture (formats will vary depending on project - i.e. film, video, DV, Internet, Multimedia Applications, Mini-DV, Firewire Port, Random Access, Final Cut Pro, Quicktime etc.). During the course, students will complete several composition projects and sync them to picture. Prerequisite: Permission of the course director.

FA/MUSI 4150 6.00 Digital Recording, Editing and Composition. Deals with digital composition techniques. Included are topics such as: hard disk recording, destructive and non-destructive editing, non-linear editing, digital signal processing, digital audio sampling, multipass processing, processor smoothing, effects portamento, sample looping, cross-fading and other additional rubrics. Prerequisites: Foundation courses and permission of the course director.

FA/MUSI 4151 6.00 Computer Music. Surveys the world of computer music and its growing influence on musicians with respect to composition, recording, film music, notation, sampling, teaching, performance practice,

theory, sound design, and other creative options. Prerequisite: FA/MUSI 1000 6.00, FA/MUSI 1200 9.00, FA/MUSI 2200 6.00, FA/MUSI 2201 3.00, FA/MUSI 2002 3.00 or permission of department. Open to non-majors.

FA/MUSI 4200 3.00 Topics in Advanced Theory and Analysis. Offers a seminar in contemporary musical analysis emphasizing the comprehensive investigation of complete musical works. Drawing on such perspectives as set theory or Schenkerian reduction, the course introduces the student to research problems in theory and analysis from various perspectives. Prerequisite: A minimum grade of B in a 3000-level theory course.

FA/MUSI 4300A 3.00 Studies in Contemporary Music. Provides analytical and historical studies of the theory and development of contemporary music, with emphasis on the latter half of the twentieth century. Prerequisites: FA/MUSI 3310 6.00, or permission of the course director.

FA/MUSI 4320 3.00 Honours Seminar. Explores how Researchers are motivated by problems which reflect basic issues in intellectual history, humanities, science and social science. In this course, pilot projects introduce the broad range of research tools which several centuries of theory and academic scholarship have made available to musical study. Prerequisite: A minimum grade of B in an upper-level studies course.

FA/MUSI 4370 3.00 Music of Canada. Explores how Canadians tend to be sharply aware of the derivative aspects of their culture; yet the physiognomy of Canadian music taken as a whole is unique. This course studies selected aspects of Canadian musical achievements which offer perspectives on our national situation. Prerequisite: FA/MUSI 3350 6.00, or FA/MUSI 3310 6.00, or permission of the course director.

FA/MUSI 4399 3.00 Special Topics in the Graduate Program. Fourth-year undergraduates who have the necessary background may apply to take certain courses offered in the graduate program. Prerequisites: Permission of both the graduate program director and the course director; a minimum grade of B+ in an upper-level studies course.

FA/MUSI 4530 3.00 Issues in Popular Music Studies. Examines key problem areas in the study of contemporary popular music. In particular, the relationship between culture contact and musical style, the aesthetics of authenticity, and the relationship between corporate culture and popular music are studied in detail. Prerequisites: A/MUSI 1000 6.00, FA/MUSI 1200 9.00, FA/MUSI 2201 3.00, FA/MUSI 2202 3.00, FA/MUSI 2200 6.00

FA/MUSI 4556 3.00 Gospel Choir. Explores gospel choral music repertoire and performance techniques. Prerequisites: Permission of the course director, by audition.

FA/MUSI 4590 3.00 Honours Project in Music. Offers a special project option open to fourth-year students who have shown an exceptional ability to study independently and who have designed a course that cannot be accommodated elsewhere in the department's offerings. At the end of the year, the student's work is evaluated on the basis of one or more of the following: a recital, composition, research paper, or lecture-recital. Note: See departmental calendar for specific requirements. Prerequisite: Permission of the curriculum committee.

Faculty of Science and Engineering Courses in Natural Science

The natural science courses are designed, as part of the general education program, to acquaint those students not intending to be professionally concerned with science with the outlook, methods and some of the achievements of science. The individual courses offered approach this objective by selecting a particular area, problem or aspect of science in which the operations of the scientific enterprise can be studied in some detail. In an increasingly technologically-oriented world, it is very important that all students have some familiarity with science to enable them to make more information choices and decisions that relate to themselves and society as a whole.

The courses may be broadly classified into four areas, within which and between some overlap occurs, resulting in course credit exclusions as noted. However, in certain circumstances, such exclusions are petitionable. Courses may have laboratory or tutorial sessions associated with them. The four categories are as follows:

- History and philosophy of science and technology: SC/NATS 1700 6.00, SC/NATS 1730 6.00, SC/NATS 1745 6.00, SC/NATS 1760 6.00, SC/NATS 1775 6.00, SC/NATS 1850 6.00;
- Biological science: SC/NATS 1610 6.00, SC/NATS 1650 6.00, SC/NATS 1660 6.00, SC/NATS 1670 6.00, SC/NATS 1675 6.00, SC/NATS 1680 6.00, SC/NATS 1690 6.00, SC/NATS 1850 6.00;
- Environmental science: SC/NATS 1840 6.00;
- Physical science: SC/NATS 1720 6.00, SC/NATS 1740 6.00, SC/NATS 1750 6.00, SC/NATS 1780 6.00, SC/NATS 1790 6.00, SC/NATS 1810 6.00, SC/NATS 1820 6.00, SC/NATS 1870 6.00, SC/NATS 1880 6.00, SC/NATS 1910 6.00.

The natural science courses are intended primarily for non-science majors. Courses in biology, chemistry, earth and atmospheric science, physics and astronomy and other science disciplines are described elsewhere in this section of the Undergraduate Calendar. Those courses are available, subject to prerequisites, as electives to students in the Faculties of Fine Arts and Liberal Arts and Professional Studies. Six credits from 1000-level courses offered by the departments of Biology, Chemistry, Earth and Atmospheric Science, Physics and Astronomy, will satisfy the Faculty of Liberal Arts and Professional Studies natural science general education requirement.

Grading procedure. Grades will be assigned in the manner described by the Faculty of Science and Engineering in the Faculty of Science and Engineering Regulations Governing Examinations and Academic Standards section of this publication.

Courses in Natural Science/Cours en sciences naturelles

SC/NATS 1500 3.00 Statistics and Reasoning in Modern Society.

Statistical reasoning is crucial for a critical understanding of the flood of information we face daily in modern society. This course examines the principles of statistical reasoning with an emphasis on applications to everyday decisions and turning information into understanding. Course credit exclusion: SC/MATH 1532 3.00. NCR Note: Not open to students who have passed or are taking AK/AS/SC MATH 2560 3.00, or who have received advanced standing for the equivalent.

GL/NATS 1500 6.00 Nutrition, santé et société. Une étude de la façon dont notre corps absorbe et utilise nos aliments. Une perspective scientifique permet de comprendre le rôle des éléments nutritifs et leur interaction dans la croissance, la régénération et le règlement des fonctions vitales.

Language of Instruction: French

SC/NATS 1510 3.00 The History of the Environment.

How the Earth's environment came to be what it is now. From the formation of the Earth through all stages of human civilization, this course traces the factors that have given the planet the environment that we live in today. Course credit exclusion: SC/NATS 1840 6.00.

SC/NATS 1520 3.00 The Science and Technology of Music.

The course examines the science of music (human voice, ear, brain; sound waves; musical instruments) and its technological aspects from the Neolithic to today, touching upon the construction of instruments and their sound, electronic amplification and manipulation, music production, broadcasting and recording. Course credit exclusion: SC/NATS 1720 6.00

GL/NATS 1540 6.00 Introductory Biology.

This course is an introduction to the diversity of life. It is designed for non-science majors. To develop an understanding of the many ways living organisms are related, disciplines such as genetics, cell biology, evolutionary biology and ecology will be used.

GL/NATS 1540 6.00 Principes de biologie.

Ce cours se veut une introduction à la diversité du monde vivant. Il est conçu pour les étudiants en arts libéraux. Pour bien comprendre les multiples relations entre les organismes vivants, la génétique, la biologie cellulaire, la biologie évolutive et l'écologie seront utilisées.

Language of Instruction: French

GL/NATS 1600 6.00 Science of Flight. This course presents basic physical principles by studying various aspects of aircraft and flying. Topics include properties of air as a fluid, aero-engines, basic theory of flight, principles of aircraft instruments and navigation, and processes which influence the weather. Prerequisite: GL/CDNS 1600 3.00(EN), GL/NATS 1600 3.00(EN), and GL/NATS 1740 3.00(EN).

Cross-listed to: GL/CDNS 1600 6.00, GL/NATS 1600 6.00

GL/NATS 1605 6.00 Communication, Health and Environment. This course connects the three areas of communication, health and environment by exploring the interrelationships between human health and the health of natural and socio-economic environments. It also addresses the influence of mass communication in relation to public policy pertaining to human and ecosystem health. Throughout the course, the sustainability concept is used as a guiding principle.

Cross-listed to: GL/NATS 1605 6.00, GL/SOSC 1605 6.00

SC/NATS 1610 6.00 The Living Body. Some aspects of human biology, including structure and function, reproduction, physiology, genetics and a study of some human diseases. Laboratories are self-paced, scheduled audio-tutorials involving demonstrations, experiments and observations. Three lecture hours, one laboratory hour. Two terms. Six credits. Course credit exclusions: SC/NATS 1650 6.00, SC/NATS 1660 6.00, SC/NATS 1675 6.00, SC/NATS 1690 6.00, AK/NATS 1820 6.00. NCR Note: This course is not open to any student who has passed or is taking SC/BIOL 1010 6.00.

SC/NATS 1650 6.00 Human Anatomy for the Fine Arts. An introductory course on the structure and function of the human body specifically oriented towards the needs of students in Fine Arts. Body systems are studied from anatomical, physiological and biomechanical perspectives. Included as well are on-going references to nutrition, athletic injuries, and health and wellness. Two lecture hours, two laboratory hours. Two terms. Six credits. Course credit exclusions: AS/SC/KINE 2031 3.00, HH/KINE 2031 3.00, SC/NATS 1610 6.00, SC/NATS 1660 6.00, SC/NATS 1690 6.00, AK/NATS 1820 6.00. NCR Note: Not open to students enrolled in the Kinesiology program. This course is not open to any student who has passed or is taking SC/BIOL 1010 6.00

SC/NATS 1660 6.00 The Biology of Sex. This course investigates the role of sexual reproduction in the living world. The cellular, physiological and genetic bases of sex are discussed. Other topics include sexual behaviour and the influence of sexual reproduction on evolution. Three lecture hours a week. Two laboratory hours every other week. Six credits. Course credit exclusions: SC/NATS 1610 6.00, SC/NATS 1650 6.00, SC/NATS 1675 6.00, SC/NATS 1690 6.00, AK/NATS 1820 6.00. NCR Note: This course is not open to any student who has passed or is taking SC/BIOL 1010 6.00.

SC/NATS 1670 6.00 Concepts in Human Health and Disease. This course examines health threats from a biological perspective, with focus on issues that are relevant to the 20-30 age group. For example: immunological, bacterial, viral and genetic diseases from a multi-disciplinary perspective. Three lecture hours. Two terms. Six credits. Course credit exclusion: AK/NATS 1840 6.00. NCR Note: This course is not open to any student who has passed or is taking SC/BIOL 1010 6.00.

SC/NATS 1675 6.00 Human Development. Biological development of the human being including the formation of germ cells, fertilization, embryological development, transmission of genetic and chromosomal characteristics and the structure of growing tissues. Emphasis may be placed on child development, learning, human evolution or aging. Three lecture hours for two terms. Six credits. Course credit exclusion: AK/NATS 1820 6.00, SC/NATS 1610 6.00, SC/NATS 1650 6.00, SC/NATS 1660 6.00, SC/NATS 1690 6.00. NCR Note: This course is not open to any student who has passed or is taking SC/BIOL 1010 6.00.

SC/NATS 1680 6.00 The Genetic Revolution. This course examines the impact of recent genetic discoveries on medicine, agriculture, ecosystems and industry. New technologies employ enzymes to cut and splice DNA from different organisms. This has the potential to benefit human society but gene manipulations (genetic engineering) raise

important ethical questions. Three lecture hours. Two terms. Six credits. Course credit exclusion: AK/NATS 1860 6.00. NCR Note: This course is not open to any student who has passed or is taking SC/BIOL 1010 6.00.

SC/NATS 1690 6.00 Evolution. Origin and diversification of life forms on Earth. Introduction to the historical development of evolutionary theory. Classification of living things and to scientific explanations of how biological diversity has arisen. Three lecture hours a week. Two laboratory hours every other week. Six credits. Course credit exclusions: AK/NATS 1770 6.00, AK/NATS 1820 6.00, AK/NATS 1860 6.00, SC/NATS 1610 6.00, SC/NATS 1640 6.00, SC/NATS 1650 6.00, SC/NATS 1660 6.00, SC/NATS 1675 6.00. : NCR Note: This course is not open to any student who has passed or is taking SC/BIOL 1010 6.00.

SC/NATS 1700 6.00 Computers, Information and Society. Selected survey and critical examination of the history and present-day development of information and communication technologies and of their interplay with society and culture. Three lecture hours. Two terms. Six credits. Course credit exclusion: AK/NATS 1700 6.00.

SC/NATS 1710 6.00 The Nature and Growth of Scientific Thought. Science is examined as an intellectual activity. Emphasis is placed on the evolution of some key concepts to show the nature and methodology of natural science, the development of scientific ideas and their grounding in experience. Three lecture hours plus scheduled laboratory sessions. Two terms. Six credits. Course credit exclusions: SC/NATS 1730 6.00, AK/NATS 1710 6.00.

SC/NATS 1720 6.00 Light and Sound. How light and sound waves travel and transfer energy. Topics will include: sound waves and musical instruments; light waves and stars; technologies such as lasers and CDs; rainbows and mirages. Three lecture hours a week. Two laboratory hours every other week. Two terms. Six credits. Course credit exclusions: AK/NATS 1870 6.00, SC/NATS 1520 3.00, SC/NATS 1870 6.00

SC/NATS 1730 6.00 Scientific Change. The nature of scientific change based on case histories, which may include Ptolemaic and Copernican astronomy, Newtonian mechanism, Darwinian evolution, the rise of bacteriology, Einstein's relativity and the discovery of the structure of DNA. Three lecture hours. Two terms. Six credits. Course credit exclusion: AK/NATS 1710 6.00, SC/NATS 1710 6.00.

SC/NATS 1740 6.00 Astronomy. A discussion of our present understanding of the universe and its constituents. Topics include the structure and evolution of the planets, stars, galaxies and the universe as a whole. Three lecture hours per week, two-hour laboratory sessions every second week. Two terms. Six credits. Course credit exclusions: SC/NATS 1880 6.00, AK/NATS 1720 6.00, AK/NATS 1750 6.00. NCR Note: No credit will be retained if this course is taken after the successful completion of SC/PHYS 1070 3.00. Not open to any students enrolled in the Astronomy stream.

SC/NATS 1745 6.00 History of Astronomy. Astronomy from a historical perspective. A selective survey of astronomical knowledge, techniques, applications and uses from the earliest civilizations to the present. Three lecture hours. Two terms. Six credits. Course credit exclusion: AK/NATS 1750 6.00.

SC/NATS 1750 6.00 The Earth and Its Atmosphere. Topics addressed concerning the Earth include geochronology, seismology, geomagnetism and plate tectonics. Topics addressed concerning the atmosphere include the general circulation, climate change, ozone depletion, weather and violent storms. Three lecture hours, one tutorial hour. Two terms. Six credits. Course credit exclusions: SC/NATS 1780 6.00, SC/EATS 1010 3.00, SC/EATS 1011 3.00. Not open to any student who has passed or is taking a course in earth and atmospheric science.

SC/NATS 1760 6.00 Science, Technology and Society. A study of the intellectual and social nature of science and technology, their similarities and differences. The course may deal with the impact of scientific and technological advancements on societies both past and present. Three lecture hours. Two terms. Six credits. Course credit exclusion: AK/NATS 1760 6.00.

GL/NATS 1770 6.00 Heredity and Society. A study of genetic variation in individuals and populations and the genetic basis of evolution. Specific attention is focused on human genetic knowledge and technology.

SC/NATS 1775 6.00 Technology and Civilization. A study of the most important technological advances in the context of various civilizations throughout history. Selected important innovations (e.g. mechanized agriculture, wind, water, steam and nuclear power generation, aviation and railways and communications). Three lecture hours. Two terms. Six credits. Course credit exclusions: AK/NATS 1780 6.00, SC/NATS 1810 6.00.

SC/NATS 1780 6.00 Weather and Climate. The weather and health of our atmosphere affect us all. This course provides an overview of the Earth's atmosphere; its chemistry, physics and dynamics; an introduction to meteorology and weather forecasting; and a discussion of climate. Canada's weather and climate are emphasized. Three lecture hours, one tutorial hour. Two terms. Six credits. Course credit exclusions: SC/NATS 1750 6.00, SC/EATS 1011 3.00. Not open to any students enrolled in the Earth and Atmospheric Science program.

SC/NATS 1790 6.00 The Science of Flight. This course presents basic physical principles by studying various aspects of aircraft and flying. Topics include properties of air as a fluid, aero-engines, basic theory of flight, principles of aircraft instruments and navigation and processes which influence the weather. Three lecture hours, one tutorial hour. Two terms. Six credits.

GL/NATS 1800 3.00 Evolution and Ecology of Humans. This course contrasts the ecological conditions attendant upon early human evolution with the complex environmental situations now faced by modern technological societies. Essential themes are Darwinism, the effect of earlier cultures upon the environment and selected modern examples in human ecology.

SC/NATS 1810 6.00 Energy. Conversion technology of current and possible future energy sources is described. The extent of the resource base of each and the environmental consequences of utilization are discussed, with emphasis on nuclear power and energy policies of Ontario and Canada. Three lecture hours, one tutorial hour. Two terms. Six credits. Course credit exclusion: AK/NATS 1780 6.00.

SC/NATS 1820 6.00 Molecules and the Mind. A study of the role of chemistry in contemporary society. Relevant topics are selected each year to show how chemistry impinges upon daily life. Important historical perspectives and basic concepts, such as energy and atomic/molecular structure, are introduced as background. Three lecture hours, one tutorial hour. Two terms. Six credits. Course credit exclusion: SC/NATS 1830 6.00. NCR Note: No credit will be retained if this course is taken after successful completion of SC/CHEM 1000 3.00 or SC/CHEM 1001 3.00. Not open to any students enrolled in the Chemistry program.

SC/NATS 1830 6.00 Matter and Structure. From atomic structure comes molecular structure, and, in turn, come the physical properties of matter composed of atoms and molecules. The relationship between physical properties and usefulness of materials is developed. The role of science in developing new materials is discussed. Three lecture hours per week, two tutorial/laboratory hours in alternate weeks. Two terms. Six credits. Course credit exclusion: SC/NATS 1820 6.00. NCR Note: No credit will be retained if this course is taken after successful completion of SC/CHEM 1000 3.00 or SC/CHEM 10001 3.00. Not open to any students enrolled in the Chemistry program.

SC/NATS 1840 6.00 Science, Technology and the Environment. Environmental issues, how they arise, and an exploration of possible solutions to present and future problems. Topics include pollution, water quality, biodiversity, resource usage, population, global warming, and medical consequences of environmental changes. Three lecture hours. Two terms. Six credits. Course credit exclusions: AK/NATS 1790 6.00, ES/ENVS 1500 6.00, SC/NATS 1510 3.00, SC/NATS 1640 6.00, SC/NATS 1770 6.00. Note: Not open to any students enrolled in the Faculty of Environmental Studies.

SC/NATS 1850 6.00 Science and Pseudoscience. Such topics as astrology, extrasensory perception, the ideas of Velikovsky, as examples of beliefs which meet with little approval in the scientific community. Methodological and social criteria by which science functions in contrast with the attitudes prevalent among those operating along its fringes. Three lecture hours. Two terms. Six credits. Course credit exclusion: AK/NATS 1850 6.00.

SC/NATS 1855 6.00 Frontiers in Modern Science. The concept of the frontier as a zone of exploration and innovation in science and technology will be presented. The historical role of society's exploration of frontiers within the natural world and the resulting growth of science and technology will be reviewed. Three lecture hours. Two terms. Six credits. Course credit exclusion: AK/NATS 1830 6.00.

SC/NATS 1860 6.00 Science: Past, Present and Future. Modern science has drastically changed our lives and how we perceive the world and will do so in future. This course explores, through case studies of revolutions in biological and physical sciences, how scientists work, experiment, theorize, communicate and debate. Three lectures and one hour online tutorial per week. Two terms. Six credits.

SC/NATS 1870 6.00 Understanding Colour. A cross-disciplinary approach in examining colour, with the aim of understanding colour from the multiple viewpoints of art, physics, chemistry, physiology and history. Topics include: perception, wave nature of light, spectroscopy, colour harmony and contrast, natural phenomena, dyes and pigments. Three lecture hours. Two terms. Six credits. Course credit exclusion: AK/NATS 1870 6.00, SC/NATS 1720 6.00

GL/NATS 1880 6.00 Human Reproduction and Development. A biological examination of human reproduction and development. Emphasis is on: conditions of fertility and infertility; stages of embryonic/fatal development; generic and environmental factors relating to birth defects.

SC/NATS 1880 6.00 Life Beyond Earth. This course considers the various factors required for life to exist beyond Earth, both life that may have evolved elsewhere and what would be necessary for humans moving out into space. Three lecture hours per week plus alternate week tutorial/laboratory sessions of two hours. Two terms. Six credits. Course credit exclusions: SC/NATS 1740 6.00, AK/NATS 1720 6.00, AK/NATS 1730 6.00. NCR Note: Not open to any student who has passed or is taking SC/PHYS 1070 3.00. Not open to any students enrolled in the Astronomy program.

GL/NATS 1890 6.00 Introduction to the Science, Technology and Society. Introduction to the intellectual and sociocultural context of science and technology. The course will deal with the impact of scientific and technological developments on societies, both past and present. Topics include: historical origins of modern science; science and the humanities; and ethical and philosophical controversies endangered by scientific/technological advances (e.g. biotechnology, computers).

SC/NATS 1910 6.00 Food, Science and Technology. A study of what food is, where it comes from and the roles various foods play in human nutrition and health. Topics include scientific and technological aspects of modern food production such as genetics, farming, fishing, and beverage industries. Three lecture hours. Two terms. Six credits.

SC/NATS 1920 6.00 The Nature and Growth of Ideas in Mathematics. Students are shown the central position of mathematics in our culture: great discoveries in mathematics and their effect on general culture and society; history of mathematics; mathematics of art and architecture, sound, games and gambling and computing. Course credit exclusion: AK/MATH 1700 6.00

GL/NATS 2300 3.00 Écologie générale. Ce cours offre une introduction aux étudiant(e)s en arts libéraux à l'étude scientifique des relations entre les organismes et leur environnement physique et biologique. Les principes généraux serviront à interpréter la distribution, l'abondance et les caractéristiques des organismes dans l'espace et le temps.

Language of Instruction: French

GL/NATS 2300 3.00 General Ecology. This course is an introduction for non-science majors to the scientific study of relationships between organisms and their physical and biological environments. General principles will be used to interpret patterns in the distribution, abundance, and characteristics of organisms in space and time. Course credit exclusion: GL/NATS 1760 3.00(EN).

GL/NATS 2310 3.00 Conservation Biology. Conservation biology has merged as a major new subject area addressing the alarming loss of biological diversity throughout the world. The number of species that are becoming endangered or vulnerable is unprecedented and continues to accelerate. This course explores means of prevention of loss, the causes of species declines and the effect of human intervention. The goals of this course are to understand concepts and theories underlying conservation biology, to develop critical thinking in matters related to biodiversity (both scientifically and politically) and to learn tools used by conservation biologists to protect diversity.

GL/NATS 2400 6.00 Introduction aux sciences de la terre et de l'univers. Ce cours offre aux étudiants les connaissances de base des Sciences de la terre et de l'Univers. Son contenu couvre les disciplines suivantes des sciences de la terre : géologie générale, sédimentologie, tectonique et Géostatistique ainsi que la cosmologie.

Language of Instruction: French

SC/NATS 2700 6.00 Science for Teachers. A study of key ideas in the physical, life, earth, space and environmental sciences necessary to teach the Ontario elementary science curriculum. The social dimensions of science and technology, especially relating to Canada, are integrated with the scientific material. Three lecture hours per week. Two laboratory hours every other week. Two terms. Six credits. Note: Normally open only to those coregistered in the Faculty of Education primary/junior or junior/intermediate programs or planning to apply for those programs. Note: This course fulfills the University's general education requirement for non-science students. Course credit exclusion: SC/NATS 2700 9.00.

GL/NATS 2910 6.00 Medieval Technology, Practice and Theory. A history of technology in the Middle Ages and the economic, social and political ramifications of its use.

Cross-listed to: GL/HIST 2910 6.00, GL/NATS 2910 6.00

GL/NATS 2910 6.00 Technologie du moyen âge : pratique et théorie. Histoire de la technologie employée au cours du moyen âge, les ramifications économiques, sociales, et politiques de son emploi.

Language of Instruction: French

Cross-listed to: GL/HIST 2910 6.00, GL/NATS 2910 6.00

GL/NATS 2920 6.00 Medieval Science: Thought and Practice. A history of scientific thought in the Middle Ages, its divisions, its scope and its place in medieval society.

Cross-listed to: GL/HIST 2920 6.00, GL/NATS 2920 6.00

GL/NATS 2920 6.00 Science médiévale, pensée et pratique. Histoire de la pensée scientifique au moyen âge, ses divisions, sa portée, et sa place sociale.

Language of Instruction: French

Cross-listed to: GL/HIST 2920 6.00, GL/NATS 2920 6.00

GL/NATS 3100 6.00 Individual Studies. Students do independent reading and research together with written assignments under the guidance of a member of the college. All individual studies in multidisciplinary studies at Glendon are subject to specific regulations which the department will supply on request. (Since there is no assurance that a proposed project will be accepted, the student is encouraged to enrol in another course until a decision is made concerning the proposal.)

GL/NATS 3100 6.00 Travail individuel. Tout étudiant choisit un programme d'étude individuel qu'il mènera à bien sous la direction d'un professeur du collège. Attention : Tous les Travaux individuels offerts dans le cadre d'Études pluridisciplinaires à Glendon sont régis par des règlements précis, que le secrétariat d'Études pluridisciplinaires tient à la

disposition des étudiants. (Étant donné qu'il n'existe aucune garantie que ce projet soit accepté, on conseille vivement à l'étudiant de s'inscrire dans un autre cours jusqu'à ce qu'une décision soit prise.)

GL/NATS 3200 6.00 Historical Trends in Human-Environmental Interrelationships. This course examines the profound impact of ancient environments upon living organisms, with reference to specific biological problems such as extinction. Early Paleolithic humans interacted with various natural ecosystems, which became modified as a result. The subsequent historical impact of human activities on the environment resulted in a trend of increasing pressures upon animal populations, world vegetation and soils. Current urban-rural land use conflicts and conservation problems exemplify the modern impact. Prerequisite: GL/NATS 1540 6.00 or GL/NATS 2300 3.00 or permission of the department.

GL/NATS 3205 3.00 Human-Insect Interactions. This course offers an overview of the multifaceted relationships between the human species and insects. It will include an introduction to entomology. The following aspects will be discussed: economic, health and environmental impact of insects, insects in arts, culture, mythology, phobia etc.

GL/NATS 3215 3.00 Communication and Sensory Ecology. This course explores the various categories of signals used by animals in a variety of contexts, and the sensory channels which allow these signals to be sent and received. Other topics include: honest and deceitful communication; Games Theory and Information Theory applications; bird songs; echolocation; bioluminescence; and the evolution of communication. Prerequisite: GL/NATS 1540 6.00 or GL/NATS 2300 3.00 or permission of the Department.

GL/NATS 3230 6.00 Génétique et santé humaine. Le cours présente les bases cellulaires et moléculaires de la génétique. Il adopte une approche historique de la génétique moderne mendélienne et classique. Il vise à initier les étudiants à l'analyse génétique à la thérapie génique, il aborde les problèmes actuels de la bioéthique, où l'être humain passe l'objet à soigner à l'objet à améliorer et à transformer. Condition(s) préalables : cours de biologie niveau secondaire/CEGEP ou GL/NATS 1540 6.00. Cours incompatibles : GL/NATS 2010 6.00 (2001-2002), GL/NATS 3010 6.00 (2002-2003).

Language of Instruction: French

GL/NATS 3310 3.00 Environmental Impact Assessment. This course offers a review of the methodology involved in environmental impact and risk assessments, with an emphasis on the Canadian process and legislation. Biological methodologies as well as management, planning and other assessment tools will be examined. Prerequisite: GL/NATS 1540 6.00 or GL/NATS 2300 3.00 or permission of the department.

GL/NATS 3500 6.00 Chimie de l'environnement. Ce cours fournit aux étudiants les bases scientifiques nécessaires pour comprendre l'impact de la chimie industrielle sur l'environnement. Les thèmes abordés couvrent, entre autres, les sources de la pollution de l'air, de l'eau, et du sol, la dissémination de la pollution dans la biosphère, ses effets, et le contrôle que l'on doit exercer.

Language of Instruction: French

GL/NATS 3629 3.00 Environmentalism as a Social Movement. This course examines environmentalism from the perspective of social movement analysis. It covers varieties of environmentalism, organizations that embody and articulate these various forms, the institutionalization of environmentalism in governments and the impact of environmentalism on the private sector. Course credit exclusion: GL/SOCI 3980 6.00.

Cross-listed to: GL/NATS 3629 3.00, GL/SOCI 3629 3.00, GL/SOSC 3629 3.00

GL/NATS 3635 3.00 Health Psychology. This course examines psychological contributions to health maintenance, prevention and treatment of illness, and to the identification of correlates of specific conditions in health and illness. Prerequisite: GL/PSYC 2510 6.00. Course credit exclusions: AP/PSYC 3170 3.00, GL/PSYC 3010 3.00 (Fall/Winter 1988-1989, Fall/Winter 1989-1990, Fall/Winter 1991-1992) and GL/PSYC 3700 3.00.

Cross-listed to: *GL/NATS 3635 3.00, GL/PSYC 3635 3.00*

GL/NATS 3635 3.00 Psychologie de la santé. La psychologie de la santé constitue un secteur d'activité en pleine effervescence. Le cours mettra l'emphase sur le rôle scientifique de la psychologie appliqué aux problèmes de santé, le stress psychologique ainsi que plusieurs variables modératrices. Condition préalable : *GL/PSYC 2510 6.00*. Cours incompatibles : *AP/PSYC 3170 3.00, GL/PSYC 3010 3.00 (Fall/Winter 1988-1989, Fall/Winter 1989-1990, Fall/Winter 1991-1992) and GL/PSYC 3700 3.00*.

Language of Instruction: French

Cross-listed to: *GL/NATS 3635 3.00, GL/PSYC 3635 3.00*

GL/NATS 3640 3.00 La Psycholinguistique. Ce cours examinera les concepts, les théories, et les recherches empiriques les plus importants dans l'étude du langage en tant que système symbolique et en tant qu'activité motrice biologique. On traitera de l'acquisition du langage, du bilinguisme, et de la relation entre le langage et la pensée. Condition préalable : *GL/PSYC 2510 6.00* ou l'équivalent. Cours incompatible : *AP/PSYC 3190 3.00*.

Language of Instruction: French

Cross-listed to: *GL/LIN 3640 3.00, GL/NATS 3640 3.00, GL/PSYC 3640 3.00*

GL/NATS 3640 3.00 Psychological Studies of Language. Human language is unique among communication systems in its richness, complexity of structure, and function. This course examines language both as a symbolic system and as a motor activity produced by a biological organism. Topics include language acquisition, bilingualism and the interrelationship between language and thinking. Prerequisite: *GL/PSYC 2510 6.00* or equivalent. Course credit exclusion: *AP/PSYC 3190 3.00*.

Cross-listed to: *GL/LIN 3640 3.00, GL/NATS 3640 3.00, GL/PSYC 3640 3.00*

GL/NATS 3642 3.00 La révolution scientifique. Ce cours d'histoire a pour objet d'étudier les courants philosophiques du XVII^e siècle qui ont fondé la science moderne. Les savants européens, les sociétés savantes et le grand public partagent le « goût du savoir » et par la suite, le renouveau scientifique se répand dans le monde entier. Cours incompatible : *GL/HIST 3405 3.00*.

Language of Instruction: French

Cross-listed to: *GL/HIST 3642 3.00, GL/HUMA 3642 3.00, GL/NATS 3642 3.00*

GL/NATS 3650 3.00 History of Experimental Psychology. This course introduces the student to the main lines of development of scientific psychology, as well as to the major theoretical systems which have emerged within psychology. Prerequisite: *GL/PSYC 2510 6.00* or equivalent. Course credit exclusion: *AP/PSYC 3470 3.00*.

Cross-listed to: *GL/NATS 3650 3.00, GL/PSYC 3650 3.00*

GL/NATS 3658 3.00 Genetic Technology: Its Applications to Industry, Medicine and Agriculture. This course will focus on DNA technology and its use in areas of health, medicine, pharmaceuticals, forensic science and animal and plant breeding. Ethical, legal, medical and environmental safety issues arising from the application of DNA technology will be discussed, using Canadian examples where possible. Course credit exclusion: *GL/NATS 3010C 3.00 (Fall 1996)*.

Cross-listed to: *GL/CDNS 3658 3.00, GL/NATS 3658 3.00*

GL/NATS 3670 3.00 Psychobiology. This course reviews the physiological basis of behaviour including elements of neuroanatomy, psycho-physiology, neuropsychology and psycho-pharmacology. Prerequisite: *GL/PSYC 2510 6.00* or equivalent. Course credit exclusion: *AP/PSYC 2240 3.00*.

Cross-listed to: *GL/NATS 3670 3.00, GL/PSYC 3670 3.00*

GL/NATS 3675 3.00 Humans as Primates: Comparative Evolutionary Views. This course discusses non-human primate research from comparative, developmental and evolutionary perspectives, focusing on its implications for human psychology. Topics may include primate

evolution (brain/behaviour) and ecology, parenting, mating, social dominance/affiliation, language, deception, self-awareness, cognition and imitation. Prerequisite: *GL/PSYC 2510 6.00*. Course credit exclusions: *AP/PSYC 3280 3.00, GL/PSYC/NATS 3010 3.00 (Winter 1994, Winter 1995, Winter 1997)*.

Cross-listed to: *GL/NATS 3675 3.00, GL/PSYC 3675 3.00*

GL/NATS 3675 3.00 L'humain comme espèce primate. Ce cours veut examiner la psychologie humaine de la perspective de notre histoire comme espèce dans l'ordre biologique Primata. Le cours discutera les connaissances actuelles sur les primates nonhumains de différentes perspectives - comparative, développementale, évolutionnaire - afin d'explorer leurs implications pour les humains. Cours incompatible : *AP/PSYC 3280 3.00*.

Language of Instruction: French

Cross-listed to: *GL/NATS 3675 3.00, GL/PSYC 3675 3.00*

GL/NATS 3680 3.00 Evolution of Behaviour in Animals. Research and theory with animals are considered. Perspectives in evolution, ethology, sociobiology and psychology are dealt with. Topics covered include facial, vocal and spatial communications; perception, learning and reproduction. Prerequisite: *GL/PSYC 2510 6.00* or equivalent. "Philosophy is to be studied, not for the sake of any definite answers to its questions, since no definite answers can, as a rule, be known to be true, but rather for the sake of the questions themselves; because these questions enlarge our conception of what is possible, enrich our intellectual imagination and diminish the dogmatic assurance which closes

the mind against speculation; but above all because, through the greatness of the universe which philosophy contemplates, the mind also is rendered great, and becomes capable of that union with the universe which constitutes its highest good." (Bertrand Russell)

1000-level philosophy courses provide a general introduction to philosophy, but are not required for philosophy majors or minors.

2000-level philosophy courses are introductory in nature (and thus open to all students), but they focus on specific areas of philosophy.

3000-level philosophy courses have prerequisites on a course-by-course basis. The prerequisites may include a specific course or courses, or the completion of a specified number of philosophy credits. For more detailed information, please see below.

All 4000-level philosophy courses have a general prerequisite of at least nine credits in philosophy. Some courses also have specific prerequisites. For more detailed information, please see below.

Courses in Philosophy/Cours en philosophie
